Jane Kennedy: HM Revenue and Customs (HMRC) is currently consulting with staff, trade unions and other key stakeholders on the proposals for those offices in cluster and individual locations in Wales. Before HMRC put recommendations to me for decision, extensive feasibility work is completed which includes visits to sites where appropriate. To date visits have been made by HMRC officials to all offices in Cardiff and Swansea urban centres where the decisions have already been announced. Visits have also been made to the cluster and individual offices in the east and south west of Wales including offices along the west coast of Wales and visits are planned for the remaining offices in mid and north Wales. Details of the specific dates when these visits took place could be provided only at disproportionate cost.

Mrs. Gillan: To ask the Chancellor of the Exchequer how many staff employed by HM Revenue and Customs in the debt management field force in Wales are fluent in the Welsh language. [219641]

Jane Kennedy: The Debt Management and Banking (DMB) field force in Wales currently have two staff members who are fluent in Welsh. There are also approximately 15 office based staff within Debt Management and Banking who provide support to Welsh speakers. DMB plan to provide the same level of service to Welsh speakers in future as it currently does and is working with other parts of HMRC to ensure this happens.

Mrs. Gillan: To ask the Chancellor of the Exchequer what savings it is estimated will be made from the proposed closure of each HM Revenue and Customs office scheduled for closure in Wales. [219642]

Jane Kennedy: The estimated estate savings for offices in the Cardiff and Swansea urban centres which HM Revenue and Customs (HMRC) plans to vacate are shown in the following table and were published in impact assessments on the HMRC website:

www.hmrc.gov.uk

on 29 February 2008. Final decisions on the future of other HMRC offices in Wales, will not be made until the findings of the consultation exercise and detailed feasibility work has been completed.

	Potential estate savings from vacation (£)
Cardiff urban centre	
Portcullis House, Cardiff	657,000
Crown Buildings, Newport	470,000
Taff Vale House, Pontypridd	154,000
Swansea urban centre	
Crown Buildings, Llanelli	138,000
Custom House, Swansea	41,000
Total	1,460,000

Mrs. Gillan: To ask the Chancellor of the Exchequer if he will publish the assessment he has made of the effect on local economies of closure of HM Revenue and Customs offices in Wales. [219643]

Jane Kennedy: HM Revenue and Customs (HMRC) specifically comments on socio-economic issues in its impact assessments which are completed for every building where a decision has been made to vacate. Decisions have been announced on the Cardiff and Swansea urban centres and those impact assessments are available on HMRC's internet site:

www.hmrc.gov.uk

Revenue and Customs: Yorkshire and the Humber

Hugh Bayley: To ask the Chancellor of the Exchequer what the annual estate cost is of *(a)* Swinson House, York, *(b)* Hilary House, York, *(c)* Cherry Court, Hull and *(d)* Custom House, Hull; and until what dates the Government have contractual obligations to rent or lease each building. [217940]

Jane Kennedy: HM Revenue and Customs (HMRC) is unable to disclose the annual estate costs for the buildings listed for reasons of commercial confidentiality.

All four of the buildings were included in the Strategic Transfer of the Estate to the Private Sector (STEPS) outsourcing deal with Mapeley STEPS Contractor Limited in April 2001. HMRC now occupies each building under the terms of the STEPS contract. The contract expires on 1 April 2021 but HMRC will be able to continue to occupy beyond this date and also has flexibility within the contract to vacate properties prior to the expiry date.

Hugh Bayley: To ask the Chancellor of the Exchequer how many staff Hilary House, York can accommodate; whether the Government intend to retain this building until 2011; whether they are considering sub-leasing any part of the building before 2011; and if he will make a statement. [217941]

Jane Kennedy: York was included in the announcement of 11 June 2008 of the next stage of HM Revenue and Customs' (HMRC) review as part of its change programme.

HMRC's planning assumption for Hilary House shows approximately 200 workstations. However, staff occupancy figures will vary depending on the operational requirements of the specific HMRC business units to be accommodated in the property.

HMRC has proposed the retention of Hilary House under the change programme and once the current stage of the review process concludes HMRC will be able to determine the final requirements for this building and will consider at that time any options for disposal of space that is identified as surplus to requirements.

Hugh Bayley: To ask the Chancellor of the Exchequer how many people used the HM Revenue and Customs enquiry centre at Swinson House in York in each of the last three years. [217942]

Jane Kennedy: The information is as follows:

HMRC Enquiry Centre in Swinson House, York, customers 2005-08

	Number of customers
2005-06	17,895
2006-07	20,284
2007-08	15,364

Hugh Bayley: To ask the Chancellor of the Exchequer if the Government will retain in York an HM Revenue and Customs inquiry centre, open to the public from 8.30am until 5.00pm Monday to Friday providing the current range of services, until 2011 at least; and what estimate he has made of the annual estate cost of doing so would be. [217943]

Jane Kennedy: HMRC will retain an inquiry centre in York. They review their opening hours regularly to ensure that they match customer demand and there are no plans to reduce the full time service they offer in York.

As the accommodation review is ongoing, the final decision for the relocation of the inquiry centre has yet to be determined. This will impact on annual estate costs. An estimate of potential costs, however, taken from two inquiry centres recently set up by HMRC is for annual estate costs of approximately £52,500. The annual estate cost comprises rent, landlord service charge, rates and utilities.

Stamp Duties: Scotland

Angus Robertson: To ask the Chancellor of the Exchequer how much the Exchequer received in stamp duty from Scotland in each year since 2002. [219128]

Kitty Ussher: Estimates of the amount of stamp duty land tax received in Scotland in 2005-06 and 2006-07 are available on the HMRC website at:

http://www.hmrc.gov.uk/stats/stamp_duty/table15-4-0506.xls

and

http://www.hmrc.gov.uk/stats/stamp_duty/table15-4-0607.xls

respectively.

Reliable estimates for Scotland for stamp duty land tax received are not available for earlier years.

A table showing estimates of stamp duty land tax for 2007-08 for the local authorities, counties and countries of the United Kingdom will be published in September.

No information is available for stamp taxes on shares receipts below the UK level.

Tax Avoidance

Jim Cousins: To ask the Chancellor of the Exchequer if he will direct HM Revenue and Customs to seek information from the US Internal Revenue Service on the sale of illegal tax shelters; and what information he has received on the availability in the UK of the VIPER products marketed by Ernst and Young. [219760]

Jane Kennedy: Under the terms of the bilateral double taxation convention between the United Kingdom and the United States, the tax authorities of the two states have regular discussions about tax avoidance schemes, exchanging any information that is necessary for the assessment, collection and enforcement of the taxes covered by the convention.

Trusts

Jim Cousins: To ask the Chancellor of the Exchequer what assessment *(a)* he and *(b)* HM Revenue and Customs have made of the implications for the Exchequer of new forms of trust created by the states of Jersey and other tax jurisdictions since 2005; and what representations the Government have made in response. [219799]

Jane Kennedy: The question of whether the income and gains of a trust are liable to United Kingdom taxes depends on a number of factors such as whether the trustees are treated as being resident in the United Kingdom for tax purposes, what connection the settler has to the trust, and what the beneficiaries of the trust are entitled to under the terms of the trust. The particular structures provided for by non UK law do not determine residence or chargeability to UK tax and HMRC has not carried out detailed analysis of these particular types of trust.

WORK AND PENSIONS

Citizens' Advice Bureaux: Finance

Mr. Harper: To ask the Secretary of State for Work and Pensions what additional *(a)* funding and *(b)* other support his Department plans to provide to Citizens Advice Bureaux in anticipation of the introduction of the employment and support allowance. [219444]

Mr. Timms: Employment and support allowance (ESA) will be introduced on the 27 October 2008 and the ESA programme is working with a range of customer representative groups including Citizens Advice Bureaux (CAB). Through this forum the ESA programme is committed to assist Citizens Advice Bureaux in introducing ESA into their organisation including the sharing of products to support implementation activity. The programme is working on areas highlighted through this group as areas of particular interest. This level of engagement will increase as we approach 27 October. The ESA programme Director, Phil Bartlett has met with senior CAB colleagues, to agree how we can work together to ensure the delivery of ESA is a success. This does not include any additional funding for the Citizens Advice Bureaux.

Crisis Loans

Jenny Willott: To ask the Secretary of State for Work and Pensions (1) how many people were subject to a county court claim by his Department for defaulting on repayments of a *(a)* crisis loan and *(b)* budget loan in each year since 2003, broken down by the (i) on benefit caseload and (ii) off benefit caseload; and if he will make a statement; [215893]

(2) how many people have been subject to a county court judgment as a result of a county court claim by his Department for defaulting on repayments of a

(a) crisis loan and *(b)* budgeting loan in each year since 2003, broken down by (i) on-benefit caseload and (ii) off-benefit caseload; and if he will make a statement; [215982]

(3) how many people have had items repossessed for defaulting on repayments of *(a)* a crisis loan and *(b)* a budgeting loan in each year since 2003, broken down by (i) on-benefit caseload and (ii) off-benefit caseload; and if he will make a statement; [215990]

(4) in how many cases his Department has taken action against people who have defaulted on repayments of *(a)* a crisis loan and *(b)* a budgeting loan in each year since 2003, broken down by (i) on-benefit caseload and (ii) off-benefit caseload; and if he will make a statement. [216082]

Mr. Plaskitt: Where a person is in receipt of benefit, recovery is by means of deductions from benefit only.

Court action is only taken against those no longer on the benefit caseload. Such action is taken only should a voluntary arrangement not be possible, or if there is a default on that arrangement. The Department does not seek repossession of items in default cases.

The number of people subject to a county court claim by the Department for Work and Pensions for defaulting on Social Fund repayments is set out in the following table. The information cannot be separated between budgeting loans and crisis loans. No action has been taken to enforce recovery of outstanding loans through the courts since 2005-06.

	Number of court claims and judgements in Social Fund cases
2003-04	6,009
2004-05	3,792
2005-06	1,076

As part of the Department's programme to bring increased focus to the management and recovery of debt generally, the decision was made to transfer, from 2005, the management and recovery of Social Fund off-benefit cases to the Department's specialist Debt Management unit. Referring the outstanding Social Fund loans to Debt Management has enabled the use of their specialist skills in pursuing recovery from customers who are no longer in receipt of benefit.

This transfer of cases to Debt Management is ongoing, and has already resulted in significant recoveries on loans from those no longer in receipt of benefit, without a need to refer for court enforcement.

Jenny Willott: To ask the Secretary of State for Work and Pensions how many and what proportion of crisis loan applications were alignment payments in each of the last five years; and, if he will make a statement. [215923]

Mr. Plaskitt: The available information is in the following table.

Crisis loan applications for Great Britain

	Estimated applications for alignment payments processed	*Estimated proportion of applications processed which were for alignment payments*
2003-04	582,000	42
2004-05	586,000	44
2005-06	588,000	43
2006-07	603,000	42
2007-08	905,000	43

Notes:
Figures rounded to the nearest thousand.
Source:
The DWP Social Fund Policy, Budget and Management Information System (PBMIS) does not hold data on crisis loan applications by the reason for the application. However, the proportion of applications processed which were for alignment payments can be estimated from scans of crisis loan applications. Each such scan consists of applications processed in the relevant financial year and held on the Social Fund Computer System at the end of that year. (Each scan records the latest decision on each application; this may be an initial decision or a review decision.) These estimated proportions have then been applied to the numbers of applications processed obtained from PBMIS.

Jenny Willott: To ask the Secretary of State for Work and Pensions how many and what proportion of *(a)* crisis loans and *(b)* budgeting loans were being repaid at (i) 12 per cent., (ii) 10 per cent. and (iii) five per cent. in each year since 2003; and if he will make a statement. [215927]

Mr. Plaskitt: The information is not available for budgeting loans before 2006-07; or for crisis loans. The available information is given in the tables.

Budgeting loans for Great Britain for 2006-07

Repayment rate (%)	*Number of initial awards*	*Proportion of all initial awards (%)*
12	434,000	33.4
10	297,000	22.9
5	324,000	25.0

Budgeting Loans for Great Britain for 2007-08

Repayment rate (%)	*Number of initial awards*	*Proportion of all initial awards (%)*
12	401,000	34.3
10	277,000	23.7
5	298,000	25.5

Notes:
1. Figures are based on (initial) awards made in each year, not on awards being repaid in each year.
2. Figures are for initial awards only. Awards made after review are not included.
3. The current standard repayment rates are 12 per cent, 10 per cent and five percent. These rates were introduced for applications received on or after 3rd April 2006. Some awards made in the early part of 2006-07 were for applications received before 3 April 2006, to which the previous standard repayment rates of 15 per cent. 10 per cent. and five per cent. applied.
4. When a standard repayment rate is used, the weekly repayment amount for a budgeting loan is calculated by multiplying the repayment rate by the weekly available income, then rounding to the nearest penny. For each award, the scan does not give the repayment rate, but only the weekly repayment amount and the weekly available income. The repayment rate calculated from these two quantities may differ slightly from the true repayment rate, because of the rounding of the repayment amount. To allow for this, the stated number of awards with a repayment rate of 12 per cent is actually the number with a calculated repayment rate of 12 per cent ± 0.05 per cent. Similarly, for the other standard repayment rates, 10 per cent ± 0.05 per cent and five per cent ± 0.05 per cent have been used.
5. Numbers have been rounded to the nearest 1,000.
6. Proportions have been calculated using non-rounded numbers.
Source:
Analysis of scans of the Social Fund Computer System (SFCS) taken at the end of each month, showing Budgeting Loan initial awards recorded on SFCS during the month.

Departmental Computers

Mr. Peter Ainsworth: To ask the Secretary of State for Work and Pensions what estimate he has made of *(a)* the number of computer devices left on overnight in his Department when not in use and *(b)* the cost of leaving computer devices on overnight when not in use in each of the last five years; and if he will make a statement. [217873]

Mrs. McGuire: Statistics on the numbers of instances (and therefore any total related costs) are not available, and to obtain them would be at disproportionate cost. The Department for Work and Pensions recognises that PCs being left on overnight waste energy and as a result, instructs and regularly reminds staff to turn off PCs at the close of their working day.

Departmental ICT

Bob Spink: To ask the Secretary of State for Work and Pensions how many staff have access to his Department's IT infrastructure at their home. [216382]

Mrs. McGuire: The information on the number of people authorised to work from home within the Department for Work and Pensions is not collated centrally. It is controlled and managed locally and the collation of such information would involve disproportionate cost.

In addition to those who work at home normally, the Department for Work and Pensions currently has 7,536 members of staff who have been supplied with an approved laptop computer that is able to provide secure access to the Department's IT infrastructure, for example to e-mail, from their home.

All remote access is provided via a secure electronic gateway that is provided by BT.

In addition to the secure electronic gateway, all of the Department's laptop computers have encrypted internal hard drives and access to any computer services provided by the Department's IT infrastructure, such as e-mail, requires the use of a personal access card that utilises "Chip and Pin" technology.

Departmental Information Communications Technology

Harry Cohen: To ask the Secretary of State for Work and Pensions with reference to his Department's proposals to replace progressively its IT contracts by 2015, if he will list *(a)* the contracts in place, *(b)* the value of each contract and *(c)* the expected date of termination of each contract when entered into; whether any costs are expected to arise from early termination of contracts; and what assessment he has made of the value for money offered by each contract. [217682]

Mrs. McGuire: The IT contracts that the Department is progressively replacing are:

Standard Services Business Allocation (SSBA);

Integrated Communications Network Services Business Allocation (ICONS) contract; and

the Unity Framework Agreement.

Value of each contract:

SSBA expected spend will be £2.9 billion;

ICONS expected spend will be £0.9 billion; and

The Unity Framework Agreement allows for service orders to be let within it; the value of those awarded to date is £65.5 million.

The expiry of each of these agreements is as follows:

SSBA expires in August 2010, but can be extended to February 2015.

ICONS expires in March 2011, but can be extended to February 2015.

The Unity Framework agreement expires in February 2009, however contracts placed within that term may have an expiry beyond February 2009. The only contract that currently falls into that category is in respect of the Employment and Support Allowance, whose expiry is June 2011.

The Department has no plans to terminate any of these contracting arrangements earlier than the contracted expiry date. Should it become necessary, the SSBA, ICONS and Unity contracting arrangements have the appropriate provisions for early termination.

Value for Money:

The SSBA and ICONS contracts prior to their agreement were benchmarked by external specialists; the resultant contracts have delivered substantial savings on IT costs and have also provided improved service levels for the Department.

The Unity Framework Agreement:

Which was itself the outcome of an open competition—comprises multiple suppliers in differing categories; requirements being sourced through Unity are competed through the relevant category, thus driving out value for money for the Department.

Additionally, the SSBA, ICONS and Unity arrangements have 'Benchmarking' clauses that can be utilised at certain times to test their value for money relative to the market.

Departmental Manpower

Mr. Maude: To ask the Secretary of State for Work and Pensions how many permanent staff in *(a)* his Department and *(b)* its agencies are classed as (i) staff without posts and (ii) part of a people action team. [215581]

Mrs. McGuire: As at 31 May 2008 there were 368 permanent members of staff in the Department for Work and Pensions who were without a permanent post. The following table shows the number of staff in each business area of the Department.

Business area	*Staff without a permanent post*
Jobcentre Plus	273
Pensions, disability and carer services	41
Child Support Agency	5
Rest of the Department	49

Staff without permanent posts are actively engaged in delivering a range of departmental projects and duties while seeking a new permanent position. They are given priority for posts in this Department and other Government Departments.

This Department does not have any people action teams.

Departmental Pay

Mr. Hoban: To ask the Secretary of State for Work and Pensions how much was claimed in reimbursable expenses by special advisers in his Department in each of the last 10 years. [215238]

Mrs. McGuire: Records of expenses are available from 1 April 2002 and are shown in the following table:

Period of the claim	*Amount claimed (£)*
1 April 2008 to 30 June 2008	0
1 April 2007 to 31 March 2008	215.21
1 April 2006 to 31 March 2007	2,024.18
1 April 2005 to 31 March 2006	435.50
1 April 2004 to 31 March 2005	0
1 April 2003 to 31 March 2004	64
1 April 2002 to 31 March 2003	121.65
1 April 2001 to 31 March 2002	[1]—
1 April 2000 to 31 March 2001	[1]—
1 April 1999 to 31 March 2000	[1]—
1 April 1998 to 31 March 1999	[1]—

[1] No records available

These figures represent expenses that have been incurred and claimed individually in respect of the special advisers concerned, as part of their role in supporting Ministers on official business.

Procedures for reimbursing staff expenses are set out in departmental guidance and are in line with the provisions set out in the civil service management code. The code can be viewed at:

www.civilservice.gov.uk/iam/codes/csmc/index.asp.

Departmental Research

Bob Spink: To ask the Secretary of State for Work and Pensions what proportion of his Department's budget and that of its predecessor Department was spent on research in each of the last 10 years. [218069]

Mrs. McGuire: The Department's expenditure on social research for the last seven financial years is given in the following table:

Financial year	*Research expenditure (£ million)*	*Research expenditure as percentage of DEL*
2001-02	11.8	0.24
2002-03	10.2	0.17
2003-04	12.5	0.21
2004-05	14.2	0.24
2005-06	16.9	0.29
2006-07	15.2	0.26
2007-08[1]	15.0	0.26

[1] estimated outturn for DEL

The figures on DWP research spend are supplied to the Office for National Statistics on an annual basis. The figures for Department of Work and Pensions DEL spend are taken from table 5 of the annual departmental report. DWP was only established in 2001 and so it is not possible to go back 10 years.

Departmental Telephone Services

Mr. Denis Murphy: To ask the Secretary of State for Work and Pensions how many enquiries his Department received through its 0800 and 0845 numbers in each of the last three years. [214295]

Mrs. McGuire: Inquiries to the Department of Work and Pensions through 0800 and 0845 numbers for the last three years are:

DWP contact centres

	Total inquiries[1] to DWP contact centres during normal opening hours Year (April to March)		
	2005-06	*2006-07*	*2007-08*
0800	2,994,064	1,944,284	1,550,576
0845	21,322,774	22,064,546	22,519,633
(0800 and 0845)[1]	18,950,827	19,920,108	18,905,753
Total	43,267,665	43,928,938	42,975,962

[1] Inquiries, is defined as total calls offered to DWP contact centres during their normal hours of opening. Information is not available in all cases to distinguish between those calls received to 0800 numbers and those to 0845 numbers.

Departmental Wastes

Mr. Jenkins: To ask the Secretary of State for Work and Pensions what steps his Department has taken to reduce the volume of waste produced by it and sent to landfill in each of the last two years. [215884]

Mrs. McGuire: The following table shows the total waste produced, the amount of waste recycled and the amount sent to energy recovery facilities/landfill for the past two years for the Department for Work and Pensions, as reported against the Sustainable Operations on the Government Estate (SOGE) waste target. Information for the baseline year (2004-05) has also been included to facilitate comparisons.

	[1]2004-05	*2006-07*	*2007-08*
Total waste produced (metric tonnes)	30,411	22,365	20,343
Recycling (metric tonnes)	15,643	14,881	12,952
Recycling as percentage of total waste produced	51.4	66.5	63.7
Waste sent to energy recovery facilities and landfill as percentage of total waste produced	48.6	33.5	36.3

[1] Baseline year.

Total waste arisings have fallen by over 33 per cent. since the baseline year. The Department aims to be an exemplar of sustainable procurement, and we actively encourage good demand management, to procure only the goods (or services) that we need to support the delivery of our business.

We are also committed to working with our suppliers to identify opportunities to reduce the amount of waste that is produced—for example by reducing packaging where feasible. Where delivery of contracts take place on the DWP estate there is a requirement for all our suppliers to help meet the SOGE targets, including those for waste.

Our rate of recycling has grown and remains well in excess of the 2010 target to recycle 40 per cent. of total waste. This has been mainly due to the implementation of the Total Paper Recycling Scheme across the estate over the last five years by Land Securities Trillium and their service partners. We also operate an intranet based "Swap Shop" which enables staff across DWP to redistribute surplus goods, which might otherwise have been sent to landfill. During 2008, 500 "lots" were found new homes.

A pilot is under way across the Yorkshire and Humber region to further enhance our recycling performance by introducing a new initiative "Recycle It—DWP" This will provide additional paper and cardboard recycling facilities, as well as providing opportunities to recycle other waste such as glass, cans and some plastic. If successful, it will be extended across the entire estate wherever viable.

Home Information Packs

Robert Neill: To ask the Secretary of State for Work and Pensions how many home information packs have been commissioned by *(a)* his Department and *(b)* its agencies to market a residential property; for which properties; at what cost; and whether a voluntary home condition report was purchased as part of the packs. [219018]

Mrs. McGuire: None. The requirement to prepare Home Information Packs applies to the marketing for sale of residential properties. This Department has not been involved in any such transactions since 1 August 2007.

Incapacity Benefit: Bexley

Mr. Evennett: To ask the Secretary of State for Work and Pensions what percentage of the working age population of Bexleyheath and Crayford constituency receive incapacity benefit. [218615]

Mrs. McGuire: At November 2007, 4.7 per cent. of the working age population of the Bexleyheath and Crayford constituency were in receipt of incapacity benefit or severe disablement allowance.

Source:

DWP Information Directorate 100 per cent. WPLS and ONS experimental small area population estimates (2005)

Incapacity Benefit: Greater London

Mr. Evennett: To ask the Secretary of State for Work and Pensions what estimate he has made of the number of children who were aged *(a)* under five, *(b)* five to 11 and *(c)* 12 to 16 years living in households in receipt of incapacity benefit or severe disablement allowance in each London local authority area in each of the last 10 years. [218616]

Mrs. McGuire: The information is not available for households in the format requested. The available information, which is for those claiming Incapacity Benefit or Severe Disablement Allowance, has been placed in the Library.

Mr. Evennett: To ask the Secretary of State for Work and Pensions how many households were in receipt of incapacity benefit or severe disablement allowance in each parliamentary constituency in London in each of the last 10 years. [218617]

Mrs. McGuire: The information is not available for households in the format requested. The available information, which is for those claiming incapacity benefit or severe disablement allowance, has been placed in the Library.

Incapacity Benefit: Hyndburn

Mr. Pope: To ask the Secretary of State for Work and Pensions what percentage of the working population of Hyndburn constituency received incapacity benefit in the latest period for which figures are available. [218290]

Mrs. McGuire: At November 2007, 10.9 per cent. of the working age population of the Hyndburn parliamentary constituency were in receipt of incapacity benefit or severe disablement allowance.

Source:

DWP Information Directorate 100 per cent. WPLS and ONS experimental small area population estimates (2005)

Incapacity Benefit: Medical Examinations

Mr. Bone: To ask the Secretary of State for Work and Pensions what arrangements are in place for the medical assessment of persons in receipt of incapacity benefit; which companies are used to carry out such assessments; what the terms of reference for such assessments are; and how their fees are calculated. [219450]

Mrs. McGuire: The arrangements in place for the medical assessment of persons in receipt of incapacity benefits are for a health care professional to provide an independent, impartial opinion on the medical aspects of the claim. The evidence they provide forms just one part of the evidence that the Department for Work and Pensions decision maker uses to decide entitlement. The company used to carry out these medical assessments is Atos Healthcare, a division of Atos Origin IT Services Ltd.

The terms of reference for medical assessments are included in the Medical Services contract. A copy of the contract, excluding those paragraphs which are considered commercially sensitive, is available in the Library.

The health care professionals who conduct the medical assessments are employed by Atos Healthcare. The remuneration received by Atos Healthcare employees is a matter between Atos Healthcare and its employees.

Mr. Bone: To ask the Secretary of State for Work and Pensions how many persons in receipt of incapacity benefit were required to attend a medical assessment in the last year for which figures are available; and what the cost of such assessments was. [219452]

Mrs. McGuire: The information is not available in the format requested. In the year April 2007 to March 2008, 535,077 medical assessments were completed for incapacity benefits customers.

The individual unit price for such assessments is held commercial in confidence.

Incapacity Benefit: North East

Jim Cousins: To ask the Secretary of State for Work and Pensions what estimate he has made of the number of children aged *(a)* under five, *(b)* between five and 11 and *(c)* between 12 and 16 years living in households in receipt of incapacity benefit in each local authority area in the North East. [219092]

Mrs. McGuire: The information is not available for households in the format requested. The available information, which is for those claiming incapacity benefit or severe disablement allowance, is in the following table.

Number of children aged 0-15 dependent on a parent or guardian claiming incapacity benefit or severe disablement allowance by north east local authority—April 2007

	Aged 0-4	*Aged 5-11*	*Aged 12-16*
Alnwick	65	85	75

Tynedale	50	125	140
Wansbeck	205	405	370
Wear Valley	255	460	425

Notes:
1. Figures are rounded to the nearest five.
2. All data represent a snapshot in time of claimants on the computer system, and will therefore exclude a very small number of cases that are held clerically.
3. Data represent children who are dependent on a parent/guardian claiming incapacity benefit or severe disablement allowance.
4. The Department does not have complete information on child dependents on the benefit computer systems, therefore children have been merged onto incapacity benefit and severe disablement allowance claims from child benefit records with permission from HMRC.

Income Support: Disabled

Mr. Sanders: To ask the Secretary of State for Work and Pensions pursuant to the Answer of 2 July 2008, *Official Report*, columns 890-1W, on income support: disabled, if he will investigate the reasons for the inability of a constituent of the hon. Member for Torbay to receive income support with disability element on a weekly basis. [217727]

Mr. Plaskitt: Jobcentre Plus wrote to the hon. Member on 30 June 2008 explaining what action his constituent needed to take to receive weekly payments of income support. The situation has now been rectified and the constituent is receiving their income support weekly.

It has been brought to my attention that the reply I gave the hon. Member for Torbay, on 2 July 2008, *Official Report*, columns 890-1W, incorrectly stated that

all claims to income support are paid weekly, the answer should have read as follows. I apologise for this oversight.

Most claims to income support are paid on a weekly basis in arrears. However, income support paid on the grounds of incapacity for work is generally paid fortnightly in arrears (except where the case has been continuous since before April 1995). Customers receiving income support with widows or bereavement benefit are normally paid in advance.

From April 2009 all new claims to income support will be paid fortnightly in arrears in line with employment and support allowance (ESA) which will be introduced in October 2008.

Weekly payments will be considered in exceptional circumstances and for up to 26 weeks. A customer's disability would not, of itself, justify weekly payment.

Post Office Card Accounts: Bexley

Mr. Evennett: To ask the Secretary of State for Work and Pensions how much and what proportion of each type of state benefit paid to residents in Bexleyheath and Crayford constituency was paid into Post Office card accounts in each of the last five years. [218396]

Mr. Plaskitt: The answer is not available in the precise format requested. The following table shows the number and percentage of state benefit payments paid into Post Office card accounts in Bexleyheath and Crayford in each of the last five years.

	December 2003		*December 2004*		*December 2005*		*December 2006*		*December 2007*	
	Total	*Percentage*	*Total*	*Percentage*	*Total*	*Percentage*	*Total*	*Percentage*	*Total*	*Percentage*

Social Fund

Jenny Willott: To ask the Secretary of State for Work and Pensions (1) how many staff at each of his Department's offices were employed to process *(a)* crisis loans, *(b)* budgeting loans and *(c)* community care grant applications in each month since 2003; and if he will make a statement; [214919]

(2) how many staff were employed in running the Social Fund in each month since April 2003, broken down by site and scheme; and if he will make a statement; [215984]

(3) how many staff were employed to process *(a)* crisis loan, *(b)* budgeting loan and *(c)* community care grant applications in each month since 2003, broken down by location of employment; and if he will make a statement. [216081]

Mr. Plaskitt: The administration of Jobcentre Plus is a matter for the Chief Executive of Jobcentre Plus, Lesley Strathie. I have asked her to provide the hon. Member with the information requested.

Letter from Lesley Strathie, dated 17 July 2008:

The Secretary of State has asked me to reply to your recent questions on staff allocations for social fund application processing

asking: how many staff at each of his Department's offices were employed to process (a) crisis loans (b) budgeting loans and (c) community care grant applications in each month since 2003: how many staff were employed in running the Social Fund in each month since April 2003 broken down by site and scheme: how many staff were employed to process (a) a crisis loan (b) a budgeting loan and (c) community care grant applications in each month since 2003 broken down by location of employment. This is something that falls within the responsibilities delegated to me as Chief Executive of Jobcentre Plus.

We began centralising benefit delivery in April 2006. Prior to this staff were working on social fund applications at Jobcentres and Social Security offices throughout the country and we did not keep staffing data specific to these job roles.

The available information is for the total number of staff employed nationally on each Social Fund type and is set out in the following table.

Staff employed to process community care grants, crisis loans and budgeting loans (full-time equivalents)

	April 2006	May 2006	June 2006	July 2006	August 2006	September 2006

State Retirement Pensions

Mr. Gordon Prentice: To ask the Secretary of State for Work and Pensions how many people receive the UK state pension in a form which *(a)* is and *(b)* is not frozen, broken down by country of residence.[1] [216748]

Mr. Mike O'Brien: The information is in the following tables.

Table 1: Number of state pension recipients living overseas in countries and territories where the state pension is up-rated (EEA and Switzerland and countries and territories covered by a reciprocal agreement which allows for up-ratings)

Country	*Number of recipients*
Austria	4,930
Barbados	5,120
Belgium	4,560
Bermuda	610
Bulgaria	220
Cyprus	14,490
Denmark	1,950
Finland	700

DWP Information Directorate: Work and Pensions Longitudinal Study.

State Retirement Pensions: Bexley

Mr. Evennett: To ask the Secretary of State for Work and Pensions what estimate he has made of the number of pensioners in Bexley receiving the 25 pence age allowance. [218518]

Mr. Mike O'Brien: As at November 2007, there were 9,700 state pension claimants aged 80 or over receiving the age addition in the local authority area of Bexley.

Notes:

1. Data are taken from five per cent. extracts of the Pensions Strategy Computer System, therefore figures are subject to a degree of sampling variation. They are also adjusted to be consistent with the overall caseload from the Work and Pensions Longitudinal Study.

2. Caseload figures are rounded to the nearest 100.

3. Local authorities are allocated using the Office for National Statistics postcode directory.

State Retirement Pensions: Eligibility

Mr. McCartney: To ask the Secretary of State for Work and Pensions how many British nationals over state pension age failed the habitual residence test when resuming a residence in the UK in *(a)* 2004, *(b)* 2005, *(c)* 2006 and *(d)* 2007. [219543]

Mr. Plaskitt: The available information is in the following table.

Number of British nationals over state pension age who have passed or failed the habitual residence test in relation to pension credit

	Passed	Failed
2004	2,431	276
2005	2,850	717
2006	2,667	572
2007	1,161	237

Note:
Some of those recorded as passing the test may have previously failed it. Records do not show when the test has been applied to the same person on a previous occasion.

Source:
DWP management information.

Mr. McCartney: To ask the Secretary of State for Work and Pensions for what reasons the habitual residence test is applied to older British nationals who are returning to live in the UK. [219546]

Mr. Plaskitt: Everyone claiming income-related benefits when arriving or returning to the UK is required to show that they are habitually resident in this country and have a settled intention to remain. The habitual residence test is applied irrespective of age.

However, returning British nationals re-establishing their ties with the UK may be able to satisfy the test immediately.

Swimming: Finance

Mr. Hunt: To ask the Secretary of State for Work and Pensions whether his Department is contributing to the £140 million fund announced on 6th June 2008 to encourage local authorities to offer free swimming. [219730]

Mr. Mike O'Brien: The Department has committed £22 million towards the £140 million fund over the period of the 2007 comprehensive spending review.

Vaccination: Compensation

Ian Stewart: To ask the Secretary of State for Work and Pensions how many payments have been made under the Vaccine Damage Payment Scheme in each year since its inception; and for which vaccines the payment was awarded in each case. [216559]

Mrs. McGuire: The number of payments made under the Vaccine Damage Payments Act 1979, in each financial year since 1979 is listed in the following table.

The Department does not hold information about the specific vaccines linked to a successful vaccine damage payment claim. Claimants are asked to specify on the claim form all the vaccinations the disabled person received. However, as many vaccinations can be given in close proximity to each other it is not always possible to state categorically which vaccine caused the adverse reaction. Where a payment is made disability is not attributed to any specific vaccination.

Vaccine damage payments: awards made in each year since 1978-79

Year (1 April to 31 March)	Number of payments made
1978-79	36
1979-80	317

Vaccine damage payments: awards made in each year since 1978-79

Year (1 April to 31 March)	*Number of payments made*
1980-81	256
1981-82	68
1982-83	38
1983-84	40
1984-85	36
1985-86	24
1986-87	17
1987-88	10
1988-89	3
1989-90	3
1990-91	1
1991-92	7
1992-93	13
1993-94	3
1994-95	7
1995-96	6
1996-97	5
1997-98	3
1998-99	0
1999-2000	4
2000-01	2
2001-02	3
2002-03	5
2003-04	5
2004-05	4
2005-06	5
2006-07	4
2007-08	2
Total	927

Note:
When the scheme was established in 1978 there was a large backlog of cases that had to be dealt with. This accounts for the large number of awards made in the early years of the scheme. One of the main reasons for the decline, over time, in the number of awards made is that medical knowledge and understanding has significantly advanced since 1978. Additionally, many reliable research papers since then have demonstrated that a clear link between vaccines and adverse reactions, sufficient to accept causation on the balance of probabilities, is not as great as had been previously thought.

DEFENCE

Afghanistan: Detainees

Dr. Fox: To ask the Secretary of State for Defence how many visits have been made by personnel from his Department to detainees transferred from the custody of British forces to the government of Afghanistan in each month since December 2007; and what the purpose of each visit was. [214375]

Des Browne: Records show that, since December 2007, UK armed forces personnel have made nine visits to see Afghan detainees transferred to the custody of the government of Afghanistan, normally seeing several detainees in one visit. The visits are broken down by month as follows:

Month	*Number of visits*
December 2007	1
January 2008	0
February 2008	0
March 2008	3
April 2008	1
May 2008	1
June 2008	2
July 2008	1

The purpose of the visits was to check on the welfare and status of the detainees.

Afghanistan: Peacekeeping Operations

Nick Harvey: To ask the Secretary of State for Defence what assessment he has made of the level of enhancement provided by the British armament package to the operational abilities of the Mastiff in Afghanistan. [218485]

Mr. Bob Ainsworth: I am withholding details as disclosure would, or would be likely to, prejudice the capability, effectiveness or security of the armed forces.

Armed Forces: Fuels

Mr. Hancock: To ask the Secretary of State for Defence what planning assumptions his Department made regarding the unit cost of principal hydrocarbon fuels used by HM Armed Forces in determining its budget allocations for *(a)* 2007-08 and *(b)* 2008-09. [219233]

Mr. Bob Ainsworth: The final Defence Corporate Planning Assumptions used when setting budget allocations for 2007-08 and 2008-09 were as follows:

Propulsion fuel prices

	£ per cubic metre	
	2007-08	*2008-09*
Aviation Fuel	350	440
Marine Fuel	280	360
Road Diesel	880	1090
Other Propulsion Fuel	860	1020

Armoured Fighting Vehicles

Nick Harvey: To ask the Secretary of State for Defence what the user capability statement of the MOD Mastiff is; and what role it is to perform in Afghanistan. [218484]

Mr. Bob Ainsworth: Mastiff is used to provide armoured protection for troops. I am withholding further details as disclosure would, or would be likely to, prejudice the capability, effectiveness or security of the armed forces.

Nick Harvey: To ask the Secretary of State for Defence how many armoured vehicles have been provided out of the future rapid effect system budget. [218491]

Mr. Bob Ainsworth: None.

Defence Equipment

Nick Harvey: To ask the Secretary of State for Defence what the average cost of equipping an individual serviceman or woman is with *(a)* basic, *(b)* specialist and *(c)* personal kit. [218498]

Mr. Bob Ainsworth: The approximate cost of basic uniform issued to service personnel during their recruitment stage is shown as follows:

£

	Army	RAF	RN
Officers	900	[1]1,100	[3]1,700
Other ranks	760	[2]1,200	470

[1] Includes mess dress.
[2] Includes tropical clothing.
[3] Includes RAF Blues.

There are hundreds of specialist trades across the three services and well over 1,000 items of specialist equipment. It is therefore not possible to provide an average cost of specialist kit. The cost of the personal kit issued to all those deploying on operations, which includes enhanced combat body armour and Mk6a helmet, is approximately £2,500.

Departmental Computers

Mark Pritchard: To ask the Secretary of State for Defence pursuant to the statement of 21 January 2008, *Official Report*, column 1225, on MOD (data loss), how many of the 347 laptops stolen or lost from the Ministry of Defence since 2004 have been recovered. [182359]

Des Browne: As a result of the theft of the Royal Navy laptop, the Ministry of Defence has initiated an investigation into the details of all computers lost or stolen since 2003. This investigation is under way and I will write to the hon. Member when the information is available and arrange for a copy of my letter to be placed in the Library of the House.

Substantive answer from Des Browne to Mark Pritchard:

I undertook to write to you in answer to your Parliamentary Question on 29 January 2008, (Official Report, column 184W) about the number of laptops stolen or lost from the Ministry of Defence since 2004 that had subsequently been recovered.

The figure of 347 laptops that you quote can be derived from information provided in answer to the hon Member for Rayleigh (Mr Francois) on 19 January 2007, (Official Report, column 1363-4W) and the hon Member for South West Hertfordshire (Mr Gauke) on 10 December 2007, (Official Report, column 58W) and relates only to stolen laptops.

Revised figures have been taken from the data collated in the course of the investigation into details of computers and other electronic media lost/stolen since 2003 and provided to Sir Edmund Burton as part of his review. For all years they show an increase in the number of stolen laptops from the numbers previously reported is because the Burton Review investigation revealed anomalies in the reporting process. Instructions have been issued to remedy these shortcomings.

Revised figures as at today are set out below.

	Previously reported stolen laptops	Updated stolen laptops	Updated lost laptops	Updated total stolen and lost laptops	Updated laptops recovered (stolen/ lost)
2004	173	272	22	294	6
2005	40	130	18	148	11
2006	66	155	27	182	6
2007	68	101	22	[1]123	9
Total	347	658	89	747	32

[1] A corresponding figure of 230 was given in Burton Report (Summary, Paragraph 38c, Page 9.) Subsequent reclassification and clarification of incidents has reduced the figure to 123.

Departmental Public Expenditure

Dr. Fox: To ask the Secretary of State for Defence how much his Department has spent on urgent operational requirements in near cash terms in each financial year since 2001-02. [217254]

Mr. Bob Ainsworth: I refer the hon. Member to the answer I gave him on 1 May 2008, *Official Report*, column 594W.

Fish

Mr. Peter Ainsworth: To ask the Secretary of State for Defence how much fish was procured by his Department and at what cost in each of the last five years, broken down by species; and what amount and value of such fish met the Marine Stewardship Council standard in each such year, broken down by species. [217880]

Mr. Bob Ainsworth: The amount of fish procured since the start of the current MOD food supply contract on 1 October 2006 is approximately 1,300 metric tonnes. The cost, broken down by species, is as follows:

Species	October 2006 to September 2007	Spend (£) October 2007 to June 2008
Prawn (including scampi)	661,335	414,370
Cod	606,468	413,163
Canned fish	485,090	301,628
Haddock	197,265	145,982
Salmon	184,652	113,611
Plaice	134,917	75,544
Tuna	41,182	26,764
Hoki	30,515	28,672
Halibut	28,687	23,615
Mackerel	30,219	21,996
Hake	28,894	16,242
Pollock	16,629	16,896
Scallops	21,596	9,848
Kippers	15,707	8,550
Trout	10,293	13,454
Blanchbait	2,787	875
River Cobbler	—	1,890

All fish purchased through the MOD food supply contract is subject to extensive and stringent quality standards. These are comparable to, or exceed, extant EC and legislative standards.

Further detailed information in respect of fish procured outside of the MOD food supply contract, such as contract catering/pay as you dine establishments and the spend prior to October 2006 is not held centrally and could be provided only at disproportionate cost.

The value of fish procured that meets the Marine Stewardship Council Standard is not held.

Flag Office Sea Training: Plymouth

Linda Gilroy: To ask the Secretary of State for Defence how many foreign naval vessels and auxiliaries visited HM Naval Base Devonport under the auspices of Flag Office Sea Training in each of the last five years. [219456]

Mr. Bob Ainsworth: The number of foreign naval vessels and auxiliaries that have undertaken training at Flag Office Sea Training (South) over the last five years is as follows:

Financial year	*Ships*	*Auxiliaries*
2003-04	15	0
2004-05	18	2
2005-06	16	2
2006-07	14	0
2007-08	18	2
2008-09[1]	4	1

[1] To date.

Linda Gilroy: To ask the Secretary of State for Defence how many Royal Naval vessels have taken part in training exercises in Plymouth under the auspices of Flag Office Sea Training for each of the last five years. [219457]

Mr. Bob Ainsworth: The number of Royal Navy (RN) and Royal Fleet Auxiliary (RFA) vessels that have undertaken training exercises at Flag Office Sea Training (South) over the last five years is as follows:

Financial year	*RN*	*RFA*
2003-04	28	13
2004-05	29	8
2005-06	27	17
2006-07	23	11
2007-08	25	13
2008-09 (to date)	6	2

Linda Gilroy: To ask the Secretary of State for Defence how many *(a)* Royal Naval personnel and *(b)* civilian staff are employed in Plymouth by Flag Office Sea Training. [219458]

Mr. Bob Ainsworth: Flag Office Sea Training (South) employs 373 Royal Navy personnel and 40 civil servants in Plymouth. These figures include staff supporting training and resettlement in HMS Drake. The civil service figure includes 14 Royal Fleet Auxiliary personnel.

Fuels: Expenditure

Mr. Hancock: To ask the Secretary of State for Defence what recent estimate he has made of his Department's expenditure on fuels in the financial year 2008-09; and what his Department's budget allocation for expenditure on fuel for 2008-09 was. [219236]

Mr. Bob Ainsworth: Initial, verified estimates for expenditure on fuel during the current financial year will be available later in the year. We keep the price of fuel under regular review and adjust our budget allocations accordingly.

Gazelle Helicopters

Nick Harvey: To ask the Secretary of State for Defence what plans are in place to cover capability gaps left by the withdrawal from service of the Gazelle helicopter in 2012. [218393]

Mr. Bob Ainsworth: I refer the hon. Member to the answer I gave on 7 July 2008, *Official Report*, columns 1174-75W, to the hon. Member for Woodspring (Dr. Fox).

Nick Harvey: To ask the Secretary of State for Defence pursuant to the answer of 1 April 2008, *Official Report*, column 797W, on military aircraft: helicopters, by what means his Department plans to replace the *(a)* flying capacity and *(b)* skill base once the Gazelle helicopter has been taken out of service. [218400]

Mr. Bob Ainsworth: I refer the hon. Member to the answer I gave on 7 July 2008, *Official Report*, column 1174W, to the hon. Member for Woodspring (Dr. Fox). With the planned decommissioning of the Gazelle Fleet, there will be no requirement to maintain experience of flying this type of helicopter beyond 2012.

HMS Vivid

Linda Gilroy: To ask the Secretary of State for Defence what the trained strength of HMS Vivid is. [219459]

Mr. Bob Ainsworth: As at 30 June 2008, the trained strength of HMS Vivid was 99 (30 officers and 69 ratings).

Iraq: Detainees

Mr. Tyrie: To ask the Secretary of State for Defence what proportion of the contents of the review of detention practices in Iraq and Afghanistan he disclosed in his letter to the hon. Member for Chichester of 7 July 2008. [219251]

Des Browne: 17 per cent. of the report on the review of detention practices was disclosed in my letter of 7 July. If the annexes are added, then about 4 per cent. of the overall review concerning detention practices was disclosed. As I explained in my letter, much of the information requested was exempt from release under the Freedom of Information Act.

Navy: Antiship Missiles

Mr. Hancock: To ask the Secretary of State for Defence (1) when the Sea Skua system entered service with the Royal Navy; [218752]

(2) what improvements have been made to the Sea Skua system since it entered service with the Royal Navy; and what the cost of each has been; [218753]

(3) what the planned out-of-service date of the Sea Skua system is; [218754]

(4) whether his Department plans to make further improvements to the Sea Skua system. [218755]

Mr. Bob Ainsworth: The Sea Skua Missile entered service with the Royal Navy in 1982.

In order to extend the operational life of the missiles, some component change and re-qualification programmes have been carried out. These included replacing the energetic material used in both rocket motors, at a cost of about £11 million; and refurbishment of the missile's motor ignition delay unit, at a cost of £0.9 million. In addition, Sea Skua was subject to a life extension programme at a cost of £0.8 million. There are currently no plans to make further improvements to the Sea Skua system.

On present planning assumptions, which may change, Sea Skua will be withdrawn from service by approximately the middle of the next decade.

RAF Halton

Mr. Lidington: To ask the Secretary of State for Defence whether he plans to upgrade the training facilities at RAF Halton; and if he will make a statement. [217579]

Mr. Bob Ainsworth: We have plans for a range of improvements to the training facilities at RAF Halton. The capability of training facilities at RAF Halton is kept under continuous review to ensure the station is able to deliver its outputs.

Mr. Lidington: To ask the Secretary of State for Defence whether he plans to upgrade the accommodation facilities at RAF Halton. [217595]

Mr. Bob Ainsworth: We have plans for a range of improvements to the accommodation and working facilities at RAF Halton.

RFA Fort Victoria

Mr. Hancock: To ask the Secretary of State for Defence what the status of RFA Fort Victoria is; and for what reasons it has been alongside for an extended period in Portsmouth Dockyard. [218751]

Mr. Bob Ainsworth: RFA Fort Victoria remains within the fleet operational cycle. In addition to providing a training facility, the time alongside in Portsmouth has been fully utilised to increase the ship's material state prior to an upkeep period next year.

Tanks

Mr. Gerald Howarth: To ask the Secretary of State for Defence what the *(a)* unit cost and *(b)* in-service date of the (i) Chieftain, (ii) Challenger I and (iii) Challenger II main battle tanks was. [218236]

Mr. Bob Ainsworth: The unit costs and historical financial records of the Chieftain and Challenger I are no longer held centrally and could be provided only at disproportionate cost. The unit cost for Challenger II was listed as £3.5 million in 1999.

The in-service dates were Chieftain 1965, Challenger I 1984 and Challenger II June 1998.

Upholder Class Submarines

Mr. Gerald Howarth: To ask the Secretary of State for Defence what the *(a)* unit cost and *(b)* date of commissioning of each Upholder Class submarine was. [218232]

Mr. Bob Ainsworth: The upholder class of four submarines was commissioned in the early 1990s and the exact dates are shown in the following table. This class was sold to the Canadian Navy in 1998.

Due to the length of time that has elapsed since their commissioning, the unit cost is no longer held centrally and could be provided only at disproportionate cost.

Upholder class	*Commissioning dates*
HMS Upholder	9 June 1990
HMS Ursula	8 May 1992
HMS Unicorn	25 June 1993
HMS Unseen	7 June 1991

Warships

Mr. Gerald Howarth: To ask the Secretary of State for Defence what the unit cost of *(a)* HMS Astute, *(b)* HMS Ambush and *(c)* HMS Artful was. [218230]

Mr. Bob Ainsworth: The contract with BAES (Submarine Solutions) is for design and manufacture of the three astute class submarines. The National Audit Office's Major Project Report for 2007 reported a total cost of £3,798 million.

Mr. Gerald Howarth: To ask the Secretary of State for Defence what the unit cost of *(a)* HMS Daring, *(b)* HMS Dauntless and *(c)* HMS Diamond is. [218235]

Mr. Bob Ainsworth: As published in the NAO's Major Projects Report 2007, the unit production cost for one Type 45 Destroyer is £650 million.

PRIME MINISTER

Departmental Buildings

Mr. Peter Ainsworth: To ask the Prime Minister how many *(a)* new builds and *(b)* major refurbishments for a cost in excess of £0.5 million were completed by his Office in (i) 2005-06, (ii) 2006-07 and (iii) 2007-08. [213772]

The Prime Minister: I refer the hon. Member to the answer given by the Parliamentary Secretary for the Cabinet Office, my hon. Friend the Member for West Bromwich, East (Mr. Watson) on 9 July 2008, *Official Report*, column 1625W.

Departmental Manpower

Mr. Heald: To ask the Prime Minister how many staff he plans to employ in 10 Downing Street in 2009-10. [219701]

The Prime Minister: The number of No. 10 staff is published annually.

Departmental Official Cars

Stephen Hammond: To ask the Prime Minister what vehicle excise duty band his official car falls into. [217772]

The Prime Minister: As has been the practice of successive Governments, for security reasons the Prime Minister's car is provided by the Metropolitan Police Service.

Departmental Responsibilities

Mr. Maude: To ask the Prime Minister how many reviews of regulation Downing Street has conducted or commenced since July 2007; and in which areas. [210814]

The Prime Minister: I refer the right hon. Member to the answer given by the Parliamentary Secretary for the Cabinet Office, my hon. Friend the Member for Corby (Phil Hope) on 14 July 2008, *Official Report*, column 153W.

Departmental Staff

Mr. Maude: To ask the Prime Minister what the staff cost of his Office was in *(a)* 2006-07 and *(b)* 2007-08. [217340]

The Prime Minister: The total staff costs for the Office for the financial year 2006-07 were £11.6 million. Figures for the financial year 2007-08 are not yet available.

Honours

Mr. Amess: To ask the Prime Minister (1) what the procedure is for a *(a)* Canadian and *(b)* British citizen to return an honour; and if he will make a statement; [219556]

(2) how many honours were returned by *(a)* Canadian and *(b)* British citizens since 1990; and if he will make a statement. [219557]

The Prime Minister: The information requested is not held centrally. There is no specific procedure for people appointed to an honour to return their medals.

Intelligence and Security Committee

Andrew Mackinlay: To ask the Prime Minister if he will take steps to ensure that the secretariat of the Intelligence and Security Committee is staffed by officials under the authority of the Clerk of the House. [219091]

Mr. Winnick: To ask the Prime Minister what steps have been taken to implement the proposals to bring the work of the Intelligence and Security Committee into line with that of Select Committees as far as possible in line with the proposals in the Green Paper, the Governance of Britain; and if he will make a statement. [218859]

The Prime Minister: Plans for the Intelligence and Security Committee were set out in the Governance of Britain White Paper (Cm 7342-1, paragraphs 235-244). On the issue of staffing, I refer my hon. Friends to the answer I gave my hon. Friend the Member for Thurrock (Andrew Mackinlay) on 17 June 2008, *Official Report*, column 883W.

Olympic Games

Mr. Don Foster: To ask the Prime Minister pursuant to the answer of 18 June 2008, *Official Report*, columns 920-1W, on the Olympic games, what estimate he has made of the cost of his officials' attendance at the Beijing Olympic games. [219531]

The Prime Minister: I have nothing further to add to the answer I gave the hon. Member on 18 June 2008, *Official Report*, column 920W.

Oman: Diplomatic Relations

Mark Pritchard: To ask the Prime Minister when he next plans to meet representatives of the Government of Oman in Muscat. [217502]

The Prime Minister: I met the Sultan of Oman in London on Tuesday; we discussed a wide range of issues. The Government are in regular contact with Government of Oman at all levels. For security reasons, my future engagements are announced as and when appropriate.

HEALTH

Antidepressants

David Simpson: To ask the Secretary of State for Health how many people have been prescribed anti-depressant medication in each of the last three years, broken down by region; and what percentage of the population of each region each represents. [218862]

Dawn Primarolo: Information on the number of people prescribed a medicine is not collected centrally therefore we are unable to provide the information requested. However, the number of prescription items prescribed for antidepressant medication[1] is shown in the following table.

[1] Antidepressant medication has been defined as those products included in the British National Formulary chapter 4.3—antidepressant drugs.

Thousand

Strategic health authority	*2005*	*2006*	*2007*
East Midlands	2,524.3	2,670.7	2,962.7

Care Homes: Elderly

Mr. Evans: To ask the Secretary of State for Health (1) how many registered care homes for the elderly there were in *(a)* Ribble Valley constituency, *(b)* Lancashire and *(c)* England in each year since 2001; [219120]

(2) how many people were resident in registered care homes for the elderly in *(a)* Ribble Valley constituency, *(b)* Lancashire and *(c)* England in each year since 2001. [219121]

Mr. Ivan Lewis *[holding answer 14 July 2008]:* Until 2001, information on the numbers of care and nursing homes were collected by the Department. At 31 March 2001, there were 10,535 care and nursing homes for older people aged 65 or over in England.

Data on the total number of care and nursing homes for older people in Lancashire are not held centrally. However, data are available showing there were 259 care homes for older people age 65 and over in Lancashire local authority area at March 2001. In addition, there were 172 nursing homes, but this figure includes all homes for adults and can not be broken down further to give numbers for older people aged 65 and over. Data for Ribble Valley constituency are not held centrally.

The Commission for Social Care Inspection (CSCI) produces data on the number of care homes and places registered as at 31 March each year, beginning with 2002-03. There are some definitional differences between these data and those for the years up to 2001.

I have been informed by CSCI that care homes are not registered as, for example, care homes for older people. CSCI inspectors will decide at the time of an inspection whether to inspect a home against the national minimum standards (NMS) for care homes for older people or younger adults. This decision is based on the age profile of the residents of the home.

The following table shows the number of care and nursing homes which were active in Lancashire council area and England on 31 March at the end of each financial year shown, that had been inspected at some point prior against the NMS for older people (though not necessarily during the year in question).

CSCI is unable to provide separate data for Ribble Valley constituency.

Number of homes

Lancashire council area	
2002-03	345
2003-04	364
2004-05	333
2005-06	325
2006-07	320
England	
2002-03	10,049
2003-04	11,167
2004-05	10,865
2005-06	10,671
2006-07	10,565

Notes:
1. Figures are at 31 March for each year.
2. Information on numbers of residents in care homes is not collected centrally.

CSCI registration and inspection database

Care Homes: Inspections

Mr. Evennett: To ask the Secretary of State for Health how many *(a)* private, *(b)* public and *(c)* voluntary sector homes in (i) the London Borough of Bexley and (ii) Greater London were inspected by the Commission for Social Care Inspection in each of the last five years for which figures are available. [218398]

Mr. Ivan Lewis: We have been informed by the Commission for Social Care Inspection (CSCI) that the number of care homes registered with and inspected by CSCI in London and Bexley during the years 2004 to 2008 were as shown in the following table.

Registered care homes in London and Bexley, 2004-08

	2004	*2005*	*2006*	*2007*	*2008*
London					
Public[1]	140	144	137	131	121
Private	1,155	1,168	1,170	1,216	1,240
Voluntary	755	720	686	632	585
Other	4	3	28	40	45
Total	2,054	2,035	2,021	2,019	1,991
Bexley					
Public[1]	0	0	0	0	0
Private	15	16	15	18	17
Voluntary	21	21	20	17	16
Other	0	0	0	1	3
Total	36	37	35	36	36

[1] Figures for publicly owned homes include those owned by the national health service and those owned by councils.

Notes:
1. Figures are calculated using registration details on a static cut of the CSCI registration and inspection database taken on 2 May 2008.
2. Figures are for 31 March of each year.

Source:
CSCI registration and inspection database, 2 May 2008.

Cervical Cancer: Vaccination

Miss McIntosh: To ask the Secretary of State for Health for what reasons his Department selected Cervarix as the vaccine for cervical cancer protection. [219781]

Dawn Primarolo: I refer the hon. Member to the reply I gave the hon. Members for Boston and Skegness (Mark Simmonds) and for Norwich, North (Dr. Gibson) on 2 July 2008, *Official Report*, column 943W.

Cord Blood

Dr. Vis: To ask the Secretary of State for Health (1) who has been consulted as part of his Department's review of the collection and use of cord blood; and if he will make a statement; [219358]

(2) when the findings of his Department's review of the collection and use of cord blood will be published. [219379]

Dawn Primarolo: The review on the collection and use of cord blood will report in the autumn and any findings will be published in due course.

As part of the review, an expert workshop was held on 28 May 2008. Participants included international cord blood experts, public and private cord blood banks, the royal colleges, regulatory agencies, research councils, charities and Government Departments. Further to this, a series of interviews and questionnaires have been completed by various individuals and organisations, both in the United Kingdom and internationally, who have an interest in this area.

Departmental Catering

Mr. Roger Williams: To ask the Secretary of State for Health what percentage of *(a)* beef, *(b)* lamb, *(c)* pork and *(d)* dairy products used in his departmental headquarters were imported products in the most recent period for which figures are available. [166653]

Mr. Bradshaw: The requested information is given in the 'Proportion of Domestically Produced Food used by Government Departments and also supplied to Hospitals and Prisons under contracts negotiated by the NHS Supply Chain and HM Prison Service' report (published by the Department for Environment, Food and Rural Affairs), copies of which have already been placed in the Library.

Departmental Manpower

Mr. Redwood: To ask the Secretary of State for Health what the change has been in the number of employees of *(a)* the NHS and *(b)* his Department and its agencies since July 2006. [217066]

Mr. Bradshaw: Between 30 September 2006 and 30 September 2007, there was a fall of 6,113 (-0.6 per cent.) in the total national health service work force (full-time equivalents) from 1,095,163 to 1,089,050.

The number of staff (full-time equivalents) in the Department and its agencies at the end of June 2006 (the nearest quarter to 1 July) and the end of March 2008 (the latest quarter for which information is available), and the change between the two dates, are presented in the following table.

	30 June 2006	*31 March 2008*	*Change*
Department	2,288.0	2,203.1	-84.9
Medicines and Healthcare products Regulatory Agency (MHRA)	758.9	865.3	106.4
NHS Purchasing and Supply Agency	334.4	258.5	-75.9

Notes:
1. Numbers in MHRA have risen because of an increase in business associated with licensing applications.
2. Data for the Department are collected quarterly.
Source:
The Information Centre for health and social care: non-medical workforce census and medical census collected on 30 September each year.

Epilepsy: Drugs

Mr. Hancock: To ask the Secretary of State for Health what assessment his Department has made of the effects on people's health of taking anti-epileptic drugs unnecessarily as a result of misdiagnosis. [219471]

Ann Keen: No assessment has been made of the effects on people's health of taking anti-epileptic drugs unnecessarily as a result of misdiagnosis.

Fish

Mr. Peter Ainsworth: To ask the Secretary of State for Health how much fish was procured by his Department and at what cost in each of the last five years, broken down by species; and what amount and value of such fish met the Marine Stewardship Council standard in each such year, broken down by species. [217884]

Mr. Bradshaw: Records of fish purchases made on behalf of the Department by its catering contractor are only available for the three years to 2008.

Where available, it is the first choice of our contractor to source seafood from Marine Stewardship Council certified fisheries.

The breakdown of these purchases are shown in the following tables.

	Fish quantities and values	
Type	*Portions*	*Value (£)*
2008

General Practitioners: Standards

Mark Simmonds: To ask the Secretary of State for Health (1) which primary care trusts carried out appraisals of all GPs in their area in the last three years; [218899]

(2) which primary care trusts have appraised every general practitioner in their area in each of the last three years. [219231]

Mr. Bradshaw: This information is not collected centrally. Our plans to introduce appraisal and revalidation for all doctors will mean that all doctors, whatever their location, will have to participate in appraisal in order to obtain relicensure from the GMC.

Health Centres

Mr. Oaten: To ask the Secretary of State for Health (1) when he plans to review the effectiveness of new GP-led health centres; [219635]

(2) when he expects the first GP-led health centre to open; [219636]

(3) what percentage of primary care trusts have identified sites for GP-led health centres. [219637]

Mr. Bradshaw: The Government's policy intent is to increase access to and convenience of general practitioner (GP) services. There are a number of ways of measuring the impact that a new GP-led health centre will have on the delivery of services to patients, which will be monitored centrally. Primary care trusts (PCTs) as the responsible commissioners of services will review improvements against their strategic needs assessments and patient satisfaction with the services being delivered to ensure local needs are being met and the public's health and well-being improves.

The first GP-led health centre opened on 1 July 2008 in Bedfordshire.

PCTs will decide on the location of their new GP-led health centres and the services within them and will be engaging local people and other stakeholders in these matters to ensure they meet local needs.

Health Education

Norman Lamb: To ask the Secretary of State for Health (1) how many *(a)* health promotion centres and *(b)* health promotion resource centres have been (i) opened and (ii) closed in England in each of the last five years; [212221]

(2) how many *(a)* health promotion centres and *(b)* health promotion resource centres are operating in England. [212222]

Dawn Primarolo: The Department does not hold information centrally or at regional level on the number of health promotion centres and health promotion resource centres opened and closed in England over the last five years, nor on those that are currently operating. It is the responsibility of local national health service organisations to make decisions on the provision of services for their communities, taking into account the needs and well-being of their local populations.

Hospitals: Leasehold

Sir John Stanley: To ask the Secretary of State for Health what consideration he has given to extending leasehold enfranchisement to NHS hospitals occupying sites on long leases; and if he will make a statement. [218468]

Mr. Bradshaw: Where a national health service trust occupies a building for operational purposes under a leasehold interest, it relies on Part 2 of the Landlord and Tenant Act 1954 to acquire continuity of occupation. There are no proposals to seek further protection under these or other statutory provisions.

Human Papilloma Virus: Vaccination

Miss McIntosh: To ask the Secretary of State for Health whether those born before 1 October 1991 and who are aged between 18 and 25 years will be offered the Cervarix vaccine. [220019]

Dawn Primarolo: The Department is still considering the position with regard to those born before 1 October 1991.

Incontinence: Medical Equipment

Mr. Drew: To ask the Secretary of State for Health with reference to his Department's June 2008 consultation on the proposed new arrangements for the provision of stoma and urology services and related services in primary care, whether his Department has made a competition impact assessment on the use of sponsored nurses; and if he will make a statement. [218495]

Dawn Primarolo: No competition impact assessment has been made of the use of sponsored nurses as sponsorship of such posts is outside the scope of the review.

Intensive Care: South East

Sandra Gidley: To ask the Secretary of State for Health how many level three intensive care cots were available for neo-natal care in each of the acute hospital trusts in the South Central Strategic Health Authority area in each year since 2001; and if he will make a statement. [218627]

Ann Keen: The average daily number of available beds in neonatal intensive care wards (also known as level three wards) for national health service acute providers in the South Central Strategic Health Authority (SHA) area can be found in the following table. There have been concerns raised recently about the definitions used for neonatal intensive care cots in the KH03 data return. The concerns have been around the use of the ward type where the cot is located as part of the definition. This has caused confusion amongst some trusts about where to record their neonatal intensive care cots and has caused inconsistency in reporting. These concerns will be investigated with the view of ensuring a robust and clear definition is developed for the 2008-09 collection.

It is for the neonatal networks, commissioners and SHAs to work together to ensure there is sufficient capacity within the system to meet local demand.

Average daily number of available beds in wards open overnight, ward classification 'Intensive care: Neonates', acute NHS providers in South Central SHA area

Department of Health form KH03

Maidstone and Tunbridge Wells NHS Trust: Hospital Beds

Sir John Stanley: To ask the Secretary of State for Health how many bed days have been lost due to delayed discharges in the Maidstone and Tunbridge Wells NHS Trust since the year to 14 October 2007. [218464]

Mr. Ivan Lewis: The number of bed days lost at Maidstone and Tunbridge Wells NHS Trust due to delayed discharge from 15 October 2007 to 6 July 2008 is 6,467. These are the latest figures available. All delayed transfers of care for this trust for this period are for acute patients.

Source:

Department of Health, Weekly Situation Reports

Sir John Stanley: To ask the Secretary of State for Health what information he has received from the West Kent Primary Care Trust on the financial support it provided to the Maidstone and Tunbridge Wells NHS Trust in 2007-08 to assist that trust reduce the number of bed days lost due to delayed discharges. [218465]

Mr. Ivan Lewis: The Department has not received any information on financial support West Kent primary care trust (PCT) has provided to Maidstone and Tunbridge Wells NHS Trust in 2007-08 to reduce the number of bed days lost due to delayed discharges. The right hon. Member may therefore wish to raise this with the chief executive of the PCT.

NHS: Finance

Mr. Harper: To ask the Secretary of State for Health how many people were allocated an individual budget in the pilot sites during the Individual Budget Pilot Programme; and how many were eligible for a budget, broken down by location. [219445]

Mr. Ivan Lewis: A report of the evaluation of the individual budget pilot programme will be published later in the year.

NHS: Standards

Mr. Hancock: To ask the Secretary of State for Health if he will require NHS organisations to follow the National Institute for Health and Clinical Excellence's technology appraisals, ethical guidelines and other guidance. [219470]

Dawn Primarolo: The Healthcare Commission's annual health check requires national health service organisations to declare the extent of their compliance with a range of core standards. These include a requirement that primary care trusts are complying with National Institute for Health and Clinical Excellence (NICE) technology appraisal and interventional procedures guidance. Clinical guidelines and public health guidance are developmental standards in the annual health checks in recognition of the more complex nature of the guidance. However, NHS organisations are expected to demonstrate that they are, working towards full implementation of NICE's guidance.

In addition, there is a statutory funding direction which applies to NICE technology appraisal guidance. This requires NHS organisations to fund health care interventions recommended by NICE within three months of NICE issuing final guidance.

Nicotine

David Taylor: To ask the Secretary of State for Health if he will bring forward proposals for the establishment of a body with responsibility for the regulation of all nicotine products; and if he will make a statement. [219749]

Dawn Primarolo: Although the establishment of a body to regulate nicotine products has not been proposed in the Department's current "Consultation on the future of tobacco control", stakeholders are invited to respond to the consultation with suggestions on any aspect of tobacco control. This consultation document was published on 31 May 2008 and copies of this document have already been placed in the Library. The consultation will close on 8 September 2008.

The Government welcome responses from all interested stakeholders and will make decisions on future action on tobacco control with reference to the consultation responses. Consideration of whether to establish a regulatory body for nicotine products will not take place before the "Consultation on the future of tobacco control" has ended.

Prescriptions: Fees and Charges

Mr. Hancock: To ask the Secretary of State for Health pursuant to the answer of 6 May 2008, *Official Report*, column 568, on the review of prescription charges, on what date he plans to publish the outcome of the review of prescription charges. [219530]

Dawn Primarolo: We will publish our planned consultation on cost neutral changes to the system of prescription charges and exemptions in England in due course.

Smoking: Young People

David Taylor: To ask the Secretary of State for Health what research his Department has conducted or evaluated on the influence of tobacco packaging on smoking rates in young people. [219735]

Dawn Primarolo: Packaging of tobacco products, and its influence on young people in particular, is a topic of consideration within the Department's current "Consultation on the future of tobacco control". This consultation document was published on 31 May 2008 and copies have already been placed in the Library. The consultation will close on 8 September 2008.

The Government welcome responses from all interested stakeholders and will make decisions on future action on tobacco packaging with reference to consultation responses.

Social Services

Mr. Andrew Smith: To ask the Secretary of State for Health what research he has *(a)* commissioned and *(b)* evaluated on options for care and funding in respect of the (i) consultation and (ii) forthcoming Green Paper on the future of social care and support services. [219126]

Mr. Ivan Lewis: I refer my right hon. Friend to the answer I gave on 12 June 2008, *Official Report*, column 527W, to the hon. Member for Stafford (Mr. Kidney).

Tobacco: Sales

David Taylor: To ask the Secretary of State for Health what account he has taken of research on the effects in other countries of *(a)* prohibiting and *(b)* restricting the sale of tobacco from vending machines in formulating policy; and if he will make a statement. [219748]

Dawn Primarolo: The sale of tobacco from vending machines is a topic of consideration within the Department's current "Consultation on the future of tobacco control", copies of this publication have already been placed in the Library. An overview of the evidence from other jurisdictions on restricting or prohibiting sale of tobacco from vending machines is set out in this consultation. This consultation document was published on 31 May 2008 and is in the Library and the consultation will close on 8 September 2008.

The Government welcome responses from all interested stakeholders and will make decisions on further controls on tobacco vending machines with reference to the consultation responses.

FOREIGN AND COMMONWEALTH OFFICE

Afghanistan: Translation Services

Mr. Hague: To ask the Secretary of State for Foreign and Commonwealth Affairs how much was spent by his Department on translation and interpretation services in Afghanistan in 2007-08. [216310]

David Miliband: In financial year 2007-08 the Foreign and Commonwealth Office spent a total of £93,033.56 on interpretation. This includes the salaries of five locally-engaged interpreters employed by our embassy in Kabul, four employed by our provincial reconstruction team in Lashkar Gah and a further five interpreters employed on behalf of HM Revenue and Customs.

Africa: Conflict Prevention

Mr. Hague: To ask the Secretary of State for Foreign and Commonwealth Affairs what funding his Department plans to provide to the Africa Conflict Prevention Pool in 2008-09. [216300]

David Miliband: In April 2008 the Africa and Global Conflict Prevention Pools were merged to form a single combined Conflict Prevention Pool (CPP). The CPP has a self-standing budget, provided by HM Treasury, which is managed jointly by the Department for International Development, the Foreign and Commonwealth Office and the Ministry of Defence. The Africa Programme, one of six-regional and two thematic programmes within the CPP, has been set an initial allocation of £62.5 million for financial year 2008-09 from the total CPP budget of £112 million.

Armenia: Turkey

Mr. Drew: To ask the Secretary of State for Foreign and Commonwealth Affairs what recent representations he has made to Turkey on the issue of the Armenian massacres. [218204]

Mr. Jim Murphy: My right hon. Friend the Foreign Secretary has not made recent representations to the Turkish Government on the issue of the Armenian massacres.

However, as part of our ongoing bilateral dialogue and in line with our longstanding policy on the massacres, we continue to encourage Turkey to work directly with Armenia to normalise their relations and to work together to build a better relationship for the future.

British Nationality: Torture

Sir Malcolm Rifkind: To ask the Secretary of State for Foreign and Commonwealth Affairs (1) how many British nationals have asked the Government to espouse their claims for damages following allegations of torture by officials or agents of foreign governments, or have requested the Government to intervene on their behalf in these matters, since 8 December 1988; [218618]

(2) how many claims by British citizens of torture abroad have been espoused by the Government since December 1988; and what the criteria are for determining whether to espouse such a claim. [218807]

Meg Munn: The UK is opposed to torture and is one of the most active countries in the world in the fight to eradicate it. We provide consular assistance to British nationals detained abroad, which includes taking an interest in their welfare. We take allegations of mistreatment—including torture—very seriously and, with the permission of the individual concerned, can take up such allegations with the relevant authorities in the host state.

From 1 April 2005 we have collated statistics on the number of cases where we have, with the permission of the British national concerned, raised concerns with the detaining authorities over allegations of mistreatment, ranging from a lack of water to physical abuse. Records were not collated prior to April 2005.

Cases have been raised as follows:

April to December 2005: 39 allegations raised;

January to December 2006: 69 allegations raised; and

January to December 2007: 75 allegations raised.

Collated data are not broken down into specific details of the alleged mistreatment.

We do not centrally collate data on how many British nationals have asked the Government to formally espouse their legal claims for damages following allegations of torture by officials or agents of foreign governments.

We do not centrally collate data on legal claims by British nationals of torture abroad which have been formally espoused by the Government. We have formally espoused no such legal claims in recent years. Any request to formally espouse a legal claim of torture would be considered on a case by case basis.

To collate this information would therefore incur a disproportionate cost.

China: Population

Mr. Amess: To ask the Secretary of State for Foreign and Commonwealth Affairs what discussions he has had with the government of China about trends in China's population since 2006; and if he will make a statement. [201936]

Meg Munn: We have discussed China's population mainly in terms of problems arising from the implementation of the One Child policy. We did this during the 16th Round of the UK-China Human Rights Dialogue in Beijing in January. We do not dispute China's right or need to implement family planning policies but we do believe they should be based on the principles of consent and not coercion. We will continue to encourage the Chinese to meet international human rights standards at every appropriate opportunity, both bilaterally and through the EU.

A more detailed survey of all the exchanges between UK and Chinese authorities from 2006 would require a search of files held centrally and at all posts in China, which could only be achieved at disproportionate cost.

Civil Disorder: Food

Mr. Drew: To ask the Secretary of State for Foreign and Commonwealth Affairs in respect of which countries he has received reports of riots because of the price of food in 2008. [218508]

Meg Munn: In 2008, Foreign and Commonwealth Office staff have reported on a number of countries where food price inflation or insecurity of food supply have been central to concerns about social or political stability. These include Bangladesh, Burkina Faso, Cameroon, Egypt, Haiti, the Ivory Coast, Morocco, Mozambique, Senegal and Yemen. In some other cases we believe that high food prices have been part of the cause of social unrest but it is often difficult to separate the impact of food prices from other factors, including rising fuel costs and existing social or political tensions. We also examine information from a variety of sources, including the Department for International Development's country offices and international organisations.

Departmental Accountancy

Mr. Letwin: To ask the Secretary of State for Foreign and Commonwealth Affairs if he will place in the Library a copy of his Department's *(a)* chart of accounts and *(b)* resource account codes and usage descriptions for the current financial year. [210996]

Meg Munn: An electronic copy of the chart will be placed in the Library of the House.

Departmental Inquiries

Mrs. May: To ask the Secretary of State for Foreign and Commonwealth Affairs what independent inquiries have been commissioned by his Department in the last five years; what the *(a)* purpose and *(b)* cost was of each; and what steps were taken following each. [211118]

Meg Munn: The Foreign and Commonwealth Office (FCO) has, in the last five years, commissioned one independent inquiry.

In May 2007 UKvisas, a joint Directorate of the Home Office and the FCO, was made aware of security vulnerabilities in on-line visa application websites operated on their behalf by a commercial partner, VFS Global, in India, Nigeria and Russia. This meant that other internet users could potentially see applicants' personal data, in breach of the Data Protection Act.

On 17 May 2007 my noble Friend Lord Triesman appointed Linda Costelloe Baker, the Independent Monitor for Entry Clearance Refusals, to carry out an independent investigation of this breach. She was not paid an additional fee on top of her remuneration as independent monitor for entry clearance refusals. Expenses, and the provision of legal and consultancy services to support the inquiry, are determined to have totalled £15,213.90.

My right hon. Friend the Foreign Secretary laid this report, and UKvisas' responses to the independent investigator's recommendations, before Parliament on 26 July 2007. I refer the right hon. Member to my hon. Friend the Foreign Secretary's written ministerial statement of 26 July 2007, *Official Report*, column 101WS.

Departmental Wastes

Mr. Jenkins: To ask the Secretary of State for Foreign and Commonwealth Affairs what steps his Department has taken to reduce the volume of waste produced by it and sent to landfill in each of the last two years. [215919]

Meg Munn: In the last Sustainable Development in Government report (2007), the Sustainable Development Commission recognised the significant progress the Foreign and Commonwealth Office (FCO) had made towards reducing its waste. The FCO reduced its waste by 3.2 per cent. in 2006-07 and recycled 41.2 per cent. of waste, exceeding the Government target on recycling.

The FCO has taken several measures to reduce its waste and increase the amount which is recycled and re-used. Since 2005 these include:

purchasing and installing cardboard bailing machines and waste compactors at our offices in London and Buckinghamshire;

introducing an incentive scheme to encourage re-use of cardboard and plastic items at office catering outlets;

introducing recycling bins in key locations to encourage recycling of plastic, glass and cans throughout our offices; and

in 2008 the FCO replaced bottled still water at meetings with jugs of chilled tap water.

Economic and Monetary Union

Mr. Maude: To ask the Secretary of State for Foreign and Commonwealth Affairs on what date the euro changeover plan of *(a)* his Department and *(b)* each of its agencies was last updated; and if he will place in the Library a copy of the most recent version of each. [215524]

Meg Munn: The Foreign and Commonwealth Office's (FCO) euro conversion plan is dated November 2004. The most recent review was in April 2007.

UK Trade and Investment, BBC World Service, BBC Monitoring and the British Council plans are summarised in the FCO Plan.

The Plan is an internal planning document, however it has been made available to members of the public in response to specific requests. I will arrange for a copy to be placed in the Library of the House.

Horn of Africa: Arms Trade

Mr. Keith Simpson: To ask the Secretary of State for Foreign and Commonwealth Affairs what recent assessment he has made of the extent of illicit trafficking of small arms and weapons from Somalia into neighbouring countries in the Horn of Africa; and what proposals the Government has put forward to reduce the trade. [218330]

Meg Munn: The availability of small arms and light weapons in the Horn of Africa region remains a serious problem. To help address this, the Government have committed £800,000 over a three year period (2007-10) to the Regional Centre on small arms and light weapons through the UK Conflict Prevention Pool's security and small arms control strategy. The aim is to combat the illicit proliferation and trafficking of small arms and light weapons in the Great Lakes region and Horn of Africa by assisting states, including Somalia, to implement the Nairobi Protocol. The Government are also currently considering a project proposal submitted by the Mines Advisory Group which would provide training to Somali troops and provide technical oversight to the ongoing destruction of stockpiled weapons and munitions.

Iran: Inspections

Mr. Hague: To ask the Secretary of State for Foreign and Commonwealth Affairs pursuant to the answer of 18 March 2008, *Official Report*, column 1032W, on Iran: inspections, whether it is Government policy to seek the adoption of agreed criteria to trigger the inspection of cargoes to and from Iran as stipulated in UN Security Council Resolution 1803 (2008) at *(a)* the EU and *(b)* the UN Security Council; and if he will make a statement. [199081]

David Miliband: The UK is robustly implementing the provisions of UN Security Council Resolution (UNSCR) 1803. The Resolution already contains criteria for making inspections on the basis of having "reasonable grounds to believe" the aircraft or vessel is transporting prohibited goods. UK authorities routinely inspect cargoes from Iran. The EU is currently negotiating a new Common Position which the Government hope will build on the measures in UNSCR 1803.

Japan: Whales

Norman Baker: To ask the Secretary of State for Foreign and Commonwealth Affairs what discussions his Department has had with the government of Japan on the illicit trade in whale meat from Japan's scientific whaling programme. [218422]

Meg Munn: The Foreign and Commonwealth Office has not discussed the specific issue of an illicit trade in whale meat from Japan's scientific whaling programme with the Japanese Government but has taken note of the allegations made by Greenpeace. The Government continue to oppose all forms of whaling apart from some limited subsistence whaling when there is a substantiated need. The UK has also protested against Japan's whaling operations, which we argue are unjustified, cruel and unnecessary, at every appropriate opportunity. Most recently the UK maintained its strong anti-whaling position at the annual International Whaling Commission meeting which was held in Santiago, Chile, in June 2008.

Norman Baker: To ask the Secretary of State for Foreign and Commonwealth Affairs if he will make representations to the government of Japan pressing for the immediate release of the two Greenpeace activists who have been held without charge since 20 June 2008. [218423]

Meg Munn: The court procedures being applied in the case of the two Greenpeace activists are standard in Japan, where those suspected of committing a crime can be held for up to 23 days without charge. The Government are unable to get involved in the criminal investigations of another country, but are following the issue closely. We remain of the view that the large-scale killing of whales—under the guise of 'scientific' research—is both unnecessary and deeply flawed, from a scientific point of view, and we will continue to make representations to the Japanese authorities on this.

Moldova: BBC External Services

Alun Michael: To ask the Secretary of State for Foreign and Commonwealth Affairs what assessment he has made of the effect of the BBC World Service's cessation of broadcasting to Moldova and Romania from 1 August 2008. [218545]

Mr. Jim Murphy: Since Romania acceded to the EU in 2007 the scale of the competition in radio and all media has intensified. Additionally, mergers have meant that several major FM network partner stations which previously carried BBC Romanian output no longer do so. These FM partnerships are critical in a country where direct listening to the BBC via short wave is neither popular nor cost effective. Since 2007 there has been a significant drop in the audience—currently it is under 3 per cent. of the local radio market in Romania.

Romania will continue to be served by other BBC global news services in English including BBC World Service radio, BBC World News television and online (via bbc.com/news). The BBC's local FM relays (four in Romania and one in the Republic of Moldova), which currently broadcast a mixture of Romanian and English programmes, will broadcast English programmes exclusively (plus Russian and Ukrainian in Moldova), subject to agreement with local regulators.

Alun Michael: To ask the Secretary of State for Foreign and Commonwealth Affairs what the BBC World Service's policy on broadcasting to Eastern European countries is, with specific reference to Moldova and Romania; and if he will make a statement. [218546]

Mr. Jim Murphy: The BBC has announced that it will close its Romanian Service from August 2008. This change follows a review of the BBC World Service's language service portfolio after its overall funding levels, for the three year funding period between 2008-2009 and 2010-2011, were agreed with the Government in October 2007.

This decision, which has been endorsed by the BBC Trust and the Foreign and Commonwealth Office, follows consideration of audience desire to continue broadcasts, the changing media landscape in Romania and the declining impact of the service.

Broadcasts in Romanian for the Republic of Moldova will also cease, as the Moldovan side of the operation cannot be sustained without the infrastructure of BBC Romanian.

Moldova: British Council

Alun Michael: To ask the Secretary of State for Foreign and Commonwealth Affairs if he will take steps to improve access to the services of the British Council for the people of Moldova. [218547]

Mr. Jim Murphy: While the British Council currently has no plans to open independent premises in Moldova, it already employs a member of staff who works out of our embassy in Chisinau to co-ordinate the delivery of British Council resources, programmes and services to the people of Moldova. This post, and the British Council activity in Moldova, is managed through the British Council operations in Romania and in Ukraine. The British Council currently provides the following programmes and services to the people of Moldova:

peacekeeping English Project;

John Smith Fellowship Programme;

Chevening scholarships (currently two scholarships per year);

the Moldova-UK alumni association, now established as a legal entity and receiving guidance from the British Council's Ukraine-UK Professional Network;

guidance in the establishment of an EU information centre and related activity in the break-away enclave of Transnistria;

information services for Moldovan students studying in Romania;

access to British Council electronic resources for people in Moldova;

Cambridge seminars for Moldovan teachers of English; and

English Language exams in Chisinau, and plans to provide a further exams service in Odessa.

Nigeria: Oil

John Battle: To ask the Secretary of State for Foreign and Commonwealth Affairs what discussions his Department has held with Nigerian officials regarding military attacks on Shell Oil facilities recently; and if he will make a statement. [218162]

Meg Munn: Officials from our high commission in Abuja maintain good contacts with the Nigerian Government across a wide range of policy areas including the Niger Delta. Following the two most recent militant attacks (one against the Shell offshore Bonga platform on 19 June and another against a Chevron pipeline in Delta State on 21 June) staff from our high commission in Abuja discussed the incidents with senior advisers in the Presidency and also with senior military officials. During these meetings, our high commission officials stressed the negative impact of continuing insecurity in the Delta region. The Group of Eight leading industrialised nations (G8) stated earlier this month that it shared the concern of the Nigerian Government about the violence in the Delta region and supported the Nigerian Government's efforts to improve the security situation and prospects for development.

My right hon. Friend the Prime Minister met President Yar'Adua of Nigeria in London on 16 July and discussed how the UK might help in Nigerian-led approaches to solving the underlying causes of instability in the Niger Delta.

Raoul Wallenberg

Mr. Amess: To ask the Secretary of State for Foreign and Commonwealth Affairs (1) what recent reports he has received on the case of Raoul Wallenberg; and if he will make a statement; [217917]

(2) what steps he *(a)* has taken and *(b)* plans to take at the United Nations on the case of Raoul Wallenberg; and if he will make a statement; [217912]

(3) what assistance his Department has *(a)* offered and *(b)* plans to offer to the Swedish Bilateral Commission on the disappearance of Raoul Wallenberg; and if he will make a statement. [217911]

Mr. Jim Murphy: The Government have not received any recent reports on the case of the Swedish citizen Mr. Raoul Wallenberg.

The Government have no plans to raise the case of Mr. Raoul Wallenberg at the UN.

Records that might show whether the Swedish Bilateral Commission sought any assistance from the UK, or whether the Foreign and Commonwealth Office might have information of use to the Commission, are not held centrally. To provide this information would incur a disproportionate cost.

Somalia: Al-Qaeda

Mr. Keith Simpson: To ask the Secretary of State for Foreign and Commonwealth Affairs what recent assessment has been made of the operations of al-Qaeda in Somalia and the influence of Abu al-Libi. [218329]

Meg Munn: Al-Qaeda has a long history of terrorist activity in east Africa, from the Nairobi and Dar es Salaam bombings in 1998 to more recent activity in Somalia.

We believe that while al-Qaeda has exploited the absence of effective governance in Somalia to use the country as a base for both terrorist training and planning, the organisation has never established a formal franchise in Somalia.

Abu-Yahya al-Libi is a propagandist for al-Qaeda. He has released statements indicating al-Qaeda's continued support for the Islamic insurgency in Somalia, recognising the conflict as part of the "global jihad".

Somalia: Human Rights

Mr. Keith Simpson: To ask the Secretary of State for Foreign and Commonwealth Affairs pursuant to the answer to the right hon. Member for Richmond Yorks, (Mr. Hayne) of 30 June 2008, *Official Report*, column 675W, what proposals the UK has put forward to strengthen the Office of the UN High Commissioner for Human Rights in Somalia. [218427]

Meg Munn: The UK provides significant financial (fifth largest donor) and political support to the UN Office of the High Commissioner for Human Rights (OHCHR). The UK Permanent Mission to the UN in Geneva is in regular contact with the OHCHR about its field activities.

The OHCHR has seconded a human rights adviser to the UN country team covering Somalia. This has resulted in a human rights based approach being reflected in policy and operational planning undertaken by the UN country team. The UK welcomes the OHCHR's intention to conduct an assessment mission to Somalia, as soon as the security situation will allow, in order to assess how it can most effectively improve the human rights situation.

Sudan: Armed Conflict

Mr. Oaten: To ask the Secretary of State for Foreign and Commonwealth Affairs what assessment he has made of *(a)* allegations of the International Criminal Court's prosecutors against the President of Sudan regarding responsibility for the situation in Darfur and *(b)* the effect of such allegations on the prospects for peace in the region. [219542]

Meg Munn: On 14 July the International Criminal Court (ICC) Prosecutor announced his application to the ICC judges for an arrest warrant against President Bashir of Sudan for genocide, crimes against humanity and war crimes. The Prosecutor is completely independent and the court has its own procedures. It would therefore be inappropriate and premature to comment or speculate on the outcome of the ICC deliberations.

The UK has a long standing position of support for the work and purposes of the ICC. We also have a long standing position of calling on the Government of Sudan to co-operate with the ICC over the two existing indictments. My right. hon. Friend the Foreign Secretary reiterated this to the Sudanese President during his visit to Khartoum on 9 July.

We continue to urge all sides to show restraint, continue to implement the Comprehensive Peace Agreement and engage in the African Union-UN led political process for Darfur.

Sudan: Peacekeeping Operations

Mr. Keith Simpson: To ask the Secretary of State for Foreign and Commonwealth Affairs what further measures the EU plans to take against any party *(a)* impeding the joint UN-AU hybrid force for Darfur, *(b)* obstructing humanitarian access and (c) failing constructively to engage in the Darfur political process, as discussed at the General Affairs and External Relations Council meeting in Luxembourg in June. [218326]

Meg Munn: The UK is ready to consider all available options to secure the effective deployment of the UN-African Union Mission in Darfur and full humanitarian access to promote a peaceful resolution to the situation in Darfur. Possible steps could include an assets freeze or travel ban against individuals engaged in violence, authorising it or impeding progress. Our preference for further measures, in common with many of our EU partners, would be for UN sanctions because of their universal coverage and because they could include, for example, extension of the existing UN arms embargo to cover the whole of Sudan. The EU already has an arms embargo on the whole of Sudan.

Tibet: Human Rights

Mr. Keith Simpson: To ask the Secretary of State for Foreign and Commonwealth Affairs what estimate he has made of the number of Tibetan monks held in prisons and detention centres by the Chinese authorities following the protests in March 2008. [218331]

Meg Munn: There has been no official confirmation of the number of Tibetans held in detention, following the protests in March and April 2008, and unofficial estimates vary considerably. We continue to urge the Chinese authorities to ensure due process for all Tibetan detainees, including that they be allowed access to lawyers of their choice. We have also stressed the need to differentiate between those who peacefully express their views and those who commit violent crimes. My right hon. Friend the Foreign Secretary has spoken to Chinese Foreign Minister Yang on several occasions since the protests emphasising the need to respect human rights.

Our officials have raised the detentions directly with the Chinese authorities both in Beijing and London.

At the end of March, EU Foreign Ministers called for all Tibetan detainees to be treated in conformity with international standards. The rights of the Tibetan detainees were also raised at the EU-China Human Rights Dialogue which took place in Slovenia on 15 May 2008.

Travel Restrictions

Mr. Hague: To ask the Secretary of State for Foreign and Commonwealth Affairs pursuant to the answer of 4 February 2008, *Official Report*, columns 770-71W, on UN resolutions: frontiers, how many further notifications have been received by the UN Security Council Committee established pursuant to UN Resolution 1737 (2006) from states reporting the entry into or transit through their territories of designated persons. [217393]

David Miliband: No further notifications have been received by the UN Security Council Committee from states reporting the entry into or transit through their territories of designated persons.

Turks and Caicos Islands: Human Rights

Daniel Kawczynski: To ask the Secretary of State for Foreign and Commonwealth Affairs if he will investigate allegations of corruption and intimidation of citizens in the British overseas territory of the Turks and Caicos Islands. [218635]

Meg Munn: I refer the hon. Member to my written ministerial statement of 15 July 2008, *Official Report*, columns 13-14WS.

Uganda: Armed Conflict

Mr. Andrew Mitchell: To ask the Secretary of State for Foreign and Commonwealth Affairs what steps the Government are taking against sources of funding for the Lord's Resistance Army, including from the Ugandan diaspora in the UK. [218298]

Meg Munn: The Lord's Resistance Army (LRA) is not a proscribed organisation in the UK or internationally and as such the Government are limited in what action they can take against those in the UK who support or profess membership of the LRA, if they have not broken British law.

Mr. Drew: To ask the Secretary of State for Foreign and Commonwealth Affairs what his policy is on the strengthening of the UN Mission in the Congo to act against the Lord's Resistance Army and its leader Joseph Kony. [218504]

Meg Munn: We support a political solution to end the conflict between the Lord's Resistance Army (LRA) and the Government of Uganda. International backing for a peaceful solution will be vital.

UN Security Council (UNSC) Resolution 1794 in December 2007 renewed the mandate for the UN Mission in the Democratic Republic of Congo (DRC) (MONUC). It included a call for militia groups present in eastern DRC, including the LRA, to lay down their arms. MONUC works alongside the Congolese armed forces to contain the threat of the LRA and ensure the protection of civilians.

We note the UN Secretary-General's analysis in his report of 3 July to the UNSC that a strengthening of MONUC's capacity would be required, should the mission be tasked beyond its current activities against the LRA. In its discussions with UNSC partners and the UN on the mandating of peacekeeping missions, the Government carefully weighs political needs and capacity and budgetary implications. We believe that MONUC has the necessary resources to fulfil its current mandated tasks.

Written Questions: Government Responses

Mr. Amess: To ask the Secretary of State for Foreign and Commonwealth Affairs when he plans to answer Question 201936 on China, tabled by the hon. Member for Southend, West on 22 April; what the reason for the time taken to respond is; and if he will make a statement. [216201]

Meg Munn: A reply was prepared but owing to an administrative error it was not transmitted to Parliament. A response to parliamentary written question 201936 has been sent today.

Mr. Hague: To ask the Secretary of State for Foreign and Commonwealth Affairs when he plans to answer Question 199081, on Iran sanctions, tabled on 1 April 2008. [216296]

David Miliband: A reply was prepared but owing to an administrative error it was not transmitted to Parliament. A response to parliamentary written question 199081 has been sent today.

Zimbabwe: British Nationality

Mr. Keith Simpson: To ask the Secretary of State for Foreign and Commonwealth Affairs what estimate he has made of the number of British nationals who have left Zimbabwe since the March 2008 elections. [218328]

Meg Munn: We estimate the number of British nationals currently resident in Zimbabwe to be approximately 14,000. We know from our network of consular correspondents in Zimbabwe that there has been a steady trickle of British nationals leaving the country since the March elections. During this period 70 British nationals have informed our embassy in Harare that they have left Zimbabwe, but many others could have left without informing either our embassy or their consular correspondent.

BUSINESS, ENTERPRISE AND REGULATORY REFORM

Broadband: Elderly

Helen Southworth: To ask the Secretary of State for Business, Enterprise and Regulatory Reform if he will hold discussions with industry representatives on measures to increase the affordability of access to broadband for *(a)* people with a disability and *(b)* older people. [184358]

Malcolm Wicks: Ofcom's report "The UK Communications Market 2007" shows that developments in technology have seen broadband reaching the majority of households and businesses in the UK and this has been reflected in widespread take-up (there are now over 16 million broadband connections in the UK). The UK has one of the fastest growing broadband markets in Europe and continues to have the most extensive availability, with 99.8 per cent. of households able to access broadband.

Statistics show that 53 per cent. of all UK adults lived in households with a broadband internet connection in Q4 2006—up from 39 per cent. in 2005 and seven times the 2002 penetration level.

The rising take-up of bundled services has contributed to the falling costs of all telecommunication services. The UK's 16 million broadband households are paying 36 per cent. less than they were four years ago, while headline connection speeds are up to 16 times faster—although actual speeds are often far slower than advertised. Competition has seen service providers differentiating in terms of price, speed, quality and in terms of product bundles.

52 per cent. of people in the UK with broadband purchased it in conjunction with another communications service, often receiving heavy discounts on the price of stand alone broadband. Some suppliers now offer standalone broadband for under £10 per month, while others provide free broadband when customers buy additional communication service, the cost of the broadband being subsidised by other services in the bundle. Prices for broadband will continue to fall as competition for subscribers intensifies.

I would be delighted to hear from industry about any plans they have to make broadband more affordable, including for the elderly or disabled.

Cambridge Online Learning Ltd

Mr. Illsley: To ask the Secretary of State for Business, Enterprise and Regulatory Reform (1) if he will investigate the circumstances surrounding the transfer of funds related to EU Objective 1 from KMI Offshore Trust to Cambridge Online Learning Ltd; [218273]

(2) if he will investigate the role of the Federal Trust Bank, Guernsey in the transfer of EU Objective 1 funding from Cambridge Online Learning Ltd to KMI Offshore Trust; [218274]

(3) if he will investigate the loss of EU Objective 1 funding following the entering into administration in February 2006 of Cambridge Online Learning Ltd; [218294]

(4) if he will direct Yorkshire Forward to investigate the sale of assets of Cambridge Online Learning Ltd funded from EU Objective 1 funding; [218296]

(5) if he will investigate the circumstances surrounding the payment of EU Objective 1 funding to Cambridge Online Learning Ltd. [218322]

John Healey: I have been asked to reply.

Implementation of the South Yorkshire Objective 1 programme for 2000-06 is the responsibility of Communities and Local Government as the managing authority for the European regional development fund in England. The Government Office for Yorkshire and the Humber will investigate the circumstances leading to the award and potential loss of EU objective 1 funds in this case.

Economic and Monetary Union

Mr. Maude: To ask the Secretary of State for Business, Enterprise and Regulatory Reform pursuant to the answer of 20 June 2008, *Official Report*, column 1274W, on economic and monetary union, for what reasons he is not willing to place a copy of his Department's euro transition plan in the Library. [217442]

Mr. Thomas: The BERR Euro Transition Plan is to be updated. A copy of the updated plan will be placed in the Libraries of the House when this work is completed.

Internet: Privacy

Sarah Teather: To ask the Secretary of State for Business, Enterprise and Regulatory Reform what assessment he has made of the implications for the privacy of British internet users of the requirement for Google to disclose to a third party the viewing log of people who have its YouTube service. [217419]

Malcolm Wicks: BERR officials made contact with the company on this issue and this is an unfolding situation which we are regularly monitoring. Although the US federal court granted Viacom's petition for disclosure of traffic log data including computer IP addresses, against Google, who own YouTube, the court has specified that Viacom cannot use the disclosed data for any commercial purposes, or to pursue individual users for copyright infringement whose computers might be identifiable from the log data. There is a protective order in the case that prevents information designated as highly confidential from disclosure to anyone but Viacom's lawyers and experts.

Manufacturing Industries: Shoes

Mr. Gordon Prentice: To ask the Secretary of State for Business, Enterprise and Regulatory Reform how many and what proportion of shoes purchased in the UK had been manufactured in the UK in each year since 1997. [181748]

Malcolm Wicks: It is not possible to determine precisely from official statistics how many shoes produced in the UK are sold in the UK market as footwear exports exceed UK production. The following table shows an implied figure if all UK produced footwear were sold in the UK market. However the British Footwear Association estimates that UK companies export up to 90 per cent. of production.

	Sale of goods (£ million)[1]	Imports (£ million)[2]	Exports (£ million)[2]	Implied UK consumption of UK production (percentage)
1997	970	1,909	603	43
1998	862	1,853	538	40
1999	805	2,020	531	35
2000	699	1,979	512	31
2001	692	2,217	481	29
2002	540	2,342	448	22
2003	369	2,354	426	16
2004	335	2,430	419	14
2005	260	2,537	468	11
2006	258	2,673	525	11

[2] BOP basis ONS-MQ10

Members: Correspondence

Mr. Harper: To ask the Secretary of State for Business, Enterprise and Regulatory Reform when he plans to reply to the letters of 4 March and 15 May from the hon. Member for Forest of Dean, on BT payment charges. [216764]

Malcolm Wicks *[holding answer 7 July 2008]:* I apologise for the delay in replying to the hon. Member. My noble Friend the Minister for Business and Competitiveness is currently reviewing Government policy on this issue, a response will be sent shortly.

Public Telephones

Dan Rogerson: To ask the Secretary of State for Business, Enterprise and Regulatory Reform what representations he has made to BT on its observance of its universal service obligation in its proposed payphone removal programme. [218203]

Malcolm Wicks *[holding answer 14 July 2008]:* No such representation has been made to BT. The Universal Service Obligation is administered by Ofcom (the independent regulator). Ofcom requires BT to ensure that there is adequate provision of public call boxes (PCBs) to meet the reasonable needs of end-users in terms of numbers, geographical coverage and quality of service.

Ofcom has set rules which ensure that BT cannot remove the last PCB from an area if the local authority objects. In its guidelines Ofcom has identified lack of mobile coverage as one of the reasons why the local authority might wish to consider objecting.

Radio Waves: EC Action

Mr. Hayes: To ask the Secretary of State for Business, Enterprise and Regulatory Reform what EU legislation on the regulation of radio band waves has been agreed since 1997. [217987]

Malcolm Wicks: I refer the hon. Member to the following list that summarises the legislation affecting the use of radio spectrum. Further details can be found at the following websites:

http://rspg.groups.eu.int/ref_doc/index_en.htm

http://ec.europa.eu/information_society/policy/radio_spectrum/ref_documents/index_en.htm

http://europa.eu.int/eur-lex/lex/RECH_celex.do

EU legislation decisions and directives on the regulation of radio spectrum (band waves) since 1997

30 June 2008: Decision 626/2008/EC on the selection and authorisation of systems providing mobile satellite services.

13 June 2008: Decision 2008/477/EC on the harmonisation of the 2500-2690 MHz frequency band for terrestrial systems providing electronic communications services in the Community.

23 May 2008: Decision 2008/432/EC on harmonisation of the radio spectrum for use by short-range devices 'SRD'. 'Amending Commission Decision 2006/771/EC as below'.

21 May 2008: Decision 2008/411/EC on the harmonisation of the 3400 -3800 MHz frequency band for terrestrial systems capable of providing electronic communications services in the Community.

23 April 2008: modifying Annex A to Decision 2006/679//EC concerning the technical specification for interoperability relating to the control-command and signalling subsystem of the trans-European conventional rail system and Annex A to Decision 2006/860/EC concerning the technical specification for interoperability relating to the control-command and signalling subsystem of the trans-European high-speed rail system 'GSM-R spectrum'.

7 April 2008: Decision 2008/294/EC on harmonised conditions of spectrum use for the operation of mobile communication services on aircraft (MCA services) in the Community.

16 May 2007: Decision 2007/344/EC on harmonised availability of information regarding spectrum use within the Community.

16 May 2007: Decision 2007/346/EC granting a derogation requested by France pursuant to Commission Decision 2006/804/EC on harmonisation of the radio spectrum for radio frequency identification (RFID) devices operating in the ultra high frequency 'UHF' band.

12 February 2007: Decision 2007/90/EC on the harmonised use of radio spectrum in the 5 GHz frequency band for the implementation of Wireless Access Systems including Radio Local Area Networks (WAS/RLANs). 'Amending Decision 2005/513/EC as below'.

14 February 2007: Decision 2007/98/EC on the harmonised use of radio spectrum in the 2 GHz frequency bands for the implementation of systems providing mobile satellite services.

21 February 2007: Decision 2007/131/EC on allowing the use of the radio spectrum for equipment using ultra-wideband technology in a harmonised manner in the Community.

23 November 2006: Decision 2006/804/EC on harmonisation of the radio spectrum for radio frequency identification RFID devices operating in the 'UHF' band.

9 November 2006: Decision 2006/771/EC on harmonisation of the radio spectrum for use by short-range devices. 'Amended by Decision 2008/432/EC as above'.

20 December 2005: Decision 2005/928/EC on the harmonisation of the 169.4 MHz to 169.8125 MHz frequency band in the Community (frequency band originally designated for the ERMES paging system).

14 December 2005: Directive 2005/82/EC of the European Parliament and of the Council Repealing Council Directive 90/544/EEC on the frequency bands designated for the co-ordinated introduction of pan-European land-based public radio paging in the Community.

25 July 2005: Directive 2005/49/EC amending, for the purposes of their adaptation to technical progress, Council Directive 72/245/EEC relating to the radio interference (electromagnetic compatibility) of vehicles and Directive 70/156/EEC on the approximation of the laws of the member states relating to the type-approval of motor vehicles and their trailers.

11 July 2005: Decision 2005/513/EC on the harmonised use of radio spectrum in the 5 GHz frequency band for implementation of Wireless Access Systems 'WAS' including Radio Local Area Networks (WAS/RLANs) 'Amended by Decision 2007/90/EC as above'.

18 March 2005: Decision ECC/DEC/(05)05 on harmonised utilisation of spectrum for systems (IMT-2000/UMTS) operating within the band 2500 to 2690 MHz.

17 January 2005: Decision 2005/50/EC on the harmonisation of the 24 GHz range radio spectrum band for the time-limited use by automotive short-range radar equipment in the Community.

8 July 2004: Decision 2004/545/EC on the harmonisation of radio spectrum in the 79 GHz range for the use of automotive short-range radar equipment in the Community.

26 July 2002: Decision 2002/622/EC establishing a Radio Spectrum Policy Group. L198/49 Official Journal of the European Union 'OJEU' published on 27 July 2002.

7 March 2002: Decision 676/2002/EC of the European Parliament and of the Council on a regulatory framework for radio spectrum policy in the European Community (Radio Spectrum Decision).

7 March 2002: Directive 2002/21/EC on a common regulatory framework for electronic communications networks and services (framework directive), 'OJEU' L108; relating on the same date to the authorisation Directive 2002/20/EC and universal service Directive 2002/22/EC. 'Noted that the Electronic Communication Framework (which Addresses spectrum issues) is currently under review in the Council and the European Parliament'.

14 December 1998: Decision 128/1999/EC of the European Parliament and of the Council of on the coordinated introduction of a third-generation mobile and wireless communications system (UMTS) in the Community. 'Noted that this Decision (128/1999/EC) is no longer in force'.

28 November 1997: Decision 97/838/EC concerning the conclusion on behalf of the European Community, as regards matters within its competence, of the results of the WTO negotiations on basic telecommunications services (OJEU L 347,18.12.1997).

24 March 1997: Decision 710/97/EC of the European Parliament and of the Council on a co-ordinated authorisation approach in the field of satellite personal-communication services in the Community.

Regional Planning and Development: Coastal Areas

Jo Swinson: To ask the Secretary of State for Business, Enterprise and Regulatory Reform what the surplus remaining unspent in the Marine Renewable Deployment Fund has been in each year since its inception. [217927]

Malcolm Wicks *[holding answer 10 July 2008]:* The Marine Renewables Deployment Fund has several budget categories. These are:

Wave and Tidal-stream Energy Demonstration Scheme.

Budget: £42 million. Because no wave or tidal-stream energy technology has yet accumulated three months of continuous operation, which is a key eligibility criterion of the scheme, all of this budget remains unspent. However, one or possibly two technologies are expected to achieve eligibility in late 2008 or early 2009, with at least one other later in 2009.

Related research

Budget: Up to £360,000 depending on research needs identified. The total contractual commitment is £233,000 of which £209,000 has been spent to date. This is broken down by financial year as follows:

£000

Financial year	*Spent*	*Available for commitment*	*Committed but not yet spent*
2006-07	47	313	—
2007-08	156	157	—
2008-09	6	151	—
2008-09	—	127	24

Environmental research

Budget: £2 million. This research is planned for monitoring the environmental impacts of projects installed under the wave and tidal-stream energy demonstration scheme. The technologies' failure so far to qualify for this scheme has meant that all of this budget remains unspent, although work is expected to be able to commence this year.

Infrastructure support:

Budget: Up to £5.64 million. To date, £1,131,000 of this budget has been spent, broken down by financial year as follows:

£000

Financial year	*Spent*	*Available for commitment*
2005-06	831	4,809
2006-07	300	4,509
2007-08	0	4,509
2008-09	0	4,509

All of this money has been spent at EMEC in Orkney, Scotland, and represents a contribution towards the cost the construction of its tidal test site and improvements to its wave test site.

In addition to this, £4.5 million from this budget has been promised to the south west regional development agency as a contribution to its planned wave hub project. This was expected to have been spent by now but the start of wave hub has been delayed.

Jo Swinson: To ask the Secretary of State for Business, Enterprise and Regulatory Reform what spending from the Marine Renewable Deployment Fund has been in each year since its inception on *(a)* wave and tidal stream energy, *(b)* environmental research, *(c)* related research and *(d)* infrastructure support, broken down by region. [217928]

Malcolm Wicks *[holding answer 10 July 2008]:* The information is as follows:

Wave and tidal-stream energy demonstration scheme.

Because no wave or tidal-stream energy technology has yet accumulated three months of continuous operation, which is a key eligibility criterion of the scheme, none of this budget has been spent to date. However, one or possibly two technologies are expected to achieve eligibility

in late 2008 or early 2009, and at least one other later in 2009. The location of these projects will depend on the applications received and approved.

Related research

The total contractual commitment is £233,000 of which £209,000 has been spent to date. This is broken down by financial year and region as follows:

£000

Financial year	Spent	Committed but not yet spent
Scotland		
2006-07	47	—
2007-08	24	—
2008-09	6	24
South East England		
2006-07	—	—
2007-08	132	—
2008-09	—	—

Environmental research

This research is planned for monitoring the environmental impacts of projects installed under the wave and tidal-stream energy demonstration scheme. The technologies' failure so far to qualify for this scheme has meant that all of this budget remains unspent, although work is expected to be able to commence this year. The monitoring work will happen at the deployment sites of the projects deployed under the wave and tidal-stream energy demonstration scheme.

Infrastructure support

To date, £1,131,000 of this budget has been spent, broken down by financial year as follows:

Financial year	Spent (£000)
2005-06	831
2006-07	300

All of this money has been spent at EMEC in Orkney, Scotland, and represents a contribution towards the cost of construction of its tidal test site and improvements to its wave test site.

Jo Swinson: To ask the Secretary of State for Business, Enterprise and Regulatory Reform how many projects the Marine Renewable Deployment Fund has funded in each year since its inception, broken down by region; and how much funding was given in each case. [217930]

Malcolm Wicks *[holding answer 10 July 2008]*: The number of projects supported by the Marine Renewable Deployment Fund by region, funding and financial year are listed as follows:

Numbers of projects by financial year and region

	2005-06	2006-07	2007-08	2008-09
Related research (Scotland)	—	2	1	1
Related research (SE England)	—	—	1	—
Infrastructure support (Scotland)	2	—	—	—

Projects are allocated to the financial year in which they started.

Expenditure by financial year and region

£000

	2006-07 spent	2007-08 spent	2008-09 spent	2008-09 committed but not yet spent
Related research (Scotland)	47	24	6	24
Related research (SE England)	—	132	—	—
Infrastructure support (Scotland)	831	[1]300	—	—

[1] There were two infrastructure projects in Scotland, both at EMEC in Orkney, but BERR expenditure spanned two financial years.

Severn Barrage

Mark Pritchard: To ask the Secretary of State for Business, Enterprise and Regulatory Reform if he will hold discussions with the Welsh Assembly Government and Ministerial colleagues on the environmental effects of the proposed Severn Barrage. [219306]

Malcolm Wicks: Ministerial colleagues and Welsh Assembly Government are involved in the Severn Tidal Power Feasibility Study and discussions are held through our feasibility study ad-hoc Ministerial Group. My right hon. Friend the Secretary of State for Business, Enterprise and Regulatory Reform and Jane Davidson AM, Minister for Environment, Sustainability and Housing, chair the quarterly parliamentary forum for all MPs, Lords and Welsh Assembly Members interested in the study. I chair the quarterly regional forum for the local authorities, local business and environmental organisations. The next meetings of the fora will take place in Cardiff on 24 October.

DEFRA and Welsh Assembly Government are fully involved with the environmental workstream of the study and together with other Government Departments are members of the feasibility study project board.

The feasibility study will include a strategic environmental assessment (SEA) to ensure a detailed understanding of the estuary's environmental resource, recognising the nature conservation significance of the estuary.

The Welsh Assembly Government are involved in the SEA Steering Group which is made up of representatives from a wide group of stakeholders including statutory consultees, business and environmental NGOs.

Telephone Services: Fraud

Ann Coffey: To ask the Secretary of State for Business, Enterprise and Regulatory Reform (1) what consideration he has given to measures to outlaw unsolicited text messages which encourage people to return calls on premium rate lines; [189051]

(2) what estimate has been made of how many people have lost money by returning unsolicited text messages. [189052]

Malcolm Wicks *[holding answer 26 February 2008]:* Under the provisions of the Privacy and Electronic Communications (EC Directive) Regulations 2003, text messages should only be sent with the prior consent of the individual subscriber. However, there is an exemption where the subscriber has given his or her mobile telephone number direct to a company in the context of the purchase of a product or service. Enforcement is undertaken by the Information Commissioner.

Additional safeguards put in place by the regulator, PhonepayPlus and industry require that customers must be clearly informed by text about what they have subscribed to, the cost and how to stop the service. A consumer must be able to switch off the service with the universal 'stop' command. If they have inadvertently signed up to a reverse text service, they can cancel it. A message once a month reminds subscribers about the service and the cost and, for every £20 spent, customers must get a further reminder about how to turn off the service.

Information is not collected on the cost of returning unsolicited text messages.

Video Games

Mr. Maude: To ask the Secretary of State for Business, Enterprise and Regulatory Reform what estimate he has made of the number of people employed by *(a)* games developers, *(b)* games publishers, *(c)* games distributors, *(d)* games retailers and *(e)* other industries and services associated with the games industry in each year since 1997. [196876]

Malcolm Wicks: Accurate data describing the video and computer games sector are not regularly collated or in fact readily available to the Department for Business, Enterprise and Regulatory Reform, particularly as the sector has not had its own separate Standard Industrial Classification (SIC) code.

However, in 2002 the Department of Trade and Industry published "From Exuberant Youth to Sustainable Maturity", a full competitiveness analysis of the computer games sector carried out by independent consultants, Spectrum Strategy. According to this report, in 2000 employment in the computer games sector totalled over 20,000 broken down as follows :

	Number
Games developers	6,000
Games publishers	2,350
Games distributors	1,000
Games retailers	8,000
Associated sectors/services	3,000

In October 2007, UKTI published "Playing for Keeps", a report commissioned from independent consultants Games Investor which included a range of valuable new data on the competitiveness of the UK games development sector compared to key competitor territories including the US and Canada. This report confirmed that 8,000 people plus 700 freelancers were employed in games development in the UK in 2006.

New figures for employment in non-development roles were not collected as part of the "Playing for Keeps" study. However, "European Interactive Games - the 2005 State of the Industry Report" published by consultants Screen Digest in association with the Entertainment and Leisure Software Association suggested that by 2004 the total employment figure for the UK computer games industry had risen to 22,190, of which, 16,190 were in publishing, distribution, retail and associated services.

Written Answers to Questions

Monday 21 July 2008

SCOTLAND

Departmental Sick Leave

David Simpson: To ask the Secretary of State for Scotland (1) how many and what percentage of staff in his Department have had more than two periods of sickness absence of less than five days in each of the last three years; [218709]

(2) how many staff in his Department have had five or more periods of sickness absence of less than five days in two or more of the last five years. [218976]

David Cairns: All staff in the Scotland Office are on secondment from the Scottish Executive or the Ministry of Justice. The Office does not maintain a central record of sick absences; such records are held by the parent Departments.

Domestic Visits

Angus Robertson: To ask the Secretary of State for Scotland how many visits he has made to each Scottish parliamentary constituency over the last two years. [212893]

Des Browne: As of 30 June 2008, in the previous two years my predecessor and I have visited the following Scottish parliamentary constituencies in a ministerial capacity as detailed in the following table:

Constituency	*Visits*
Aberdeen, South	1
Argyll and Bute	1
Central Ayrshire	1
Dundee, East	1
Dunfermline and West Fife	2
East Kilbride, Strathaven and Lesmahagow	1
East Lothian	1
Edinburgh, East	8
Edinburgh, North and Leith	7
Edinburgh, South-West	4
Edinburgh, West	4
Falkirk	2
Glasgow, Central	19
Glasgow, East	2
Glasgow, North	6
Glasgow, South-West	3
Gordon	2
Inverness, Nairn, Badenoch and Strathspey	2
Kilmarnock and Loudoun	2
Livingston	1
Midlothian	1
Moray	1
Ochil and South Perthshire	2
Paisley and Renfrewshire, North	2
Paisley and Renfrewshire, South	2
Stirling	1

Visits to constituencies in a political capacity are not included as records of these are not held by the Scotland Office.

Angus Robertson: To ask the Secretary of State for Scotland how many visits have been made by the Minister of State for Scotland to each parliamentary constituency over the last two years. [212894]

David Cairns: As of 30 June 2008, in the previous two years I have visited the following parliamentary constituencies in a Scotland Office ministerial capacity as detailed in the following table:

Constituency	*Visits*
Aberdeen, North	2
Aberdeen, South	1
Argyll and Bute	4
Ayr, Carrick and Cumnock	3
Banff and Buchan	1
Caithness, Sutherland and Easter Ross	2
Central Ayrshire	1
Dundee, East	2
Dundee, West	3
East Kilbride, Strathaven and Lesmahagow	1
East Lothian	1
Edinburgh, East	3
Edinburgh, North and Leith	6
Edinburgh, South	2
Edinburgh, South-West	6
Edinburgh, West	2
Falkirk	1
Glasgow, Central	44
Glasgow, North	2
Glasgow, North-East	2
Glasgow, South-West	3
Glenrothes	1
Gordon	1
Inverness, Nairn, Badenoch and Strathspey	1
Kilmarnock and Loudoun	1
Lanark and Hamilton, East	1
Linlithgow and East Falkirk	1
Livingston	2
Midlothian	3
Na h-Eileanan an Iar	1
Ochil and South Perthshire	2
Paisley and Renfrewshire, North	2
Perth and North Perthshire	2
Rutherglen and Hamilton, West	1
West Aberdeenshire and Kincardine	1
Cities of London and Westminster	4
Kensington and Chelsea	1
Salford	1

Visits to constituencies in a political capacity are not included as records of these are not held by the Scotland Office.

Government Communications

Mr. Hoban: To ask the Secretary of State for Scotland how many staff in *(a)* his Department and *(b)* its agencies (i) are classified as Government communicators and (ii) have access to the Government Communication Network. [215113]

David Cairns: Two.

Lost Working Days

Mr. Hayes: To ask the Secretary of State for Scotland how many working days have been lost due to industrial action by employees for which his Department is responsible in each year since 1997. [218051]

David Cairns: The Scotland Office was established on 1 July 1999. All staff in the Office are on secondment from the Scottish Executive or the Ministry of Justice; the Office does not maintain a central record of absences due to industrial action; such records are held by the parent Departments.

Olympic Games 2012

David Simpson: To ask the Secretary of State for Scotland what discussions he has had with Ministerial colleagues in the last 12 months on securing benefits to Scotland from the 2012 Olympic Games. [220550]

David Cairns: I attend various meetings with ministerial colleagues where matters surrounding the 2012 Olympic and Paralympic Games are discussed. I also recently discussed this matter in the House during Scottish Questions when I encouraged all businesses, Scottish-based or otherwise, to bid for contracts in relation to the games

OLYMPICS

Departmental Official Cars

Stephen Hammond: To ask the Minister for the Olympics which make and model of car she has chosen as her ministerial car to be provided by the Government Car and Despatch Agency. [217755]

Tessa Jowell: I refer the hon. Member to the answer given to him by the Parliamentary Under-Secretary for Transport my hon. Friend the Member for Poplar & Canning Town (Jim Fitzpatrick) on 16 July 2008, *Official Report*, column 414W.

London Organising Committee of the Olympic Games: Manpower

Mr. Don Foster: To ask the Minister for the Olympics how many people are employed by the London Organising Committee of the Olympic Games (LOCOG); what the staffing costs of LOCOG will be in 2008-09; and how many of LOCOG's staff work on *(a)* project management, *(b)* legacy planning and *(c)* financial oversight. [219272]

Tessa Jowell: The London Organising Committee for the Olympic Games and Paralympic Games (LOCOG) is a company limited by guarantee that relies almost entirely on private funding. As such, LOCOG files its annual report and accounts at Companies House and publishes them on its website at:

www.london2012.com

LOCOG's last annual report for the 12 months up to 31 March 2007 shows that on average in that year the company employed 102 staff, including directors; and staff costs, including pensions and social security costs, totalled £9.48 million. Since that date, LOCOG has put in place more of its work force as it develops all its plans across the complex London 2012 project.

The next set of annual report and financial statements will be published shortly. During the London 2012 games themselves, it is envisaged that LOCOG will employ around 2,600 permanent staff, in addition to volunteers and contractors.

Olympic Games 2012

Mr. Jenkins: To ask the Minister for the Olympics on what date invitations will be sent to prospective competing nations for the London 2012 *(a)* Olympic and *(b)* Paralympic Games. [219990]

Tessa Jowell: Invitations to take part in the Olympic games are normally sent out by the International Olympic Committee (IOC) to all National Olympic Committees (NOCs) around one year before the opening ceremony of the games.

Invitations to take part in the Paralympic games are normally sent out by the Organising Committee in co-operation with the International Paralympic Committee (IPC) around one year before the respective Paralympic games.

Mr. Jenkins: To ask the Minister for the Olympics what recent estimate she has made of the number of nations that will compete in the London 2012 *(a)* Olympic and *(b)* Paralympic Games. [219991]

Tessa Jowell: Based on participation in recent Olympic games and Paralympic games, we expect over 200 National Olympic Committees and about 150 National Paralympic Committees to take part in 2012.

Olympic Games 2012: Finance

Mr. Harper: To ask the Minister for the Olympics what discussions she has had with Ministers in the Department for Communities and Local Government on the funding of Olympic developments from funds released by the establishment of unitary authorities. [220163]

Tessa Jowell: I have had no such discussions.

Olympic Games 2012: Halifax

Mrs. Riordan: To ask the Minister for the Olympics how the London 2012 Olympics will assist regeneration and sports projects in Halifax. [219086]

Tessa Jowell: The Legacy Action Plan (LAP) which was launched in June outlines how Government will deliver a sustainable legacy for the whole of the UK from the London 2012 Olympic games and Paralympic games.

This includes a target to get two million people more active through sport and physical activity by 2012. Sport England will seek to get one million more active through sport; they will do this through new engagement with national governing bodies and through county sports partnerships. Calderdale are already working with other Yorkshire and Humberside authorities and primary care trusts to drive participation. This has led to a 3.5 per cent. increase in participation across the Yorkshire and Humberside region since 2005. Additionally, the Government have announced a new national free swimming programme for those aged 60 plus and under-16s. Local authorities in England will be invited to participate in the scheme and will receive funding towards the costs. The scheme will start in April 2009.

Olympic Games 2012: West Midlands

Mr. Jim Cunningham: To ask the Minister for the Olympics what steps the Government has taken to promote the use of sporting venues in the West Midlands for pre-games training for the London 2012 Olympics. [218534]

Tessa Jowell *[holding answer 16 July 2008]:* The Pre-Games Training Camp guide will be published at the Beijing games this summer by LOCOG.

The West Midlands has 33 Olympic and 14 Paralympic sites in the guide. A seminar for all these facilities was held recently by the West Midlands Nations and Regions Group to offer them advice on marketing their facilities. A regional strategy will be developed by the Nations and Regions Group to promote the region and its facilities to assist the region in securing teams.

In addition, £25,000 will be made available by LOCOG to help attract National Olympic and Paralympic Committees to use the facilities in the guide.

Olympic Lottery Distributor: Manpower

Mr. Don Foster: To ask the Minister for the Olympics how many people are employed by the Olympic Lottery Distributor; and at what cost in 2008-09. [219271]

Tessa Jowell: The Olympic Lottery Distributor currently employs six people. As well as a chief executive, the organisation employs two senior staff members—a Director of Policy and a Head of Finance and Corporate Services. The total staff costs budget for 2008-09, including pension costs and employers' national insurance, is up to £556,878.

NORTHERN IRELAND

Alcoholic Drinks: Smuggling

David Simpson: To ask the Secretary of State for Northern Ireland what the resale value of untaxed spirits intercepted in Northern Ireland was in each of the last three years. [219613]

Angela Eagle: I have been asked to reply.

Once condemned as forfeit to the Crown spirits seized by HM Revenue and Customs are destroyed thus they have no resale value.

Cigarettes: Smuggling

David Simpson: To ask the Secretary of State for Northern Ireland what the resale value of illegal cigarettes intercepted in Northern Ireland was in each of the last three years. [219615]

Angela Eagle: I have been asked to reply.

Once condemned as forfeit to the Crown, cigarettes seized by HM Revenue and Customs are destroyed, thus they have no resale value.

Departmental Information Officers

Mr. Hoban: To ask the Secretary of State for Northern Ireland what the average cost to his Department of employing a press and media officer was in 2007-08. [215262]

Paul Goggins: The following table details average salaries paid to information officers in the Northern Ireland Office. These figures include allowances, national insurance and pension contributions.

	Average FTE as at August 2007 (including ERSNI, ASLCS and allowances) (£)
Grade A Information Officer	51,738
Grade B1 Information Officer	45,617
Grade B2 Information Officer	38,990

Departmental Manpower

Mr. Heald: To ask the Secretary of State for Northern Ireland how many officials work in his Department. [215790]

Paul Goggins: Within the Northern Ireland Office the actual number of staff employed in May 2008, which is the latest date for which figures are available, is 2,089. This figure excludes staff currently on career break or secondment.

Departmental Official Cars

Stephen Hammond: To ask the Secretary of State for Northern Ireland which make and model of car he has chosen as his Ministerial car to be provided by the Government Car and Despatch Agency. [217748]

Paul Goggins: I refer the hon. Gentleman to the answer given by the Department for Transport on 16 July 2008, *Official Report*, column 414W.

Departmental Secondment

Pete Wishart: To ask the Secretary of State for Northern Ireland what procedures his Department uses to ensure equal opportunities in relation to staff secondments to the Department. [214725]

Paul Goggins: The NIO equal opportunities policy is applied to all staff working in the Northern Ireland Office including staff secondments.

Departmental Trade Unions

Bob Spink: To ask the Secretary of State for Northern Ireland which trades unions represent members of staff in *(a)* his Department and *(b)* its agencies. [212476]

Paul Goggins: The Northern Ireland Office attaches importance to ensuring effective consultation and involvement of its staff. It is a personal decision whether or not to join a trade union, but the Department encourages staff to join an appropriate trade union and to play an active part in it, ensuring that their views are represented.

Members of staff in both the Northern Ireland Office and its agencies are currently represented by the following trade unions:

NIPSA—Northern Ireland Public Service Alliance;

CSPOA—Civil Service Professional Officers Association;

FDA—First Division Association;

PCS—Public and Commercial Services Union.

Departmental Training

Mr. Hoban: To ask the Secretary of State for Northern Ireland what training courses were *(a)* available to and *(b)* taken by civil servants in his Department in the last 12 months. [210583]

Paul Goggins: The Business Improvement Team (BIT) in the Northern Ireland Office arranges and delivers learning and development opportunities for NIO staff. The learning and development opportunities available to NIO staff are linked to the Professional Skills for Government requirements and, for the period 1 June 2007 to 31 May 2008, these were set out in BIT's learning and development prospectus. The courses set out in the following table were selected by BIT as meeting PSG requirements. Each member of staff in the NIO has a Personnel Development Plan which records their individual development needs, and BIT will advise which of the courses in the prospectus are appropriate to meet those needs. The following table lists all the courses available in the prospectus and indicates which were attended and which were not required during the year.

Courses available	*Taken/not taken*
Leadership Programme	Attended
Strategic Thinking	Attended
Personal Power and Influencing Skills	Attended
Preparing for Top Management	Attended
Leading Change	Not required
People Management	Attended

Project Management Certificate	Not required
Project Management Overview	Not required
Pathway Programme	Attended

District Policing Partnerships: Standards

Mr. Dodds: To ask the Secretary of State for Northern Ireland which district policing partnerships did not meet the key performance indicator targets set by the Policing Board in 2006-07; and by how much they missed each target. [207673]

Paul Goggins: For the 2006-07 reporting period, District Policing Partnerships (DPPs) carried out a self-assessment of their effectiveness against the targets set out in the DPP Monitoring Framework. The targets for DPPs reflect their statutory functions, as set out in the Police (Northern Ireland) Act 2000. I will write to the hon. Gentleman with details of those DPPs that did not achieve set targets. The Northern Ireland Policing Board recognises the importance of DPP effectiveness and was pleased that the 2006-07 assessment found the majority of targets set were met by most DPPs. The Board reviewed the performance management system for DPPs, and introduced a new effectiveness framework in April 2008.

Elections: Fraud

Robert Neill: To ask the Secretary of State for Northern Ireland what recent assessment he has made of the changes in the levels of electoral fraud in Northern Ireland as a result of the introduction of individual electoral registration. [219069]

Paul Goggins: The Electoral Fraud (Northern Ireland) Act 2002 introduced a number of measures—including individual registration—to address the perception of electoral fraud, which was seen to be undermining the democratic process in Northern Ireland. Both the Electoral Commission and the Chief Electoral Officer for Northern Ireland believe that since these measures were introduced the potential for fraud has been reduced and confidence has been largely restored. Successive Electoral Commission reports have affirmed this.

The Commission's report on the March 2007 Assembly elections stated that while some perceptions of fraud persist among a proportion of the public in Northern Ireland, these

"are not borne out by experience of recent elections."

Fairtrade Initiative

Mr. Moore: To ask the Secretary of State for Northern Ireland pursuant to the answer of 13 March 2008, *Official Report*, columns 567-68W, on the Fair Trade initiative, how much his Department spent on refreshments for official departmental meetings and engagements in each of the last three financial years; and what percentage of this expenditure was on Fair Trade products. [211571]

Paul Goggins: The Northern Ireland Office does not separately record the amount of expenditure on refreshments for official departmental meetings and engagements, nor do we record the amount spent on Fairtrade goods.

Homicide

Mr. Dodds: To ask the Secretary of State for Northern Ireland how many murders committed in Northern Ireland in each year since 1978 remain unsolved. [207740]

Paul Goggins: The following table details the information requested.

	Number
1978	96
1979	134
1980	96
1981	116
1982	111
1983	96
1984	73
1985	59
1986	88

1990	82
1991	118
1992	111
1993	104
1994	80
1995	22
1996	39
1997	42
1998	50

	Number
1999	32
2000	42
2001	55
2002	35
2003	33
2004	4
2005	9
2006	2
2007	3

Lost Working Days

Mr. Hayes: To ask the Secretary of State for Northern Ireland how many working days have been lost due to industrial action by employees for which his Department is responsible in each year since 1997. [218052]

Paul Goggins: The information held within the Northern Ireland Office relates only to days lost due to industrial action by current staff. Staff who have left the Department or transferred out of the Department are not included in the figures and so we are unable to provide total figures for days lost due to industrial action.

Maze Prison

Mr. Gregory Campbell: To ask the Secretary of State for Northern Ireland whether he has had discussions with the Culture, Arts and Leisure Minister in Northern Ireland on the former Maze site *(a)* before and *(b)* since his recent public comments on the future use of the site. [220159]

Paul Goggins: During the course of his duties, my right hon. Friend the Secretary of State naturally has discussions with members of the devolved administration from time to time.

Speed Limits: Cameras

Sammy Wilson: To ask the Secretary of State for Northern Ireland how much revenue has been generated from fines imposed as a result of offences detected by speed cameras in each council area in Northern Ireland in each year since 2003. [215736]

Paul Goggins: The following table outlines the amount of revenue from fixed penalty notices for excess speed in each police District Command Unit. Data cover the calendar years 2003 to 2007.

Amount of revenue received for fixed penalty notices for excess speed by district command unit (DCU) 2003-07

£

DCU	2003	2004	2005	2006	2007
Antrim	660	0	0	0	0
Armagh	54,540	3,000	3,180	11,220	19,080
Ballymena	45,360	6,960	3,960	3,600	8,220
Ballymoney	16,860	1,920	1,080	12,540	52,980
Banbridge	67,560	58,500	104,760	80,040	38,740
Belfast East	82,260	104,520	55,320	27,900	30,480
Belfast North	25,080	63,960	42,480	32,280	40,080
Belfast South	17,760	18,720	16,860	14,280	9,720
Belfast West	5,520	13,860	12,240	8,160	5,880

Amount of revenue received for fixed penalty notices for excess speed by district command unit (DCU) 2003-07

£

Total	792,720	714,300	610,200	582,480	719,220

TREASURY

Alcoholic Drinks: Smuggling

David Simpson: To ask the Chancellor of the Exchequer what the resale value of untaxed spirits intercepted in England and Wales was in each of the last three years, broken down by region. [219614]

Angela Eagle: Once condemned as forfeit to the Crown spirits seized by HM Revenue and Customs are destroyed thus they have no resale value.

Banks: Finance

Mr. Hancock: To ask the Chancellor of the Exchequer when the proposal to allow major banks to translate certain mortgage debts into Government bonds was first considered by his Department; and what the reasons are for the timing of the implementation of the proposal. [201903]

Kitty Ussher: The special liquidity scheme announced by the Bank of England on April 21 is designed to provide liquidity support to participating banks and building societies by allowing them, for a temporary period, to swap mortgage backed securities and other assets for highly liquid assets in the form of Treasury Bills. The credit risk on the value of the mortgage backed securities or other assets remains with the banks and building societies.

As set out by the Chancellor in his statement to the House on April 21, the scheme announced by the Bank of England is a further step towards tackling the liquidity issues in the financial markets which became increasingly acute during the preceding weeks. The scheme was developed following extensive discussions with the Treasury and the Financial Services Authority.

Banks: Government Securities

Mr. Brady: To ask the Chancellor of the Exchequer what assessment he has made of the effectiveness of the Special Liquidity Scheme in meeting its objectives. [220094]

Kitty Ussher: The Special Liquidity Scheme is operated by the Bank of England. In its Quarterly Bulletin issued on 16 June, the Bank noted that

"Feedback on the Scheme from market contacts suggested that it has achieved its objective of improving the liquidity position of, and hence confidence in, the UK banking system".

Cash Dispensing: Wales

Mark Williams: To ask the Chancellor of the Exchequer what assessment he has made of access to free-of-charge cash withdrawals in Mid and West Wales. [221388]

Kitty Ussher: As I announced on 17 July, excellent progress has been made towards the goal of providing around 600 new free ATMs across 1,707 low-income target areas identified by the ATM working group as lacking convenient access. I am pleased to say that of the 198 low-income target areas in Wales, 119 are now expected to benefit from convenient access to free cash withdrawals as a result of free new cash machines already in operation or under contract to be installed by the end of 2008.

Child Benefit: Personal Records

Mr. Evans: To ask the Chancellor of the Exchequer what the cost to date has been of *(a)* the investigation into the loss of data discs by HM Revenue and Customs and *(b)* the planning and implementation of new procedures to avoid a future loss. [220152]

Jane Kennedy: Kieran Poynter identifies the costs of his investigation into the chain of events leading to the loss of child benefit data in October 2007 at Appendix A of the final report of his "Review of information security at HM Revenue and Customs". A copy of the report is available in the Library of the House.

With regard to the costs associated with data security enhancements at HMRC, I would refer the hon. Member to the statement made by my right hon. Friend the Chancellor on 25 June 2008, *Official Report*, column 287.

Cigarettes: Smuggling

David Simpson: To ask the Chancellor of the Exchequer what the resale value of illegal cigarettes intercepted in England and Wales was in each of the last three years, broken down by region. [219616]

Angela Eagle: Once condemned as forfeit to the Crown cigarettes seized by HM Revenue and Customs are destroyed thus they have no resale value.

Corporation Tax

Mr. Redwood: To ask the Chancellor of the Exchequer what the projected *(a)* oil and *(b)* gas price used in the assumptions for modelling the North Sea oil and gas element of corporation tax was in each Budget since 1997. [215732]

Angela Eagle: The National Audit Office has audited the oil price assumption underlying public finance projections since the 1997 pre-Budget report. The current assumption is outlined in box C1 of Budget 2008.

Council Tax: Wales

Mr. Pickles: To ask the Chancellor of the Exchequer pursuant to the answer of 14 May 2008, *Official Report*, column 1622W, on council tax: Wales, what the timetable is for the Valuation Office Agency's updating of its website to show changes to the 2005 council tax lists in Wales since 1 April 2005 as a result of inquiry or appeal. [218314]

Jane Kennedy: It is expected that the website will be updated by 1 September 2008.

Departmental Alcoholic Drinks

David Simpson: To ask the Chancellor of the Exchequer what measures are in place in his Department to monitor expenditure on alcohol for hospitality purposes. [219587]

Angela Eagle: The Treasury's expenditure is incurred in accordance with the principles of Managing Public Money, as well as the Department's own internal guidelines, which state that expenditure on official entertainment (including alcohol) should be incurred in moderation and also be compatible with the occasion and the standing of guests.

Departmental Compensation

Mr. Hayes: To ask the Chancellor of the Exchequer what the 10 highest payments made by his Department were under property compensation cases brought against it over the last 12 months for which figures are available; which of the cases were *(a)* contested and *(b)* uncontested by his Department, and what the nature of each incident was. [216703]

Angela Eagle: There were two uncontested compensation payments made in 2007-08. Both related to personal property lost during office moves and amounted to £146 and £75 respectively.

Departmental Conferences

Mr. Hoban: To ask the Chancellor of the Exchequer if he will list the conferences hosted by his Department in each of the last two years; and what the cost was of each conference. [211697]

Angela Eagle: The following table shows details of conferences attended by more than 100 delegates that were hosted by HM Treasury in 2006-07 and 2007-08.

Date	Conference title	Cost (£000)
2006		
April	Financial Inclusion Taskforce	19
May	Launch of the Third Sector Review	77
May and November	Special Investigations Group of government financial investigators (costs recovered from delegates)	—
June to July	Third Sector Review Regional consultation (six events)	59
July	Enterprise and Growth Unit Summer Reception	10
2007		
May and November	Special Investigations Group of government financial investigators (costs recovered from delegates)	—
June	Young Black Entrepreneurs	5
June	Financial inclusion in developing countries (funded by DFID)	—
July	Tripartite Business Continuity	4
July	Enterprise and Growth Unit Summer Reception	12
October	Financial Stability and the Challenge of Globalisation in the UK	10

Departmental Consultants

Mr. Evans: To ask the Chancellor of the Exchequer how much his Department spent on consultancy fees in 2007-08. [215319]

Angela Eagle *[holding answer 30 June 2008]:* Details of the Treasury's unaudited spending on consultancy in 2007-08 is shown in table A3 on page 111 of the annual report (CM 7408) available from

http://www.hm-treasury.gov.uk/about/departmental_reports/deptreport_index.cfm.

Departmental Expert Groups

Angus Robertson: To ask the Chancellor of the Exchequer what expert groups his Department has set up in each year since 1999. [213198]

Angela Eagle: Details of formal, standing bodies set up by Government to provide independent, expert advice to Departments and Ministers are published annually by the Cabinet Office. These bodies, known as advisory non-departmental public bodies (NDPBs), are listed in the annual "Public Bodies" publication. "Public Bodies" also contains some details on short-term advisory groups and task forces. Copies of "Public Bodies" dating back to 1999 can be viewed and downloaded from:

http://www.civilservice.gov.uk/about/public/bodies.asp

Copies are also available in the Library for the reference of Members.

Details of Treasury's NDPBs for 2007-08 are published in Treasury's Annual Report, which can be downloaded from:

http://www.hm-treasury.gov.uk/about/departmental_reports/annual_report08.cfm

Copies are available in the Library for the reference of Members. Further details on Treasury short-term advisory groups and task forces can be found on the Treasury website:

http://www.hm-treasury.gov.uk/

Departmental Furniture

Mr. Hoban: To ask the Chancellor of the Exchequer how many *(a)* chairs, *(b)* desks and *(c)* other office furnishings have been purchased by his Department and its agencies in each of the last five years; and at what cost in each case. [211756]

Angela Eagle: The Treasury's expenditure on furniture and fittings over the last five years was:

	Amount (£000)
2007-08	51
2006-07	4
2005-06	557
2004-05	518
2003-04	69

The provision of furniture purchase volumes and analysis of expenditure into the categories identified in the question are available only at disproportionate cost.

Departmental ICT

Mr. Stephen O'Brien: To ask the Chancellor of the Exchequer whether his Department's IT *(a)* systems and *(b)* services conform to the ISO 27001 standard. [216054]

Angela Eagle: None of the Department's IT systems and services are accredited as conforming to the ISO 27001 standard, although in all cases our aim is to adhere to the main principles of the standard.

Departmental Manpower

Mr. Maude: To ask the Chancellor of the Exchequer how many permanent staff within *(a)* his Department and *(b)* its agencies are classed as (i) staff without posts and (ii) part of a people action team. [210867]

Angela Eagle: There are no "staff without post" in the Treasury or any of its agencies. "People action teams" do not exist in HMT or any of its agencies.

Departmental Marketing

Pete Wishart: To ask the Chancellor of the Exchequer what the cost was of *(a)* internet and website design and hosting, *(b)* print media design and *(c)* broadcast media of each of his Department's public information campaigns since 1997. [214711]

Angela Eagle: HM Treasury has incurred no costs for public information campaigns since 1997.

Departmental Official Cars

Stephen Hammond: To ask the Chancellor of the Exchequer (1) which make and model of car the Chief Secretary to the Treasury has chosen as his ministerial car to be provided by the Government Car and Despatch Agency; [217752]

(2) which make and model of car he has chosen as his Ministerial car to be provided by the Government Car and Despatch Agency. [217762]

Angela Eagle: I refer the hon. Gentleman to the answer given to him by the Parliamentary Under-Secretary of State, Department for Transport my hon. Friend the Member for Poplar & Canning Town (Jim Fitzpatrick) on 16 July, 2008, *Official Report*, column 414W.

Departmental Planning Permission

Mr. Maude: To ask the Chancellor of the Exchequer what planning applications were made by his Department between May 1997 and May 2001; and for what purpose in each case. [217445]

Angela Eagle: The information is not readily available and could be obtained only at disproportionate cost.

Departmental Procurement

David Simpson: To ask the Chancellor of the Exchequer what his Department's policy is on requesting discounts from its suppliers in return for swift payment of invoices. [220422]

Angela Eagle: The Treasury seeks prompt payment discounts in situations where such a discount will improve the total value for money from the contract; and where the potential saving from such a discount will outweigh the additional contract administration costs necessary to realise the discount.

HM Treasury aim to pay off all valid invoices (including T & S) within 30 days.

Departmental Sick Leave

David Simpson: To ask the Chancellor of the Exchequer how many staff in his Department have had five or more periods of sickness absence of less than five days in two or more of the last five years. [218973]

Angela Eagle: The information requested could be obtained only at disproportionate cost.

Departmental Wastes

Mr. Jenkins: To ask the Chancellor of the Exchequer what steps his Department has taken to reduce the volume of waste produced by it and sent to landfill in each of the last two years. [215886]

Angela Eagle: HM Treasury has a waste strategy that has over the past two years reduced waste sent to landfill, by removing general waste bins and putting recycling facilities in place, and in Rosebery Court introducing composting of organic waste. In 1 Horse Guards Road, since February 2008, food waste has been separated in the staff restaurant and sent to a biogas plant, to generate electricity.

These measures reduced the amount of waste sent to landfill by 33 tonnes from 1 Horse Guards Road in 2007-08. Further offsite sorting by the waste contractor, removing recyclables from the waste will have further reduced the amount sent to landfill, although no figures are available. Data showing annual change in waste sent to landfill are not currently available for Rosebery Court, but the rate has also fallen.

Detailed information on waste arising and recycling information can be found in the HM Treasury annual report 2007-08.

Devolution: Finance

Adam Price: To ask the Chancellor of the Exchequer if he will conduct a needs-based analysis of Government funding of the devolved administrations. [220048]

Yvette Cooper: The devolved funding arrangements are set out in the 'Statement of Funding Policy', which was updated and published by the Treasury in October 2007. Under these arrangements the devolved administrations are able to allocate their block budgets to devolved spending programmes to reflect their own assessment of their priorities and needs.

Economic Stability Team

Mr. Baron: To ask the Chancellor of the Exchequer how many *(a)* civil servants, *(b)* special advisers and *(c)* members of the Council of Economic Advisers were members of the Economic Stability team in his Department in each of the last 11 years, broken down by pay grade. [220072]

Angela Eagle: These data are not held centrally and could be provided only at disproportionate costs.

EU Emissions Trading Scheme

Lynne Jones: To ask the Chancellor of the Exchequer what estimate he has made of the revenues that will arise from the auctioning of emissions permits in Phase 111 of the European Emissions Trading Scheme; and if he will make a statement. [219753]

Angela Eagle: The framework for future phases of EU ETS are currently under discussion and as such the final structure for auctioning in future phases has not yet been decided. The revised EU ETS directive is due to be finalised later this year.

The amount of revenue from auctioning in Phase III of the EU emissions trading scheme will be influenced by the market price of carbon at the time of the auctions. The Government do not comment on carbon price, as it would be improper for Government to speculate on how the market will function in the future.

Willie Rennie: To ask the Chancellor of the Exchequer (1) what plans the Government has for spending revenues raised through the auctioning of allowances from the *(a)* second and *(b)* third phase of the EU Emissions Trading Scheme; and if he will make a statement; [219957]

(2) what proportion of the revenues generated by auctioning of allowances from the second phase of the EU Emissions Trading Scheme will be spent on *(a)* research and development for renewable energy, *(b)* carbon capture and storage development and *(c)* energy efficiency improvements. [219958]

Angela Eagle: The framework for future phases of EU ETS is currently under discussion and as such the final structure for auctioning in future phases has not yet been decided. The revised EU ETS directive is due to be finalised later this year.

Any revenue raised through the use of auctioning would be considered part of general revenue streams, and the spending review process ensures that resources are allocated efficiently to deliver Government objectives.

Comprehensive spending review 2007 launched the domestic Environmental Transformation Fund (ETF) of over £400 million. Budget 2008 announced the full allocation of funding under the ETF, including offshore wind, carbon capture components, wave and tidal, hydrogen fuel cells and microgeneration, as well as support for energy efficiency in small businesses, households and the public sector.

EU External Trade: Israel

Tom Levitt: To ask the Chancellor of the Exchequer how many proof of origin certificates HM Revenue and Customs has accepted under the 1 February 2005 technical arrangement enabling companies operating inside Israel to maintain trade preferences under the EU-Israel Association Agreement; and what the value of this trade has been. [219744]

Jane Kennedy: Between 1 February 2005 and 30 June 2008 HM Revenue and Customs received 99,757 customs import declarations which were accompanied by proofs of preferential origin issued in Israel. The total value of the trade was £1,350,690,522.

Excise Duties: Alcoholic Drinks

Ben Chapman: To ask the Chancellor of the Exchequer (1) whether he has made an assessment of the effects on public houses of *(a)* past and *(b)* future increases in levels of taxes on alcohol; [218436]

(2) whether he has conducted or evaluated research on the possible relationship between levels of duty on alcohol and the rate of closure of public houses. [218524]

Angela Eagle: As part of the Budget process, I met representatives from the trade, including the British Beer and Pub Association, to listen to their views on the current situation and the cost pressures in the industry.

As with all tax policy decisions, we will be monitoring the impact of alcohol duty increases on a range of factors.

Excise Duties: Diesel Fuel

Norman Baker: To ask the Chancellor of the Exchequer what estimate he has made of receipts from duty paid on diesel by the rail industry in 2007-08. [216410]

Angela Eagle *[holding answer 3 July 2008]:* No estimate has been made for 2007-08.

Energy statistics from the Department for Business, Enterprise and Regulatory Reform, available at www.berr.gov.uk, indicate that 654 thousand tonnes (775 million litres) of gas oil ('red diesel') was consumed by the rail industry in 2006.

Applying the duty rate for rebated oils to this figure gives an estimate of revenue in 2006 of approximately £50 million.

Excise Duties: Motor Vehicles

Justine Greening: To ask the Chancellor of the Exchequer (1) how many people paid vehicle excise duty at the pre-graduated rate in 2007-08 in respect of cars of engine size *(a)* 1549cc and below and *(b)* above 1549cc; what estimate his Department has made of the number of vehicles in each category in low-income households; and if he will make a statement; [208268]

(2) what estimate he has made of the number of people who will pay vehicle excise duty (VED) at the pre-graduated rate in 2008-09; how many will pay VED at *(a)* a lower rate, *(b)* a higher rate and *(c)* the same rate in (i) 2009-10 and (ii) 2010-11; and if he will make a statement; [208269]

(3) what estimate he has made of the revenue from vehicle excise duty at the pre-graduated rate from vehicles with engine sizes of *(a)* 1549cc and below and *(b)* above 1549cc in (i) 2008-09, (ii) 2009-10 and (iii) 2010-11; and if he will make a statement; [208270]

(4) what estimate he has made of the number of cars with engine sizes *(a)* 1549cc or below and *(b)* above 1549cc liable for vehicle excise duty at the pre-graduated rate in (i) 2008-09, (ii) 2009-10 and (iii) 2010-11; and what estimate he has made of the number of cars in each category in low-income households in each year; and if he will make a statement. [208271]

Norman Baker: To ask the Chancellor of the Exchequer how many new vehicles were registered in each year from 2001 to 2006, broken down by each of the new vehicle excise duty (VED) bands to be applied to cars registered in those years; what the net tax take will be from the applications of these new bands to those vehicles; and what the net tax take for those vehicles would have been had VED continued to be applied as previously. [210709]

Mr. Amess: To ask the Chancellor of the Exchequer what the evidential basis was for his statement of 4 June 2008, *Official Report*, column 765, that the majority of drivers will benefit from the proposed changes to vehicle excise duty; and if he will make a statement. [210664]

Mr. Harper: To ask the Chancellor of the Exchequer (1) what assessment he has made of the effect of his proposed changes to vehicle excise duty on disabled people; [219729]

(2) what assessment he has made of the likely effect of proposed vehicle excise duty increases on vehicle owners rural areas with limited public transport. [220221]

Angela Eagle: The Budget 2008 included proposed reforms to the system of CO_2-based VED, aimed at strengthening the incentive to develop and use cleaner, more fuel-efficient cars. The reforms build on the system of banding by CO_2 emissions introduced in 2001 in response to rising concern over the impact of vehicle emissions.

While CO_2 emissions from new cars have dropped by 13 per cent. since 1997, overall emissions from road transport still account for over 20 per cent. of the UK's total emissions and it is clear that we must go further to ensure we meet our environmental targets.

Proposed EU targets supported by the Government mean the CO_2 emissions of an average new car will need to be cut to 130 grams per kilometre by 2012. In addition, the King review, published alongside the Budget, showed that carbon emissions could be reduced by 25 per cent. if motorists shifted to the lowest carbon car within a particular class.

The Budget 2008 reforms to VED will increase the number of bands from seven to 13 in 2009-10. From 2010-11, new cars will be taxed differently in the first year to influence purchasing choices at the point of sale. Overall these measures will ensure that drivers of the lowest emitting cars will benefit from a reduced VED rate and those who drive higher emitting cars will pay more.

The following tables are based on the new VED bands published on page 122 of the Budget Red Book and set out estimates for the number of cars that will sit within each new VED band in both 2009 and 2010. They also show how the amount that these cars pay will compare in real terms to the rate in 2008. Those who are eligible for the higher mobility element of disability living allowance are exempt from VED. In addition, there is also an exemption for organisations that operate passenger vehicles for the benefit of disabled people. In total, over 1.1 million disabled motorists are exempt from VED.

Furthermore, Government continue to support the long established motability scheme, set up by the Government in 1977 to provide disabled people with safe, reliable and affordable cars.

By 2010, 55 per cent. of motorists will pay less or the same in real terms as a result of these reforms. In addition, excluding first rates for new vehicles, the reforms mean that:

80 per cent. will pay no more than £55 extra;

95 per cent. will pay no more than £100 extra; and

5 per cent. will pay between £100 and £245 extra.

2009-10

Band	*CO_2 (g/km)*	*2009-10*	*Percentage pay less*	*Percentage pay the same*	*Percentage pay more*
A	Up to 100	400	0	100	0
B	101-110	217,000	100	0	0

All bands		21,915,000	18	39	43

The graduated VED rate will apply to all cars for which emissions data are available, i.e. those first registered after March 2001. For cars purchased pre-March 2001, different rates apply.

There are also separate arrangements in place for alternative fuel cars which are defined as 'gas-propelled vehicles, and those capable of being propelled by petrol and gas or electricity and petrol/diesel'.

These cars will receive a discount on their graduated VED. In 2008-09, alterative fuel cars in bands A to E receive a £20 discount from the standard graduated VED rate, and cars in bands F and G receive a £15 discount. In 2009-10, the discount for cars in new bands A to I will be £20, and £15 for cars in bands J to M. In 2010-11, all alternative fuel cars will receive a £10 discount from the standard rate.

As has been the practice under successive Governments, the VED rates will apply to all cars, including second-hand ones, where emissions data are available. Since the number of used cars sold is three times that of new cars, it is important to provide an environmental incentive to the used car market as well as the new car market.

The new rates will include a transitional period for cars registered between March 2001 and March 2006 that emit 225g/km or higher. These cars have been charged at a lower rate since 2006. They are currently charged the rate for current band F (£210), when the correct band for their emissions is band G (£400).

In order to reduce the financial impact on these motorists in any one year, these vehicles will be charged a lower transitional rate of £300 in 2009, before moving into band L or M in 2010—bringing them in line with all other vehicles with the same emission levels. This group represents the 5 per cent. of motorists in graduated VED who will pay between £100 and £245 extra in non first year rates from 2010.

The graduated VED rates do not apply to cars purchased before March 2001, as there are no comprehensive emissions data available for these vehicles. Motorists who bought their cars before March 2001 will continue to pay VED based on the size of the engine. Cars with engines below 1549 cc will have their VED rate frozen at £120 in 2009—a fall in real terms—while cars with engines above 1550 cc will see their VED rate increase by £15. Having different rates depending on the engine size ensures that there is an environmental signal for VED taxation for pre-2001 cars, taking account of the data available.

The following table is based on the categories for pre-March 2001 cars published on page 123 of the Budget Red Book and sets out the current Treasury estimate of the number of cars that will sit within each category.

	Estimated number of pre-2001 cars by band			
	2007-08	*2008-09*	*2009-10*	*2010-11*
1549cc and below	4,198,000	3,771,000	3,322,000	2,851,000
1550 cc and above	7,091,000	6,403,000	5,687,000	4,934,000

In 1997 the rate of VED was £145. Had the Government simply uprated the duty in line with inflation then all motorists would have to pay £200 in 2009. Therefore, all cars purchased prior to 2001 will pay no more in real terms in 2009 than in 1997. The single VED band meant that all car owners were taxed the same amount, regardless of the type of car that they drive. By introducing and then reforming graduated VED since 2001, the Government have made the system less regressive, as well as ensuring that the most polluting cars pay more than the least polluting.

Statistics for the number of the vehicles in low-income households are not available for 2007-08, and has not been forecast for 2008-09 onwards. The Government do not collect data from drivers when purchasing tax discs according to their household income. The best available relevant data on the impact of VED on low income households are set out in my PQ answer of 4 June.

The Treasury does not hold information on the specific impact of proposed vehicle excise duties on rural areas. Working vehicles that do not use public roads other than for travelling no more than 1.5 kilometres between different areas of land owned by the same person are exempt from VED.

Financial Services Authority: Northern Ireland

Mr. Donaldson: To ask the Chancellor of the Exchequer if he will establish an office of the Financial Services Authority in Northern Ireland. [220748]

Kitty Ussher: The Financial Services Authority conducts a range of events to ensure effective communication with firms based in Northern Ireland. These are an operational matter for the FSA, which is independent of Government.

Fish

Mr. Peter Ainsworth: To ask the Chancellor of the Exchequer how much fish was procured by his Department and at what cost in each of the last five years, broken down by species; and what amount and value of such fish met the Marine Stewardship Council standard in each such year, broken down by species. [217896]

Angela Eagle: The information requested can be provided only at disproportionate cost by the PFI provider of catering services to the Treasury.

Fruit: Scotland

Pete Wishart: To ask the Chancellor of the Exchequer what estimate he has made of the amount the Exchequer received from the Scottish fruit industry in each of the last five years. [218429]

Angela Eagle: No such estimate has been made by the Treasury.

Fuels: Prices

Dr. Kumar: To ask the Chancellor of the Exchequer what assessment he has made of the relationship between speculation on futures markets and prices of crude oil and gas. [219851]

Angela Eagle: The Government published their latest assessment of the relationship between speculation on futures markets and commodity prices, including crude oil and gas, in "Global Commodities: a long-term vision for stable, secure and sustainable global markets" on 12 June 2008.

Insurance: Unfair Practices

Harry Cohen: To ask the Chancellor of the Exchequer what steps his Department proposes to take on overcharging in relation to payment protection insurance policies as reported by the Competition Commission. [220868]

Kitty Ussher: The Competition Commission's report of 5 June 2008 on payment protection insurance is a provisional findings report. Her Majesty's Treasury will maintain a close dialogue with industry and the independent Financial Ombudsman Service, Financial Services Authority, Competition Commission, and the Office of Fair Trading.

Members: Correspondence

Mr. Winnick: To ask the Chancellor of the Exchequer when the hon. Member for Walsall, North will receive a reply to his letter of 12 May regarding a constituent, reference 96705. [220321]

Angela Eagle: I understand the correspondence referred to, initially sent to the Foreign and Commonwealth Office, is being dealt with by DCMS.

Minimum Wage: Hampshire

Sandra Gidley: To ask the Chancellor of the Exchequer how many people aged *(a)* under 18, *(b)* under 21 and *(c)* over 60 years were found to be paid below the minimum wage in (i) Hampshire and (ii) Southampton in each of the last five years. [218621]

Jane Kennedy: The information requested is not available.

Minimum Wage: Tamworth

Mr. Jenkins: To ask the Chancellor of the Exchequer how many companies in Tamworth have been *(a)* fined and *(b)* required to cease trading for non-compliance with national minimum wage provisions since 2005. [220127]

Jane Kennedy: HMRC does not maintain statistical information at constituency level.

Mortgages: Repossession Orders

Adam Price: To ask the Chancellor of the Exchequer how many homes have been repossessed by Northern Rock since nationalisation. [220078]

Kitty Ussher: During this period of temporary public ownership, Northern Rock is managed by its board at arm's length from the Government on commercial principles. It is a matter for the company's management to release specific business updates or provide any required disclosures in their audited annual report and accounts.

Non-Domestic Rates: Tax Allowances

Sarah Teather: To ask the Chancellor of the Exchequer how many applications for exemption from business rates have been submitted to the Valuation Office Agency in each of the last five years. [220801]

Jane Kennedy: The numbers of proposals received by the Valuation Office Agency over the last five years, seeking removal from the non-domestic lists, including those where it is claimed the property is now wholly domestic is:

	England and Wales
2003-04	1,397
2004-05	1,338
2005-06	931
2006-07	654
2007-08	731
Total	5,051

Northern Rock

Jim Cousins: To ask the Chancellor of the Exchequer whether *(a)* he and (b) another of the tripartite authorities has conducted an inquiry into the leak of the offer of emergency assistance to Northern Rock on 13 September 2007. [217624]

Kitty Ussher: As the Chancellor told the Treasury Committee on 25 October 2007, the Treasury did not conduct a leak inquiry. Nor have the Bank of England or the Financial Services Authority.

Occupational Health: Costs

Jo Swinson: To ask the Chancellor of the Exchequer what estimate he has made of the cost to *(a)* the economy and *(b)* the Exchequer of stress-related illnesses in the last year. [220749]

Angela Eagle: Dame Carol Black's review of the health of Britain's working age population estimated that the cost to the economy of sickness absence and worklessness associated with working age ill-health are over £100 billion a year, which includes stress related illness.

Olympic Games

Mr. Don Foster: To ask the Chancellor of the Exchequer how many *(a)* Ministers and *(b)* officials from his Department plan to attend the Beijing Olympic Games; to what purpose in each case; and what estimate he has made of the cost. [212117]

Angela Eagle: I refer to the answer given to the hon. Member for Faversham and Mid-Kent (Hugh Robertson), the Shadow Sports and Olympics Minister on 19 May 2008, *Official Report*, columns 5-6W.

The number of Government officials attending has not yet been finalised.

Public Expenditure

Adam Price: To ask the Chancellor of the Exchequer whether he has set a date for the publication of the Government's factual paper on the Barnett Formula. [220077]

Yvette Cooper: No decision has been made yet on the date of publication.

Public Sector: Pay

Philip Davies: To ask the Chancellor of the Exchequer what *(a)* economic models and *(b)* mechanisms his Department uses to estimate the effect of average public sector pay increases on inflation. [203567]

Yvette Cooper: Government policy is to ensure that public sector pay settlements:

Reflect the individual labour market position of workforces, particularly their recruitment and retention position;

Are consistent with the achievement by the Bank of England of its CPI inflation target of 2 per cent.;

Are affordable for departments; and

Represent value for money for taxpayers.

Consistency with the inflation target does not mean that there is a specific number which is the target for pay awards. But it does mean that pay awards need to support low and stable inflation.

A wide range of factors can potentially impact on inflationary pressure. These factors are considered by the Monetary Policy Committee of the Bank England when setting interest rates to meet the inflation target. An assessment of inflationary pressures is available in the Bank of England's quarterly inflation report. The Treasury publishes its own inflation forecast in the Budget and the pre-Budget report.

Public Transport: Rural Areas

Mr. Harper: To ask the Chancellor of the Exchequer what recent discussions he has had with the Secretary of State for Transport on spending on public transport in rural areas. [220311]

Yvette Cooper: Treasury Ministers and officials have discussions with their colleagues in other Departments and with a wide variety of organisations in the public and private sectors as part of the process of policy development and delivery.

Revenue and Customs: Leave

Mrs. Gillan: To ask the Chancellor of the Exchequer how many HM Revenue and Customs staff or call centre staff have been asked to postpone leave arrangements in the last six months; how many have agreed to do so; and what *(a)* financial and *(b)* other compensation has been offered to them. [219866]

Jane Kennedy: The information requested is not available.

Revenue and Customs: Salisbury

Robert Key: To ask the Chancellor of the Exchequer when in 2009 HM Revenue and Customs' lease on Alexandra House, Salisbury terminates; whether the office will be co-located with Jobcentre Plus officials at Summerlock House, Salisbury following the termination of the lease; and if he will make a statement. [219553]

Jane Kennedy: HMRC currently occupies Alexandra House, Salisbury under an agreement with HM Court Services who own the building but there is no lease arrangement. Court Services are seeking to sell the building and have recently given HMRC notice to leave by 29 May 2009. The sale of the building will not prejudice the outcome of a national review currently being carried out on the Department's property needs to match future business requirements. HMRC is seeking alternative accommodation in Salisbury to meet its future business requirements and is considering the suitability of a number of options, including the availability of Summerlock House. No decision about HMRC's future location in Salisbury has been taken yet.

Revenue and Customs: Vacancies

Mrs. Gillan: To ask the Chancellor of the Exchequer in which HM Revenue and Customs operational areas in Wales there are staff shortages, broken down by role. [219970]

Jane Kennedy: Work is in progress through HMRC's Workforce Change Programme to address staff distribution requirements aligned to business transformation.

There is an ongoing recruitment exercise for a number of HMRC contact centres including Cardiff. In Wales specifically HMRC currently have 15 vacancies and these breakdown into the following grades: 11 higher officers, four officers.

These vacancies are in a number of business areas and are being advertised to existing staff, with priority given to pre-surplus staff.

Smuggling: Wildlife

Mrs. Riordan: To ask the Chancellor of the Exchequer how many products made from endangered wildlife sources have been seized by HM Revenue and Customs in 2008 to date. [220039]

Jane Kennedy: HM Revenue and Customs made the following seizures of endangered species between 1 January 2008 and 31 March 2008:

	Number of seizures	*Number of items seized*	*Weight of items seized (kg)*
Live animals and birds	8	23	—
Parts and derivatives of endangered species	24	453	0.62
Ivory	6	75	—
Plants	1	55	—
Other species listed under the Convention on the International Trade in Endangered Species (including coral, caviar and ginseng)	19	685	8.42
Preparations of oriental medicines which include parts or derivatives of endangered species	14	5,748	57.11

CITES seizures are recorded by number of items seized or by weight, whichever is the most practical. Apart from the live specimens, all of the above categories may include products of endangered species.

The total number of seizures of endangered species items for the financial year 2007-08 can found at Annex F of HMRC's Departmental Report 2008 at:

www.hmrc.gov.uk

Stamp Duty Land Tax: Tax Allowances

John Battle: To ask the Chancellor of the Exchequer how many dwellings in *(a)* Leeds Metropolitan District and *(b)* Leeds West constituency have been subject to stamp duty tax relief on zero carbon homes. [220759]

Kitty Ussher: Since the stamp duty land tax relief for zero carbon homes was introduced in October 2007 nobody in the Leeds Metropolitan District or the Leeds West constituency has claimed the relief.

Taxation: Aviation

Sir Nicholas Winterton: To ask the Chancellor of the Exchequer what recent assessment he has made for benchmarking purposes of levels of taxes on passengers and flights in other European Union member states. [217988]

Angela Eagle: The Government are currently developing policy options following the announcement at pre-Budget report 2007 that air passenger duty would be replaced by a per plane duty in November 2009 and the formal consultation on this new tax, which considered all aspects of the operation of the duty, closed on 24 April. As part of this process, the Government will of course assess the level of taxes on passengers and flights in other European Union states.

Sir Nicholas Winterton: To ask the Chancellor of the Exchequer what recent assessment he has made for benchmarking purposes of aviation taxation systems in other European Union member states which generate revenue other than on an individual flight or passenger basis. [217989]

Angela Eagle: The Government are currently developing policy options following the announcement at pre-Budget report 2007 that air passenger duty would be replaced by a per plane duty in November 2009 and the formal consultation on this new tax, which considered all aspects of the operation of the duty closed on 24 April. As part of this process, the Government will of course assess systems of aviation taxation in other European Union states.

Sir Nicholas Winterton: To ask the Chancellor of the Exchequer what recent studies he has commissioned on the economic effects of aviation duty on the aviation industry. [217990]

Angela Eagle: The Government are currently developing policy options following the announcement at pre-Budget report 2007 that air passenger duty would be replaced by a per plane duty in November 2009 and the formal consultation on this new tax, which considered all aspects of the operation of the duty, closed on 24 April. As part of this process, the Treasury is working with the Department for Transport and with key industry stakeholders to assess the economic effects of the aviation duty on the aviation industry.

Sir Nicholas Winterton: To ask the Chancellor of the Exchequer what recent studies he has commissioned to evaluate the effect of UK aviation taxation on UK businesses competing with other businesses in Europe and globally. [217991]

Angela Eagle: The Government are currently developing policy options following the announcement at pre-Budget report 2007 that air passenger duty would be replaced by a per plane duty in November 2009 and the formal consultation on this new tax, which considered all aspects of the operation of the duty, closed on 24 April. As part of this process, the Government are working with key stakeholders to assess the likely effects of the aviation duty on the wider economy.

Taxation: Wales

Mrs. Gillan: To ask the Chancellor of the Exchequer how many compliance enquiries following the receipt of a P810 form were carried out in Wales in each of the last five years. [219968]

Jane Kennedy: The requested information is not available.

Mrs. Gillan: To ask the Chancellor of the Exchequer what estimate HM Revenue and Customs has made of the loss of revenue to the Exchequer arising from *(a)* unprocessed and *(b)* destroyed P810 forms in each of the last five years. [219969]

Jane Kennedy: The information requested is not available.

Mrs. Gillan: To ask the Chancellor of the Exchequer how many P810 forms have been received from people resident in Wales in each month of the last five years; on how many of these forms action has not been taken; how many such forms have been destroyed; and on what date the destroyed forms were *(a)* received and *(b)* destroyed. [219971]

Jane Kennedy: The requested information on the numbers of Welsh residents who have received or completed a form P810 is not available.

Once a form P810 (Tax Review Form) has been dealt it is retained for the tax year it was received plus two full tax years.

Valuation Office

Mr. Pickles: To ask the Chancellor of the Exchequer pursuant to the answer of 14 May 2008, *Official Report*, column 1629W, on the Valuation Office, how many households in England received a visit from a Valuation Office Agency official in the most recent *(a)* year and *(b)* other period for which figures are available. [218268]

Jane Kennedy: For the last year, I refer the hon. Member to the answer I gave him on 21 April 2008, *Official Report*, column 1688W. The approximate number of visits in other periods for which figures are available are 110,000 in 2005 and 125,000 in 2006.

Working Tax Credit

Jim Cousins: To ask the Chancellor of the Exchequer which HM Revenue and Customs enquiry centres are piloting the face to face interviews in working tax credit take-up. [219759]

Jane Kennedy: HMRC's Enquiry Centres at Belfast, Cosham (near Portsmouth), Liverpool, Middlesbrough and Newport (Gwent) participated in a pilot during May and June 2008 designed to encourage the take-up of working tax credit.

Working Tax Credit: Halifax

Mrs. Riordan: To ask the Chancellor of the Exchequer how many people in Halifax received working tax credit in 2007-08. [220148]

Jane Kennedy: HMRC do not produce these statistics separately for child tax credit and working tax credit.

Estimates of the number of families with tax credit awards in 2006-07 in each constituency, based on final family circumstances and incomes, are available in the HMRC publication "Child and Working Tax Credits Statistics. Finalised Annual Awards 2006-07. Geographical Analyses". This publication is available on the HMRC website at:

http://www.hmrc.gov.uk/stats/personal-tax-credits/cwtc-geog-stats.htm

The same information for 2007-08 is not yet available because awards have not yet been finalised.

Written Questions: Government Responses

Justine Greening: To ask the Chancellor of the Exchequer when he plans to answer Questions *(a)* 208270, *(b)* 208268, *(c)* 208271 and *(d)* 208269 on vehicle excise duty, tabled by the hon. Member for Putney on 30 May 2008. [220811]

Angela Eagle: I have replied to the hon. Member's questions today.

ENVIRONMENT, FOOD AND RURAL AFFAIRS

Aggregates Levy

Mr. Heald: To ask the Secretary of State for Environment, Food and Rural Affairs when he expects to reach conclusions following his Department's aggregates levy consultation; and whether he plans to publish the outcome of the consultation. [219342]

Jonathan Shaw: The outcome of the consultation on the Aggregates Levy Sustainability Fund was put on the consultations section of DEFRA's website on 10 July.

Agriculture: Foreigners

Mr. Drew: To ask the Secretary of State for Environment, Food and Rural Affairs what estimate he has made of the number of foreign workers participating in the seasonal farm workers scheme in each of the last three years; and what estimate he has made of the number in 2008. [216788]

Mr. Byrne: I have been asked to reply.

The annual quota for the number of foreign workers who were permitted to enter the United Kingdom under the auspices of the seasonal agricultural workers scheme in 2005, 2006 and 2007 was 16,250. The quota was met in each year. The quota for 2008 is also 16,250.

The figures quoted are not provided under National Statistics protocols and have been derived from local management information and are therefore provisional and subject to change.

Agriculture: Subsidies

Sir Michael Spicer: To ask the Secretary of State for Environment, Food and Rural Affairs when he expects to make the Single Farm Payment for 2007 to the constituent of the hon. Member for West Worcestershire, Mr. Robert Philipson-Stow of Pendock Estates. [218600]

Jonathan Shaw *[holding answer 14 July 2008]:* The Rural Payments Agency has made the single payment scheme payment for 2007 to Mr. Robert Philipson-Stow.

Animal Welfare: Research

Mr. Drew: To ask the Secretary of State for Environment, Food and Rural Affairs what discussions he has had with the Secretary of State for Innovation, Universities and Skills on the sharing of funding for animal health and welfare research between Departments; and if he will make a statement. [216558]

Jonathan Shaw: The Biotechnology and Biological Sciences Research Council (BBSRC) funds a wide range of animal health and welfare research projects. The Department of Innovation, Universities and Skills (DIUS) is the Government Department which funds the BBSRC.

I have not had specific discussions with the Secretary of State for Innovation, Universities and Skills on this issue. I consider that good working links exist between DEFRA and BBRSC, who keep each other informed about research funding plans and aim to have well co-ordinated research programmes. Regular interaction

takes place between DEFRA, the BBSRC and other UK research funders through various media such as the UK Animal Disease Research Funders' Forum, the Microbial Safety of Food Funders' Group and the UK TSE Research and Development Co-ordination Group. Joint activities such as scientific workshops and research calls have been organised by these groups.

DEFRA has observer status at meetings of the BBSRC Animal Sciences and AgriFood Committees. Both DEFRA and BBSRC are involved in the EU Standing Committee on Agricultural Research, the Collaborative Working Group on Animal Health and Welfare Research and the ERA-NET on emerging and major infectious diseases of livestock.

In addition to this close interaction, the BBSRC and DEFRA have jointly funded projects on viral disease of livestock. DEFRA also co-fund a number of projects identified from the BBSRC responsive mode grant applications under the Government Partnership Awards scheme.

Bees

Ben Chapman: To ask the Secretary of State for Environment, Food and Rural Affairs how much funding his Department provided to *(a)* the National Bee Unit and *(b)* the Bee Inspectorate in 2001-02. [218692]

Jonathan Shaw: Expenditure on the National Bee Unit, which includes the Bee Inspectorate, by DEFRA and the Welsh Assembly Government in 2001-02 was £1,583,000.

Sir Nicholas Winterton: To ask the Secretary of State for Environment, Food and Rural Affairs how much was spent by his Department on bee health research in each of the last 10 years. [218703]

Jonathan Shaw: I refer the hon. Gentleman to the answer I gave on 3 June 2008, *Official Report*, column 855W.

Sir Nicholas Winterton: To ask the Secretary of State for Environment, Food and Rural Affairs how much per annum is contributed to the agricultural economy by the honey bee sector. [218704]

Jonathan Shaw: I refer the hon. Gentleman to the answer I gave on 12 May 2008, *Official Report*, column 1324W.

Sir Nicholas Winterton: To ask the Secretary of State for Environment, Food and Rural Affairs what assessment he has made of recent trends in the honey bee population in England. [218708]

Jonathan Shaw: I refer the hon. Gentleman to the answer I gave on 12 May 2008, *Official Report*, column 1324W.

Bees: Disease Control

Sir Nicholas Winterton: To ask the Secretary of State for Environment, Food and Rural Affairs what recent assessment he has made of the threat of the Varroa mite to the honey bee population. [218705]

Jonathan Shaw: I refer the hon. Gentleman to the answer I gave on 20 May 2008, *Official Report*, columns 171-72W.

Sir Nicholas Winterton: To ask the Secretary of State for Environment, Food and Rural Affairs what recent studies he has commissioned on tackling the Varroa mite. [218706]

Jonathan Shaw: I refer the hon. Gentleman to the reply I gave on 12 May 2008, *Official Report*, column 1324W.

Sir Nicholas Winterton: To ask the Secretary of State for Environment, Food and Rural Affairs what recent assessment he has made of exotic threats to the honey bee population, with particular reference to the small hive beetle. [218707]

Jonathan Shaw: The possibility of the small hive beetle arriving in the UK is a recognised threat to the health of honey bees and the National Bee Unit remains vigilant for the arrival of this and other exotic pests and diseases. To promote early detection, publicity material has been distributed to help raise individual beekeepers' awareness of the risk. Plant health import inspectors and horticultural marketing inspectors have also been alerted, as one possible entry pathway is imported fruit. To help mitigate this threat, DEFRA has developed a contingency plan in consultation with stakeholders and is also pressing the European Commission to introduce tighter contingency arrangements to reduce the risk of spread should the small hive beetle be introduced into another member state. Additionally, DEFRA is funding research into a "lure and kill" monitoring system for rapid deployment should the small hive beetle be detected.

The relative priorities that should be given to the various pest and disease threats to bees are addressed in the draft bee health strategy that is currently out for public consultation.

Bovine Tuberculosis: Disease Control

Mr. Paice: To ask the Secretary of State for Environment, Food and Rural Affairs what research his Department has commissioned on the role of maize and trace element deficiency in the spread of M.bovis. [218918]

Jonathan Shaw *[holding answer 15 July 2008]:* While the role of maize in the spread of *Mycobacterium bovis (M. bovis)* has not been specifically investigated by any DEFRA funded research projects, the case-control studies carried out as part of the Randomised Badger Culling Trial (RBCT) did investigate associations between a number of feed types and risk of a herd TB breakdown. Studies TB99 and CCS2005, found an association between feeding silage and the use of grass feeding types for grazing/forage and an increase in risk of TB breakdown, respectively. The findings of these studies are in the final report of the Independent Scientific Group report on cattle TB. In addition TB99 also identified not using feeding supplements as a risk factor for confirmed cases of TB.

The association between *M. bovis* infection and trace elements such as selenium, copper and vitamin B12 status of cattle was investigated as part of the DEFRA

funded project "Pathogenesis and Diagnosis of Tuberculosis in Cattle—Complementary Field Studies" (project SE3013), carried out at the Veterinary Laboratories Agency (VLA). While little evidence was found for a difference by TB status in copper or B12, associations were found between low levels of selenium and a higher risk of an animal being infected with *M.bovis*. However, given the design of the study and the evidence that the action of some micro-nutrients can be substantially influenced by the levels of others it was not possible to conclude that the observed associations were causal. The full report can be downloaded from DEFRA's website.

I remain open minded about the possibility of a nutritional link but because of the number of variables involved and the likelihood a causal link could never be proven I am not inclined to fund further research into this subject.

Mr. Paice: To ask the Secretary of State for Environment, Food and Rural Affairs what assessment he has made of the effectiveness of the cattle testing regime in preventing cattle-to-cattle transmission of bovine tuberculosis; and what representations he has received on the frequency of the tests under the regime. [218919]

Jonathan Shaw *[holding answer 15 July 2008]:* The underlying principle of our bovine TB test and slaughter programme is to identify infected cattle as early as possible and minimise the risk of the transmission of the disease within and between cattle herds. Many countries where infection is maintained solely through spread between cattle have eradicated bovine TB through the systematic testing and reactor slaughter programme that we use today.

DEFRA has funded, and is currently funding, a number of research projects modelling the potential impacts of various cattle movement control scenarios on the spread of TB—final reports are published on the DEFRA website. We recognise the importance of monitoring the effectiveness of the TB control programme—and we will enhance controls in the light of emerging evidence. New policies introduced in recent years include: zero tolerance for overdue TB tests (i.e. herd movement restrictions applied immediately a test becomes overdue); mandatory pre-movement testing of cattle in high risk areas; and increased use of the gamma interferon blood test. These measures increase our ability to identify infected cattle, thereby reducing the risk of disease spread. We have also been working with stakeholders to raise awareness of simple biosecurity measures to further reduce transmission risks between animals.

Increasing the frequency of bovine TB testing in some areas was one of the additional measures recommended by the Independent Science Group (ISG). Initial cost benefit analysis of increasing the frequency of cattle testing suggests that they would come at a high cost with limited benefits—and so would be difficult to justify in terms of Government expenditure. Decisions about the value of such measures, and how they might be funded, are as much, if not more, a question for industry as for Government and will need to be discussed by the Bovine TB Partnership Group.

Our current approach to determining the minimum levels of routine testing for cattle herds is risk-based and consistent with the requirements of EU Council Directive 64/432/EEC. Parish Testing Intervals reflect the local level of bovine TB prevalence, and are reviewed each year to take account of any change in the disease situation. An increase in the levels of disease in an area triggers more frequent testing. Divisional Veterinary Managers (Animal Health) are already empowered to increase testing if local or individual herd circumstances indicate that such action is required.

Mr. Paice: To ask the Secretary of State for Environment, Food and Rural Affairs what estimates he has made of the number of cattle likely to be slaughtered under the bovine tuberculosis regime in the next three years. [218920]

Jonathan Shaw *[holding answer 15 July 2008]:* My Department has not attempted to estimate the numbers of cattle likely to be slaughtered under the bovine tuberculosis control regime in the next three years.

It is very difficult to make such forecasts due to the chronic, multifactorial and insidious nature of bovine TB. The number of cattle slaughtered as tuberculosis (TB) test reactors and direct contacts largely depends on (i) the underlying prevalence of the infection in the cattle (and badger) population and (ii) the intensity and accuracy of the TB screening programme for cattle herds. The former is subject to cyclical changes in the endemic TB areas that are difficult to predict, whereas the latter is subject to annual changes as TB herd testing frequencies are reviewed every year in response to the incidence of herd breakdowns in the previous years. Furthermore, the enhancements to the TB testing regime introduced over the last two years (such as pre-movement testing and gamma-interferon blood testing) are expected to result in higher numbers of reactors being identified each year, at least in the short to medium term.

Mr. Paice: To ask the Secretary of State for Environment, Food and Rural Affairs pursuant to the Statement of 7 July 2008, *Official Report*, columns 1157-8, on bovine TB, if he will publish the evidence which underlay his evaluation of the PCR test reported to the House on 7 July 2008. [219028]

Jonathan Shaw *[holding answer 15 July 2008]:* A number of diagnostic tests for the detection of *Mycobacterium bovis* (*M. bovis*) infection in badgers have been developed through DEFRA funded research projects at the Veterinary Laboratories Agency (VLA). The final reports of completed research projects have been published on the DEFRA website.

Bovine TB is currently confirmed by culture of *M. bovis* in the laboratory. However, *M. bovis* grows very slowly so culture results can take six weeks to several months to come through. DEFRA funded VLA project SE3008 (April 1999-December 2004), 'Detection and enumeration of *M. bovis* from clinical and environmental samples', aimed to develop PCR-based methods that may allow rapid screening of samples from infected cattle and monitoring of the environment and badger populations for the presence of *M. bovis*. This research showed that while the PCR test specific for *M. bovis* was found to be only 50 per cent. as sensitive as the gold standard of culture, the sensitivity of the *M. tuberculosis* complex PCR test (i.e. a less specific PCR able to detect mycobacteria that are members of the M. tb complex) was increased from 70 per cent., to 90 per cent., by the end of the project. While such low sensitivities for *M. bovis* detection rules out the use of this PCR test for use on environmental samples and excretions collected from

badgers, with further development and evaluation this test could be used in the laboratory to achieve faster confirmation and subsequent tracing of bTB infection in slaughterhouse cases.

Work funded by DEFRA to validate the PCR test developed by Warwick University to detect *M. bovis* in the environment is ongoing (Project SE3231: 'Validation and epidemiological application of molecular methods for monitoring *M. bovis* survival and dissemination into the environment'). This is a joint project between the VLA, Warwick University and University College, London and includes validation of the test using field samples. A full project description is available on the DEFRA website. A final report on the work will be published following its completion in April 2010.

If it is shown to be usable as a robust practical field test, consideration of its potential use in any bTB control policy will need to take account of the results of the Randomised Badger Culling Trial, which showed that localised culling was associated with an increase in cattle herd TB breakdowns due to the perturbation effect on badgers and increased transmission of bTB.

Mr. Paice: To ask the Secretary of State for Environment, Food and Rural Affairs if he will give a breakdown of his Department's expenditure on bovine tubergulosis expenditure in 2007-08 by main budget heading; what estimate he has made of such expenditure for the rest of the current comprehensive spending review period; and what assumptions underlay that estimate. [219029]

Jonathan Shaw *[holding answer 15 July 2008]:* GB expenditure on bovine tuberculosis (bTB) in 2007-08 was £79.8 million. However, we are unable to provide an accurate forecast of expenditure on bTB in the period of the 2008-11 comprehensive spending review as budgets have not yet been finalised.

The following table shows the breakdown expenditure on bovine TB in 2007-08;

Activity	*2007-08*
Cattle Testing	32.6
Compensation	29.7
RBCT	0.03
Surveillance activity by the VLA	7.9
Other Research[1]	8.5
HQ/Overheads	1.2
Totals	79.93

[1] Figure does not include research into culling methods or the badger population survey.

Notes:

1. Cattle testing—the cost of carrying out the testing of cattle for TB by arranging, assessing and monitoring tests, conducting investigations of incident herds and diagnostic testing by local veterinary inspectors on behalf of DEFRA. Note: These costs include Scotland and Wales (funded by DEFRA).
2. Compensation—includes payments for 'reactors' and 'contact animals' which are compulsorily slaughtered. This includes 'salvage' money received by the Government for those carcasses which are permitted to go into the food chain or are eligible for over 30 month scheme payments. Note: These costs include Scotland and Wales and are funded by their respective Governments.
3. Surveillance activity by the VLA—includes all DEFRA-funded work carried out by the Veterinary Laboratories Agency relating to TB in cattle and badgers including the supply of tuberculin.
5. HQ/overheads—includes staff costs for veterinary advice and administration of TB policy in England, Scotland and Wales.

Mr. Paice: To ask the Secretary of State for Environment, Food and Rural Affairs (1) under what budget heading expenditure on vaccination against bovine tuberculosis will be incurred over the next three years; [219030]

(2) what estimate he has made of the expenditure from the *(a)* bovine tuberculosis budget and *(b)* animal health budget required for the vaccination policy announced on 7 July 2008 which is additional to original allocations under those headings. [219031]

Jonathan Shaw *[holding answer 15 July 2008]:* Of the £20 million identified as funding for vaccine research by the Secretary of State, £10.4 million has already been contracted from the existing tuberculosis programme research budgets. The additional £9.6 million has not yet been contracted and will be funded from an expanded research budget.

Mr. Paice: To ask the Secretary of State for Environment, Food and Rural Affairs what cost-benefit analysis his Department has undertaken of pre-movement testing of cattle. [219032]

Jonathan Shaw *[holding answer 15 July 2008]:* The regulatory impact assessment (RIA) that supports pre-movement testing has been reviewed and updated in light of phase one experience. The reviewed RIA is available on the DEFRA website.

A review of pre-movement testing will be carried out following the period of peak cattle movements in autumn 2008. By then, a full year of normal trading data should be available to assess. This will allow an analysis of cattle movements in spring and autumn, which are the most challenging delivery periods, thereby providing sufficient data for a comprehensive review.

In the meantime, monitoring of the impacts of the policy is ongoing and statistics continue to be published on the DEFRA website.

Climate Change

Steve Webb: To ask the Secretary of State for Environment, Food and Rural Affairs pursuant to the statement in the Climate Change Bill Committee of 3 July 2008, *Official Report*, column 252, by the Minister for the Environment, the hon. Member for Oldham East and Saddleworth (Mr. Woolas) if he will place in the Library a copy of his letter to Lord Turner on the publication of interim findings by the independent Climate Change Committee. [219963]

Mr. Woolas: I am writing to the noble Lord Turner in the terms I set out in the Climate Change Bill Committee of 3 July 2008, *Official Report*, column 282 and will place a copy of this letter in the Libraries of the House.

Climate Change: Regional Planning and Development

Robert Neill: To ask the Secretary of State for Environment, Food and Rural Affairs with reference to his Department's press release of 19th May 2008, how much the Regional Climate Change Partnerships received from his Department in 2007-08; and how much they will receive in 2008-09. [219001]

Joan Ruddock: As part of the funding boost announced for regional climate adaptation on 19 May 2008, each Regional Climate Change Partnership in England will have the opportunity to bid for £450,000 funding (£50,000 per partnership) in 2008-09. Each partnership has been invited to submit a bid for the funds under five broad adaptation themes. We are currently in the process of assessing each bid with the Government offices before allocating the funding for 2008-09. As this is a new programme in this year, no funding was available during the 2007-08 financial year.

In addition to this programme, each partnership also receives support indirectly from DEFRA through DEFRA funded bodies such as the Environment Agency, regional development agencies and the UK Climate Impacts Programme.

Departmental Marketing

Mr. Philip Hammond: To ask the Secretary of State for Environment, Food and Rural Affairs how much his Department and its agencies spent on branding and marketing activity in 2007-08. [212033]

Jonathan Shaw: In financial year 2007-08, DEFRA spent £6.9 million on branding and marketing activity—including the cost of publication storage and fulfilment. The vast majority of this spend was promoting the cross-government Act on CO_2 campaign. The balance was spent on smaller campaigns including those alerting the public of the law relating to personal food imports, alerting businesses to new REACH regulations and communicating with farmers on a variety of issues, particularly animal disease control.

This information for DEFRA's agencies and NDPBs is not held centrally and could be gained only at disproportionate cost.

Departmental Pay

Mr. Redwood: To ask the Secretary of State for Environment, Food and Rural Affairs what proportion of staff of his Department and its agencies did not receive the maximum bonus possible under a bonus scheme applying to them in the last two years. [217418]

Jonathan Shaw: The following table shows details of the proportion of staff who did not receive the maximum bonus possible under a bonus scheme applying to them in the last two years. For DEFRA, the data relate to staff in core-DEFRA, Animal Health, Government Decontamination Service, Marine and Fisheries Agency, Pesticides Safety Directorate and Veterinary Medicines Directorate.

		Percentage
	2006-07	*2007-08*
DEFRA	87.8	84.7
RPA	84.8	86.1
VLA	87.7	86.8
CSL	77.8	76.9
CEFAS	84.5	83.9

Bonuses are used to reward excellent performance during the year and are based on a judgment of how well an individual has performed relative to their peers. Performance related pay schemes encourage high attainment because bonuses have to be earned each year. They help drive high performance in Departments and agencies and support better public service delivery.

Departmental Sick Leave

Mr. Hayes: To ask the Secretary of State for Environment, Food and Rural Affairs how many working days have been lost due to sickness among employees for which his Department and its predecessor were responsible for each year since 1997. [218038]

Jonathan Shaw: Information on sickness absence in the civil service is available at:

http://www.civilservice.gov.uk/about/statistics/sickness.asp.

Published data are available from the 2004 calendar year to the 2006-07 financial year. The number of working days lost due to sickness in DEFRA was as follows:

	Days
2004	56,000
2005	59,826
2006-07	48,026

Data on days lost to sickness before 2004 could be provided only at disproportionate cost.

Domestic Wastes: Fees and Charges

Mr. Pickles: To ask the Secretary of State for Environment, Food and Rural Affairs how many local authorities have installed *(a)* bin weighing technology and *(b)* RFID chips in household bins, according to records held by (i) his Department and (ii) the Waste and Resources Action Programme. [217847]

Joan Ruddock: Neither my Department nor the Waste and Resources Action Programme hold these data.

Mr. Pickles: To ask the Secretary of State for Environment, Food and Rural Affairs what assessment of the effectiveness of bin weighing technology was undertaken as part of his Department's evaluation of the household waste incentive pilot scheme. [217855]

Joan Ruddock: No separate assessment of bin weighing technology was undertaken as part of my Department's evaluation of the reward-only household incentive pilots (carried out in 2005-06).

Some of the authorities involved in the pilots used bin weighing technology. The report notes that in some areas difficulties were experienced with individual bin weighing technology and recommends that authorities wishing to utilise bin weighing systems ensure that they have been demonstrated to work effectively.

The report notes that using bin weighing technology was considered to be very effective in one of the pilot areas. Several bin weighing systems also operate successfully overseas. Some of these are referenced in a report produced on waste charging, which is publicly available on DEFRA's website at:

http://www.defra.gov.uk/environment/waste/strategy/incentives/pdf/wasteincentives-research-0507.pdf

The full report on the reward-only household incentive pilot is also publicly available on DEFRA's website at:

http://www.defra.gov.uk/environment/waste/localauth/encourage.htm.

Mr. Pickles: To ask the Secretary of State for Environment, Food and Rural Affairs if he will place in the Library copies of the household waste incentive pilot scheme reports for the pilots conducted in *(a)* Hammersmith and Fulham and Lambeth, *(b)* Leeds and *(c)* South Norfolk. [217857]

Joan Ruddock: The reports for all of the reward-only household incentive pilot schemes (carried out in 2005-06) are publicly available on DEFRA's website at:

http://www.defra.gov.uk/environment/waste/localauth/encourage.htm.

Domestic Wastes: Waste Disposal

Mr. Pickles: To ask the Secretary of State for Environment, Food and Rural Affairs what his Department's policy is on the use of commingled collections of household waste. [217845]

Joan Ruddock: Decisions on the best method for collecting waste and recyclables are a matter for local authorities, not DEFRA.

DEFRA policy is that local authorities should decide how to discharge their responsibilities for waste management and recycling in the light of their local circumstances and the evidence which is available on the strengths and weaknesses of different arrangements.

The Waste and Resources Action Programme (WRAP) has published evidence on the relative costs of different systems for collecting waste. WRAP's research concluded that, in current market conditions, kerbside sort systems were likely to show lower overall recycling costs for the local authority than co-mingled collections. However, it also recognised that for some local authorities, especially in highly urban areas, co-mingled collections may be more practical.

WRAP is also studying the management of recycling in Materials Recovery Facilities to see how the resulting material can be improved in quality so that it is suitable for use in high value applications.

Mr. Pickles: To ask the Secretary of State for Environment, Food and Rural Affairs what guidance *(a)* his Department and *(b)* the Waste and Resources Action Programme has provided to waste collection authorities on the use of separate individual bins for food, glass, paper, plastic and residual waste. [217848]

Joan Ruddock: The Government funded Waste and Resources Action Programme (WRAP) published a guidance document for local authorities, dealing with Alternate Weekly Collection of household waste, in July 2007. This guidance document includes a discussion of the issues that a local authority may wish to consider, including the type of collection system to be used for the material put out for recycling. However, the guidance document does not recommend any particular collection methods as being better than any other.

Electronic Equipment: Waste Disposal

2Mr. Peter Ainsworth: To ask the Secretary of State for Environment, Food and Rural Affairs what estimate his Department has made of the quantity of UK electronic waste exported outside the EU which has been *(a)* re-used, *(b)* recycled and *(c)* otherwise disposed of in each of the last three years. [217705]

Joan Ruddock: The export of working electronic equipment does not require the authorities to be notified. This may include used appliances or working components. If considered to be working, electronic equipment is not classified as waste and can be exported without notification.

In certain circumstances, the Environment Agency should be notified of movements of exports for recovery, depending on the waste type and destination.

Records held by the Environment Agency relate to the export of wastes that require consent under the notification process. This would include waste described as hazardous or where receiving countries have requested notification for certain materials. For wastes classified under the European waste catalogue entry 1602 as wastes from electrical and electronic equipment, the Environment Agency records show that no such wastes were notified for export to countries outside the EU over the last three years.

The Environment Agency also holds records of waste electrical and electronic equipment (WEEE) exports under the Accredited Exporter scheme. These are mostly waste streams from the processing of WEEE with a small amount of whole appliances. Data are only available from July 2007 onwards and do not differentiate between exports within Europe and outside Europe.

It is illegal to export waste for disposal which includes WEEE. The Environment Agency has no estimate of the amount of WEEE that is illegally exported for disposal.

Mr. Peter Ainsworth: To ask the Secretary of State for Environment, Food and Rural Affairs how many UK companies have been fined under the transfrontier shipment of waste regulations for illegally exporting electronic waste outside the EU for disposal. [217706]

Joan Ruddock: The Environment Agency is the regulatory authority for the transfrontier shipment of waste in England and Wales. They have confirmed that one company was fined in 2006-07 for the illegal export of waste electrical and electronic equipment and two companies were fined in 2007-08.

Fish

Mr. Peter Ainsworth: To ask the Secretary of State for Environment, Food and Rural Affairs how much fish was procured by his Department and at what cost in each of the last five years, broken down by species; and what amount and value of such fish met the Marine Stewardship Council standard in each such year, broken down by species. [217882]

Jonathan Shaw: The information necessary to answer this question fully for each of the last five years is not available except at disproportionate cost. We are limited to providing the following estimates of the main species of fish supplied and the overall cost for each of the years 2005 to 2007 and the first six months of 2008.

	2005	2006	2007	Percentage [1]2008
Haddock	45	44	35	30
Tuna	20	20	18	20
Salmon	25	25	22	20
Trout	10	10	8	5
Sea Bass	0	0	3	3
Sea Bream	0	0	3	4
Hake	0	0	2	4
Hoki	0	1	5	9
Pollock	0	0	4	5
Total cost (£)	12,850	14,900	15,600	8,100

[1] Six months

More data on public sector food procurement are published on the PSFPI website at:

http://www.defra.gov.uk/farm/policy/sustain/procurement/pdf/govt-afood-usage.pdf.

Fly Tipping

Mr. Pickles: To ask the Secretary of State for Environment, Food and Rural Affairs how many fly-tipping incidents were reported in England in 2007-08 according to the Flycapture database; what estimate he has made of the clearance costs of such incidents; and what proportion of such incidents involved the fly-tipping of household waste. [217854]

Joan Ruddock: Data for the period 2007-08 are not yet available. Local authorities were asked to submit complete annual data by the end of June 2008. We are currently quality checking the data submitted. Full data for 2007-08 will be published as soon as possible.

Food

Mr. Paice: To ask the Secretary of State for Environment, Food and Rural Affairs (1) how much was spent by his Department on *(a)* food and *(b)* food of British origin in each of the last five years; [214883]

(2) from which five countries of origin the greatest amount of food was procured by his Department in the last year for which figures are available; and what the *(a)* cost and *(b)* quantity procured was in each case. [214884]

Jonathan Shaw: The information requested could be provided only at disproportionate cost, but from information held centrally, it is estimated that the proportion of food supplied to DEFRA from UK sources since 2005 is as follows:

	Percentage	Value (£)
2005	65	629,244
2006	74	643,208
2007	85	606,606
2008[1]	85	250,130

[1] Six months.

I refer the hon. Member to the report published on the Public Sector Food Procurement Initiative website at:

http://www.defra.gov.uk/farm/policy/sustain/procurement/pdf/gov-food-usage.pdf

DEFRA again proposes to publish data by the end of 2008 on the proportion of domestically produced food purchased by Departments.

Mr. Drew: To ask the Secretary of State for Environment, Food and Rural Affairs what plans he has to develop a comprehensive food policy; and if he will include in the policy measures to reduce *(a)* food waste and *(b)* food miles. [219035]

Jonathan Shaw *[holding answer 15 July 2008]:* As set out in the Cabinet Office's recent report on food "Food Matters", DEFRA, working with the Department of Health and the Food Standards Agency will launch a process of engagement with stakeholders across the food chain to develop a vision for a sustainable food system. The vision will define the Government's priorities and purpose across the food system and will consider issues such as food waste and sourcing alongside issues of nutrition and the environmental impacts of food consumption and production.

The Cabinet Office's report also sets out how DEFRA will work with the Waste and Resources Action Programme (WRAP) and the food industry to reduce food waste both in the food supply chain and in the home.

Green Belt

Robert Neill: To ask the Secretary of State for Environment, Food and Rural Affairs what recent representations Natural England has made to his Department on Green Belt (i) designation and (ii) protection. [219070]

Jonathan Shaw: Natural England has made no recent representations to DEFRA relating to green belt designation or protection. Natural England's policy on housing growth ("Housing Growth and Green Infrastructure, June 2008") sets out its views on green belt.

Housing: Low Incomes

Sir Nicholas Winterton: To ask the Secretary of State for Environment, Food and Rural Affairs what recent discussions he has had with the Secretary of State at the Department for Communities and Local Government on *(a)* increasing the availability of affordable housing in the Peak District National Park Authority area and *(b)* future funding for the provision of rural housing enablers; and if he will make a statement. [216567]

Jonathan Shaw: I refer the hon. Member for Macclesfield to the answer given in response to the same question that he asked the Secretary of State for Communities and Local Government on 10 July 2008, *Official Report*, columns 1742-43W.

Insulation: Pollution

David Taylor: To ask the Secretary of State for Environment, Food and Rural Affairs what estimate his Department has made of the rate of natural leakage of ozone-depleting substances from plastic foam insulation. [219467]

Mr. Woolas: The estimated emission rates from foam insulation in buildings and appliances have been documented by the Technology and Economic Assessment Panel of the Montreal protocol on substances that deplete the ozone layer.

Although the annual emission rates vary by product type, they are typically very low. This is particularly the case from insulation foams and is because of their closed cell structure. This understanding has been substantiated by measurements made on aged refrigerators containing chlorofluorocarbons.

Joint Waste Authorities

Mr. Pickles: To ask the Secretary of State for Environment, Food and Rural Affairs under what circumstances a local authority which joins a Joint Waste Authority (JWA) will be permitted to leave the JWA unilaterally. [217813]

Joan Ruddock: Joint waste authorities (JWAs) will be statutory bodies, established by Order. A local authority will not be able to leave a JWA unilaterally. JWAs can only be dissolved where all the constituent authorities agree to do so or where the Secretary of State considers it is necessary to do so. This will give them a structural stability that should appeal to the waste management industry and to potential investors.

Metals: Exports

Mr. Drew: To ask the Secretary of State for Environment, Food and Rural Affairs if he will take steps to reduce the amount of scrap metal exported from the UK; what discussions he has had with colleagues from the Department for Business, Enterprise and Regulatory Reform on this matter; and if he will meet representatives of industry to discuss the issue. [218169]

Joan Ruddock: Scrap metals are a valuable globally traded commodity and are exported to countries where there is demand. Many of the products we use are manufactured in Asia and it is environmentally beneficial to export our recyclables to markets where they will replace use of virgin material. Exports of waste from the UK must be in compliance with the requirements of the EC Waste Shipments Regulation which helps to ensure that strict environmental criteria are met and that exported metals are reprocessed in conditions that are considered broadly equivalent to those in force in the EU.

I am in regular contact with both colleagues from the Department of Business, Enterprise and Regulatory Reform and representatives from across industry on matters relating to the metals sector.

Microgeneration: Noise

Robert Key: To ask the Secretary of State for Environment, Food and Rural Affairs for what reason the permitted noise level from domestic microgeneration equipment has been set at a level five decibels higher than that proposed in the consultation document. [219510]

Mr. Iain Wright: I have been asked to reply.

My written statement of 13 March 2008, *Official Report*, columns 20-21WS, announced that secondary legislation had been laid before the House that would remove the need to apply for planning permission to install certain types of householder microgeneration. These permitted development rights now apply to solar, ground and water source heat pump, combined heat and power and biomass technologies.

The statement explained that good progress was being made in trying to resolve the issue of noise that prevented permitted development rights being extended to wind turbines and air source heat pumps at that time. It also indicated that a restriction would be imposed to ensure that habitable rooms of any neighbouring residential property are not exposed to an outside noise level exceeding 45 decibels. This figure seeks to balance the Government's desire to encourage the take-up of microgeneration with the need to consider the potential impact on others. We have not yet concluded work on this issue and therefore permitted development rights do not currently apply to these technologies.

Nappies: Waste Disposal

Robert Neill: To ask the Secretary of State for Environment, Food and Rural Affairs if he will place in the Library a copy of the Environment Agency's research report, WR0705-Updated Lifecycle Study on Reusable and Disposable Nappies. [218882]

Joan Ruddock: The Lifecycle study on re-useable and disposable nappies is due to be published in August. We will launch the publication and arrange for a copy to be placed in the Library of the House.

Noise

Robert Key: To ask the Secretary of State for Environment, Food and Rural Affairs when he expects to publish a noise strategy for England. [219509]

Jonathan Shaw: I refer the hon. Member to the answer given to the hon. Member for Basingstoke (Mrs. Miller) on 1 July 2008, *Official Report*, columns 777-78W.

Noise: Pollution

Dr. Julian Lewis: To ask the Secretary of State for Environment, Food and Rural Affairs (1) what remedies are available to people disturbed by persistent amplified noise in public places made *(a)* in the cause of political protest and *(b)* for other reasons; and if he will make a statement; [219034]

(2) what his policy is on the prevention of disturbance to others by people persistently making amplified noise in public places without the permission of the relevant local authorities; and if he will make a statement. [219033]

Jonathan Shaw *[holding answer 15 July 2008]:* Section 79 of the Environmental Protection Act 1990, as amended by the Noise and Statutory Nuisance Act 1993, provides that noise, other than traffic noise, emitted from vehicles, machinery or equipment in a street can be a statutory nuisance, if it does, has or is likely to interfere with the quiet enjoyment of a person's land or is prejudicial to

their health. Local authorities have a duty to investigate complaints about statutory nuisances, and may serve abatement notices. Failure to comply with an abatement notice can be a criminal offence.

These provisions do not however apply to political demonstrations or a demonstration supporting or opposing a cause or campaign.

Section 62 of the Control of Pollution Act 1974 bans the use of a loud speaker in a street at night (i.e. between 9 pm and 8 am), and restricts the use of loudspeakers for advertising at any time subject to limited exemptions.

Section 137 of the Serious Organised Crime and Police Act 2005 bans the use of loudspeakers in the area around Parliament at any time and for any purpose (subject to a number of exceptions—including where consent of local authority has been granted). The Government have however announced their intention to repeal these provisions.

There are in addition byelaws which govern the use of amplification equipment in certain areas such as Trafalgar Square and Parliament Square Garden. There may be similar local byelaws in other parts of the country.

Pandas

Mr. Amess: To ask the Secretary of State for Environment, Food and Rural Affairs how many giant pandas have been presented by the Government of China to the UK Government since 1979; and if he will make a statement. [218257]

Joan Ruddock: Animal health records show there has been one giant panda entering the UK from China since 1979. Ming Ming arrived in 1991 on a breeding loan to London Zoo and was subsequently returned in 1994.

Mr. Amess: To ask the Secretary of State for Environment, Food and Rural Affairs what steps he has taken to encourage the breeding of giant pandas in English zoos; and if he will make a statement. [218258]

Joan Ruddock: The Government have neither encouraged nor discouraged the breeding of giant pandas in English zoos. Keeping giant pandas is a matter for individual zoos, and would be subject to strict legislative previsions including the Zoo Licensing Act 1981 (as amended), the Animal Welfare Act 2006 and the EU Wildlife Trade Regulations (governing the import and export of endangered species). We are not aware that there are any giant pandas in English zoos at present.

Mr. Amess: To ask the Secretary of State for Environment, Food and Rural Affairs what recent discussions he has had with the Government of China on its export of giant pandas; and if he will make a statement. [218259]

Joan Ruddock: There have been no recent discussions between my right hon. Friend the Secretary of State for Environment and China over the export of giant pandas. The UK Government are committed to working with other countries to promote the conservation of the world's wildlife, such as the giant panda, through our membership of agreements such as the Convention on International Trade in Endangered Species (CITES). Any export of pandas from China would need to comply with CITES' provisions.

Pigs: Animal Welfare

Mark Pritchard: To ask the Secretary of State for Environment, Food and Rural Affairs if he will meet representatives of the British pig industry to discuss the animal welfare standards adhered to by pig breeders. [217556]

Jonathan Shaw: When the rules regarding pig welfare requirements were last revised in 2003, DEFRA conducted a full public consultation and officials met with pig industry representatives.

If representatives of the British pig industry would like to write to me outlining their concerns on this important issue, I will be happy to respond and equally to consider any request for a meeting.

Ports: Security

Dan Rogerson: To ask the Secretary of State for Environment, Food and Rural Affairs what recent meetings he has had with officials and Ministers from the French Government on blockades at ports and port security. [218085]

Jonathan Shaw: I have not held direct talks with either French officials or Ministers on recent blockades. However, the UK Government have been in close contact with national and local authorities in Spain and France, and affected UK nationals. Working through our embassy in Paris, we have expressed strong concerns to the French authorities about the difficulties caused to the UK, in particular the fishing industry, by this action. In addition the European Commission has been formally notified of the disruption under the free movement of goods regulation. I also raised this as an important issue at last month's Fisheries Council, and called on support from all member states to ensure that the trade of fish and fisheries products can continue without hindrance.

I have also been in close contact with my colleagues in the devolved Administrations to ensure that the concerns of the whole UK fishing industry are understood and raised with the French Government.

Recycling

Robert Neill: To ask the Secretary of State for Environment, Food and Rural Affairs what the average rejection rate of recycled materials at material recycling facilities was in the latest period for which figures are available; and how many tonnes of material sent for recycling were disposed of in a non-recycled manner in the latest year for which figures are available. [218900]

Joan Ruddock: Based on local authority responses to WasteDataFlow during 2006-07, the average reject rate reported by local authorities in England for collected municipal recyclate waste being sent to a material recycling facility was 7 per cent. With regard to material sent for recycling, but disposed of in a non-recycled manner, tonnages are not available as local authorities only have

a duty to report recycling rejects up to the gate of the reprocessor, at which point it is deemed to be sent for recycling.

River Thames: Transport

Mr. Amess: To ask the Secretary of State for Environment, Food and Rural Affairs under what legislation *(a)* passenger and *(b)* freight traffic on the River Thames is regulated; what (i) statutory instruments, (ii) departmental circulars and (iii) other documents he (A) has issued and (B) plans to issue in the next 12 months consequential to the provisions of such legislation; and if he will make a statement. [217907]

Jonathan Shaw: The Environment Agency is the navigation authority for the non-tidal River Thames and carries out its duties (including regulating all types of river traffic) under the Thames Conservancy Acts 1932, 1950, 1959, 1966 and 1972 and the byelaws made under them.

The operation of passenger and other commercial river traffic within the United Kingdom is more specifically regulated by the Maritime and Coastguard Agency (an Executive Agency of the Department for Transport) under shipping legislation, statutory instruments and other associated regulations.

Royal Agricultural Society

Mr. Drew: To ask the Secretary of State for Environment, Food and Rural Affairs what discussions he has had with the Royal Agricultural Society of England on *(a)* its future and *(b)* the future of the Royal Show. [214322]

Jonathan Shaw: My right hon. Friend the Secretary of State has met with the Royal Agricultural Society of England to discuss the Society's role in promoting best practice, science and innovation in the farming industry; to see how links in these areas can be strengthened and to explore where the Society and DEFRA could work more closely together. We believe that the Royal Show continues to play an important role in the agricultural calendar. DEFRA Ministers will continue to take the valuable opportunity to engage with industry stakeholders and the public at the show.

Rural Areas: Planning

Mr. Drew: To ask the Secretary of State for Environment, Food and Rural Affairs if he will discuss with colleagues in the Department for Communities and Local Government means of altering planning contracts in rural areas to encourage job promotion, and in particular the development of rural business centres. [218168]

Jonathan Shaw: The Prime Minister has asked the hon. Member for Truro and St. Austell (Matthew Taylor) to conduct a review on how land use and planning can better support rural business and deliver affordable housing. I continue to have regular discussions with the Minister for Housing on these topics and look forward to receiving the recommendations of the review.

Waste Disposal

Robert Neill: To ask the Secretary of State for Environment, Food and Rural Affairs if he will place in the Library a list of the sources for fly-tipping and waste placed out which informed the most recent annual Local Environment Quality Survey of England. [219072]

Joan Ruddock: The 2006-07 Local Environment Quality Survey of England Report can be found on the ENCAMS website. The report does not have information on the proportional sources of fly-tipping and waste placed out. There is general background on the sources of solid waste encountered during the survey which are defined as: General Litter, Domestic Refuse, Commercial Wastes, Animal and Other Faeces, Clinical Wastes, Putrescible Materials, Other Wastes Occurring as Litter.

Robert Neill: To ask the Secretary of State for Environment, Food and Rural Affairs if he will place in the Library a copy of the research commissioned by his Department and the Environment Agency from ENCAMS on fly-tipping and waste. [219073]

Joan Ruddock: I am arranging for the research document requested to be placed in the Library of the House.

Robert Neill: To ask the Secretary of State for Environment, Food and Rural Affairs if he will place in the Library a copy of the Low Participation Areas—Effective Communications Planning guidance published by the Waste and Resources Action Programme. [219075]

Joan Ruddock: The guidance referred to is an online tool, rather than a physical document, and cannot therefore be deposited in the Library of the House. However, it is freely available to use on the website of the Waste and Resources Action Programme.

Robert Neill: To ask the Secretary of State for Environment, Food and Rural Affairs how many civic amenity sites each waste authority in England provides. [219078]

Joan Ruddock: The table provides the numbers of household civic amenity sites the Environment Agency has permitted in England by local authority area.

The caveat is that these figures do not include those civic amenity sites which are incorporated into other types of sites such as waste transfer sites/material recycling facilities operated by local authorities or their contractors. It is not possible to separate these data.

Waste Disposal: Fees and Charges

Mr. Pickles: To ask the Secretary of State for Environment, Food and Rural Affairs (1) what guidance *(a)* his Department and *(b)* the Waste and Resources Action Programme has provided to waste collection authorities on the use of fixed penalty fines against households who put their rubbish out for collection the evening before the day of collection; [217795]

(2) what advice *(a)* his Department and *(b)* the Waste and Resources Action Programme has provided to waste collection authorities on fining households who put the wrong items into their recycling boxes; and under what statutory provisions waste collection authorities issue fixed penalty notices for such activities; [217808]

(3) what guidance *(a)* his Department and *(b)* the Waste and Resources Action Programme has provided to waste collection authorities on using private companies to issue waste penalty notices. [217846]

Joan Ruddock: Under section 46 of the Environmental Protection Act 1990 (EPA), local authorities can issue residents with a notice specifying requirements as to the collection of household waste receptacles. These requirements may include the specifics of how and when to present the receptacles for collection, or the articles which must be placed in the receptacles. It is an offence for somebody to fail to comply with these requirements.

Section 47ZA of the EPA allows local authorities to issue fixed penalty notices for offences under section 46. These fixed penalty notices can be issued by the following people:

(a) an employee of the authority who is authorised in writing by the authority for the purposes of giving notices;

(b) any person who, in pursuance of arrangements made with the authority, has the function of giving such notices and is authorised in writing by the authority to perform that function; and

(c) any employee of such a person who is authorised in writing by the authority for the purposes of giving such notices.

DEFRA's guidance on fixed penalty notices explains that where local authorities authorise contractors to carry out enforcement activities, they should ensure that background checks are carried out to determine their suitability and capability. It is important that contractors receive adequate training and have a full understanding of any locally set procedures or policies before they begin to issue fixed penalties. The published guidance can be found on the DEFRA website.

The Flycapture Enforcement Course also includes a module on the issuing of fixed penalty notices for waste offences.

The Waste and Resources Action Programme has not issued any guidance in this regard.

Mr. Pickles: To ask the Secretary of State for Environment, Food and Rural Affairs what powers waste collection authorities have to charge *(a)* domestic households and *(b)* waste producers classified by schedule 2 of the controlled Waste Regulations 1992 for recycling collections. [217800]

Joan Ruddock: A waste collection authority is entitled to charge for the collection of waste from all schedule 2 sources. Whether or not the authority recycles the material collected is a matter for the authority.

Mr. Pickles: To ask the Secretary of State for Environment, Food and Rural Affairs what penalties may be imposed on householders for non-payment of charges for the delivery of waste receptacles. [217810]

Joan Ruddock: Section 46(1) allows the waste collection authority to specify the type and number of receptacles to be used for waste collection.

When making a requirement under section 46(1), section 46(3) allows the authority to either:

(a) determine that receptacles be provided by the authority free of charge;

(b) propose that receptacles be provided by the authority on payment, either singly or periodically, by the occupier, provided the occupier agrees;

(c) require the occupier to provide them if he does not enter into an agreement under paragraph (b); or

(d) require the occupier to provide them.

There are no penalties an authority can impose for non-payment of charges for the delivery of waste receptacles. However, non-payment can be pursued as a civil debt.

Mr. Pickles: To ask the Secretary of State for Environment, Food and Rural Affairs whether householders resident in areas serviced by a waste collection authority which charges for the provision of waste receptacles are permitted to provide their own waste receptacles. [217811]

Joan Ruddock: Section 46(1) allows the waste collection authority to specify the type and number of receptacles to be used for waste collection.

When making a requirement under section 46(1), section 46(3) allows the authority to either:

(a) determine that receptacles be provided by the authority free of charge;

(b) propose that receptacles be provided by the authority on payment, either singly or periodically, by the occupier, provided the occupier agrees;

(c) require the occupier to provide them if he does not enter into an agreement under paragraph (b); or

(d) require the occupier to provide them.

Mr. Pickles: To ask the Secretary of State for Environment, Food and Rural Affairs how many local authorities have expressed an interest in levying charges for the collection of household waste; and how many such expressions were made by *(a)* elected councillors and *(b)* council staff. [217812]

Joan Ruddock: No authorities have yet come forward to formally express an interest in participating in a pilot waste incentive scheme. I wrote to local authorities on 20 June inviting them to come forward, with a deadline for submitting final proposals to run pilots of eight weeks after Royal Assent to the Climate Change Bill. I noted in that letter that we will release the names of any authorities which come forward with formal expressions of interest at that time.

Mr. Pickles: To ask the Secretary of State for Environment, Food and Rural Affairs what the maximum penalty is that may be levied against a household for non-payment of charges for the collection of household rubbish. [217814]

Joan Ruddock: A waste collection authority may only charge for collection of those materials that are covered by schedule 2 of the controlled waste regulations (CWR). It is up to the authority to decide whether it recovers the

charge before, during or after it provides the service. An authority would be free to use the usual methods it employs for debt recovery in those cases where a householder had refused to pay. There is no provision in the Environmental Protection Act 1990 to penalise households that refuse to pay for waste collected under schedule 2 of the CWR.

Mr. Pickles: To ask the Secretary of State for Environment, Food and Rural Affairs when he expects the pilots for the new charges for the collection of household rubbish to begin. [217816]

Joan Ruddock: As I explained to the CLG Select Committee in December during its evidence session on local government finance (waste), and subsequently, we would not anticipate pilot waste incentive schemes beginning before April 2009.

It will be for local authorities wishing to run pilots to come forward with proposals for when schemes could begin in their areas. I wrote to local authorities on 20 June inviting them to come forward, with a deadline for submitting final proposals to run pilots of eight weeks after Royal Assent to the Climate Change Bill.

Mr. Pickles: To ask the Secretary of State for Environment, Food and Rural Affairs what estimate he has made of the gross costs to *(a)* his Department and *(b)* participating local authorities of the pilots for the new charges for the collection of household rubbish. [217817]

Joan Ruddock: As explained in my written statement to Parliament on 15 November 2007, and subsequently, the Department has up to £1.5 million per year for the next three years to help support pilot waste incentive schemes.

The impact assessment of powers to pilot incentives, also published on DEFRA's website on 15 November 2007, estimates costs and savings for local authorities piloting a waste incentive scheme. One-off start-up costs for a 50,000 household scheme are estimated at £100,000 to £200,000, annual running costs at £200,000 to £500,000. Savings accruing to local authorities for a 50,000 household scheme (from having less waste to collect, treat and dispose of) are estimated at £290,000 to £1.4 million per annum.

Robert Neill: To ask the Secretary of State for Environment, Food and Rural Affairs how long the pilot schemes for the new charges for the collection of household rubbish are expected to last. [219022]

Joan Ruddock: It will be for local authorities wishing to run a pilot waste incentive scheme to propose how long the scheme should run for in their, area. However, pilot schemes will need to run for long enough to provide high quality, robust evidence for the report back to Parliament.

Robert Neill: To ask the Secretary of State for Environment, Food and Rural Affairs how much his Department has spent to date on *(a)* planning, *(b)* piloting, *(c)* consultancy, *(d)* publicity and *(e)* research into (i) variable charging for the collection of household waste and (ii) proposed charging schemes for the collection of household waste. [219077]

Joan Ruddock: My Department funded a research project carried out by Eunomia Research and Consulting, entitled "Modelling the Impact of Household Charging for Waste in England", at a cost of £41,614.83. This report was published on DEFRA's website in May 2007.

My Department also purchased data on the distributional impacts of waste charging in Flanders, at a cost of £2,166.40. These were used to inform the Impact Assessment of powers to pilot local authority incentives for household waste minimisation and recycling. The Impact Assessment was published on 15 November 2007 and is also available from DEFRA's website.

My Department employs 0.5 full-time equivalent (FTE) Grade 7, 1 FTE HEO(D) and 0.75 FTE AO to work on the Government's proposals for waste incentive pilot schemes.

Water: Fees and Charges

Nick Harvey: To ask the Secretary of State for Environment, Food and Rural Affairs when the independent review of water charges and tariffs announced in the Future Water Strategy will commence; who will lead the review; what the review's terms of reference will be; and when the review is planned to report. [220165]

Mr. Woolas: We will be making an announcement about the review shortly.

Written Questions: Government Responses

Mr. Willetts: To ask the Secretary of State for Environment, Food and Rural Affairs when he plans to reply to question 206802, tabled by the hon. Member for Havant on 25 May 2008, on apprenticeships in his Department. [216604]

Jonathan Shaw: I replied to the hon. Member on 9 July 2008, *Official Report*, column 1585W.

PRIME MINISTER

Departmental Sick Pay

Mr. Hoban: To ask the Prime Minister how much sick pay to staff in his office cost in the last five years for which figures are available. [212007]

The Prime Minister: I refer the hon. Member to the answer given by the Parliamentary Secretary for the Cabinet Office my hon. Friend the Member for West Bromwich, East, (Mr. Watson) on 8 July 2008, *Official Report*, column 1571W.

Intelligence Services

Mr. Baron: To ask the Prime Minister what reports he has made to the Cabinet Secretary to ensure that any intelligence material put in the public domain should be properly verified and validated; when he made the request; and if he will place a record of the request in the public domain. [220512]

The Prime Minister: I refer the hon. Member to the conclusions within the 'Review of Intelligence on Weapons of Mass Destruction' (HC 898), the oral statement

made by my predecessor (Mr. Blair) on 14 July 2004, *Official Report*, column 1431, and the Government's response the 'Review of Intelligence on Weapons of Mass Destruction: Implementation of its Conclusions' (Cm 6492).

COMMUNITIES AND LOCAL GOVERNMENT

Arm's Length Management Organisation

Lembit Öpik: To ask the Secretary of State for Communities and Local Government how many *(a)* arm's length management organisations (ALMOs) there are; and how many houses each ALMO manages. [219870]

Mr. Iain Wright: There are 70 arm's length management organisations (ALMOs). The following table lists the ALMOs and the dwellings they manage.

Local authorities with ALMOs	*Dwellings managed by ALMOs*[1]
Ashfield	7,100
Barnet	11,100
Barnsley	19,800
Basildon	11,500
Bassetlaw	7,000
Blackpool	5,400
Blyth Valley	6,800
Bolton	18,400
Brent	9,600
Bury	8,400
Carrick	3,700
Charnwood	5,900
Cheltenham	4,700
Colchester	6,300
Derby	13,800
Doncaster	21,200
Ealing	13,800
Easington	8,800
Eastbourne	3,800
Enfield	11,900
Gateshead	21,800
Gloucester	4,500
Hackney[2]	23,000
Hammersmith	13,200
Haringey	16,600
Havering	11,000
High Peak	4,100
Hillingdon	10,700
Hounslow	13,600
Islington[2]	21,500
Kensington	6,900
Kirklees	23,700
Lambeth[2, 3]	24,500
Leeds[3]	58,600
Lewisham[2]	14,300
Manchester[2]	12,500
N. E. Derbyshire	8,300
Newark	5,500
Newcastle upon Tyne	30,500
Newham	17,600
Nottingham	29,600
Oldham	12,800
Poole	4,600
Redbridge	4,700
Rochdale	14,200
Rotherham	21,300
Sandwell	29,600
Salford[2, 3]	10,500
Sedgemoor	4,100
Sheffield	44,800
Slough	6,600
Solihull	11,000
South Lakeland	3,200
South Tyneside	18,600
Southend-on-Sea	6,200
Stevenage	8,300
Stockport	11,600
Stockton	11,000
Sutton	7,300
Tower Hamlets	13,800
Waltham Forest	10,600
Warrington	8,900
Wear Valley	4,400
Westminster	12,300
Wigan	23,100
Wolverhampton	24,000

[1] These dwelling numbers are rounded figures based on stock numbers reported by local authorities for HRA subsidy purposes on the 1 April 2007.
[2] These figures were recently supplied by the local authority.
[3] These authorities have more than one ALMO in their area.

Mr. Betts: To ask the Secretary of State for Communities and Local Government what regard a local authority must have to views of tenants before termination of an arm's length management organisation; and what duty there is on an authority to consult with tenants before termination. [219786]

Mr. Iain Wright: Should a local authority consider winding up its arm's length management organisation (ALMO), it should take account of the views of all stakeholders, but most importantly the tenants whose homes are managed by the ALMO. Departmental guidance states that a local authority should consult its tenants on any significant changes to its housing management arrangements. That consultation should be no less rigorous than that undertaken to establish support for the establishment of the ALMO.

Mr. Betts: To ask the Secretary of State for Communities and Local Government what guidance she issues to local authorities on the termination of arm's length management organisations, with particular reference to the demonstration of the benefits of termination to tenants. [219787]

Mr. Iain Wright: The Department updated the general guidance issued to local authorities on ALMOs within the Review of Arms Length Housing Management Organisations June 2006. This included guidance on consulting tenants should there be significant changes proposed to a local authority's housing management arrangements.

The document does not refer specifically to the demonstration to tenants of the benefits of winding up an ALMO. However, the Department believes that existing

ALMO arrangements should remain in place unless an alternative can be shown to have demonstrable benefits for tenants.

Mr. Betts: To ask the Secretary of State for Communities and Local Government whether Decent Homes funding allocated to an arm's length management organisation is automatically switched to an alternative housing manager in the event of its termination. [219790]

Mr. Iain Wright: Funding allocated to an arm's length management organisation (ALMO) would not be switched to an alternative housing manager in the event of an ALMO being wound up. The funding is contingent on the ALMO delivering a Decent Homes investment programme on behalf of its local authority.

Batteries: Recycling

Sarah Teather: To ask the Secretary of State for Communities and Local Government which local authorities offer recycling facilities for *(a)* batteries, *(b)* light bulbs and *(c)* energy-saving light bulbs. [219581]

Joan Ruddock: I have been asked to reply.

The Department does not gather statistics on which local authorities collect specific products for recycling. All local authorities in England are providing collection facilities for waste electrical and electronic equipment which includes the most common type of energy saving light bulbs. We are preparing regulations to implement the EU batteries directive which requires greatly increased collection of portable batteries—we are in discussion with local authorities about the part they can play in achieving our targets. Information on the recycling facilities that are available in particular areas can be found on the Recycle Now and Recycle More websites.

Carbon Emissions: Buildings

Andrew Stunell: To ask the Secretary of State for Communities and Local Government (1) what estimate she has made of the average building carbon dioxide emission per square metre of floor area in each year since 2004; [219672]

(2) what estimate she has made of the average building carbon dioxide emission per square metre of floor area for *(a)* schools, *(b)* other public sector buildings, *(c)* commercial and industrial buildings and *(d)* retail buildings in each year since 2004; [219673]

(3) what estimate she has made of the average annual dwelling's carbon dioxide emission per square metre of floor area in each year since 2004; [219674]

(4) what estimate she has made of the average building energy use per square metre of floor area in each year since 2004; [219675]

(5) what estimate she has made of the average non-domestic building energy use per square metre of floor area for *(a)* schools, *(b)* other public sector buildings, *(c)* commercial and industrial buildings and *(d)* retail buildings in each year since 2004; [219676]

(6) what estimate she has made of the average dwelling energy use per square metre of floor area, in each year since 2004. [219677]

Mr. Iain Wright: The Department does not hold or make estimates of the average carbon dioxide emissions or energy use from buildings in the form requested. However, the Department's report "Monitoring the Sustainability of Buildings", published in 2007, provides a comparison of figures on average energy use and annual carbon emissions per square metre for domestic and non-domestic buildings in 2004 and 2006. This can be viewed on the Department's website at:

http://www.communities.gov.uk/documents/planningandbuilding/pdf/381414.pdf

Further data are currently being compiled for the next report on this subject which will be published in 2009.

Central-Local Partnership

Mr. Betts: To ask the Secretary of State for Communities and Local Government (1) on what dates the Central-Local Partnership has met since December 2007; and what arrangements have been made for regular meetings; [219805]

(2) what arrangements she has made for monitoring the operation of the central-local concordat. [219806]

John Healey: Over the past year, there have been a number of meetings between Government Ministers and Local Government Association Group Leaders on different topics, under the umbrella of the Central-Local Partnership. We are currently considering the future role and terms of reference of the Central-Local Partnership. One of the roles of a renewed Central-Local Partnership is to monitor the operation of the Central-Local Concordat, and to revise it for the future as necessary.

Community Development: Wales

Mr. Dai Davies: To ask the Secretary of State for Communities and Local Government whether voluntary organisations and other third sector bodies in Wales will have access to the Empowerment Fund announced at page 3 of the White Paper, Communities in Control, Cm 7427. [218895]

John Healey: Our consultation document, "The Empowerment Fund: Consultation on proposals for funding third sector organisations to empower communities across England", published on the Department's website on 9 July 2008, sets out proposed eligibility criteria for access to the fund. Under those criteria eligible organisations must both be able to operate across England and be undertaking activities largely for beneficiaries within England.

Council Housing

Mr. Hepburn: To ask the Secretary of State for Communities and Local Government how many people have been registered as council tenants in *(a)* Jarrow constituency, *(b)* South Tyneside, *(c)* the North East and *(d)* England in each year since 1997. [210969]

Mr. Iain Wright: Information specifically on the number of people registered as council tenants is not available. However information is available on local authority dwelling stock. This information at constituency level is not held centrally.

Jarrow parliamentary constituency falls into two local authorities: South Tyneside and Gateshead.

Information on the number of dwellings owned by local authorities in Jarrow constituency, South Tyneside, the North East and England for 1997 to 2007 is given in the following table.

	Gateshead	South Tyneside	North East	England
1997	154,084	24,199	297,541	3,400,635
1998	150,845	23,913	292,031	3,309,244
1999	147,793	23,501	286,355	3,177,507
2000	144,188	23,089	276,290	3,011,995
2001	104,327	22,731	233,241	2,811,931
2002	101,407	22,184	226,593	2,706,036
2003	97,963	21,499	207,311	2,456,917
2004	93,499	20,228	189,679	2,334,631
2005	90,049	19,413	169,761	2,165,526
2006	88,168	18,910	165,141	2,087,456
2007	86,862	18,595	165,141	1,987,343

Note:
As reported by local authorities.
Source:
Communities and Local Government Housing Strategy Statistical Appendix return (HSSA)

Information on dwelling stock owned by local authorities for 1997 to 2007 broken down by Government Office Region and local authority is published on the Communities and Local Government website in Table 116 at:

http://www.communities.gov.uk/documents/housing/xls/140882.xls

Copies of these tables have been placed in the Library.

Council Tax

Mrs. Riordan: To ask the Secretary of State for Communities and Local Government what plans are under consideration by her Department for the reform of council tax. [220033]

John Healey: The Government support the conclusions of Sir Michael Lyons' independent inquiry, that council tax as a property based tax is broadly sound and should be retained. However we keep the detail of council tax administration continually under review. We are currently considering the feasibility of enabling local authorities to transfer the enforcement of council tax debts from magistrates courts to county courts in appropriate cases.

Council Tax: Empty Property

Mr. Bone: To ask the Secretary of State for Communities and Local Government what the Government's policy is on the application of council tax to empty industrial and commercial properties. [219539]

John Healey: Council tax is not payable on industrial and commercial properties and I therefore assume in answering this question that the hon. Member is referring to business rates.

From 1 April 2008 the rating arrangements for empty non-domestic properties were changed such that, in the majority of cases, empty properties are now liable for 100 per cent. of the occupied rate following a three-month exemption period (six months for industrial properties such as factories and warehouses).

Council Tax: Tax Rates and Bands

Mrs. Riordan: To ask the Secretary of State for Communities and Local Government what progress has been made on her plans to reform council tax bands; what steps she plans to take on such reform in the next 12 months; and if she will make a statement. [219025]

John Healey: We have no such plans. The Government have made it clear that any reform to the council tax banding system would only take place in the context of a general revaluation which we confirmed in September 2005 will not take place during the lifetime of this Parliament.

Jim Cousins: To ask the Secretary of State for Communities and Local Government how many and what proportion of properties there were in each band in each council tax collection authority in England on 1 April 2008. [219089]

John Healey: I refer the hon. Member to the answer I gave to the hon. Member for Barnsley, East and Mexborough (Jeff Ennis) on 21 April 2008, *Official Report*, column 1390W.

Departmental Appeals

Andrew Mackinlay: To ask the Secretary of State for Communities and Local Government on how many occasions her Department and its predecessors instructed the Treasury Solicitor to seek leave to appeal to the House of Lords from *(a)* the Court of Appeal and *(b)* the House of Lords itself in each of the last 10 years; and on how many occasions the application was rejected. [220817]

Mr. Dhanda: The information requested is not held centrally and could be provided only at disproportionate cost.

Departmental Buildings

Mr. Betts: To ask the Secretary of State for Communities and Local Government what account her Department takes of the level of energy efficiency of buildings before entering into agreements to *(a)* rent and *(b)* purchase those buildings. [220470]

Mr. Dhanda: The Department's sustainable operations policy states that:

"we will ensure all new builds, office relocations and major refurbishments achieve an overall BREEAM Excellent rating and specifically an Excellent rating in the areas of energy and water, unless site constraints or project objectives mean that this requirement conflicts with the obligation to achieve value for money on a whole life basis. Where site constraints or project objectives conflict with this requirement, a project should at least achieve an overall BREEAM rating of Very Good and an Excellent rating in the areas of energy and water".

An Excellent rating in the Energy section of the BREEAM for Offices 2008 version requires significant reductions in carbon dioxide emissions compared to those stipulated in the existing building regulations and assesses a building's performance against sub-metering, external lighting, lifts and low or zero carbon technologies.

Departmental Compensation

Mr. Hayes: To ask the Secretary of State for Communities and Local Government what the 10 highest payments made by her Department were under property compensation cases brought against it over the last 12 months for which figures are available; which of the cases were *(a)* contested and *(b)* uncontested by her Department; and what the nature of each incident was. [216709]

Mr. Dhanda: No compensation cases relating to land and property were brought against Communities and Local Government during the past 12 months.

Departmental Official Cars

Stephen Hammond: To ask the Secretary of State for Communities and Local Government (1) which make and model of car the Minister for Housing has chosen as her ministerial car to be provided by the Government Car and Despatch Agency; [217756]

(2) which make and model of car she has chosen as her ministerial car to be provided by the Government Car and Despatch Agency. [217764]

Mr. Dhanda: I refer the hon. Member to the answer given by the Under-Secretary of State for Transport my hon. Friend the Member for Poplar and Canning Town (Jim Fitzpatrick) on 16 July 2008, *Official Report*, column 414W.

Departmental Pay

Mr. Hoban: To ask the Secretary of State for Communities and Local Government how much was claimed in reimbursable expenses by special advisers in her Department in each of the last 10 years. [215227]

Mr. Dhanda: Centrally held records of the amount claimed in reimbursable expenses by special advisers in this Department are available for the previous five financial years, and are as follows. Information for earlier years would incur a disproportionate cost.

	Amount (£)
2003-04	174.70
2004-05	0
2005-06	3,765.10
2006-07	1,952.88
2007-08	1,494.92

Procedures for reimbursing staff expenses are set out in the Department's staff handbook, and are in line with the provisions set out in the Civil Service Management Code. The code can be viewed at:

www.civilservice.gov.uk/iam/codes/csmc/index.asp

Derelict Land

Mr. Dai Davies: To ask the Secretary of State for Communities and Local Government what assessment she has made of the effects on her programme to develop brownfield land of the loss in value of land banks acquired by commercial house builders. [218243]

Mr. Iain Wright: Neither the Barker Review of Housing Supply nor the Callcutt Review of Housebuilding Delivery found evidence to show that landbanking is a significant problem affecting housing supply. These conclusions are supported by the recent publication of draft research commissioned by Office of Fair Trading as part of their ongoing market study of the homebuilding industry, the final report of which is due to be published later this year.

Therefore, while we continue to monitor the housing market closely, we do not consider it necessary to make a specific assessment of any impact that loss in value of housebuilders' landbanks may have on the development of brownfield land. However, we would expect commercial housebuilders to continue to assess the viability of individual brownfield sites when considering the timing of commencing redevelopment schemes.

Economic Partnership Agreements: Dorset

Mr. Chope: To ask the Secretary of State for Communities and Local Government when she will respond to the application by the Dorset, Bournemouth and Poole economic partnership to run a pilot multi-area agreement. [220809]

John Healey: A multi-area agreement with Bournemouth, Dorset and Poole was signed on 14 July 2008, along with six other agreements. This fulfils a major commitment in the Sub-National Review of Economic Development and Regeneration. These agreements will lead to significant benefits and improved outcomes in the economies of the seven sub-regions.

Emergency Services: Gloucestershire

Mr. Laurence Robertson: To ask the Secretary of State for Communities and Local Government (1) on what date the Tri-service centre at Quedgeley, Gloucestershire was opened; what the cost was of construction and other associated costs; and if she will make a statement; [220502]

(2) what the running costs of the Tri-service centre at Quedgeley, Gloucestershire have been since its opening; what share of that cost is allocated to each of the emergency services using it; and if she will make a statement; [220503]

(3) what estimate she has made of the cost of transferring the control of the fire service from the Tri-service centre at Quedgeley, Gloucestershire; whether these costs include money owing through any contractual obligations; how long she estimates that transfer will take; and if she will make a statement; [220504]

(4) if she will make a statement on the future use of the Tri-service centre at Quedgeley, Gloucestershire. [220505]

John Healey: The Gloucestershire tri-service centre was officially opened in May 2003. The Government awarded £2.6 million to develop the pilot scheme through the 'Invest to Save' budget.

Quedgeley was one of three tri-service pilot schemes in England. In each case, the Government have committed to meeting the specific costs of withdrawing the control room elements from these arrangements, including

withdrawal from contractual commitments. A payment of £1,069,142 has been agreed with Gloucestershire to cover these costs.

Details on the centre's running costs and local financial arrangements are matters for the local police, fire and ambulance services. Gloucestershire FRS is also free to decide what other functions it keeps at—or locates to—the tri-service centre.

Gloucestershire Fire and Rescue Service is due to move the control room element to the regional control centre in November 2010.

Gloucestershire, like all fire and rescue authorities, receives new burdens funding for the work involved in preparing to move to the regional control centre. Over the comprehensive spending review period (FY 2008-09 to 2010-11) Gloucestershire FRS will get implementation funding of £167,249 directly and have access to their share of south-west implementation funding of £1.8 million.

European Charter of Regional Self-Government

Adam Price: To ask the Secretary of State for Communities and Local Government pursuant to the answer of 7 July 2008, *Official Report*, column 1356W, on the European Charter of Regional Self-Government, when she expects the Council of Europe's Committee of Ministers will meet to consider its response. [219088]

John Healey: I understand that the Council of Europe's Committee of Ministers is seeking possible comments from the relevant intergovernmental committee. Those comments are not expected before the end of 2008, after which the Committee of Ministers will respond to the Congress Recommendation.

Fire Services

Bob Spink: To ask the Secretary of State for Communities and Local Government which fire services *(a)* own and *(b)* operate a helicopter. [220663]

Mr. Dhanda: None of the fire and rescue services in England owns its own helicopter. Responsibility for fire and rescue services in Scotland, Wales and Northern Ireland has been devolved.

A number of fire and rescue authorities (FRAs) in England participate in schemes utilising helicopters owned by other organisations, such as the private sector, the police, the ambulance service, HM Coastguard and the armed forces, for a range of operations, including fighting grassland, moorland and forestry fires, undertaking search and rescue, reaching inaccessible areas or grid-locked roads, and transporting equipment.

Information on which individual FRAs participate in such schemes is not held centrally and could be provided only at disproportionate cost.

Bob Spink: To ask the Secretary of State for Communities and Local Government what research she has commissioned into the effectiveness of fire service helicopters in *(a)* urban and *(b)* rural areas. [220666]

Mr. Dhanda: No research has been commissioned by Communities and Local Government into the effectiveness of the use of helicopters by the Fire and Rescue Service.

The Chief Fire Officers Association (CFOA) held a conference on Air Support in the Fire and Rescue Service on 8 May, which I attended, and in the light of those and other discussions CFOA is currently drawing up a business case for a national system of air support which will include proposals for the use of helicopters in both urban and rural areas.

Flats

Mr. Pickles: To ask the Secretary of State for Communities and Local Government what proportion of new build dwellings were flats in each year since 1996-97. [212656]

Mr. Iain Wright: The following table shows estimates of the proportion of new build dwellings in England that were flats in each year since 1996-97.

	Percentage of new build dwellings that were flats
1996-97	16
1997-98	15
1998-99	16
1999-2000	17
2000-01	20
2001-02	23
2002-03	27
2003-04	34
2004-05	41
2005-06	46
2006-07	47
2007-08	48

Source:
P2/P2a house building returns from local authorities and National House Building Council on new build completions.

Floods: Hull

Mrs. Villiers: To ask the Secretary of State for Communities and Local Government pursuant to the answer of 10 June 2008, *Official Report*, columns 140-1W, on floods: Hull, what Bellwin payments were made to recipients in *(a)* Gloucestershire and *(b)* Hull as a result of the 2007 floods, broken down by recipient; [218666]

John Healey: The following authorities received payments under the Bellwin Scheme operated by the Department for Communities and Local Government as a result of the 2007 floods:

Gloucestershire

Cotswold district council was paid £87,432 on 18 February 2008. Cheltenham borough council was paid £48,361,000 on 9 April 2008 and £20,638 on 10 July 2008. Gloucester city council was paid £114,000 on 20 December 2007, £46,995,000 on 26 February 2008 and £28,366 on 12 March 2008. Gloucestershire county council was paid £1,100,000 on 18 December 2007, £1,454,384 on 26 March 2008 and £253,260 on 9 April 2008. Gloucestershire Police Authority was paid £955,420 on 8 February 2008. Stroud district council was paid £8,673 on 25 February 2008. Tewkesbury borough council was paid £351,073 on 12 March 2008.

Hull

Humberside Fire and Rescue was paid £167,935 on 24 December 2007. Kingston upon Hull city council was paid £1,800,693 on 18 February 2008 and £297,124 on 7 May .

Floods: Insurance

Mrs. Villiers: To ask the Secretary of State for Communities and Local Government what recent discussions she has had with insurers on areas adversely affected by the 2007 floods. [218668]

John Healey: As Minister for Flood Recovery, I have met the Association of British Insurers (ABI) and representatives of their members on a number of occasions since last summer's floods. Most recently, on 18 June, I addressed the ABI's conference '2007 Floods: One Year On'.

Homelessness

Lembit Öpik: To ask the Secretary of State for Communities and Local Government how many capital grants her Department has awarded under the Places of Change Programme. [219868]

Mr. Iain Wright: Capital grants from the £80 million Places of Change Programme have been allocated to 80 projects in 54 local authority areas across England.

Through this programme hostels and homelessness services will cease to be places of last resort, but instead become centres of excellence and choice which positively changes lives. They will provide good services so that people can access education, training and employment and move on to independent living in a settled home.

The Places of Change Programme builds upon the success of the £90 million Hostels Capital Improvement Programme which funded 178 projects in 62 local authority areas.

Homelessness: Greater London

Mr. Malins: To ask the Secretary of State for Communities and Local Government what estimate she has made of the number of homeless people in London in each of the last five years; what measures she plans to take to reduce the number of people who are homeless in London; and if she will make a statement. [218996]

Mr. Iain Wright *[holding answer 15 July 2008]:* Tackling homelessness is a key priority for this Government. We work closely with local authorities and voluntary sector organisations to drive forward our homelessness agenda. We have allocated over £75 million to local authorities and voluntary organisations in London over the next three years to tackle homelessness—the biggest ever cash injection for homelessness services. In addition, a further £19 million has been allocated to local authorities through our Places of Change programme to work in partnership with voluntary organisations to build on the success of improving hostels and day centres.

Homelessness prevention measures funded by Communities and Local Government have had a major impact. In the last five years we have more than halved the number of homeless households in priority need accepted by London authorities; we are now making serious inroads into the backlog of households in temporary accommodation, and we are maintaining levels of rough sleeping at historical low levels.

In April, we published a discussion paper "Rough Sleeping 10 Years On: From the streets to independent living and opportunity" which set out our initial thinking on updating the Government's rough sleeping strategy this autumn. We have received a good response to the discussion paper, and are now analysing responses.

The following table summarises data for London in the last five years on *(a)* homeless households in priority need accepted by authorities, *(b)* households in temporary accommodation and *(c)* rough sleeping estimates.

Summary table

Homeless households in priority need accepted by local authorities. London

	Number of households
2003-04	30,080
2004-05	26,730
2005-06	21,140
2006-07	15,390
2007-08[1]	13,800

2007	248

[1] Estimates based on a combination of recent street counts in those areas where there is a known or suspected rough sleeping problem and of estimates made by local authorities, as reported on their HSSA returns to CLG in June of each year.

Homelessness: Northampton

Lembit Öpik: To ask the Secretary of State for Communities and Local Government what consideration her Department has given to the conversion of Robinson House, Northampton under the Places of Change programme. [219869]

Mr. Iain Wright: Northampton borough council have been allocated £1.42 million from the Places of Change Programme towards the reprovision of its services for rough sleepers in Robinson House. They are currently conducting an options appraisal of sites in Northampton, including Robinson House, in order to take this project forward.

Housing

Lembit Öpik: To ask the Secretary of State for Communities and Local Government how many people are on social housing waiting lists in each region. [219872]

Mr. Iain Wright: I refer the hon. Member to the answer given to the hon. Member for Brentwood and Ongar (Mr. Pickles) on 19 March 2008, *Official Report*, columns 1198-99W.

Information on local authority waiting lists is collected in respect of households rather than individuals.

Housing: Bournemouth

Mr. Ellwood: To ask the Secretary of State for Communities and Local Government how many new dwellings were built in Bournemouth in each of the last 10 years. [220396]

Mr. Iain Wright: The figures requested are presented in the following table:

	New build completions
1998-99	211
1999-2000	532
2000-01	279
2001-02	455
2002-03	657
2003-04	800
2004-05	659
2005-06	553
2006-07	951
2007-08	829

Source:
New build completions from P2 returns submitted by local authorities and National House Building Council (NHBC)

Housing: Migration

Mr. Clappison: To ask the Secretary of State for Communities and Local Government pursuant to the answer of 9 May 2008, *Official Report*, column 1206W, on housing: migration, what research she has *(a)* commissioned and *(b)* evaluated on the proportion of projected household growth attributable to net migration in England; how many such projections have been made since 1987; and what her most recent projection is of the proportion of household growth attributable to net migration. [206253]

Caroline Flint: I refer the hon. Member to the answer given on 23 July 2007, *Official Report*, column 745W.

Housing: Overcrowding

Sarah Teather: To ask the Secretary of State for Communities and Local Government what estimate she has made of the number of families living in overcrowded conditions in each London borough in each of the last 10 years. [219276]

Mr. Iain Wright: The Survey of English Housing, using the bedroom standard, estimates the number of overcrowded households living in London over the last 10 years were:

	Overcrowded households[1] *(Thousand)*
1997-98	156
1998-99	159
1999-2000	161
2000-01	166
2001-02	170
2002-03	172
2003-04	175
2004-05	189
2005-06	203
2006-07	203

[1] Three year moving average

It is not possible to derive estimates at a local authority level.

Housing: Rural Areas

Mr. Drew: To ask the Secretary of State for Communities and Local Government if she will develop policies to ensure exclusive provision to the local population of housing supply in remote rural locations; and if she will make a statement. [219187]

Mr. Iain Wright: The Government recognise that rural communities face particular pressures. National planning for housing policies in Planning Policy Statement 3 (PPS3) gives local authorities in rural areas the flexibility to determine the kind of new housing that should be built in their area. They should be proactive in identifying sufficient suitable sites that can be brought into development.

The rural exception site policy in PPS3 allows local authorities, where practical and economically viable, to grant permission for 100 per cent. affordable housing on small sites that would not normally be released for

housing. This is an important means of providing affordable housing in perpetuity to meet needs of local rural communities.

In addition, in order to retain affordable housing for local communities in areas where replacement would be difficult, the right to acquire, under which housing association tenants may buy their rented home at a discount, does not apply in areas designated as rural, generally settlements of 3,000 or fewer inhabitants.

In general, section 106 can be used to impose a planning obligation restricting the use of land in any specified way or requiring land to be used in any specified way. An obligation created under section 106 is not only enforceable against the person entering into it but also against any person deriving title from them. Therefore, where restricting occupancy of affordable housing to the local population is material to the granting of planning permission for a residential development, a section 106 agreement provides a means of ensuring that this occurs.

Housing: Standards

Lynne Jones: To ask the Secretary of State for Communities and Local Government pursuant to the answer of 3 July 2008, *Official Report*, columns 1062-3W, on housing: standards, what estimate she has made of the cost of bringing all *(a)* owner-occupied, *(b)* private rented, *(c)* local authority and *(d)* registered social landlord housing up to code level 3 for sustainable homes. [219776]

Mr. Iain Wright: The Code for Sustainable Homes is a framework for the design and construction of sustainable new homes. Existing homes can not be assessed against the standard because some elements of the standard apply to the construction process, such as having a site waste management plan. There are also a number of sections that would be unrealistic to expect in existing homes where major renovation or re-building would be required to achieve them. There is therefore no intention of requiring existing homes to come up to Code level 3 standards.

New homes built with public funding are required to meet Code level 3. The 2007 cost analysis in the impact assessment undertaken by Cyril Sweett concluded that the additional cost of building to Code level 3, over and above the cost of building to current building regulations standards, is around 4-8 per cent. This report, however, only took into account capital costs, excluding benefits such as reduced energy costs and added value to the property.

Housing: Sustainable Development

Mr. Roger Williams: To ask the Secretary of State for Communities and Local Government what estimate she has made of the potential contribution of high energy efficiency pumps for *(a)* central heating, *(b)* air conditioning and *(c)* water boosting could make towards achieving her Department's target for zero-carbon emission housing by 2016. [220463]

Mr. Iain Wright: The Government's programme to achieve zero carbon homes by 2016 will involve a progressive tightening of the energy efficiency provisions within Part L of the Building Regulations. The first changes will be made in 2010 and we have started to review the relevant provisions. As part of this review we are considering the potential for the introduction of energy efficiency standards for pumps in domestic and non-domestic properties. Any such proposals would be the subject of formal consultation in 2009.

Lighting: Recycling

Sarah Teather: To ask the Secretary of State for Communities and Local Government what guidance she has given to local authorities on providing recycling facilities for energy-saving light bulbs. [219580]

Joan Ruddock: I have been asked to reply.

The Department has not issued specific advice to local authorities about the recycling of low energy light bulbs.

Compact fluorescent lamps (CFLs—the most common type of energy efficient bulbs) are covered by the Waste Electrical and Electronic Equipment (WEEE) Directive. All local authorities in England are providing designated collection facilities for WEEE. Information about which sites take back CFLs (and other types of WEEE) is available on the recycle-more website.

Once CFLs have been collected, producers of the equipment have responsibility to fund treatment and recycling.

The Department has published background information on CFLs—their benefits in terms of energy efficiency as well as advice on their disposal at the end of their lives. This can be found on the DEFRA website.

Local Authorities: Housing

Lembit Öpik: To ask the Secretary of State for Communities and Local Government which local authorities operate choice-based letting schemes that include private rented housing options; and if she will make a statement. [219520]

Mr. Iain Wright: Communities and Local Government does not generally collect information on the detailed workings of Choice Based Lettings schemes.

Bolton, Leeds, Wychavon and the East London Letting Company (comprising Hackney, Havering, Newham, Redbridge and Waltham Forest) are known to offer housing applicants private rented options alongside social housing in their Choice Based Lettings schemes. Other schemes may also include or be developing these options.

Communities and local government is committed to ensuring that housing applicants have more choice over where they live. We encourage local authorities to work with private landlords so that housing applicants and tenants who are seeking a transfer have more housing options from which to choose.

Local Authority Business Growth Incentives Scheme

Margaret Moran: To ask the Secretary of State for Communities and Local Government how many local authorities have funded social enterprise under the local authority business growth incentive scheme. [218912]

John Healey: Grants to local authorities under the local authority business growth incentives (LABGI) scheme are not ring-fenced, so local authorities are able to choose how they spend any funding they receive. We do not keep records centrally of how local authorities have spent LABGI funding.

Local Government Association

Mr. Betts: To ask the Secretary of State for Communities and Local Government what assessment she has made of the operation of the central-local concordat; what progress she has made with the Local Government Association on the operation of the concordat; and if she will make a statement. [219803]

John Healey: The Central-Local Concordat, signed in December 2007, enshrined the principle of devolution at the heart of the Government's relationship with local councils in England. It provides a point of reference for how this relationship should develop in the future.

Since the concordat was signed significant progress has been made, including the signing of 150 local area agreements across all of England, which means that councils and their partners can concentrate their efforts on the specific needs of the local people they serve.

Local Government Finance

Mr. Dunne: To ask the Secretary of State for Communities and Local Government what changes there have been to the mechanisms for the allocation of money from central government to local government since 1997-98. [219978]

John Healey: The main changes to the mechanisms for the allocation of money from central Government to local government since 1997-98 are set out in "Local Government Finance Statistics England No. 18 (2008)", in annexes C5 and D2, a copy of which is available in the Library of the house. The Government regularly review the mechanisms for allocating money to local government, including during periodic consultation on formula grant distribution for local government; and make changes as appropriate.

Mr. Dunne: To ask the Secretary of State for Communities and Local Government what changes there have been to the measurement of deprivation for the purposes of allocation of funding from central government to local government since 1997-98. [219979]

John Healey: Local funding to tackle deprivation has been distributed in the form of the Neighbourhood Renewal Fund from 2001, and the Working Neighbourhoods Fund since 2008. These allocations have used measures of deprivation—the Indices of Deprivation (ID).

Each version of the ID has evolved to measure deprivation more accurately.

The 2000 ID was ward based, contained 32 indicators, and covered six socio-economic domains.

In 2004 the new Lower Super Output Area (LSOA) geography was used, a new domain was introduced (crime), and the number of indicators increased to 37.

The ID2007 indices were an update to the ID2004, with minor changes to some of the indicators and the number of indicators increased to 38.

More details can be found in the technical reports for each index, published on the CLG website.

Mainstream local authority funding does not use measures of deprivation specifically to allocate funding, however distribution of formula grant to local authorities uses broad measures of the social and economic characteristics of an area. The factors used in each year since 1997-98 are set out in the Local Government Finance Report (England) for each year. These reports are approved by Parliament and copies are deposited in the Library of the House.

Local Government: Equal Pay

Kelvin Hopkins: To ask the Secretary of State for Communities and Local Government which local authorities received a capitalisation direction for equal pay in *(a)* 2006-07 and *(b)* 2007-08; and what the (i) size of the direction and (ii) amount utilised was in each case. [218985]

John Healey: In 2006-07 35 local authorities applied to Communities and Local Government for capitalisation directions for equal pay. A full list of these authorities and the sums they received is available at:

http://www.local.communities.gov.uk/finance/capital/cap0607appls.xls

The actual amount of capital expenditure used by individual authorities is available in their accounts.

In 2007-08, £500 million of equal pay capitalisation directions were allocated to 46 local authorities. The capitalisation used by each authority will be published on the Department's website in September 2008.

Local Government: Gloucestershire

Mr. Harper: To ask the Secretary of State for Communities and Local Government what plans she has to create a unitary authority for Gloucestershire. [220079]

John Healey: No Gloucestershire authority responded to our invitation in October 2006 to submit unitary proposals.

Mr. Harper: To ask the Secretary of State for Communities and Local Government what recent estimate she has made of the *(a)* transition costs and *(b)* effect on long-term costs anticipated to arise from the establishment of a unitary authority for Gloucestershire. [220162]

John Healey: I refer the hon. Member to the answer I gave to my hon. Friend the Member for Stroud (Mr. Drew) on 1 July 2008; *Official Report*, column 794W.

Local Government: Reorganisation

Mr. Harper: To ask the Secretary of State for Communities and Local Government what recent discussions she has had with local authorities on the use of funds released by the creation of unitary authorities. [220080]

John Healey: The Government, in their dealings with local authorities in restructuring areas have made it clear from the outset that they expect any savings generated from restructuring to be used to improve services or reduce council tax bills. This remains the case.

Mr. Harper: To ask the Secretary of State for Communities and Local Government what plans she has for a further round of local government re-organisation; and if she will make a statement. [220164]

John Healey: I refer the hon. Member to the answer I gave to the hon. Member for Stroud (Mr. Drew) on 13 March 2008, *Official Report*, column 586W. This remains the case.

London Assembly: Finance

Mrs. Laing: To ask the Secretary of State for Communities and Local Government (1) what the running costs of the Greater London Assembly were in each year since its creation; [220414]

(2) what the cost of the Greater London Assembly was in 2007-08. [220415]

John Healey: The London Assembly is a constituent part of the Greater London Authority, and my Department does not keep records of the running costs of either the assembly or authority. But this information is available in the authority's corporate plan and annual accounts which can be found on its website.

McKinsey

Mr. Pickles: To ask the Secretary of State for Communities and Local Government pursuant to the answer of 3 April 2008, *Official Report*, column 1250W, on departmental contracts, what the function and purpose was of the Communities' High Level Seminar supported by McKinsey. [202469]

Mr. Dhanda: The seminar brought together senior politicians and officials from local and central government to agree what needed to be done, in localities and Whitehall, to implement the new local performance framework effectively.

Further follow up work was also commissioned to take forward and implement a number of the key actions arising from the event in order to raise awareness of the framework with a wider audience and to ensure that the programme was on track to deliver ambitious local area agreements by June 2008.

Migration Impact Forum

Damian Green: To ask the Secretary of State for Communities and Local Government when she plans to publish the minutes of the Migration Impact Forum held on 21 May 2008. [220119]

Mr. Dhanda: The minutes of the fourth meeting of the Migration Impacts Forum (MIF) on 21 May were placed on the Department's website at:

www.communities.gov.uk/communities/racecohesionfaith/asylumandimmigration/migration-forum/mifpapers210508/

on 17 July, having been agreed by MIF members at the fifth Forum meeting on 16 July.

Multiple Occupation

Lembit Öpik: To ask the Secretary of State for Communities and Local Government if her Department will publish *(a)* the findings of the research it has commissioned into houses in multiple occupation (HMOs) and possible planning responses and *(b)* the membership of her Department's HMO working group. [219533]

Mr. Iain Wright: The Department will publish the findings of the research it has commissioned into houses in multiple occupation (HMOs) and possible planning responses when the research report has been finalised.

Ecotec Consulting presented emerging findings of their research to a range of stakeholders at a seminar on 9 April 2008. The participants included representatives of local authorities, universities and students, the National HMO lobby and landlords.

The Government have not established a formal HMO working group but will continue to engage stakeholders in future work on this issue.

Personal Care Services: Licensing

Dr. Starkey: To ask the Secretary of State for Communities and Local Government what provisions there are for local authorities outside London to license establishments carrying out *(a)* botox treatment, *(b)* dental whitening, *(c)* spray tanning, *(d)* ultra violet tanning, *(e)* tattooing, *(f)* piercing, *(g)* acupuncture and *(h)* electrolysis; and what plans she has to bring forward proposals for further local authority licensing of the beauty treatment sector. [210417]

Mr. Dhanda: CLG does not have policy responsibility for licensing issues relating to these establishments.

Personal Injury

Mr. Hayes: To ask the Secretary of State for Communities and Local Government what the highest 10 payments made by her Department in settlement of personal injury claims brought against it were over the last 12 months for which figures are available; which of those cases were *(a)* contested and *(b)* uncontested by the Department; and what the nature of the incident was in each case. [216677]

Mr. Dhanda: The Department for Communities and Local Government has settled the following four cases over the 12 months to July 2008:

Nature of incident	£
Industrial disease	16,175
Workplace injury	15,000
Workplace injury	5,000
Workplace injury	2,200

Liability was not contested in any of these cases. The amount of damages in each case was agreed by negotiation with the claimants' solicitors.

Places of Change Programme

Lembit Öpik: To ask the Secretary of State for Communities and Local Government how many capital grants her Department has awarded under the Places of Change programme and subsequently rescinded following local opposition. [220369]

Mr. Iain Wright: No grants from the Places of Change programme have been rescinded following local opposition since the programme commenced in April 2008. Such decisions would be taken on a case-by-case basis.

Places of Change programme projects are subject to the planning process, which involves formal consultation with the community, when any local opposition can be taken into account.

Planning: Recreation Spaces

Ben Chapman: To ask the Secretary of State for Communities and Local Government if she will require local authorities to publish an audit of their compliance with Planning and Policy Guidance 17. [214970]

Mr. Iain Wright: We have no current plans to require local authorities to publish audits of their compliance with Planning Policy Guidance Note 17.

Regional Government

Adam Price: To ask the Secretary of State for Communities and Local Government what plans she has to consult the devolved administrations on the proposed European Charter for Regional Democracy. [219002]

John Healey: The 'Memorandum of Understanding and Supplementary Agreements' between the United Kingdom Government and the devolved Administrations provides that the Government will consult the devolved Administrations before deciding its position on an international matter that affects the responsibility of those Administrations. The Government followed this procedure when deciding their position on the proposed regional charter, and would do so again before taking any decision to modify its position.

Rented Housing

Lembit Öpik: To ask the Secretary of State for Communities and Local Government what estimate her Department has made of the average *(a)* age of tenant and *(b)* length of tenure of those living in the private rented sector in the latest period for which figures are available. [219523]

Mr. Iain Wright: Based on the 2006-07 Survey of English Housing the median age of a private rented sector tenant is estimated at 34 years.

The median length of time spent in their current home, as reported by private sector tenants, is about 1.6 years. The time spent in their current home is, of course, less than the total time that they will have spent in this home by the time they next move.

The median is a more useful indicator than average for both age of tenant and length of residence. A median length of residence of 1.6 years means that about half of all private sector tenants have been in their current home for less than 1.6 years.

Social Rented Housing

Mr. Hoyle: To ask the Secretary of State for Communities and Local Government how many people are awaiting social housing in *(a)* Chorley, *(b)* the rest of the North West region and *(c)* England. [212286]

Mr. Iain Wright: Information on local authority waiting lists is collected in respect of households rather than individuals. Where local authorities and registered social landlords operate a common register, households registered with the RSL will be included in the data. However, registered social landlords are independent bodies and can keep their own waiting lists.

In 2007, the number of households on the local authority housing waiting list in Chorley was 1,897, the rest of the North West region was 212,597 and in England was 1,674,421.

Information on the number of households on local authorities' waiting lists broken down by Government office region and local authority for 1997 to 2007 is published on the Communities and Local Government website in Table 600 at:

http://www.communities.gov.uk/documents/housing/xls/144458.xls

Copies of this table have been deposited in the Library.

Lembit Öpik: To ask the Secretary of State for Communities and Local Government what the average social rent is in each region for *(a)* one bedroom, *(b)* two bedroom, *(c)* three bedroom and *(d)* four bedroom properties. [219871]

Mr. Iain Wright: Average rent information is available for local authority housing and registered social landlord housing separately and is provided in table 1 and table 2 as follows. Figures for the RSL sector are based on data collected by the Housing Corporation.

Table 1: Average local authority rents, for one, two, three and four bedroom dwellings in each region in 2006-07

£ per week

Region	*One bed*	*Two bed*	*Three bed*	*Four bed*
North East	42.00	47.51	51.78	55.44
North West	45.39	51.41	56.26	61.36
Yorkshire and the Humber	43.64	48.04	51.81	55.11
East Midlands	46.56	51.30	54.47	57.78
West Midlands	47.08	52.65	59.07	64.71
East	52.48	60.52	67.69	75.64
London	63.48	72.86	83.18	94.92
South East	55.79	64.26	72.86	78.24
South West	46.86	52.95	60.73	68.10
England	51.34	57.73	63.02	74.57

Source:
CLG Second Subsidy Claims Form (unaudited).

Table 2: Average registered social landlord rents, for one, two, three and four bedroom dwellings in each region in 2006-07

Region	One bed	Two bed	Three bed	£ per week Four bed
North East	50.32	55.61	59.22	62.56
North West	51.66	58.01	62.49	68.71
Yorkshire and the Humber	47.68	54.58	58.89	70.16
East Midlands	53.78	61.66	64.51	71.77
West Midlands	53.88	60.19	64.09	73.53
East	58.24	67.59	74.64	83.68
London	70.61	81.11	91.97	102.35
South East	64.75	76.09	85.08	93.95
South West	56.75	65.66	72.18	79.73
England	58.36	65.97	71.16	82.69

Notes:
1. Figures as at 31 March 2007.
2. General needs properties only. Refers to information collected on the long form (in general this is for RSLs with stock of over 1,000 properties).

Source:
Housing Corporation's Regulatory Statistical Return (RSR).

Social Rented Housing: Foreigners

Mr. Clappison: To ask the Secretary of State for Communities and Local Government pursuant to the answer of 16 May 2008, *Official Report*, column 1800W, on social rented housing: foreigners, if she will break down by nationality the new general needs lettings by registered social landlords to *(a)* the 1,769 foreign nationals from EEA countries and *(b)* the 2,259 foreign nationals from non-EEA countries; and if she will break down the lettings by UK region. [207148]

Caroline Flint: Information on the number of new registered social landlord general needs lettings made in England during 2006-07 broken down by tenant nationality and by region can be found on the CORE website at www.core.ac.uk in table 28b of the 'CORE Annual Digest for Housing Associations 2006-07'.

From this information it is possible to separately identify new tenants who are UK nationals and nationals of each of the A8 Eastern European accession states. It is not possible to separately identify the nationality of tenants from "other European economic area countries" or from "any other countries" as this information is not collected.

Trees

Mr. Roger Williams: To ask the Secretary of State for Communities and Local Government what consideration she has given to reinstating the annual condition survey for amenity trees. [220459]

Mr. Iain Wright: Funding of the condition survey of non-woodland amenity trees project undertaken by Forest Research ended in 2005. There are currently no plans to reinstate this funding.

United Nations Human Settlements Programme

Mr. Betts: To ask the Secretary of State for Communities and Local Government what steps the Government has taken to discuss the United Nations Human Settlements Programme guidelines on decentralisation and the strengthening of local authorities with local authorities; and what measures it plans to introduce to implement the best practice outlined in the guidelines. [219804]

John Healey: Local government, through the LGA, have been involved in such discussions, and an officer of the LGA joined the official from my Department who led the EU's input at the UN HABITAT Governing Council last year when the guidelines were adopted. The guidelines reflect the more rigorous European Charter of Local Self-Government, which the Government signed on 3 June 1997 and ratified on 24 April 1998, and the principles of which are reflected in the United Kingdom system of local democracy.

Waste Disposal: Finance

Bob Spink: To ask the Secretary of State for Communities and Local Government what proportion of the budget of each local authority was spent on the disposal of household and commercial rubbish in each of the last 10 years. [220838]

John Healey: I have placed in the Library of the House a table showing the proportions of revenue expenditure spent on waste disposal by each local authority in England in the last nine years.

Aggregate information for England is published in editions of Local Government Financial Statistics and the information is drawn from the Communities and Local Government revenue outturn (RO) returns.

Revenue expenditure is defined as the expenditure funded from aggregate external finance (AEF), council tax and authorities' reserves. AEF is central Government revenue funding that comprises formula grant (revenue support grant, redistributed non-domestic rates and police grant) and specific grants inside AEF, i.e. revenue grants paid for council's core services.

Figures for 1997-98 have not been included due to complexities arising from the extensive local government reorganisation which took place around that time.

Comparisons across years may not be valid due to changing local authority responsibilities.

DUCHY OF LANCASTER

10 Downing Street: Catering

Mr. Maude: To ask the Chancellor of the Duchy of Lancaster if he will place in the Library copies of the menus, including prices, for the 10 Downing Street canteen from 30 June to 4 July 2008. [217353]

Phil Hope: The Prime Minister's Office is an integral part of the Cabinet Office. The Cabinet Office catering provider offers a range of food across the Cabinet Office estate. Records of menus are not held by the Cabinet Office.

Departmental Land

Mr. Maude: To ask the Chancellor of the Duchy of Lancaster which areas of land are held for development by the Duchy of Lancaster as outlined on page 20 of its 2007 report and accounts. [210871]

Edward Miliband: On page 20 of the 2007 annual report and accounts land held for development is valued at £4,030,000. This relates to £3.9 million within the Duchy's Crewe Survey with the balance within the Duchy's Yorkshire Survey.

Departmental Official Cars

Stephen Hammond: To ask the Chancellor of the Duchy of Lancaster which make and model of car he has chosen as his ministerial car to be provided by the Government Car and Despatch Agency. [217746]

Edward Miliband: I refer the hon. Member to the answer given to him by my hon. Friend the Parliamentary Secretary for the Department of Transport (Jim Fitzpatrick) on 16 July 2008, *Official Report*, column 414W.

Departmental Pensions

Mr. Maude: To ask the Chancellor of the Duchy of Lancaster on what date and for what reason the Duchy of Lancaster staff pension final salary scheme was closed to new entrants. [210872]

Edward Miliband: The Duchy of Lancaster Staff Pension Scheme was closed to new entrants with effect from 6 February 2002.

In line with a large number of other businesses, those running the Duchy estate wished to have greater certainty in the level of contribution within the business. The Duchy makes a contribution to new employees personal pension plans based upon a percentage of their gross salary.

Departmental Research

Bob Spink: To ask the Chancellor of the Duchy of Lancaster what proportion of his Department's budget was used for research within its areas of responsibility in each of the last 10 years. [218060]

Edward Miliband: Expenditure incurred on research services is not held centrally and can be provided only at disproportionate cost.

Fish

Mr. Peter Ainsworth: To ask the Chancellor of the Duchy of Lancaster how much fish was procured by his Department and at what cost in each of the last five years, broken down by species; and what amount and value of such fish met the Marine Stewardship Council standard in each such year, broken down by species. [217899]

Phil Hope: The information requested can be provided only at disproportionate cost.

Non-profit Making Associations

Margaret Moran: To ask the Chancellor of the Duchy of Lancaster what *(a)* programmes and *(b)* support he provides for the promotion and development of social enterprise. [218717]

Phil Hope: The Government's commitments to supporting and promoting the development of social enterprise are set out in the "Social Enterprise Action Plan: Scaling New Heights" (November 2006), copies of which are available in the Libraries of the House, and in "The future role of the third sector in social and economic regeneration: final report" ("The Third Sector Review"—July 2007), copies of which have been placed in the Library.

The Social Enterprise Action Plan sets out a range of actions committed to by the Office of the Third Sector and other Government Departments to foster a culture of social enterprise; ensure social enterprise has access to the right information and advice; enable social enterprise to access appropriate finance; and to enable social enterprise to work with government.

Progress highlights in the delivery of the Social Enterprise Action Plan include:

Over 30 social enterprise ambassadors have been recruited;

Social enterprise models will be included in the GCSE business studies syllabus and wider school curriculum from September 2008;

£5.9 million has been provided to RDAs to improve business support for social enterprise;

Consultation on the £10 million social enterprise risk capital investment fund has concluded and work is under way to finalise the fund prior to launch;

The number of OTS strategic partners has been increased to 45 to include seven new social enterprise strategic partners.

The Third Sector Review sets out Government's support for the third sector over the CSR period. It includes four commitments specific to social enterprise:

I. Promoting social enterprise

II. Building the evidence base

III. Consulting on the use of unclaimed assets for social investment

IV. Enabling social enterprise to work with government.

Non-profit Making Associations: Ethnic Groups

Margaret Moran: To ask the Chancellor of the Duchy of Lancaster what assessment he has made of the effectiveness of his Department's funding of black and minority ethnic social enterprise. [218904]

Phil Hope: The Government do not fund individual social enterprises directly, rather they provide strategic funding to organisations that represent and support social enterprise. This is in addition to the commitments to support an environment in which social enterprise can thrive as set out in the "Social Enterprise Action Plan: Scaling New Heights" (November 2006) and in "The future role of the third sector in social and economic regeneration" (July 2007).

Seven social enterprise representative organisations receive strategic funding from the Office of the Third Sector (OTS) to provide a credible and effective voice

for the sector into Government, to act as an advocate for the sector and to work with Government to develop and implement policy.

In total 20 per cent. of OTS strategic funding for social enterprise partners is ring fenced to enable them to work alongside black and minority ethnic (BME) groups to ensure their voice is heard. To draw this work together the Social Enterprise Coalition is funded to develop a strategy to engage and integrate BME social enterprise into the wider social enterprise movement. This work is ongoing and a strategy will be in place in autumn 2008.

In addition we fund Voice4Change England to enhance the effectiveness of the black and minority ethnic third sector.

Non-profit Making Associations: Trade Unions

Margaret Moran: To ask the Chancellor of the Duchy of Lancaster what recent discussions he has had with trades unions on the role of social enterprise in public service delivery. [218913]

Phil Hope: Ministers and officials engage with many people, including trade union representatives, on a wide range of third sector policy issues, among them public service delivery. It is not normal practice to disclose details of such meetings.

Rural Payments Agency

Mr. Maude: To ask the Chancellor of the Duchy of Lancaster how much the Duchy of Lancaster received from the Rural Payments Agency in the last financial year for which figures are available. [210898]

Edward Miliband: The Rural Payments Agency paid the Duchy £27,013.77 in relation to the Single Payment Scheme 2007. This is in respect to land held by the Duchy to protect the receipt of such payment for future tenants when the land is let.

Smith Institute

Mr. Maude: To ask the Chancellor of the Duchy of Lancaster (1) on what date the Charity Commission began its current investigation into the Smith Institute; [217364]

(2) how many complaints the Charity Commission has received about the Smith Institute. [217365]

Phil Hope: The information requested falls within the responsibility of the Charity Commission. I have asked the Commission to reply.

Letter from Andrew Hind, dated 17 July 2008:

As Chief Executive of the Charity Commission, I have been asked to reply to your questions regarding our statutory inquiry into the Smith Institute (217364 and 217365). The Commission closed its inquiry yesterday (16 July), and, as is our usual policy, we will shortly report the outcome by publishing a statement of results on our website. The information you have asked for is contained in that report, which will be available here: www.charitycommission.gov.uk.

I hope this information is helpful.

Trade Unions: Internet

Mr. Maude: To ask the Chancellor of the Duchy of Lancaster if he will amend the text on www.direct.gov.uk in the sections entitled Introduction to Trade Unions and Your Right to Join (or Not to Join) a Trade Union to include information on employees' rights to opt out of the trades union political levy. [210719]

Mr. McFadden: I have been asked to reply.

Direct.gov is intended to provide outline guidance for citizens on a wide variety of topics. More detailed guidance on trade unions, including information on employee's rights to opt-out of the trade union political levy, is given on the BERR website. It is intended that material covering employment on the BERR website, including on trade unions, will be converged onto direct.gov and businesslink.gov by April 2009. The guidance on the trade union political levy will be considered as part of this process.

HOUSE OF COMMONS COMMISSION

Annual Leave

Lynne Jones: To ask the hon. Member for North Devon, representing the House of Commons Commission pursuant to the answer of 8 July 2008, *Official Report*, columns 1452-53W, on annual leave, on what basis the leave arrangements for staff appointed to the Senior Commons Service were set; and whether there is any independent oversight of such leave arrangements. [220004]

Nick Harvey: The leave arrangements for the Senior Commons Service have been in place for some years, and are intended to make the House of Commons jobs attractive to direct recruits at senior levels. There are, however, restrictions. For example, most SCS staff may take annual leave only when the House is not sitting, and cannot carry forward unused leave from one year to another. Oversight of the terms of employment of all staff (including SCS) rests with the Management Board and the House of Commons Commission.

Portcullis House: Energy

Mr. Peter Ainsworth: To ask the hon. Member for North Devon, representing the House of Commons Commission what estimate he has made of the energy efficiency of Portcullis House in each of the last five years; and if he will make a statement. [219541]

Nick Harvey: The annual energy consumptions obtained from energy supply invoices and the energy consumptions per square metre for Portcullis House for each of the last five years are given in the following table:

	kWh	*kWh/m2*
2003-04	7,661,201	414.0
2004-05	7,261,092	392.4
2005-06	7,436,070	401.8
2006-07	7,039,340	380.4
2007-08	7,132,608	385.4

Note:
These figures are not weather corrected.

Following an independent energy survey report in February 2008 a number of measures are under consideration which could lead to a significant reduction in consumption. These recommendations are under consideration for inclusion in the programme of works.

These figures differ slightly from those given in the answer to the hon. Member for Eastleigh (Chris Huhne) on 27 April 2007 for two reasons. Firstly, for this answer we obtained the gas and electricity consumption figures from invoices; in the previous response we used the same method to determine the electricity consumption but calculated the gas consumptions from meter readings and standard conversion factors. The gas invoices, though, have the more accurate consumption figures. Secondly, we have used a recently received, more accurate floor area for this answer than we used for the 2007 response.

INTERNATIONAL DEVELOPMENT

Africa: Energy

Mr. Drew: To ask the Secretary of State for International Development what practical assistance his Department has provided to countries in Africa to mitigate the adverse effects of rising energy prices. [219132]

Gillian Merron: Our aid spending in Africa is set to more than double, from £1.3 billion in 2004 to over £3 billion in 2010. DFID, through country and regional programmes, supports African countries' efforts to accelerate growth to reduce poverty. This helps our partner countries to cope with the rise in external fuel prices and mitigate the impact of these rises on the poor.

The UK supports the key international financial institutions which are leading an international response to this global challenge. The International Monetary Fund is helping with balance-of-payments support, and has so far provided additional financial assistance to five African countries. The World Bank is active in providing policy advice on regulatory efficiency and renewable energy, financial support through investments in energy, and in research on the drivers of energy price rises.

Burma: Politics and Government

Mr. Andrew Mitchell: To ask the Secretary of State for International Development what response his Department is making to the humanitarian situation in Chin State, western Burma. [220684]

Mr. Douglas Alexander: Food security in the already vulnerable Chin State dramatically worsened at the end of 2007 and early 2008 due to a rat infestation. The worst affected areas are the remote villages in townships along the Indian border in central and southern Chin—Tahntlang, Matupi and Paletwa townships.

The Department for International Development (DFID) is providing £4 million over four years to the United Nations Development Programme (UNDP) for its national Human Development Initiative, which includes work in all the townships of Chin State. A UNDP needs assessment team returned from Chin earlier this week. We will consider the case for further assistance to affected populations in Chin State through UNDP on the basis of their assessment.

In order to collect more information on needs and potential mechanisms for support, DFID officials have also met with local and international NGOS working in Chin State. DFID is also planning a mission to look at the work being done by Chin groups based in India to meet needs in Chin State.

Departmental Sick Leave

David Simpson: To ask the Secretary of State for International Development how many and what percentage of staff in his Department have had more than two periods of sickness of less than five days in each of the last three years. [218715]

Gillian Merron: The information for the last three calendars for home civil service staff is as follows:

In 2005, 276 staff had more than two periods of sickness of less than five days, this represents 14.7 per cent. of staff.

In 2006, 288 staff had more than two periods of sickness of less than five days, this represents 15.5 per cent. of staff.

In 2007, 213 staff had more than two periods of sickness of less than five days, this represents 11.1 per cent. of staff.

Developing Countries: Food

Mr. Drew: To ask the Secretary of State for International Development what recent estimate he has made of long-term trends in the price of food in developing countries; what assessment he has made of the contribution of *(a)* the price of fuel and *(b)* the effects of climate change to such trends; and if he will make a statement. [219131]

Mr. Douglas Alexander: The UK Government have been working closely with the major international organisations (World Bank, International Monetary Fund, UN agencies and International Food Policy Research Institute) in order to assess future price trends. Increased cereal production and the removal of export bans have brought about a recent calming of markets, and prices have fallen back from the very high levels seen earlier this year. But the consensus remains that the underlying demand for food remains strong, and according to the World Bank, this is likely to keep prices well above 2004 levels for most food crops until 2015.

The Government recently published a detailed analysis of the causes of recent price rises. High oil prices have put upward pressure on food prices by increasing production costs, through high fuel, fertiliser, transport, packaging, and processing costs. The World Bank estimates that a 10 per cent. rise in crude oil prices translates into a 1.6 per cent. increase in agricultural commodity prices. Weather has a direct impact on agricultural yields and food supplies. While recent food price rises cannot be linked directly with longer-term trends in climate change, there is no room for complacency. The UK Government will continue to push the international community for significantly higher investment in water management in developing countries, to ensure their agriculture is better prepared for the increasingly erratic weather patterns that are predicted.

The British Government remain concerned about the impact of high food prices on the poorest people in developing countries. We are pleased with the outcome at the recent G8 summit, where members committed $10 billion to improving global food security. We will continue to take a leading role in pressing for a coordinated and effective international response.

Diplomatic Service: Manpower

Mr. Hague: To ask the Secretary of State for International Development what his Department's 10 highest-staffed missions abroad are; and how many *(a)* UK-based and *(b)* locally-engaged personnel are employed in each. [218648]

Mr. Douglas Alexander: The 10 highest-staffed DFID offices are shown in the following table with breakdown of home civil servants (HCS), and staff appointed in country (SAIC—locally engaged staff), as at the end of June 2008.

Office	*HCS*	*SAIC*	*Total*
DFID Bangladesh	20	75	95
DFID India	20	69	89
DFID Nigeria	26	49	75
DFID Pakistan	20	32	52
DFID Ethiopia	19	33	52
DFID Nepal	14	36	50
DFID Malawi	12	36	48
DFID Democratic Republic of Congo	15	28	43
DFID Kenya and Somalia	10	32	42
DFID Uganda	11	29	40

Home Information Packs

Robert Neill: To ask the Secretary of State for International Development how many home information packs have been commissioned by *(a)* his Department and *(b)* its agencies to market a residential property; for which properties; at what cost; and whether a voluntary home condition report was purchased as part of the packs. [219014]

Mr. Malik: None. The requirement to prepare home information packs applies to the marketing for sale of residential properties. This Department has not been involved in any such transactions since 1 August 2007.

Languages

Mr. Hague: To ask the Secretary of State for International Development pursuant to the answer of 1 July 2008, *Official Report*, column 762W, on languages, how many of his departmental staff have received language training in each of the last three financial years; and if he will make a statement. [218797]

Gillian Merron: Requirements for language training are assessed by each overseas office and based upon business priorities. As such the Department for International Development (DFID) does not hold central records on language training, but according to our main external language training provider 130 staff have received training in the last 18 months. This is equivalent to 35 per cent. of home civil service staff posted overseas at any given time.

Mr. Ellwood: To ask the Secretary of State for International Development pursuant to the answer of 15 July 2008, *Official Report*, column 318W, on languages, how many *(a)* Pashto and *(b)* Dari speakers there are in his Department; and how many took a language course in each of the last two years. [220542]

Gillian Merron: In the Department for International Development five staff speak Pashto and two speak Dari. Our main language training provider has trained two staff in Dari and four in Pashto during 2006-07 and two staff in Dari during 2007-08.

Pakistan: Overseas Aid

Mr. Hague: To ask the Secretary of State for International Development to what *(a)* regions and *(b)* projects the new UK development assistance to border areas in Pakistan will be allocated; and what mechanisms will be used to monitor the use of such aid. [218647]

Mr. Douglas Alexander: The UK is already a major donor to North West Frontier Province (NWFP), one of two Pakistan provinces bordering Afghanistan. We will aim to do more there, as well as extend our work over the period of our new five-year country plan to the other border province, Balochistan, where problems of poverty, exclusion and insecurity are pronounced. We will also build on our work with the Secretariat responsible for co-ordinating the Government of Pakistan's development efforts in the Federally Administered Tribal Areas (FATA), which are some of the most inaccessible and insecure parts of Pakistan.

We will build government systems to help ensure basic services are delivered more efficiently and effectively. We will put more money into education to get more children into school, improve teaching, and provide the skills young people need to get jobs. We are already one of the leading donors to the health sector in Pakistan, and are committed to continuing to support national programmes that benefit the border areas, for example on mother and child health and in combating the spread of TB and polio. We will help build a stronger civil society to promote rights and ensure poor people receive the services they need.

DFID has a rigorous set of procedures to safeguard funding. Overall progress on the country programme is measured by means of quantifiable, time bound targets, supported by a detailed business plan. Individual programmes and projects also include a performance measurement framework with clear targets. Progress against these targets is assessed by means of annual reviews. These reviews, which also include a comprehensive risk analysis, ensure that DFID funds are being used effectively and are achieving their intended results.

WOMEN AND EQUALITY

Departmental Research

Bob Spink: To ask the Minister for Women and Equality what proportion of the Government Equalities Office's budget has been spent on research since its inception. [218070]

Barbara Follett: Since its establishment as a stand alone department on the 12 October 2007, the Government Equalities Office has spent 4.36 per cent. of its total expenditure on research activities. This figure includes the cost of research staff employed by the Government Equalities Office.

Departmental Waste

Mr. Jenkins: To ask the Minister for Women and Equality what steps the Government Equalities Office has taken since its establishment to reduce the volume of waste produced by it and sent to landfill. [215883]

Barbara Follett: The Government Equalities Office was officially established on 12 October 2007 and is based in Eland House London, which is the headquarters building of the Department of Communities and Local Government. Consequently GEO follows DCLG's policies and practices on the reduction of the volume of waste. DCLG's policies and practices seek to minimise the amount of waste that goes to landfill sites by ensuring, among other things, that food waste is separated for composting. DCLG estimate that since the introduction, in January 2008, of food waste composting in their kitchens, over 16 tonnes of food waste has been diverted from landfill. GEO also uses DCLG facilities for collecting cans, bottles, cardboard and plastics for recycling.

Single Equality Bill: Draft

Mr. Drew: To ask the Minister for Women and Equality when she plans to publish the draft Single Equality Bill; and what work has been done on the key principles of the Bill prior to discussion in Cabinet. [201391]

Barbara Follett: As my announcement in Parliament on 25 June made clear the Government remain committed to introducing an Equality Bill during this Parliament. The further policy considerations, and intensive stakeholder engagement, which the Government's comprehensive consultation on its proposals for an Equality Bill provoked mean that there are no plans to publish it in draft.

The key principles of the Bill have been subject to collective consideration by Ministers in the normal way and the Government will publish its response to the consultation in due course. This will make the intended content of the Bill clear and there will be ample time to scrutinise this as it makes its way through Parliament.

LEADER OF THE HOUSE

Abortion: Northern Ireland

Mr. Amess: To ask the Leader of the House (1) what *(a)* representations she has received and *(b)* discussions she has had since January 2008 with hon. and right hon. Members wishing to introduce an amendment to the Human Fertilisation and Embryology Bill to extend the Abortion Act 1967 to Northern Ireland; what response she gave; and if she will make a statement; [219746]

(2) with whom she discussed her decision to postpone consideration of the remaining stages of the Human Fertilisation and Embryology Bill prior to her announcement; and if she will make a statement. [219747]

Ms Harman: As Leader of the House and chair of the Cabinet Committee on Legislation, I have regular discussions with many hon. and right hon. Members on amending legislation.

I announced in my weekly Business Statement on 3 July, the provisional business for the week of 14 July, which included the Human Fertilisation and Embryology Bill. On the 10 July I confirmed to the House that consideration of the Employment bill would be brought forward.

Business managers regularly have to balance the need for the scheduling of all legislation that is outstanding.

Departmental Alcoholic Drinks

David Simpson: To ask the Leader of the House (1) what measures are in place in her Office to monitor expenditure on alcohol for hospitality purposes; [219594]

(2) what purchasing process is used by her Office for the procurement of alcohol for hospitality purposes. [219943]

Helen Goodman: All proposals to purchase alcohol for hospitality purposes need the prior approval of the Cabinet Office Finance Director. The purchase of alcohol, which may be via the Government Procurement Card, by invoice or by a staff claim is monitored by the Cabinet Office Financial Management Team.

It is important to emphasise that the official purchase and provision of alcohol is an unusual undertaking. Therefore, all expenditure, including that on hospitality, has to be incurred in accordance with the principles of Managing Public Money and the Treasury handbook on Regularity and Propriety.

Departmental Paper

David Simpson: To ask the Leader of the House what percentage of paper used *(a)* for photocopying and *(b)* in printed publications by her Office was from recycled sources in each of the last two years. [220741]

Helen Goodman: The Office of the Leader of the House of Commons has been part of the Cabinet Office since May 2007. All paper used for photocopying is 100 per cent. recycled with a post-consumer waste content of 100 per cent.

Prior to May 2007, 100 per cent. of paper used by the Leader of the House of Commons Office for photocopying was from recycled sources. Paper used for printed publications complies with the Government's Sustainable Procurement "quick wins" agenda, which states that "coated papers must contain a minimum of 60 per cent. recycled fibre and uncoated papers 100 per cent. recycled fibre". In practice most papers used comprise at least 75 per cent. recycled fibre for coated and 100 per cent. for uncoated.

Departmental Procurement

David Simpson: To ask the Leader of the House what her Office's policy is on requesting discounts from its suppliers in return for swift payment of invoices. [220429]

Helen Goodman: The Office of the Leader of the House of Commons is committed to the Better Payment Practice Code on prompt payment and aims to pay all undisputed invoices within the terms of the contract, usually 30 days from receipt of a valid invoice.

The Office of the Leader of the House of Commons does not request discounts from suppliers in return for swift payment of invoices.

Departmental Public Buildings

Mr. Hoban: To ask the Leader of the House which organisations have received *(a)* free and *(b)* discounted room hire from (i) her Office and (ii) its agencies in each of the last five years; and what the commercial value of the discount was in each case. [221590]

Helen Goodman: None.

Departmental Public Participation

Mr. Hoban: To ask the Leader of the House if she will list *(a)* the reviews and *(b)* public consultations initiated by her Department since 27 June 2007. [221364]

Ms Harman: Since 27 June 2007, the Leader of the House initiated the following, which could be considered a review or public consultation:

Review/public consultation	*Date announced*	*Reference in Official Report*
Draft Legislative Programme public consultation 2007	11 July 2007	Volume 462, column 1449
Review of European Scrutiny	25 October 2007	Volume 465, column 443
Review of Parliamentary pay and pensions conducted by Sir John Baker	16 January 2008	Volume 470, column 32WS
Review of topical debates	7 February 2008	Volume 471, column 83WS
Draft Legislative Programme public consultation 2008	14 May 2008	Volume 475, column 1385
Review of the Parliamentary Pension Scheme	17 June 2008	Volume 477, column 45WS
Parliamentary audit and practice assurance	16 July 2008	Volume 479, column 31WS

Departmental Responsibilities

Mr. Hoban: To ask the Leader of the House which projects her Office has commissioned from *(a)* think tanks and *(b)* charities in each of the last two years for which figures are available; what the aim of each project was; which think tank or charity was commissioned; and how much was paid. [221613]

Helen Goodman: None.

Disabled

Mr. Harper: To ask the Leader of the House how many and what proportion of staff in her Office are disabled; and what the average salary in her Office is of *(a)* full-time disabled staff, *(b)* full-time non-disabled staff, *(c)* part-time disabled staff and *(d)* part-time non-disabled staff. [220183]

Helen Goodman: The provision of personal information on disability is optional and is held on individual's electronic staff files. Owing to the nature and size of the Office, providing this information could result in the identification of individuals.

SOLICITOR-GENERAL

Appeals

Andrew Mackinlay: To ask the Solicitor-General when she plans to answer Question 214873, on applications for leave to appeal, tabled on 25 June 2008. [220843]

The Solicitor-General: This has been answered today.

Appeals: Central Government

Andrew Mackinlay: To ask the Solicitor-General pursuant to the answer of 21 May 2008, *Official Report*, column 352W, on appeals: central Government, which departments the Treasury Solicitor's Department represents in their applications for leave to appeal; and how many such applications the Treasury Solicitor's Department handled in the last 12 months. [214873]

The Solicitor-General: The Treasury Solicitor's Department acted on behalf of most central Government Departments on various legal matters during 2007-08. Data specifically on applications for leave to appeal to the House of Lords (both in terms of the number of applications and which client Department they relate to) are not maintained by the Treasury Solicitor's Department. Furthermore, as there has been no call from client Departments for this information in the past, the Treasury Solicitor has consequently not been able to justify the commitment of public funds to collate and record these applications in the form requested. The information requested can be provided only at disproportionate cost.

BAE Systems

Adam Price: To ask the Solicitor-General what progress the Serious Fraud Office has made in its investigations into allegations against BAe Systems; and if she will make a statement. [219216]

The Solicitor-General: The Serious Fraud Office is continuing to investigate alleged offences involving BAE Systems plc. Further comment cannot be made for cases currently under investigation.

Departmental Alcoholic Drinks

David Simpson: To ask the Solicitor-General what measures are in place in the Attorney-General's Office to monitor expenditure on alcohol for hospitality purposes. [219589]

The Solicitor-General: Expenditure is only incurred when Ministers host special events for external parties. This occurs infrequently and expenditure is approved by the Director of Finance.

David Simpson: To ask the Solicitor-General what purchasing process is used by the Law Officers' Departments for the procurement of alcohol for hospitality purposes. [219939]

The Solicitor-General: When alcohol is provided for hospitality purposes it is purchased through each Department's catering contractors. These contractors are procured according to Government guidelines and expenditure has to be incurred in accordance with the principles of Managing Public Money and the Treasury handbook on Regularity and Propriety.

Departmental Public Buildings

Mr. Hoban: To ask the Solicitor-General which organisations have received *(a)* free and *(b)* discounted room hire from the Attorney-General's Office in each of the last five years; and what the commercial value of the discount was in each case. [221599]

The Solicitor-General: The Attorney-General's Office does not hire out rooms to other organisations.

Departmental Sick Leave

Mr. Hayes: To ask the Solicitor-General how many working days have been lost due to sickness amongst employees for which the Law Officers Department is responsible in each year since 1997. [218046]

The Solicitor-General: The following tables provide the details of the number of working days lost due to sickness. These are broken down by the different Departments as records are not held in the same way.

Attorney-General's Office, Treasury Solicitors Department and HM Crown Prosecution Service Inspectorate

Calendar year	*Average working days lost per person*
2003	5.5
2004	5.1
2005	7.2
2006	7.1
2007	

Note:
Records prior to 2003 are not available.

Crown Prosecution Service

Calendar year	*Average working days lost per person*
2001	8.9
2002	8.8
2003	9.2
2004	8.0
2005	9.7
2006	9.9
2007	10.0

Revenue and Customs Prosecutions Office

Calendar year	*Average working days lost per person*
2005 (April to December)[1]	4.5
2006	4.5
2007	4.3
2008 (January to March)	7.2

[1] RCPO was created on 18 April 2005.

Serious Fraud Office

Financial year	*Average working days lost per person*
2000-01	6.1
2001-02	5.2
2002-03	9.5
2003-04	14.6
2004-05	11.3
2005-06	6.2
2006-07	8.3
2007-08	8.1

Lost Working Days

Mr. Hayes: To ask the Solicitor-General how many working days have been lost due to industrial action by employees for which the Law Officer's Department is responsible in each year since 1997. [218057]

The Solicitor-General: The following tables provide the details of the number of working days lost due to industrial action. These are broken down by the different Departments as records are not held in the same way. Revenue and Customs Prosecutions Office has lost 22 working days due to industrial action since its creation in April 2005.

Attorney-General's Office, Treasury Solicitors Department and HM Crown Prosecution Service Inspectorate

Financial year	*Total days lost*
2006-07	42
2007-08	30

Note:
Figures for earlier years are not available.

Crown Prosecution Service[1]

Calendar year	*Total days lost*
2001	1,005
2002	0
2003	0
2004	1,040
2005	0
2006	0
2007	2,089

[1] The HR recording system counts industrial action as special leave without pay. The figures above will therefore include genuine cases of special leave.

Serious Fraud Office[1]

Financial year	*Working days lost*
2006-07	1
2007-08	1

[1] The SFO records only show the number of industrial actions which SFO staff participated in, not how many staff were absent from work on these days.

Prosecutions: Hunting Act

Mr. MacDougall: To ask the Solicitor-General what training on the provisions of the Hunting Act 2004 staff of the Crown Prosecution Service receives. [220796]

The Solicitor-General: Prosecutors in the Crown Prosecution Service (CPS) do not receive specific training on the Hunting Act 2004. However, the CPS has provided guidance for prosecutors on the Hunting Act 2004. The guidance provides advice on: the offences created under the legislation; the statutory defences available; police powers; and the evidential and public interest issues that arise. The guidance is kept under close review, and it is updated to take account of developments in case law and any other relevant changes.

In addition, all prosecution decisions are subject to the evidential and public interest tests, set out in the Code for Crown Prosecutors.

Serious Fraud Office: Manpower

Mr. Djanogly: To ask the Solicitor-General what proportion of Serious Fraud Office staff are *(a)* lawyers, *(b)* accountants and *(c)* police officers; and what the equivalent numbers were on 31 December 2007. [215308]

The Solicitor-General: The Serious Fraud Office (SFO) does not keep separate records of the number of police officers or accountants that it employs. Both police officers and accountants can work in the capacity of financial investigators at the SFO. On 18 July 2008, the following numbers of staff by category specified was as follows:

Job role	*Number of staff*	*Proportion of total staff*[1] *(percentage)*
Investigators	117	39
Lawyers	58	19

[1] Based on 299 permanent members of staff in post on 18 July 2008.

On 31 December 2007, the following numbers of staff by category specified was as follows:

Job role	*Number of staff*	*Proportion of total staff*[1] *(percentage)*
Investigators	118	39
Lawyers	58	19

[1] Based on 300 permanent members of staff in post on 31 December 2007.

CULTURE, MEDIA AND SPORT

Arts: Leicester

Sir Peter Soulsby: To ask the Secretary of State for Culture, Media and Sport how many projects and organisations in Leicester have received Arts Council funding in the last 12 months. [215731]

Margaret Hodge: According to the Arts Council, in 2007-08, 11 organisations in Leicester received grants on a regularly funded basis and nine projects were funded through its Grants for the Arts programme.

Arts: Wales

Hywel Williams: To ask the Secretary of State for Culture, Media and Sport how much was spent by publicly-funded bodies for which his Department is responsible on the promotion of Welsh culture overseas, in each of the last five years for which figures are available, broken down by country. [216916]

Margaret Hodge *[holding answer 7 July 2008]:* My Department provides grant in aid to VisitBritain to promote Britain, including Wales, abroad.

It is not possible to disaggregate precisely how much of the campaign material, or its cost, could be regarded as promoting specifically Welsh culture but VisitBritain supports a wide range of Welsh cultural events, through its international media campaigns, and website, including the National Eisteddfod, the Ruthin Festival and the Festival of Daffodils.

VisitBritain works closely with Visit Wales and other culture and heritage partners in Wales to help ensure the widest possible promotion of cultural events in Wales, and Britain as a whole, for the international visitor. VisitBritain's Los Angeles office is currently working with Visit Wales to promote cultural messages about Wales around the film 'Edge of Love', the Dylan Thomas biopic which received funding from the UK Film Council.

Betting Shops

Mr. McCartney: To ask the Secretary of State for Culture, Media and Sport how many betting shops in each region have been visited as part of the Gambling Commission Annual Visit Programme since September 2007; how many such shops in each region were found to be at risk of non-compliance with each of the Gambling Commission's three licensing objectives; what enforcement action has been taken; and if he will make a statement. [219545]

Mr. Sutcliffe *[holding answer 17 July 2008]:* The Gambling Commission has provided a regional breakdown of the number of betting premises visited as part of their compliance programme. Additional visits may have been made outside of the compliance programme to other betting premises to consider, for example, a specific complaint.

	Number of premises visited since 1 September[1]
London and South East	217
Midlands	172
North East	115
North West and North Wales	174
Scotland	78
South West and South Wales	119

[1] As at 31 May 2008.

In many cases, time has been taken as part of an initial compliance visit to further educate operators about compliance with the requirements of the Gambling Commission's licence conditions and codes of practice.

Repeat visits have then been used to establish whether appropriate steps have been taken.

To date, there have been nine referrals of bookmakers licensed to operate betting shops for further investigation under section 116 of the Gambling Act by the Gambling Commission's enforcement team. For operational reasons it would not be appropriate to go into the detail of these ongoing cases. If formal regulatory action is taken, details will be published on the Gambling Commission's website at:

www.gamblingcommission.gov.uk

Cultural Relations: Finance

Mr. Hunt: To ask the Secretary of State for Culture, Media and Sport what funding his Department plans to provide to the Connections through Culture initiative in the next three years. [219727]

Margaret Hodge: The Department for Culture, Media and Sport will continue its commitment of £100,000 per annum to China: UK Connections through Culture for a second term, 2009-12.

Departmental Alcoholic Drinks

David Simpson: To ask the Secretary of State for Culture, Media and Sport what measures are in place in his Department to monitor expenditure on alcohol for hospitality purposes. [219603]

Mr. Sutcliffe: All expenditure on hospitality (inclusive of alcohol) is governed by the Department's general finance and accounting rules, where budget holders are required to scrutinise and agree areas of spend in accordance with clearly defined guidelines.

David Simpson: To ask the Secretary of State for Culture, Media and Sport what purchasing process is used by his Department for the procurement of alcohol for hospitality purposes. [219950]

Mr. Sutcliffe: The purchasing of alcohol is normally connected with departmental events, which is procured through either in house or external caterers according to pre-determined specification used when asking for quotations for hospitality. It is normally supplied on a sale or return basis. For ad-hoc requirements the purchasing can be undertaken using the Government Procurement Card, in accordance with normal departmental guidelines for using the card.

Departmental Official Cars

Stephen Hammond: To ask the Secretary of State for Culture, Media and Sport which make and model of car he has chosen as his Ministerial car to be provided by the Government Car and Despatch Agency. [217751]

Mr. Sutcliffe: I refer the hon. Member to the answer given to him by the Parliamentary Under-Secretary for Transport on 16 July 2008, *Official Report*, column 414W.

Departmental Procurement

David Simpson: To ask the Secretary of State for Culture, Media and Sport what his Department's policy is on requesting discounts from its suppliers in return for swift payment of invoices. [220438]

Mr. Sutcliffe: The Department does not have a specific policy on requesting discounts from its suppliers in return for swift payment. However the majority of goods and services are purchased through the OGC "Catalist" frameworks, where discounted rates are already secured as a result of the volume of Government spending activity.

Departmental Retirement

Mr. Marsden: To ask the Secretary of State for Culture, Media and Sport how many employees of his Department have been asked to retire on reaching 65 years of age in each year since 2000. [218406]

Mr. Sutcliffe: In the Department for Culture, Media and Sport the default retirement age was 60 until 1 October 2006 when it became 65. In 2008 two employees retired at reaching 65. No other employees have retired on reaching age 65 since 2000.

Digital Broadcasting

Mr. Hunt: To ask the Secretary of State for Culture, Media and Sport what proportion of *(a)* the UK, *(b)* England, *(c)* Wales, *(d)* Scotland and *(e)* Northern Ireland (i) was covered by a minimum acceptable digital radio signal in (A) 2006 and (B) 2007 and (ii) will be so covered in 2008. [216534]

Margaret Hodge *[holding answer 7 July 2008]:* Digital radio is available nearly universally across the United Kingdom over satellite and the internet, and over Freeview to approximately 73 per cent. of the population. But the principal means of receiving digital radio is on the digital audio broadcasting (DAB) platform and coverage varies between multiplexes: the two national multiplexes, one commercial and one BBC, and the 58 individual local multiplexes.

DAB coverage is principally measured by population rather than geographic area, but there is no single definition of a "minimum acceptable digital radio signal". However, I understand that approximately 90 per cent. of the UK population currently have some access to DAB services on at least one multiplex. The BBC are in the process of building a number of new transmitters to ensure that their multiplex reaches at least 90 per cent. of the population by the end of this Charter period in 2012, and I have asked them to write to the hon. Member setting out the detail of their existing and planned coverage.

The coverage data which Ofcom have gathered in relation to the other multiplexes are set out in their Communications Market Report and are summarised in the following table. Data for 2008 are not yet available.

The Digital Radio Working Group has identified both population and geographic coverage as crucial to the success of DAB and I welcome their proposal to examine these matters further in working towards their final report to me at the end of the year.

Percentage

	UK	England	Scotland	Wales	N Ireland
2006					
National commercial multiplex	86	89	76	53	0
Combined local commercial multiplexes[1]	89	92	92	73	100
2007					
National commercial multiplex	88	93	76	67	0
Combined local commercial multiplexes	n/a	n/a	n/a	n/a	n/a

n/a = not available

[1] These figures show the potential coverage if rolled out to 100 of the licensed area.

Mr. Charles Kennedy: To ask the Secretary of State for Culture, Media and Sport what estimate he has made of the number and distribution of households expected to be unable to receive a television signal, either via satellite or via terrestrial services, after the digital switchover has taken place. [218131]

Andy Burnham: At switchover, it is expected that UK-wide coverage levels for digital terrestrial television (DTT) will reach that of present analogue services which is 98.5 per cent. of households. Digital satellite services are available to 98 per cent. of UK households.

Ofcom has advised that the 1.5 per cent. of homes (approximately 375,000 households) who will not be able to receive a fully reliable digital terrestrial signal are overwhelmingly those not covered by the existing analogue terrestrial services and in general already obtain their television services from an alternative platform, such as satellite or using self-help transmitters.

Ofcom is continuing to look for ways to improve coverage in areas where they know there is likely to be a problem and to work with Digital UK to ensure that those affected know what their options are.

Mr. Harper: To ask the Secretary of State for Culture, Media and Sport what recent estimate has been made of the number of households which have switched over to digital television in *(a)* Forest of Dean constituency, *(b)* Gloucestershire and *(c)* the UK. [220200]

Andy Burnham: In their recently published Digital Television Update, Ofcom estimate that 87.1 per cent. (c. 22 million) of UK households had digital television at the end of Q1 2008.

A regional breakdown of these figures is not available.

Mr. Harper: To ask the Secretary of State for Culture, Media and Sport what recent assessment has been made of the effect of recent changes in the cost of living and disposable household income on households' preparation for digital switchover. [220214]

Andy Burnham: Research suggests that age and disability are the most important indicators of lower digital TV take up and there is no evidence to indicate that cost of switchover is prohibitive or a barrier to conversion. Research by Ofcom's Advisory Committee on Older and Disabled People suggested that low income alone is not likely to prevent people preparing for switchover.

There are a number of options for switching to digital and the cost will vary depending on what TV service and TV equipment is chosen. Digital terrestrial set top boxes, for example, start from around £20.

Digital Radio Working Group

Mr. Hunt: To ask the Secretary of State for Culture, Media and Sport if he will publish the evidence the Independent Digital Radio Working Group considered in preparation of its interim report. [218863]

Andy Burnham: The evidence considered by the Digital Radio Working Group (DRWG) in preparing for the interim report was commissioned independently by the DRWG. Therefore, it is right for the DRWG, not my Department, to decide whether this evidence is made public.

Digital Switchover Help Scheme

Mr. Harper: To ask the Secretary of State for Culture, Media and Sport what recent estimate has been made of the number of *(a)* people aged over 75 and *(b)* disabled people who have taken advantage of the digital switchover help scheme in *(a)* Forest of Dean constituency, *(b)* Gloucestershire and *(c)* the UK. [220212]

Andy Burnham: The digital switchover help scheme assisted 2,616 people in Copeland, Cumbria. The help scheme has just begun to assist people in the Selkirk transmitter area within the Border TV region and full take up figures will be published after the help scheme closes for that area in December. Gloucestershire, including the Forest of Dean, does not switch until 2010 and eligibility for the help scheme will start eight months before the first transmitter switch in that region. The way in which the help scheme was provided with information for Copeland means that data on the breakdown between those aged 75 or over and those who are disabled are not readily available. The help scheme is considering how best to make such information available in future, consistent with its data protection duties.

Digital Switchover Help Scheme: Data Protection

Mr. Don Foster: To ask the Secretary of State for Culture, Media and Sport what restrictions there are on the use by stakeholders involved with the delivery of the Digital Switchover Help Scheme of personal data supplied to them in connection with the scheme. [220687]

Andy Burnham: Access to data must be in accordance with The Digital Switchover (Disclosure of Information) Act 2007. Information disclosed under the Act is strictly for use in connection with 'switchover help functions' and there are criminal penalties for unlawful disclosure.

The powers to disclose information will effectively lapse once the switchover process is completed. Before processing the information, DWP and local authorities will need to satisfy themselves that the security and IT procedures in place for handling the data are appropriate. A Memorandum of Understanding exists between DWP and the scheme administrator to ensure that the data are processed in accordance with the law, including compliance with the Data Protection Act 1998.

Disabled

Mr. Harper: To ask the Secretary of State for Culture, Media and Sport how many and what proportion of staff in *(a)* his Department and *(b)* the executive agencies for which he is responsible are disabled; and what the average salary in his (i) Department and (ii) executive agencies is of (A) full-time disabled staff, (B) full-time non-disabled staff, (C) part-time disabled staff and (D) part-time non-disabled staff. [220190]

Mr. Sutcliffe: The information is as follows:

i) DCMS has 14 (3 per cent.) staff who have declared a disability across the grades. The Royal Parks Agency have 2 (2 per cent.) of staff who have declared a disability.

ii) There is no difference between the average salary of a disabled and non disabled member of staff in either full-time or part-time posts in DCMS or the Royal Parks Agency.

Festivals and Special Occasions: Finance

Andrew Rosindell: To ask the Secretary of State for Culture, Media and Sport how many requests his Department received for funding to be allocated to the promotion and celebration of specific celebratory days in 2007. [218526]

Margaret Hodge: Information is not held on the number of direct requests to my Department for funding to be allocated for the promotion and celebration of specific days in 2007. As the majority of DCMS funding is channelled through our NDPBs, it is possible that these bodies may have received direct requests for funding, but that information could be provided only at disproportionate cost.

Gambling

Mr. Don Foster: To ask the Secretary of State for Culture, Media and Sport with reference to his Department's press release 131/04, on the publication of the Gambling Bill, how many mystery shopper surveys the Gambling Commission has conducted since its creation; when these surveys were carried out; and if he will place a copy of the results in the Library. [219695]

Mr. Sutcliffe: The Gambling Commission conducted a pilot mystery shopping exercise last summer on remote sites operated by prospective licensees and others. At that stage many operators were changing their systems to comply with the commission's prospective licence conditions and codes of practice. Using the approach developed in the pilot, the commission now has an ongoing programme of mystery shopping on remote sites provided under a commission licence as part of its compliance programme. I will ask the chief executive of the Gambling Commission to write to the hon. Member on this matter and to place a copy of that letter in the Library of the House.

Gambling: Young People

Mr. Don Foster: To ask the Secretary of State for Culture, Media and Sport what recent research his Department has commissioned into levels of gambling amongst young people aged *(a)* between 16 and 18 and *(b)* under 16 years. [219686]

Mr. Sutcliffe: The British Gambling Prevalence Survey (BGPS) 2007, commissioned by the Gambling Commission, provides data on participation in gambling and the prevalence of problem gambling in Britain among the adult population aged 16 and above. The Gambling Commission have also commissioned a literature review of children and gambling which is due to be published in the summer. The National Lottery Commission's (NLC) ongoing research programme includes regular tracking surveys of 12-to-15 year-olds to monitor underage play of the national lottery. This research includes information on underage participation in other gambling activities. The NLC are in the tender process for the next survey which is due to be published in summer 2009.

Government Olympic Executive: Manpower

Mr. Don Foster: To ask the Secretary of State for Culture, Media and Sport how much was spent on staffing for the Government Olympic Executive in each year since 2004. [219270]

Mr. Sutcliffe: The cost of staffing the Government Olympic Executive (and its predecessor, the Olympic Games Unit until May 2006) in each financial year since 2004-05 is as follows (including salaries, national insurance and pension contributions and agency staff).

Financial year	*Staff costs (£ million)*
2004-05	0.35
2005-06	1.09
2006-07	2.76
2007-08	4.67

Sports: Children

Helen Southworth: To ask the Secretary of State for Culture, Media and Sport what recent discussions he has had with ministerial colleagues on the benefits for children and young people of participation in organised sport; and if he will make a statement. [219651]

Andy Burnham: I have engaged with ministerial colleagues including the Prime Minister and the Secretary of State for Children, Schools and Families on a number of initiatives relating to the participation of children in organised sport and the resultant benefits. These include the launch of the Sport England strategy, and the Legacy Action Plan for the 2012 Olympic and Paralympic Games "Before, during and after: making the most of the London 2012 Games".

Additionally, regular meetings take place between the Minister for Sport and the Parliamentary Under Secretary of State for Children, Young People and Families, the Ministers jointly responsible for PE and Sports Strategy for Young People (PESSYP).

Television: Advertising

Dr. Kumar: To ask the Secretary of State for Culture, Media and Sport what estimate he has made of the revenue generated from product placement on ITV in the last 12 months. [219858]

Andy Burnham: Ofcom's Broadcasting Code does not allow ITV or other UK commercial TV companies to reach product placement deals with advertisers. The Government's estimate therefore of the revenue generated from product placement on ITV is nil.

Television: Smoking

David Taylor: To ask the Secretary of State for Culture, Media and Sport (1) if he will discuss with those involved in the production of entertainment media the possible relationship between the on-screen depiction of smoking and rates of smoking among young people; [219750]

(2) whether he has received recent representations on the classification of films which show positive images of smoking. [219751]

Margaret Hodge *[holding answer 17 July 2008]:* The depiction of smoking in films is covered by the guidelines for the British Board of Film Classification, which were reviewed in 2005 after extensive public consultation and were updated accordingly. Any films which are found to be (1) aimed at children and (2) "Works which promote or glamorise smoking" receive a restricted rating. We have no plans at present to examine the impact on screen depiction of smoking but we do of course, keep these matters under constant review.

UNESCO Convention on Protection of Underwater Cultural Heritage

Mr. Andrew Smith: To ask the Secretary of State for Culture, Media and Sport what assessment he has made of the cultural effects of ratification of the UNESCO Convention on the Protection of the Underwater Cultural Heritage. [220612]

Margaret Hodge: The UK Government have already adopted the Annex of the Convention on the Protection of the Underwater Cultural Heritage as best practice for archaeology. Although we keep the matter under review. We do not believe that the case for ratification by the UK has been made.

INNOVATION, UNIVERSITIES AND SKILLS

Departmental Official Cars

Stephen Hammond: To ask the Secretary of State for Innovation, Universities and Skills which make and model of car he has chosen as his ministerial car to be provided by the Government Car and Despatch Agency. [217747]

Mr. Lammy: I refer the hon. Member to the reply given by my hon. Friend the Parliamentary Under-Secretary of State for Transport on 16 July 2008, *Official Report*, column 414W.

Funding: Energy Generation

Jo Swinson: To ask the Secretary of State for Innovation, Universities and Skills (1) how much funding his Department has provided through the Technology Strategy Board for projects relating to *(a)* energy generation, *(b)* renewable energy generation, *(c)* energy transmission and *(d)* energy efficiency, broken down by region in each year since its inception; [217832]

(2) how much funding his Department has provided through grants for research and development for projects relating to *(a)* energy generation, *(b)* renewable energy generation, *(c)* energy transmission and *(d)* energy efficiency in each of the last five years, broken down by region. [217929]

Ian Pearson *[holding answer 10 July 2008]:* The following tables cover funding provided to projects relating to energy generation, renewable energy generation and energy transmission. No figures are provided for energy efficiency however as a significant proportion of the Technology Strategy Board's current portfolio of 750 projects with a combined business and Government investment of over £1 billion, are driven by considerations of efficiency, both energy and natural resource. Identifying relevant projects and providing a regional breakdown for these can be achieved only at disproportionate cost.

The funding identified in the tables cover grants awarded by Energy Group in the then DTI, both prior to, and following the establishment of the advisory Technology Strategy Board, to October 2004. It also includes grants awarded by the executive Technology Strategy Board, established on 1 July 2007. It does not include grants awarded in the area of clean coal technologies, worth £5 million in 2003-04, and approximately £6.5 million in 2004-05. Identifying and providing a regional breakdown for these projects can be achieved only at disproportionate cost.

The regional breakdown provided relates to the location of the lead partner in a consortium. It does not therefore reflect the funding provided to organisations based in each of the regions.

Energy generation

Higher Education: Finance

Mr. Willetts: To ask the Secretary of State for Innovation, Universities and Skills what options, other than reducing funding on students studying for an equivalent or lower qualification, were presented by the Higher Education Funding Council for England as alternative ways to raise funding for new higher education priorities. [219466]

Bill Rammell: The Government considered a number of policy options in the course of the comprehensive spending review, as would be expected. We decided to alter the rules for the payment of teaching grant to give a greater priority to first-time students in higher education because this is intrinsically a fairer way to spend public money, and because doing so is consistent with our ambitions for higher level skills and increased access to higher education. Other ways of releasing more funding to support new students would have been providing less money for student support; reducing the unit of funding for teaching; or cutting back, on funding for research.

Maize Production in Africa

Mr. Walter: To ask the Secretary of State for Innovation, Universities and Skills what assessment his Department made of the accuracy of the statement by the Chief Scientific Adviser broadcast on 27 November 2007 that the push-pull system of maize production in Africa involved genetically modified crops; what steps his Department took to correct the elements of the statement which have been demonstrated to be inaccurate; and if he will make a statement. [219249]

Ian Pearson *[holding answer 16 July 2008]:* In the Daily Mail on 18 December 2007, the then Government Chief Scientific Adviser Sir David King was reported as acknowledging that he had made an honest mistake about the push-pull system of maize production. The technique, which has been developed by Rothamsted Research and local research institutes in Africa, does not currently involve genetic modification of the crops. Under the technique, repellent crops are planted between

the rows of maize to drive the stemborer pests away from the maize ("push") in combination with plants around the field that attract stemborers away from the maize ("pull"). Rothamsted Research reports that trials in Kenya and Uganda have helped participating farmers increase their maize yields by 20 to 50 per cent.

One of the "push" plants also controls a parasitic plant, the African witchweed, that otherwise causes even greater crop losses. The genetic basis of the mechanism is being studied by Rothamsted Research and its African collaborators under new funding from the Department for International Development and the Biotechnology and Biological Sciences Research Council.

Space Technology

Mr. Evans: To ask the Secretary of State for Innovation, Universities and Skills what the sterling value of the UK space industry was in *(a)* 1998 and *(b)* 2007. [220151]

Ian Pearson: A biennial study of the UK space industry is undertaken by the British National Space Centre. The nearest available figures for the total turnover of the UK space industry are £3 billion and £4.8 billion for 1999-2000 and 2004-05 respectively.

Mr. Evans: To ask the Secretary of State for Innovation, Universities and Skills what proportion of the global market for space products and satellite-enabled services he estimates will be provided by UK enterprises by 2015. [220154]

Ian Pearson: No estimate of the proportion of the global space market that will be provided by UK enterprises by 2015 has been made. The British National Space Centre (BNSC) undertakes a biennial survey of the UK space industry and the latest published results, which are for 2004-05, indicate that the UK share of the global market at that time was 7 per cent. The UK Civil Space Strategy 2008-12 published earlier this year contains an objective to grow the UK share by 2015. This is a challenging objective as the market itself is growing at between 12 and 15 per cent. per year.

Mr. Evans: To ask the Secretary of State for Innovation, Universities and Skills what recent assessment he has made of the effectiveness of the British National Space Centre's UK Civil Space Strategy in encouraging exports of British technology and high value-added services. [220155]

Ian Pearson: A biennial study of the UK space industry is undertaken by the British National Space Centre (BNSC). The latest information available is for the year 2004-05 and shows sales outside the UK at £1.28 billion. BNSC works with industry and UKTI through its Trade Promotion and International Collaboration advisory group to provide effective support to industry in export markets.

Students: Loans

Stephen Williams: To ask the Secretary of State for Innovation, Universities and Skills how much was repaid to graduates who *(a)* were paying off their loans and *(b)* had paid off their loans as a result of overpayments to the student loans company in each year since 2001. [206302]

Bill Rammell *[holding answer 15 May 2008]:* The number of student loan borrowers who have received refunds for over-repayments made in each year since 2001 are set out in Table A.

Table B shows that the number of borrowers making over-repayments from 2001-02 to 2006-07 amounted to 3 per cent. of all borrowers making repayments over this period. The table also shows the amount refunded to borrowers who over-repaid over the same period amounted to just 1 per cent. of the total amounts repaid by all student loan borrowers.

There are a variety of circumstances why borrowers overpay but this mainly occurs when loans come to the end of repayment. Over-repayments from mortgage style borrowers will only arise once their loan has been cleared where the borrower has failed to cancel repayment arrangements with their bank.

For student loan borrowers with income contingent repayment loans, repayments are predominantly made through the tax system. Due to the time lag in the Student Loans Company (SLC) receiving information from HM Revenue and Customs it is possible for borrowers to over-repay before the SLC becomes aware that their repayments should stop.

Where the pattern of payments shows that repayment will be completed during the coming year, the SLC invites borrowers to get in touch to discuss when repayments should stop. Borrowers are then able to make manual repayments. If they do not respond promptly to the SLC, or ignore the invitation, they will probably overpay.

From June this year the SLC is introducing a new website facility specifically for repaying customers. This will give borrowers the ability to view their most current statement and it will also give them the chance to calculate their balance based on what they can see in their payslips.

The SLC is working on further improving the loan end process and has been asked to put in place arrangements which will reduce the number of borrowers over-repaying at the end of repayment. Those arrangements, which are likely to be voluntary, are expected to be in place towards the end of next year.

Any borrower who has repaid, should contact the SLC immediately to obtain a full refund with interest. All refunds include interest at the same (Retail Price Index) rate that was charged on the loan.

Table A: Number of student loan borrowers who have received refunds due to making over-repayments

	(a) Borrowers paying off their loan		*(b) Borrowers who have paid off their loan*			
Financial year	*Number overpaying*	*Amount repaid (£)*	*Number overpaying*	*Amount repaid (£)*	*Total number of borrowers receiving refunds for overpayments*	*Total refund amounts (£)*
2001-02	12,300	1,569,000	3,600	394,000	15,900	1,963,000

Table A: Number of student loan borrowers who have received refunds due to making over-repayments

	(a) Borrowers paying off their loan		(b) Borrowers who have paid off their loan			
Financial year	*Number overpaying*	*Amount repaid (£)*	*Number overpaying*	*Amount repaid (£)*	*Total number of borrowers receiving refunds for overpayments*	*Total refund amounts (£)*
2002-03	10,000	1,472,000	4,700	853,000	14,700	2,325,000
2003-04	6,300	982,000	10,800	2,563,000	17,600	3,545,000
2004-05	6,300	934,000	12,000	4,439,000	18,300	5,374,000
2005-06	5,600	580,000	19,400	6,898,000	25,000	7,679,000
2006-07	4,100	588,000	15,400	8,230,000	19,600	8,817,000
2007-08	2,800	434,000	19,900	12,643,000	22,700	13,077,000
Total	48,100	6,759,000	85,700	36,021,000	133,779	42,780,000

Notes:
1. Includes all customers (income contingent and mortgage style) who have passed their Statutory Repayment Due Date (SRDD) irrespective of their current status.
2. English domiciled customers only.

Trade Associations

Mr. Carmichael: To ask the Secretary of State for Innovation, Universities and Skills when his Department plans to publish the results of the consultation on the introduction of representative actions for trade associations which began in 2006. [211744]

Ian Pearson: The Patent Office (now the UK Intellectual Property Office) consulted on Representative Actions for the Enforcement of Intellectual Property Rights in 2006, and this consultation closed in December 2006. A variety of views were expressed in response. However further work on this area needs to take account of the outcome of an inter-departmental consultation planned by he Ministry of Justice on the subject of representative actions. Decisions on the way forward following the IPO's consultation will need to await the outcome of the work to be carried by MOJ.

Universities: Post Offices

Alan Duncan: To ask the Secretary of State for Innovation, Universities and Skills what assessment he has made of the use that *(a)* international and *(b)* disabled students make of post office branches located on university campuses. [220842]

Bill Rammell: The Department holds no records of the number of post office branches on university campuses nor of their usage by students.

HEALTH

Colorectal Cancer: Screening

Mr. Baron: To ask the Secretary of State for Health (1) how many patients screened were found to have bowel cancer in each month since the start of the NHS bowel cancer screening programme, broken down by *(a)* screening centre and *(b)* sex; [220672]

(2) how many patients screened were found to have polyps in each month since the start of the NHS bowel cancer screening programme, broken down by *(a)* screening centre and *(b)* sex; [220673]

(3) how many patients screened were referred for a colonoscopy as a result of a positive faecal occult blood test in each month since the start of the NHS bowel cancer screening programme, broken down by *(a)* screening centre and *(b)* sex. [220674]

Ann Keen: As at 25 May 2008, 749,710 men and women had completed a bowel screening testing kit as part of the programme. Information on the number of colonoscopies and other tests performed, number of polyps removed and number of bowel cancers diagnosed in each month since the start of the NHS Bowel Screening Programme broken down by screening centre has been placed in the Library. It is not currently possible to break this information down by gender.

Dementia

Mr. Evans: To ask the Secretary of State for Health how many people resident in registered care homes for the elderly in *(a)* Ribble Valley constituency, *(b)* Lancashire and *(c)* England and Wales had dementia in each year since 2001. [220632]

Dawn Primarolo: The information requested is not collected centrally.

Dementia: Health Services

Mr. Jenkins: To ask the Secretary of State for Health what recent steps the Government have taken to improve NHS healthcare services for dementia sufferers. [215759]

Mr. Ivan Lewis: Dementia is a Government priority and we are presently consulting on a draft national dementia strategy and implementation plan. Also through our 'Let's Respect' campaign, which provides comprehensive guidance and training for general hospital staff, we aim to raise awareness and improve standards of care for people with dementia in hospital settings.

Dental Services: Waiting Lists

Linda Gilroy: To ask the Secretary of State for Health how many people were waiting for NHS dental treatment in Plymouth Primary Care Trust area in the latest period for which figures are available; and if he will make a statement. [220675]

Ann Keen: Information on the number of people waiting for national health service dental treatment is not collected centrally. It is for primary care trusts (PCTs) to make local arrangements to support patients in accessing NHS dental services. My hon. Friend may therefore wish to raise this issue with the Chief Executive of Plymouth Teaching PCT.

Departmental Buildings

Pete Wishart: To ask the Secretary of State for Health on which buildings occupied by his Department's agencies and non-departmental public bodies the lease will be due for renewal in the next four years. [214688]

Mr. Bradshaw: The information requested is shown in the following table:

Arm's length body	*Property name*	*Town*	*Holding name*	*Lease expiry date*
Commission for Social Care Inspection (CSCI)	South Point, Cardinal Square	Derby	Ground Floor	14 November 2011
CSCI	The Point	Lincoln	Whole building (Ground and 1st Floor)	21 February 2012
CSCI	Fairfax House	Colchester	First Floor offices and 17 car spaces	26 October 2010
CSCI	Clifton House	Bedford	Ground floor	27 September 2011
CSCI	St Vincent's House	Ipswich	Fifth Floor	22 November 2011
CSCI	Cavell House	Norwich	Third Floor	23 November 2011
CSCI	Caledonia House	Pentonville	3rd and 4th Floor	28 September 2009
CSCI	Caledonia House	Pentonville	Lower Ground Floor	28 September 2009
CSCI	Ground Floor South, Centro	Camden	Ground Floor South	27 October 2010
CSCI	Aspect Gate	Harrow	Part 4th Floor	12 July 2011

CSCI	Overline House	Southampton	Part 4th Floor	24 December 2011
CSCI	Avonbridge House	Chippenham	Suite C—Post 1 August 2001—Whole holding	5 September 2010
CSCI	Linhay Business Park	Ashburton	Unit D1	14 February 2012
CSCI	Lansdowne Court	Gloucester	1st Floor, Unit 1210	12 September 2011
CSCI	Coventry Point	Coventry	Part 5th Floor	14 November 2011
CSCI	Chapter House South	Shrewsbury	1st Floor	28 September 2011
CSCI	178 Widemarsh Street	Hereford	Single storey unit	17 November 2011
Council for Healthcare Regulatory Excellence	Kierran Cross	London	First Floor	24 December 2010
General Social Care Council	Goldings House	Southwark	1st, 2nd and 3rd Floor and three car parking spaces	25 September 2011
Health Protections Agency (HPA)	Springfield House	Grantham	Springfield House	29 February 2009
HPA	Imperial Building	Nottingham	Offices	22 October 1999
HPA	Holborn Gate	West End	7th Floor	24 December 2010
HPA	Holborn Gate	West End	Sub-Basement Storage Room No. 3	24 December 2010
HPA	Holborn Gate	West End	Car Parking Licence for 3CPS	24 December 2010
HPA	Holborn Gate	West End	Car Parking Licence for 6CPS	24 December 2010
HPA	Belfast City Hospital	Belfast	CDSC—Northern Ireland	31 March 2009

Arm's length body	*Property name*	*Town*	*Holding name*	*Lease expiry date*
HPA	Moorgate Point	Liverpool	Suite E	31 January 2009
HPA	D B H House	Liverpool	Rooms 103-112 1st Floor	31 December 2008
HPA	MRC Harwell (Building 371)	Didcot	CHaPD-Harwell	25 September 2008
HPA	Tamar Science Park	Plymouth	Unit N20	12 September 2008
HPA	Colchester Avenue Campus	Cardiff	CHAPD—Cardiff	28 September 2004 Holding over
HPA	Birmingham Research Park	Birmingham	CHAPD—Birmingham	3 August 2008
HPA	Russell House	Dudley	Black Country HPU	31 August 2008
HPA	Meadow Court	Sheffield	South Yorkshire HPU	30 June 2012
HPA	Innovation Centre	York	North Yorkshire HPU	30 September 2008
Medicines and Healthcare Products Regulatory Agency (MHRA)	Market Towers	Battersea	Floors 6 to 21 inclusive (6 to 21 Block A and 6 to 16 Block B) + 30cps + GF waste store	24 December 2011
MHRA	Market Towers	Battersea	Part ground floor offices, Block B (south)	24 November 2011
MHRA	Market Towers	Battersea	Second floor (South and North Wings) offices	24 December 2011
MHRA	Market Towers	Battersea	Part fourth floor (South Wing) offices	24 December 2011
MHRA	Market Towers	Battersea	Part Fifth Floor, Block A (North)	24 December 2011
NHS Purchasing and Supply Agency (NHS PASA)	Premier House	Reading	Whole building	29 April 2010
NHS PASA	Millennium House	Sheffield	Ground floor and exclusive right to park over one half of the forecourt	29 January 2009

Departmental Waste

Mr. Jenkins: To ask the Secretary of State for Health what steps his Department has taken to reduce the volume of waste produced by it and sent to landfill in each of the last two years. [215920]

Mr. Bradshaw: The Department has worked hard, with its contractors, to reduce the amount of waste it produces. Between 2004-05 and 2006-07 our overall waste arisings reduced by some 60 per cent. from 996 tonnes to 393 tonnes.

All our general waste is removed from site and sent to a materials recycling facility, where it is segregated into different waste streams. This system has contributed to a very high recycling rate, achieving 90 per cent. in 2006-07.

Information for 2007-08 is not currently available.

Depression: Elderly

Mr. Ellwood: To ask the Secretary of State for Health what research he has *(a)* commissioned and *(b)* evaluated on the relationship between dark evenings and depression in the elderly. [214486]

Mr. Ivan Lewis: The Department has not carried out research on the relationship between dark evenings and depression in the elderly.

Depressive Illnesses: Health Services

Mr. Jim Cunningham: To ask the Secretary of State for Health what recent steps the Government has taken to improve treatment for people with depression. [220624]

Mr. Ivan Lewis: The Improving Access to Psychological Therapies (IAPT) Programme seeks to deliver improved access to psychological therapies for people who require the help of mental health services for mild to moderate depression. It also responds to service user's requests for more personalised services based around their individuals needs.

It will test the effectiveness of providing increases in evidence based psychological therapy services to people with 'common' mental health problems such as depression and anxiety, in providing improvements in health, well-being and in maintaining people or returning people to employment and community participation.

The Government announced significant funding for the programme to create new local psychological therapy services around the country on 10 October 2007: £33 million in 2008-09, £103 million in 2009-10 to £173 million in 2010-11. This is new money to expand evidence-based psychological therapies services. Primary care trusts were already spending £146 million on psychological therapies services.

Epilepsy: Pupils

Mr. Hancock: To ask the Secretary of State for Health if he will take steps to ensure that every school pupil with epilepsy has an individual education plan. [218655]

Jim Knight: I have been asked to reply.

The Special Educational Needs (SEN) code of practice gives statutory guidance to schools, LAs and others on meeting children's special educational needs.

The code makes clear that a medical diagnosis, such as epilepsy, does not necessarily imply that a child has an SEN, although, of course, children with epilepsy may also have an SEN.

The code recommends individual education plans (iEPs) as a way of setting short-term targets for pupils and recording outcomes. Schools are not under a statutory duty to use IEPs for pupils with SEN, but if they make other arrangements to set targets for these pupils they should be able to demonstrate that those arrangements are equally as good, if not better.

Food Standards Agency

Mr. Bone: To ask the Secretary of State for Health what assessment he has made of the likely effect of the establishment of a local better regulation office on the work of the Food Standards Agency. [220253]

Dawn Primarolo: On 15 May 2007, the Government issued a consultation on the draft Regulatory Enforcement and Sanctions Bill which covered the establishment of the Local Better Regulation Office (LBRO). At its open meeting on 19 July 2007, the Food Standards Agency (FSA) Board discussed the extent to which the establishment of the LBRO might affect the delivery of consumer protection in relation to food and drink by the FSA directly, by the Meat Hygiene Service as the FSA's Executive agency or through the FSA's enforcement partners in local authorities. Following the meeting, the FSA Chair submitted a formal response to the consultation, covering the most significant points. Copies of the response has been placed in the Library and can also be found on the FSA's website at:

www.food.gov.uk/multimedia/pdfs/breletter070801.pdf

The FSA's views on the draft Regulatory Enforcement and Sanctions Bill have been placed in the Library and has also been published on the FSA's website at:

www.food.gov.uk/foodindustry/regulation/betregs/compliance/renfsancbill

The FSA supports the establishment of the LBRO to promote efficient and effective local regulatory services as a part of its wider commitment to better regulation. The FSA is currently working very closely with the LBRO to produce a memorandum of understanding that clarifies how they work alongside one another in the future. The memorandum of understanding will be in place within six months after the enactment of the Regulatory Enforcement and Sanctions Bill. The FSA remains committed to engaging with the LBRO to maintain the protection of public health.

Game: Licensing

Angela Browning: To ask the Secretary of State for Health (1) how many full-time equivalent staff are employed by the Food Standards Agency in the licensing of establishments processing wild game; [220258]

(2) how many *(a)* wild game processors and *(b)* catering butchers dealing in wild game were licensed in (i) 2006, (ii) 2007 and (iii) 2008; [220259]

(3) what steps his Department has taken to identify the location of premises of unlicensed *(a)* wild game processors and *(b)* catering butchers processing wild game; [220260]

(4) what estimate he has made of the proportion of *(a)* licensed and *(b)* unlicensed (i) wild game processors and (ii) catering butchers dealing in wild game which operate in compliance with EU regulations. [220262]

Dawn Primarolo: We have been advised by the Food Standards Agency (FSA) that there are 6.5 veterinary meat hygiene advisers employed in Great Britain to undertake visits to premises handling wild game to assess whether those premises meet the requirements for approval as set out in European Union Hygiene Regulations.

In 2006, there were 55 game handling establishments approved to process wild game. In 2007, there were 74 such establishments and at the end of May 2008 there were also 74. The FSA is unable to provide information as to how many catering butchers deal in wild game. There are currently 139 catering butchers under local authority control and which the FSA is in the process of assessing for approval as cutting plants under the Hygiene Regulations. Those that meet the necessary requirements will be approved by the FSA for cutting meat and for processing game if any carry out such processes and they will then fall under the control of the Meat Hygiene Service (MHS).

When the new Hygiene Regulations came into force the FSA asked local authorities to identify those premises processing wild game so that they could be identified as premises that would require FSA approval. This was not straightforward as there are a number of exemptions from approval that apply for businesses supplying the local market with small quantities directly to consumers.

The FSA has made no estimate of the proportion of businesses that process wild game or catering butchers which process wild game that are compliant with the EU Hygiene Regulations, whether they require approval or not. All premises processing wild game are subject to hygiene controls carried out by either the MHS in approved premises, or by local authorities in non-approved premises.

General Practitioners

Mr. Drew: To ask the Secretary of State for Health what support his Department makes available to general practitioner practices to support a transition to practice-based commissioning. [218355]

Mr. Bradshaw: The Department provides a national framework for practice-based commissioning which sets clear expectations of PCTs to provide a range of support necessary to allow practices to engage fully with practice-based commissioning. The "Practice Based Commissioning: Practical Implementation" guidance document published in November 2006 describes the nature of support that PCTs should provide to practice-based commissioners, such as budgetary, analytical and management support. The precise level of support necessary will vary from practice to practice.

The "NHS Next Stage Review: Our vision for Primary and Community Care" strategy has also set out how practice based commissioning is central to our ambitions for health improvement and high quality care. The document outlines the Department's intention to work with the NHS and with the professions to reinvigorate the implementation of practice based commissioning, and set out a package of measures to support this.

Health Services: Non-profit Making Associations

Mr. Gordon Prentice: To ask the Secretary of State for Health which primary care trusts which have commissioned clinical services from groups of former NHS employees have set up as social enterprise companies or third sector organisations. [216738]

Mr. Ivan Lewis: The Department does not collect information on primary care trusts, which have commissioned clinical services from social enterprises or third sector organisations set up by former NHS employees.

Health Services: Young Offenders

Mrs. Moon: To ask the Secretary of State for Health how many young people in *(a)* Ashfield and *(b)* Huntercombe young offender institution were transferred to St. Andrew's hospital, Northampton in each year since 2000. [219222]

Mr. Hanson: I have been asked to reply.

Two young people have been transferred from Huntercombe to St. Andrew's; one in 2004 and one in 2007. The information for Ashwell is not available in the form requested and could be obtained only at disproportionate cost.

Health Services: Private Sector

Mr. Lancaster: To ask the Secretary of State for Health how many NHS patients resident in Milton Keynes have been referred to a private hospital for an operation in the last three years. [214932]

Mr. Bradshaw: Information is not collected in the format requested. Information is available on national health service funded first finished consultant episodes (FFCEs) for Milton Keynes Primary Care Trust (PCT), carried out by United Kingdom independent sector and overseas providers, including independent sector treatment centres (ISTCs).

The following table shows this information for the last three years.

Independent sector inpatient activity, Milton Keynes PCT, 2005-06 to 2007-08 (Commissioner based)

	General and Acute	
	Elective FFCEs carried out by UK independent sector and overseas providers	*Elective FFCEs carried out by ISTCs*
2005-06	1,558	223
2006-07	1,407	5,012
2007-08	1,450	1,706

Source:
Department of Health Quarterly Activity Return, Local Delivery Plan Return, Department of Health Monthly Activity Return, Monthly Monitoring Return.

Hospital Beds: Young People

Mrs. Moon: To ask the Secretary of State for Health how many assessment and treatment beds were commissioned for young people in each year since 2000. [219223]

Mr. Bradshaw: The information requested is not collected centrally.

Commissioning for local health services is the responsibility of local primary care trusts (PCTs). PCT commissioners are responsible for assessing local health needs and meeting these needs through strategic planning and contracting with local health care providers. Recognising that PCTs' commissioning decisions are crucial to improve the population's health and well-being, the Department has launched the World Class Commissioning Programme, which aims to improve commissioning across the national health service.

The programme includes a commissioning assurance system that holds PCTs to account and rewards performance and development as they move towards world class. While commissioning decisions will rightly remain at local level, this national framework of assurance will ensure that all PCTs across the NHS are employing the very best commissioning processes to improve health outcomes and reduce health inequalities.

Hospitals

Mr. Dunne: To ask the Secretary of State for Health (1) how many hospitals *(a)* opened and *(b)* closed in each primary care trust area between 2002-03 and 2007-08; [219976]

(2) how many hospitals *(a)* opened and *(b)* closed in each health authority area between 1997-98 and 2002-03. [219977]

Mr. Bradshaw: Information on the number of new hospital schemes which opened in each strategic health authority (SHA) from 1997-98 to 2002-03 is shown in the table. Information on which primary care trusts (PCTs) these hospital schemes opened in is not held centrally but the list includes schemes commissioned directly by PCTs.

Information on hospital closures is not held centrally.

Date opened	*SHA*	*National health service trust*	*Capital value (£ million)*
30 March 2000	London	Queen Mary's Sidcup NHS Trust	21
10 April 2000	North West	North Cumbria Acute Hospitals NHS Trust	67

Hospitals: Waiting Lists

Mr. Bone: To ask the Secretary of State for Health (1) what steps his Department has taken to consult primary care trusts to ensure they have sufficient staff to meet the 18-week waiting time commitment; [220254]

(2) at what point of treatment the 18-week waiting time initiative begins; and whether it will be extended to specialised services; [220255]

(3) what support and guidance will be provided by his Department to primary care trusts in England in relation to the implementation of the 18-week waiting time initiative; and if he will make a statement; [220256]

(4) whether his Department's 18-week waiting time initiative will be extended to infertility services; and if he will make a statement. [220257]

Ann Keen: The maximum 18-week waiting time applies as a national standard from 1 January 2009 onwards. The 18-week target applies to the whole period from receipt of referral made by a general practitioner or other care professional to any consultant-led service, including infertility services. There are no national plans at present to extend the scope of the 18 weeks referral to treatment target.

To support primary care trusts (PCTs) in delivery of 18 weeks a service transformation strategy has been put in place. This includes publishing 18 weeks commissioning top tips and 42 model 18 weeks commissioning pathways. These pathways support PCTs in commissioning the most effective services for their patients. The Department has provided a range of guidance including national 18 week clock rules, definitions and guides on how to apply and measure 18 week rules locally.

An 18 weeks intensive support team has been established to assist local health communities deliver the 18-week target by the end of December 2008. Copies of a step by step guide has been placed in the Library. Comprehensive information and resources on the support available to the NHS is available on a dedicated website,

http://www.18weeks.nhs.uk/

It is the responsibility of PCTs working with the strategic health authority to ensure they have sufficient staff to deliver the 18-weeks target at a local level.

Injuries

Julia Goldsworthy: To ask the Secretary of State for Health how many people have been hospitalised following injuries caused by *(a)* seagulls, *(b)* pigeons, *(c)* rats and *(d)* other pests in each of the last five years. [220169]

Mr. Bradshaw: This information is not available in the format requested. The following table shows the number of finished admission episodes (FAE) for those bitten by a rat in each of the last five years for which figures are available.

	Admission episodes[1]
2006-07	27
2005-06	18
2004-05	23
2003-04	21
2002-03	21

[1] FAE: A FAE is the first period of in-patient care under one consultant within one healthcare provider.

Notes:

1. Assignment of Episodes to Years
Years are assigned by the end of the first period of care in a patient's hospital stay. Please note that admissions do not represent the number of in-patients, as a person may have more than one admission within the year.
2. Cause Code—Rat Bites*
The cause code is a supplementary code that indicates the nature of any external cause of injury, poisoning or other adverse effects.
*Rat Bites: W5—Bitten by rat
3. Data Quality
HES are compiled from data sent by over 300 national health service trusts and primary care trusts (PCTs) in England. The NHS Information Centre for health and social care liaises closely with these organisations to encourage submission of complete and valid data and seeks to minimise inaccuracies and the effect of missing and invalid data via HES processes. While this brings about improvement over time, some shortcomings remain.
4. Assessing growth through time
HES figures are available from 1989-90 onwards. During the years that these records have been collected the NHS there have been ongoing improvements in quality and coverage. These improvements in information submitted by the NHS have been particularly marked in the earlier years and need to be borne in mind when analysing time series. Changes in NHS practice also need to be borne in mind when analysing time series. For example a number of procedures may now be undertaken in outpatient settings and may no longer be counted in the HES data. This may account for any reductions in activity over time.
5. Ungrossed Data
Figures have not been adjusted for shortfalls in data (i.e. the data are ungrossed).

Hospital Episode Statistics (HES), The Information Centre for health and social care

Learning Disability

Dr. Cable: To ask the Secretary of State for Health (1) what estimate he has made of the number of people with learning disabilities; what assessment he has made of the age distribution of such people; and what estimate he has made of likely equivalent figures for *(a)* 2018 and *(b)* 2028; [214301]

(2) what research the Government have commissioned on the long-term care needs of people with learning disabilities. [214302]

Mr. Ivan Lewis: The Department has commissioned the Personal Social Services Research Unit at the London School of Economics (LSE) to undertake an initial study of the projected future trends in numbers of people with learning disabilities aged 18 to 65, and possible changes to their support arrangements. This is due for completion at the end of July this year and the LSE research team is in discussion with other experts in the field about ways in which a more extensive study could be made of the number, characteristics and needs of this population group. Should this more extensive project be undertaken, it would provide better intelligence of the current and future age profile of the population.

Mental Health Services: Standards

Lynne Jones: To ask the Secretary of State for Health if he will make it his policy to introduce a compulsory kitemark system of accreditation for all in-patient psychiatric wards. [216232]

Mr. Ivan Lewis: There are many different ways of achieving service improvement and achieving better service user outcomes in acute care without the need for mandatory accreditation. One example is 'star wards', a service user led initiative which focuses on improving service user experience and engagement when admitted, has been very successful in getting staff and service user ownership and action in improving service user experience in inpatient psychiatric wards.

The Government are also awaiting the results and recommendations of the Healthcare Commission's acute inpatient review, whose national report is due for publication in the summer. The review drew out four key themes: examining whether services had effective care pathways in place regarding admissions and discharges; provided individualised care which promoted recovery and inclusion; had service user and carer involvement in care planning, operational and strategic planning; and had systems, processes and facilities in place to ensure the safety of service users, visitors and staff.

Muscular Dystrophy: Children

Mr. Evans: To ask the Secretary of State for Health how many children have been diagnosed with Duchenne muscular dystrophy in *(a)* Lancashire and *(b)* nationally in each of the last five years. [220153]

Ann Keen: Information on the number of children diagnosed with Duchenne muscular dystrophy is not collected centrally.

NHS Treatment Centres: Christchurch

Mr. Chope: To ask the Secretary of State for Health pursuant to the answer of 18 February 2008, *Official Report*, column 300W, on NHS treatment centres: Christchurch, when he expects the former NHS health centre in Saxon Square, Christchurch, to be brought back into use; and how much he expects to be paid in empty property rates before that date. [220808]

Ann Keen: The Royal Bournemouth and Christchurch NHS Foundation Trust has now decided it does not wish to bring the property back into use. Options for the early disposal of the Secretary of State's interest in the property are now being explored. The empty property rates payable in 2008-09 amount to £24,024.

NHS: Equality

Sandra Gidley: To ask the Secretary of State for Health (1) if he will take steps to ensure that lesbian, gay and bisexual people are not discriminated against in the delivery of NHS services; [216588]

(2) what steps his Department is taking to ensure that lesbian, gay and bisexual people employed by the NHS are not discriminated against. [216589]

Mr. Ivan Lewis: The Government are committed to eliminating discrimination and promoting equality for lesbian, gay and bisexual (LGB) people working in or accessing services in health and social care.

The Employment Equality (Sexual Orientation) Regulations (2003) outlawing discrimination in the workplace on the grounds of sexual orientation came into force in December 2003 and any staff who consider they have been discriminated against on the basis of their sexual orientation now have legal recourse. In the Equality Act (Sexual Orientation) Regulations (2007) the Government outlawed discrimination on the basis of sexual orientation in the provision of goods and services. This means that the national health service is legally prohibited from discriminating. We also intend to broaden the duty on public sector organisations to promote equality and eliminate discrimination to cover sexual orientation in the forthcoming Equality Bill.

While it is for individual organisations in the NHS to ensure that they meet legal and ethical requirements towards those employed by them or using their services, the Department has an important role in supporting them and disseminating knowledge in this area. The Department is encouraging NHS organisations to move towards a single equality approach, and will this summer publish guidance on sexual orientation as a strand within their single equality schemes.

The Department has worked with its external stakeholder committee, the Sexual Orientation and Gender Identity Advisory Group (SOGIAG), to produce a number of resources and guidance documents on employment, healthcare and sexual orientation. The Department has also sponsored a number of conferences on issues affecting LGB people in healthcare.

We are in the process of refreshing SOGIAG with a new appointments process for members. From September we will be taking forward a new programme of policy work to reduce health inequalities for LGB people.

The Department also assesses all new policies for their impact on people with different sexual orientations as part of its equality impact assessment process.

NHS: Information

Mr. Stephen O'Brien: To ask the Secretary of State for Health what progress has been made in the *(a)* current and *(b)* planned initiatives announced by the NHS Information Centre in its presentation to the Inaugural Supplier Forum of 7 November 2007 with regard to (i) the NHS Operating Framework, (ii) NHS comparators, (iii) practice-level prescribing data, (iv) compendium of health outcome indicators, (v) GP data extraction service, (vi) electronic staff record, (vii) financial indicators, (viii) mental health minimum dataset and (ix) social care; what new information he anticipates the NHS Information Centre making available to (A) the NHS, (B) other care providers and (C) the public as a result of each of these initiatives; with which stakeholders has the Information Centre consulted in its development of these initiatives; and if he will make a statement. [195210]

Mr. Bradshaw: The Information Centre for health and social care (IC) aims to be the recognised source of relevant information to improve decision making in health and social care. This includes information to support activities and initiatives set out in the 'National Health Service Operating Framework', particularly around ensuring the secondary user service (SUS) becomes the standard repository for activity for performance management, reconciliation and payment by April 2009.

NHS comparators service has been developed with NHS Connecting for Health to provide a facility for NHS registered users to compare general practitioner (GP) practice-level data on hospital admissions and the quality and outcomes framework. We have expanded the range of information. Currently there are over 4,000 users registering over 80 per cent. satisfaction with the service.

The IC has produced a prescribing data consultation document entitled 'Wider release of NHS prescribing data' (copies of this publication have been placed in the Library) which includes a feedback form and the closing date for returns is 8 August. The consultation results will then be published and any subsequent initiatives will depend on the results.

The compendium of health outcomes service has been re-procured and provides web-based information. This service will be developed to support the needs and requirements of users, particularly those involved in commissioning care.

The IC in collaboration with NHS Connecting for Health is preparing to procure a GP data extraction service (GPES). Following strict governance guidelines, GPES will co-ordinate approved data extractions from GP computer systems nationwide and provide high-quality analyses. The results will support the development of national and local policies for future patient led services. It is currently consulting with stakeholders prior to a procurement exercise.

The IC has also developed, with the Department, a number of work force financial indicators to support the comparative use of electronic staff record information. This is a web-based application which has been piloted by organisations within NHS across the Yorkshire and Humberside areas and is now being rolled out nationally.

There have been significant problems in enabling mental health minimum dataset data to flow into SUS. These problems have meant that the publication planned for April 2008 has been delayed and no data have yet been received or processed. SUS functionality is being developed for implementation later this year to enable

data to be available via SUS in 2009. An interim, alternative solution is currently being tested for receipt of annual data only but we are not yet able to confirm the timetable for delivery of the data.

The provision of new social care data will shortly commence a formal, three-month consultation, in line with national statistics requirements, in connection with a substantive review of current social care collections and publications.

NHS: Managers

David Taylor: To ask the Secretary of State for Health what his Department's accounting guidelines are on the declaration of the pay received during the tenure of acting chief executives of NHS trusts who were recruited through employment agencies. [219959]

Ann Keen: Sir Nigel Crisp, then chief executive of the national health service, wrote to chairs of NHS organisations on 27 March 2003 asking them to strongly encourage all senior staff to give their consent for information about their remuneration to be included in the accounts. This letter made clear the Department's view that people paid from the public purse should expect to be completely open about how much they are paid. This message was reiterated in a further letter to chairs, on 19 June 2003, which asked them to monitor progress on the disclosure of this information.

NHS: Private Sector

Mr. Gordon Prentice: To ask the Secretary of State for Health on how many occasions since 2001 the breach of a contract between NHS organisation and a private sector provider of clinical services has been referred to the courts; and if he will make a statement. [218200]

Mr. Bradshaw: National health service organisations are legally distinct entities and the Department would not, as a matter of course, be involved in contractual disputes between them and private sector companies. The Department therefore does not collect information centrally on contractual disputes that are referred to the courts.

With regard to centrally procured contracts by the Department for clinical services under the Independent Sector Treatment Centre Programme, no breach of contract has been referred to the courts.

NHS: Reorganisation

Mr. Lansley: To ask the Secretary of State for Health what the Ministerial responsibilities are of the Parliamentary Under-Secretary of State for Health, Lord Darzi, following publication of the NHS Next Stage Review final report. [219359]

Alan Johnson: Lord Darzi's ministerial portfolio covers the NHS Next Stage Review. He is currently looking at implementation plans.

NHS: Standards

Mr. Bone: To ask the Secretary of State for Health what EU healthcare benchmarks he takes into account when assessing the National Health Service as a provider of health care. [220680]

Dawn Primarolo: No European Union benchmarks are used when performance assessing the national health service. As set out in "High Quality Care For All: NHS Next Stage Review Final Report" (copies of which are already available in the Library), we believe it is important for patients, staff and the public to be able to understand how we perform compared to other healthcare systems. To do this we plan to work with other Organisation for Economic Cooperation and Development countries and with the best academic institutions in the world to agree some internationally comparable measures.

Obesity

Mr. Jim Cunningham: To ask the Secretary of State for Health what steps the Government plans to take to address health-related problems due to obesity. [220625]

Dawn Primarolo: In the six months since the £372 million "Healthy Weight, Healthy Lives: a Cross Government Strategy for England" was published there has been substantial progress. The forthcoming progress newsletter "Healthy Weight, Healthy Lives: six months on", will be published on 23 July 2008.

The newsletter highlights the steps forward for the next six months across all five themes of the strategy: children, healthy growth and weight; promoting healthier food choices; building physical activity into our lives; creating incentives for better health; and personalised advice and support for all.

Occupational Therapy: Manpower

Mr. Evans: To ask the Secretary of State for Health how many fully qualified occupational therapists have been employed by the NHS in each year since 2002. [220631]

Ann Keen: The number of qualified occupational therapists employed by the national health service in England in each year since 2002 as recorded in the National Workforce Census is shown in the following table:

Qualified occupational therapists employed in NHS in England as at 30 September each year

	Headcount	*FTE*
2002	14,749	12,541
2003	15,391	13,053
2004	16,371	13,879
2005	16,743	14,099
2006[1]	16,845	14,292
2007	17,024	14,439

[1]More accurate validation in 2006 has resulted 9,858 duplicate records being identified and removed from the non-medical census.
(These 9,858 duplicate records, broken down by main staff group, are: 3,370 qualified nurses; 1,818 qualified scientific therapeutic and technical staff; 2,719 support to doctors and nurses; 1,562 NHS infrastructure support; and 389 in other areas.)
The impact of duplicates on full-time equivalent has been minimal with the removal of 507.
Source:
Department of Health Non-Medical Workforce Census

Osteoporosis

Mr. Drew: To ask the Secretary of State for Health what progress is being made in including monitoring for osteoporosis within the Quality and Outcomes Framework. [218354]

Mr. Bradshaw: The Secretary of State announced on 5 May that the Government are consulting the British Medical Association on proposals to invest an extra £100 million on improving clinical services and access for patients. The Government propose to invest an extra £50 million in enhanced clinical services, which would include improving the diagnosis and treatment of osteoporosis according to the best practice guidelines set out by the National Institute for Health and Clinical Excellence. The amount of investment in each area is subject to consultation with the General Practitioners Committee of the British Medical Association.

We expect the content of the Quality and Outcomes Framework for 2009-10 to be, as usual, a matter for consultation between NHS Employers and the British Medical Association, informed by the independent expert panel.

Physiotherapy: Manpower

Mr. Evans: To ask the Secretary of State for Health how many fully qualified physiotherapists have been employed by the NHS in each year since 2002. [220629]

Ann Keen: The number of qualified physiotherapists employed by the national health service in England in each year since 2002 as recorded in the National Workforce Census is shown in the following table:

Hospital and community health services: Qualified physiotherapists employed in the NHS in England as at 30 September each year

	Headcount	*Full-time equivalents*
2002	16,885	13,586
2003	17,922	14,455
2004	19,139	15,564
2005	19,997	16,291
2006[1]	19,820	16,334
2007	20,146	16,752

[1] More accurate validation in 2006 has resulted 9,858 duplicate records being identified and removed from the non-medical census. (These 9,858 duplicate records, broken down by main staff group, are: 3,370 qualified nurses; 1,818 qualified scientific, therapeutic and technical staff; 2,719 support to doctors and nurses; 1,562 NHS infrastructure support; and 389 in other areas.)
The impact of duplicates on full-time equivalent has been minimal with the removal of 507.
Source:
Information Centre Non-medical Workforce Census

Prescriptions: Fees and Charges

David Heyes: To ask the Secretary of State for Health when he plans to begin his consultation on prescription charges and exemptions; and whether that consultation will include the question of whether asthma should be added to the list of health conditions exempt from prescription charges. [219973]

Dawn Primarolo: We will publish our planned consultation on cost neutral changes to the system of prescription charges and exemptions in England later this year. This will include proposals to change the current medical exemptions.

Speech Therapy: Manpower

Mr. Evans: To ask the Secretary of State for Health how many fully qualified speech therapists have been employed by the NHS in each year since 2002. [220630]

Ann Keen: The number of qualified speech and language therapists employed by the national health service in England in each year since 2002 as recorded in the National Workforce Census is shown in the following table:

NHS qualified speech and language therapists as at September each year (England)

	Headcount	*Full-time equivalents*
2005	6,759	5,062
2006[1]	6,623	5,149
2007	6,742	5,299
2002	5,960	4,365
2003	6,243	4,707
2004	6,556	4,973

[1] More accurate validation in 2006 has resulted in 9,858 duplicate records being identified and removed from the non-medical census. (These 9,858 duplicate records, broken down by main staff group, are: 3,370 qualified nurses; 1,818 qualified scientific, therapeutic and technical staff; 2,719 support to doctors and nurses; 1,562 NHS infrastructure support; and 389 in other areas.) The impact of duplicates on full-time equivalent has been minimal with the removal of 507.

Health and Social Care Information Centre Non-Medical Workforce Census

Surrey Primary Care Trust

Anne Milton: To ask the Secretary of State for Health (1) what the membership of Surrey primary care trust's exceptional cases panel is; [219218]

(2) what criteria are used by Surrey primary care trust's exceptional cases panel to assess requests for exceptional funding; [219219]

(3) whether the exceptional cases panel of Surrey primary care trust accepts requests for funding exceptional cases from *(a)* patients and *(b)* clinicians. [219220]

Mr. Bradshaw: The information requested is not collected centrally. It is for primary care trusts (PCTs) to commission services on behalf of their populations and to make decisions locally on which treatments to fund, taking into account all relevant circumstances. The hon. Member may therefore wish to raise these issues with the chief executive of Surrey PCT.

The draft national health service constitution (copies of which have already been placed in the Library) makes clear the patient's right to expect local decisions on funding for drugs for which National Institute for Health and Clinical Excellence guidance is not available to be made rationally following proper consideration of the evidence. To underpin this, the Government will require PCTs to put in place clear and transparent arrangements both for local decision-making on funding of new drugs and for considering exceptional funding requests, and to publish information on those arrangements. Where the local NHS decides not to fund a treatment, the patient and clinician can expect an explanation.

Transsexuality

Bob Russell: To ask the Secretary of State for Health what his policy is on the provision of *(a)* transgender procedures and *(b)* gender reassignment; and what direction he gives to NHS trusts on the matter. [214753]

Mr. Ivan Lewis: The Department does not issue directions to primary care trusts (PCTs) on this matter. It is for PCTs to decide on the circumstances in which they will provide gender reassignment procedures, taking into account a patient's individual clinical needs and the resources they have available to provide health care for their wider population.

Bob Russell: To ask the Secretary of State for Health what the average cost of a complete gender reassignment is; and if he will make a statement. [214754]

Mr. Ivan Lewis: We are not able to provide the information requested, as cost data relating to these specific procedures are not centrally collected.

DEFENCE

Iraq

12. **Mr. Gray:** To ask the Secretary of State for Defence if he will make a statement on the security situation in Iraq. [219818]

Des Browne: The security situation in Iraq has improved significantly since mid-2007 and, overall, acts of violence have reduced to levels last experienced in 2004. The transfer on 16 July of security responsibility for Qadisiyah province to Provincial Iraqi Control demonstrates the continuing improvement in security across the country.

In southern Iraq, UK and coalition forces continue to support the Iraqi Security Forces as they consolidate the significant progress in security brought about by the operations launched in Basra in March.

19. **Mr. Swayne:** To ask the Secretary of State for Defence if he will make a statement on troop numbers in Iraq. [219825]

Des Browne: UK force levels in southern Iraq remain at around 4,000, operating in support of the Iraqi Security Forces in Basra. Our military commanders continue to assess the changing situation on the ground and it remains our clear intention to reduce troop numbers as and when conditions allow.

The Prime Minister will make a further statement tomorrow, setting out our plans in Iraq.

24. **Willie Rennie:** To ask the Secretary of State for Defence what his plans are for drawing down British forces in Iraq in 2008. [219830]

Des Browne: We assess that current troop levels in southern Iraq are appropriate to deliver our key military tasks, in particular completing the training and mentoring of the 14th Division of the Iraqi Army.

Our military commanders continue to appraise the changing situation on the ground and it remains our clear intention to reduce troop numbers as and when conditions allow.

The Prime Minister will make a further statement tomorrow, setting out our plans in Iraq.

Service Personnel: Benefits

13. **Andrew Gwynne:** To ask the Secretary of State for Defence what discussions he has had with the Secretary of State for Work and Pensions on arrangements for the payment of benefits for service personnel. [219819]

Mr. Bob Ainsworth: There have been regular discussions between MOD and Department for Work and Pensions Ministers on these matters.

Indeed, last Thursday's White Paper "The Nation's Commitment: Cross-Government Support to Our Armed Forces, their Families and Veterans" delivered a series of improvements to the way in which benefits are administered for our service community. This followed a period of significant departmental collaboration.

Service Personnel: Accommodation

14. **Mr. Jim Cunningham:** To ask the Secretary of State for Defence what recent steps his Department has taken to improve the standard of accommodation provided for armed forces personnel. [219820]

Derek Twigg: It is a top priority that service personnel have the high quality accommodation they deserve.

We plan to spend in excess of £8 billion on accommodation over the next 10 years.

Since 2001, some 13,000 Service Family Accommodation properties have been upgraded to the top standard and 26,000 new or improved Single Living Accommodation bed-spaces have been delivered.

Defence Maritime Strategy

15. **Sarah McCarthy-Fry:** To ask the Secretary of State for Defence what steps his Department is taking to implement the defence maritime strategy. [219821]

Mr. Bob Ainsworth: We continue to make good progress in implementing the maritime element of the Defence Industrial Strategy.

The formation of BVT Surface Fleet on 1 July, which brings together the shipyards at Portsmouth and on the Clyde under one management, and the signature of the contract to build the two Future Aircraft Carriers is a clear demonstration of this progress.

The construction of the Carriers is a substantial boost to British industry and is expected to create or sustain 10,000 jobs across the UK at peak production, with around 1,000 jobs at each of the main shipyards. Along with the six T45 Destroyers, the Carriers will ensure a steady drumbeat of work in a shipyard for years to come.

Helicopters

16. **Mr. Bone:** To ask the Secretary of State for Defence what plans he has for the provision of helicopters for operational service in Afghanistan. [219822]

Des Browne: I refer the hon. Member to the answer I gave earlier today to the hon. Members for Macclesfield (Sir Nicholas Winterton) and for South-West Bedfordshire (Andrew Selous).

23. **James Brokenshire:** To ask the Secretary of State for Defence if he will increase the number of helicopters available for the use of UK troops in Afghanistan. [219829]

Des Browne: I refer the hon. Member to the answer I gave earlier today to the hon. Members for Macclesfield (Sir Nicholas Winterton) and for South-West Bedfordshire (Andrew Selous).

Mr. Jenkin: To ask the Secretary of State for Defence how many future medium helicopters his Department plans to order; and when they are due to enter service. [220249]

Mr. Bob Ainsworth: The Future Medium Helicopter project is currently in its concept phase. As with all Defence projects, it is not until Main Gate approval has been obtained that decisions such as final aircraft numbers and in-service dates are confirmed. It is therefore too early to determine the number of aircraft which will be procured or when they will come into service.

Mr. Jenkin: To ask the Secretary of State for Defence what plans his Department has to extend the operational service life of the Puma HC1 helicopters beyond 2012-13. [220250]

Mr. Bob Ainsworth: An assessment phase contract was awarded in 2007 to Eurocopter to examine the scope to extend the service life of the Puma HC1. A decision on whether to extend the service life of the Puma beyond 2012 will not be taken until the Main Gate approval for this project.

Mr. Jenkin: To ask the Secretary of State for Defence how many search and rescue helicopters his Department plans to order in the next 10 years. [220251]

Mr. Bob Ainsworth: The Ministry of Defence and the Maritime and Coastguard Agency (MCA) are jointly undertaking the Search and Rescue Helicopter programme, which will deliver the future UK capability. This programme is currently in its assessment phase. As with all Defence projects, it is not until Main Gate approval has been obtained that details of the future service such as final aircraft numbers can be confirmed.

Veterans

18. **Christine Russell:** To ask the Secretary of State for Defence what progress is being made on the regional pilots to improve mental health care for veterans. [219824]

Derek Twigg: NHS-led pilots are running at four sites offering a best practice, culturally sensitive, veterans' mental health service; another two will begin shortly. The service offers wider support of public and charitable providers and is being linked to the Government's Improving Access to Psychological Therapies programme. A current focus is raising awareness among local health professionals and potential clients. An evaluation team has been appointed with the aim that, in due course, best practice should be rolled out across the UK.

Afghanistan

20. **Mr. Mackay:** To ask the Secretary of State for Defence what recent assessment he has made of the security situation in Afghanistan; and if he will make a statement. [219826]

Des Browne: The security situation in Afghanistan is stable if fragile in places—particularly in the south and east of the country.

We need to be clear that Afghanistan is not a safe environment for those seeking to bring it the opportunities and development that it so desperately needs. If it was we would not need the armed forces there to create the security space required for reconstruction and development.

However, we should also be clear that, notwithstanding a number of tragic incidents in the past few weeks, and in the context of a difficult campaign, our military commanders assess that the underlying security dynamics in Afghanistan are slowly improving. In particular Helmand province is a considerably more secure and stable province than it was a year ago.

Regardless of the difficulties ahead—and there will be difficulties—I confidently expect that we will continue to make progress in our vital mission in Afghanistan with both the security and non-security lines of operation of our mission there.

Combined Cadet Force

22. **Mr. Kidney:** To ask the Secretary of State for Defence what support his Department gives to the combined cadet force to increase its membership. [219828]

Derek Twigg: The MOD is committed to the role that all Cadet forces play in society offering as they do a vast range of personal development and educational opportunities for young people. We support the combined Cadet forces alone with over £11 million of funding each year. The current pilot scheme for the expansion of the CCF, involving six schools, is well under way, and we are working closely with the Department for Children, Schools and Families in order to build on this success in the future.

Royal Army Medical Corps

25. **Mr. Andrew Turner:** To ask the Secretary of State for Defence what pinch-points he has identified within the Royal Army Medical Corps. [219831]

Derek Twigg: There are a number of pinch points within the Royal Army Medical Corps. These range from emergency medicine nurses to anaesthetists.

We are taking active steps to address the shortfalls, through a range of initiatives:

pay is reviewed by the Independent Armed Forces Review Body;

"Golden Hellos" are paid to direct entrants to specialist areas where there is greatest shortfall;

financial retention initiatives are paid to nurses in operational pinch-point specialties;

personnel are encouraged to train and remain in operational pinch-point specialties;

medical deployments are managed on a tri-service basis; and

reserves and civilian agency contractors are used where appropriate.

IT Systems

David Taylor: To ask the Secretary of State for Defence what recent assessment he has made of the performance of the ATLAS consortium in delivering the contract to network the IT systems of his Department and the armed forces; and if he will make a statement. [219823]

Mr. Bob Ainsworth: The performance of the ATLAS Consortium in delivering the Defence Information Infrastructure is continually assessed via the programme's comprehensive governance structure; general ATLAS performance is currently deemed satisfactory. Robust commercial arrangements ensure that payments to the ATLAS consortium reflect its performance and when appropriate, payment has been withheld. The Ministry of Defence and ATLAS have already made considerable progress, delivering accounts for over 100,000 users at over 500 Defence sites.

Departmental Projects

Dr. Cable: To ask the Secretary of State for Defence what estimate he has made of the total cost overrun on projects sponsored by his Department which are under construction. [219827]

Mr. Bob Ainsworth: The current estimate of the total cost overrun on major equipment projects is £3,036 million. We have taken major equipment projects to be all those with a procurement value greater than £20 million that have passed their main investment decision point but yet to reach their In-Service Dates.

Armed Forces: Accidents

Nick Harvey: To ask the Secretary of State for Defence how many injuries to personnel have been sustained in transit as a result of *(a)* collisions and *(b)* other accidents in Snatch Landrovers since 2003. [218442]

Des Browne: This information is not held centrally and could be provided only at disproportionate cost.

Armed Forces: Cadets

Mark Pritchard: To ask the Secretary of State for Defence what funding his Department has allocated to the *(a)* army cadet force, *(b)* air training corps and *(c)* sea cadet corps for 2009-10. [217506]

Derek Twigg: The Ministry of Defence has planned for the following financial contributions to the Cadet Forces for the period 2009-10:

	£
Sea Cadet Corps	8,558,000
Army Cadet Force	43,262,000
Air Training Corps	32,314,000

Note:
These figures are based on either bids for funding (Sea Cadet Corps and Army Cadet Force) or the likely bid (Air Training Corps) and therefore cannot yet be confirmed as allocated funding.

Armed Forces: Deployment

Dr. Fox: To ask the Secretary of State for Defence how many UK personnel are deployed on operations at each location. [219999]

Des Browne: The following table shows the number of UK Service personnel deployed on operations by location at 6 July 2008. The number of personnel in theatre will naturally fluctuate on a daily basis for a variety of reasons, including leave (rest and recuperation), temporary absence for training, evacuation for medical reasons, the roulement of forces and other factors.

Number of personnel deployed by location[1]

Location	*Number*
Total	14,910
of which:	
Afghanistan[2]	7,700
Iraq[2]	4,300
At sea	1,170
Kosovo	440
Qatar	410
Cyprus	280
Oman	280
Kuwait	200
Bahrain	70
Yemen	20
Bosnia	10
Other	30

[1] Countries with 10 or more personnel are shown separately. Other countries with fewer than 10 personnel per country include Georgia, Nepal, Sudan, Sierra Leone, Democratic Republic of Congo and Liberia.

[2] Figures for Iraq and Afghanistan have been rounded to the nearest 100 for operational security reasons. Other figures have been rounded to the nearest 10. Due to rounding methods used, the total may not equal the sum of the individual locations.

Armed Forces: Eyesight

Nick Harvey: To ask the Secretary of State for Defence how many *(a)* opticians, *(b)* ophthalmists and *(c)* other eye specialists there are among defence medical personnel. [218453]

Derek Twigg: There is a tri-Service requirement for ophthalmic surgeons which is currently met by one Royal Navy, four Army and two RAF officers.

Armed Forces: Fuels

Mr. Hancock: To ask the Secretary of State for Defence what proportion of the increase in his Department's expenditure on fuel costs in the last 12 months has arisen as a result of *(a)* an increase in unit costs and *(b)* an increase in the volume of fuel purchased. [220103]

Mr. Bob Ainsworth: It is not possible to determine precisely the proportion of the increase in the Department's expenditure on fuel[1] costs attributable to either volume or price. Over the period 2005-06 to 2007-08, however, fuel volumes consumed in Defence are estimated to have risen by around 5 per cent. Over the same period, the Department's expenditure on fuel rose by around 25 per cent., suggesting that price was the overwhelming factor in the increase in costs.

[1] Defined as petroleum-based liquid fuels meeting internationally recognised specifications that are used to power ships and vehicles.

Armed Forces: Housing

Dr. Fox: To ask the Secretary of State for Defence what his Department's estimate is of the number of television sets installed in *(a)* single living and *(b)* service family accommodation in the UK. [220660]

Derek Twigg: This information is not held centrally and could be provided only at disproportionate cost.

Armed Forces: Injuries

Dr. Murrison: To ask the Secretary of State for Defence how many civil actions have been brought against his Department relating to illnesses and injuries sustained *(a)* on operations abroad and *(b)* whilst serving in the UK in each year since 1997; and what the cost to the Department in each year was. [220081]

Derek Twigg: Claims are not recorded on the Department's claims database in a format that differentiates between illnesses and injuries sustained on operations abroad and while serving in the UK. However, the number of civil claims for personal injury brought against my Department by members of HM forces since 1997-98 is set out as follows. Financial data regarding the cost to my Department in terms of compensation and associated legal costs relating to this category of claimant are also set out as follows. A figure for 1997-98 is however unavailable due to the way such financial data were recorded at that time.

	Service personnel personal injury claims	*Compensation and associated legal costs (£ million)*
2007-08	603	32.7
2006-07	550	32.9
2005-06	640	26.3
2004-05	667	22.7
2003-04	604	25
2002-03	666	40
2001-02	819	32.3
2000-01	924	36.6
1999-00	752	31
1998-99	735	26.7
1997-98	730	—

Armed Forces: Internet

John Bercow: To ask the Secretary of State for Defence what progress his Department made towards the target for the provision of wireless internet facilities for the Armed Forces by Easter 2008. [206925]

Mr. Bob Ainsworth: The introduction of the first wireless internet facility commenced in Camp Bastion on 15 May 2008. We currently anticipate that the roll out of WiFi facilities in Iraq and Afghanistan will be complete by the end of 2008.

When the wireless project is completed, we expect that the ratio of internet connections to personnel in Iraq and Afghanistan will have improved from an average of one terminal to 50 personnel to an average of one terminal to 10 personnel where WiFi is available, a 400 per cent. increase.

Armed Forces: Manpower

Chris Huhne: To ask the Secretary of State for Defence if he will estimate *(a)* the number and *(b)* the proportion of the population which has served at any time in the armed forces. [217326]

Mr. Bob Ainsworth: The MOD does not hold a figure for the total number of living ex-service personnel. Against the 2005 Royal British Legion estimate, we judge there to be some 4.5 million veterans. This would amount to approximately 7.5 per cent. of the UK population.

Dr. Fox: To ask the Secretary of State for Defence which regiment or battalion forms the Spearhead Land Element (SLE); whether it is fully equipped; whether the present SLE is deployed; when the future SLE will take over from the present SLE; and what unit will form the next SLE. [220000]

Mr. Bob Ainsworth: 3rd Battalion The Royal Regiment of Scotland form the Spearhead Land Element (SLE), which is not currently deployed. The SLE is fully equipped in accordance with the Joint Rapid Reaction Force directive and operational mounting instructions. The next SLE will be provided by the 2nd Battalion The Rifles, who will assume this role from 25 July 2008.

Armed Forces: Olympic Games

Bob Russell: To ask the Secretary of State for Defence how many members of the armed forces will be competing in the forthcoming Olympic games in China. [220295]

Derek Twigg: Three members of HM forces are due to compete in the 2008 Beijing Olympic games. Two are competing from the Royal Navy, Lieutenant Peter Reed RN in the coxless fours and Lieutenant Commander Penny Clark RN in the dinghy sailing laser radial. Captain Alastair Heathcote from the Army will be in the rowing eights. All are competing for Great Britain.

Armed Forces: Pensions

Dr. Murrison: To ask the Secretary of State for Defence what estimate he has made of the *(a)* number and *(b)* value of unclaimed armed forces' preserved pensions; and what steps he has taken to reconcile armed forces' preserved pensions with their beneficiaries. [220639]

Derek Twigg: Details of the number, and value of unclaimed preserved pensions are not held and could be provided only at disproportionate cost. There is no legislative requirement for the administrators of the armed forces pension scheme (AFPS) to trace individuals who have not claimed their preserved benefits.

Personnel leaving the armed forces today receive information that clearly explains that it is their personal responsibility to claim their preserved pension at the appropriate time and provide information on how to do so. In addition, the veterans UK website contains helpful information and the issue is publicised at various MOD sponsored veteran's events held regularly throughout the UK. Furthermore, because this is a common situation across pension schemes the Department of Work and Pensions provides a free tracing service to members of pension schemes who have lost contact with earlier employers; the AFPS is registered with this service.

Defence Medical Services: Manpower

Dr. Fox: To ask the Secretary of State for Defence (1) what the *(a)* required and *(b)* actual complement is of each medical personnel type in each branch of the armed forces of the Defence Medical Services; [182331]

(2) what the *(a)* required and *(b)* current strength of Defence Medical Services is, broken down by (i) service and (ii) trade. [216245]

Derek Twigg: Manning data are as of October 2007 as this is the most accurate available.

The following table summarises the required manning level of the Defence Medical Services of the Armed Forces, including the requirement for a manning and training margin (MTM) and the actual number of personnel, including those in training.

	Requirement	*MTM*[1]	*Personnel -trained strength*	*Personnel in training*[2]	*Personnel total*
Royal Navy	1311	218	1378	271	1649
Army	4516	287	3783	561	4344
Royal Air Force	1748	171	1574	63	1637
Tri-service	7575	676	6735	895	7630

[1] The Manning and Training Margin (MTM) relates to personnel who are undertaking career directed professional training and those who are non-effective, for example while on terminal leave or long-term sick leave.
[2] Personnel in training does not include personnel who are already trained in a medical speciality and who are in career directed professional training.
Source:
Manning Return, October 2007

Tables which provide the figures for each medical speciality and show the requirement and the number of trained personnel (but not personnel in training) in each medical and dental personnel division of the armed forces as at October 2007, have been placed in the Library of the House.

Departmental Alcoholic Drinks

David Simpson: To ask the Secretary of State for Defence what measures are in place in his Department to monitor expenditure on alcohol for hospitality purposes. [219602]

Derek Twigg: The policy, rules and guidance on the provision of official entertainment are set out in Chapter 45 of Joint Services Publication 462 (Financial Management Policy Manual), copies of which are available in the Library of the House. The appropriate budget manager has the responsibility to verify compliance within the rules.

Departmental Buildings

Mr. Amess: To ask the Secretary of State for Defence how many and what proportion of residential properties owned by his Department are vacant, broken down by county. [216342]

Derek Twigg: The information is not held in the format requested and could be provided only at disproportionate cost.

Departmental Pay

Dr. Cable: To ask the Secretary of State for Defence how many and what proportion of staff in his Department received bonus payments in 2007-08; what the total amount of bonuses paid was; what the largest single payment was; and if he will make a statement. [213304]

Derek Twigg: The number and value of annual appraisal-related bonuses paid to members of the senior civil service (SCS), to fixed term appointees and to civil servants below the level of the SCS covered by the MOD main pay deal (excluding trading funds and agencies), in 2007-08, are listed in tables 1 to 3 as follows. The Ministry of Defence also awards special bonuses to individuals and teams for exceptional performance in a specific task or for the achievement of professional qualifications which benefit MOD and the individual; these are shown in table 4. The final table (5) shows the total value of all bonuses paid in cash terms; it is not possible at this time to give the percentage of the work force to which this refers and this will be advised at the end of July.

Table 1: Bonuses paid to senior civil servants

	2007-08
Number of bonuses paid	186
Value of bonuses paid (£)	1,325,700
Highest bonus payment (£)	17,600

Table 2: Bonuses paid to fixed term appointees

	2007-08
Number of bonuses paid	[1]16
Value of bonuses paid (£)	333,915
Highest bonus payment (£)	50,000

[1] There is one outstanding bonus payment still to be agreed.

Table 3: End of year bonuses paid to staff below the level of the SCS (excluding MOD trading fund agencies

	2007-08
Number of bonuses paid	52,193
Value of bonuses paid (£)	39,695,110
Highest bonus payment (£)	4,695

Table 4: Special bonuses (excluding MOD trading fund agencies)

	2007-08
Number of staff who received bonus(es)	8,428
Value of bonuses paid (£)	3,455,124
Highest bonus payment (£)	2,000

Table 5: Summary of bonuses paid

Total	2007-08
Value of all bonuses paid (£)	44,589,288
Percentage of total civilian work force	[1]

[1] Staff numbers taken from departmental end year accounts not yet available.

Dr. Murrison: To ask the Secretary of State for Defence what bonus was awarded to his Department's permanent under secretary in each year since 1997. [218516]

Derek Twigg *[holding answer 14 July 2008]*: Although the Government, with the agreement of those concerned, may in exceptional cases decide to publish personal information about individual public servants, the general policy is to treat such information, including about variable pay, as private.

Decisions on pay and reward for permanent secretaries are considered annually by the Permanent Secretaries' Remuneration Committee and are subject to the rules and regulations governed by the Senior Salaries Review Body (SSRB) and the Cabinet Office. Since 1 April 2002, non-consolidated variable pay awards paid to permanent secretaries have fallen within the SSRB recommended ceilings imposed on the rest of senior civil service (SCS). Bonuses for performance during 2002-03 were paid in financial year 2003-04 and continue to follow that pattern as shown in the following table.

Performance year	2002-03	2003-04	2004-05	2005-06	Percentage 2006-07
Paid in financial year	2003-04	2004-05	2005-06	2006-07	2007-08
SSRB average SCS bonus ceiling[1]	3.8	4	5	6.5	7.6
Permanent secretaries range[2]	2.8 to 11.9	4.4 to 10.5	4 to 11.4	2.5 to 9.9	3.3 to 13.3

[1] Shown as a percentage of the overall SCS pay bill.
[2] Shown as a percentage of individual base pay.

Note:
Bonus awards for permanent secretaries for the year up to 31 March 2008 will be within this year's 8.6 per cent. overall ceiling for bonuses.

Dr. Fox: To ask the Secretary of State for Defence how much expenditure his Department has incurred on the *(a)* Long Service Advance of Pay, *(b)* New Build HomeBuy, *(c)* Open Market Homebuy, *(d)* English Partnerships First Time Buyers Initiative and *(e)* Shared Equity services schemes in each year since 2006. [220669]

Derek Twigg: MOD's (gross) expenditure per calendar year on Long Service Advance of Pay (LSAP) was around £24 million in 2006, £22 million in 2007.

The Department has incurred no expenditure on New Build HomeBuy, Open Market Homebuy, and English Partnerships First Time Buyers Initiative. These are a matter for the Department of Communities and Local Government (DCLG). Shared Equity Services is a commercial company providing arrangements for service personnel.

Departmental Research

Bob Spink: To ask the Secretary of State for Defence what proportion of his Department's budget was used for research within its areas of responsibility in each of the last 10 years. [218065]

Mr. Bob Ainsworth: The following table shows total MOD expenditure on research activity in each of the last 10 financial years for which complete data are available. Figures are inclusive of non-recoverable VAT, expressed at current prices, and presented in £ million. Because of transitional arrangements with the introduction of resource accounting and budgeting, the figures are expressed as a percentage of the MOD net cash requirement from 2001-02 in order to provide a broad comparison over the period. Before this point, MOD reported its expenditure on a cash accounting basis.

£ millions

	MOD departmental net research Expenditure	Percentage of aggregate MOD expenditure
1996-97	672	3.0
1997-98	564	2.7
1998-99	560	2.5
1999-00	552	2.4
2000-01	566	2.4
2001-02	557	2.2
2002-03	515	1.9
2003-04	524	1.8
2004-05	639	2.2

£ millions

	MOD departmental net research Expenditure	Percentage of aggregate MOD expenditure
2005-06	598	2.0

Source:
UK Defence Statistics

The net cash requirement (NCR) is the actual money that MOD requests from the Government in order to fund its activities. The NCR takes account of movements in working capital levels (debtors, creditors, stock) while excluding all non-cash costs (e.g. depreciation and cost of capital charges etc.) The term "Department" has been interpreted as the MOD not including its trading fund agencies (i.e. ABRO, DARA, Met Office, DSTL and Hydrographic Office). This aligns with the MOD annual report and accounts.

Departmental Sick Leave

Mr. Hayes: To ask the Secretary of State for Defence how many days of sick leave were taken by his Department's employees in each year since 1997. [216696]

Derek Twigg: Sickness absence rates in the MOD for the 12 months ending 31 December 2005, 31 December 2006, 31 December 2007 and 31 March 2008 are shown in the following table.

Sickness absence rates by year ending

FTE rates

	Industrial	Non-industrial	Total
31 March 2008	11.54	8.01	8.66
31 December 2007	11.85	8.22	8.90
31 December 2006	12.11	8.04	8.82
31 December 2005	12.54	8.55	9.30

Notes:
1. Data exclude staff in trading funds, the Royal Fleet Auxiliary and locally engaged civilians for whom sickness absence data are not readily available.
2. Data presented reflect the current Cabinet Office definition, setting a maximum absence of 225 days per person, and excludes data for weekends, annual leave and bank holidays.
3. Rates are calculated by dividing the total working days lost for each period by a weighted 13 month average for the period listed with the first and last month receiving a weighting of 0.5, and all other months a weighting of 1.

Information prior to the 12 months ending 31 December 2005 is compiled on a previous definition for monitoring sickness absence which is incomparable with figures for 1 January to 31 December 2005 onwards.

Departmental Trade Unions

Bob Spink: To ask the Secretary of State for Defence which trades unions represent members of staff in *(a)* his Department and *(b)* its agencies. [212486]

Derek Twigg: The MOD currently recognises the following trade unions and staff associations which represent staff in a wide range of grades, trades and professions:

Non-Industrial Trade Unions

FDA

Prospect

PCS (Public and Commercial Services Union)

Industrial Trades Unions

Unite (Amicus Section)

Unite (Transport and General Workers Union (TGWU) Section)

GMB (General and Municipal Boilermakers)

UCATT (Union of Construction, Allied Trades and Technicians)

Staff Associations

CPOA (Chief Police Officers Association)

DPF (Defence Police Federation)

ROA (Retired Officers Association)

Maritime Trade Unions

Nautilus UK

RMT (National Union of Rail, Maritime and Transport Workers)

Medical Grades and Civilian Practitioners

BMA (British Medical Association)

Teaching Grades

ATL (The Association of Teachers and Lecturers)

NAHT (National Association of Head Teachers)

NASUWT (The National Association of Schoolmasters Union of Women Teachers)

NUT (National Union of Teachers)

ASCL (Association of School and College Leaders (Formerly Secondary Heads of Association (SHA))

Locally Engaged Civilians Overseas

Germany

Ver.di (Vereinigte Dienstleistungsgewerkschaft)

Gibraltar

Unite (TGWU Section)

Unite (TGWU Section)-ACTSS (Association of Clerical Technical and Supervisory Staff)

Prospect-GGCA (Gibraltar General and Clerical Association)

Gibraltar Services Police Staff Association

Cyprus

SEK (Federation of Government, Military and Civil Service Workers)

PEO (Pan Cyprian Federation of Labour—Government/Military and Social Institute Servants)

PASYDY (Pancyprian Public Servants' Trade Union)

TURKSAE (Cyprus Turkish Military Employee Trade Union)

SBA (Sovereign Bases Abroad) Police Association

Hydrographic Meteorological and Oceanographic Training Group

Linda Gilroy: To ask the Secretary of State for Defence how many *(a)* Royal Naval personnel and *(b)* civilian staff are employed by the Hydrographic, Meteorological and Oceanographic Training Group. [219460]

Derek Twigg *[holding answer 17 July 2008]:* The Hydrographic, Meteorological and Oceanographic (HM) Training Group came under the Flag Officer Sea Training (South) command in April 2008 and at this time was renamed FOST HM. It currently employs 21 Royal Navy personnel and no civil servants.

Iraq: Peacekeeping Operations

Nick Harvey: To ask the Secretary of State for Defence how many Snatch Landrovers have been blown up in *(a)* Iraq and *(b)* Afghanistan since 2003; and what the date of each incident was. [218443]

Des Browne: I am withholding the information as its disclosure would, or would be likely to prejudice the capability, effectiveness or security of our armed forces.

Lost Working Days

Mr. Hayes: To ask the Secretary of State for Defence how many working days have been lost due to industrial action by employees for which his Department is responsible in each year since 1997. [218050]

Derek Twigg: 11,873 working days were lost as a result of strike action in the MOD, its agencies and non-departmental bodies; in the period 1997 to 2008, broken down as follows:

	Days
1997	Nil
1998	Nil
1999	Nil
2000	771
2001	16
2002	267
2003	Nil
2004	2,664
2005	Nil
2006	Nil
2007	8,155

Industrial action short of a strike is not recorded in terms of working days lost.

The MOD is committed to working in partnership with its trade unions and makes every effort to avert industrial action of any kind.

Military Bases

Mr. Graham Stuart: To ask the Secretary of State for Defence how many break-ins were reported at UK military facilities in each of the last 10 years; and if he will make a statement. [206223]

Derek Twigg: The numbers of break-ins reported to the Ministry of Defence police at UK military facilities in each of the last 10 years are shown in the following table.

For the purpose of this answer we have defined break-ins at UK military facilities as all reported instances of burglary and trespassing at MOD establishments.

	Burglaries	*Trespass*
1999	76	101
2000	182	69
2001	117	104
2002	130	103
2003	123	132
2004	113	56
2005	74	80
2006	137	67
2007	90	136
2008	[1]43	[2]40
Total	1,085	888

[1] Up to 15 May 2008.
[2] Up to 12 June 2008.

Navy, Army and Air Force Institute

Dr. Fox: To ask the Secretary of State for Defence (1) what the *(a)* turnover and *(b)* profit of Navy, Army and Air Force Institute, Germany was in each year since 2005; [220670]

(2) if he will place in the Library a copy of the most recent Navy, Army and Air Force Institute annual report and accounts. [220671]

Mr. Bob Ainsworth: The Navy Army and Airforce Institute is a separate legal entity to MOD, and a company limited by guarantee. Details of its annual accounts including turnover and profit can be obtained on request from Companies House in the usual way.

Trident: Scotland

Ms Katy Clark: To ask the Secretary of State for Defence what estimate he has made of the number of civilian jobs in Scotland dependent on the Trident programme; what the locations are of those jobs; and how many there are at each site. [219728]

Des Browne: The latest available figure for civilian jobs that directly rely upon the Trident programme in Scotland is 859, as at December 2006. It was estimated at that point that there were a further 250 indirect civilian jobs based on employment relating to support activities to the Trident programme.

The 859 direct jobs are broken down by location as follows:

Location	*Number*
HM Naval Base Clyde (Faslane)	48
Royal Navy Armament Depot Coulport	541
Vulcan Naval Reactor Test Establishment	270
Total	859

WORK AND PENSIONS

Backdated Benefits

Jenny Willott: To ask the Secretary of State for Work and Pensions what assessment his Department has made (1) of the effect on levels of *(a)* child poverty and *(b)* pensioner poverty of the Department's proposals to reduce the backdating period for council tax benefit; and if he will make a statement; [219203]

(2) what assessment his Department has made of the likely effect of its proposals to reduce the backdating period for housing benefit on levels of *(a)* homelessness, *(b)* child poverty and *(c)* pensioner poverty; and if he will make a statement. [219269]

Mr. Plaskitt: I refer the hon. Member to the written answer I gave to the hon. Member for Inverness, Nairn, Badenoch and Strathspey (Danny Alexander) on 24 April 2008, *Official Report*, columns 2173-74W.

Carers' Allowances: Darlington

Mr. Milburn: To ask the Secretary of State for Work and Pensions how many people received carer's allowance in Darlington constituency in each of the last five years. [219622]

Mrs. McGuire: The available information is in the following table.

Number of people in receipt of carer's allowance in Darlington parliamentary constituency

November each year	*Number*
2007	790
2006	820
2005	780
2004	790
2003	790

Notes:
1. Figures show the number of people in receipt of an allowance, and exclude people with entitlement where the payment has been suspended.
2. This information is available on the Department for Work and Pensions website at
http://83.244.183.180/100pc/ca/tabtool_ca.html
Source:
DWP Information Directorate: Work and Pensions Longitudinal Study.

Children: Maintenance

Rosie Cooper: To ask the Secretary of State for Work and Pensions when the hon. Member for West Lancashire's constituent Miss Lorraine Preston's claim for child maintenance payments will be resolved by the Child Support Agency. [216314]

Mr. Plaskitt: The administration of the Child Support Agency is the matter for the Chief Executive. He will write to my hon. Friend with the information requested.

Letter from Stephen Geraghty, dated 21 July 2008:

In reply to your recent Parliamentary Question about the Child Support Agency, the Secretary of State promised a substantive reply from the Chief Executive.

You asked the Secretary of State for Work and Pensions, when the hon. Member for West Lancashire's constituent Miss Lorraine Preston's claim for child maintenance payments will be resolved by the Child Support Agency. [216314]

As details about individual cases are confidential, I have written to you separately about this case.

Departmental Buildings

Pete Wishart: To ask the Secretary of State for Work and Pensions on which buildings occupied by his Department's agencies and non-departmental public bodies the lease will be due for renewal in the next four years. [214660]

Mrs. McGuire: The majority of the DWP estate has been sold (freehold, feuhold and long leasehold interests) or transferred (short leasehold interests) to Land Securities Trillium under a Private Finance Initiative contract known as PRIME which runs until 2018.

The proceeds were released to HM Treasury in April 1998 for the original Department for Social Security estate and further in December 2003 when PRIME was expanded to include the former Employment Services estate. DWP holds no valuable leases or freeholds following the letting of the PRIME Contract and its subsequent expansion.

Consequently we do not hold any information for these buildings as lease responsibilities lie with Land Securities Trillium.

For the other DWP agencies and non-departmental public bodies (NDPBs) the position is outlined as follows.

The Rent Service

The following buildings are occupied where a lease becomes renewable in the next four years.

Building name	*Location*	*Tenure*	*Lease break*
Hawthorn House (1st Floor), Emperor Way	Exeter	Lease	24 March 2009
5th Floor, Holland House Oxford Road	Bournemouth	Lease	1 October 2008
4 London Court, East Street	Reading	Lease	15 June 2009
St. Mary's House (1st Floor), Victoria Road	Chelmsford	Lease	28 September 2009
1st Floor, Adelphi House, 8 Turret Lane	Ipswich	Lease	28 September 2009

	Norwich	Lease	2 September 2011

Health and Safety Executive (HSE)

There are 21 buildings where leases are to be renewed and the locations and dates are as follows.

Building name	*Location*	*Tenure*	*Lease break/end*
AW HSE	Luton	Lease	20 January 2011
Lakeside 500	Norwich	Lease	18 September 2011
Phoenix House	East Grinstead	Lease	18 March 2012
OCNS-Harwell	Oxfordshire	Lease	24 March 2011

Building name	Location	Tenure	Lease breaklend
Hagley Road	Birmingham	Lease	24 June 2012
Haswell House	Worcester	Lease	19 February 2009
Lyme Vale Court	Stoke	Lease	8 February 2011 8 February 2016
City Gate West	Nottingham	Lease	22 December 2008
Edison Court	Wrexham	Lease	12 August 2009
Darkgate Building	Carmarthen	Lease	31 December 2009
Ballard House	Plymouth	Lease	24 March 2011
Government Building	Llanishen	MOTO	31 March 2010
Grove House	Manchester	Lease	16 July 2012
Marshall House	Preston	Lease	27 August 2011
Daniel House	Bootle	Lease	16 October 2009
Cherry Lane Warehouse	Walton	Lease	11 December 2008
Marshalls Mill	Leeds	Lease	18 February 2011
Arden HSE, 5th Fl	Newcastle Upon Tyne	Lease	24 December 2010
Edgar Allen House	Sheffield	Assigned Lease	24 March 2011
West George Street	Glasgow	Lease	8 September 2008
Longman House	Inverness	MOTO	31 March 2009

NDPBs and Arm's Length Bodies

There are no leases that are due for renewal in the next four years.

Departmental Disciplinary Proceedings

Mr. Redwood: To ask the Secretary of State for Work and Pensions how many staff in his Department and its agencies have been *(a)* dismissed and *(b)* disciplined for their conduct in the last two years. [217404]

Mrs. McGuire: The Department introduced a new personnel computer system incrementally from November 2006, being fully implemented by April 2007, information is not available from this system prior to April 2007.

The information provided in the tables below reflects data recorded on that system for the number of staff *(a)* dismissed and *(b)* subject to disciplinary action since April 2007.

	Number
Employees dismissed 1 April 2007 to 31 March 2008	202
Employees dismissed 1 April 2008 to 30 June 2008	55

	Number
Employees disciplined 1 April 2007 to 31 March 2008	1,114
Employees disciplined 1 April 2008 to 30 June 2008	235

Departmental Furniture

Mr. Hoban: To ask the Secretary of State for Work and Pensions how many *(a)* chairs, *(b)* desks and *(c)* other office furnishings have been purchased by his Department and its agencies in each of the last five years; and at what cost in each case. [211762]

Mrs. McGuire: The Department does not readily hold information about individual number of chairs, desks and other office furnishings purchased and could provide this only at disproportionate cost. Information on expenditure that is available is provided in the following table.

£ million

Financial year	Chairs	Desks	Other office furnishings	Total cost
2003-04	—	—	—	13
2004-05	—	—	—	4
2005-06	1.5	3.5	3	8
2006-07	2	5	4	11
2007-08	1	2	2	5

Departmental Orders and Regulations

Mr. Hoban: To ask the Secretary of State for Work and Pensions how many statutory instruments have been *(a)* made and *(b)* revoked by Ministers in his Department and its predecessor since 1997. [204762]

Mrs. McGuire: The Department for Work and Pensions, which was formed on 8 June 2001 from parts of the former Department of Social Security, the former Department for Education and Employment and the Employment Service, has made a total of 659 statutory instruments since its formation.

Information on statutory instruments made before June 2001 and on statutory instruments revoked is not collated centrally and could be provided only at disproportionate cost.

Departmental Public Participation

Mrs. May: To ask the Secretary of State for Work and Pensions pursuant to the answer of 16 June 2008, *Official Report*, column 732W, on departmental public participation, what the cost was of each project listed; and what steps *(a)* have been taken and *(b)* are planned as a result of the findings of each project. [213017]

Mrs. McGuire: Details of the costs, in 2007-08, of the projects listed in the answer of 16 June 2008, *Official Report*, column 732W, and the steps taken or planned as a result of the findings of each project are provided in the following table.

Project	*Company*	*Steps taken/planned*	*2007-08 cost (£)*
Families and Children study	National Centre for Social Research	Findings are used to help monitor and feed into various government policy areas related to families and children and their income, employment, childcare, disability, health, child outcomes and activities and on child maintenance issues.	768,891
How do people think DWP should respond to the future	Ipsos MORI	The findings of the research have been disseminated to Ministers and officials and will help improve our understanding of the public's priorities for the Department and its policies. More specifically it helped inform the command paper: Ready for work, full employment in our generation published in December 2007.	127,597
Attitudes to state pensions	British Market Research Bureau	A number of omnibus questions which helped inform policy understanding of the state pension package	5,590
Living standards	National Centre for Social Research	Results were used to inform development of living standard questions on the Family Resources Survey	128,400
Living standards (methodological work)	National Centre for Social Research	Results were used to inform development of living standard questions on the Family Resources Survey	35,599
Community Care Grants	British Market Research Bureau	Findings were used to inform policy understanding of community Care Grants.	11,280
Claimants' experiences of changes in circumstances and the effect of recovering overpayments (Phases 2 and 3)	Social Policy Research Unit, University of York	Findings informed policy development to facilitate customer change of circumstance reporting.	145,400
NatCen Omnibus Survey—exploring attitudes to child poverty	National Centre for Social Research	The findings are being used to inform our child poverty strategy and are referenced in the March 2008 publication 'Ending child poverty: everybody's business'.	20,000
British Social Attitudes Survey	National Centre for Social Research	This survey covers a range of issues and findings help inform a range of policy issues.	95,000
NatCen Omnibus Survey—measuring PSA 17 (Later Life)	National Centre for Social Research	Results will be used to provide regular monitoring information to delivery board for later life PSA (17)	7,360
ONS Omnibus survey (disability module)	Office for National Statistics	Findings are used to conduct internal analysis to monitor departmental targets in relation to disability and equality.	143,836
English Longitudinal Study of Ageing	National Centre for Social Research	Findings are used to provide evidence for a range of policy areas. For example, in the past ELSA data have been used to produce key evidence for the Pensions White Paper and to inform the Government's strategy on the wellbeing of older people.	[1]400,000
Individuals' attitudes and likely reactions to the personal account reforms, 2007	Ipsos MORI	Results have informed policy development in relation to the private pension reforms.	375,500
Reasons why individuals might remain in or opt out of the personal account scheme	Ipsos MORI	Findings have helped inform policy development in relation to the private pension reforms.	62,820
Employers' attitudes and likely reactions to the personal account reforms, 2007	British Market Research Bureau	Findings have helped inform policy development in relation to the private pension reforms	257,224
Understanding employers' responses to the personal account reforms	British Market Research Bureau	This research has helped inform policy development in relation to the private pension reforms.	73,240
Pensions Education Fund	IFF Research Ltd	The findings were fed into the review of the future of the Pension Education Fund, while detailed 'lessons learned' about engaging employers and delivering information are being collated from this evaluation, and other sources, over the two year programme period to inform future policy.	41,875
Information Needs at Retirement	RS Consulting Ltd	The findings have fed into a number of related policy areas: these include the policy options for the decumulation of the pension funds of personal account holders and stakeholders' work on annuity information products following on from HM Treasury's annuities Open Market Option Review.	71,215
Customer Purchase Outcome Survey	British Market Research Bureau	The findings have allowed us to gain a clearer understanding of pension holders' purchase intentions and actions and the sources and types of information they use to enable them to make purchase decisions.	[1]10,545
Trust and confidence in pensions and pension providers	British Market Research Bureau	The results were used to contribute to the development of communications strategies for respective target audiences.	10,975
Understanding why employees do not participate in employer pension schemes	Ipsos MORI	This research aimed to understand why employees do not participate in pension schemes where there is a 3% or more employer contribution.	22,230
At Retirement Monitor 2007	Marketing Sciences Ltd	DWP are part of a consortium contributing to this survey research. The work will contribute to and inform wider research in pension reform.	[1]14,100

Project	Company	Steps taken/planned	2007-08 cost (£)
Retirement Planning Monitor 2007	Marketing sciences Ltd	DWP are part of a consortium contributing to this survey research. The work will contribute to and inform wider research in pension reform.	[1]8,500
Cost of running pension schemes: A feasibility study	RS Consulting Ltd	This research was aimed at designing a questionnaire that could be used to gather information on the administrative costs of running pension schemes. As a result of this work we will be looking to commission a large scale quantitative survey to gather detailed information on scheme administration costs	82,360
Employers Pension Provision 2007	British Market Research Bureau	Results have helped inform policy development on pension reforms, including Personal Accounts.	261,430
Understanding responses to pension forecasts	Independent Social Research Ltd	The findings form part of the evidence base being considered in the continuous development of improved strategies for informing people of their state pension entitlement	48,958
Information needs of auto-enrolled individuals	British Market Research Bureau	This study identified the information requirements and possible channels and timings of information delivery to individuals in the run up to automatic enrolment into a personal account, or qualifying workplace pension, in 2012. Findings will feed into the Enabling Savings for Retirement information and communications strategy.	50,882
State Pension Deferral	British Market Research Bureau	Results will be used to inform policy understanding of state pension deferral.	94,085
Accrual of basic state pension	National Centre for Social Research	The findings will provide a better understanding of the characteristics and BSP accrual rates of those retiring from 2010 onwards.	108,350
Pension Service customer survey	British Market Research Bureau	The research is being used to inform operational improvements to the Pensions Disability and Carers Service.	257,799
Child Support and Relationship Breakdown survey	National Centre for Social Research	The results have been used among other things to inform the development of the information and support service offered by the Child Maintenance Enforcement Commission.	558,978
Child support policy telephone survey	British Market Research Bureau	Findings informed the design of the information and support services as part of the Child Maintenance Enforcement Commission and contributed to the Bill process which will enable the changes to the CSA to commence.	9,200
Public attitudes to key aspects of the welfare reform programme	Brahm	The results are used to contribute to the development of communications strategies for respective target audiences.	40,850
Attitudes to retirement	Ipsos MORI	The results were used to stimulate public debate with regards to retirement and pension saving.	4,480
Attitudes to pension saving	YouGov	The results were used to stimulate public debate with regards to retirement and pension saving.	1,550
NatCen Omnibus Survey (module 1)—examining attitudes to mental health and employment	National Centre for Social Research	Findings from this project, together with the findings from module 2 below, have been used to develop and inform the Department's agenda on mental health and employment.	60,000
NatCen Omnibus Survey (module 2) -examining attitudes to seeking psychological therapies for mental health conditions	National Centre for Social Research	Findings from this project; together with the findings from module 1 above, have been used to develop and inform the Department's agenda on mental health and employment.	60,000
Focus groups on assesing child support client information and support needs	CapGemini	Findings were used to identify channels, format and messages that non resident parents and parents with care require through the new information and support service which will be delivered by Child Maintenance Enforcement Commission.	100,000

Departmental Responsibilities

Mr. Maude: To ask the Secretary of State for Work and Pensions how many reviews of regulation *(a)* his Department and *(b)* its agencies have conducted or commenced since July 2007; and in which areas. [215619]

Mrs. McGuire: Information on the number of reviews of regulation that the Department and its agencies have undertaken in the last year is not held centrally. However, the Department for Work and Pensions constantly keeps its regulation under review across policy and operations. For example the Department has undertaken a thorough review of statutory sick pay and is taking forward reforms identified in the independent review of the private pensions regulatory framework.

The Health and Safety Executive has reviewed, for example, the Factories Act 1961; the Offices, Shops and Railway Premises Act 1963; and the Health and Safety Information for Employees Regulations 1989. Work has also started to review the Pipelines Safety Regulations 1996.

Departmental Written Questions

Richard Younger-Ross: To ask the Secretary of State for Work and Pensions how many and what proportion of Parliamentary questions for answer on a named day to his Department received a *(a)* holding and *(b)* substantive answer on the named day in each year since 2001. [190279]

Mrs. McGuire: The information requested is contained in the following table:

	Holding replies		Substantive replies			
	Number	Percentage of total	Number	Percentage of total	Total named day questions answered	Total all written questions answered
2001	157	30.7	355	69.3	512	906
2002	522	53.1	461	46.9	983	2,273
2003	154	36.3	270	63.7	424	2,027
2004	153	24.3	476	75.7	629	2,890
2005	221	38.1	359	61.9	580	2,562
2006	340	50.8	329	49.2	669	3,887
2007	421	59.8	283	40.2	704	3,421
Total	1,968	43.7	2,533	56.3	4,501	17,966

Mike Penning: To ask the Secretary of State for Work and Pensions how many written questions to his Department had not received an answer as at 25 February 2008 for *(a)* between two and four, *(b)* between four and six, *(c)* between six and eight and *(d)* more than eight weeks; and how many in each category were tabled for named day answer. [193393]

Mrs. McGuire: The information requested is in the following table:

Weeks since question received, as at 25 February 2008

	Question type		
	ordinary	named day	Total
Up to two weeks	120	17	137
Between 2 and 4 weeks	124	13	137
Between 4 and 6 weeks	42	4	46
Between 6 and 8 weeks	16	1	17
More than 8 weeks	30	5	35
Totals	332	40	372

Disability Discrimination Act 2005

Mr. Harper: To ask the Secretary of State for Work and Pensions (1) what guidance on reasonable adjustments for people with mental health conditions he has issued to assist organisations in complying with the Disability Discrimination Act 2005; [220215]

(2) what Government publications contain guidance on requirements for organisations in relation to compliance with the Disability Discrimination Act 2005. [220506]

Mrs. McGuire: The primary source of guidance on duties under the Disability Discrimination Act 1995, as amended by the Disability Discrimination Act 2005, is the range of Codes of Practice and information published by the former Disability Rights Commission. The Codes of Practice may be purchased from the Stationery Office or may be downloaded free of charge, along with other guidance, from the website of the Equality and Human Rights Commission:

www.equalityhumanrights.com

In addition, the Government have published a range of guidance giving advice to employers, service providers, education providers and others with duties under the Disability Discrimination Act on how they can meet their obligations under the Act. However, there is no centrally held list of these publications and such a list could be compiled only at disproportionate cost.

My Department has published general guidance for organisations on its website about reasonable adjustments that can be made for disabled people, including people with mental health conditions.

Disabled: Respite Care

Mr. Harper: To ask the Secretary of State for Work and Pensions pursuant to paragraph 3.11 of the paper, Carers at the heart of 21st-century families and communities, how much of the £150 million funding for breaks for carers of disabled children his Department plans to provide in each of the next two years. [219446]

Mrs. McGuire *[holding answer 17 July 2008]:* Funding for breaks for carers referred to in paragraph 3.11 of Carers at the heart of 21st century families and communities is the responsibility of my right hon. Friend the Secretary of State for Health.

We have allocated up to £38 million (dependent upon demand for services) to fund the initiatives that fall to this Department to deliver. This includes up to £10 million a year to fund replacement care for carers who wish to access education or training opportunities.

Equality 2025

Mr. Harper: To ask the Secretary of State for Work and Pensions pursuant to the answer of 1 July 2008, *Official Report*, column 818W, on Equality 2025, how much of the expenditure was *(a)* capital and *(b)* resource; and if he will place in the Library a copy of the annual accounts of Equality 2025 for each year since its establishment. [219393]

Mrs. McGuire: Equality 2025 does not have an administration budget, the expenditure for Equality 2025 is paid out of a programme budget.

This means the budget cannot be used to pay for resources (staffing) or capital costs, as this type of expenditure can only be met from an administration budget. Expenditure for the resources that support Equality 2025 is included in the Office for Disability Issues administration budget.

The annual accounts will form part of Equality 2025's first report, which will be published shortly. A copy will be placed in the Library.

Financial Assistance Scheme

Jenny Willott: To ask the Secretary of State for Work and Pensions what the *(a)* total and *(b)* average amount paid out under the Financial Assistance Scheme has been in each month since it was established; and if he will make a statement. [216551]

Mr. Mike O'Brien: The total amount paid out by the Financial Assistance Scheme Operational Unit for each month in which payments were made has been:

Month	Initial	Annual	Gross expenditure (£)
2005			
December	13	0	36,894
2006			
January	15	0	6,371
February	27	0	35,996
March	32	0	20,072
April	45	0	39,000
May	86	0	144,000
June	149	5	213,000
July	187	27	363,355
August	240	66	346,155
September	318	76	311,301
October	377	102	212,399
November	519	118	274,684
December	904	124	686,599
2007			
January	751	136	326,659
February	823	153	359,132
March	882	175	506,441
April	937	205	311,721
May	1,014	222	305,209
June	1,073	240	348,517
July	1,116	268	352,981
August	1,419	278	1,955,995
September	2,269	291	1,575,369
October	2,717	320	1,259,933
November	3,064	371	1,146,130
December	3,333	685	1,223,222
2008			
January	3,623	844	2,374,841
February	3,868	922	1,227,357
March	4,117	971	1,168,925
April	4,371	1,114	1,073,789
May	4,558	1,202	1,342,270
June	4,938	1,412	4,657,200

While it would be possible to calculate an average payment from these figures, it would not be meaningful due to a number of distorting factors. These include:

where changes to the legislation have resulted in some members receiving substantial payments for entitlement for past periods.

the phased implementation of regulatory changes, i.e. the FAS operational unit are now 51 per cent. of the way through the uplift from 80 to 90 per cent.

in any one month there will be a combination of members receiving payments for past periods, payments only for the current month, payments for part month, and some members that will have had a FAS payment adjusted for pension credit abatement.

Jenny Willott: To ask the Secretary of State for Work and Pensions what legal costs have been incurred by his Department in relation to the Financial Assistance Scheme in each month since the scheme was established; and if he will make a statement. [216587]

Mr. Mike O'Brien: There have been no specific legal costs incurred by the Department for Work and Pensions in relation to the operation of the financial assistance scheme. Legal advice on policy and legislation governing FAS assistance levels is provided by departmental lawyers. To disaggregate this advice from other areas of advice would give rise to disproportionate cost.

Housing Benefit

Lembit Öpik: To ask the Secretary of State for Work and Pensions how much was paid in housing benefit in the UK in each of the last three years. [219874]

Mr. Plaskitt: Information regarding Northern Ireland is a matter for my right hon. Friend the Secretary of State for Northern Ireland.

The information for Great Britain is in the table.

Housing benefit expenditure in Great Britain

		(outturn £ million)
	Nominal terms	Real terms 2008-09 prices
2004-05	13,158	14,698
2005-06	13,928	15,237
2006-07	14,840	15,782

Notes:
1. Information sourced from local authority claims for housing revenue account subsidy and housing benefit subsidy.
2. Figures to 2005-06 are taken from the final audited subsidy claims submitted to the Department by each local authority.
3. Figures for 2006-07 are not yet audited, and represent provisional out-turn for the year.

Source:
DWP expenditure tables.

Benefit expenditure information is available online at

www.dwp.gov.uk/asd/asd4/medium_term.asp

Local authority expenditure Information is available online at

www.dwp.gov.uk/asd/asd4/HBandCTB_expenditure.asp

Incapacity Benefit: Bedfordshire

Andrew Selous: To ask the Secretary of State for Work and Pensions how many incapacity benefit claimants there were in South West Bedfordshire constituency in November 2007. [220266]

Mrs. McGuire: At November 2007, there were 2,900 claimants of incapacity benefit or severe disablement allowance in South West Bedfordshire parliamentary constituency.

Incapacity Benefit: Tamworth

Mr. Jenkins: To ask the Secretary of State for Work and Pensions what percentage of the working age population of Tamworth constituency received incapacity benefit in the latest period for which figures are available. [220105]

Mrs. McGuire: At November 2007, an estimated 5.7 per cent. of the working age population in Tamworth parliamentary constituency were incapacity benefit or severe disablement allowance claimants.

Pension Credit

Jenny Willott: To ask the Secretary of State for Work and Pensions what the estimated additional annual costs (1) of allowing the pension credit assessed income period to continue automatically after the age of 80 are; and if he will make a statement; [219210]

(2) of his Department's proposals to allow pension credit to be retained for up to 13 weeks of a temporary absence abroad are; and if he will make a statement. [219211]

Mr. Mike O'Brien: The proposals to allow pension credit to be retained for up to 13 weeks of a temporary absence abroad and the introduction of an indefinite assessed income period for those pension credit customers aged 80 or over or who have an assessed income period spanning their 80th birthday (benefiting most customers aged 75 or over) are part of a package of pensions measures that will make claiming benefit entitlements simpler and less intrusive and deliver extra support to pensioners. This package includes the introduction of a more automatic claims process for housing benefit and council tax benefit claims made over the phone with pension credit claims, which will benefit around 50,000 pensioners over the next few years. The costs and savings associated with wider pension measures along with the costs of the proposed changes to rules on temporary absence abroad in pension credit and introducing an indefinite assessed income period for those aged 80 or over are set out in the following table.

Estimates of costs/savings: 2007-08 prices

£ million

	2008	*2009*	*2010*	*2015*	*2020*	*2030*	*2040*	*2050*
Total pension measures	575	-25	0	0	75	150	200	250
Of which:								
Absence abroad	1.0	2.0	2.0	1.5	1.5	1.5	1.5	1.5
Indefinite assessed income periods for those aged 80 or over	—	-3.5	-2.5	-0.5	-0.5	-0.5	-0.5	-0.5

Notes:
1. Negative figures represent net savings.
2. The total set of wider pensions measures includes the simplification package and spending on other pension measures in 2008-09, 2009-10 and 2010-11.
3. Figures relate to financial years.
4. Estimates represent combined administrative and benefit costs/savings.
5. Total estimates for the wider portfolio of pensions measures have been rounded to the nearest £25 million.
6. Estimates of pension credit absence abroad changes and the indefinite assessed income periods for those aged 80 or over have been rounded to the nearest £0.5 million.
7. Indefinite assessed income periods for those aged 80 or over are due to be introduced from April 2009 so no costs are shown in 2008. On the introduction of pension credit assessed income periods (AIPs)—where appropriate—were set for five and seven years which accounts for the high volume of AIPs reaching maturation in 2009-10.
8. Other pension measures include the up-rating of the pension credit standard minimum guarantee this year by 4.2 per cent. (more than the earnings commitment made for pension credit over the long term, the relevant average earnings figure was 3.5 per cent.) and the one-off additional amount with the winter fuel payment for the winter of 2008-09.
9. Simplification package includes the following measures: Automatic forwarding of housing benefit/council tax benefit claim details taken alongside a pension credit claim to the local authority, without the need for a signed claim form; reduction of the maximum housing benefit/council tax benefit backdating period from 12 to three months; reduction of the maximum pension credit time for claiming period from 12 to three months; increasing the length of time pension credit recipients may be abroad without losing their entitlement from four to 13 consecutive weeks; and the introduction of an indefinite assessed income period for those pension credit customers aged 80 or over or who have an assessed income period spanning their 80th birthday (benefiting most customers aged 75 or over).
10. Estimated costs and savings are consistent with the 2008 Budget settlement but it should be noted that they are based on a set of assumptions and are subject to change as new data become available.
11. Estimated costs/savings of the pension credit absence abroad and indefinite assessed income period measures have been projected forward from 2011 in line with the growth in the long-run forecast of expenditure on pension credit.

DWP modelling

Pension Credit: Finance

Lynne Featherstone: To ask the Secretary of State for Work and Pensions what estimate he has made of the cost saving from the proposed reduction in the maximum period for claiming backdated pension credit from 12 to three months; and if he will make a statement. [214000]

Mr. Mike O'Brien: The proposal to change the length of time allowed for customers to claim pension credit (known as backdating) from 12 to three months is part of a package of pensions measures that will make claiming benefit entitlements simpler and less intrusive and deliver extra support to pensioners. This package includes the introduction of a more automatic claims process for housing benefit and council tax benefit claims made over the phone with pension credit claims, which will benefit around 50,000 pensioners over the next few years. The costs and savings associated with wider pension measures along with the savings produced by the proposed changes to the time allowed for claiming pension credit are set out in the following table.

Estimates of costs/savings

£ million, 2007-08 prices

	Total pension measures	*Of which: Pension credit backdating*
2008	575	-55
2009	-25	-100
2010	0	-95
2015	0	-70
2020	75	-65
2030	150	-55
2040	200	-45

Estimates of costs/savings

	£ million, 2007-08 prices	
	Total pension measures	*Of which: Pension credit backdating*
2050	250	-40

Notes:
1. Negative figures represent net savings.
2. The total set of wider pensions measures includes the simplification package and spending on other pension measures in 2008-09, 2009-10 and 2010-11.
3. Figures relate to financial years.
4. Estimates represent combined administrative and benefit costs/savings.
5. Total estimates for the wider portfolio of pensions measures have been rounded to the nearest £25 million.
6. Estimates of pension credit backdating have been rounded using the following convention: figures over £100 million have been rounded to the nearest £10 million and figures between £10 million and £100 million rounded to the nearest £5 million.
7. Other pension measures include the up-rating of the pension credit standard minimum guarantee this year by 4.2 per cent. (more than the earnings commitment made for pension credit over the long term, the relevant average earnings figure was 3.5 per cent.) and the one-off additional amount with the winter fuel payment for the winter of 2008-09.
8. Simplification package includes the following measures: Automatic forwarding of housing benefit/council tax benefit claim details taken alongside a pension credit claim to the local authority, without the need for a signed claim form; reduction of the maximum housing benefit/council tax benefit backdating period from 12 to 3 months; reduction of the maximum pension credit time for claiming period from 12 to 3 months; increasing the length of time pension credit recipients may be abroad without losing their entitlement from 4 to 13 consecutive weeks; and the introduction of an indefinite assessed income period for those pension credit customers aged 80 or over or who have an assessed income period spanning their 80th birthday (benefiting most customers aged 75 or over).
9. Estimated costs and savings are consistent with the 2008 Budget settlement but it should be noted that they are based on a set of assumptions and are subject to change as new data become available.
10. Estimated costs/savings of the pension credit backdating measure has been projected forward from 2011 in line with the growth in the long-run forecast of expenditure on pension credit.

Pension Credit: Overpayments

Mr. Frank Field: To ask the Secretary of State for Work and Pensions pursuant to the answer of 26 November 2007, *Official Report*, column 138W, on pension credit: overpayments, if he will break down *(a)* how much in overpayment was caused by and *(b)* how many cases of (i) fraud and (ii) error there were in each year. [193702]

Mr. Plaskitt *[holding answer 13 March 2008]:* DWP is committed to reducing fraud and error across the benefits system, including pension credit, while at the same time increasing the identification, correction and recovery of overpayments. In line with these aims, a comprehensive error reduction strategy is in place and stretching targets have been set for the recovery of overpayments. As a result, in 2006-07, DWP identified record levels of overpayments and achieved record levels of overpayment recoveries.

Information on the level of identified overpayments in pension credit is in the following table. The trend in cash values reflects: our increasing efforts to identify cases of fraud and error; clearance in 2006-07 of a significant number of outstanding cases from the previous year, and the fact that for each year some of the overpayments dated back to the introduction of pension credit in 2003.

Identified pension credit overpayments broken down by fraud and error

	Amount of overpayment			*Number of cases*		
	Fraud (£)	*Customer error (£ million)*	*Official and other error (£ million)*	*Fraud*	*Customer error*	*Official and other error*
2004-05	66,000	2.2	4.2	73	6,700	22,000
2005-06	150,000	4.8	11.7	100	8,800	74,000
2006-07	565,000	33.4	35.7	275	59,000	109,000

Personal Accounts: Small Businesses

Chris Ruane: To ask the Secretary of State for Work and Pensions what representations he has received from representatives of the small business sector on the introduction of personal accounts in 2012. [218878]

Mr. Mike O'Brien: In response to the May 2006 White Paper consultation, Security in retirement: towards a new pensions system, and the December 2006 White Paper Personal accounts: a new way to save; the Department for Work and Pensions received responses from various representatives of the small businesses sector regarding the introduction of personal accounts in 2012.

The organisations broadly welcomed the Government's pension reforms. Full details of the responses are available in:

Security in retirement: towards a new pension system—Summary of responses to the consultation; and

Personal Accounts: a new way to save—Summary of responses to the consultation

DWP Ministers and officials hold meetings with organisations representing the small businesses sector on an ongoing basis.

Rented Housing: Low Incomes

Andrew Selous: To ask the Secretary of State for Work and Pensions how many staff worked for the Rent Service *(a)* at the most recent date for which figures are available and *(b)* in 1997. [220622]

Mr. Plaskitt: The administration of The Rent Service is a matter for the chief executive of The Rent Service, Patrick Boyle. I have asked him to provide the hon. Member with the information requested.

Letter from Patrick Boyle, dated 18 July 2008:

In reply to your recent Parliamentary Question about The Rent Service, the Secretary of State promised a substantive reply from the Chief Executive.

You asked the Secretary of State for Work and Pensions, how many staff worked for The Rent Service a) at the latest period for which figures are available and b) in 1997.

a) The Rent Service had 571 (headcount) staff at the end of June 2008.

b) The Rent Service did not become an Executive Agency until 1 October 1999 therefore figures for 1997 are unavailable.

Social Security Benefits: Fraud

Mr. Clappison: To ask the Secretary of State for Work and Pensions pursuant to the answer of 16 June 2008, *Official Report*, column 740W, on social security benefits: fraud, how many people *(a)* received a caution and *(b)* were convicted in respect of an offence of benefit fraud in each quarter for the last three years for which figures are available; and how many of those convicted were dealt with by way of (i) a discharge, (ii) a fine, (iii) a community sentence, (iv) a suspended sentence, (v) a custodial sentence, (vi) a custodial sentence of more than six months and (vii) a custodial sentence of more than 12 months. [216777]

Mr. Plaskitt: Information broken down by the length of the custodial sentence is not available.

The available information for DWP administered benefits is in the table.

Winter Fuel Payments: Halifax

Mrs. Riordan: To ask the Secretary of State for Work and Pensions how many people in Halifax received the winter fuel allowance in 2007-08. [220149]

Mr. Mike O'Brien: Figures for winter 2007-08 are not yet available. In winter 2006-07, 17,940 people in the Halifax constituency received a winter fuel payment.

Notes:

1. Figures rounded to the nearest 10.

2. Parliamentary constituencies are assigned by matching postcodes against the relevant ONS postcode directory.

Source:

Information directorate 100 per cent data.

Young People: Mothers

Tim Loughton: To ask the Secretary of State for Work and Pensions what estimate he has made of *(a)* the proportion of teenage mothers who receive benefits and *(b)* the proportion of benefits payments that are paid to teenage mothers. [218377]

Mr. Plaskitt: Information about the proportion of teenage mothers who receive benefits is not available. Information about the proportion of benefits payments that are paid to teenage mothers could be provided only at disproportionate cost.

FOREIGN AND COMMONWEALTH OFFICE

Afghanistan: Peacekeeping Operations

Bob Spink: To ask the Secretary of State for Foreign and Commonwealth Affairs how many British police officers are to be deployed with EUPOL Afghanistan; and if he will make a statement. [220329]

Dr. Howells: We aim to provide 20 British personnel to the European Security and Defence Policy mission to Afghanistan. As at 17 July 2008, 15 British police officers (five serving and 10 retired) had accepted posts in the mission. We await the outcome of further nominations.

Aghanistan: Peacekeeping Operations

Bob Spink: To ask the Secretary of State for Foreign and Commonwealth Affairs how many British police officers were stationed in Kabul at the latest date for which figures are available. [219453]

Dr. Howells *[holding answer 17 July 2008]:* On 15 July 2008 there were six British police officers (four serving and two retired) working with the Afghan police in Kabul, including officers from the Police Service of Northern Ireland and the Ministry of Defence police. Four more officers (three serving, one retired) will deploy later this month.

The Government currently have a total of 84 personnel deployed to work with the police in Afghanistan.

Bob Spink: To ask the Secretary of State for Foreign and Commonwealth Affairs which Government Departments he *(a)* consulted and *(b)* involved in the decision to authorise the deployment of British police officers to Kabul. [219630]

Dr. Howells *[holding answer 17 July 2008]:* The Home Office, the Ministry of Defence, the Northern Ireland Office and the Foreign and Commonwealth Office were all involved in the deployment of police officers to Kabul, in consultation with the Afghan Drugs Inter Departmental Unit which leads on planning for these deployments.

Ballistic Missiles

Sir John Stanley: To ask the Secretary of State for Foreign and Commonwealth Affairs which countries have made their annual declaration to the Hague Code of Conduct against ballistic missile proliferation for *(a)* 2006 and *(b)* 2007. [218467]

Dr. Howells *[holding answer 17 July 2008]:* There are currently 130 countries subscribing to the Hague Code of Conduct (HCOC) against ballistic missiles. The following 59 countries submitted their annual declarations for 2006:

Argentina, Australia, Austria, Belarus, Belgium, Benin, Bosnia and Herzegovina, Bulgaria, Canada, Chile, Colombia, Croatia, Cyprus, Czech Republic, Denmark, Ecuador, Eritrea, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Japan, Latvia, Libyan Arab Jamahiriya, Lithuania, Luxembourg, Macedonia (Former Yugoslav Republic of), Malta, Federated States of Micronesia, Moldova, Morocco, the Netherlands, Norway, Paraguay, Peru, Philippines, Poland, Portugal, Republic of Korea, Romania, Russian Federation, Slovakia, Slovenia, South Africa, Spain, Surinam, Sweden, Switzerland, Tajikistan, Turkey, Ukraine, UK, US and Uruguay.

And the following 78 countries have submitted their annual declaration for 2007:

Albania, Andorra, Argentina, Armenia, Australia, Austria, Belarus, Belgium, Bosnia and Herzegovina, Bulgaria, Burkina Faso, Canada, Chile, Colombia, Costa Rica, Croatia, Cyprus, Czech Republic, Denmark, Dominican Republic, Ecuador, El Salvador, Eritrea, Estonia, Finland, France, Georgia, Germany, Greece, Guatemala, Haiti, Holy See, Hungary, Iceland, Ireland, Italy, Japan, Kazakhstan, Kenya, Latvia, Libyan Arab Jamahiriya, Liechtenstein, Lithuania, Luxembourg, Macedonia (Former Yugoslav Republic of), Madagascar, Malawi, Malta, Federated States of Micronesia, Moldova, Monaco, Mongolia, Montenegro, Morocco, the Netherlands, New Zealand, Norway, Panama, Paraguay, Peru, Philippines, Poland, Portugal, Republic of Korea, Romania, Russian Federation, Serbia, Slovakia, Slovenia, South Africa, Spain, Sweden, Switzerland, Turkey, Ukraine, UK, US and Venezuela.

The above information was obtained from the HCOC Secretariat and was correct as of 10 July 2008.

China: Deportation

Norman Baker: To ask the Secretary of State for Foreign and Commonwealth Affairs if he will make a statement on the deportation from China of the British citizen Dechen Pemba. [220270]

Meg Munn: On 8 July Dechen Pemba, a British citizen, was deported without notice from Beijing to the UK by the Chinese authorities. Foreign and Commonwealth Office (FCO) officials have been in touch with Ms Pemba since her safe return to the UK. Our embassy in Beijing expressed formal concerns to and sought clarification from the Chinese Foreign Ministry on 11 July and repeated their concerns about the deportation at a meeting on 17 July. Senior FCO officials raised concerns about the manner of Ms Pemba's deportation with the Chinese ambassador Madame Fu Ying on 11 July.

China: Human Rights

Mr. Jim Cunningham: To ask the Secretary of State for Foreign and Commonwealth Affairs what recent steps the Government have taken to encourage the Chinese government to promote and protect the human rights of the Chinese people. [219548]

Meg Munn: Engagement on human rights with the Chinese authorities is a Government priority. Our approach includes high-level lobbying to encourage political progress and project work to deliver concrete assistance on the ground. We also use the UK-China Human Rights Dialogue to discuss issues in greater depth. The 16th round took place in Beijing at the end of January. My right hon. Friends the Prime Minister and the Foreign Secretary and my noble Friend the Minister for Africa, Asia and the UN, Lord Malloch-Brown, all raised human rights issues during their respective visits to China earlier this year and we have regularly expressed our concerns about the specific issue of human rights of Tibetans following the unrest in Tibet in March.

Departmental Information Officers

Mr. Hoban: To ask the Secretary of State for Foreign and Commonwealth Affairs what the average cost to his Department was of employing a press and media officer in 2007-08. [215192]

Meg Munn: The Foreign and Commonwealth Office (FCO) employs press and media officers in London and in our missions overseas. Locally-engaged staff are recruited and paid locally and have varying terms and conditions of service. We do not hold information centrally on these staff. It is not possible therefore to provide an overall average global figure without incurring disproportionate costs.

Press and media officers employed in the UK and those recruited in the UK but working at our missions overseas are paid in line with all other FCO staff. The average cost to the FCO of a press and media officer in the UK in 2007-08 was £38,813. Those working in London also received a London location allowance of £3,000. This is the average cost of a member of staff working in the grades below the senior management structure (senior civil service).

Diplomatic Service: Manpower

Dr. Murrison: To ask the Secretary of State for Foreign and Commonwealth Affairs what estimate he has made of the cost of employing a full-time overseas security officer *(a)* as an employee of his Department and *(b)* under a private contract; and if he will make a statement. [203483]

Meg Munn: The Foreign and Commonwealth Office maintains security staff in around 200 locations to provide a wide range of functions, and costs vary due to local circumstances. No global comparison of the cost of direct employees and contractors has been undertaken.

Dr. Murrison: To ask the Secretary of State for Foreign and Commonwealth Affairs what estimate he has made of the cost of the Control Risks contract for the provision of overseas security officers in each year since the contract was let; what mechanisms exist to ensure that value for money is achieved through this contract; and if he will make a statement. [203485]

Meg Munn: The estimated cost of the Control Risks static guarding contract, since it started in October 2003 until the end of the 2007-08 financial year (FY), is £4.09 million:

Financial year	£
2003-04	247,186
2004-05	779,372
2005-06	913,084
2006-07	1,030,906
2007-08	1,120,123

The contract was competitively tendered and is subject to continuous contract management and monitoring. The Foreign and Commonwealth Office subjects all contracts to a rigorous procurement process in line with public procurement guidelines and best practice.

Ethiopia: Eritrea

Mark Pritchard: To ask the Secretary of State for Foreign and Commonwealth Affairs if he will hold discussions with the Government of Eritrea on incursions into the international demilitarised area in the border region between Ethiopia and Eritrea. [218654]

Meg Munn: The UK's policy towards the Ethiopia-Eritrea border dispute is based on three principles: to avoid any return to war; for the border to be demarcated; and for the parties to normalise their relations. Ethiopia and Eritrea should agree a way forward to allow demarcation to proceed and for a normalisation process to begin, as set out in the Algiers Agreements of June and December 2000, to which both Ethiopia and Eritrea are signatories.

As part of the above policy, we continue to request Eritrea to remove its forces from the Temporary Security Zone—the demilitarised zone established along the border between Ethiopia and Eritrea.

My hon. Friend the Minister for the Middle East, Kim Howells, set out this policy to the Eritrean ambassador on 10 July. The UK's policy has equally been conveyed to the Government of Ethiopia, notably by my right hon. Friend the Foreign Secretary to the Ethiopian Foreign Minister Seyoum Mesfin in November and by my noble Friend the Minister for Africa, Lord Malloch-Brown, to Ethiopian Prime Minister Meles in January in Addis Ababa.

In addition, Foreign and Commonwealth Office officials continually reiterate these messages to both the Ethiopian and Eritrean ambassadors to London and to their interlocutors in the Governments of Ethiopia and Eritrea in Addis Ababa and Asmara respectively.

Iran: Diplomatic Service

Mr. Lancaster: To ask the Secretary of State for Foreign and Commonwealth Affairs how many staff were employed in the British embassy in Tehran on *(a)* 30 June 2007 and *(b)* 30 June 2008, broken down by department; and how many he expects to be employed on 30 September 2008. [219634]

Dr. Howells *[holding answer 17 July 2008]:* As of 30 June 2007, 26 UK-based staff were employed at our embassy in Tehran in the following departments:

Senior Management (2); Political and Economic (7); Press and Public Affairs (1); Commercial (2); Management and Security (6); and Visa and Consular (8).

As of 30 June 2008, 24 UK-based staff were employed at our embassy in Tehran in the following departments:

Senior Management (2); Political and Economic (6); Press and Public Affairs (1); Commercial (1); Management and Security (6); and Visa and Consular (8).

As of 30 September 2008, we expect 23 UK-based staff to be employed at our embassy in Tehran—an increase of one person in the Political and Economic section, and a reduction of one person in the Visa and Consular section and one person in the Commercial section.

Iran: Nuclear Weapons

Mr. Hague: To ask the Secretary of State for Foreign and Commonwealth Affairs pursuant to the answer of 24 June 2008, *Official Report*, columns 147-48W, on Iran (nuclear programme), what the evidential basis is for his statement that UN resolution 1803 has been fully implemented. [217391]

David Miliband: The UK is fully implementing all provisions of UN Security Council Resolution (UNSCR) 1803 (2008). The EU has already banned the supply of dual-use items covered in the resolution. Assets of individuals and entities named in the annex have been frozen by virtue of an Order in Council and the individuals have been added to the visa warnings index. The Export Credits Guarantee Department has stopped processing applications for new export credit cover for Iran. Bank Melli Iran was named as a bank of particular concern in UNSCR 1803. The UK has worked with EU partners to secure the designation of Bank Melli Iran and its subsidiaries and branches at EU level. Following designation on 24 June 2008, all assets belonging to, owned, held or controlled by Bank Melli Iran and Melli Bank Plc in the UK are frozen. HM Treasury issued guidance to financial institutions on 29 February 2008 advising them to take the risk arising from the deficiencies in Iran's anti-money laundering/counter-terrorist financing regime into account for enhanced due diligence. HM Revenue and Customs has enhanced its compliance and enforcement activity for consignments destined for Iran.

Iran: Sanctions

Mr. Hague: To ask the Secretary of State for Foreign and Commonwealth Affairs on how many occasions the UN Security Council Committee on Iran sanctions established under UN Resolution 1737 (2006) has received information on alleged violations of measures imposed by Resolution *(a)* 1737 (2006), *(b)* 1747 (2007) and *(c)* 1803 (2008); and what action was taken in each case. [217313]

David Miliband: We are aware that the Committee has received notifications on two occasions. In one case, the state sending the notification requested that it remain confidential while a judicial investigation continued.

In the other case, the Committee discussed information that certain Iranian entities displayed items in the Defence Services Asia Exhibition, hosted by the Government of Malaysia. Malaysian Deputy Prime Minister Najib Razak was quoted in the media as saying this constituted

"a direct contravention of Resolution[s] 1747 and 1803".

The Committee also noted, as a result, that the Government of Malaysia closed down Iran's pavilion at the exhibition.

Mr. Hague: To ask the Secretary of State for Foreign and Commonwealth Affairs on how many occasions the UN Security Council Committee on Iran sanctions established under UN Resolution 1737 (2006) has received a request for the sale, transfer or provision of items prohibited under paragraphs 3, 4 and 6 of that resolution; how many such requests have been granted; and on how many occasions such requests have been granted because Iran has stated it will not use such items in nuclear activities. [217314]

David Miliband: No requests for an exemption to the sale, transfer or provision of items prohibited under paragraphs 3, 4 and 6 of UN Security Council Resolution 1737 (2006) have been received.

Mr. Hague: To ask the Secretary of State for Foreign and Commonwealth Affairs what assessment he has made of breaches of UN sanctions prohibiting the supply, sale or transfer of arms or related material from Iran; and if he will make a statement. [217315]

David Miliband: The UN Sanctions Committee is the appropriate forum for matters relating to breaches of sanctions. The Committee has received two notifications from UN member states covering potential breaches to the supply of weapons from Iran. In one case, the state sending the notification requested that it remain confidential while a judicial investigation continued. In the other case, the Committee discussed information that certain Iranian entities displayed items in the Defence Services Asia Exhibition, hosted by the Government of Malaysia. Malaysian Deputy Prime Minister Najib Razak was quoted in the media as saying this constituted

"a direct contravention of Resolution[s] 1747 and 1803".

The Committee also noted as a result that the Government of Malaysia closed down Iran's pavilion at the exhibition.

Mr. Hague: To ask the Secretary of State for Foreign and Commonwealth Affairs how many written reports have been submitted to the UN Security Council following an inspection of cargoes to and from Iran in accordance with paragraphs 11 and 12 of UN Security Council Resolution 1803; and if he will make a statement. [217317]

David Miliband: No reports have been submitted to the UN Security Council following an inspection of cargoes to and from Iran.

Iran: Travel Restrictions

Mr. Hague: To ask the Secretary of State for Foreign and Commonwealth Affairs how many requests for exemptions from UN travel restrictions on Iran have been received by the committee established pursuant to UN Resolution 1737 (2006); and how many of these have been granted. [217312]

David Miliband: Since its inception, the Committee has received only one notification, from the Russian Federation, of the travel to Moscow, pursuant to paragraph 10 of UN Security Council Resolution 1737 (2006), of an individual subject to the travel notification requirement. A notification received from Indonesia, regarding the travel to Jakarta of an individual working for the Atomic

Energy Organisation of Iran, was subsequently established as unnecessary as the individual was not listed under the relevant resolutions.

Iraq: Oil

Harry Cohen: To ask the Secretary of State for Foreign and Commonwealth Affairs what reports he has received on *(a)* the provisions in the recent technical support contracts between oil multinational corporations and the government of Iraq and *(b)* preferences for future contracts involving oil extraction attached to the technical support contract; and if he will make a statement. [219737]

Dr. Howells: The Government are aware that the Government of Iraq and international oil companies are in the process of negotiating technical support contracts. Such contracts, and the details therein, are a sovereign issue for the Iraqi government.

Iraq: Peacekeeping Operations

Adam Price: To ask the Secretary of State for Foreign and Commonwealth Affairs what the Government's policy is on the legal immunity of private military contractors in the successor agreement to the UN mandate for Iraq. [219004]

Dr. Howells: The Government use private military and security companies to provide security for our diplomatic posts and for civilian officials in Iraq. As such, they play an important role in enabling us to achieve our objectives in Iraq. Although we have held initial discussions with the Government of Iraq on ways of securing a legal basis for activities by UK armed forces in Iraq following the anticipated expiry of UN Security Council Chapter VII authority, these have focussed on UK armed forces' operations and immunities. The issue of private military and security companies will be considered, if appropriate, in any future negotiations with the Government of Iraq.

Israel: Overseas Trade

Dr. Starkey: To ask the Secretary of State for Foreign and Commonwealth Affairs what guidance his Department has issued on the obligations of UK companies under the International Criminal Court Act 2001 in relation to the purchase of goods from illegal Israeli settlements; and if he will make a statement. [219692]

Dr. Howells: None. It is for companies to take their own advice about their legal position.

Dr. Starkey: To ask the Secretary of State for Foreign and Commonwealth Affairs (1) what reports he has received on UK companies buying goods from illegal Israeli settlements; [219693]

(2) what representations he has received on the compliance with international law of UK companies buying goods from illegal Israeli settlements. [219694]

Dr. Howells: We are concerned that goods from illegal Israeli settlements may be entering the UK under false pretences and without paying the correct customs duties. We have discussed this issue with Palestinian Prime Minister Salam Fayyad, the Palestinian General Delegation in London and non-governmental organisations. Several media outlets have also contacted us about the issue. We take this issue seriously and have alerted HM Revenue and Customs to it so that they can take appropriate action.

Members: Correspondence

Mr. Paul Goodman: To ask the Secretary of State for Foreign and Commonwealth Affairs when he plans to reply to the letter of 22 April 2008, reference M7079/8, from the honourable Member for Wycombe, forwarded from the Home Office, on passport photograph requirements for visas and the hijab in relation to Dubai. [217118]

Mr. Byrne: I have been asked to reply.

I confirm that Lin Homer, chief executive of UKBA, replied on 14 July 2008.

Middle East: Peace Negotiations

Mr. Hague: To ask the Secretary of State for Foreign and Commonwealth Affairs what assessment he has made of the implementation of Road Map commitments by the Palestinian and Israeli governments, in respect of their commitments under the November 2007 Annapolis agreement; and if he will make a statement. [213460]

David Miliband: The US has appointed General Fraser to monitor implementation of the Quartet Roadmap. We expect all parties to fulfil their Roadmap obligations. This includes Palestinian work to improve their security sector, and as my right hon. Friend the Prime Minister said to the House on 18 June

> "it is also important that, as the President of the US said only two days ago, the Israelis stop the settlement programme that is causing so much distress among the Palestinians".

North Africa: EU External Relations

Daniel Kawczynski: To ask the Secretary of State for Foreign and Commonwealth Affairs what discussions he has had with his French counterpart on the EU's political and economic strategy towards north Africa during the French presidency of the EU. [218631]

Mr. Jim Murphy: Both my right hon. Friends the Prime Minister and the Foreign Secretary attended the EU summit in Paris on 13 July, hosted by President Sarkozy to launch the Barcelona Process: Union for the Mediterranean. The UK welcomed the efforts of the French presidency to reinvigorate the EuroMed Partnership and to ensure the development of concrete projects aimed at tackling climate change, promoting energy and food security and education and training.

Our officials from the Foreign and Commonwealth Office are in close contact with the French presidency regarding its broader agenda for north Africa. Key priorities for the EU during the French presidency include the negotiation of an EU-Libya framework agreement and the launching of negotiations on a statut avancé with Morocco. The UK maintains strong relations with all the countries of north Africa, working together on issues of migration, energy and food security and tackling the threats posed by terrorism.

Qatar: Eritrea

Mark Pritchard: To ask the Secretary of State for Foreign and Commonwealth Affairs if he will hold discussions with the Government of Qatar on the use of funds from Qatar by the Eritrean Government for non-violent purposes. [218653]

Meg Munn: We regularly discuss developments in the Horn of Africa, including Eritrea, with the Government of Qatar at both official and ministerial level, including when my right hon. Friend the Foreign Secretary spoke to Qatari Foreign Minister Sheikh Hamad bin Jassim bin Jabr Al-Thani in March 2007.

Our officials and Ministers always make clear our support for peaceful solutions to the region's conflicts and encourage the Government of Qatar to use their influence with the Government of Eritrea to promote regional stability.

My right hon. Friend the Foreign Secretary has no plans to hold discussions in the immediate future with the Government of Qatar about their financial support to the Eritrean Government.

Saudi Arabia: Overseas Trade

Daniel Kawczynski: To ask the Secretary of State for Foreign and Commonwealth Affairs what discussions he has had with *(a)* his Saudi counterparts and *(b)* ministerial colleagues in the Department for Business, Enterprise and Regulatory Reform on opportunities for trade between the UK and Saudi Arabia. [218632]

Dr. Howells: My right hon. Friend the Foreign Secretary holds regular discussions with the noble Lord Jones, Minister for Trade and Investment, on a variety of trade issues covering many countries, including Saudi Arabia.

The noble Lord Jones visited Saudi Arabia from 9-12 March 2008. He held talks with the Saudi Minister of Commerce, the Governor of Riyadh and members of the Saudi and British business communities.

Sudan: Peacekeeping Operations

Mr. Drew: To ask the Secretary of State for Foreign and Commonwealth Affairs if he will make a statement on the recent attacks on UN-AU peacekeepers in Darfur which resulted in the death of six peacekeepers. [219125]

Meg Munn *[holding answer 16 July 2008]:* My right hon. Friend the Foreign Secretary issued a statement on 9 July in which he said "the attack on the UN-African Union (AU) peacekeepers in Darfur on 8 July was a horrific and cowardly act of violence. We reiterate the UN Security Council's demand for those responsible to be brought to justice. The work of the UN-AU peacekeepers in Darfur, operating in hugely challenging circumstances, deserves our utmost admiration and support. Yesterday's attack, and the continuing crisis in Darfur, further emphasises the urgent need for a full and rapid commitment by all sides to work with UN-AU mission in Darfur. I have emphasised in Khartoum today the pressing requirement for urgent humanitarian help and security cooperation as the basis for serious political dialogue".

The UN and the AU have begun a preliminary fact-finding investigation into the attack, which will be followed by an official investigation.

Sudan: War Crimes

Mr. Drew: To ask the Secretary of State for Foreign and Commonwealth Affairs what discussions he has had with the International Criminal Court on the possible citation of President al-Bashir of Sudan; and what assessment has been made of the *(a)* diplomatic and *(b)* political implications of such a citation. [220275]

Meg Munn: As a State Party to the International Criminal Court, the UK has regular contacts with the court at official level, including with the Prosecutor and his Office, over a range of matters, including the on-going investigation into the situation in Darfur referred to the Prosecutor by UN Security Council Resolution 1593 (2005). All contacts with the Prosecutor and his Office, and with others at the court, take place on the clear understanding of the court's, and the Prosecutor's, independent status and competence. It would be inappropriate and premature at this stage to comment or speculate on the outcome of the court's deliberations and the range of possible diplomatic and political implications.

We continue to urge all sides to show restraint, to implement the Comprehensive Peace Agreement, and to engage in the African Union/UN-led political process for Darfur.

Tibet: Human Rights

Mr. Jim Cunningham: To ask the Secretary of State for Foreign and Commonwealth Affairs what recent discussions he has had with the Chinese government on reported human rights abuses against Tibetan people. [219549]

Meg Munn: We continue to monitor the situation in Tibet and the surrounding region. We have expressed our concern regularly to the Chinese authorities, both in Beijing and London, and continue to urge them to respect fully the human rights of those detained; to avoid use of excessive force in dealing with unrest; and to respect freedom of expression and religion in Tibet.

My right hon. Friend the Foreign Secretary has discussed Tibet several times with Foreign Minister Yang, most recently on 12 June when they met in Paris.

Mr. Jim Cunningham: To ask the Secretary of State for Foreign and Commonwealth Affairs what steps the Government have taken to establish the extent to which human rights abuses have occurred in the Tibetan province in the latest period for which figures are available. [219550]

Meg Munn: We have regularly raised our concerns with the Chinese government about reported human rights abuses in Tibet following the recent unrest. I refer my hon. Friend to my response to written parliamentary question 218331 on 17 July, *Official Report*, columns 690-91W. We continue to monitor the situation closely.

Norman Baker: To ask the Secretary of State for Foreign and Commonwealth Affairs if he will make representations to the Chinese authorities on the systematic removal by Chinese troops of symbols of religious importance and other valuable antiquities from monasteries in occupied Tibet. [220269]

Meg Munn: We regularly urge the Chinese government to respect and protect Tibetan cultural values and religious beliefs and continue to raise the issue of Tibet with the Chinese government at the highest levels. My right hon. Friend the Foreign Secretary did this most recently when he met the Chinese Foreign Minister on 12 June. Our officials also discussed freedom of religion in detail during the last round of the UK-China Human Rights Dialogue which took place in Beijing at the end of January.

Tibet: Politics and Government

Norman Baker: To ask the Secretary of State for Foreign and Commonwealth Affairs what recent discussions he has had with the Chinese authorities on the situation in occupied Tibet. [220271]

Meg Munn: We continue to closely monitor the situation in Tibet and the surrounding region. We have expressed our concern regularly to the Chinese authorities, both in Beijing and London, and continue to urge them to respect fully the human rights of those detained; to avoid use of excessive force in dealing with unrest; and to respect freedom of expression and religion in Tibet. My right hon. Friend the Foreign Secretary has discussed Tibet several times with Foreign Minister Yang, most recently on 12 June.

We continue to emphasise that the current political difficulties in Tibet can best be resolved through dialogue between the Chinese government and the Dalai Lama and his representatives. We are pleased that the two sides have restarted the process of dialogue, meeting in Shenzhen in May and again in Beijing from 1-2 July. We hope that a further round will be convened again soon and that this will make substantive progress.

USA: Administration of Justice

Lorely Burt: To ask the Secretary of State for Foreign and Commonwealth Affairs what recent discussions he has had with his US counterparts on the exercise of the principle of extraterritoriality of US jurisdiction and its effect on UK companies. [219703]

Dr. Howells: My right hon. Friend the Foreign Secretary has not raised the exercise of the principle of extraterritoriality of US jurisdiction with his US counterparts. However, Ministers and officials have been in regular contact with UK companies about applications of US extraterritoriality and officials raise issues with US interlocutors around the excessive extraterritorial reach of US jurisdiction, as appropriate.

Western Sahara: Human Rights

Mr. Drew: To ask the Secretary of State for Foreign and Commonwealth Affairs if he will take steps to ensure that the UN mission to the Western Sahara monitors the human rights situation; and what discussions he has had with MINURSO on this matter. [218848]

Dr. Howells: The UK continues to support the UN Mission for the Referendum in Western Sahara (MINURSO). MINURSO's mandate does not include human rights monitoring, and while I have not held recent talks with MINURSO, Foreign and Commonwealth Office officials in New York and Rabat are in regular contact with MINURSO representatives. Julian Harsten, Special Representative of the UN Secretary-General to the Western Sahara, and MINURSO colleagues met with our Ambassador in Rabat on 27 June to discuss the latest developments in the region.

Western Sahara: Politics and Government

Mr. Drew: To ask the Secretary of State for Foreign and Commonwealth Affairs what progress has been made in negotiations at the UN on the future of the Western Sahara; and what recent representations the UK has made on this matter. [218847]

Dr. Howells: The UN Secretary-General's Personal Envoy to the Western Sahara, Peter van Walsum, chaired negotiations between the parties to the dispute in June and August 2007, and January and March 2008. Progress has been slow and in his report of 14 April, the UN Secretary-General called on the parties to enter into a more intensive and substantive phase of negotiations. The UK supported the UN Security Council Resolution 1813 (30 April) in its call for the parties to co-operate fully with the UN and with each other to end the current impasse to achieve a just, lasting and mutually acceptable political solution which will provide for the self determination of the people of Western Sahara.

Mr. Drew: To ask the Secretary of State for Foreign and Commonwealth Affairs what recent representations he has made to the Moroccan Government on progress towards meeting its obligations to the people of the Western Sahara, with particular reference to mineral rights. [220276]

Dr. Howells: My right hon. Friend the Foreign Secretary has not discussed Western Sahara with his Moroccan counterpart. In my recent visit to Morocco in April, I echoed the words of the UN Secretary-General and called on all parties to engage in negotiations under the auspices of the UN in a spirit of compromise and realism. I also encouraged greater transparency in the field of human rights in Western Sahara in order to foster greater confidence between the parties. After a further round of negotiations held in March this year, UN Security Council Resolution 1813 was adopted on 30 April. It called on the parties to continue to show political will to enter into a more intensive and substantive phase of negotiations. The UK has welcomed these negotiations and has encouraged the parties to maintain their commitment to the process.

No representation has been made to Morocco regarding the use of mineral resources in Western Sahara. The UK's long standing position remains that Morocco, the de facto administering power of Western Sahara, is obliged under international law to ensure that economic activities under their administration do not adversely affect the interests of the people of Western Sahara, and this includes their de facto control over most of the territory and maritime resources of Western Sahara.

TRANSPORT

A1(M): Hertfordshire

Mr. Heald: To ask the Secretary of State for Transport if she will bring forward plans to widen the A1(M) between Welwyn and Stevenage. [219699]

Mr. Tom Harris: There are no proposals to widen this section of the A1(M). The widening of the A1(M) between Welwyn and Stevenage is not in the East of England Regional Assembly's list of schemes to be prioritised for construction before 2015. The Region will have the opportunity to review its programme later this year and make recommendations to the Secretary of State should they wish to bring an A1(M) widening scheme forward.

A10: Royston

Mr. Heald: To ask the Secretary of State for Transport if she will bring forward plans for a Royston southern by-pass on the A10. [219698]

Mr. Tom Harris: We are not aware of any plans for a Royston Southern by-pass on the A10 road. As the A10 is not a trunk road, any plans would have to be proposed by the local authority, in this case Hertfordshire county council, and submitted to the Regional Transport Forum for consideration of funding through the Regional Funding Allocation along with other regional proposals.

Biofuels

Bob Spink: To ask the Secretary of State for Transport if she will make it her policy to revise the carbon sustainability and reporting requirements for biofuels in respect of biodiesel from palm oil grown on tropical peatland; and if she will make a statement. [219627]

Jim Fitzpatrick *[holding answer 17 July 2008]:* The detail of the reporting requirements under the renewable transport fuel obligation (RTFO) is a matter for the Renewable Fuels Agency (RFA). The RFA has produced guidance on the carbon and sustainability information that is required from transport fuel suppliers, which is available via the RFA's website at:

http://www.dft.gov.uk/rfa/

The Government have encouraged transport fuel suppliers to source biofuels produced from feedstocks which meet qualifying environmental standards under the RTFO. In order for suppliers to report that their biofuel has met a qualifying standard, they must ensure that its production has not destroyed or damaged large above or below ground carbon stocks, and that it has not taken place on soils with a large risk of significant carbon losses such as peatlands.

At EU level, the UK has been pressing for mandatory sustainability criteria to apply to all biofuels. If adopted in the form currently proposed in the draft renewable energy directive, these would ensure that from around 2010 or 2011 biofuels produced on newly deforested tropical peatland would be ineligible for support anywhere in the EU.

Bus Services: Concessions

Mr. Hoyle: To ask the Secretary of State for Transport if she will bring forward proposals to extend concessionary bus travel for school and college students. [219000]

Ms Rosie Winterton: The Department for Transport has no immediate plans to extend further the coverage of statutory concessions to school and college students. Local authorities retain the discretion to offer concessionary travel enhancements to young people in their area based on their assessment of local needs and circumstances, and many choose to do so.

Extending statutory concessions to young people could have significant cost and operational implications, especially as travel to school is during the morning peak and could have the unintended consequence of actually reducing the numbers walking or cycling to school.

From September 2008 the Education and Inspections Act 2006 extends entitlement to free school transport for pupils entitled to free school meals or whose parents are in receipt of maximum working tax credit. At secondary age, pupils attending one of their three nearest schools that is between two and six miles from their home, and those attending their nearest school preferred on grounds of religion or belief between two and 15 miles, will be entitled to free school transport.

Bus Services: Fares

Norman Baker: To ask the Secretary of State for Transport what the year-on-year percentage change in adult bus fares in *(a)* passenger transport executive areas, *(b)* London and *(c)* other areas of England was in each year since 1986 before the effects of local and national changes in concessionary travel. [220277]

Ms Rosie Winterton: The following table shows the estimated percentage change in local bus fares in each year from 1985-86 to 2006-07 for England, London, passenger transport executive (PTE) areas and other areas. The estimate for 2006-07 has been adjusted to show change before the likely estimated effect of the introduction of concessionary bus fares on 1 April 2006.

Data are not available for the period which covers the introduction of the national concession on 1 April 2008. Data are not available to adjust the data series for any discretionary local concessionary arrangements.

Percentage

	London	*English PTE areas*	*English non-PTE areas*	*England*
1986-87	6	27	5	11
1987-88	5	9	5	6
1988-89	11	6	5	6
1989-90	10	8	8	8
1990-91	10	11	10	10
1991-92	10	12	8	9
1992-93	8	7	4	6
1993-94	8	5	3	5
1994-95	6	4	4	5
1995-96	5	5	4	5

Percentage

	London	English PTE areas	English non-PTE areas	England
1996-97	4	5	5	5
1997-98	4	6	5	5
1998-99	4	5	5	4
1999-2000	3	5	5	4
2000-01	0	4	5	4
2001-02	-2	5	5	4
2002-03	-1	4	5	3
2003-04	2	4	5	4
2004-05	8	4	5	6
2005-06	10	8	7	8
2006-07	8	6	6	7

Note:
The data for 2006-07 have been adjusted to show the change before the likely estimated effect of the introduction of concessionary bus fares on 1 April 2006.

Calder Valley Railway Line

Mrs. Riordan: To ask the Secretary of State for Transport what plans there are to introduce additional rolling stock on the Calder Valley line; and how many units are to be introduced. [220043]

Mr. Tom Harris: We have specified that capacity for an extra 5,100 peak passengers should be provided into Leeds by 2014. Given forecast demand, it is likely the Calder Valley line will be one of the routes benefiting from this extra capacity. We are in discussion with the train operating companies on the best way to add peak capacity but it is not possible at this stage to say how it will be allocated between routes and how many additional carriages will operate on individual routes.

Departmental Computers

Mr. Peter Ainsworth: To ask the Secretary of State for Transport what estimate she has made of *(a)* the number of computer devices left on overnight in her Department when not in use and *(b)* the cost of leaving computer devices on overnight when not in use in each of the last five years; and if she will make a statement. [217872]

Jim Fitzpatrick: Neither the Department nor its agencies has the information to answer the question as requested.

As recorded in the answer I gave the hon. Member on 3 June 2008, *Official Report*, column 852W, the Department and its agencies all have policies of switching off computer devices (PCs, monitors, and printers) when not in use, and at night, and staff are regularly reminded to do so.

Apart from occasional compliance surveys at headquarters buildings there is no mechanism to estimate the number of individual computers left on overnight and when not in use, and there are no plans to introduce this.

DfT (Central) operates an automatic shutdown of non-essential computers from 7 pm every Friday. A monitoring analysis of the effect of this indicates annual savings of 3.7 tonnes of carbon emissions (13.6 tonnes of carbon dioxide) and a cost saving of £2,600.

Departmental Disciplinary Proceedings

Mr. Redwood: To ask the Secretary of State for Transport how many *(a)* officials in her Department and *(b)* employees of (i) agencies and (ii) other bodies reporting to her Department were (A) dismissed and (B) disciplined for matters related to their conduct in the last two years. [217602]

Jim Fitzpatrick: The Central Department and its agencies recorded the following instances of disciplinary action relating to employee performance in the period of the last two financial years:

	Number of occurrences
Dismissed	61
Disciplined	278

These figures exclude those of the Highways Agency, who could provide the information only at disproportionate cost.

Departmental Research

Bob Spink: To ask the Secretary of State for Transport what proportion of her Department's budget and that of its predecessor was spent on research in each of the last 10 years. [218071]

Ms Rosie Winterton: Detailed historic information about budgets, and information prior to the formation of the Department for Transport in 2002, is not available. The following figures show the proportion of the Department's total DEL expenditure used on research between 2002-03 and 2007-08.

	2002-03	2003-04	2004-05	2005-06	2006-07	[3]2007-08
DfT Research (£ million)[1]	53	70	59	56	62	62
Total DfT expenditure (£ million)[2]	9,559	10,760	10,650	10,294	12,521	12,796
Research percentage of total	0.55	0.65	0.55	0.54	0.50	0.48

[1] Taken from Table 2.1 of the SET Statistics (Science, Engineering and Technology indicators). These data can be found at http:/www.berr.gov.uk/dius/science/science-funding/set-stats/index.html

[2] Taken from Table A1, (pages 207 and 208) of the Department for Transport Annual Report 2008, representing the sum of total resource DEL (including near and non-cash) and total capital DEL, less depreciation.

[3] Figures shown for 2007-08 are provisional.

Departmental Sick Leave

Mr. Hayes: To ask the Secretary of State for Transport how many working days have been lost due to sickness among employees for which her Department and its predecessor were responsible for each year since 1997. [218035]

Jim Fitzpatrick: The Department was first established in May 2002. The number of working days lost due to sickness are:

	Days
2003	164,237.5
2004	175,860
2005	184,101
2006	188,666
2007	206,608

Departmental Travel

Stephen Hammond: To ask the Secretary of State for Transport pursuant to the answer of 12 June 2008 to the hon. Member for Chipping Barnet, *Official Report*, columns 399-400W, on departmental travel, if she will break down the spend on travel by body. [217521]

Jim Fitzpatrick: The breakdown for the central Department and its agencies for the last three financial years are contained in the following table:

	2005-06	2006-07	£ 2007-08
DFT Rail	89,531	153,944	151,152
DFT(c)	4,740,256	5,508,671	—
DSA	—	—	4,581,027
DVLA	626,723	679,155	685,369
GCDA	198,082	161,394	1,92,285
HA	4,549,000	4,737,000	4,697,000
MCA	1,985,177	1,955,431	2,124,759
VCA	461,979	378,745	432,074
VOSA	—	—	—
Total	12,650,748	13,574,340	12,863,666

Stephen Hammond: To ask the Secretary of State for Transport how much her Department spent on taxi travel for staff in each of the last three years. [217610]

Jim Fitzpatrick: Five of the Department's seven agencies (DVLA, GCDA, HA, VOSA and MCA) do not record taxi spend separately from other travel costs, and the information could be only provided at disproportionate cost. Figures for the remaining two agencies, DFT(c) and for DFT (Rail) are included in the following table:

	2005-06	2006-07	£ 2007-08
VCA	2,581.85	2,416.75	2,061.86
DSA	—	11,256	20,556
DFT Rail	15,272.56	10,615.94	14,457.63
DFT(c)	123,128.94	—	—

DSA did not record taxi costs separately before 2006, and the information could be provided only at disproportionate cost. Figures for DFT(c) for 2006-07, and 2007-08 are not currently available, but we expect that they will be by the end of July.

Driving Offences

Paul Flynn: To ask the Secretary of State for Transport what discussions she has had with her European colleagues on the possibility of penalty points given to foreign drivers by UK authorities being recognised in other European countries. [220544]

Jim Fitzpatrick: I have had discussions with my Irish and Northern Ireland colleagues. We announced on 26 June the decision of the UK and Ireland to work together towards the mutual recognition of one another's penalty points for motoring offences, including the mutual recognition of penalty points between Great Britain and Northern Ireland.

We intend that the lessons learnt from co-operating with Ireland in this way will advise any further discussions we may have with other European colleagues going forward.

Exhaust Emissions: Pollution Control

Norman Baker: To ask the Secretary of State for Transport what steps have been taken to make low carbon travel a priority in *(a)* local transport plans, *(b)* local area agreements and *(c)* local development frameworks. [216325]

Ms Rosie Winterton: Developing low carbon travel is becoming increasingly important at the local level. Guidance published in 2004 on the second round of Local Transport Plans (LTPs1) encouraged local transport authorities to consider measures to tackle climate change. The Local Transport Bill currently before the House includes a new duty on local authorities to have regard to the protection or improvement of the environment in developing and implementing policies to be included in local transport plans. We expect to publish draft guidance on future plans towards the end of the year.

In recently agreed local area agreements 100 local authorities have adopted a target relating to indicator NI186—"Per capita reduction in CO_2 emissions in the LA area". The Department will work closely with authorities and other Departments concerned to help meet the agreed targets.

The Department has also supported the development of PPS1—Planning and Climate Change (which supplements the main Planning Policy Statement). This was published in December 2007 and provides guidance to authorities preparing local development frameworks.

Freight

Mr. Evans: To ask the Secretary of State for Transport what volume of goods was transported within the UK by *(a)* road, *(b)* rail, *(c)* aeroplane and *(d)* waterway in each of the last five years. [220633]

Jim Fitzpatrick: The following table provides figures for the years 2002 to 2006, the latest years for which information is available for all modes.

Table 1: Domestic freight transport: by mode: 2002 to 2006

Goods lifted (million tonnes)

	Road (GB)	Rail[1] (GB)	Aviation[2] (UK)	Water[3] Total (UK)	Water[3] Of which: Inland waters (UK)
2002	1,734	87	0.055	139	49

Table 1: Domestic freight transport, by mode: 2002 to 2006

	Goods lifted (million tonnes)				
				Water[3]	
	Road (GB)	Rail[1] (GB)	Aviation[2] (UK)	Total (UK)	Of which: Inland waters (UK)
2003	1,753	89	0.059	133	47
2004	1,863	100[4]	0.062	127	45
2005	1,868	105[5]	0.068	133	49
2006	1,936	108	0.068	126	51

[1] Figures for rail are for financial years.
[2] Domestic cargo handled at UK airports adjusted to eliminate double counting and excluding mail and passengers' luggage.
[3] Includes coastwise traffic and one port traffic (sea dredged aggregates and traffic with offshore installations) as well as inland waterway traffic. The component of this traffic using inland waterways is shown separately.
[4] Break in the series, increase largely due to changes in coverage
[5] Figures from 2005 onwards include some of the tonnes lifted by GB railfreight.
Sources:
Department for Transport, Office of Rail Regulation, Civil Aviation Authority

Fuels: Prices

Philip Davies: To ask the Secretary of State for Transport what assessment she has made of the effectiveness of taxes on fuel in decreasing car usage. [218415]

Angela Eagle: I have been asked to reply.

HM Revenue and Customs estimates the impact of a change in fuel duty on the distance travelled by vehicles using historic data. Other things being equal, an increase in fuel duty leads to a reduction in distance travelled, although the effect is not one-for-one because many road transport journeys are non-discretionary.

Helicopters: Sea Rescue

Mr. Jenkin: To ask the Secretary of State for Transport how many search and rescue helicopters the Maritime Coastguard Agency plans to order in the next 10 years. [220252]

Jim Fitzpatrick: The Maritime and Coastguard Agency Search and Rescue helicopter provision is managed through a commercial contract. They expect that to be the case over the next 10 years. The contract specifies the service provision required. The physical number of helicopters to meet that service provision is a matter for the contractor.

High Speed Trains

Stephen Hammond: To ask the Secretary of State for Transport (1) when she informed Network Rail that they had to consider the possibility of introducing new high speed lines in the United Kingdom; [217576]

(2) if she will place in the Library the specification she has given Network Rail for their new lines study; [217577]

(3) whether she has asked Network Rail to look into any specific proposals as part of the new lines study; [217578]

(4) what the commissioned price of the Network Rail new lines study is. [217626]

Mr. Tom Harris: In the "Towards a Sustainable Transport System" document of October 2007 we proposed the generation of a broad range of options, which is why the Secretary of State invited Network Rail to begin work to develop longer-term options for the railway network in March 2008. In response to this on 23 June 2008 Network Rail announced, a strategic review of the case for new rail lines. Network Rail has developed its own remit for this work. The costs of the study will be borne by Network Rail reflecting their network planning function.

Stephen Hammond: To ask the Secretary of State for Transport what assessment she has made of the capacity which could be created on the *(a)* West Coast Main Line and *(b)* East Coast Main Line by the formation of a new high-speed rail line in addition to the current tracks along those routes. [217607]

Mr. Tom Harris: Any new rail line would create significant additional capacity on both new and existing lines. On 23 June 2008 Network Rail announced a strategic review of the case for new rail lines, including the additional capacity that would be created. It will consider five of Network Rail's strategic routes, north and west of London: Chiltern, East Coast West Coast, Great Western and Midland Main Lines.

Mrs. Villiers: To ask the Secretary of State for Transport what meetings she has had with Network Rail to discuss high-speed rail in the last 12 months. [218794]

Mr. Tom Harris: The Secretary of State regularly meets Network Rail to discuss a range of issues of common interest.

Stephen Hammond: To ask the Secretary of State for Transport whether the study being conducted by Network Rail into high-speed rail lines was commissioned by her Department. [219415]

Mr. Tom Harris: The Secretary of State invited Network Rail to begin work to develop longer-term options for the railway network in March 2008. In response to this, on 23 June 2008 Network Rail announced a strategic review of the case for new rail lines.

Highways Agency: Telephone Services

Mr. Prisk: To ask the Secretary of State for Transport what income her Department received from the Highways Agency 0845 number in *(a)* 2007-08, *(b)* 2006-07 and *(c)* 2005-06. [217544]

Mr. Tom Harris: The Highways Agency Information Line (08457 504030) enables the public to call to receive information on the motorways and trunk road network.

Calls to this number cost no more than 4p a minute. It does not generate any revenue for the Highways Agency.

Lorries: Accidents

Paul Flynn: To ask the Secretary of State for Transport how many and what percentage of reported motorway traffic incidents involved a heavy goods vehicle with left-hand drive in *(a)* 2005, *(b)* 2006 and *(c)* 2007; and what percentage of those incidents were attributed to poor visibility or blind spots on such vehicles. [220553]

Jim Fitzpatrick: The number and percentage of reported personal injury motorway traffic accidents involving a left-hand drive heavy goods vehicle and the percentage of these accidents where the heavy goods vehicle had 'vehicle blind spot' as a contributory factor are shown in the table.

	2005	*2006*	*2007*
Number of motorway injury accidents involving at least one left-hand drive heavy goods vehicle (HGV)	593	513	470
Percentage of all motorway injury accidents involving at least one left-hand drive HGV	7	6	6
Percentage of motorway injury accidents involving at least one left-hand drive HGV where the HGV had 'vehicle blind spot' as a contributory factor	40	40	36

Motor Vehicles: Accidents

John Battle: To ask the Secretary of State for Transport how many reported deaths there were in *(a)* Leeds West constituency, *(b)* Leeds Metropolitan District and *(c)* Yorkshire and Humberside as a result of traffic accidents in each of the last five years. [220714]

Jim Fitzpatrick: The numbers of fatalities resulting from personal injury road accidents in *(a)* Leeds West constituency, *(b)* Leeds city council and *(c)* Government office region of Yorkshire and Humberside, for the last five years are given in the table:

Number of fatalities

	Leeds West Constituency[1]	*Leeds city council*	*Government office of Yorkshire and the Humber*
2003	3	45	318
2004	5	45	311
2005	1	27	302
2006	1	40	304
2007	3	34	281

[1] Based on 2004 parliamentary boundaries

Motor Vehicles: Fuels

Mr. Drew: To ask the Secretary of State for Transport what legislative changes are required to extend the target dates for the renewables transport fuel obligation. [220061]

Jim Fitzpatrick: The Government has stated that it intends to consult formally on slowing down the rate of increase in the renewable transport fuel obligation (RTFO), taking the level to 5 per cent. (by volume) by 2013-14, in line with the Gallagher review's recommendation.

Subject to the outcome of this consultation, any changes to the level of the RTFO would need to be made through an amendment to the RTFO Order 2007 (SI no 3072). The draft amending order would be subject to the affirmative resolution procedure, and would therefore require a debate on its content in both Houses of Parliament.

Motorways

Mr. Lancaster: To ask the Secretary of State for Transport what assessment she has made of the effects on *(a)* safety and *(b)* access to incidents for emergency services of the opening of hard shoulders on motorways to general use. [220754]

Mr. Tom Harris: A detailed safety assessment, including the impact on access to incidents for emergency vehicles, was completed prior to the implementation of the M42 Active Traffic Management Pilot.

All aspects of the use of the hard shoulder as a running lane have been monitored on the M42 Active Traffic Management Pilot for the last 12 months. These early results indicate a significant improvement in safety and a reduction in incidents.

Bob Spink: To ask the Secretary of State for Transport what assessment she has made of the risks to the operation of hard shoulder running on motorways arising from power failures to *(a)* CCTV cameras and *(b)* control rooms. [220837]

Mr. Tom Harris: The hazard analysis and risk assessment for the M42 active traffic management pilot scheme included an assessment of the impact of power supply failures to equipment at the roadside (including closed circuit television) and at the Regional Control Centre. The impact of power supply failure on active traffic management was assessed by the Highways Agency who concluded that there was no case for additional emergency supplies for the operation of the signs and signals.

The Regional Control Centre is provided with emergency power supplies to allow continued operation in the event of a power failure. Any section of the motorway with hard shoulder running operates in fail safe mode which means that a power failure does not introduce any additional hazard.

Motorways: Accidents

Stephen Hesford: To ask the Secretary of State for Transport how many accidents have occurred on motorways since 2005. [219919]

Mr. Tom Harris: There has been a total of 22,240 road traffic accidents on motorways in the three year period 2005 to 2007 that have resulted in personal injury. The statistics include all motorways that are the responsibility of the Highways Agency. The latest figures available are for 2007.

Railway Network: Bicycles

Mr. Wallace: To ask the Secretary of State for Transport what guidance her Department issues to train operating companies on the carriage of bicycles on trains. [220649]

Mr. Tom Harris: The Department's cycling policy document and the rail White Paper published last year set out our policy. We want all TOCs to take into account the wider benefits of cycling when considering both investments in cycle facilities and their own rules for carrying cycles.

The White Paper also announced the setting up of a task force to look into how bike and rail journeys can be better integrated. The task force includes ATOC, Network Rail, Passenger Focus, Cycling England and Transport for London. I look forward to hearing about their progress later this year.

Railways

Stephen Hammond: To ask the Secretary of State for Transport (1) with reference to the answer to the hon. Member for Epsom and Ewell (Chris Grayling) of 29 March 2007, *Official Report*, column 1694W, on railways, if she will place in the Library copies of the equivalent data for 2007-08; [219414]

(2) pursuant to the answer of 19 June 2008, *Official Report*, column 1068W, on railways: rolling stock, for what reason and on what date her Department ceased to hold and collate this information. [219434]

Mr. Tom Harris: I refer the hon. Member to my answer of 19 June. This information has never been routinely collected in the Department.

Railways: Electrification

Stephen Hammond: To ask the Secretary of State for Transport pursuant to the Answer of 19 June 2008, *Official Report*, column 1066W, on railways: electrification, how many staff were engaged in this work in each month of the last two years. [217527]

Mr. Tom Harris: The Department for Transport does not hold information in the form requested. A number of officials within the Department are currently supporting the industry's work on electrification, in particular by providing technical and economic advice. This is to meet the Secretary of State's aim of developing a prioritised list of potential routes for electrification by the end of the year.

Railways: Finance

Mrs. Villiers: To ask the Secretary of State for Transport what estimate she has made of the effect of currency fluctuations on the cost of the Intercity Express programme. [212296]

Mr. Tom Harris: The effects of currency fluctuations on the Intercity Express programme costs were considered in the business case and will be taken into account during the assessment of bids.

Norman Baker: To ask the Secretary of State for Transport pursuant to the answer of 19 June 2008, *Official Report*, columns 1066-7W, on railways: finance, how much of the financial allocation for rail *(a)* has been allocated in 2008-09 and *(b)* was allocated in 2007-08 to (i) each train operating company and (ii) Network Rail. [219802]

Mr. Tom Harris *[holding answer 17 July 2008]:* Funding for the railways is made up of a combination of direct Government grants to Network Rail, subsidy and premium payments to and from train operating companies (TOCs), along with income from the farebox. The bulk of Network Rail's income, as determined by the Office of Rail Regulation, is in turn made up of those Government grants and track access charges levied on the train operating companies (TOCs). A proportion of the income from subsidy and farebox revenue will go towards paying track access charges to Network Rail.

In view of this it is not possible to allocate Government funding for the railway to individual railway beneficiaries. That said, payments and premiums to and from individual TOCs and grant payments to Network Rail for 2007-8 will be published shortly by the Office of Rail Regulation in National Rail Trends. In addition, a table showing contracted payments and premiums to and from all TOCs who have extant contracts with the Government is available in the Library of the House.

Railways: Overcrowding

Stephen Hammond: To ask the Secretary of State for Transport pursuant to the answers of 19 June 2008, *Official Report*, column 1067W, on railways: overcrowding, when her Department's formula to determine train capacity, derived from dividing the interior size of a passenger vehicle by 0.45 square metres, was first used; and whether the divisor in the formula has ever varied from 0.45 square metres. [214781]

Mr. Tom Harris *[holding answer 1 July 2008]:* The standard of 0.45 square metres for determining train capacity was first used by the Office for Passenger Rail Franchising in 2000, and continues to apply today.

There are two specific variations: Class 376 trains, operating on Southeastern services; and for services operated by Stagecoach South West Trains to and from London Waterloo.

New (Class 376) purpose-built vehicles ordered for Southeastern are configured to serve short-distance Metro passenger flows, and the stock has been specifically configured with low density seating and appropriate grab rails for standing passengers, to ensure that passengers can stand in relative comfort for short-distance journeys; the same is true for Class 455 units operated by Stagecoach South West Trains, on services that stop within 20 minutes of leaving London Waterloo. In these cases the standard is varied to 0.35 and 0.25 square metres respectively.

Railways: Standards

Stephen Hammond: To ask the Secretary of State for Transport pursuant to the answer of 12 June 2008, *Official Report*, column 405W, to the hon. Member for Chipping Barnet (Mrs. Villiers) on railways: standards, for what reason and upon what date her Department ceased to gather data on the causes of train cancellation. [219442]

Mr. Tom Harris: Operational data on rail performance, including the reasons for each cancellation, is compiled by Network Rail and agreed with other rail industry parties.

The Department for Transport receives higher level information on rail performance, but does not monitor the operation of every train. This has been the case since the start of rail franchising in 1996.

Road Safety Act 2006

Mr. David Jones: To ask the Secretary of State for Transport when she expects the continuous insurance enforcement body provided for in the Road Safety Act 2006 to be established. [220558]

Jim Fitzpatrick: The current expectation is that DVLA will be the prime public body responsible for delivery of continuous insurance enforcement with a key role being played by the Motor Insurance Bureau which holds the motor insurance database. The detail of the scheme is still under consideration and we intend to consult later in the year, including on the potential timetable for implementation

Road Traffic Control

Stephen Hammond: To ask the Secretary of State for Transport what estimate she has made of the level of road congestion in each of the last five years, broken down by constituency. [217620]

Mr. Tom Harris: The Department for Transport does not hold data on congestion by constituency.

For the strategic roads network in England congestion is monitored using journey time reliability. Journey time reliability is the average delay for the slowest 10 per cent. of journeys measured over the period of a year. Delay is calculated as the difference between observed journey time and a reference journey time (the time that could theoretically be achieved when the traffic is free flowing).

Reliability has only been monitored since the year August 2004-July 2005. Since that time, delays for the slowest 10 per cent. of journeys have increased from 3.78 minutes per 10 miles to 3.92 minutes per 10 miles in the year June 2007-to May 2008. The yearly figures are shown in the following table.

Period	*Delay for strategic roads in England (minutes per 10 miles)*
August 2004 to July 2005	3.78
August 2005 to July 2006	3.78
August 2006 to July 2007	4.19
June 2007 to May 2008	3.92

For the large urban networks congestion is monitored through change in peak period speeds. The following table shows peak period speeds across large urban areas in England in 2002, 2004 and 2006, based on surveys conducted by this Department and Transport for London:

Miles per hour

	2000-03	*2003-06*	*2006-09*
London			
Central	9.9	10.6	9.3
Inner	11.6	11.7	11.2
Outer	16.9	16.3	—

	2002	*2004*	*2006*
West Midlands	21.1	20.5	18.9
Greater Manchester	23.2	21.0	18.5
Leeds/Bradford	20.1	20.4	20.8
Tyneside	27.8	24.7	25.5
Merseyside	23.7	19.8	18.7
Sheffield	18.8	18.6	19.0
Bristol	23.2	19.0	20.2
Nottingham	15.9	16.4	16.5
Leicester	15.6	14.7	15.8
Stoke/Newcastle-under-Lyme	24.3	16.0	17.8
Teesside	36.2	33.1	35.9
Hull	18.8	20.0	21.5
Bournemouth/Poole	21.0	19.4	19.6
Brighton/Hove	27.0	29.6	29.7
Plymouth	23.3	22.0	20.3
Southampton	16.7	19.5	17.7
Blackpool	18.8	19.4	19.7
Portsmouth	25.8	27.5	28.5

Roads: Delays

Norman Baker: To ask the Secretary of State for Transport what the average delay was on the *(a)* A23, *(b)* A52, *(c)* A158, *(d)* A338, *(e)* A35, *(f)* A522, *(g)* A243, *(h)* A3, *(i)* A390, *(j)* A30, *(k)* A429 and *(l)* A27 in each year since 1997. [218816]

Mr. Tom Harris *[holding answer 21 July 2008]:* The Department for Transport only monitors delays for certain routes that form part of the strategic road network. The earliest available data for these routes are for the period August 2004 -July 2005. These routes include sections of the A23, A52, A35, A3, A30 and A27. For information on average delays for these routes, I refer the hon. Member to my answer of 2 April 2008, *Official Report*, columns 1029-1030W.

Roads: Fees and Charges

Mrs. Villiers: To ask the Secretary of State for Transport (1) whether any Transport Innovation Fund pump priming funds are being used to promote congestion charging in Manchester; and what restrictions apply to the use of such funding for campaigning in a referendum on congestion charging; [218837]

(2) what funding will be provided by her Department to groups campaigning *(a)* for and *(b)* against congestion charging in the forthcoming referendum in Manchester. [218838]

Ms Rosie Winterton *[holding answer 14 July 2008]:* Transport Innovation Fund Pump Priming Funds are available for:

the development of TIF Business Cases for TIF Programme Entry;

proposals that have been formally submitted and where authorities are providing further information to support the assessment by Department for Transport and in parallel developing elements of the proposal while waiting for a programme entry decision;

preparatory costs for proposals between Programme Entry and Conditional Approval.

Funds may not be used for activities of a political nature. DFT funds are being used to support the full local public consultation on the Greater Manchester TIF bid which started on the 7 July. We have agreed with Greater Manchester that their consultation will need to meet standards for public consultation set out in Cabinet Office guidance.

The decision on whether to hold a local referendum would be for the Greater Manchester authorities and would be for them to decide the detail on how any poll is run. The Department will not provide funding to groups campaigning in any local referendum.

Rolling Stock

Norman Baker: To ask the Secretary of State for Transport how many new items of rolling stock have been approved by her Department for use by each train operating company in the current franchise period of each. [218360]

Mr. Tom Harris *[holding answer 14 July 2008]:* I refer the hon. Member to the following information:

TOC	*New build rolling stock authorised (carriages)*	*Year of introduction*	*Comments*
Arriva Cross Country	0		
c2c	296	1999-2002	
Chiltern	29	2003-2008	
East Midlands	0		
First Capital Connect	0		
First Trans Pennine	153	2004-05	
Greater Western	0		
London Midland	219	2008-10	
Northern	0		
NX East Anglia	0		
NX East Coast	0		
South Central	134	2004, 2011	
South Eastern	174	2009	High speed stock. Ordered before current franchise
South Western	0		
Virgin West Coast	477	2001-2005	A further 106 vehicles currently being procured for introduction in 2012

The figures shown are for new-build stock only, authorised from the beginning of each franchise until 9 July 2008. The figures do not reflect any changes in fleet size at each TOC as new rolling stock may replace, or it may be in addition to, existing stock. Also, older stock may be transferred into an operator, so most TOCs showing as 'no new vehicles' actually see an increase in fleet size.

The HLOS programme, Thameslink programme and InterCity Express project will deliver additional new-build rolling stock.

Rolling Stock: Finance

Mrs. Villiers: To ask the Secretary of State for Transport what estimate she has made of the effect of the strength of the euro on the cost of new Pendolino carriages on the West Coast Main Line. [212295]

Mr. Tom Harris: The costs of the new Pendolino carriages on the West Coast Main Line comprises two elements: the first being the purchase of the carriages, while the second, and more dominant cost, being that of maintenance until 2022. The cost of the carriages in euros has been assessed at a less favourable rate than the current exchange rate. This means a worsening case scenario has been tested and the business case remains positive. All maintenance costs until 2022 will be incurred in the UK and are not subject to any exchange risk.

Rolling Stock: Procurement

Norman Baker: To ask the Secretary of State for Transport how many proposals for the acquisition of rolling stock have been made at the informal discussion stage to her Department by train operating companies since 1st January; which companies have made such proposals; and what response her Department has made to each. [220278]

Mr. Tom Harris: Informal discussions between train operating companies and the Department for Transport are commercially confidential; proposals for rolling stock acquisition would in any case be made later, as part of a formal process.

Mrs. Villiers: To ask the Secretary of State for Transport what assessment she has made of the effect of changes over the last 12 months in *(a)* the sterling

to euro exchange rate, *(b)* raw material costs and *(c)* the cost of capital on the cost of (i) new Pendolino carriages for the West Coast Main Line, (ii) the InterCity Express Programme and (iii) the 1,300 extra carriages promised in the Government's high level output statement of July 2007. [220407]

Mr. Tom Harris: All the effects of currency fluctuations on the Pendolino lengthening project; the Intercity Express programme; and the 1,300 extra carriages promised in the high level output specification have been included in the appropriate business cases.

The effects of raw material costs together with the current cost of capital and any exchange rate alterations will be taken into account during the assessment of all the received bids.

The three projects are in various stages of the competitive bid process, where all aspects of the final offer prices are evaluated. Risk assessments are carried out on a monthly basis and the business cases remain positive.

Severn Tunnel

Adam Price: To ask the Secretary of State for Transport whether her Department has identified any long-term structural problems in the Severn Tunnel. [220046]

Mr. Tom Harris: This is an operational matter for Network Rail as the owner and operator of the national rail network. The hon. Member should contact Network Rail's Chief Executive at the following address for a response to his question:

Iain Coucher
Chief Executive
Network Rail
40 Melton Street
London, NW1 2EE.

Thames River Crossing

Mr. Spellar: To ask the Secretary of State for Transport what recent progress has been made on the Thames River Crossing; and if she will make a statement. [221455]

Ms Rosie Winterton: The proposed Thames Gateway bridge is a Transport for London project, and is therefore a matter for the Mayor.

In terms of the Crossing at Dartford, the Department is undertaking a review that considers making better use of the existing Dartford infrastructure and the possible requirement for a new Lower Thames Crossing. This is expected to report around the end of 2008.

Thameslink: Rolling Stock

Mr. Spellar: To ask the Secretary of State for Transport which company manufactured, and in which country, the trains in service on Thameslink routes. [219879]

Mr. Tom Harris: The current Thameslink routes are served by a fleet of class 319 electrical multiple units (EMUs) which were built by British Rail Engineering Ltd. (BREL) in the UK. Over the next few years, as the Thameslink Programme progresses, a number of additional routes will be incorporated into the Thameslink network. The services on these routes are currently operated by class 317 EMUs also built by BREL in the UK, class 365 EMUs built by ABB Transportation (the successor to BREL) in the UK and class 375 and 377 Electrostar EMUs built by Bombardier Transportation (the successor to ABB) in the UK.

Transport: Carbon Emissions

Norman Baker: To ask the Secretary of State for Transport pursuant to the written ministerial statement of 16 July 2008, on roads, if she will estimate the annual change in carbon dioxide emissions that will result from the implementation of the proposals in the statement. [220616]

Ms Rosie Winterton: The carbon impacts depend on scheme by scheme decisions. We always assess the impacts on carbon of all major schemes as part of the NATA appraisal process. Carbon impacts will therefore be assessed as scheme proposals are developed in detail.

When deciding whether to increase road capacity to improve traffic flows and reduce congestion, we will take account of any impact this will have on the overall level of CO_2 emissions from transport. In cases where we decide to go ahead with increasing capacity, we will build the CO_2 impacts into our plans to keep CO_2 emissions within the carbon budgets set under the Climate Change Bill.

Transport: Consultants

Norman Baker: To ask the Secretary of State for Transport what allocation *(a)* her Department and *(b)* the Highways Agency has made for consultancy fees, excluding technical transport related consultancy, in relation to (i) roads, (ii) railways and (iii) administration in 2008-09. [220614]

Jim Fitzpatrick: The Department does not break down its budget for consultancy into technical and non-technical transport related consultancy. The requested information could therefore be provided only at disproportionate cost.

For the Highways Agency, I refer the hon. Gentleman to my answer of 8 July 2008, *Official Report*, column 1452W, on transport: consultants.

Norman Baker: To ask the Secretary of State for Transport pursuant to the answer of 8 July 2008, *Official Report*, column 1452W, on transport: consultants, what consultancy services are budgeted for by her Department in relation to *(a)* roads, *(b)* railways and *(c)* other matters in 2008-09. [220615]

Jim Fitzpatrick: The types of consultancy services that the Department purchases are Information Technology, Finance, Transport, Human Resources, Management Consultancy, Property Construction and Estates, Legal and some types of research. However, to provide budget information for each type of service for the current year could be provided only at disproportionate cost.

Transport: Fuels

Norman Baker: To ask the Secretary of State for Transport pursuant to the answer of 7 July 2008, *Official Report*, columns 1195-6W, on transport: fuels, if she will place in the Library copies of the most recent sensitivity analyses produced for a high oil price scenario. [218813]

Ms Rosie Winterton: *[holding answer 14 July 2008]:* Copies of the following reports have been placed in the Libraries of the House:

"Road Transport Forecasts for England 2007—Results from the Department for Transport's National Transport Model."

"Transport Demand to 2025 and the Economic Case for Road Pricing and Investment."

Transport: West Sussex

Mr. Soames: To ask the Secretary of State for Transport what spending her Department has provided to improve the transport infrastructure of West Sussex in the last 10 years. [219966]

Ms Rosie Winterton: Since the introduction of local transport plans in 2000, West Sussex has received around £120 million for local transport improvements and maintenance schemes on local roads, as well as approximately £23 million for local major transport schemes and supplementary funding.

Investment by the Highways Agency in smaller scale trunk road improvements has been in the order of £7 million, while further major scheme investment is currently being developed as part of the regional funding allocation, for the A27 at Chichester and the A23 at Handcross and Warninglid.

West Sussex has also benefited from new trains and associated, power supply and depot upgrades delivered as part of the Mark 1 "slam door" stock replacement programme—the total value of the investment (benefiting West Sussex and other parts of London and the south-east) is in the region of £2 billion.

Mr. Soames: To ask the Secretary of State for Transport what steps she is taking to reduce traffic congestion in *(a)* West Sussex and *(b)* Mid Sussex. [219967]

Ms Rosie Winterton: The regional element of Towards a Sustainable Transport System (DfT's Response to Eddington) is still at the stage of identifying key challenges to be delivered post 2014. This will need to include mechanisms for, inter alia, barriers to productivity including addressing congestion and climate change.

Steps currently being taken in West Sussex to reduce traffic congestion on trunk roads include:

Operational management

About £4.7 million Local Network Management Schemes.

The HA's Traffic Officer service on the M23 dedicated to managing traffic and provide rapid response to clear debris, carry out immediate repairs and implement traffic management.

Carrying out routine maintenance outside of peak travel times.

Infrastructure improvement (in current regional funding allocation)

A23 Handcross to Warninglid (in Mid Sussex) (programmed for 2012).

A27 Chichester bypass improvements (programmed for 2015).

Local Transport Improvements

Local roads are the responsibility of West Sussex county council.

Local Transport Plan funding to West Sussex over the last 10 years amounts to about £143 million. We do not have the data to identify a figure separately for local transport investment in Mid Sussex.

Funding is allocated within the local authority according to local priorities. In its Local Transport Plan, West Sussex has identified congestion in the major centres and strategic roads as one of their top priorities.

Traffic Management

The Traffic Management Act 2004 and the Local Transport Bill (currently before Parliament) shall give enhanced powers to local authorities in their quest to reduce traffic congestion.

Travelling People: St. Leonards

Mr. Chope: To ask the Secretary of State for Transport when her Department will take steps to remove the unauthorised encampment at the Avon Heath lorry park off the A31 at St. Leonards. [220807]

Mr. Tom Harris: Since learning of the unauthorised encampment at Avon Heath lorry park on 19 May 2008, the Secretary of State has followed procedures under the relevant Acts to remove the Travellers. Steps to date have included all necessary site visits and welfare reports, serving a notice to vacate on the 16 June 2008 and preparing for a court hearing which is scheduled for 21 July at Bournemouth county court.

West Coast Main Line

Mr. Lancaster: To ask the Secretary of State for Transport what assessment she has made of the consequences for the delivery to schedule of the West Coast Main Line upgrade of any failure by Network Rail to meet each of the 25 milestones agreed with the Office of Rail Regulation, broken down by milestone. [219645]

Mr. Tom Harris: The Office of Rail Regulation (ORR) has reviewed Network Rail's delivery plan for the West Coast Main Line and concluded that the plan is achievable, provided Network Rail robustly and diligently manages the delivery of the work against the revised programme.

In its Network Rail Monitor for 2007-08 published 5 June 2008, the ORR stated its intention to monitor 25 delivery milestones to certify that Network Rail remains on target to deliver the West Coast Main Line improvements. Two significant milestones were achieved on 5 and 29 May with the successful commissioning of new infrastructure on the Trent Valley four tracking project (Stages 1 and 3) and between Rugby and Nuneaton (Stage G).

Mr. Lancaster: To ask the Secretary of State for Transport if she will provide a monthly report on progress towards the 25 milestones for the West Coast Main Line upgrade agreed between the Office of Rail Regulation and Network Rail. [219683]

Mr. Tom Harris: The Department for Transport and Network Rail meet regularly to monitor progress on the West Coast Main Line. The 25 milestones are, however, matters between the Office of Rail Regulation and Network Rail.

JUSTICE

Antisocial Behaviour

Mr. Ruffley: To ask the Secretary of State for Justice how many *(a)* prosecutions have been brought and *(b)* fixed penalty notices have been issued by (i) police and (ii) local authorities for (A) fly-tipping, (B) graffiti, (C) dog fouling, (D) the dropping of litter and (E) parking offences in each year since 2006. [219139]

Maria Eagle: I refer the hon. Member to the answer given by my hon. Friend the Minister of State for the Department for Environment, Food and Rural Affairs (Jonathan Shaw) on 23 January 2008, *Official Report*, columns 2053-2055W.

Court proceedings data for 2007 will be available in the autumn of 2008.

Court proceedings data for 2008 will be available in the autumn of 2009.

Information held by DEFRA on fixed penalty notices for local authorities for 2007 will be available in the winter of 2008.

Bail

Nick Herbert: To ask the Secretary of State for Justice (1) how many suspects have been granted conditional bail in courts in England and Wales in each of the last 10 years; [220263]

(2) how many suspects were granted bail for indictable offences in courts in England and Wales in each of the last 10 years; [220264]

(3) how many suspects granted bail in courts in England and Wales in each of the last five years were subsequently convicted and received a custodial sentence of *(a)* up to 12 months, *(b)* between 12 months and four years, *(c)* over four years and *(d)* an indeterminate sentence of imprisonment for public protection. [220265]

Mr. Straw: Data showing the number of defendants remanded on bail, for all offences including indictable offences, by all courts in England and Wales for the years 1997 to 2006 can be found in the following table. The data include those held in custody at any stage during proceedings. The bail data supplied relate to the offence at the outcome of court proceedings, which may differ from the original charged offence. These data are taken from the 'Criminal Statistics, England and Wales' publications, 1997-2006. Data held by the Office for Criminal Justice Reform do not distinguish between those released on conditional and unconditional bail.

The statistics relate to persons for whom these offences were the principal offences for which they were dealt with. When a defendant has been found guilty of two or more offences the principal offence is the offence for which the heaviest penalty is imposed. Where the same disposal is imposed for two or more offences, the offence selected is the offence for which the statutory maximum penalty is the most severe.

My Department does not collect data in a form that enables identification of the number of defendants granted bail in courts in England and Wales in each of the last five years who were subsequently convicted and received a custodial sentence of *(a)* up to 12 months, *(b)* between 12 months and four years, *(c)* over four years and *(d)* an indeterminate sentence of imprisonment for public protection.

Estimated number of persons remanded on bail at magistrates' or the Crown Court, England and Wales, 1997-2006[1]

Thousand

	Total number bailed at all courts[3, 4]									
Offence group[2]	*1997*	*1998*	*1999*	*2000*	*2001*	*2002*	*2003*	*2004*	*2005*	*2006*
Indictable	383.9	393.2	373.7	390.6	387.4	376.8	357.5	369.1	331.2	316.1
Summary (other than motoring)	116.1	147.0	126.6	113.9	129.6	127.3	138.0	153.0	154.0	155.2

[1] These data are on the principal offence basis.
[2] The offence is that which the defendant is acquitted or convicted of, which may differ from the original offence the defendant was charged with.
[3] Includes those also held in custody at some stage and those failing to appear to bail.
[4] Excludes defendants reported as failing to appear to a summons although some of these cases, having been initiated by a summons may have resulted in the defendant being remanded on bail.

Notes
1: Totals may not sum due to rounding.
2: Every effort is made to ensure that the figures presented are accurate and complete. However, it is important to note that these data have been extracted from large administrative data systems generated by the courts and police forces. As a consequence, care should be taken to ensure data collection processes and their inevitable limitations are taken into account when those data are used.

Court Proceedings Database.

Community Orders

Mr. Burrowes: To ask the Secretary of State for Justice whether time spent travelling to unpaid work appointments counts towards an offender's community sentence. [220646]

Mr. Hanson: In general, offenders are expected to travel to Unpaid Work appointments in their own time. If, however, they live in a location that requires them to spend more than 30 minutes travelling in each direction, the time over 30 minutes is credited against their sentence. The total amount of time credited in this way, however, must not exceed 10 per cent. of their sentence. Once they have reported for work, any time spent travelling to, or between, work sites is counted as part of their sentence.

Mr. Burrowes: To ask the Secretary of State for Justice whether hours in which an offender is available to perform unpaid work but work cannot take place count towards an offender's community sentence. [220647]

Mr. Hanson: The current normal practice is that when an offender has reported for Unpaid Work but work cannot take place, the offender is allowed to go home and is credited with one hour. This is in accordance with a recommendation from Her Majesty's Inspectorate of Probation. When it is necessary to terminate a work session early, normal practice is to credit the hours to the point at which the offender is discharged from work for the day. Guidance will be issued by the National Offender Management Service in respect of both of these points.

Departmental Computers

Mr. Peter Ainsworth: To ask the Secretary of State for Justice what estimate he has made of *(a)* the number of computer devices left on overnight in his Department when not in use and *(b)* the cost per year of leaving computer devices on overnight when not in use in each of the last five years; and if he will make a statement. [217858]

Mr. Wills: The Ministry of Justice is committed to reducing its carbon emissions under the campaign initiated by the Department for Environment, Food and Rural Affairs. Most of the Department's IT equipment is switched off over night, as a matter of routine. There are some PCs that have to be left on in order to safeguard overnight data processing on some systems. We are working with our IT suppliers to put in place a technical solution to address this. Meanwhile, staff using these PCs are advised to switch off printers and monitors only.

Within the National Offender Management Service, including Her Majesty's Prison Service, computers that are logged off but left switched on will automatically shutdown.

The cost of electricity consumption associated with specific electronic devices being left on cannot be determined as invoices do not distinguish this expenditure. We will be exploring whether this information could be obtained in the future.

Departmental Data Protection

Mr. Baron: To ask the Secretary of State for Justice how many files containing information about members of the public have been lost by his Department and its predecessor in each of the last five years. [220332]

Mr. Wills: The number of lost files containing information about members of the public is not recorded centrally. However, my Department will be reporting on data security incidents in its resource accounts which were laid before the House on 21 July 2008.

Departmental Early Retirement

Mr. Redwood: To ask the Secretary of State for Justice how many staff in *(a)* his Department and *(b)* his Department's agencies have taken early retirement in the last two years. [217388]

Mr. Wills: The Ministry of Justice was created on 9 May 2007 bringing together the former Department for Constitutional Affairs (DCA) and parts of the Home Office, namely the National Offender Management Service, including the prison and probation services and the Office for Criminal Justice Reform.

The figures in the following table show the number of staff taking early retirement for the former Department for Constitutional Affairs for the period mentioned, and for the first complete year of the new Ministry of Justice.

Staff taking early retirement has been taken to mean those staff retiring before their minimum retirement age. The minimum retirement age, of any member of the Ministry of Justice and associated agencies, is the earliest age at which anyone to whom the Pension Choices Scheme applies can retire with superannuation benefits. This is currently age 60 for most grades, or 55 for staff who have an entitlement to reserved rights under the 1987 'Fresh Start' arrangements.

Information on the age of staff retiring has been derived from the Ministry's HR Chrimson, HM Prison Service personnel corporate database and Oracle HR management systems. All of these systems are liable to the normal inaccuracies associated with any large reporting system.

Number of staff retiring before their minimum retirement age

			April to May

Electoral Register

Chris Ruane: To ask the Secretary of State for Justice what estimate he has made of the percentage of *(a)* white, *(b)* African, *(c)* Bangladeshi, *(d)* Pakistani and *(e)* African-Caribbean people are registered to vote in the UK. [218991]

Bridget Prentice: The Government have not made any estimate of the percentage of *(a)* White, *(b)* African, *(c)* Bangladeshi, *(d)* Pakistani and *(e)* African-Caribbean people registered to vote in the UK.

However, the Electoral Commission found in their report, "Understanding Electoral Registration", published in September 2005 that the groups least likely to be registered to vote included young people, those residing in private rented accommodation and those belonging to certain minority ethnic groups. Registration rates among White, Asian (those from Indian, Pakistani and Bangladeshi communities) and Black Caribbean groups were similar.

Section 9 of the Electoral Administration Act 2006 placed a new duty on Electoral Registration Officers (ERO) to take all necessary steps to register eligible electors. These steps include sending the annual canvass form more than once, making house-to-house inquiries and inspecting records that the ERO is permitted to

inspect. The Government believe that these steps should help to tackle under-registration.

House of Lords: Reform

Hywel Williams: To ask the Secretary of State for Justice with reference to the White Paper on the reform of the House of Lords, what his working assumption is on the number of working peers appointed by the political parties between 2008 and 2013 for the purpose of calculating the number of peers under each alternative model outlined in section 8 of the White Paper. [220638]

Mr. Straw: The modelling assumed that between now and 2013, 28 new life peers are appointed. Broadly, this reflects the current rate of appointments by the House of Lords Appointments Commission. No assumptions were made regarding party political nominations specifically, as there is no obvious basis on which to make assumptions about the number and timing of such appointments, because the pattern has varied considerably in the past.

Mentally Disturbed Offenders

Helen Jones: To ask the Secretary of State for Justice what steps he is taking to ensure that the rights of victims and their families are safeguarded when a convicted person is subject to a hospital order rather than given a prison sentence; and if he will make a statement. [220580]

Maria Eagle: We have enhanced the rights of victims to information, where the offender is sentenced by way of a restricted hospital order, in the Domestic Violence, Crime and Victims Act 2004. Those rights will be extended to cases where the offender receives an unrestricted hospital order by amendments in the Mental Health Act 2007, due to be implemented in November.

Where the offender has a restricted hospital order, the National Offender Management Service works with victims who wish to be kept informed, advising them about the offender's management as far as medical confidentiality allows, and passing to decision makers any representations victims wish to make about conditions for their protection in the event of the offender's discharge from hospital.

Offenders: Death

Mr. Garnier: To ask the Secretary of State for Justice in how many cases of the unexpected death of an offender while serving a custodial sentence in a prison or a young offender institution the family or next of kin of the deceased paid either some or all of the legal costs arising from inquest proceedings in each of the last five years for which figures are available; and what sum on average was paid by the family or next of kin in such cases. [218876]

Maria Eagle: Inquests into deaths in prison custody are inquisitorial fact-finding processes, heard by a coroner with a jury. The information is not available in the requested format but figures for the number of cases where funding has been provided for families through legal aid exceptional funding is given in the following table. Figures are not available on whether those who were granted legal aid also had to pay a contribution to their own legal costs, but contributions are not normally requested.

	Number of cases granted exceptional funding	*Number of cases exceptional funding refused/abandoned*
2003-04	70	15
2004-05	54	20
2005-06	93	13
2006-07	80	20
2007-08	87	13

Offensive Weapons: Convictions

Mr. Ruffley: To ask the Secretary of State for Justice how many *(a)* under 19 and *(b)* over 18-year-olds have been convicted for illegally carrying (i) knives and (ii) other weapons in (A) 2007 and (B) 2008, broken down by police authority; and if he will make a statement. [219141]

Mr. Straw: I refer the hon. Member to the answer I gave on 17 January 2008, *Official Report*, columns 1434-42W.

Court proceedings data for 2007 will be available in the autumn of 2008.

Court proceedings data for 2008 will be available in the autumn of 2009.

Offensive Weapons: Prosecutions

Chris Huhne: To ask the Secretary of State for Justice how many people aged *(a)* under 16, *(b)* 16 to 18 and *(c)* over 18 years were (i) charged, (ii) convicted and (iii) sentenced to immediate custody for possession of a knife in each of the last five years. [219252]

Mr. Straw: The number of persons aged 10 to 15, 16 to 18, and 19 and over, who were proceeded against at magistrates courts, found guilty and sentenced to immediate custody at all courts for possession of a knife, in England and Wales for the years 2002 to 2006 can be viewed in the following table.

Charging data are not held by the Ministry of Justice. Information on numbers proceeded against has been provided in lieu of charging data.

The figures given in the table on court proceedings relate to persons for whom these offences were the principal offence for which they were dealt with. When a defendant has been found guilty of two or more offences, the offence selected is the one for which the heaviest penalty is imposed. Where the same disposal is imposed for two or more offences, the offence selected is the offence for which the statutory maximum penalty is the most severe.

Court proceedings data for 2007 will be available in the autumn of 2008.

Number of persons aged 10 to 15, 16 to 18, and 19 and over, who were proceeded against at magistrates courts, found guilty, and sentenced to immediate custody at all courts for possession of a knife, in England and Wales, 2002 to 2006

	10-15			16-18			19 and over		
	Proceeded against	Found guilty	Immediate custody	Proceeded against	Found guilty	Immediate custody	Proceeded against	Found guilty	Immediate custody
2002	440	360	13	1,200	964	65	5,323	4,014	695
2003	378	323	13	1,137	921	60	5,413	4,152	688
2004	470	400	8	1,214	1,004	78	5,668	4,486	729
2005	486	418	15	1,233	1,034	79	5,600	4,553	876
2006	529	477	18	1,364	1,145	93	5,806	4,747	964

Notes:
1. These data are on the principal offence basis.
2. Every effort is made to ensure that the figures presented are accurate and complete. However, it is important to note that these data have been extracted from large administrative data systems generated by the courts, and police forces. As a consequence, care should be taken to ensure data collection processes and their inevitable limitations are taken into account when those data are used.
3. Includes the following statutes and corresponding offence description:
Criminal Justice Act 1988 S.139 as amended by Offensive Weapons Act 1996 S.3. Having an article with blade or point in public place.
Criminal Justice Act 1988 S.139A (I)(5)(a) as added by Offensive Weapons Act 1996 S.4(1). Having an article with blade or point on school premises.
Source:
CJEAU—Office for Criminal Justice Reform—Ministry of Justice

Mr. Grieve: To ask the Secretary of State for Justice how many people aged *(a)* between 10 and 17 years, *(b)* between 18 and 24 years and *(c)* 25 years and over were (i) prosecuted and (ii) convicted of knife possession offences in each of the last five years. [219443]

Mr. Straw: Information on the number of persons proceeded against magistrates courts and found guilty at all courts for offences relating to possession of a knife, by age group, in England and Wales, for the years 2002 to 2006 can be viewed in the following table.

The figures given in the table on court proceedings relate to persons for whom these offences were the principal offence for which they were dealt with. When a defendant has been found guilty of two or more offences, the offence selected is the one for which the heaviest penalty is imposed. Where the same disposal is imposed for two or more offences, the offence selected is the offence for which the statutory maximum penalty is the most severe.

Court proceedings data for 2007 will be available in the autumn of 2008.

Number of persons proceeded against magistrates courts and found guilty at all courts for offences relating to possession of a knife, by age group, in England and Wales, 2002 to 2006[1, 2, 3]

	Proceeded against			Found guilty		
	10-17	18-24	25 and over[4]	10-17	18-24	25 and over[4]
2002	1,205	2,253	3,503	972	1,712	2,654
2003	1,131	2,176	3,621	939	1,706	2,751
2004	1,244	2,328	3,780	1,035	1,905	2,950
2005	1,295	2,339	3,685	1,113	1,946	2,946
2006	1,449	2,483	3,767	1,265	2,045	3,059

[1] These data are on the principal offence basis.
[2] Includes the following statutes and corresponding offence description:
Criminal Justice Act 1988 S.139 as amended by Offensive Weapons Act 1996 S.3. Having an article with blade or point in public place.
Criminal Justice Act 1988 S.139A (I)(5)(a) as added by Offensive Weapons Act 1996 S.4(1). Having an article with blade or point on school premises.
[3] Every effort is made to ensure that the figures presented are accurate and complete. However, it is important to note that these data have been extracted from large administrative data systems generated by the courts, and police forces. As a consequence, care should be taken to ensure data collection processes and their inevitable limitations are taken into account when those data are used.
[4] May include a few persons aged 18 or over where the age did not form part of the data supplied.

CJEAU—Office for Criminal Justice Reform—Ministry of Justice

Parc Prison: Health Services

Mrs. Moon: To ask the Secretary of State for Justice what facilities there are to provide health care to young people at Parc *(a)* prison and *(b)* young offender institution. [219221]

Mr. Hanson: The delivery of primary health care provision at HM Prison and Young Offender Institution Parc forms part of the contractual arrangements between the Director of Offender Management in Wales and the operator. The Welsh Assembly Government has responsibility for the provision of all other health care services to people held there.

The various clinics and services available at HMP/YOI Parc include the following:

Induction programme for new admissions "Introduction to Healthcare Services"

Education "Pathways" programme, "Sex, Health and Relationships"

Fit For Life (Well Man)

Immunisations/vaccines including: meningitis, BCG (TB vaccine) and hepatitis

Genito-urinary medicine (GUM) clinics

Smoking cessation and other health promotion

Opticians

Dentist

Doctor/GP access

Mental health assessments by resident registered mental nurses

Chiropodist

Provision for in-patient care.

All other services that would be required from local hospitals would be arranged by the resident health care team.

The Welsh Assembly Government has funded Bridgend Local Health Board to provide a mental health in-reach service (i.e. a secondary health care service) to Parc.

Health Commission Wales is the responsible commissioner of a Tier Four Child and Adolescent Mental Health Service and Forensic Adolescent Consultation Treatment Service. These services can be accessed through the normal way via referral by clinicians in primary and secondary health care.

Personal Injury

Mr. Hayes: To ask the Secretary of State for Justice what the highest 10 payments made by his Department in settlement of personal injury claims brought against it were over the last 12 months for which figures are available; which of those cases were *(a)* contested and *(b)* uncontested by the Department; and what the nature of the incident was in each case. [216686]

Maria Eagle: The highest 10 payments made by the Department all related to the Prison Service and are listed in the following table for 2007-08.

Amount of damages[1]	*Contested or uncontested*[2]	*Nature of incident*
£760,000	Court award	Accident related injury
£520,000	Court award	Assault
£220,000	Settled before hearing	Assault
£200,000	Court award	Psychiatric injury
£160,000	Settled before hearing	Industrial injury
£150,000	Settled before hearing	Accident related injury
£150,000	Settled before hearing	Psychiatric injury
£150,000	Settled before hearing	Medical negligence
£130,000	Settled before hearing	Fatality
£130,000	Settled before hearing	Psychiatric injury

[1] In order to prevent any claimant being identified the damages have been rounded to the nearest £10,000.
[2] All claims are defended until such time as the evidence indicates otherwise.

Pleural Plaques

Andrew Selous: To ask the Secretary of State for Justice pursuant to his Department's consultation paper CP 1408 on pleural plaques, which Government department will have responsibility for any disbursement of payments from the public purse in relation to each option set out in CP 14/08; and if he will make a statement. [219960]

Bridget Prentice: The consultation paper considers the issues that arise in relation to changing the law of negligence and invites views on whether this would or would not be appropriate. It also seeks views on the merits of offering no fault financial support to people diagnosed with pleural plaques, and on two possible ways of doing this. Decisions on the appropriate way forward, including any issues in relation to funding, will be taken in the light of consultation.

Andrew Selous: To ask the Secretary of State for Justice pursuant to his Department's consultation paper CP14/08, on pleural plaques, what estimate he has made of the potential liability falling on the public purse under policy options *(a)* 4 and *(b)* 5; and what estimate he has made of the proportion of the overall cost under each option proposed that might fall on the public purse. [220309]

Bridget Prentice: The consultation paper discusses the possible approaches in relation to the funding of any no fault scheme which might be introduced under policy option 4 or 5. Decisions on the appropriate way forward will be taken in the light of consultation.

The initial impact assessment accompanying the consultation paper estimates the potential cost of option 4 to be between £52 million and £196 million (excluding set-up costs), and of option 5 to be between £780 million and £4.8 billion (excluding set-up costs).

Police Custody

Mr. Garnier: To ask the Secretary of State for Justice how many prisoners *(a)* convicted of drugs offences, *(b)* assessed as requiring drug treatment and *(c)* undergoing drug treatment have been housed in police cells under Operation Safeguard in each of the last five years for which figures are available, broken down by number of nights housed in a police cell. [218880]

Mr. Straw: The information requested is not held centrally.

Prisoners are subject to a risk assessment prior to being held under Operation Safeguard. Past or present drug misuse or treatment, or the need for treatment, do not necessarily render a prisoner unsuitable to be held in police cells overnight.

Prison Sentences

Mr. Garnier: To ask the Secretary of State for Justice how many offenders *(a)* began and *(b)* were released from an indeterminate sentence for public protection in the last month. [220797]

Mr. Hanson: During May 2008 120 prisoners were received into prison establishments in England and Wales having been sentenced to an Indeterminate Sentence for Public Protection; over the same period three IPP prisoners were released.

These figures have been drawn from administrative IT systems which, as with any large scale recording system, are subject to possible errors with data entry and processing.

Prisoner Escorts

Rosie Cooper: To ask the Secretary of State for Justice on how many occasions court authorities have not produced a defendant in court in due time in the last period for which figures are available. [219972]

Maria Eagle: The production of defendants from custody to courts in England and Wales is the responsibility of the National Offender Management Service (NOMS) and is contracted out to private escort companies. Contractors produced 556,508 prisoners in court in 2007-08, of which 626 were reported as resulting in a delay to court proceedings.

The contractors have a target of delivering 85 per cent. of prisoners by the due time; that being, generally 9.30 am for prisoners due to appear before midday and 11:30 am for prisoners due to appear after midday. Nationally, contractors met that target throughout 2007-08. The number of cases involving remand defendants not produced from custody for their trial hearing was 51 in the Crown court and 846 in the magistrates courts.

Total figures for the number of criminal cases where one or more defendants failed to attend on the first day of their trial and which resulted in the trial being adjourned to another date are shown in the following table.

April 2007 to March 2008

	Crown court	Magistrates' courts
Total trials listed	35,318	190,155
Total ineffective trials	4,329	34,841
Total cases where defendant(s) failed to attend trial hearing	1,138	7,282

Prisoners Release

Mr. Garnier: To ask the Secretary of State for Justice how many prisoners do not have their case recorded on the NOMS pre-release section database. [220799]

Mr. Hanson: The database referred to which the hon. and learned Member refers is designed to record information on those cases in which officials in the Public Protection Unit in the National Offender Management Service have a direct involvement. Therefore, it holds data on prisoners serving a life sentence or an indeterminate sentence of imprisonment for public protection. It also holds data on determinate sentence prisoners who have been recalled to custody following release on licence or who have had an oral hearing to consider their parole application. It does not hold information on other determinate sentence prisoners.

Prisoners: Mentally Ill

Mr. Garnier: To ask the Secretary of State for Justice how many *(a)* adult and *(b)* juvenile prisoners have been diagnosed with dangerous and severe personality disorder. [220798]

Maria Eagle: Dangerous and Severe Personality Disorder (DSPD) is not a clinically defined condition but describes individuals who have been assessed as posing a high risk of further sexual or violent offending, linked to the presence of severe personality disorder.

Information provided by DSPD units indicates that:

between July 2004 and June 2008 a total of 281 men and nine women were found on assessment to meet the DSPD criteria and admitted for treatment in a high secure setting.

between January 2006 and December 2007 a total of 181 men were found on assessment to meet criteria and accepted for treatment either in medium secure DSPD units or under supervision in the community.

DSPD services are only available for adults.

Prisons

Mr. Burrowes: To ask the Secretary of State for Justice which companies or employers are members of the corporate alliance working with prisons. [220644]

Mr. Hanson: Employers who support the Reducing Re-offending Corporate Alliance have agreed to employ offenders or are contributing to improving offenders' skills or employability. In signing up to the Alliance they have agreed that their experiences can be used to promote the case for employing offenders with other employers.

Employers that have signed up to the Reducing Re-offending Corporate Alliance are:

Aramark, Action Housing and Support Ltd., Aire Valley, Alfa Electric, Angel-Fish Cleaning Company, A-One, Barclays, Barhale, British Institute of Cleaning Science, Blaydon RFC, Blue Sky, Boots, Boss Training, Bovis Lend Lease, Breeze Cafe and Deli, Business in the Community, Cadbury Schweppes, Calderdale and Huddersfield NHS, Camden Garden Centre, Chartered Institute for Personnel and Development, Cisco Systems, Clayport Library, Club 4 Kids, Coachers, Coleman Construction, Compass, Construction Leeds, Cooplands, Costco Wholesale, CRI, CST Associates, Dead Earnest Theatre, DHL, Doncaster and Rotherham District Motor Trades, East View Housing, Ecovert FM, Eden Project, Enterprise, Fifteen Foundation, Foundation Training Company, Fyffes Group, Garforth Building Supplies, G Sport Gym, GM Procure, Grimsby Fish Dock Enterprises, Hastings Council, Horizon Recruitment, Horton Housing Association, Hughes Brothers, Immedia Productions, Interserve FM, John Laing Training, JS Humidifers, Jury Inns, Leeds city council, Kalyx, KPMG, Leicester Cares, Levi Solicitors, LUSH, Marshall Tuffles, Martha Trust, McGinley Recruitment Services, Mersey Mail, MLS Ltd., Nacro, Oxfam (County Durham), Pecan, Pestalozzi International Village, Ramada Jarvis, Recruitment and Employment Confederation, Reed Elsevier, Safer London Foundation, Sainsburys, Second Byte IT, Serco, Sheffield Cathedral, Shell UK, Southampton council, South Tyneside Library, Sova, TA Horn, Tesco, Tomorrow's People, Turning Point, UBS Investment Bank, UK Railways Ltd., VT Shipbuilding Ltd., Wakefield Welfare Association, Wates, Wessex Water, Wiltan Ltd., Working Links, WYTS, YMCA England.

Prisons: Electronic Surveillance

Andrew Mackinlay: To ask the Secretary of State for Justice pursuant to the answer of 9 June 2008, *Official Report*, column 104W, on prisons: electronic surveillance, how many covert surveillance operations relating to hon. Members were authorised by the Home Secretary in 1999; what the Government's policy was in 1999 on the surveillance of hon. Members meeting their constituents in prison; and if he will make a statement. [220619]

Mr. Straw: It is our policy to neither confirm nor deny covert surveillance operations in prisons. I refer the hon. Member to the then Prime Minister Tony Blair's written answer to the hon. Member for Lewes (Norman Baker) on 4 December 1997, *Official Report*, column 321W, which made it clear that the Wilson doctrine applied to telephone interception and to the use of electronic surveillance by any of the three security and intelligence agencies. Visits by MPs to prisoners in prisons were not excluded from this policy.

Prisons: Food

Mr. Ruffley: To ask the Secretary of State for Justice what estimate he has made of the cost per day of the food allowance for prisoners in *(a)* prison cells and *(b)* police station cells. [219140]

Mr. Straw: The cost of providing food in prisons is approximately £2 per prisoner per day. For prisoners held in police cells under Operation Safeguard, the cost, agreed between NOMS and ACPO, is up to a ceiling of £12. This may be exceeded under exceptional circumstances.

The difference arises because the provision of food in prison can be planned with much greater certainty and prison establishments are able to make use of bulk purchasing.

Prisons: Homicide

Mr. Garnier: To ask the Secretary of State for Justice how many homicides have occurred in *(a)* prisons and *(b)* young offender institutions in England and Wales in each year since 1997. [218879]

Mr. Straw: The answer is given in the following table.

Homicides[1] in prisons and YOIs

	1997	1998	2000	2003	2004	2005	2007
(a) Prison							
HMP Birmingham	—	—	1	—	—	—	1
HMP Cardiff	—	—	1	—	—	—	—
HMP Full Sutton	—	—	—	—	—	1	—
HMP Garth	—	1	—	—	—	—	—
HMP Leeds	1	—	—	—	1	—	—
HMP Leicester	—	—	—	—	1	—	—
HMP Lewes	—	—	—	—	—	—	1
HMP Liverpool	—	1	—	—	—	—	—
HMP Manchester	—	—	—	1	—	—	—
HMP Risley	—	—	—	—	—	1	—
HMP Rye Hill	—	—	—	—	—	1	—
HMP Wayland	—	1	—	—	—	—	—
HMP Woodhill	1	—	—	—	—	—	—
(b) YOI							
HMYOI Feltham	—	—	1	—	—	—	—
HMYOI Stoke Heath	—	1	—	—	—	—	—

[1] This includes apparent and suspected homicides where no conviction has been obtained and/or inquest verdicts have not yet been returned. This table does not include uncategorised deaths which may subsequently be classified as homicides by NOMS.

Prisons: Medical Equipment

Mr. Garnier: To ask the Secretary of State for Justice how many *(a)* prisons and *(b)* young offender institutions are equipped with readily accessible and operational defibrillators; and what measures are in place to train staff in (i) defibrillator use and (ii) cardiopulmonary resuscitation. [218877]

Mr. Hanson: There are no central records of defibrillators held in prisons and young offender institutions. It is the responsibility of the governing governor or director of each prison or young offender institution to determine the requirements for first aid training and training in defibrillator use for their establishment by conducting a risk assessment and training needs analysis in line with Prison Service general training requirements and Health and Safety Executive (HSE) legislation.

Prisons: Voluntary Organisations

Mr. Burrowes: To ask the Secretary of State for Justice which prisons employ a voluntary sector coordinator. [220643]

Maria Eagle: Prison Service Order 4190 "Strategy for working with the Voluntary and Community Sector" (2002) includes a mandatory action for governors, area managers and head of groups to "give responsibility to a member of their senior management team for oversight of voluntary and community groups as part of their job description". Although some prisons have a dedicated voluntary sector co-ordinator, this role is usually undertaken part-time by the head of reducing re-offending, head of learning and skills, the diversity manager, a member of chaplaincy or another member of staff depending on the establishment.

UN Convention on the Rights of the Child

Chris Huhne: To ask the Secretary of State for Justice what progress has been made towards the UK withdrawing its reservation to article 36(c) of the United Nations Convention on the Rights of the Child. [219961]

Mr. Hanson: The United Kingdom (UK) does not have a reservation against Article 36 of the United Nations Convention on the Rights of the Child. I assume the hon. Gentleman's question refers to the UK's reservation against Article 37(c) of the Convention.

My right hon. Friend the Minister of State for Children, Schools and Families (Beverley Hughes) and I are considering the findings of an official level review into whether or not the reservation remains relevant to the secure estate for children and young people in England and Wales. The reservation against Article 37(c) applies to the United Kingdom as a whole and so we are considering the overall position with the Scottish Executive and Northern Ireland Office.

Volunteer Referral Order Panel

Mr. Chope: To ask the Secretary of State for Justice for what reason members of the Volunteer Referral Order panel are disqualified from serving in that capacity for more than six years; and if he will make a statement. [220806]

Mr. Hanson: The tenure of volunteer youth offender panel members is currently limited to a maximum period of six years; an initial three year period which can then be extended to a maximum of six. These terms are set out in "Referral Orders and Youth Offender Panels—Guidance for courts, Youth Offending Teams and Youth Offender Panels" issued jointly by the Home Office,

Lord Chancellor's Department and the Youth Justice Board in February 2002. This guidance is currently being reviewed and the matter of tenure for volunteer youth offender panel members is being considered as part of this review. In the interim, volunteer panel members may have their service extended by a further year. The review is expected to be completed this autumn.

Young Offender Institutions: Crimes of Violence

Mr. Garnier: To ask the Secretary of State for Justice (1) how many violent incidents involving knives and other offensive weapons occurred in *(a)* young offender institutions and *(b)* prisons in England and Wales in each of the last 10 years for which figures are available; and what proportion of such incidents involved prisoner (i) on prisoner and (ii) on staff violence in each such year; [218875]

(2) how many *(a)* knives and *(b)* other offensive weapons have been found in (i) young offender institutions and (ii) prisons in England and Wales in each of the last 10 years for which figures are available. [218881]

Mr. Straw: The Prison Service Incident Reporting System (IRS) processes high volumes of data which are constantly being updated. The data provide a good indication of overall numbers but should not be interpreted as absolute. In addition information recorded as assault incidents may involve one or many prisoners as some assault incidents may involve more than one assailant or more than one victim. In a proportion of incidents only the victim is known.

The National Offender Management Service (NOMS) defines violence in prisons as 'any incident in which a person is abused, threatened or assaulted. This includes an explicit or implicit challenge to their safety, well-being or health. The resulting harm may be physical, emotional or psychological'. This definition takes into account the impact of fear on emotional health and well-being.

The numbers on IRS given in the tables refer to all incidents recorded as assaults. These may also include threatening behaviour, projection of bodily fluids and other non-contact events and allegations.

Assault information is recorded at establishment level in four categories: Prisoner on prisoner, prisoner on officer, other (including miscellaneous assault information) and prisoner on other. The recorded incidents of prisoner on officer are not completely exclusive to officers; establishment recording sometimes includes in this category assaults on other prison staff. The category 'prisoner on other' contains few entries and these may also include prison staff as well as visitors, legal visitors etc. However, for the purpose of this response the categories 'prisoner on officer' and 'prisoner on other' are used to answer the question regarding prisoner on staff assaults.

In the majority of assault incidents there is no recorded use of weapon. The figures in relation to staff are very small so that proportions are not meaningful.

Figures are available for the last eight years. The 2007 figures do not include the three prisons (Albany, Camphill and Parkhurst) where the incident recording has transferred to the NOMIS system which is not currently accessed from Prison Service headquarters.

There is no definition for offensive weapon therefore all weapon types recorded have been shown.

Ministers, NOMS and the Prison Officers Association are collectively committed to ensuring that violence in prisons is not tolerated in any form.

Since 2004, a national strategy has directed every public sector prison to have in place a local violence reduction strategy. This policy has recently been revised and from mid-2007 applied to both the public sector and contracted estate. The strategy requires each prison to undertake regular analysis of the problem areas, consider solutions and provide an action plan to improve personal safety and reduce violence. All closed establishments are required to undertake a cell-sharing risk assessment to inform cell allocation. A good practice toolkit supports the violence reduction strategy and guides establishments to develop practical solutions, including environmental and physical measures as well as alternative ways of managing behaviour.

As set out in the NOMS National Security Framework (NSF), establishments deploy a comprehensive range of robust searching techniques and security measures to detect and uncover weapons at the point of entry or concealed in the establishment. Such measures include the rub down and full searching of prisoners, staff and visitors, as appropriate; the use of technical devices, such as metal detectors; the deployment of searching dogs and the routine and intelligence-led searching of living accommodation and communal areas.

While figures indicate that the numbers of assaults has risen in recent years, it is not possible to quantify how much of this is due to the rise in prison population, increased reporting, better data processing, or an actual increase in incidents. The increase during the earlier part of the period is most likely to do with changes in the reporting system (increase in available fields/ranges of incident capture). Additionally, a violence reduction strategy—dating from 2004 and revised in 2007—has further encouraged better recording. Rises in assaults may also be linked to imported violence (more prisoners held for violent offences (in 1996 prisoners held for offences of violence against the person accounted for 18 per cent. of first receptions into immediate custody, by 2005 this had risen to 23 per cent.)).

The reported numbers are useful for internal management purposes, but they should not be considered as absolute. Data on assaults are complex. In particular, the level of detail requested here means that the totals in this response will not necessarily match figures provided in previous NOMS responses.

(a) Incidents involving weapons in young offender institutions

	2000	2001	2002	2003	2004	2005	2006	2007

Total	224	246	207	342	272	276	310	277

The following table demonstrates that, when taking into account the prison population for each year, there has been a relatively low increase in the proportion of assault incidents involving bladed instruments since 2000:

(c) Proportion of assault incidents involving use of a knife/bladed instrument or other sharp instrument

	2000	2001	2002	2003	2004	2005	2006	2007
Assault incidents	9,423	10,695	11,514	11,833	12,555	14,405	15,047	15,224
Weapon incidents (Knives/blades/sharps)	157	153	153	187	201	206	265	310
Weapon								
Weapon use per 50 assaults	0.8	0.7	0.7	0.8	0.8	0.7	0.9	1.0
Prison population[1]	65,194	66,403	71,218	73,657	74,488	76,190	77,982	80,689

[1] MOJ statistics.

The information requested in relation to the number of knives and offensive weapons found in prisons and young offender institutions is not held centrally and can be provided only at disproportionate cost.

Young Offender Institutions: Emergencies

Mr. Garnier: To ask the Secretary of State for Justice what mechanisms are in place in *(a)* young offender institutions and *(b)* prisons in England and Wales to ensure that staff invoke appropriate response procedures in the event of (i) fire, (ii) death and (ii) other emergencies; and what steps his Department has taken to ensure that prison staff are trained in such procedures. [218874]

Mr. Hanson: HM Prison Service provides instructions to ensure that governing governors and directors of both prisons and young offender institutions have contingency plans in place in the event of fire, death and other emergencies.

Public and private sector prison staff receive the appropriate training to ensure they have required skills and knowledge to deal with incidents of fire, death and other emergencies in prisons. It is the responsibility of individual prisons to assess the training needs of their staff to ensure these incidents are managed effectively.

Young Offender Institutions: Offensive Weapons

Mr. Garnier: To ask the Secretary of State for Justice what protocols are invoked upon the discovery of a knife or other offensive weapon in prisons and young offender institutions in England and Wales. [219082]

Mr. Straw: Any offensive weapons found within prisons and young offender institutions will be seized and reported to the prison security department where the incident is dealt with according to the circumstances involved. The discovery of firearms or explosives must be reported to the police immediately. The discovery of offensive weapons such as knives, kitchen or workshop implements or improvised weapons should be reported to the police if there is evidence to suggest that the weapon is intended for use in a criminal offence such as a serious assault.

Possession of an offensive weapon is a disciplinary offence and prisoners will face an internal adjudication if the matter is not dealt with through the courts. The conveying of an offensive weapon into or out of a prison or passing of such an article to a prisoner is a criminal offence and will be dealt with accordingly.

Policy and guidance on the handling of weapons found within prisons is contained within the National Offender Management National Security Framework, which sets outs procedures for the preservation and continuity of evidence in cases where weapons are found.

Young Offender Institutions: Speech Therapy

Mr. Hurd: To ask the Secretary of State for Justice what research his Department has commissioned on the effects of providing speech and language therapy in young offender institutions and secure training centres in the last three years. [219217]

Maria Eagle: There has been no research commissioned specifically on the effects of providing speech and language therapy in young offender institutions and secure training centres in the last three years.

Professor Karen Bryan's research in this area, published in 2004, funded by the Helen Hamlyn Trust and supported by HM Prison Service, has been used to inform the new reception screen developed by the Youth Justice Board. All young offenders receive health screening on reception into prison, and in addition, a screen for their educational needs.

A strategy looking at the health and social care needs of children across the criminal justice system is currently in development and due for publication in 2008. This is a joint initiative between the Department of Health, Department of Children, Schools and Families, Ministry of Justice and the Youth Justice Board, and is intended as an integrated and holistic response to the health and social care needs of these children.

Young Offenders

Mr. Hurd: To ask the Secretary of State for Justice what proportion of juvenile offenders were attending school at the time of their conviction in 2007. [219230]

Mr. Hanson: Data relating to the educational status of young offenders upon conviction are not recorded centrally. However, the Youth Justice Board (YJB) has a performance indicator to ensure that 90 per cent. of all young people supervised by youth offending teams are in suitable full time education, training or employment at the end of their order. These data are published in the YJB annual statistics and are available on their website: www.yjb.gov.uk

Mr. Heath: To ask the Secretary of State for Justice (1) whether responses to the Youth Justice Board's

consultation exercise on the scaled approach will be published in full; [220514]

(2) when the responses to the Youth Justice Board's consultation exercise on the scaled approach will be published; [220515]

(3) when he will publish the evaluation report of the Youth Justice Board's scaled approach pilot; [220516]

(4) what the reasons are for the time taken to publish the evaluation of the piloting of the Youth Justice Board's scaled approach. [220613]

Mr. Hanson: The Youth Justice Board is completing compilation of the responses to the consultation exercise on the scaled approach and revision of the Scaled Approach framework based on the responses. These will be published together in the autumn.

The evaluation of the scaled approach pilot will also be published. Evidence and recommendations from an initial draft of the evaluation were used to inform the development of the scaled approach framework. The report is being finalised for publication which includes an academic peer review and review by Ministry of Justice Analytical Services. This should be completed over the summer to allow publication in the autumn.

BUSINESS, ENTERPRISE AND REGULATORY REFORM

Boilers: Repairs and Maintenance

Mr. Jim Cunningham: To ask the Secretary of State for Business, Enterprise and Regulatory Reform what steps the Government have taken to protect consumers from excessive charges for replacement boilers. [218179]

Mr. Thomas *[holding answer 15 July 2008]:* The Supply of Goods and Services Act 1982 requires a trader who agrees to provide a service—including the provision of a replacement boiler—to carry out that service with reasonable care and skill, for a reasonable charge (unless the price is fixed by contract) and within a reasonable time (unless the time is fixed by contract). It also requires that any goods and materials supplied are of satisfactory quality. If the trader fails to comply with these requirements the law treats the matter as breach of contract and a consumer could, if necessary, pursue a claim for redress through the civil courts.

Business: Rural Areas

Mr. Drew: To ask the Secretary of State for Business, Enterprise and Regulatory Reform what his definition of a rural business is; and what estimate he has made of the number of rural businesses in England. [217664]

Mr. McFadden: There is no standard industrial classification for a rural business but in 2004 Government agreed to define a rural business in England as a business registered at an address in an area defined as rural by the 2004 definition of rural. This defines settlements with populations of 10,000 or more as urban, and those with less than a 10,000 population as rural.

Analysis of the ONS Inter Departmental Business Register by Defra shows there were 476,490 businesses registered for VAT or PAYE in rural areas in England in 2005. This represents 28 per cent. of the total number of VAT and PAYE businesses registered in England, which was 1,712,745 in 2005.

Mr. Drew: To ask the Secretary of State for Business, Enterprise and Regulatory Reform what plans he has to reduce the level of administrative burdens on rural businesses. [217953]

Mr. McFadden: BERR's plans to reduce the burden of bureaucracy on businesses, including rural businesses, are set out in our Better Regulation Simplification Plan.

Carbon Emissions: Standards

Lembit Öpik: To ask the Secretary of State for Business, Enterprise and Regulatory Reform what assessment he has made of the UK's capacity to meet its carbon dioxide emissions reduction targets with the current level of technical expertise available to industry and the public sector; and if he will make a statement. [201298]

Mr. Woolas: I have been asked to reply.

The Government remains committed to meeting its CO_2 emissions reduction targets, and is confident that the correct strategies and mechanisms are in place to achieve this, including the UK Climate Change Programme, tighter building regulations and the EU emissions trading scheme.

Companies: Fraud

Mr. Djanogly: To ask the Secretary of State for Business, Enterprise and Regulatory Reform (1) to which authority Companies House refers for prosecution complaints relating to false registration of a registered address; [218539]

(2) which authority receives complaints from property owners against companies which falsely register their office address as the property owner's address; [218540]

(3) how many *(a)* people and *(b)* companies were prosecuted for false registration of a registered office pursuant to sections 12 and 363 of the Companies Act 1985 in each of the last 12 years; and what penalties were imposed. [218541]

Mr. Thomas: Under the Companies Act 1985, there is no offence directly related to a company providing false information relating to the address of its registered office. Nevertheless, over the last 12 months, Companies House received 49 complaints relating to the address of the registered office. These were mostly from occupiers of addresses that are the registered offices of companies with which they have no links. In these circumstances, it may be possible for the occupier to bring court proceedings against the company.

The Companies Act 2006 makes it an offence for a person knowingly or recklessly to deliver a document to the registrar or to make a statement to him that is misleading, false or deceptive in a material particular. This provision will come into force on 1 October 2009. This offence might be committed if a company notified without permission another's address as the address of the company's registered office.

Departmental Computers

Mr. Peter Ainsworth: To ask the Secretary of State for Business, Enterprise and Regulatory Reform what estimate he has made of *(a)* the number of computer devices left on overnight in his Department when not in use and *(b)* the cost per year of leaving computer devices on overnight when not in use in each of the last five years; and if he will make a statement. [217864]

Mr. Thomas: The Department has implemented software to automatically turn off all PCs, that may have been left on, at an agreed time overnight. As a result, no energy is consumed overnight by IT desktop devices.

Departmental Sick Leave

David Simpson: To ask the Secretary of State for Business, Enterprise and Regulatory Reform how many and what percentage of staff in his Department and its predecessor have had more than two periods of sickness of less than five days in each of the last three years. [218728]

Mr. Thomas: BERR's records, and its predecessor, the Department for Trade and Industry, show:

	BERR HQ including UKTI staff who have had more than two periods of sickness of less than five days	
	Number	*Percentage*
2007-08	385	12
2006-07	478	12.5
2005-06	480	11

Energy: Conservation

Lembit Öpik: To ask the Secretary of State for Business, Enterprise and Regulatory Reform what estimates his Department has made of the amount of energy consumed by circulator pumps in *(a)* domestic and *(b)* non-domestic properties in the UK in the latest period for which figures are available. [219191]

Joan Ruddock: I have been asked to reply.

The Government's Market Transformation Programme estimates that the energy consumed by circulator pumps was about 1.7 TWh for domestic properties and about 3.4 TWh for non-domestic properties in the UK in 2006.

Environment Protection: Finance

Mr. Dai Davies: To ask the Secretary of State for Business, Enterprise and Regulatory Reform how much additional funding the Government have committed to *(a)* the Clean Technology Fund and *(b)* the Strategic Climate Fund following the Heads of Government agreement on energy and climate change at the G8 summit. [218870]

Gillian Merron: I have been asked to reply.

The UK intends to make available an £800 million contribution to the Strategic Climate Fund announced at the Hokkaido G8 summit, a proportion of which will be allocated to the Clean Technology Fund. Part of the UK's contribution will also be allocated to the Pilot Programme for Climate Resilience.

The exact allocations to these (and other programmes funded through the Strategic Climate Fund) have yet to be determined since some aspects of the sectoral programmes are still under design. Roughly two thirds of the £800 million will be allocated to climate change mitigation, and one third to climate change adaptation.

The joint DEFRA/DFID Environmental Transformation Fund-International Window (ETF-IW) will finance the UK's contribution. The ETF-IW is in addition to current climate and ODA spending for both DFID and DEFRA.

EU Trade: Palestinians

Tom Levitt: To ask the Secretary of State for Business, Enterprise and Regulatory Reform what the value has been of imports of produce into *(a)* the UK and *(b)* the EU under the interim EU-Palestinian Authority Association Agreement; and if he will make a statement. [219745]

Mr. Thomas: The Association Agreement between the European Community and the Palestinian Authority was signed in February 1997. Its trade provisions came into force on an interim basis on 1 July 1997.

For the period July 1997 to December 2007, EUROSTAT's Comext trade statistics database recorded UK and EU imports of goods from the Occupied Palestinian Territories worth about €7.8 million and €72.9 million, i.e. about £5.3 million and £48.7 million respectively.

Fireworks

Andrew Rosindell: To ask the Secretary of State for Business, Enterprise and Regulatory Reform what steps his Department plans to take to encourage safe and responsible celebrations on and around Guy Fawkes Night in 2008. [218527]

Mr. Thomas: BERR is responsible for fireworks legislation, as well as the promotion of the safe and responsible use of fireworks. Every year the Department carries out a publicity campaign to ensure the UK population has adequate information about firework safety, with the objective of reducing the number of accidents relating to fireworks.

We currently produce a range of literature, which is available online and updated annually, including: copies of the fireworks safety code for adults and children; schools packs; posters and leaflets for retailers; and a campaign toolkit for local Trading Standards teams.

The BERR fireworks safety website was restructured in 2006 and now forms the focal point of our activity. All communications will carry the website address

www.berr.gov.uk/fireworks.

This year's campaign will also involve close working with other fireworks safety interest groups and the media to promote the important safety message on and around Guy Fawkes day, as well as other festivals involving the use of fireworks.

Fish

Mr. Peter Ainsworth: To ask the Secretary of State for Business, Enterprise and Regulatory Reform how much fish was procured by his Department and at what cost in each of the last five years, broken down by species; and what amount and value of such fish met the Marine Stewardship Council standard in each such year, broken down by species. [217894]

Mr. Thomas: The Department's contracted catering service provider does not have sufficiently detailed information available to answer this question fully and to produce it would involve disproportionate cost.

Currently, orders are placed for between 100-140 portions of fish per day, with the main species being haddock, salmon, hake, plaice, skate, mackerel and catfish.

All fish is sourced from sustainable sources in line with Marine Stewardship Council guidelines.

Independent Food Stores

Mr. Austin Mitchell: To ask the Secretary of State for Business, Enterprise and Regulatory Reform what his latest estimate is of the change in the number of independent food stores in the last 12 months; and what steps he plans to take to reduce the regulatory burden on such businesses. [216356]

Mr. McFadden: The Competition Commission's Final Report on its Investigation of the Groceries Market, published on 30 April 2008, estimated that the number of convenience stores operated by small businesses stayed approximately at the same level (34,554 in 2006 and 34,505 in 2007). The report also estimated that the number of specialist grocery stores, which includes greengrocers, butchers, fishmongers and bakeries fell from 18,985 in 2006 to 18,465 in 2007.

As part of the Enterprise Strategy published this year, the Government will consult on the introduction of a new system of regulatory budgets for Departments. These would be budgets setting out the limit of regulation that can be introduced within a given period. Adopting such a forward looking limit on the costs of regulation would be a world first, and further support Britain as one of the best places in the world to do business.

The Enterprise Strategy also announced the Government's intention to build on our 'think small first' policy for small business by investigating where small businesses could be exempted from new regulation. When regulation is necessary, the Government will fully explore different approaches to regulating small businesses to ensure the regulation is proportionate and appropriate to the context of small business.

Foreign Investment in UK

Mrs. Riordan: To ask the Secretary of State for Business, Enterprise and Regulatory Reform what estimate he has made of the number of jobs *(a)* safeguarded and *(b)* created by inward investment into the UK in 2007-08. [219023]

Mr. Thomas: On 2 July UK Trade and Investment announced that in 2007-08 it recorded 1,573 decisions to invest in the UK, and 45,051 new jobs plus 58,488 safeguarded jobs associated with these investments.

Post Offices: Bedfordshire

Andrew Selous: To ask the Secretary of State for Business, Enterprise and Regulatory Reform what the *(a)* income, *(b)* expenditure and *(c)* profitability of the (i) Linslade, (ii) Hockliffe Street, Leighton Buzzard, (iii) Eaton Bray, (iv) High Street South, Dunstable and (v) Luton Road, Dunstable post offices was in each of the last three years. [218993]

Mr. McFadden *[holding answer 15 July 2008]:* This is an operational matter for Post Office Ltd. (POL). I have therefore asked Alan Cook, Managing Director of POL to reply direct to the hon. Member.

Copies of the letter will be placed in the Libraries of the House.

Post Offices: Closures

Mr. Cox: To ask the Secretary of State for Business, Enterprise and Regulatory Reform what consideration he has given to the provisions of section 62 of the Environment Act 1995 in respect of the withdrawal of postal services from settlements in national parks; and if he will make a statement. [215710]

Mr. McFadden *[holding answer 3 July 2008]:* In developing such proposals under its Network Change programme, Post Office Ltd. is required to comply with the access criteria set by Government, to take account of geographical factors, including distance to alternative outlets, and to consider availability of public transport, local demographics and the impact on local economies.

I understand that Post Office Ltd. has specifically consulted the Dartmoor National Park Authority in respect of its post office closure and new outreach proposals in its Devon area plan. The authority's response, together with all other responses received in response to the local public consultation, will be carefully considered in reaching final decisions.

Andrew Selous: To ask the Secretary of State for Business, Enterprise and Regulatory Reform how many of the 2,500 post offices proposed for closure in May 2007 have been allowed to continue in operation. [218999]

Mr. McFadden *[holding answer 15 July 2008]:* This is an operational matter for Post Office Ltd. (POL). I have therefore asked Alan Cook, Managing Director of POL to reply direct to the hon. Member.

Copies of the letter will be placed in the Libraries of the House.

Post Offices: Disclosure of Information

Dan Rogerson: To ask the Secretary of State for Business, Enterprise and Regulatory Reform what sanctions there are in postmasters' contracts with Post Office Limited for breaking confidentiality agreements in relation to *(a)* the network change programme and *(b)* any other matter. [218178]

Mr. McFadden *[holding answer 14 July 2008]:* This is an operational matter for Post Office Ltd. (POL). I have therefore asked Alan Cook, Managing Director of POL, to reply direct to the hon. Member.

Copies of the letter will be placed in the Libraries of the House.

Postal Services: Fraud

Mr. Laurence Robertson: To ask the Secretary of State for Business, Enterprise and Regulatory Reform how many cases of fraudulently redirected mail the Royal Mail discovered in each of the last three years for which figures are available; what steps Royal Mail is taking to counter this practice; and if he will make a statement. [218372]

Mr. McFadden *[holding answer 14 July 2008]:* This is an operational matter for which Royal Mail has direct responsibility. I have therefore asked the chief executive of Royal Mail, Adam Crozier, to provide a direct reply to the hon. Member.

A copy of the response will be placed in the Libraries of the House.

Regional Development Agencies: Rural Areas

Mr. Drew: To ask the Secretary of State for Business, Enterprise and Regulatory Reform which board members of each regional development agency have responsibility for rural affairs. [217666]

Mr. McFadden: Regional Development Agency Board members with responsibility for rural affairs are as follows:

Advantage West Midlands—Michael Oakes

East of England Regional Development Agency—Lord Edward Iveagh

East Midlands Development Agency—Cllr Geoffrey Stevens

Northwest Regional Development Agency—Peter Allan

ONE NorthEast—Ian Brown

South East of England Development Agency—Poul Christensen

South West Regional Development Agency—Harry Studholme

Yorkshire Forward—Lord Christopher Haskins.

Small Businesses: Greater London

Mr. Evennett: To ask the Secretary of State for Business, Enterprise and Regulatory Reform (1) how many business start-ups took place in Bexley in each of the last three years; [211600]

(2) how many business registrations for value added tax there have been in *(a)* Bexley and *(b)* London in each year since 2000. [211601]

Mr. McFadden: VAT registration data provide the only readily available indicator of the level of business start-up activity.

The number of new VAT registrations in Bexley and London are shown in the following table for 2000 to 2006. Data for VAT registrations and de-registrations in 2007 will be available autumn 2008.

Number of new VAT registrations and VAT registered businesses

	2000	*2001*	*2002*	*2003*	*2004*	*2005*	*2006*	*2007*
VAT registrations								
Bexley	585	620	545	580	580	535	560	–
London	36,330	33,400	32,955	35,750	35,320	34,875	34,825	–
Stock of VAT registered businesses								
Bexley	4,790	4,870	4,995	5,045	5,140	5,225	5,280	5,385
London	270,875	277,595	281,225	282,920	289,130	294,815	301,975	309,225

Although the number of new VAT registrations in each area has fluctuated between 2000 and 2006 the total number of VAT registered businesses has increased in both Bexley and London over the period. The stock of VAT registered businesses in Bexley district has increased by 595 (12 per cent.) between the start of 2000 and the start of 2007 and in the London region there has been an increase of 38,350 (14 per cent.) over the period.

VAT registrations do not capture all business activity. Businesses are unlikely to be registered if they fall below the compulsory VAT threshold, which was £60,000 at the start of 2006. Only 1.9 million out of 4.5 million UK enterprises (43 per cent.) were registered for VAT at the start of 2006.

Supermarkets

Mr. Hoyle: To ask the Secretary of State for Business, Enterprise and Regulatory Reform if he will appoint an independent ombudsman and draw up a code of practice to regulate trade between supermarkets and local suppliers. [219138]

Mr. Thomas: In its report into the Supply of Groceries in the UK, published on 30 April, the Competition Commission (CC) identified that excessive risks and unexpected costs were being transferred from grocery retailers to suppliers. To address this concern, the CC is extending the supermarkets code of practice (SCOP) to include a larger number of retailers and prohibit some practices that take place. The CC is also seeking undertakings from the grocery retailers covered by the new groceries supply code of practice (GSCOP) to establish an ombudsman to monitor and enforce compliance with the GSCOP. If the CC is unsuccessful in establishing the ombudsman within a reasonable period of time, the CC will ask BERR to take the necessary steps to set up an ombudsman. BERR would then carry out a full consultation.

Trade Unions: Finance

Mr. Maude: To ask the Secretary of State for Business, Enterprise and Regulatory Reform how much has been spent on the Trade Union Modernisation Fund in each year since its establishment. [217362]

Mr. McFadden: The costs accrued are as follows:

	£
2006-07	1,505,964
2007-08	1,674,000
2008-09	18,918

[1] Year to date

Utilities: Billing

Mrs. Riordan: To ask the Secretary of State for Business, Enterprise and Regulatory Reform what his policy is on compulsory payment of bills by direct debit; and if he will make a statement. [219024]

Malcolm Wicks: In general, companies offering goods and services are free to use whatever contractual terms and conditions they consider reasonable, including those involving methods of payment. If prospective customers are unhappy with these contractual terms and conditions they can attempt to renegotiate the terms in question or find an alternative provider.

Direct debit is often the most cost-efficient payment method for companies because, among other things, it guarantees payment and reduces invoicing costs. Companies often offer a discount, therefore, on their standard charges for those paying by direct debit.

CHILDREN, SCHOOLS AND FAMILIES

Building Schools for the Future Programme

Michael Gove: To ask the Secretary of State for Children, Schools and Families what percentage of GCSE results at grade A* to C were achieved by schools that have had *(a)* full and *(b)* partial refurbishment under the Building Schools for the Future programme in each of the last five years. [219284]

Jim Knight: There are currently 13 schools which have completed their full or partial refurbishment through the Building Schools for the Future programme and so the contribution made by these schools to the number of A*-C grades at GCSE is very small. Following is a table of the percentage of pupils achieving five or more A*-C GCSE grades (or equivalent) in each school.

New build schools

Name	*Local authority*	*Percentage of pupils GCSE achieving 5 A*-C grades (or equivalent)*				
		2003	*2004*	*2005*	*2006*	*2007*
Solihull Centre for Inclusive Learning (Merston and Forest Oak Special Schools)	Solihull	[1]—	0	0	0	0
Bamburgh School	South Tyneside and Gateshead	14	5	22	8	14
Sixth Form Centre	Haringey	[2]—	[2]—	[2]—	[2]—	[2]—
Brunel Academy[3]	Bristol	31	23	25	23	n/a
Sandon High School	Stoke	47	49	42	49	42
The Michael Tippett School	Lambeth	[1]—	[1]—	0	0	0
Bristol Metropolitan College[4]	Bristol	31	31	31	28	43
All Saints	Newcastle	13	23	40	32	48
The Chaucer Business and Enterprise College	Sheffield	25	24	27	20	39
Oxclose	Sunderland	71	66	69	62	66
The Elmgreen School	Lambeth	[5]—	[5]—	[5]—	[5]—	[5]—
Birches Head	Stoke	33	32	36	49	45
The Ifield School	Kent	0	0	0	0	0

[1] No pupils entered
[2] Not available. Not in KS4 tables
[3] Previously known as Speedwell Technology College
[4] Previously known as Whitefields Fishponds
[5] Not available. Opened in September 2007
Note:
Figures relate to 15-year-olds (age at start of academic year, i.e. 31 August)

Michael Gove: To ask the Secretary of State for Children, Schools and Families (1) how many Building Schools for the Future projects are planned to take place in schools which had fewer than 30 per cent. of their pupils achieving five or more GCSEs at grade C or above, including English and mathematics in 2007; and how much funding is due to be allocated to such schools for the programme; [219285]

(2) how many Building Schools for the Future projects are due to take place in schools that did not achieve 30 per cent. of their pupils obtaining five A* to C grades at GCSE in 2007; and what the expenditure on those projects will be. [219566]

Jim Knight: As explained in my response to the hon. Gentleman's question 217564 on 15 July, *Official Report*, column 378W, Building Schools for the Future (BSF) funding is provided to local authorities as an 'envelope' to allow allocation of resources to individual schools reflecting the local view on priorities and needs. Details of allocations to BSF local authorities are included in the answer to his question 217532 on 15 July, *Official Report*, column 377W.

15 secondary schools, where in 2007 fewer than 30 per cent. of pupils attained five or more good GCSEs including English and mathematics, are expected to open in new or remodelled BSF buildings this financial year. A further 256 will benefit from funding as part of current Building Schools for the Future projects, either through Local Education Partnerships, the Partnerships for Schools National Framework or as One School Pathfinders. An additional 73 are included in pre-BSF private finance initiative projects, and 29 are being, or have been built under the DCSF Academies programme.

Building Schools for the Future Programme: Consultants

Mr. Gibb: To ask the Secretary of State for Children, Schools and Families what estimate he has made of the expenditure which has been incurred by schools and local authorities on consultancy services related to the Building Schools for the Future programme. [219578]

Jim Knight: We do not hold details of the expenditure schools and local authorities have made on consultancy services related to the Building Schools for the Future (BSF) programme. The Department recommends that a local authority should set aside approximately 3 per cent. of the value of its BSF project for consultancy services to support the authority through the procurement process. In addition BSF funding includes an allowance for professional fees (including architects and other design consultants, as appropriate) of 12.5 per cent. of construction costs for new build projects and 15 per cent. of construction costs for refurbishment projects. It is for local authorities to manage all project costs, including fees.

Children in Care: Clinical Trials

Tim Loughton: To ask the Secretary of State for Children, Schools and Families how many children in care have taken part in drug trials in each of the last 10 years, broken down by pharmaceutical company involved. [220679]

Dawn Primarolo: I have been asked to reply.

This information is not collected centrally.

Children: Disadvantaged

Mr. Gibb: To ask the Secretary of State for Children, Schools and Families how many and what proportion of *(a)* all pupils and *(b)* pupils eligible to receive free school meals did not attain any GCSE grades higher than a D in 2007. [217329]

Jim Knight: 136,861 pupils did not attain any GCSE grades higher than a D in 2006/07. This was 23.7 per cent. of pupils at the end of key stage 4 in maintained schools.

33,909 pupils eligible to receive free school meals did not attain any GCSE grades higher than a D in 2006/07. This was 44.7 per cent. of eligible pupils at the end of key stage 4 in maintained schools.

Council for Learning Outside the Classroom

Gregory Barker: To ask the Secretary of State for Children, Schools and Families (1) when the Council for Learning Outside the Classroom will be established; [219405]

(2) what research has been undertaken since 2004 to monitor the participation of young people in *(a)* music and *(b)* learning outside the classroom in the natural environment; [219406]

(3) how much his Department has spent on implementation of *(a)* the music and *(b)* the learning outside the classroom manifesto in each year since 2004; and what forecast expenditure is for such activity for (i) 2008-09 and (ii) 2009-10; [219408]

(4) how many children have had access to learning outside the classroom in the natural environment in each of the last five years; [219409]

(5) how many staff in his Department work on the implementation of *(a)* the music and *(b)* the learning outside the classroom manifesto. [219407]

Jim Knight: The Council for Learning Outside the Classroom will be established by March 2009. The Department does not routinely collect information on pupils' access to and participation in learning outside the classroom in the natural environment. In 2006 the Department commissioned "Education Outside the Classroom: An Assessment of Activity and Practice in Schools and Local Authorities", which can be found at

www.dcsf.gov.uk/research

The Department does not routinely collect information on young people's participation in music. In 1999, 2002, 2005 and 2007 the Department commissioned surveys of local authority music services, which collected data on the prevalence of music tuition. Survey reports are available at www.dcsf.gov.uk/research.

The Department has 1.5 full-time equivalent (FTE) staff working on learning outside the classroom policy and support for the Manifesto partnership's delivery of their agreed Action Plan. There are 1.5 FTE staff working on music policy and the delivery of music education. The extent to which that resource is spent on the Music Manifesto is not readily quantifiable. Through the Manifesto for Learning Outside the Classroom partnership, we are encouraging schools, local authorities and visit providers, to sign up to the vision that "every young person (0-19) should experience the world beyond the classroom as an essential part of learning and personal development, whatever their age, ability or circumstances". More than 1,000 have already done so. The Department is supporting the Manifesto partnership to realise this vision through funding of just under £4.5 million between 2006-07 and 2008-09. Funding is not yet allocated for 2009-10.

The Music Manifesto is a campaign to which over 2,000 signatories from every part of the music sector have signed up with joint aims to improve music education. The Department has funded the campaign since 2003. Since the Music Manifesto's second report "Making Every Child's Music Matter" in 2006, Government funding has been targeted on programmes arising out of the main recommendations of that report. Other Music Manifesto signatories are also making their responses to some of the report's recommendations, and their response is being led by the independent Music Manifesto Partnership and Advocacy Group. An announcement of £332 million government funding for music education over the next three years was made last November and further details set out in the announcement of 20 June.

Drama: Further Education

Mr. Hunt: To ask the Secretary of State for Children, Schools and Families how many colleges listed drama as *(a)* a specialism, *(b)* a second specialism and *(c)* a combined specialism in each of the last three years. [218864]

Jim Knight: Schools specialising in drama will normally be designated as specialist Arts colleges. The Arts specialism covers performing arts, visual arts or media arts, or combinations of the three; we do not keep records of which particular strands individual schools focus on. The number of schools that have been designated with Arts college status in each of the last three years is listed in the following table:

	Specialism (a)	*Second specialism (b)*	*Combined specialism (c)*	*Total*
2006/07	60	7	6	63
2006/07	39	5	10	54
2007/08	33	1	7	41
Total	122	13	23	158

In addition, there are two Performing Arts Academies and the Brit School—the only City College for the Technology of the Arts, which is dedicated to education and vocational training for the performing arts and associated technologies.

Education Maintenance Allowance

Mr. Laws: To ask the Secretary of State for Children, Schools and Families how much he expects his Department to spend on the education maintenance allowance in each of the next five years; and if he will make a statement. [219238]

Jim Knight: The budget allocations for the education maintenance allowance for the comprehensive spending review period are 2008-09 £549 million; 2009-10 £529 million; 2010-11 £529 million.

Latest expenditure estimates are 2008-09 £531 million; 2009-10 £544 million; 2010-11 £560 million. DCSF officials are working with the Learning and Skills Council to establish whether these latest estimates are a robust and accurate basis for funding.

Forecasts of expenditure beyond this period are not available.

Mr. Laws: To ask the Secretary of State for Children, Schools and Families what assessment he has made of the effects of the education maintenance allowance on *(a)* improving retention and *(b)* widening participation in education; and if he will make a statement. [219239]

Jim Knight: The education maintenance allowance (EMA) pilot evaluation evidence showed that:

(a) EMA had a positive and significant impact on post-16 retention: there was a 6.1 percentage point increase in participation in full-time education throughout the two-year period beyond compulsory schooling among eligible young people in pilots areas, compared to young people with the same characteristics in control areas without EMA.

(b) EMA led to increases in participation nationally by 3.8 percentage points for 16-year-olds and 4.1 percentage points for 17-year-olds. The evaluation showed relatively greater impact for low/middle achievers and lower socio-economic groups. These increases in participation have been sustained since the national roll-out of EMA. More recent analysis has found positive and statistically significant impacts of EMA on attainment as well as participation. These positive impacts have been particularly strong among more disadvantaged groups such as those from the most deprived neighbourhoods.

Education: Assessments

Mr. Laws: To ask the Secretary of State for Children, Schools and Families what comparative assessment he has made of the *(a)* reliability and *(b)* accuracy of marking of key stage 2 and key stage 3 tests in (i) 2008, (ii) 2006 and (iii) 2007; and if he will make a statement. [218861]

Jim Knight: Judgments about the quality of marking are a matter for Ofqual. In a published letter to the Secretary of State on 4 July, the chair of Ofqual, Kathleen Tattersall, made it clear that from the evidence available marking quality is at least as good as in previous years and justifies releasing the key stage 2 and key stage 3 test results.

Mrs. Riordan: To ask the Secretary of State for Children, Schools and Families how many children in Halifax did not receive their key stage 2 and 3 results on the expected date in 2008. [219026]

Jim Knight: The National Assessment Agency (NAA) announced on 4 July that there would be a slight delay in releasing the key stage 2 (KS2) and key stage 3 (KS3) test results. The delay will affect all pupils who sat the KS2 and KS3 national curriculum tests, the majority of whom will be in years 6 and 9.

Education: Travelling People

Andrew George: To ask the Secretary of State for Children, Schools and Families what steps his Department is taking to improve education provision for gypsy and traveller communities. [220062]

Jim Knight: The Department for Children, Schools and Families provides funding to local authorities through the Children's Services Grant to improve provision and outcome for Gypsy, Roma and Traveller (GRT) pupils and many local authorities use this to maintain a Traveller Education Support Service which works closely with schools on issues relating to GRT pupils.

The Gypsy, Roma and Traveller Achievement Programme, part of our National Primary and Secondary Strategies, was launched in 2006 and aims to improve the quality of provision, improve rates of attendance and standards of behaviour and thus raise attainment for GRT pupils. 47 schools in 12 local authorities are currently involved in this programme and a further 40 schools in 10 new local authorities will join the programme in autumn 2008.

We have also recently published, in February 2008, "The Inclusion of Gypsy, Roma and Traveller Children and Young People". This document offers practical advice to local authorities, schools, pupils and parents on how to raise ascription and attainment among GRT pupils.

Equality

Mrs. Maria Miller: To ask the Secretary of State for Children, Schools and Families for what reasons the Disability Discrimination (General Qualifications Bodies) (Relevant Qualifications, Reasonable Steps and Physical Features) (Amendment) Regulations 2008 have not been the subject of a disability equality impact assessment. [217495]

Jim Knight: We have consulted with the interested disability organisations about laying the draft regulations (dated 19 June 2008) without carrying out an equality impact assessment. A consortium covering Scope, the Royal National Institute for the Blind, Skill, the British Association of the Teachers of the Deaf, the British Dyslexia Association and the National Deaf Children's Society has told us it is reluctantly prepared to accept this approach. This is in order to avoid delays which could disadvantage disabled candidates or those considering whether or not to undertake a course.

When I took the DDA General Qualifications regulations through the House last summer I made it clear that the practice of exemptions from parts of an assessment, and therefore the resulting enhancements, will continue to be lawful after September 2007. This absolutely remains the Government position.

General Certificate of Secondary Education

Michael Gove: To ask the Secretary of State for Children, Schools and Families how many and what proportion of pupils in each local authority did not gain five A* to C GCSEs including English, mathematics, science and a foreign language in 2007. [217193]

Jim Knight: This information has been placed in the House of Commons Library.

Michael Gove: To ask the Secretary of State for Children, Schools and Families (1) how many maintained schools offer a Chinese GCSE course; [217198]

(2) how many pupils in year 11 were not entered for any GCSE examinations excluding equivalents in each of the last 10 years; [217202]

(3) how many pupils did not sit five GCSE examinations, including English and mathematics but excluding equivalents, in each of the last 10 years. [217217]

Jim Knight: This information can be provided only at a disproportionate cost.

Michael Gove: To ask the Secretary of State for Children, Schools and Families how many pupils gained five GCSEs at A*-C including English, mathematics, science, a modern foreign language and either history or geography in 2007. [217612]

Jim Knight: In 2007, 109,630 pupils (16.9 per cent.) at the end of Key Stage 4 achieved 5+ A*-C at GCSE and equivalent including English, mathematics, science, a modern foreign language and either history or geography GCSEs.

Michael Gove: To ask the Secretary of State for Children, Schools and Families how many maintained mainstream schools entered one or more pupils for GCSE examinations in *(a)* mathematics, *(b)* English, *(c)* biology, *(d)* chemistry, *(e)* physics, *(f)* history, *(g)* geography, *(h)* French, *(i)* German and *(j)* Chinese in 2008. [219564]

Jim Knight: Information about GCSE examinations in 2008 will not be available until October.

Michael Gove: To ask the Secretary of State for Children, Schools and Families how many eligible pupils did not gain (1) a GCSE in mathematics in each year since 1997; [219572]

(2) a GCSE in English in each year since 1997; [219573]

(3) a GCSE in mathematics at grade C or above in each year since 1997; [219574]

(4) a GCSE in English at grade C or above in each year since 1997; [219575]

(5) at least one GCSE, excluding equivalents, in each year since 1997. [219577]

Jim Knight: The information required can be found in the following table.

GCSE achievements of 15-year-old pupils in all schools, based on pupils aged 15 at the start of the academic year

	Total number of pupils	Number who did not achieve A*-C	Number who did not achieve A*-G	Number not entered for subject
Mathematics				
2007	656,432	304,299	62,673	43,946
2006	648,942	307,035	57,547	38,399
2005	636,771	307,945	54,958	35,976
2004	643,560	324,686	58,684	37,558
2003	622,122	323,382	59,986	37,105
2002	606,554	308,765	55,378	37,703

1997	586,766	173,197	45,074	35,232

Gorton Education Village

Sir Gerald Kaufman: To ask the Secretary of State for Children, Schools and Families what the sources of funding are for the rebuilding of Cedar Mount School and Melland School into Gorton Education Village; and what the cost of that rebuilding is. [219534]

Jim Knight: The Gorton Education Village project in East Manchester will create a single-site campus on an eight acre site providing 900 co-educational spaces and 110 specialist support special educational needs (SEN) places. This 100 per cent. new build project will combine Cedar Mount High School with Melland SEN High School. Construction commenced in September 2006 and the Education Village is due to be operational at the start of the new academic year in September 2008.

Manchester city council has been allocated £202 million of Government capital grant to Manchester for the schools in its wave 1 Building Schools for the Future project and the council has set aside approximately £10 million to supplement this. The Government funding includes £16.4 million for Cedar Mount School and £9.7 million for Melland School. Manchester city council has established a programme-level contingency fund, some of which may be allocated to the Gorton Education Village project.

Music: Education

Sarah Teather: To ask the Secretary of State for Children, Schools and Families how many *(a)* primary and *(b)* secondary age children took music lessons in schools outside the national curriculum in each London borough in each of the last five years. [219583]

Jim Knight: This information is not held centrally.

However, in 1999, 2002, 2005 and 2007, the Department commissioned surveys of local authority music services, which collected data on the prevalence of music tuition. Survey reports are available at:

http://www.dfes.gov.uk/research/programmeofresearch/projectinformation.cfm?projected=15161&keyword=music%20services&keywordlist1=Local%20authorities&keywordlist2=Arts&keywordlist3=0&andor=or&type=0&resultspage=1

These are national data rather than broken down by local authority, but they provide an indication of the music tuition that children and young people are receiving.

Personal Income: Wales

Mrs. Gillan: To ask the Secretary of State for Children, Schools and Families what account was taken of the parameters set by the devolution settlement in the development of the proposed powers to pass information on an individual's benefits, income tax and tax credit status to the Welsh Assembly Government in clauses 72 and 73 of the Education and Skills Bill. [220308]

Jim Knight: The Welsh Assembly government has been fully involved in the development of these proposals. The Welsh Ministers have devolved responsibility for education, skills, economic development and regeneration and therefore have a legitimate interest in the data sharing proposals as they will help them to monitor their policies to improve skills and the levels of sustainable employment in Wales. The Welsh Assembly government will supply data on the learning achievements of learners in Wales to DWP and will have access to aggregated data with items that explicitly identify individuate removed. These data will be on income tax, tax credits and benefits.

Section 72 and 73 of the Education and Skills Bill will enhance the ability of the Welsh Assembly government to analyse the effect of their spending on education and skills training, identify opportunities to modify activity to improve economic and social outcomes in Wales; and generally to assist in ensuring that their decisions with regard to education and training are made on a sound

basis. Education outcome data supplied from Wales will be matched at an individual level by DWP, but will only be used for analysis in Wales as an aggregated dataset. The precise nature of the data items that will be matched and aggregated has yet to be defined.

Private Education: Specialised Diplomas

Mr. Laws: To ask the Secretary of State for Children, Schools and Families which independent schools sent representatives to the national conference to discuss the new diplomas. [216609]

Jim Knight: Those independent schools represented at the national conference test December on "14-19 Reforms and independent Schools" are listed as follows:

'Independent School Recommendation at the 14-19 Reforms and Independent Schools' conference on 3 December 2007

Final attendee list: independent schools

Schools: Bus Services

Mrs. Riordan: To ask the Secretary of State for Children, Schools and Families (1) what powers local authorities have to include schools from outside their areas in their school bus pass schemes; [218983]

(2) who is responsible for policy on school bus passes; [218990]

(3) what the objectives of the Government's changes to school bus passes in 2006 were. [219087]

Jim Knight: Local authorities have to make transport arrangements where they consider it necessary to secure a child's attendance at school. If transport is necessary, then it must be provided free of charge.

In most cases, it is for the home local authority of the individual child to decide if transport is necessary. A child will be automatically entitled to free transport if they are of compulsory school age and attend the nearest suitable school regardless of whether it is in the child's home authority or not, and the school is further away than the 'statutory walking distance'. The statutory walking distances are two miles for pupils below the age of eight and three miles for those aged eight and over.

The Education and Inspection Act 2006 introduced extended rights to free home to school transport for low income families. One of the objectives of the new school travel legislation is to secure fair access to schools—especially for children from low income groups, where lack of affordable transport can act as a barrier to choice.

The Department for Children, Schools and Families has policy responsibility for Home to School Transport. The issuing of bus passes is a local decision made at the discretion of the local authority.

Schools: Sanitation

Mr. Laws: To ask the Secretary of State for Children, Schools and Families how many *(a)* secondary and *(b)* primary schools have been criticised by Ofsted for having poor toilet provision in each year since 2001; and if he will make a statement. [217680]

Jim Knight: This is a matter for Ofsted. HM Chief Inspector, Christine Gilbert, has written to the hon. Member and a copy of her reply has been placed in the Library.

Letter from Christine Gilbert, dated 14 July 2008:

Parliamentary question number 217680: To ask the Secretary of State for Children, Schools and Families, how many (a) secondary and (b) primary schools have been criticised by Ofsted for having poor toilet provision in each year since 2001; and if he will make a statement.

Your recent parliamentary question has been passed to me, as Her Majesty's Chief Inspector, for reply.

The inspection framework for maintained schools does not have a specific judgement on toilet and washroom provision. However, inspectors consider the welfare of learners and the provision for their needs. Therefore, where there is concern about toilets, they may give details in the text of the report. On occasion, inspectors have also commented favourably on good quality provision.

Since 2001, inspectors have reported on the unsatisfactory state of toilets in 290 secondary schools and in 700 primary schools from a total of 32,300 inspection reports scrutinised. 3,100 reports made some mention of toilet provision and, within these reports, a range of more positive findings were reported in primary and secondary schools. A typical example is the role of the student council in raising funds to refurbish toilets.

In relation to both secondary and primary schools, there has been a reduction in negative responses from 2001 to 2007. In 2001 there were 200 references and by 2007 there were only 25.

These results should be treated with caution. As there is no requirement to report on toilet provision, whether or not this is mentioned is up to the professional judgment of the inspector concerned.

At present, Ofsted also inspects all independent schools not associated with the Independent Schools Council, approximately 1100 out of a total of 2,500 schools in England. The Education (Independent School Standards) (England) Regulations 2003 set out the standards for Ofsted's inspection of independent schools. Regulation 5(k) requires that there are sufficient washrooms for staff and pupils, including facilities for pupils with special needs, taking account of the Education (School Premises) Regulations 1999. Since autumn 2003, 378 primary and 823 secondary schools in the Independent sector have been inspected. Of these, 59 primary (14%) and 113 secondary (16%) have recorded a fail for this regulation.

A copy of this reply has been sent to Jim Knight MP, Minister of State for Schools and Learners, and will be placed in the library of both Houses.

Schools: Sustainable Development

Gregory Barker: To ask the Secretary of State for Children, Schools and Families (1) what progress has been made against each of the eight existing doorways in achieving the aspirational 2020 targets for sustainable schools; [219395]

(2) how many schools are taking part in the National Framework for Sustainable Schools. [219396]

Jim Knight: The Ofsted Self-Evaluation Form invites schools to include information about their performance against the National Framework for Sustainable Schools. However, using the framework is voluntary and we do not collect data about how many schools have chosen to follow the framework or on individual schools' progress against each doorway towards the 2020 targets.

Respondents to the consultation on the National Framework for Sustainable Schools in summer 2006, and pilot users of the "s3: Sustainable Schools Self-evaluation" first published in May 2006, asked for interim targets for schools aiming to be sustainable by 2020. We have updated the s3 and published guidance "Planning a Sustainable School—driving school improvement through sustainable development" and using this guidance, schools can identify their own milestones of progress to becoming a fully sustainable school by 2020.

Secondary Education: Admissions

Michael Gove: To ask the Secretary of State for Children, Schools and Families of the cohort which began secondary school in 2003-04, how many were on the school register at the beginning of the school year in *(a)* 2003-04, *(b)* 2005-06 and *(c)* 2007-08. [219280]

Jim Knight: The requested information could be provided only at disproportionate cost.

Secondary Education: Standards

Michael Gove: To ask the Secretary of State for Children, Schools and Families (1) how many National

Challenge schools have been visited by Ministers in his Department and its predecessors in the last three years; [217555]

(2) how many visits *(a)* he and *(b)* Ministers in his Department have made to schools which had fewer than 30 per cent. of their pupils in 2007 achieving five or more GCSEs at grade C or above including English and mathematics in the last 12 months. [219283]

Jim Knight: The National Challenge programme was launched in June. Those schools eligible to receive support (those which had fewer than 30 per cent. of their pupils in 2007 achieving five or more GCSEs at grade C or above, including English and mathematics) were only identified in January of this year using 2007 schools data. Since January, Ministers have visited 24 of those schools and colleges, including 12 visits made by the Secretary of State.

Michael Gove: To ask the Secretary of State for Children, Schools and Families which National Challenge schools achieved an improvement in their GCSE results which was greater than the national average in the last two years. [217627]

Jim Knight: The information requested has been placed in the Libraries.

Special Educational Needs

Mr. Oaten: To ask the Secretary of State for Children, Schools and Families how many placements of children with special educational needs in each local authority have been appealed against in each of the last three years. [219974]

Bridget Prentice: I have been asked to reply.

The number of appeals registered with the Special Education Needs and Disability Tribunal against each local authority for the last three years is shown in the following table.

	Number of Appeals		
	1 September 2006 to 31 August 2007	*1 September 2005 to 31 August 2006*	*1 September 2004 to 31 August 2005*

Mr. Oaten: To ask the Secretary of State for Children, Schools and Families what the average time was between the lodging of an appeal with a special educational needs and disability tribunal and a tribunal decision in each of the last three years. [220320]

Kevin Brennan: The Special Educational Needs and Disability Tribunal (SENDIST) records the average time taken from registering an SEN appeal to issuing a decision by the school year from September to August. This information has been previously published in the SENDIST annual reports.

The following table shows the average time taken from registration of an SEN appeal by SENDIST to the time a decision following a tribunal hearing is issued.

School year	*Number decisions issued*	*Average number of months*
2004-05	1,147	4.4
2005-06	1,038	5.2
2006-07	1,045	5.5

Note:
Not all appeals registered end up with a decision as a substantial number of appeals are withdrawn by the parent or conceded by the local authority.

SENDIST also registers claims of disability discrimination and the following table shows the average time taken from registration of a claim to the issue of a decision.

School year	*Number of decisions*	*Average number of months*
2004-05	55	6.1
2005-06	56	5.5
2006-07	85	5.7

SENDIST reports that these claims have proved to be more complicated than SEN appeals involving much paperwork, lengthy hearings and many witnesses and this is reflected in the average disposal time.

World Book Day

Andrew Rosindell: To ask the Secretary of State for Children, Schools and Families what steps his Department took to involve schools in celebrating World Book Day in 2008. [218528]

Jim Knight: The Department funds the National Literacy Trust (NLT) to run the National Reading Campaign, which promotes reading for pleasure throughout the whole community. To celebrate World Book Day, the NLT contributed a double-page article for the World Book Day magazine, distributed to schools, including suggestions for how schools could take part. NLT also featured World Book Day on the front page of the NLT and Reading Connects websites, and promoted the Day in the training courses which they offer to teachers.

The National Reading Campaign forms part of the 2008 National Year of Reading (NYR), also funded by my Department. The NYR aims to promote and celebrate reading for all, and in all its forms—"anything, anytime, anyplace". World Book Day was highlighted on the NYR website as part of the "challenge period" prior to the official launch of the year on 31 March 2008.

Wright Robinson Sports College

Sir Gerald Kaufman: To ask the Secretary of State for Children, Schools and Families what the sources of funding for the rebuilding of Wright Robinson Sports College in Manchester, Gorton constituency are; and what the cost of the rebuilding is. [219535]

Jim Knight: The Government supported the rebuilding of Wright Robinson Sports College through the private finance initiative (PFI). Manchester local authority received £35 million PFI credits which equates to a capital value of £24.1 million.

The total value of the contract let by Manchester local authority was £29.79 million.

HOME DEPARTMENT

Borders: Personal Records

Philip Davies: To ask the Secretary of State for the Home Department what estimate she has made of the net financial effect of the e-borders programme on the aviation industry. [211107]

Mr. Byrne: It has been estimated that the capital investment required over 10 years is in the region of £52 million (of which £32 million falls to UK based carriers). The total running costs over the same period are projected to be an estimated £278 million (of which £171 million falls to UK carriers). These estimates have been based upon figures provided by carriers and the assessment of Project Semaphore.

The potential financial costs to the aviation industry of implementing the data collection requirements of the e-Borders programme have been analysed as part of a regulatory impact assessment, connected with the laying of secondary legislation to permit data collection and sharing by the border agencies. The regulatory impact assessment can be found at:

http://www.homeoffice.gov.uk/documents/eBorders-RIA-2008-01-10?view=Binary

There will be a potential benefit to carriers with reduction in carriers liability (CL) and removals costs. The ability of carriers to provide evidence that passengers appeared properly documented at the start of their journey will help them avoid the imposition of a CL charge. This would, in turn, reduce the incidence of detention and removal costs for carriers.

Philip Davies: To ask the Secretary of State for the Home Department (1) when she expects all passenger movements to utilise passenger name record data; [215514]

(2) for which UK routes she expects passenger name record data to be used by December 2013. [215511]

Mr. Byrne: There are currently no plans to collect passenger name record data for all passenger movements.

Philip Davies: To ask the Secretary of State for the Home Department when her Department plans to launch the consultation into the Authority to Carry scheme. [218410]

Mr. Byrne: The Government have committed to a full consultation period on the introduction of an Authority to Carry scheme. This consultation period will be launched following the completion of ongoing development work and initial discussions with stakeholders.

Philip Davies: To ask the Secretary of State for the Home Department pursuant to the answer of 7 July 2008, *Official Report*, column 1241W, on borders: personal records, when she expects the first manual phase of the Authority to Carry scheme to be implemented. [218434]

Mr. Byrne: In line with our commitment in 'Securing the UK Border', an Authority to Carry scheme will be implemented following the introduction of regulations required under s124 of the Nationality, Immigration and Asylum Act 2002. These regulations will be brought forward for parliamentary approval in due course, following a 12-week consultation period.

Mr. Brazier: To ask the Secretary of State for the Home Department what extended functionality and services in relation to the e-borders programme have been agreed. [218796]

Mr. Byrne: The following extended functionality and services to the e-Borders Programme have been agreed:

Capture of Other Passenger Information (OPI), including reservations data, on selected routes in advance of arrival or departure;

Capture of data on selected domestic routes in advance of arrival or departure;

Profiling of passenger data.

Mr. Brazier: To ask the Secretary of State for the Home Department what role Deloitte have played in the e-borders programme; at what cost to date; and what the full contractual cost of using Deloitte is estimated to be. [218829]

Mr. Byrne *[holding answer 16 July 2008]:* Deloitte consultancy services provided support to the procurement process to acquire a service provider for the e-Borders Programme. Their role included assisting with bidder

discussions and contract finalisation activities. Since the contract was awarded to Trusted Borders, and subsequent to the transition phase from procurement to implementation, Deloitte has provided advisory support to various workstreams of the programme. This is in relation to the design of the e-Borders solution.

The cost to date of the services provided by Deloitte is £23.8 million. The full contractual cost is unavailable as Deloitte support is ongoing with, a variable resource requirement.

Mr. Brazier: To ask the Secretary of State for the Home Department what extended functionality and services to the e-borders programme have been agreed since the contract with Raytheon began; whether the other consortia which competed for the contract were informed of the extended functionality and service requirements prior to the selection of the Raytheon consortium; and whether any of the original consortia bidding for the contract submitted extended functionality and service requirements in their original bids. [218831]

Mr. Byrne *[holding answer 16 July 2008]:* Since the award of the e-Borders Programme contract, a number of extended functionality and service requirements have been agreed. These services are:

Other Passenger Information (OPI);

Domestic Travel System Services (DTS);

Profiling.

A number of possible additional services were identified during the procurement process (including OPI, DTS and Profiling) and were not therefore included in the original bids.

OPI, DTS and Profiling services were identified as requirements before contract award. Both shortlisted bidders were aware of these and included them in their BAFO responses.

Crime: Victims

Mr. Jim Cunningham: To ask the Secretary of State for the Home Department what steps the Government has taken to minimise any harmful effects arising from police questioning of victims of crime. [218164]

Mr. McNulty: The National Policing Improvement Agency, alongside the Association of Chief Police Officers, work to improve the professional competence of all police officers and staff tasked with conducting investigations by assessing individual practitioner's performance measured against established national standards. These standards are applied, not just at the conclusion of interview training, but also throughout an individual's career by supervision, appraisal and review of performance.

The intermediary special measure provision of the Youth Justice and Criminal Evidence Act 1999 is currently being rolled out nationally with completion expected by September. As well as providing support at the trial for vulnerable witnesses, an intermediary assesses a witness at the investigative stage and provides support to ensure that the witness is asked appropriate questions.

The Office for Criminal Justice Reform (OCJR) updated "Achieving Best Evidence in Criminal Proceedings: Guidance for Vulnerable or Intimidated Witnesses, including Children", which was launched in autumn 2007. This provides guidance and best practice on how to interview appropriately vulnerable and intimidated witnesses, how to identify their needs and wishes and the support available to them. OCJR is currently in the process of revising the other guidance in the suite of documents published in 2001-02 to support the implementation of Special Measures. This includes the guidance document "Vulnerable Witnesses: A Police Service Guide", which is aimed at aiding front-line officers identify vulnerable witnesses, so that they can receive the support they need.

Departmental Alcoholic Drinks

David Simpson: To ask the Secretary of State for the Home Department what mechanisms are in place in her Department to monitor expenditure on alcohol for hospitality purposes. [219598]

Mr. Byrne: Department budget holders are responsible for ensuring that in considering proposals relating to the expenditure of alcohol for hospitality, all relevant financial implications, including those relating to propriety, regularity and value for money, are taken into account.

They are also responsible for ensuring the accuracy of the information held on the accounting system for their area and, where applicable, that accounting records are maintained in a form suited to the requirements of management as well as in the form prescribed for published accounts.

Home Office expenditure on alcohol for hospitality purposes conforms to departmental guidance on financial procedures and propriety, which complies with the principles of Managing Public Money and the Treasury handbook on Regularity and Propriety.

The definition of hospitality includes the provision of drink for non civil servants where it is beneficial to the interests of the Department.

Departmental Buildings

Mr. Pickles: To ask the Secretary of State for the Home Department if she will place in the Library a copy of the schedule of charges levied for minor works under the Home Office facilities management contract with Ecovert FM for 2 Marsham Street. [218276]

Mr. Byrne: Ecovert FM is contracted to the 2 Marsham Street PFI provider Anne's Gate Properties (AGP). The PFI contract contains what was at the time a standard confidentiality clause. The supplier has advised that it does not wish this commercially sensitive information to be disclosed and I am therefore unable to disclose the information requested.

Departmental Data Protection

Mr. Hoban: To ask the Secretary of State for the Home Department to which external agencies and companies personal data held by her Department has been transferred in the last 12 months. [180401]

Mr. Byrne: All sharing of personal data is carried out in accordance with the requirements of the Data Protection Act (1998) and the Human Rights Acts (1998). The

Home Office also has a number of pieces of legislation permitting the disclosure of information, subject to the DPA and HRA, including:

Crime and Disorder Act 1998;

Police Acts 1996, 1997 and 2006;

Immigration and Asylum Act 1999;

Identity Cards Act 2006;

Children Act 2004; and

Social Security Administration Act (1997).

In order to protect the public, the Home Office shares personal data with a number of other organisations including law enforcement agencies, other border control agencies, agencies involved in the protection of children and vulnerable adults, and agencies responsible for vetting and barring.

Departmental Disciplinary Proceedings

Mr. Redwood: To ask the Secretary of State for the Home Department how many staff in her Department and its agencies have been *(a)* dismissed and *(b)* disciplined for their conduct in the last two years. [217408]

Mr. Byrne: The number of staff who were *(a)* dismissed and *(b)* disciplined for their conduct during the period 1 July 2006 to 30 June 2008, is set out in the attached table. —

The Department's disciplinary procedures have a number of stages, some informal and some formal. Information on the procedures is available to staff through the department's intranet sites, to which all staff have access.

Breakdown of disciplinary action across Home Office

	Dismissed	*Disciplined short of dismissal*
Home Office headquarters	6	7
UK Border Agency	105	310
Identity and Passport Service	24	73
Criminal Records Bureau	0	0
Total	135	390

Departmental Research

Bob Spink: To ask the Secretary of State for the Home Department what proportion of her Department's budget was used for research within its areas of responsibility in each of the last 10 years. [218068]

Mr. Byrne: The information is set out in the following table.

Financial year	*Proportion (percentage)*
1998-99	0.23
1999-2000	0.22
2000-01	0.29
2001-02	0.28
2002-03	0.43
2003-04	0.37
2004-05	0.59
2005-06	0.27
2006-07	0.17
2007-08 (estimated outturn)	0.27

The Home Office 2008 Departmental Report (publication Cm 7396), published in May 2008, details outturn and planned spend on research activities for years 2002-03 to 2007-08. Similar information for years 1999-2000 to 2001-02 can be found in the Home Office 2005 Departmental Report (publication Cm 6528), published in June 2005; 1998-99 figures can be found in the Department's 2003 Annual Report (Command Paper 5908).

Departmental Secondment

Pete Wishart: To ask the Secretary of State for the Home Department what procedures her Department uses to ensure equal opportunities in relation to staff secondments to the Department. [214713]

Mr. Byrne: When arranging inward secondments, the Home Office operates a selection policy for appointment on merit on the basis of fair and open competition, in accordance with the guidance set down in the Civil Service Commissioners' Recruitment Code. The exception to this policy of fair and open competition—an exception which is allowed under the code—is where there is an urgent business need to fill a post and an individual is known to have the skills and experience required for the role. In these cases, the secondee can be appointed without a fair and open competition process, but the secondment period is expected to be limited to a period of 24 months or less.

Departmental Waste

Mr. Jenkins: To ask the Secretary of State for the Home Department what steps her Department has taken to reduce the volume of waste produced by it and sent to landfill in each of the last two years. [215922]

Mr. Byrne: The Home office has undertaken a variety of measures to reduce waste generated and sent to landfill. These include segregation of all recyclable materials from HO headquarters waste, use of double-sided printing where possible to minimise paper waste and the raising of staff awareness through dedicated sustainable development intranet pages advising staff on what they can to do to reduce waste arisings in the office. The Home Office, in line with other Government Departments, has recently stopped providing commercially bottled water at meetings in an effort to further reduce the amount of waste generated.

Deportation: Sudan

Tom Brake: To ask the Secretary of State for the Home Department how many people have been deported to *(a)* Darfur and *(b)* Khartoum in each year since 1997. [219418]

Mr. Byrne: Removal statistics are recorded on a country basis only and the requested information would only be available by examination of individual case files at disproportionate cost . Destination data have only been collated since 2004; published information prior to this is not available.

35 persons were removed or departed voluntarily to Sudan in 2004; 60 in 2005; 90 in 2006 and 80 in 2007. Figures include persons departing voluntarily after enforcement action had been initiated against them, persons leaving under assisted voluntary return programmes

run by the International Organization for Migration and since January 2005 those who it is established have left the UK without informing the immigration authorities. Figures are rounded to the nearest five and information for 2006 and 2007 is provisional.

Further National Statistics on removals from the UK are available from the Library of the House and the Home Office's Research, Development and Statistics website at:

http://www.homeoffice.gov.uk/rds/immigration-asylum-stats.html.

On 9 July 2008, Ministers announced that the Government have deferred enforcing the return of non-Arab Darfuri asylum seekers to Sudan pending the outcome of a country guidance case that is due to be heard by the Asylum and Immigration Tribunal in the near future. The case, originally listed to be heard in May, is currently waiting to be relisted and will address the safety of return to Khartoum.

Domestic Violence: Immigration

John Bercow: To ask the Secretary of State for the Home Department whether the Government plans to extend the domestic violence rule to include all abused women with insecure immigration status. [198372]

Mr. Byrne: If a woman has suffered abuse, but due to her particular circumstances is unable to meet the requirements of the immigration rules relating to domestic violence, it is already open to her to apply for leave to remain or indefinite leave to remain outside the immigration rules.

Emergency Calls

Mr. Ruffley: To ask the Secretary of State for the Home Department what percentage of emergency calls were met within the target time by the Metropolitan Police in each of the last three years. [219112]

Mr. McNulty: The City of London's emergency calls are also dealt with by the Metropolitan Police Service (MPS). The MPS has adopted a target time of 15 seconds for responding to 999 calls.

In 2004-05 86.4 per cent. of calls were responded to within the MPS target time, in 2005-06 85.1 per cent. were responded to and in 2006-07 the figure was 81.3 per cent.

These data are based on provisional information which has not been verified with individual police forces.

Entry Clearances: Iran

Mr. Lancaster: To ask the Secretary of State for the Home Department how many complaints the British Embassy in Tehran received on the visa application procedure in each of the last 36 months; and how many were dealt with within the target 24 hour response time. [219628]

Mr. Byrne *[holding answer 17 July 2008]:* Details of complaints received by the visa section at the British embassy in Tehran in each of the last 30 months is given in the following table. Data prior to January 2006 are not held. Please note that the published target time for dealing with complaints is 20 days, not 24 hours. These data have not been published and should be treated as provisional.

	Number of complaints	*Number dealt with within 20 days*
2006		
January	0	0
February	0	0
March	0	0

Total	25	22

Essex Police Authority: Manpower

Mr. Amess: To ask the Secretary of State for the Home Department how many *(a)* police officers and *(b)* operational police officers per head of population there were in Essex Police Authority in (i) 2007 and (ii) to date in 2008. [217744]

Mr. McNulty: The available data are given in the following table.

Data are collected annually and data relating to 31 March 2008 will be released on 22 July 2008.

Police officer strength for Essex police force area, as at 31 March 2007 (FTE)[1,2]

	Total officers per 100,000 population	*Total operational officers per 100,000 population*
2007[3]	203	196

[1] Full-time equivalent. This figure includes those on career breaks or maternity/paternity leave.

[2] This and other tables contain full-time equivalent figures that have been rounded to the nearest whole number. Because of rounding, there may be an apparent discrepancy between totals and the sums of the constituent items.

[3] Functional group totals do not match published figures. Data quality may be an issue with this force.

Fish Supplies

Mr. Peter Ainsworth: To ask the Secretary of State for the Home Department how much fish was procured by her Department and at what cost in each of the last five years, broken down by species; and what amount and value of such fish met the Marine Stewardship Council standard in each such year, broken down by species. [217895]

Mr. Byrne: My Department, inclusive, of its agencies does not contract directly for food or fish supplies but procures catering services through wider Facilities Management (FM) or operational service contractors.

To obtain this information would incur disproportionate costs.

Foreign Nationals

Mr. Evans: To ask the Secretary of State for the Home Department what estimate she has made of the percentage of foreign nationals who will be counted *(a)* in and *(b)* out of the UK under the border and immigration system in 2008. [203605]

Mr. Byrne *[holding answer 6 May 2008]:* It is estimated that the e-Borders system currently captures the details of approximately 50 per cent. of the total number of foreign nationals (defined as non-EEA citizens) travelling in and out of the UK.

Heathrow Airport: Security

Mrs. Villiers: To ask the Secretary of State for the Home Department pursuant to the answer of 16 June 2008, *Official Report*, column 676W, on Heathrow Airport: security, whether UK Border Agency staff were able to ascertain the identities of passengers who left the domestic arrivals area prior to the error being identified. [213091]

Mr. Byrne: There were five incidents where international passengers were misdirected to the domestic arrivals area by either British Airways or the British Airports Authority staff.

On three of the occasions, a number of individuals had left the domestic arrivals area prior to the error being identified. UKBA staff completed checks on the individuals who had entered to ensure that they did not present a known risk to the UK.

The airline provided UKBA staff with the relevant passenger information that was held on their systems, in line with established protocols and procedures. This was then used to carry out the necessary checks on all of the passengers who had travelled on the flights involved. These checks included cross checking the details of all those who had been on board the aircraft against Home Office databases. In addition, passengers' details were also passed on to the Metropolitan Police Service who carried out additional security checks.

Mrs. Villiers: To ask the Secretary of State for the Home Department pursuant to the Answer of 16 June 2008, *Official Report*, column 676W, on Heathrow Airport: security, on what date each of the flights referred to occurred. [213184]

Mr. Byrne *[holding answer 23 June 2008]:* Two flights were misdirected by British Airways staff on 27 and 31 March.

On 3 April a flight was erroneously coached into the domestic baggage hall.

On 19 April, the driver of the passenger bus went to the incorrect coaching area and erroneously dropped some passengers into the domestic arrivals area.

On 21 April a flight was being coached from a remote stand into the main terminal, the final bus went to the incorrect coaching area and erroneously dropped seven passengers into the domestic arrivals area.

All of these incidents were the result of errors made by the employees of either British Airways or the British Airports Authority. When notified of these events UKBA staff worked closely with the airport operator to secure the domestic arrivals area and to redirect the passengers to the appropriate area.

Mrs. Villiers: To ask the Secretary of State for the Home Department pursuant to the answer of 16 June 2008, *Official Report*, column 676W, on Heathrow Airport: security, on what date she was informed of each of the security lapses referred to in the answer. [213186]

Mr. Byrne *[holding answer 23 June 2008]:* Of the five occasions where international passengers were misdirected by BAA or BA staff to the Domestic Arrivals area, the UK Border Agency, acting on behalf of the Secretary of State, was immediately notified. UKBA staff then took appropriate and immediate remedial action.

All the necessary checks were carried out on the arriving passengers with every passenger being checked against the warnings index. On no occasion during these checks was there any security alert, and none of the passengers who entered the UK presented a known security risk.

The procedural issue was quickly addressed with the airport authority and the carriers. There have been no further occurrences of misdirecting flights through the Domestic area.

Given that there was no direct threat or risk to the UK, arising from the procedural problem, the issue was not raised beyond the Head of the Border Force.

Mrs. Villiers: To ask the Secretary of State for the Home Department pursuant to the answer of 16 June 2008, *Official Report*, column 676W, on Heathrow Airport: security, what steps UK Border Agency staff took to monitor the effectiveness of the reviews of security. [213188]

Mr. Byrne *[holding answer 23 June 2008]:* After each incident detailed in my response of 16 June, a review was conducted in conjunction with both the British Airports Authority and British Airways and these reviews identified a number of actions to reduce the risk of reoccurrence. Since these were implemented, the UK Border Agency has continued to monitor to ensure that further misdirections do not occur. This monitoring activity involves a combination of CCTV coverage, formal and discreet observation by UK Border Agency Staff to ensure that airline and airport staff are operating the correct procedures. In addition, a regular series of review meetings has been set up between the senior management teams of UKBA, BAA and British Airways to specifically monitor these issues.

Home Information Packs

Robert Neill: To ask the Secretary of State for the Home Department how many home information packs have been commissioned by *(a)* her Department and *(b)* its agencies to market a residential property; for which properties; at what cost; and whether a voluntary home condition report was purchased as part of the packs. [219019]

Mr. Byrne: None. The requirement to prepare home information packs applies to the marketing for sale of residential properties. My Department has not been involved in any such transactions since 1 August 2007.

Human Trafficking

Mr. Steen: To ask the Secretary of State for the Home Department when she plans to publish statistics on human trafficking including information from police and UK Border Agency operations that have taken place since 2005. [217968]

Mr. Coaker: We have provided regular information on statistics in relation to human trafficking both in relation to Operation Pentameter 1 and more recently, on 2 July, the announcement on 2 July of the outcomes of Operation Pentameter 2.

There is no intention to produce a separate document on statistics on human trafficking given the large amount of information already available.

Mr. Sarwar: To ask the Secretary of State for the Home Department how many trafficked persons have been placed in *(a)* the fast track system and *(b)* the new asylum model since March 2007. [219279]

Mr. Byrne: Information on the numbers of people identified as subjects of trafficking who have applied for asylum and been considered under these processes is not available and could be available only by examination of individual case records at disproportionate cost.

Entry to fast track asylum processes is carefully assessed on an individual basis in accordance with suitability criteria. A person would usually be considered unsuitable for the detained fast track where there is independent evidence from a recognised organisation, such as the Poppy Project, that they had been a victim of trafficking.

On 14 January 2008 the Home Secretary announced that the Government intend to make the necessary legislative and procedural changes to ratify the Council of Europe Convention on Trafficking before the end of this year as part of its wider strategy to combat trafficking. These changes will include implementing a National Referral Mechanism to help co-ordinate the identification of victims and to ensure that their status is recorded centrally. Our plans are developing and we are on track to ratify at the end of the year.

Illegal Immigrants: Ostend

Mr. Carswell: To ask the Secretary of State for the Home Department what estimate she has made of the number of people attempting to enter the UK illegally via Ostend in the most recent period for which figures are available. [218628]

Mr. Byrne: The Belgian authorities estimate that in the first six months of 2008 they have prevented 632 separate clandestine attempts to enter the UK from Ostend.

These figures have been sourced from locally collated management information and do not represent National Statistics. They have not been the subject of National Statistics protocols and verification and should therefore be treated as provisional and subject to change.

Mr. Carswell: To ask the Secretary of State for the Home Department what steps she is taking to try to reduce the number of illegal immigrants entering the UK from Ostend via Harwich and other UK ports. [218629]

Mr. Byrne: The creation of the UK Border Agency has further strengthened our border by enabling customs and immigration staff to work more effectively and efficiently alongside one another as a single team protecting our borders.

Harwich is one of five flagship ports where new ways of working have already been implemented. As part of this work, customs staff in Harwich received training and powers to search for clandestine entrants and to detain any illegal immigrants. This has led to increased coverage of the immigration risk at the port.

We cannot disclose specific information relating to Intelligence Operations or deployment of staff at specific UK ports, as this information could prove of significant value to those seeking to circumvent our border controls. To release such information would impede our ability to prevent and detect immigration and customs offenders, thereby prejudicing the security of the UK border.

Illegal Immigrants: Police Custody

Mr. Spellar: To ask the Secretary of State for the Home Department what guidance her Department has issued to local police forces on the detention of illegal immigrants. [202945]

Mr. Byrne: The Police and Criminal Evidence Act 1984 (PACE) applies to all persons detained in police custody, including those detained under immigration legislation. No additional guidance specifically for immigration detainees in police cells has been issued.

The United Kingdom Border Agency (UKBA) will respond to every police request where they encounter and arrest people who they have confirmed have been smuggled into the UK in lorries and take that person to immigration detention if appropriate. The UKBA have worked closely and in partnership with the Association of Chief Police Officers and have established Immigration Crime Partnerships with 85 per cent. of Constabularies in England and Wales with a target to increase this to 90 per cent. by 2008 and 100 per cent. by March 2009. The Government's plans, set out in 'Enforcing the Deal' published on 19 June 2008, set a clear goal to target and remove the most harmful people first, working with local authorities and enforcement agencies to shut down the privileges of the UK to those breaking the rules.

Copies of this document are placed in the Library of the House. It is also available to view at:

http://www.ukba.homeoffice.gov.uk/sitecontent/documents/managingourborders/enforcementbusinessplan08_09/enforcementbusinessplan08_09.pdf?view=Binary

Immigrants: Catering

Mr. Dismore: To ask the Secretary of State for the Home Department what estimate she has made of the numbers of skilled restaurant staff, especially chefs, who speak English to the required level, whom the (i) China and (ii) South Asian restaurant trades will be able to recruit overseas. [163799]

Mr. Byrne: The Migration Advisory Committee is responsible for providing independent advice to the Government on skill shortages and migration. The Committee will report in August.

Immigrants: Deportation

Mark Pritchard: To ask the Secretary of State for the Home Department how many *(a)* failed asylum seekers and *(b)* illegal immigrants were deported from the United Kingdom between October 2006 and October 2007. [162036]

Mr. Byrne: The Home Office publishes statistics on the number of persons removed, including voluntary departures, from the UK on a quarterly basis. The numbers are broken down by asylum applicants, including dependants, and those who have not claimed asylum. The latest published information covers the final quarter in 2007 and is published in table 8b: Persons removed from the United Kingdom, in the quarterly web-based Asylum Statistics bulletin.

It is not possible to say what stage in the asylum process people have reached at the time of their removal, including whether their claim has failed at that point, because those departing voluntarily can do so at any stage.

Published statistics on immigration and asylum are available from the Library of the House and from the Home Office Research, Development and Statistics Directorate website at:

http://www.homeoffice.gov.uk/rds/immigration1.html.

Immigration

Mr. Spellar: To ask the Secretary of State for the Home Department what guidance her Department has issued on the application of new paragraph 327B of the Immigration Rules. [197641]

Mr. Byrne: Guidance on the application of new paragraph 320(7B) was made available to immigration officers and entry clearance officers on 1 April, and has been updated to take account of the concessions that have been announced to the changes since then.

The guidance for entry clearance officers can be found in chapter 26.17 of the Entry Clearance Guidance, available at:

http://www.ukvisas.gov.uk/en/ecg/chapter26/.

The guidance for immigration officers will be published in the summer and will be available at:

www.ukba.gov.uk.

John Bercow: To ask the Secretary of State for the Home Department if the Government will exempt from the no recourse to public funds rule persons fleeing all forms of violence who are subject to immigration control. [198371]

Mr. Byrne: Where a person makes a claim for asylum, regardless of the grounds on which that claim is made, and including asylum claims made on the basis of violence, that person will be supported by the UK Border Agency until that claim is determined, and will have no other recourse to public funds. If a person is subsequently granted refugee status or humanitarian protection in the United Kingdom they are granted leave that enables them to access public funds.

Additionally, the immigration rules enable an applicant who has limited leave to enter or remain in the United Kingdom as the spouse, unmarried partner, registered civil partner or same sex partner of a British citizen or person present and settled in this country and whose marriage or relationship breaks down during the probationary period as a result of domestic violence to be granted indefinite leave to remain in the United Kingdom at which point they are not prohibited from accessing public funds.

In March we announced a new scheme where victims of domestic violence who have no recourse to public funds may be eligible to receive support for their housing and living costs. Under the new scheme victims of domestic violence whose applications for Indefinite Leave to Remain are successful may qualify for a contribution towards these costs. Further details on this programme of work are still being worked up and will be available later this spring. The proposals under the new scheme will strengthen the way in which domestic violence cases are considered enabling those victims who are vulnerable to access immediate support.

We have worked with the third sector and other partners to provide victims of trafficking for sexual exploitation with comprehensive support since 2003. In 2007 the UK became a signatory to the Council of Europe Convention against Trafficking in Human Beings which we are committed to ratifying by the end of 2008. This will enhance existing measures and will provide all identified victims of trafficking with minimum levels of support during a 'reflection period' and access to temporary residence permits in certain circumstances.

Mr. Burstow: To ask the Secretary of State for the Home Department if she will ensure that the Minister of State gives personal consideration to the exceptional aspects of the case of Mrs. Sara Said, the constituent of the hon. Member for Sutton and Cheam. [219330]

Mr. Byrne: It is not the policy of the UK Border Agency to comment on individual cases but we will write to the hon. Member detailing our consideration of Mrs. Said's case.

Immigration Controls

Mr. Evans: To ask the Secretary of State for the Home Department what the average waiting time was at immigration for non-EEA citizens entering the UK via London Heathrow Terminal One in the first six months of 2007. [164048]

Mr. Byrne: The UK Border Agency did not commence collating queue performance information in its current format until August 2007. It is therefore not possible to provide the average waiting time for non-EEA citizens entering the UK via Heathrow Terminal one for the

first six months of 2007. Please find following, however, a table providing the most up-to-date queue performance at major London airports, including Heathrow, for the month of May.

The UK Border Agency recognises that it has a responsibility to process genuine passengers without delay but the safety and security of the public remains a priority.

There are currently arrangements in place at most ports to benchmark performance. Heathrow is among those airports that are currently using a 45 minutes (non-EEA) and 25 minutes (EEA) queuing time as such a benchmark. This is the maximum wait time in which we aim to process passengers and in turn informs staff deployment as well as informing considerations on further investment.

We are clear that the average queuing times are well within these benchmarks but we will continue to work on reducing the occasions where those figures are exceeded.

Queuing times during May 2008 for London airports

Location	*Heathrow*	*Gatwick*	*Stansted*	*London City*[1]
Non-EEA				
Average queue length (minutes)	12	15	12	3
Percentage over benchmark	2	4	0	0
	14 out of 598 measures	11 out of 270 measures	0 out of 95 measures	0 out of 74 measures
EEA				
Average queue length (minutes)	4	8	7	3
Percentage over benchmark	1	2	0	0
	8 out of 599 measures	5 out of 270 measures	0 out of 95 measures	0 out of 68 measures

[1] London city operates single queues but these are predominantly EEA passengers.

Mr. Evans: To ask the Secretary of State for the Home Department what the average waiting time was at immigration for non-EEA citizens entering the UK via London Gatwick South Terminal in the first six months of 2007. [164049]

Mr. Byrne: The UK Border Agency did not commence collating queue performance information in its current format until August 2007. It is therefore not possible to provide the average waiting time for non-EEA citizens entering the UK via London Gatwick South Terminal in the first six months of 2007. Please find following, however, a table providing the most up-to-date queue performance at major London airports, including Gatwick, for the month of May.

The UK Border Agency recognises that it has a responsibility to process genuine passengers without delay but the safety and security of the public remains a priority.

There are currently arrangements in place at most ports to benchmark performance. Gatwick is among those airports that are currently using a 45 minutes (non-EEA) and 25 minutes (EEA) queuing time as such a benchmark. This is the maximum wait time in which we aim to process passengers and in turn informs staff deployment as well as informing considerations on further investment.

We are clear that the average queuing times are well within these benchmarks but we will continue to work on reducing the occasions where those figures are exceeded.

Queuing times during May 2008 for London airports

Location	*Heathrow*	*Gatwick*	*Stansted*	*London City*[1]
Non-EEA				
Average queue length (minutes)	12	15	12	3
Percentage over benchmark	2	4	0	0
	14 out of 598 measures	11 out of 270 measures	0 out of 95 measures	0 out of 74 measures
EEA				
Average queue length (minutes)	4	8	7	3
Percentage over benchmark	1	2	0	0
	8 out of 599 measures	5 out of 270 measures	0 out of 95 measures	0 out of 68 measures

[1] London city operates single queues but these are predominantly EEA passengers.

Mr. Lilley: To ask the Secretary of State for the Home Department how many educational establishments are expected to be involved as sponsors under the proposed points-based immigration system. [197758]

Mr. Byrne *[holding answer 31 March 2008]:* As the new licensing regime for colleges has not started, it is not possible to predict how many will pass.

Jon Trickett: To ask the Secretary of State for the Home Department whether a foreign international in the UK may apply to immigrate under the points-based system while remaining in the UK. [218251]

Mr. Byrne *[holding answer 14 July 2008]:* A foreign-national who is in the UK may be given permission to stay under the points based system if he or she is here in an immigration category from which the immigration rules allow "switching" into the part of the new system that the applicant wants to join.

For example, someone who is currently here as a work permit holder or student and wishes to switch into the highly skilled tier of PBS (Tier 1 (General)) may do so, provided he or she meets the other requirements of the immigration rules. But someone who has entered the country as a visitor or illegally may not. Full details may be found in part 6a of the immigration rules, available on the UK Border Agency website.

Immigration: Appeals

Mike Gapes: To ask the Secretary of State for the Home Department how many appeals against immigration decisions were allowed by the Asylum and Immigration Tribunal in each of the last three years; in how many of these cases the UK Border Agency and its predecessor *(a)* issued status documents and *(b)* made the appropriate passport endorsement within (i)

one month, (ii) three months (iii) six months and (iv) were the six months of the determination; and if she will make a statement. [202221]

Mr. Byrne: The figures for the number of appeals against immigration decisions allowed at the first substantive immigration judge hearing are given as follows.

The figures are rounded to the nearest 10. The figures for 2006-07 and 2007-08 are the latest provisional information from the Asylum and Immigration Tribunal's database.

Managed migration figures include all immigration decisions where the applicant is already in the United Kingdom. Entry clearance figures include all immigration decisions where the appellant is outside the United Kingdom but exclude applications for visit visas.

Information on the length of time taken to issues status documents and make the appropriate passport endorsements in each case are not routinely kept and the cost would be disproportionate to provide the information requested.

	Managed migration	*Entry clearance*
2005-06	4,970	11,690
2006-07	5,510	21,580
2007-08	6,640	18,560

Mike Gapes: To ask the Secretary of State for the Home Department what target time her Department sets for the issue of status documents following a determination by the Asylum and Immigration Tribunal to allow an appeal against *(a)* a decision to refuse indefinite leave to remain, *(b)* an entry clearance officer's decision to refuse entry clearance to join a spouse in the UK and *(c)* an entry clearance officer's decision to refuse an application for a visit visa; what the average time for the issue of such documents in each circumstance was in each of the last three years; and if she will make a statement. [202223]

Mr. Byrne: The Secretary of State for the Home Department does not set a target for the issue of status documents following an allowed appeal against *(a)* a decision to refuse indefinite leave to remain or *(b)* an entry clearance officer's decision to refuse entry clearance to join a spouse in the UK or *(c)* an entry clearance officer's decision to refuse an application for a visit visa.

Information on the time taken between promulgation of an appeal determination and the issue of status papers or a visa, or the relevant endorsement of a passport in each individual case is not routinely kept by either the Appeals Implementation Unit nor UK Visas and the cost would be disproportionate to provide the information requested.

Immigration: Children

Mr. Andrew Smith: To ask the Secretary of State for the Home Department how many children who are British citizens are in immigration detention; and for how long they have been there. [207583]

Mr. Byrne *[holding answer 4 June 2008]:* There were no children with British citizenship in any immigration removal centre as at Thursday, 22 May 2008. The UK Border Agency does not detain children who are British citizens. However, where a foreign national subject to enforced removal is parent to a child with British citizenship, it is possible for that child to accompany the parent through the enforcement process on a voluntary basis. Such situations are not common and would only occur where deemed to be in the child's best interests with all parties in agreement and the parent providing consent. The child's status in the removal centre would effectively be that of a guest.

Immigration: Latin America

Jeremy Corbyn: To ask the Secretary of State for the Home Department what recent discussions she has had with her EU counterparts on removal of people without documents to Latin America; and if she will make a statement. [217789]

Mr. Byrne *[holding answer 14 July 2008]:* UK Border Agency officials meet with European Union (EU) colleagues on a regular basis within EU working group frameworks to discuss returns management issues. There has been no formal discussion in recent time on removal of people without documents to Latin America, and as far as we are aware none are planned.

Immigration: Standards

Mr. Mudie: To ask the Secretary of State for the Home Department what *(a)* targets have been set, *(b)* guidance issued and *(c)* objectives determined in relation to (i) the time to be taken for processing applications for leave to remain and (ii) information on the progress of such applications to be passed to the applicant, broken down by each stage of the consideration process; and if she will make a statement. [218905]

Mr. Byrne: Service standards in relation to processing of applications for further leave to remain and settlement in the United Kingdom are published on the UK Border Agency (UKBA) website at:

http://www.ukba.homeoffice.gov.uk/

UKBA staff work to these standards and managers report on these standards to Ministers on a regular basis. These standards are only applicable to applications made by those with valid leave at the time of the application.

Applicants receive an acknowledgment letter on receipt of their application which sets out the service standards. Information on processing times is also available to applicants on the UKBA website.

Information on the progress of cases is not provided routinely to applicants at each stage of the consideration process but applicants can contact the Agency for progress on their applications via the Immigration Enquiry Bureau (IEB) or by letter.

Metropolitan Police: Uniforms

Mr. Malins: To ask the Secretary of State for the Home Department what estimate she has made of the percentage of Metropolitan Police officers who are *(a)* in uniform and *(b)* in plain clothes at any one time. [218994]

Mr. McNulty *[holding answer 15 July 2008]:* The deployment of officers to uniform and non-uniformed functions is an operational matter for the Commissioner.

Offenders: Deportation

Kate Hoey: To ask the Secretary of State for the Home Department whether there are any exceptions to the rule which provides that a person deported from the UK having been convicted of a criminal offence may not return within 10 years. [218479]

Mr. Byrne: The only exceptions to the rule are where refusal to revoke the deportation order would breach our international obligations under the Human Rights Convention or the Convention and Protocol Relating to the Status of Refugees.

Office of the Surveillance Commissioners: Inspections

Mr. Pickles: To ask the Secretary of State for the Home Department with reference to the answer of 23 October 2007, *Official Report*, column 202W, on the Office of the Surveillance Commissioners: Inspections, which local authorities were inspected. [218289]

Mr. McNulty: The figures provided by the independent Office of Surveillance Commissioners on its inspections of local councils are published in its annual reports. It is not their practice to publish a more detailed breakdown or identify particular councils.

Olympic Games

Mr. Don Foster: To ask the Secretary of State for the Home Department how many *(a)* Ministers and *(b)* officials from her Department plan to attend the Beijing Olympic Games; to what purpose in each case; and what estimate she has made of the cost. [212111]

Mr. Byrne: No Home Ministers will attend the Beijing Olympic Games. The number of Government officials attending has not yet been finalised.

Personal Injury

Mr. Hayes: To ask the Secretary of State for the Home Department what the highest 10 payments made by her Department in settlement of personal injury claims brought against it were over the last 12 months for which figures are available; which of those cases were *(a)* contested and *(b)* uncontested by the Department; and what the nature of the incident was in each case. [216685]

Mr. Byrne: During the period 1 July 2007-30 June 2008, the Home Office, including the UK Border Agency, the Identity and Passport Service and the Criminal Records Bureau, settled a total often personal injury claims, with the total compensation awarded amounting to £165,727.68.

The claims are broken down in the following table.

Personal injury claims from 1 July 2007 to 30 July 2008

Nature of incident/claim	*Contested*	*Compensation (£)*
Work Related Stress	Yes	115,000.00
Injury resulting from a fall	Yes	11,044.00
Repetitive strain injury	No	10,000.00
Repetitive strain injury	No	8,000.00
Injury resulting from a slip	Yes	7,705.00
Repetitive strain injury	No	7,000.00
Tripped over door	Yes	3,000.00
Collapsed Aorta	No	1,728.68
Trapped hand in door	Yes	1,250.00
Manual handling injury	Yes	1,000.00

Police Cautions

Mr. Ruffley: To ask the Secretary of State for the Home Department in how many cases of *(a)* violence against the person, *(b)* sexual offences, *(c)* robbery, *(d)* burglary, *(e)* theft, *(f)* fraud and forgery, *(g)* criminal damage and *(h)* drugs offences police cautions were given in each of the last five years; and what proportion of such cases were first offences. [219172]

Maria Eagle: I have been asked to reply.

The number of offenders issued with a caution for *(a)* violence against the person, *(b)* sexual offences, *(c)* robbery, *(d)* burglary, *(e)* theft, *(f)* fraud and forgery, *(g)* criminal damage and *(h)* drugs offences in England and Wales for the years 2002 to 2006 is shown in the following table.

Data from the court proceedings database held by the Ministry of Justice cannot separately identify what proportion of cautions were first offences.

Cautions data for 2007 will be available in the autumn of 2008.

The number of defendants issued with a caution for offences relating to various types of offences in England and Wales, 2002 to 2006[1,2,3]

Offence type	*2002*	*2003*	*2004*	*2005*	*2006*
Violence against the person	23,607	28,760	36,610	51,020	57,273
Sexual offences	1,203	1,359	1,553	1,761	1,922
Burglary	5,771	5,568	5,604	6,451	7,687
Robbery	408	422	451	622	712
Theft and handling stolen goods	54,214	54,466	61,944	67,619	72,369
Fraud and forgery	5,335	5,484	6,036	6,936	8,024
Criminal damage	3,102	3,726	5,495	7,246	9,018
Drug offences	44,922	45,707	32,621	34,390	37,426

[1] These data are on the principal offence basis.
[2] Every effort is made to ensure that the figures presented are accurate and complete. However, it is important to note that these data have been extracted from large administrative data systems generated by police forces. As a consequence, care should be taken to ensure data collection processes and their inevitable limitations are taken into account when those data are used.
[3] From 1 June 2000 the Crime and Disorder Act 1998 came into force nationally and removed the use of cautions for persons under 18 and replaced them with reprimands and final warnings. These figures have been included in the totals.
Source:
CJEAU—Office for Criminal Justice Reform—Ministry of Justice

Police: Bureaucracy

Mr. Ruffley: To ask the Secretary of State for the Home Department what percentage of time on average *(a)* all officers and *(b)* patrol officers spent on (i) incident and (ii) non-incident related paperwork in each year since 2003-04; and how long each spent on average on patrol in each year. [219154]

Mr. McNulty: I refer the hon. Member to the answer I gave him on 10 December 2007, *Official Report*, column 91W.

Police: Council Tax

Mr. Pickles: To ask the Secretary of State for the Home Department how much was raised from the police precept in *(a)* England, *(b)* Wales and *(c)* each police authority in England and Wales in 1997-98; and how much is expected to be raised in 2008-09. [218291]

Mr. McNulty: Information is set out in the following table:

Council tax requirement

Police authority	*1997-98*	*£ million 2008-09*
Avon and Somerset	25.56	85.26
Bedfordshire	9.50	27.49
Cambridgeshire	11.71	41.99
Cheshire	17.12	50.34
Cleveland	8.60	29.27
Cumbria	9.23	31.66
Derbyshire	15.09	48.05
Devon and Cornwall	26.30	85.66
Dorset	16.60	47.94
Durham	8.88	26.70
Essex	29.28	77.63
Gloucestershire	10.05	41.14
Greater Manchester	40.17	98.76
Hampshire	31.76	91.65
Hertfordshire	17.59	60.23

West Midlands	39.56	74.88
West Yorkshire	31.84	82.30
Wiltshire	11.78	35.59
England total	899.38	2,824.59
Dyfed-Powys	8.24	33.86
Gwent	8.67	33.70
North Wales	11.24	51.25
South Wales	19.49	63.60
Wales total	47.64	182.41
England and Wales total	947.02	3,007.00

[1] Lincolnshire police authority will be required to set a revised budget requirement and council tax following approval by the House of Commons on 9 July of an order to cap the authority in 2008-09. *Source:* DCLG—from English Police Authorities/WAG—from Welsh Police Authorities.

Police: Firearms

Mr. Ruffley: To ask the Secretary of State for the Home Department how many police officers have received firearm injuries while on duty *(a)* in England and Wales and *(b)* broken down by police force area in each year since 1997. [219107]

Mr. McNulty: Data on crimes recorded by the police in which a police officer on duty was injured by a firearm (excluding air weapons) from 1997-98 up to and including 2006-07 are given in the following table.

Crimes recorded by the police in England and Wales in which a police officer was injured[1] by a firearm (excluding air weapons), by police force area 1997-98 to 2006-07

	Police force area	*Total injuries*
1997-98	Metropolitan	2
	Northamptonshire	1
	Nottinghamshire	1
	West Midlands	2
	England and Wales total	6
1998-99[2]	Devon and Cornwall	2
	Greater Manchester	3
	Leicestershire	1
	Metropolitan	5
	England and Wales total	11
1999-2000	Avon and Somerset	1
	Cheshire	1
	City of London	1
	Metropolitan	2
	Staffordshire	1
	West Midlands	4
	England and Wales total	10
2000-01[3]	Greater Manchester	5

Crimes recorded by the police in England and Wales in which a police officer was injured[1] by a firearm (excluding air weapons), by police force area 1997-98 to 2006-07

	Police force area	Total injuries
	Metropolitan	1
	South Yorkshire	2
	England and Wales total	8
2001-02	Metropolitan	1
	Staffordshire	1
	Warwickshire	3
	West Midlands	5
	England and Wales total	10
2002-03[4]	Gloucestershire	1
	Metropolitan	6
	Northamptonshire	2
	West Midlands	3
	England and Wales total	12

	Humberside	1
	Leicestershire	1
	Merseyside	1
	Metropolitan	4
	West Midlands	5
	West Yorkshire	2
	Wiltshire	1
	England and Wales total	21

[1] Includes fatal, serious and slight injuries.
[2] There was a change in counting rules for recorded crime on 1 April 1998.
[3] Numbers of some recorded crimes may have been inflated by some police forces implementing the principles of the National Crime Recording Standard before 1 April 2002.
[4] The national Crime Recording Standard was introduced on 1 April 2002. Figures for some crime categories may have been inflated by this.
[5] More explicit guidelines for the classification of weapons introduced on 1 April 2004, may have increased the recording of firearm offences, particularly those committed by imitation weapons.

Police: Manpower

Mr. Ruffley: To ask the Secretary of State for the Home Department how many police officers in England and Wales were in post on the latest date for which figures are available, broken down by rank; and how many in each rank were *(a)* Black and *(b)* Asian. [219115]

Mr. McNulty: I refer the hon. Member to the reply I gave him on 10 December 2007, *Official Report*, column 94W.

Police: Resignations

Mr. Ruffley: To ask the Secretary of State for the Home Department how many and what percentage of police officers left the police service *(a)* within two to five years, *(b)* within five to 10 years and *(c)* after more than 10 years of joining in each year since 1997, broken down by police force area. [219108]

Mr. McNulty: I refer the hon. Member to the reply I gave him on 25 January 2008, *Official Report*, columns 2254-2268W.

Police: Sight Impaired

Nick Harvey: To ask the Secretary of State for the Home Department how many Metropolitan Police officers trained in firearms handling have been taken off front line duty due to vision problems or impairments in the last three years. [218440]

Mr. McNulty: The information requested is not collected centrally.

Nick Harvey: To ask the Secretary of State for the Home Department how many police recruit applications have been turned down due to vision problems or impairments in the last three years. [218441]

Mr. McNulty: In the last three years to 31 March 2007, a total of 26 individuals have been rejected after having their eyesight tested at the medical assessment stage.

This represents a total of 0.1 per cent. of the total number of applicants during the same period.

These data are based on provisional information which has not been verified with individual police forces.

Police: Stun Guns

Mr. Ruffley: To ask the Secretary of State for the Home Department on how many occasions Taser stun guns have been *(a)* drawn, *(b)* arced as a demonstration warning, *(c)* applied in a drive stun and *(d)* fired by each police force since 2003. [219105]

Mr. McNulty: The latest figures on the use of Taser by each police force in England and Wales, published by the Home Office on 12 May 2008, can be found on the Home Office website at:

http://science.homeoffice.gov.uk/hosdb/about-us/news/539349.

Police: Voluntary Work

Mr. Ruffley: To ask the Secretary of State for the Home Department what steps she has taken to support volunteers who work for the police, with particular reference to staffing police stations. [219109]

Mr. McNulty: I refer the hon. Member to the reply I gave him on 14 January 2008, *Official Report*, column 1070W.

Political Parties: Conferences

Mr. Ruffley: To ask the Secretary of State for the Home Department what the costs were of policing the annual party political conferences in each of the last three years; and from what budget these costs were met. [219114]

Mr. McNulty: Costs of policing annual party conferences fall to the relevant police authority. The Home Office has provided additional grant to the authorities responsible for policing the annual conference of the two main parties. The amount of additional grant paid in the last three years is set out in the following table:

National autumn conferences	*Force*	*Amount of Government special grant (£ million)*
Labour		
2006-07	Greater Manchester	3.984
2007-08	Dorset	5.320
2008-09	Greater Manchester	6.500
Conservative		
2006-07	Dorset	2.150
2007-08	Lancashire	1.797
2008-09	West Midlands	4.500

Powers of Entry

Mr. Pickles: To ask the Secretary of State for the Home Department (1) what the timetable is for the review of state powers of entry into private property; [218210]

(2) what the timetable is for the review of powers of entry to publish its *(a)* options paper and *(b)* consultation paper; [218279]

(3) whether the review of powers of entry has completed its first phase on determining all existing powers of entry; [218280]

(4) how many separate proposals for new powers of entry have been referred to her Department in the last 36 months following her Department's guidance on powers of entry; [218281]

(5) who the members are of the review of state powers of entry into private property; [218301]

(6) what representations the review of state powers of entry into private property has received from *(a)* members of the public and outside organisations and *(b)* public bodies, Government departments or quangos. [218302]

Mr. McNulty: The Powers of Entry Review is being carried out by the Home Office in conjunction with other relevant Government Departments and agencies who exercise statutory investigative or enforcement powers. Progress on the review is set out on the Home Office website at:

http://www.police.homeoffice.gov.uk/operational-policing/powers-pace-codes/powers-of-entry-review/.

The webpage contains tables listing the powers of entry and entry, search, seizure or inspection identified to date and by whom and when those powers can be exercised. The review is now entering stage 2 and working with investigative and enforcement agencies on (a) assessing the continuing need for the powers and (b) raising public awareness and understanding of their rights and expectations. On completion of this work, the Government will launch a public consultation exercise on the findings of the review and next steps. The public consultation exercise is expected to commence in the autumn 2008. We will consider any parliamentary process in the light of the outcome of the public consultation.

A record is not currently held centrally on proposals submitted by other Departments for new or amending powers of entry.

Rape

Mr. Ruffley: To ask the Secretary of State for the Home Department how many police forces are equipped with readily available test kits to secure samples in the event of a complaint of drug rape. [219100]

Mr. McNulty: Since 2007, all police forces in England and Wales have had access to early evidence kits. ACPO guidance "Investigating Serious Sexual Offences", published in 2005, states that they should be readily available. These kits are intended to ensure the effective recovery of non-intimate forensic samples, including urine samples where drug or alcohol analysis is required.

Seasonal Agricultural Workers Scheme

Pete Wishart: To ask the Secretary of State for the Home Department (1) what assessment she has made of the effect on *(a)* the Scottish fruit industry and *(b)* seasonal agricultural workers of changes to the seasonal agricultural workers scheme; [218208]

(2) what representations her Department has received from the Scotland Office on changes to the seasonal agricultural workers scheme. [218209]

Mr. Byrne: I have received representations from the Scottish branch of the National Farmers Union and there are ongoing discussions between the Home Office and stakeholders on this issue. I am aware that some employers are reporting difficulties attracting migrants from the 2004 EU accession countries and we will

continue to monitor the situation. However, it remains the Government's policy that labour needs skills at lower skill levels can be met from an expanded EU labour force. It is consistent with the principle of Community preference that the SAWS remains open only to nationals of Bulgaria and Romania while restrictions on nationals of those countries' access to the labour market remain in force.

Surveillance

Mr. Pickles: To ask the Secretary of State for the Home Department how many and what proportion of complaints the Investigatory Powers Tribunal has upheld since it was created. [218293]

Mr. McNulty: From 2 October 2000 to 31 December 2006—the most recent date for which figures have been published—the Investigatory Powers Tribunal issued determinations in respect of 554 complaints. During that period it has only upheld a complaint once. This related to two complainants who lodged a joint complaint. The details were reported in the Interception of Communications Commissioner's report of 2005, a copy of which has been placed in the House Library.

Surveillance: Local Authorities

Mr. Pickles: To ask the Secretary of State for the Home Department what guidance her Department has issued to local authorities on the use of surveillance and the Regulation of Investigatory Powers Act 2000. [218282]

Mr. McNulty: I refer the hon. Gentleman to the reply I gave him on 22 May 2008, *Official Report*, column 477W.

Terrorism

Mr. Pickles: To ask the Secretary of State for the Home Department if she will place in the Library a copy of the heat map produced by her Department's Office for Security and counter-terrorism showing the 30 areas deemed most prone to Islamist extremism. [218287]

Mr. McNulty: The Government are working with local partners to ensure that information relevant to planning future work on preventing violent extremism is shared. For national security reasons it is not possible to place all of this information in the public domain.

Westminster City Council

Ms Buck: To ask the Secretary of State for the Home Department what projects undertaken by Westminster city council have received grant-aid funding from her Department since 1999. [217098]

Mr. Byrne: The Department's grant-related payments to Westminster city council are set out in the following table.

£

Project	*2004-05*	*2005-06*	*2006-07*	*2007-08*
Childs Protection Training	600	—	—	—
Adults and Families	2,264,315	1,171,225	76,544	—
Unaccompanied Asylum Seeking Children	1,563,840	1,748,819	1,403,076	1,868,625
Antisocial Behaviour	115,000	88,116	144,060	—
Sports Unit Positive Futures	29,005	84,701	—	—
Young People Substance Misuse	445,211	588,654	564,670	500,734
Enabling Grant	65,000	135,000	—	140,000
Drug Interventions Programme	—	1,201,447	2,302,318	2,016,349
Graffiti Pilot	—	2,996	—	—
Single Non Emergency Number	—	69,968	—	—
Indefinite Leave To Remain	—	359,072	90,459	—
Respect Grant	—	—	221,079	294,622
Safer Streets—Homeless	—	—	—	106,000
Criminal Justice IT	—	367,027	—	—

Information relating to payments made between the years 1999-2000 and 200304 could not be obtained without incurring disproportionate cost.

Written Questions: Administrative Delays

Mr. Sanders: To ask the Secretary of State for the Home Department when she expects to reply to question 206678 tabled by the hon. Member for Torbay on 15 May 2008, on Mr. Christian Ofori-Addo. [218688]

Mr. Byrne: I replied to the hon. Member on 7 July 2008, *Official Report*, column 1247W.

Yarl's Wood Detention Centre

Alistair Burt: To ask the Secretary of State for the Home Department how many detainees at the Yarl's Wood Detention and Removal Centre have been in detention for *(a)* between three and six months, *(b)* between six and nine months, *(c)* between nine and 12 months, *(d)* between 12 and 18 months and *(e)* more than 18 months. [218688]

Mr. Byrne: Information on persons detained at Yarl's Wood Immigration Service Removal Centre for all periods of time requested is not available; this information could be obtained only through the examination of individual records at disproportionate cost.

However, management information currently available shows that of the persons held in detention for at least nine months and detained at Yarl's Wood as at 10 July 2008, one has been in detention for between nine and 12 months, four have been in detention for between 12 and 18 months and four have been in detention for more than 18 months.

Alistair Burt: To ask the Secretary of State for the Home Department to which countries those people detained at Yarl's Wood Detention and Removal Centre who have been detained there for more than nine months are due to be returned; and how many do not have current removal directions. [218689]

Mr. Byrne: Those people detained at Yarl's Wood Detention and Removal Centre for more than nine months as 10 July 2008 are recorded as nationals of Liberia, Nigeria, Jordon, Kenya, Vietnam, India and the Democratic Republic of Congo. In seven of these cases removal directions are not currently set.

Young Offenders: Reoffenders

Mr. Ruffley: To ask the Secretary of State for the Home Department how many re-convictions of young offenders there were in each police force area in each year since 1997; and what percentage of convictions of young offenders this represented in each year. [219052]

Mr. Hanson: I have been asked to reply.

Information on re-offending by juveniles by police force area is not available. Figures for re-offending by juveniles were published in May of this year in "Re-offending of Juveniles: new measures of re-offending 2000 to 2005 England and Wales", but the data sets used do not enable analysis by police force area. The full report can be found online at

http://www.justice.gov.uk/docs/re-offending-juveniles-2000-05.pdf

OLYMPICS

Departmental Sick Leave

David Simpson: To ask the Minister for the Olympics how many staff in her Office have had five or more periods of sickness absence of less than five days in two or more of the last five years. [218979]

Tessa Jowell: None.

Olympic Delivery Authority: Manpower

Mr. Don Foster: To ask the Minister for the Olympics how many people were employed by the Olympic Delivery Authority (ODA) at the most recent date for which figures are available; what the staffing costs of the ODA will be in 2008-09; and how many of the ODA's staff work on *(a)* project management, *(b)* legacy planning and *(c)* financial oversight. [219273]

Tessa Jowell: As of 30 June 2008, the ODA employed 212 members of staff. This consists of permanent staff, fixed-term contract staff, and secondments. The overall management costs budget for 2008-09 is based on an ODA headcount of 276. The agreed total budget for ODA management costs for 2008-09 is £24,223,000. This budget has been set to cover salary costs, including employer national insurance contributions, employer pension contributions and bonus payments that are payable to eligible staff based on performance and achievement of overall objectives.

The ODA currently has 128 members of staff working in project management roles across a number of ODA teams.

The ODA is leading the first phase of legacy which is focused on cleaning, clearing, and creating the park and the development of new infrastructure, utilities, and venues. The second phase is led by the LDA and is focused on what the park is used for after the games. It is not possible to provide a breakdown of those ODA staff who are exclusively working on legacy planning roles as every project within the programme is considered with legacy in mind, ensuring that legacy requirements are incorporated into design briefs, specifications and business plans.

The ODA currently has 15 employees working in the Finance and Business Planning Team who work closely with the delivery partner on the financial oversight of the programme. In addition the ODA has engaged Ernst and Young to provide an internal audit service.

Olympic Games

Mr. Don Foster: To ask the Minister for the Olympics pursuant to the answer of 2 June 2008, *Official Report*, columns 567-8W, on the Olympic games, what estimate he has made of the cost of Ministers from her Department and departmental officials attending the Beijing Olympic games. [219477]

Tessa Jowell: All ministerial travel is undertaken in accordance with the Ministerial Code and Travel by Ministers, and travel by DCMS officials is undertaken in accordance with the requirements of the Civil Service Management Code, copies of which are available in the Library.

I and my Private Secretary will be travelling to the Olympic games. The cost of my visit will be covered by the Department for Culture, Media and Sport, and I refer the hon. Member to the answer given to him today by my hon. Friend the Minister for Sport.

Olympic Games 2012

Ben Chapman: To ask the Minister for the Olympics what steps she plans to take to ensure that the 2012 Olympics have an effective economic and social legacy in all parts of the UK. [217670]

Tessa Jowell: In June this year we published the Legacy Action Plan (LAP) which sets out the long-term benefits we hope to stimulate through hosting the Olympic games and Paralympic games in 2012, and how we plan to achieve them. This is unprecedented as no other host city has ever been at this stage of planning, nor so committed to a broad and sustainable legacy, this early in preparations.

The LAP sets out the Government's priorities for UK-wide legacy as defined by our five legacy promises, published in Our Promise for 2012 in June 2007. This includes a target to help get two million people more active through sport and physical activity by 2012. Sport England will seek to get one million more active through sport; they will do this through new engagement with national governing bodies and through county sport partnerships.

Further to the announcement in June, Government have now set out further details of the £140 million cross-Government free swimming scheme. The scheme is designed to encourage as many local authorities as possible to participate in making swimming free for over-60s and under-16s in their local communities, but also to stimulate ambitious authorities to maximise and sustain uptake through other initiatives such as free lessons for adults who cannot swim, the introduction of swimming co-ordinators and to provide incentives for the most ambitious to move further towards a universal free swimming offer.

The LAP also includes initiatives to stimulate economic and social benefit by increasing tourism and improving access to skills and business opportunities. This includes, for example, the London 2012 Business Network giving business across the UK access to the 75,000 contracts in the London 2012 supply chains worth £6 billion.

Facilities in the London 2012 Pre-Games Training Camp Guide which will be published in Beijing will also have the opportunity to attract inward investment and showcase their local area on an international stage. UKTI are also developing programmes to use the games as a springboard for export.

In addition to the LAP, each of the English regions and nations has its own plan for legacy initiatives at local level that complement this work.

As Members of Parliament we should do everything we can in our constituencies to ensure that the opportunities and long-term benefits generated by the games are realised at local level across the UK.

Olympic Games 2012: Consultants

Mr. Don Foster: To ask the Minister for the Olympics how much was paid to KPMG as Olympic advisers in each year since its contract began. [219274]

Tessa Jowell: The Department for Culture, Media and Sport's sole contract with KPMG, to date, covered the period from October 2005 to July 2006 when KPMG were commissioned to review cost estimates for the 2012 Games. The cost of this contract was £1,190,000, inclusive of VAT.

The Olympic Delivery Authority paid KPMG in 2006-07 £255,000, and in 2007-08 £1,585,000. Both figures are inclusive of VAT. The costs are attributed to the financial evaluation of tenders, financial support and advice.

Olympic Games 2012: Finance

Anne Main: To ask the Minister for the Olympics when she next expects to make an announcement on Olympic funding; and if she will make a statement. [221409]

Tessa Jowell: I have no plans to make a further announcement on Olympic funding. The public sector funding provision for the 2012 Olympic and Paralympic games remains as set out in my statement to the House on 15 March 2007.

Olympic Games 2012: Police

Anne Main: To ask the Minister for the Olympics when she will respond to the letter from the hon. Member for St Albans of 2 April 2008, on policing for the Olympic Games in London in 2012. [221389]

Tessa Jowell: A letter of response to the hon. Member for St. Albans will be sent shortly.

Olympic Games 2012: Transport

Mr. Don Foster: To ask the Minister for the Olympics how many full-time equivalent members of staff in her Office are employed on work in relation to railways; how many of those work on *(a)* project management, *(b)* project oversight and *(c)* financial oversight; and what plans she has for related future staffing levels. [221433]

Tessa Jowell: No members of staff in the Minister for the Olympics Office are employed on work in relation to railways.

SCOTLAND

Departmental Alcoholic Drinks

David Simpson: To ask the Secretary of State for Scotland (1) what measures are in place in his Department to monitor expenditure on alcohol for hospitality purposes; [219590]

(2) what purchasing process is used by his Department for the procurement of alcohol for hospitality purposes. [219940]

David Cairns: All Scotland Office expenditure, including all money spent on hospitality, is incurred in accordance with the principles of Managing Public Money and the Treasury handbook on "Regularity and Propriety".

Departmental Appeals

Andrew Mackinlay: To ask the Secretary of State for Scotland on how many occasions his Department has instructed the Treasury Solicitor to seek leave to appeal to the House of Lords from *(a)* the Court of Appeal and *(b)* the House of Lords itself in each of the last 10 years; and on how many occasions the application was rejected. [220826]

David Cairns: The Scotland Office was established on 1 July 1999. Since that date the Scotland Office has not instructed the Treasury Solicitor to seek leave to appeal to the House of Lords from *(a)* the Court of Appeal and *(b)* the House of Lords itself in any of the last 10 years.

Departmental Public Participation

Mr. Hoban: To ask the Secretary of State for Scotland what *(a)* reviews and *(b)* public consultations have been initiated by his Department since 27 June 2007. [221368]

David Cairns: Since 27 June 2007, the Scotland Office has undertaken one public consultation, "Sorting the Ballot".

Departmental Responsibilities

Mr. Hoban: To ask the Secretary of State for Scotland which projects his Department has commissioned from *(a)* think tanks and *(b)* charities in each of the last two years for which figures are available; what the aim of each project was; which think tank or charity was commissioned; and how much was paid. [221626]

David Cairns: The Scotland Office, along with the Wales Office and Ministry of Justice, is funding a series of reports on devolution from University College, London. The Scotland Office has agreed to contribute £25,000 over three years towards this work.

PRIME MINISTER

Departmental Conferences

Mr. Hoban: To ask the Prime Minister pursuant to the Answer of 18 June 2008, *Official Report*, column 919W, on departmental conferences, when he expects to publish information on official and charity receptions for 2007-08. [221266]

The Prime Minister: I refer the hon. Member to the written ministerial statement I made today.

Departmental Databases

Mr. Hayes: To ask the Prime Minister what UK Government databases may be accessed by third parties, following Commission Decision 2008/291/EC, OJ L98 of 10 April 2008; what statutory safeguards exist for personal privacy; and if he will make a statement. [217983]

Mr. Watson: I have been asked to reply.

The information requested falls within the responsibility of the UK Statistics Authority. I have asked the Authority to reply.

Letter from Karen Dunnell, dated July 2008:

As National Statistician, I have been asked to reply to your recent Parliamentary Question concerning what UK Government databases may be accessed by third parties following Commission Decision (EC) 2008/291, and what statutory safeguards exist for personal privacy. (217983)

Commission Decision (EC) No 2008/291 updates the list of scientific research institutions that have passed statutory checks for their competence to carry out research using certain statistical datasets held by Eurostat, the statistical office of the Commission.

The statistical sources that may be accessed by researchers in admissible institutions are listed in Commission Regulation (EC) No 831/2002 (as amended):

European Community Household Panel (ECHP)

Labour Force Survey (LFS)

Community Innovation Survey (CIS)

Continuing Vocational Training Survey

Structure of Earnings Survey (SES)

European Union Statistics on Income and Living Conditions (EU-SILC)

Adult Education Survey

Farm Structure Survey

The UK contributes data to each of these sources. At present only ECHP, LFS, CIS, EU-SILC, and SES micro-datasets have an agreed anonymisation standard and available in that form for research use. Eurostat and member states are working on an anonymisation design for the other sources. The anonymisation standards are equivalent to the standard ONS uses for the datasets it places for research use through the UK Data Archive at Essex University.

Researchers in admissible institutions may be provided with data when the statutory safeguards in Commission Regulation (EC) No 831/2002 are met. This requires the researcher to submit a detailed written request setting out the research proposal. The UK authority that contributed data to the source must be informed of the request, and can withhold permission for its data to be provided.

A contract with Eurostat must be in place that specifies the research purpose and the necessary organisational and technical measures to keep the data secure. The data provided are also protected by the statutory prohibitions on disclosure in Chapter V of Council Regulation (EC) 322/97.

Employment

Mr. Clappison: To ask the Prime Minister pursuant to the Answer of 16 July 2008, *Official Report*, column 247 to the right hon. and learned Member for Rushcliffe, how many of the three million people to whom he referred are *(a)* UK citizens and *(b)* non-UK citizens. [221207]

The Prime Minister: I refer the hon. Member to the information produced by the Office for National Statistics which shows that 2.9 million more people are in work since 1997:

http://www.statistics.gov.uk/downloads/theme_labour/LMS_FR_HS/WebTable01.xls

CHURCH COMMISSIONERS

Church of England: Property

Mr. Gordon Prentice: To ask the hon. Member for Middlesbrough, representing the Church Commissioners under what conditions bishops and clergy of the Church of England occupy episcopal and parish property for which the Church Commissioners are responsible; whether bishops and clergy are required to abide by the provisions of Church of England Measures to use such property; and if he will make a statement. [218199]

Sir Stuart Bell: Diocesan bishops occupy see houses under licence from the Church Commissioners who have the power, under section 3 of the Episcopal Endowments and Stipends Measure 1943, to house diocesan bishops.

Refusal to abide by Church of England Measures would be a matter of clergy discipline, which is not the responsibility of the Commissioners.

The Commissioners are not responsible for parish property occupied by clergy or property occupied by suffragan bishops.

Home Information Packs

Robert Neill: To ask the hon. Member for Middlesbrough, representing the Church Commissioners how many home information packs have been commissioned by the Church Commissioners or its representatives to market a residential property; for which properties; at what cost; and whether a voluntary home condition report was purchased as part of the packs. [219020]

Sir Stuart Bell: Home information packs have been provided by the Church Commissioners in relation to 143 The Quadrangle Tower, London W2 (at a cost of £359.65), 114 The Quadrangle Tower, London W2 (at a cost of £347.65), and Flat 4 Devonport, London W2 (at a cost of £359.65).

In all three cases the Commissioners did not purchase the voluntary home condition report.

Monuments: Inspections

Robert Neill: To ask the hon. Member for Middlesbrough, representing the Church Commissioners if he will place in the Library a copy of the guidance provided by the Council for the Care of Churches on approaches to the inspection of memorials. [219067]

Sir Stuart Bell: A copy of the guidance from the Council will be placed in the Library on 22 July 2008.

Redundant Churches

Robert Neill: To ask the hon. Member for Middlesbrough, representing the Church Commissioners how many Church of England churches in England have been taken out of use for worship in each year since 1997. [219068]

Sir Stuart Bell: The numbers of Church of England churches in England closed for regular public worship in each year since 1997 are as follows:

	Churches closed for regular public worship
1997	24
1998	28
1999	20
2000	16
2001	16
2002	34
2003	33
2004	31
2005	9
2006	21
2007	29

HOUSE OF COMMONS COMMISSION

Cromwell Green

Mr. Clifton-Brown: To ask the hon. Member for North Devon, representing the House of Commons Commission pursuant to the answer to the hon. Member for Cotswold of 23 April 2008, *Official Report*, column 2046W, on the Cromwell Green entrance, whether the Commission has now considered the review of lessons learned from the visitor reception building project; and if he will make a statement on its main findings. [218868]

Nick Harvey: The independent post-project review of the Cromwell Green visitor reception building, undertaken by Roy Davis Associates LLP, has now been received by the Clerk of the House. It was reported to the Commission at its recent meeting, and will be reported to the House of Lords House Committee in October.

The review presents a thorough analysis of the project. The Cromwell Green entrance opened on 21 April 2008 and has been operating successfully since as an important enhancement of visitor reception at Westminster. But its construction was subject to exceptional delay and significant cost overruns. The main findings of the review are:

until autumn 2007 the governance of the project was poor, and it is questionable whether the Houses were advised in sufficient detail to make balanced decisions;

the initial project delivery date of September 2006 drove the project but was not achievable;

once on site, delays occurred due to the complexity and uniqueness of the design, the fact that it was incomplete and uncoordinated, which required it to be extensively reworked during construction, and the lack of resolution of critical issues;

the requirements of major parts of the project brief were ignored;

the management of the design and the construction was undermined by the split responsibilities of project managers and the lack of ownership of the project; and

both the cost management and advice and the procurement and production of contracts for consultants and the contractor were poor.

The repeatedly escalating costs and continued slippages in this project have raised serious questions about project management competences in the House service. A number of key steps have already been taken. As part of a reorganisation following the review by Sir Kevin Tebbit it was decided to create a reunified Parliamentary Estates Directorate and recruit senior managers with appropriate skills. The Directorate is now under the direct responsibility of a Director General of Facilities. As part of their recruitment, both new postholders have been required to demonstrate competence, and personal track records of delivery, in the areas of estates and works matters.

Further improvements relating to transparency and control of projects are under way, and these will take account of recommendations for future practice from the post-project review. The Commission will receive a progress report from the Clerk of the House in the autumn on the establishment of the revised management arrangements and the effectiveness of the new controls over projects. It supports the Clerk of the House in his determination to ensure that full lessons are learned from this major failure in project management.

A copy of the post-project review has been placed in the Library and on the parliamentary website.

Detergents: Animal Experiments

Steve Webb: To ask the hon. Member for North Devon, representing the House of Commons Commission what the House's policy is on the purchase of cleaning products that have been tested on animals. [220866]

Nick Harvey: The House of Commons does not have a policy on cleaning products being tested on animals. The specification for the new parliamentary cleaning contract requires that all materials and chemicals used must minimise environmental impact and be fit for the purpose intended. The safest possible product is to be used.

Portcullis House

Mr. Ellwood: To ask the hon. Member for North Devon, representing the House of Commons Commission how many basins there are in Portcullis House; and how many of them do not have plugs. [220400]

Nick Harvey: Portcullis House has 112 basins in lavatories, bathrooms and tea points. A survey on 17 July found that four plugs were missing. Work is in hand to replace them. Included in this number are 20 wash basins in accessible lavatories which, by design, do not have plugs.

Redundancy pay

Lynne Jones: To ask the hon. Member for North Devon, representing the House of Commons Commission what redundancy package is available for *(a)* Officers of the House and *(b)* other staff of the House; what the reasons are for the provisions of each; and if he will make a statement. [221264]

Nick Harvey: No redundancies are currently contemplated, nor have there been any redundancies in recent years. Were redundancies to be necessary, the packages available are the same as those available to the civil service under the Civil Service Compensation Scheme, which are set out on the civil service pensions website.

www.civilservice-pensions.gov.uk/scheme_information/cscs.aspx

The terms are the same for Officers of the House and other staff.

SOLICITOR-GENERAL

Christine Drury

Mr. Hoban: To ask the Solicitor-General where Christine Drury's desk is located; and whether she is paid from the public purse. [211912]

The Solicitor-General: Christine Drury does not work in the Attorney-General's Office or in any of the superintended departments.

Civil Service Agencies: Public Appointments

Mr. Hoban: To ask the Solicitor-General if she will list the appointments made to agencies for which the Attorney-General is responsible since 27 June 2007. [211791]

The Solicitor-General: Since 27 June 2007 the Attorney-General has appointed the director of the Serious Fraud Office.

Departmental Delivery Services

Mr. Hoban: To ask the Solicitor-General what steps the Attorney-General's Office has taken to monitor the cost of its mail services in the last 12 months. [221488]

The Solicitor-General: The Attorney-General's Office are in the process of reviewing our post room services. This includes usage of Royal Mail services, DX membership, Government Car Despatch Agency's Government mail service (formerly IDS) and our messengers' hand delivery services in order to achieve greater efficiency and savings.

Departmental Procurement

David Simpson: To ask the Solicitor-General what the Attorney-General's Office's policy is on requesting discounts from its suppliers in return for swift payment of invoices. [220424]

The Solicitor-General: The Government's policy is to pay all undisputed invoices promptly. The Department is covered by this policy. The Department aims to secure good value for money from all of its suppliers and our commitment to prompt payment is one of the factors that allows us to negotiate competitive prices. We do not seek additional discounts for making payments swiftly and in compliance with Government policy.

Departmental Sick Leave

David Simpson: To ask the Solicitor-General how many and what percentage of staff in the Attorney-General's Office have had more than two periods of sickness absence of less than five days in each of the last three years. [218695]

The Solicitor-General: The number and percentage of staff who have had more than two periods of sickness of less than five days is illustrated in the following table:

	Number of staff	*Percentage of staff*
2007-08	3	15.3
2006-07	3	14.7
2005-06	3	13.7

David Simpson: To ask the Solicitor-General how many staff in her Department have had five or more periods of sickness absence of less than five days in two or more of the last five years. [218975]

The Solicitor-General: There have been less than five staff who fall into this category, therefore this information cannot be provided on grounds of confidentiality.

ELECTORAL COMMISSION COMMITTEE

Labour Party: Finance

Mr. Tyrie: To ask the hon. Member for Gosport, representing the Speaker's Committee on the Electoral Commission whether the Electoral Commission plans to publish, or otherwise make available for independent scrutiny, the accounts submitted by the Labour party for 2007. [221452]

Sir Peter Viggers: The Electoral Commission informs me that as required by section 46 of the Political Parties, Elections and Referendum Act 2000, the Electoral Commission makes all statements of accounts available for public inspection. Statements of accounts for 2007 submitted by parties with income or expenditure over £250,000, including the Labour party, are due to be published on the Commission's website on 30 July 2008.

Political Parties: Finance

Mr. Tyrie: To ask the hon. Member for Gosport, representing the Speaker's Committee on the Electoral Commission what procedures are followed by the Electoral Commission in circumstances where a party is unable to submit signed-off accounts demonstrating its financial validity as a going concern; and if he will make a statement. [221422]

Sir Peter Viggers: The Political Parties, Elections and Referendums Act 2000 requires registered parties to submit an annual statement of accounts to the Electoral Commission. Where the gross income or total expenditure of the registered party during the period of those accounts exceeds £250,000, that statement of accounts must be submitted within six months of the party's financial year end, and must be audited by a qualified auditor. The legislation provides for civil penalties where these requirements are not met and a failure to comply may also give rise to a criminal offence.

The Electoral Commission informs me that it reviews all statements of accounts, publishes them on its website and pursues the penalties provided for in cases where the requirements have been breached. The Electoral Commission further informs me that it publishes guidance for parties on preparing their statements of accounts. This guidance is available on the Commission's website at

http://www.electoralcommission.org.uk/_data/assets/electoral_commission_pdf_file/0014/13460/Draftguidance_21211-8865_E_N_S_W_.pdf

Mr. Tyrie: To ask the hon. Member for Gosport, representing the Speaker's Committee on the Electoral Commission whether the Electoral Commission has produced guidance on the declaration of donations and sponsorship by trade unions by declared electoral candidates outside of election periods. [221425]

Sir Peter Viggers: The Electoral Commission informs me that it has published 'Donations and loans: guidance for regulated donees in Great Britain'. Regulated donees include members of registered political parties who receive donations for their use and benefit in connection with their political activities, such as campaigning outside the relevant regulated period. This guidance covers the reporting of all donations from all permissible donors, including trade unions.

Mr. Tyrie: To ask the hon. Member for Gosport, representing the Speaker's Committee on the Electoral Commission pursuant to the answer of 7 July 2008, *Official Report*, columns 1309-10W, on political parties: finance, on what dates the Electoral Commission met the Secretary of State for Justice to discuss the White Paper on party finance and expenditure ahead of its publication. [221471]

Sir Peter Viggers: The Electoral Commission informs me that the chairman of the Commission, Sam Younger, and Commission officials met with the Secretary of State for Justice on 12 November 2007 and 14 April 2008. A range of matters were discussed regarding party and election finance, some of which are addressed by the Government's White Paper, "Party finance and expenditure in the United Kingdom".

Mr. Tyrie: To ask the hon. Member for Gosport, representing the Speaker's Committee on the Electoral Commission pursuant to the publication of the White Paper on party finance and expenditure, when the Electoral Commission plans to consult on guidance on the new triggering rules. [221472]

Sir Peter Viggers: The Electoral Commission informs me that it will consult on any guidance relating to new provisions proposed in the Political Parties and Elections Bill after the Bill has been passed by both Houses of Parliament.

Roger Berry: To ask the hon. Member for Gosport, representing the Speaker's Committee on the Electoral Commission (1) which donations to regulated donees entered on the Commission's register pursuant to section 69 and Schedule 7 of the Political Parties, Elections and Referendums Act 2000 were registered after the statutory deadline in 2001; [221565]

(2) which donations to regulated donees entered on the Commission's register pursuant to Section 69 and Schedule 7 of the Political Parties, Elections and Referendums Act 2000 were registered after the statutory deadline in 2002; [221566]

(3) which donations to regulated donees entered on the Commission's register pursuant to Section 69 and Schedule 7 of the Political Parties, Elections and Referendums Act 2000 were registered after the statutory deadline in 2003; [221567]

(4) which donations to regulated donees entered on the Commission's register pursuant to Section 69 and Schedule 7 of the Political Parties, Elections and Referendums Act 2000 were registered after the statutory deadline in 2004; [221568]

(5) which donations to regulated donees entered on the Commission's register pursuant to Section 69 and Schedule 7 of the Political Parties, Elections and Referendums Act 2000 were registered after the statutory deadline in 2005; [221569]

(6) which donations to regulated donees entered on the Commission's register pursuant to Section 69 and Schedule 7 of the Political Parties, Elections and Referendums Act 2000 were registered after the statutory deadline in 2006; [221570]

(7) which donations to regulated donees entered on the Commission's register pursuant to Section 69 and Schedule 7 of the Political Parties, Elections and Referendums Act 2000 were registered after the statutory deadline in 2007; [221571]

(8) which donations to regulated donees entered on the Commission's register pursuant to Section 69 and Schedule 7 of the Political Parties, Elections and Referendums Act 2000 were registered after the statutory deadline in January 2008. [221572]

Sir Peter Viggers: The Electoral Commission informs me that it has retained most original hard copies of donation returns from regulated donees from 2001 onwards and all original hard copies of donation returns from regulated donees from 2007 onwards. On the basis of available returns, a copy of the information sought by the hon. Member has been placed in the Library and has been made available on the Commission's website:

www.electoralcommission.org.uk.

INTERNATIONAL DEVELOPMENT

Afghanistan: Reconstruction

Mr. Ellwood: To ask the Secretary of State for International Development how many members of the Government's new reconstruction unit are based in Helmand province. [220404]

Mr. Douglas Alexander: Stabilisation Unit staff are currently located in Helmand. For security reasons, Stabilisation Unit does not publish exact details of the number and location of its staff in Afghanistan.

Mr. Ellwood: To ask the Secretary of State for International Development when the foundation stone for the new mosque in Musa Qala will be laid; and if he will make a statement. [220405]

Mr. Douglas Alexander: Work has already begun on the new mosque in Musa Qala. DFID is providing support through the Ministry of Rural Rehabilitation and Development.

The Governor of Helmand province will lay the foundation stone when he next visits. The exact date for the visit is still to be confirmed.

Africa: Children

Mrs. Riordan: To ask the Secretary of State for International Development what steps his Department is taking to increase the protection of vulnerable children in Africa. [219985]

Gillian Merron: The UK Government remain firmly committed to tackling child vulnerability in Africa, including those affected by HIV/AIDS. Over the last three years the Department for International Development (DFID) has provided over £120 million for support of orphans and vulnerable children (OVC) in Africa. This includes supporting National Plans of Action for OVC and expanding support for the needs of the most vulnerable children in health, education, social protection and HIV prevention and treatment programmes.

Over the next three years, the UK Government will expand their social protection programmes and increase spending to over £200 million. DFID will work in at least eight African countries to develop social protection policies and programmes, with Governments and NGOs that provide effective predictable support for the most vulnerable households—ensuring access to social services and protection from abuse. DFID will also work with others to provide better diagnostics and treatment of children infected with HIV and living with AIDS. A copy of the updated strategy 'Achieving Universal Access—the UK's strategy for halting and reversing the spread of HIV in the developing world' and supporting evidence paper have been placed in the Libraries of both Houses. These are also available on the DFID website:

www.dfid.gov.uk

DFID's broader health sector initiatives all benefit vulnerable children, particularly in Africa. These include support (£30 million for 2006-8) to the Global Alliance for Vaccines and Immunisation (GAVI), a long-term (20 year) £1.38 billion commitment to the International Finance Facility for Immunisation (IFFIm), $485 million in support of drug development incentives by the pilot Advanced Market Commitment (AMC) for pneumococcal vaccines and support of the Global Fund to fight AIDS, TB and Malaria (GFATM) where DFID has made an unprecedented long-term commitment, subject to performance, of up to £1 billion between 2008-15.

Departmental Alcoholic Drinks

David Simpson: To ask the Secretary of State for International Development what measures are in place in his Department to monitor expenditure on alcohol for hospitality purposes. [219596]

Mr. Malik: All entertainment and hospitality is made in accordance with published departmental guidance on financial procedures and propriety, based on the principles of Managing Public Money and the Treasury Handbook on Regularity, Propriety and Value for Money. Financial control is managed through delegation to Heads of Department who are responsible for their respective budgets. Further controls are exercised through sample spot checks of expenditure undertaken by DFID's Accounts Group.

Departmental Home Working

Bob Spink: To ask the Secretary of State for International Development what proportion of his Department's work force worked from home in whole or in part in the most recent period for which figures are available. [220786]

Gillian Merron: DFID does not keep central records of the number of home workers, or the proportion of working time that is carried out from home. Arrangements for home working are agreed informally between line managers and individuals. 1,798 of our 2,467 employees (73 per cent.) have been issued with laptop computers rather than a desk-top computer. This allows them to work from home on a regular or ad hoc basis.

Departmental Manpower

Mr. Redwood: To ask the Secretary of State for International Development what the change in the number of employees in his Department has been since July 2006. [217072]

Gillian Merron: The Department for International Development (DFID) submits quarterly returns on our Home Civil Service (HCS) staffing numbers, to the Office for National Statistics.

DFID also employs staff appointed in country (SAIC) recruited locally to work in our network of over 50 offices overseas on local terms and conditions of service.

Details of our HCS and SAIC staff numbers, showing the separate and overall comparisons between the end of June 2006 and end of June 2008, are shown in the following table:

	Headcount at end of June 2006	*Full-Time equivalent[1] posts at end of June 2006*	*Headcount at end of June 2008*	*Full-time equivalent[1] posts at end of June 2008*	*Net change in headcount*	*Percentage change in headcount*	*Net change in numbers of full-time equivalent[1] posts*	*Percentage change in numbers of full-time equivalent[1] posts*
Home Civil (HCS) staff numbers	1,817	1,768	1,653	1,606	-164	-9	-162	-9.2
Staff Appointed in country (SAIC) numbers	899	893	799	795	-100	-11.1	-98	-11

	Headcount at end of June 2006	Full-Time equivalent[1] posts at end of June 2006	Headcount at end of June 2008	Full-time equivalent[1] posts at end of June 2008	Net change in headcount	Percentage change in headcount	Net change in numbers of full-time equivalent[1] posts	Percentage change in numbers of full-time equivalent[1] posts
Overall total	2,716	2,661	2,452	2,401	-264	-9.7	-260	-9.8

[1] DFID reports HCS staffing numbers to Office for National Statistics using Full-Time equivalent (FTE) figures. Full-Time equivalent takes account of the specific work patterns of each individual e.g. an individual who works 0.5 of a full-time schedule is only counted as 0.5 for the purposes of FTE. For comparison purposes, headcount is where each individual is counted as 1 regardless of their actual hours worked.

Departmental Pay

Mr. Redwood: To ask the Secretary of State for International Development what proportion of staff of his Department and its agencies did not receive the maximum bonus possible under a bonus scheme applying to them in the last two years. [217417]

Gillian Merron: The Department for International Development (DFID) operates two separate bonus schemes.

The first is an established bonus scheme for members of the senior civil service (SCS). Bonuses are awarded at three different levels (high, medium or no bonus award). The proportion of SCS members who did not receive the high level (or maximum) bonus in each of the last two years was as follows:

	SCS staff not receiving a maximum bonus	
	Number	Percentage
2006-07	67 out of 87	77
2007-08	60 out of 82	73

The second performance bonus scheme is for home civil service staff (HCS) below the SCS. The HCS bonus scheme was introduced under the 2007 pay deal for HCS staff and will come into effect in the 2008-09 performance appraisal year.

Departmental Training

Mr. Hoban: To ask the Secretary of State for International Development what training courses were *(a)* available to and *(b)* taken up by civil servants in his Department in the last 12 months. [210580]

Mr. Malik: Reporting which training courses were *(a)* available to and *(b)* taken by civil servants in the Department for International Department in the last 12 months would incur disproportionate cost, since the majority of training activity is arranged by sub-departments and overseas offices.

Courses which have been provided centrally include Leadership and Management Development, Negotiating and Influencing, Working with Ministers, Induction and Health and Safety.

Developing Countries: Food

Mr. Drew: To ask the Secretary of State for International Development what assessment he has made of long-term trends in food prices; and what assessment he has made of their effects on the developing world. [218505]

Mr. Douglas Alexander: The UK Government have been working closely with the major international organisations (World Bank, International Monetary Fund, UN agencies and International Food Policy Research Institute) in order to assess future price trends and cereal production. Increased cereal production and the removal of export bans have brought about a calming of markets, and prices have fallen back from the very high levels seen earlier this year. But the consensus remains that the underlying demand for food remains strong, and this is likely to keep prices high for some years yet, with the trend price for grains stabilising at around 10-25 per cent. higher than 2001 levels.

Many countries have experienced serious social and economic consequences of the recent surge in food prices, aggravated by similar movement in fuel prices. The macroeconomic impact on developing countries varies according to the degree of dependency on food and fuel imports. Some countries (e.g. Afghanistan, Bangladesh, and Mozambique) are experiencing significant food price rises; some (e.g. Kenya and Zanzibar) are experiencing clear food shortages; countries in West Africa (e.g. Nigeria and Niger) are heavily affected due to their reliance on imports from international markets; some (Malawi and Zambia) are relatively insulated from global price movements, while others (e.g. Vietnam) are benefiting. The poorest are hardest hit, with some families spending up to 90 per cent. of their income on food. The UK Government are pressing for a global partnership to address both the short term impact of surging food prices, and the longer term challenges of promoting food security for the 850 million people who continue to face hunger.

Developing Countries: HIV Infection

Mrs. Riordan: To ask the Secretary of State for International Development what plans there are to meet the global target of universal access to HIV/AIDS prevention. [219986]

Gillian Merron: I refer my hon. Friend to the written parliamentary statement made on 2 June 2008, *Official Report*, columns 42-44WS.

A copy of the updated strategy 'Achieving Universal Access—the UK's strategy for halting and reversing the spread of HIV in the developing world' and supporting evidence paper have been placed in the Libraries of both Houses. These are also available on the Department for International Development (DFID) website:

www.dfid.gov.uk

Disabled

Mr. Harper: To ask the Secretary of State for International Development how many and what proportion of staff in his Department are disabled; and what the average salary in his Department is of *(a)*

full-time disabled staff, *(b)* full-time non-disabled staff, *(c)* part-time disabled staff and *(d)* part-time non-disabled staff. [220184]

Gillian Merron: The Department for International Development (DFID) employed 1,653 Home Civil Service (HCS) staff at the end of June 2008. Of these 58 have declared a disability. This represents 3.5 per cent. of the total. Average salaries are shown in the following table:

Category	*Number of DFID HCS staff in post*	*Average salary (£)*
(a) Full-time disabled staff	54	30,113
(b) Full-time non-disabled staff	1,459	38,488
(c) Part-time disabled staff	4	15,631
(d) Part-time non-disabled staff	136	22,665

Kosovo

Mr. Moore: To ask the Secretary of State for International Development what his Department's budget is for expenditure in Kosovo on *(a)* staffing and other operational costs of the post, *(b)* technical assistance to (i) the Government of Kosovo and (ii) non-governmental organisations working in Kosovo, *(c)* budgetary support for (i) the Government of Kosovo, (ii) non-governmental bodies working in Kosovo and *(d)* other international bodies operating in Kosovo in 2008-09. [219657]

Mr. Douglas Alexander: The Department for International Development (DFID) has an administration budget of £450,000 for its office in Kosovo in 2008-09. This excludes the cost of some staff who are based in London but provide support to DFID offices across the Western Balkans region, including Kosovo.

The budget for programme activities in Kosovo in 2008-09 is £8.8 million. This includes resources for the Conflict Prevention Pool (CPP) (£3.8 million) which is managed jointly by DFID, the Foreign and Commonwealth Office (FCO) and the Ministry of Defence (MOD).

DFID provides assistance to the Government of Kosovo in the form of technical assistance. No decision has yet been taken on providing budget support in Kosovo. The CPP provides assistance for non-governmental organisations in the form of grants and for international organisations including NATO. We intend to provide £3.8 million for the NATO Trust Fund for Demobilisation with Dignity of the Kosovo Protection Corps (KPC) through the CPP.

Kosovo: Overseas Aid

Mr. Moore: To ask the Secretary of State for International Development what the outcomes were of the donors' conference for Kosovo held on 11 July; and what his Department's policy objectives are for its engagement with the Republic of Kosovo. [219658]

Mr. Douglas Alexander: The conclusions from the 11 July Kosovo Donors' Conference are available on the following website at:

http://www.seerecon.org/kdc/conclusions.pdf

The UK's objective in Kosovo is to support the development of a prosperous, stable, democratic and multi-ethnic state. Within this objective, DFID's priorities in Kosovo are to promote improved economic growth and employment, reduce the risk of conflict, and support the development of accountable Government institutions.

Mr. Moore: To ask the Secretary of State for International Development in what areas the Government of the Republic of Kosovo have requested assistance from his Department in the last 12 months. [219659]

Mr. Douglas Alexander: The Government of Kosovo have outlined their policy priorities for the next three years and their requirements for donor assistance in their Medium-term Expenditure Framework (MTEF). This document was presented at the 11 July Kosovo Donors' Conference. The UK has pledged £23 million to support Kosovo over the next three years. We will align our support with the priorities in Kosovo's MTEF and are actively encouraging all other donors to do likewise.

Land Mines

Mr. Harper: To ask the Secretary of State for International Development (1) what mine harvesting projects his Department is funding in *(a)* Afghanistan, *(b)* Cambodia and *(c)* Yemen; [219323]

(2) what mine harvesting projects his Department is funding in Afghanistan. [219345]

Gillian Merron: Since 2001, the Department for International Development (DFID) has spent over £10 million per year to clear and reduce the impact of land mines, cluster munitions and other unexploded remnants of war in developing countries around the world.

(a) In Afghanistan, DFID is providing £10.6 million over the next five years to the charity HALO Trust to clear land mines and other unexploded ordnance in Herat Province, in order to return land back to productive use for the poor and vulnerable.

(b) In Cambodia, DFID funds demining work through the charities HALO Trust and Mines Advisory Group (MAG). HALO Trust's programme will amount to around £3 million over the three years 2007-10, and the MAG programme will be around £1.5 million for the same period. Both organisations work to reduce the impact of mines on the most vulnerable and affected communities, with HALO focusing on large-scale humanitarian clearance and MAG linking closely to other development programmes.

(c) DFID does not currently fund any demining projects in Yemen.

Nigeria: Armed Conflict

Mr. Andrew Mitchell: To ask the Secretary of State for International Development what plans he has for the provision of aid to the Government of Nigeria to help deal with unrest in the Niger Delta region. [219514]

Mr. Douglas Alexander: It is important that any security improvements in the Niger Delta are made in the context of a wider peace process that includes improved development and better governance. The Department for International Development (DFID)

stands ready to assist the State Governments of the Niger Delta region to better manage their substantial resources for the good of their people. This would reduce unrest by ensuring that citizens of the Niger Delta saw some benefits from their region's oil wealth.

Progress can only be made with genuine State Government commitment to efficiently manage their resources and use them to provide good quality services for their people. Once this commitment has been demonstrated, DFID would seek to agree any further support to the Niger Delta with other international partners, including the US Government, the World Bank, the European Commission and the UN.

Mr. Andrew Mitchell: To ask the Secretary of State for International Development what assessment he has made of the humanitarian implications of the breakdown of the ceasefire between the Movement for the Emancipation of the Niger Delta and the Nigerian Government. [219516]

Mr. Douglas Alexander: The humanitarian situation in the Niger Delta region of Nigeria is already serious, with high levels of violence and insecurity, and very little provision of basic social services. Department for International Development (DFID) staff are unable to travel to the Niger Delta for security reasons, so we have been unable to make a direct assessment of the current humanitarian situation. DFID is in regular contact with the Office for Conflict and Humanitarian Affairs (OCHA), the United Nations Children's Fund (UNICEF), the World Food Programme (WFP), Médecins sans Frontières (MSF), Save the Children (SCF) and Oxfam, and none of them reported any change to the humanitarian situation in the Niger Delta.

The recent breakdown of the two-week Movement for the Emancipation of the Niger Delta (MEND) cease fire will have done nothing to improve the situation in the Niger Delta. The UK remains committed to helping the Nigerian Government work towards a peaceful and sustainable solution to the underlying causes of instability in the region.

Nigeria: Overseas Aid

Mr. Andrew Mitchell: To ask the Secretary of State for International Development what recent discussions he has had with *(a)* the Foreign Secretary and *(b)* the Secretary of State for Defence on possible assistance to the Nigerian Government. [219515]

Mr. Douglas Alexander: I most recently discussed possible assistance to the Nigerian Government with the Foreign Secretary and the Minister of State for the Armed Forces at the meeting of the Ministerial Committee on National Security, International Relations and Development (NSID) sub-committee on Africa held on Tuesday 15 July. We agreed that we would stand ready to offer further assistance to the Nigerian Federal Government and the State Governments of the Niger Delta in the areas of peace-building, security, development and improved governance. The Prime Minister conveyed this message to President Yar'Adua of Nigeria when they met on Wednesday 16 July.

Somalia: Asylum

Mr. Keith Simpson: To ask the Secretary of State for International Development what recent assessment he has made of the effect of the security situation in Somalia on humanitarian agencies' ability to access refugee camps; and if he will make a statement. [218332]

Gillian Merron: The security situation in Somalia is deteriorating, with ongoing fighting in Mogadishu continuing to cause displacement of the population and the loss of lives. The UK Government continue to monitor the situation closely through our partners on the ground and, security permitting, visits by our staff.

Humanitarian agencies are still able to access refugee camps but under great risk. The UK Government deplore the recent escalation in the killing of aid workers. An immediate cessation of all hostilities is needed in order to allow relief agencies to meet critical humanitarian needs.

Somalia: Food Aid

Mr. Tom Clarke: To ask the Secretary of State for International Development what steps he is taking to provide food aid to Somalia; and if he will make a statement. [219710]

Gillian Merron: The humanitarian situation in many parts of Somalia has significantly deteriorated not only due to ongoing fighting but to drought, uncontrolled hyperinflation and a broad economic crisis. The Food Security Analysis Unit (FSAU) estimates that 2.6 million Somalis (approximately 35 per cent. of the population) will require relief assistance in 2008.

Since January 2008 the Department for International Development (DFID) has provided £17.9 million for humanitarian assistance to the worst affected areas. This includes £12 million to the World Food Programme (WFP) who are distributing more than 15,000 metric tonnes of food aid a month, and a further £1.4 million to UNICEF and World Vision for emergency nutrition projects in South Central Somalia.

DFID continues to advocate for the safe passage of all humanitarian goods and aid workers in Somalia.

Mr. Tom Clarke: To ask the Secretary of State for International Development if he will make representations to his international counterparts on the deployment of naval ships to escort food aid shipments to Somalia. [219734]

Gillian Merron: The UK Government are working with EU partners to consider future deployments of naval ships.

Since December 2007 the French, Danish and Dutch military forces have escorted over 70,000 metric tonnes of humanitarian aid to Somalia. Consignments included relief materials for UNICEF and UNHCR in addition to WFP food aid.

Swaziland: Elections

John Mann: To ask the Secretary of State for International Development what steps his Department is taking to support multi-party democracy in Swaziland in preparation for elections in October. [219433]

Meg Munn: I have been asked to reply.

Our non-resident high commissioner and deputy high commissioner to Swaziland have raised the issue of multi-party elections in that country frequently, over the last year, with a range of figures including the King, politicians, civil servants, civil society groups and others. The Government will be giving £230,000 this year to fund the Electoral Institute of Southern Africa to train a pan-African parliamentary observer mission to all the Southern African Development Community countries holding elections in 2008-09, which includes the election in Swaziland.

Swaziland: HIV Infection

John Mann: To ask the Secretary of State for International Development what recent assessment his Department has made of HIV prevalence in Swaziland. [219420]

Gillian Merron: The Department for International Development's (DFID) assessment of HIV prevalence in Swaziland is based on data from UNAIDS, whose mandate is to monitor HIV prevalence. UNAIDS' latest statistics show that HIV prevalence rates in Swaziland are among the highest in the world, but are improving. The current estimate of infection rates for those aged between 15 to 49 years is 26 per cent., compared to 33 per cent. in 2005. Further information is available on the UNAIDS website:

www.unaids.org

Swaziland: Trade Unions

John Mann: To ask the Secretary of State for International Development what discussions he has had with the Government of Swaziland on restrictions on trades unions in that country. [219404]

Meg Munn: I have been asked to reply.

Our non-resident Mission to Swaziland, based in Pretoria, has a regular programme of quarterly visits to the Kingdom. Our non-resident deputy high commissioner, at her last visit in May, met with a wide range of Government, Opposition, non-governmental and other civil society figures. Her discussions focused on our support for multi-party elections and the implementation of a constitution which, if implemented, would enhance workers' rights and benefit trade unions.

UN Women's Agency

John Mann: To ask the Secretary of State for International Development what his policy is on the creation of a UN Women's Agency; and what steps his Department has taken to implement this policy. [219398]

Mr. Thomas: The Department for International Development agrees that the UN needs a single, strong agency for women that combines the different parts of the UN system that are working to enhance the status of women. We are closely involved in discussions within the UN system on the way forward.

Zimbabwe: Overseas Aid

Miss McIntosh: To ask the Secretary of State for International Development what recent discussions he has had with the European Commission on humanitarian aid to Zimbabwe. [219576]

Mr. Douglas Alexander: We have not recently discussed humanitarian aid to Zimbabwe directly with Commissioner Michel, but our officials and those of the European Commission co-ordinate closely as a matter of course, both in Brussels and Harare, on humanitarian aid and development issues in Zimbabwe

ENVIRONMENT, FOOD AND RURAL AFFAIRS

Abandoned Vehicles

Robert Neill: To ask the Secretary of State for Environment, Food and Rural Affairs what assessment he has made of the effect of the implementation of the EU end of life vehicles directive on trends in the levels of abandonment of vehicles manufactured before July 2002. [219076]

Malcolm Wicks: I have been asked to reply.

The number of vehicles of all ages being abandoned is one of several indicators monitored by the Department since implementing the end-of-life vehicles directive. We believe that a combination of factors has contributed to the significant reduction in the numbers of abandoned vehicles recorded in recent years. Those factors include the introduction of the End-of-Life Vehicles Regulations 2003 and the End-of-Life Vehicles (Producer Responsibility) Regulations 2005, improvements in the accuracy of the vehicle register, various Government and local campaigns to tackle abandonment, and the continuing high value of scrap metal. It is difficult to isolate the individual impact of any one of these factors.

Agriculture: Land

Robert Neill: To ask the Secretary of State for Environment, Food and Rural Affairs what the average cost of a hectare or equivalent measure of farmland according to the Farm Business Survey was in each year for which figures are available. [219071]

Jonathan Shaw: While the Farm Business Survey does collect a level of information on farm balance sheets, the better measure of the value of farmland over time is provided by the aggregate balance sheet published in "Agriculture in the United Kingdom".

The aggregate balance sheet shows the value of fixed assets at a point in time (December each year) and the value of liabilities at a point in time. Fixed assets are dominated by land. As the volume of land is virtually unchanging, the trend in the value of land and buildings is dominated by the effect of land prices. Estimates of the value of land and buildings from the latest balance sheet are given in the table below and show the value of UK agricultural land and buildings has increased by 40 per cent. at current prices, between 2003 and 2006.

Value of UK agricultural land and buildings

As at December each year	*£ billion*
1993	50.7
1994	56.3
1995	67.9
1996	77.4
1997	84.0
1998	87.1
1999	93.1
2000	94.7
2001	97.7
2002	96.9
2003	102.2
2004	111.5
2005	121.6
2006[1]	142.7

[1] Provisional

Agriculture in the UK

Air Pollution

Mr. Davey: To ask the Secretary of State for Environment, Food and Rural Affairs what changes have been made to his Department's air quality monitoring programme in the last two years; and if he will make a statement. [220205]

Jonathan Shaw: DEFRA and the devolved Administrations reviewed air quality monitoring needs in the light of the 2007 Air Quality Strategy and new EU Air Quality Directive requirements and improvements in the concentrations of some pollutants.

As a result some new sites/monitors have been brought into the network or installed, while others have been removed from the network or closed. The changes to the Automatic Urban and Rural and Hydrocarbons networks fall into three broad areas:

A reduction in the number of carbon monoxide (from 79 to 26) and sulphur dioxide (from 76 to 48) monitors, commensurate with the generally low levels of both pollutants currently found. However, there will be increased sulphur dioxide monitoring in some areas around particular industrial hotspots.

Movement of oxides of nitrogen monitors from agglomerations to zones, and from urban background to roadside, in line with the requirements of the new air quality Directive.

The creation of a ultrafine particulate matter ($PM_{2.5}$) network, and changes to the fine particulate matter (PM_{10}) network, in line with the requirements of the new air quality Directive.

Mr. Davey: To ask the Secretary of State for Environment, Food and Rural Affairs how many of his Department's air quality monitoring sites have been closed in each of the last three years; and how many air quality monitoring sites have been opened in that period, broken down by region. [220206]

Jonathan Shaw: The number of air quality monitoring sites which have been closed and opened in 2005, 2006 and 2007, broken down by zone and agglomeration are shown in the following table. Data are included from the following monitoring networks: automatic urban and rural network; automatic and non-automatic hydrocarbon networks; black smoke network; heavy metals network; particle numbers and concentrations network; polycyclic aromatic hydrocarbons and toxic organic micro pollutants networks; and the acid deposition and rural sulphur dioxide network.

Agglomerations are continuous urban areas with populations greater than 250,000. Zones in England are based on the Government office regions and in the devolved Administrations are based on administrative areas.

Number of air quality monitoring sites which have closed and opened in each zone and agglomeration during 2005-07

	2007		*2006*		*2005*	
Zone/agglomeration	*Closed[1]*	*Opened[1]*	*Closed[1]*	*Opened[1]*	*Closed[1]*	*Opened[1]*

Northern Ireland	—	1	—	1	2	—
Total	45	24	3	13	30	2

[1] A monitoring site which is in more than one network is counted for each network, for example, the closure of Bradford Centre in West Yorkshire urban area in 2007 is counted separately for the automatic urban and rural network and the black smoke network. Site relocations within the same zone or agglomeration have not been included.

Biofuels

Mr. Dai Davies: To ask the Secretary of State for Environment, Food and Rural Affairs what recent steps he has taken to increase capacity for the production of biogas through industrial anaerobic digestion technologies. [220890]

Joan Ruddock: The Government are committed to making the most of the potential of anaerobic digestion. It supports our objectives for reducing greenhouse gas emissions, generating renewable energy, and diverting organic material, especially food waste, from landfill. In addition, the treated material—the 'digestate'—can be returned to the land as a fertiliser.

The consultation on the UK Renewable Energy Strategy, which was published on 26 June 2008 (available on the Department for Business, Enterprise and Regulatory Reform's website), sets out the steps we are proposing to help promote anaerobic digestion. Specific support includes the Bioenergy Capital Grants Scheme, which supports the installation of biomass-fuelled heat and combined heat and power projects in the industrial, commercial and community sectors in England. We have also recently announced a new £10 million programme to support the construction of new anaerobic digestion demonstration plants, and we are doubling the incentive to generate energy through AD by changes to the renewables obligation. In addition, the Rural Development Programme for England provides support to develop energy projects or small scale on-farm renewable energy technologies (including anaerobic digestion).

We are working with key stakeholders to identify any barriers to the uptake of anaerobic digestion and ways to address these.

Birds: Somerset

Miss McIntosh: To ask the Secretary of State for Environment, Food and Rural Affairs what the population of breeding wading birds and wintering waterbirds in *(a)* privately-owned and *(b)* publicly-owned land in the Somerset Levels and Moors was in (i) 1987 and (ii) at the most recent date for which figures are available. [219932]

Joan Ruddock: It is not possible to give an indication of populations of birds split between private and publicly owned land, because of the complexity of land ownership.

There have been comprehensive surveys of the breeding waders of the Somerset Levels and Moors since 1977. These generally take place every five or six years. In 1987, a total of 278 breeding pairs were found to be present across 16 sites. The breakdown was as follows:

Curlew 27 pairs; Lapwing 144 pairs; Redshank 44 pairs; and Snipe 63 pairs.

The last comprehensive survey of waders on the 16 sites was in 2002, when a total of 284 breeding pairs were recorded. The breakdown was:

Curlew 36 pairs; Lapwing 127 pairs; Redshank 69 pairs; and Snipe 52 pairs.

Data on wintering water birds on the Somerset Levels and Moors are collected and reported through the Wetland Bird Survey (WeBS), launched in 1993.

WeBS counts 1993 to 2006, Somerset Levels and Moors

Winter/species	*1992-93*	*2005-06*
Mute Swan	525	1,024
Berwicks Swan	209	22
Wigeon	10,253	18,142
Gadwall	80	704
Teal	11,330	8,719
Pintail	205	333
Shoveler	291	845

Bovine Tuberculosis: Disease Control

Mr. Swire: To ask the Secretary of State for Environment, Food and Rural Affairs what consideration he has given to the decision by the Welsh Assembly Government to carry out targeted culls on badgers as a measure to tackle the wildlife reservoir of bovine tuberculosis as part of his policy formulation in this area. [218908]

Jonathan Shaw: The ministerial decision in Wales allows Welsh Assembly officials to consider all the options for culling badgers as part of an 'intensive action area'. Final decisions on what this will involve are not expected before the end of the year. Bovine TB control is a devolved matter, and Wales have responsibility for defining their own strategy for bovine TB control.

If badger culls do take place in Wales, their effects will be considered as part of our overall TB strategy.

Bromine

Paddy Tipping: To ask the Secretary of State for Environment, Food and Rural Affairs when he last met representatives of the bromine industry. [220668]

Mr. Woolas *[holding answer 21 July 2008]:* My right hon. Friend the Secretary of State for Environment, Food and Rural Affairs (Hilary Benn) and I regularly meet representatives of the chemical industry but we have had no contacts with representatives of the bromine industry in particular or discussions relating to that sector.

David Taylor: To ask the Secretary of State for Environment, Food and Rural Affairs what resources his Department is making available to research the effectiveness and safety of new environmentally-friendly alternative flame retardants which do not include the use of deca-BDE. [220678]

Mr. Woolas: In 2003 the Environment Agency commissioned a report on the Prioritisation of Flame Retardants for Environmental Risk Assessment. The aim of the study was to assess the use of and risks associated with flame retardants, in particular to identify substances that might require detailed consideration in terms of their possible impact on the environment. It also considered issues concerning substitution of flame retardants. The study noted that little was known about the effects of many of the substances, including those sometimes proposed for use as environmentally-friendly substitutes.

The new European Regulation on the Registration, Evaluation, Authorisation and Restriction of Chemicals (known as REACH) places on industry the responsibility to assess and understand the potential human health and environmental impacts of the substances they produce in accordance with the principle of "No Data, No Market". REACH also has the aim of replacing substances of very high concern, as defined by criteria in the regulation, with suitable alternatives. Industry will have to justify their continued use. These provisions will drive substitution of harmful substances and also provide the assurance that the substitutes are less harmful than the substances they replace. On current evidence decabromodiphenyl ether (deca-BDE) does not meet the criteria of a substance of very high concern.

Carbon

Mr. Tyrie: To ask the Secretary of State for Environment, Food and Rural Affairs what discount rate was used in the figures set out in the analysis in the Climate Change Bill Financial Impact Assessment. [221446]

Mr. Woolas: I refer the hon. Member to the answer given on 18 June 2008, *Official Report*, column 929W.

Carbon Emissions

Mr. Lilley: To ask the Secretary of State for Environment, Food and Rural Affairs further to the answer of 10 July 2008, *Official Report*, columns 1775-6W, on carbon emissions, what the implications of the Stern Review are for the tools that are used in Government to perform cost-benefit analysis, with particular reference to the appropriate discount rate to use. [219547]

Mr. Woolas *[holding answer 17 July 2008]:* The Stern Review analysed, from a global perspective, the question of whether or not to take global action to avoid dangerous climate change. The methodological approach adopted by the Stern Review in answering this question has implications for the appropriate discount rate to use in cost-benefit analysis under certain specific circumstances, and more generally for the appropriate approach to use to value greenhouse gas emissions in cost-benefit analysis.

Carbon Emissions: Farms

Mr. Drew: To ask the Secretary of State for Environment, Food and Rural Affairs what statutory means are at his disposal to press farmers to reduce their greenhouse gas emissions. [221526]

Mr. Woolas: There are currently no regulations or statutory instruments which place a direct requirement on farmers to reduce greenhouse gas (GHG) emissions. However, a number of measures have an indirect impact on agriculture GHG emissions, such as measures under the nitrates directive and conditions under cross-compliance. There are also a number of voluntary initiatives which can help to reduce GHGs from farming, including the Environmental Stewardship schemes and various grant schemes.

DEFRA has a programme of research dedicated to agriculture and climate change issues which includes research into reducing emissions from livestock, manure and fertiliser application, as well as measures to protect carbon stores in soils. We are working closely with relevant stakeholders, including through the Rural Climate Change Forum and the Farming Futures communications project, to help ensure that farmers have the information and advice they need to take practical action to reduce GHG emissions. As such, we are promoting anaerobic digestion to reduce methane emissions from manure, slurry and other organic material.

Cetaceans

Bill Wiggin: To ask the Secretary of State for Environment, Food and Rural Affairs what photographic and video evidence of cetaceans being caught in nets has been obtained through Government-funded research programmes in the UK in the last 15 years; which Ministers and officials have seen the evidence; who holds the evidence; and if he will publish the evidence. [221664]

Jonathan Shaw: I understand that video and photographic material was collected by the Sea Mammal Research Unit (SMRU) prior to 2003 as part of their research project into the effects of fishing trawlers on dolphins and porpoises around the UK. DEFRA does not hold, nor was it supplied with, this material.

Coastal Areas: Land

Andrew George: To ask the Secretary of State for Environment, Food and Rural Affairs (1) what estimate he has made of the quantity of private land affected by the creation of the coastal corridor proposed in the draft Marine Bill; [219910]

(2) what estimate he has made of the amount of compensation payable to private landowners consequent on the creation of the coastal corridor proposed in the draft Marine Bill; [219911]

(3) what estimate he has made of the cost of the creation of the coastal corridor proposed in the draft Marine Bill. [219912]

Jonathan Shaw: Natural England will consult with landowners before making proposals on the most appropriate positioning of the coastal route. The amount of private land affected by the creation of the coastal corridor will depend on local decisions.

The draft Marine Bill makes no provision for compensation to be paid to private landowners for the creation of the coastal access corridor. Natural England's report to Government recommended that there should be a working presumption against paying compensation for the new right of access in view of the fact that legislation would be simply creating access rights over land rather than depriving landowners of property. The legislation has been drawn up so that implementation will take account of the interests of landowners and minimise any impact on businesses. Natural England will consult with landowners on any necessary conditions on access, for example for land management purposes.

Natural England has estimated a cost of £50 million over 10 years for implementing the coastal access corridor. This figure includes the costs of Natural England and local authority staff, the costs for establishing the coastal access corridor on the ground, and for ongoing maintenance during the implementation period.

Andrew George: To ask the Secretary of State for Environment, Food and Rural Affairs what representations he has received on the creation of a coastal corridor proposed in the draft Marine Bill. [219917]

Jonathan Shaw: 3,929 responses were received to the public consultation on the draft Marine Bill which closed on 26 June 2008. We also received about 11,000 postcards from members of the Ramblers' Association supporting the inclusion of coastal access provisions in the draft Bill. We are currently looking at the responses to the consultation and will publish a summary of the responses within 12 weeks of the consultation closing.

Coastal Areas: Rights of Way

Andrew George: To ask the Secretary of State for Environment, Food and Rural Affairs what plans his Department has to improve access to coastal areas in the UK. [219913]

Jonathan Shaw: A proposal for Natural England to identify a coastal route and associated coastal margin around the English coast, to which there will be a right of access on foot, is contained in the draft Marine Bill. In Wales, the Welsh Assembly Government are considering appropriate statutory provisions for Wales which might be included in the final Bill. In Scotland, the Land Reform (Scotland) Act 2003 provides a statutory right of access to most land and inland water, and access in Northern Ireland is covered by the Access to Countryside (NI) Order 1983.

Cumbria

Mr. Martlew: To ask the Secretary of State for Environment, Food and Rural Affairs what plans he has to increase the number of people working in his Department in Cumbria. [216276]

Jonathan Shaw: The majority of DEFRA staff working in Cumbria are located in Carlisle, Penrith and Workington.

Animal Health has an office at Carlisle that is staffed at a level to carry out duties effectively. Currently there are no immediate plans to increase staff levels.

Present staffing levels within the Rural Payments Agency are sufficient to meet present business needs and are expected to remain reasonably constant going forward, although processes and structures are constantly under review for efficiency purposes.

There are currently no plans to increase staff numbers at the Veterinary Laboratory Agency's office in Penrith.

Dairy Farming

Miss McIntosh: To ask the Secretary of State for Environment, Food and Rural Affairs what recent assessment he has made of the financial position of the dairy industry; and what the current farm gate price for milk is. [220021]

Jonathan Shaw: DEFRA published farm incomes in England by farm type in January 2008. These were based on figures from the Farm Business Survey. Farm Business Income per farm on dairy farms was expected to have increased to £50,700 in the year ended February 2008, from £33,600 in the previous year—an increase of about 50 per cent. This was largely due to a higher farm gate milk price in 2007-08, although higher input costs, particularly feed, dampened down the size of the expected increase. This compares with the average income across all types of farms, including dairy farms, which was expected to have increased by 20 per cent. from £37,600 to £45,000 in 2007-08. DEFRA will publish actual incomes for the year ended February 2008 in October this year, and forecast incomes for the year ending February 2009 in January 2009.

In May 2008 the farm gate price of milk in the UK was 24.45p per litre compared with 17.53p per litre in May 2007.

Departmental Disciplinary Proceedings

Mr. Redwood: To ask the Secretary of State for Environment, Food and Rural Affairs how many staff in his Department and its agencies have been *(a)* dismissed and *(b)* disciplined for their conduct in the last two years. [217407]

Jonathan Shaw: The number of staff dismissed and disciplined for their conduct by the Department for the Environment, Food and Rural Affairs and its agencies during the last two financial years, 2006-07 and 2007-08 are as follows:

Dismissed: 36

This figure represents:

Nine staff dismissed from DEFRA

27 Staff dismissed from DEFRA agencies

Disciplined: 72

This figure represents:

Six staff disciplined within DEFRA

66 Staff disciplined within DEFRA agencies

The figure refers to staff disciplined for recorded minor, serious and gross misconduct. However, it does not reflect the total number of staff disciplined for minor misconduct, because these warnings are issued by line managers who are not required to record these cases centrally. To obtain this information would incur disproportionate cost.

The Civil Service Management Code sets out the requirements for Departments to have procedures in place to deal with conduct and disciplinary issues. The DEFRA procedures are laid down in the staff handbook which is accessed on the departmental intranet.

Departmental Press Officers

Mr. Hoban: To ask the Secretary of State for Environment, Food and Rural Affairs what the average cost to his Department was of employing a press and media officer in 2007-08. [215193]

Jonathan Shaw: 20 full-time, permanent members of staff are employed in the DEFRA Press Office to deal with inquiries from the media.

Details of the number of staff employed at each grade and the relevant salary scales are included in the following table:

Grade	*Number of Staff*	*Salary scale (£)*
Information Officer	10	28,901 to 33,986
Senior Information Officer	6	33,728 to 41,232
G7	3	45,167 to 54,744
G5	1	56,100 to 78,540

Departmental Research

Bob Spink: To ask the Secretary of State for Environment, Food and Rural Affairs what proportion of his Department's budget and that of its predecessor was used for research within its areas of responsibility in each of the last 10 years. [218064]

Jonathan Shaw: The proportion of DEFRA's budget that was used for research and development in each of the last eight years was:

Financial year	*Proportion of budget used for research and development (Percentage)*
2001-02	7.33
2002-03	7.40
2003-04	6.64
2004-05	6.20
2005-06	6.64
2006-07	6.06
2007-08	5.02

The table shows the research and development proportion of total expenditure for the financial years since the department was formed in 2001. There are no figures provided for DEFRA's predecessor Departments as this information could only be provided by incurring disproportionate cost.

The acquisition and use of evidence is central to the development and delivery of robust policies and operations and underpins DEFRA's reputation and ability to influence.

In 2007-08, around 95 per cent. of DEFRA's research and development budget was spent by policy groups to directly support their strategic priorities. The remaining funds were used by the central evidence teams to fund cross-cutting and horizon scanning work. In addition to spend on research and development, approximately £200 million was spent in 2007-08 on other science, including surveillance, monitoring, field trials and knowledge transfer.

Dolphins and Porpoises

Bill Wiggin: To ask the Secretary of State for Environment, Food and Rural Affairs (1) what data sources he uses to establish *(a)* the population of (i) bottlenose and (ii) common dolphins in UK waters, *(b)* the existence of sub-populations and *(c)* dolphin population trends; and if he will publish such data; [221660]

(2) what data sources he uses to establish *(a)* the population of harbour porpoises in UK waters, *(b)* the existence of sub-populations and *(c)* porpoise population trends; and if he will publish these data. [221661]

Jonathan Shaw: Cetacean abundance has been assessed recently in European waters through two large international survey projects: Small Cetacean Abundance in the North sea in 2005 (SCANS-II) and Offshore Distribution and Abundance—2007 (CODA). The first project assessed abundance of both species on the continental shelf of the European Atlantic and North sea and the latter in the offshore environment.

The estimates from SCANS-II were compared with those from an earlier survey (SCANS) in 1994 and there was no significant difference found between population size for harbour porpoise. The final report has recently been submitted to the EU and will shortly be published.

The CODA project focuses on cetaceans in offshore waters of the European Atlantic and began in November 2006. Shipboard surveys to assess abundance were carried out in July 2007 and the data are currently being processed. Publication of the results will follow the project's completion in September 2008.

Common dolphins are widely distributed, with the number of animals in the continental shelf area varying

substantially from year to year. There is no known sub-structuring of the common dolphin population in UK waters.

For bottlenose dolphins there is some sub-structuring. Genetic studies have indicated that the *Tursiops. truncatus* occurring in the offshore waters of the North Atlantic belong to a large oceanic population. Conversely, and although coastal populations around the UK are not genetically isolated, there is some evidence for geographic structuring.

In 2007, Favourable Conservation Status assessments were undertaken for both species under the requirements of the Habitats Directive. The bottlenose dolphin was reported to be in a favourable condition, while the status of the common dolphin was unknown, due mainly to our lacking of knowledge in the offshore abundance. CODA was in part initiated to provide this information. The UK FCS assessments are available from the Joint Nature Conservation Committee's website.

The two SCANS surveys (1994 and 2005) estimated common dolphin abundance in the Celtic sea area. However, the 1994 estimate was not corrected for animals missed on the transect line or for responsive movement, and this is now known to generate significant positive bias. Therefore, it is unknown whether the differences in the abundances obtained were indicative of an actual change in abundance or were related to the different methodology used. Additionally, these two surveys only covered the continental shelf area. This species is known to move widely between inshore and offshore areas.

The sub-population structure of North East Atlantic harbour porpoises has still not been elucidated fully. However, two sub-populations are recognised in UK waters. The first in the North sea and through to western Scotland; and the second in the Celtic and Irish sea area.

The abundance estimates from SCANS-II were compared with those from an earlier survey (SCANS) in 1994 for the North sea. There was no significant difference found between population size for harbour porpoise over this decadal period. The final report for SCANS II has recently been submitted to the EU, following which the work will be published.

Domestic Waste

David Simpson: To ask the Secretary of State for Environment, Food and Rural Affairs what estimate he has made of the amount of domestic waste produced in England and Wales in each of the last three years, broken down by region; and how much was produced per household in each region in each year. [220851]

Joan Ruddock: The household waste figures are calculated from data submitted to WasteDataFlow by local authorities and are for the last three financial years for which data are published.

	Total household waste (million tonnes)		
Region	*2004-05*	*2005-06*	*2006-07*
North East	1.33	1.29	1.30
North West	3.77	3.82	3.72
Yorkshire and the Humber	2.55	2.51	2.57
East Midlands	2.27	2.19	2.25
West Midlands	2.68	2.66	2.72
East	2.87	2.85	2.90
London	3.30	3.33	3.39
South East	4.27	4.19	4.26
South West	2.62	2.63	2.67
England	25.66	25.45	25.78

The household waste per household figures are calculated using the same WasteDataFlow data and the Valuation Office Agency dwelling stock figures.

	Household waste (kilograms per household per year)		
Region	*2004-05*	*2005-06*	*2006-07*
North East	1,165	1,117	1,121
North West	1,244	1,246	1,206
Yorkshire and the Humber	1,153	1,119	1,136
East Midlands	1,230	1,163	1,179
West Midlands	1,181	1,155	1,174
East	1,210	1,177	1,187
London	1,040	1,032	1,043
South East	1,230	1,188	1,195
South West	1,174	1,154	1,159
England	1,180	1,152	1,156

Any issues relating to Wales are a devolved matter for the Welsh Assembly Government and should be answered by them.

Domestic Waste: Waste Disposal

Mr. Pickles: To ask the Secretary of State for Environment, Food and Rural Affairs what powers waste collection authorities have to fine households which put rubbish out at times other than those specified by the authority. [221633]

Joan Ruddock: Under section 46 of the Environmental Protection Act 1990 (EPA), local authorities can issue residents with a notice specifying requirements as to the collection of household waste receptacles. These requirements may include the specifics of how and when to present the receptacles for collection, or the articles which must be placed in the receptacles. It is an offence for somebody to fail to comply with these requirements.

Section 47ZA of the EPA allows local authorities to issue fixed penalty notices for offences under section 46. These fixed penalty notices can be issued by the following people:

(a) an employee of the authority who is authorised in writing by the authority for the purposes of giving notices;

(b) any person who, in pursuance of arrangements made with the authority, has the function of giving such notices and is authorised in writing by the authority to perform that function; and

(c) any employee of such a person who is authorised in writing by the authority for the purposes of giving such notices.

DEFRA's guidance on fixed penalty notices explains that where local authorities authorise contractors to carry out enforcement activities, they should ensure

that background checks are carried out to determine their suitability and capability. It is important that contractors receive adequate training and have a full understanding of any locally set procedures or policies before they begin to issue fixed penalties. The published guidance can be found on the DEFRA website.

Domestic Wastes: Fees and Charges

Mr. Pickles: To ask the Secretary of State for Environment, Food and Rural Affairs what powers waste collection authorities have to fine householders for putting rubbish or recycling into the wrong rubbish or recycling bin or box; and what the statutory basis is for such powers. [217958]

Joan Ruddock: Section 46 of the Environmental Protection Act 1990 (EPA) allows a waste collection authority, by issuing a section 46 notice (s.46 notice), to specify the conditions of the waste collection service it provides. The conditions a s.46 notice covers include the number and type of receptacles to be used, how the waste is to be presented, where and when the receptacle(s) should be placed for collection and any other conditions to facilitate its collection.

Section 46(6) of the EPA makes it an offence for a recipient of the service to breach the conditions set in the s.46 notice and those that breach could be prosecuted under this section. In such a case, the magistrates court would determine the fine.

Section 48 of the Clean Neighbourhoods and Environment Act 2005 (CNEA) amended the EPA, adding section 47ZA. Section 47ZA allows a waste collection authority to issue fixed penalty notices for breaches of s.46 of the EPA. The amount of the fixed penalty is set by the waste collection authority in relation to the authority's area, or if no amount is set £100. An authority can accept a lesser amount if it is paid before a date specified by the authority.

Environment Protection: Planning Permission

Mr. Harper: To ask the Secretary of State for Environment, Food and Rural Affairs (1) how many requests from planning authorities for responses on planning permission applications the Environment Agency has received in *(a)* 2007-08 and *(b)* 2008-09 to date; [220217]

(2) how many Environment Agency staff are working to process requests from planning authorities for responses on planning permission applications; [220218]

(3) what the current backlog is for requests from planning authorities for responses on planning permission applications to the Environment Agency; and what the current average waiting time for responses is. [220219]

Mr. Woolas: The Environment Agency receives requests from planning authorities for comments on planning application consultations, development plans and pre-application consultation requests from developers. The Environment Agency replied to 49,432 planning application consultations in 2007-08. In the first quarter of 2008-09 the Environment Agency replied to 11,279 planning applications.

Planning application consultations sent to the Environment Agency are initially dealt with by Planning Liaison teams, but they may also require additional input from Environment Agency technical experts in issues such as flood risk, pollution, water, waste and wetland biodiversity. There are currently 238 Area Planning posts in the Environment Agency.

There is no current 'backlog' of requests. The current live workload is 3,072 items of 'casework', which includes planning applications, inquiries and other consultations. The average response time for planning applications in the first quarter of 2008-09 was 15.8 days.

In the Environment Agency's most recent report (2006-07, December 2007) on replies to planning application responses within the statutory 21-day time limit (or other period as agreed in writing with the applicant), 89 per cent. of consultations (on 40,168 planning applications) were determined within the time period. The report for 2007-08 is currently being prepared and will be published shortly.

Environment Protection: Somerset

Miss McIntosh: To ask the Secretary of State for Environment, Food and Rural Affairs how much money has been spent in the Somerset Levels and Moors on the *(a)* environmentally sensitive areas, *(b)* countryside stewardship, *(c)* environmental stewardship and *(d)* Natural England wildlife enhancement scheme. [219933]

Joan Ruddock: The question covers four schemes which cover different areas and are managed in different ways.

The following table gives a breakdown of the spend under each scheme to date.

Scheme	*Date parameters*	*Spend (£)*
Environmentally Sensitive Area—Management Agreements	1 January 1998 to 17 July 2008	25,361,582
Environmentally Sensitive Area—Conservation Plans	1 January 1998 to 17 July 2008	620,879
Wildlife Enhancement Scheme (SSSI only within the ESA)	1 April 2002 to 31 March 2008	605,532
Countryside Stewardship (within the county of Somerset)—Revenue	1 January 1998 to 17 July 2008	10,558,903
Countryside Stewardship (within the county of Somerset)—Capital	1 January 1998 to 17 July 2008	6,671,447
Environmental Stewardship (within JCA 142)—Entry Level Stewardship	1 January 2005 to 17 July 2008	446,471
Environmental Stewardship (within JCA 142)—Organic Entry Level Stewardship	1 January 2005 to 17 July 2008	421,166
Environmental Stewardship (within JCA 142)—Entry Level with Higher Level Stewardship	1 January 2005 to 17 July 2008	628,379
Environmental Stewardship (within JCA 142)—Organic Entry Level with Higher Level Stewardship	1 January 2005 to 17 July 2008	20,679

JCA 142 is the Joint Character Area for the Somerset Levels and Moors.

Fisheries: Research

Bill Wiggin: To ask the Secretary of State for Environment, Food and Rural Affairs (1) whether he has received the final project report on By-catch Mitigation Research from the Sea Mammal Research Unit; and when the report will be made publicly available; [221641]

(2) how many cetaceans have been saved as a result of the UK's cetacean by-catch response strategy published in 2003; [221659]

(3) what Government-funded research is being undertaken on cetacean by-catch; what the focus of that research is; when it will conclude; and when the results of the research will be publicly available. [221662]

Jonathan Shaw: I refer the hon. Member to the answer I gave on 10 July 2008, *Official Report*, column 1777W, for details on the Government-funded research being undertaken by the Sea Mammal Research Unit (SMRU) on cetacean by-catch mitigation. The final report of the project is due to be published in the autumn.

Information on implementing the UK's cetacean by-catch response strategy is available on DEFRA's website.

Further information will be made available when the annual report on the UK cetacean by-catch monitoring scheme is published.

Flood Control

Miss McIntosh: To ask the Secretary of State for Environment, Food and Rural Affairs if he will make a statement on his plans for restructuring of internal drainage boards; and what assessment he has made of the effects of the restructuring on maintenance and dredging of watercourses in England. [220022]

Mr. Woolas: I have asked internal drainage boards (IDBs) to consider a move to sub-catchment management to achieve a better integrated approach towards the management of catchments and coastal systems.

The concept of sub-catchment management is based on managing water levels throughout a whole catchment to achieve a reduction in the risk of flooding to people, property, businesses, infrastructure, high quality agricultural land and to maintain and improve favourable conditions for environmentally sensitive areas.

Once re-organised on a sub-catchment basis, IDBs will be larger, better resourced, will benefit from economies of scale and will be better placed to strategically plan, prioritise and deliver appropriate maintenance of watercourses. They will also be better able to contribute a strategic view to the future development of high level plans, including catchment flood management plans and river basin management plans.

Miss McIntosh: To ask the Secretary of State for Environment, Food and Rural Affairs how many engineers are employed by *(a)* the Environment Agency in England and *(b)* internal drainage boards in England; and how many people will be employed by internal drainage boards after the restructuring programme is completed. [220023]

Mr. Woolas: The Environment Agency estimates that it employs around 200 chartered and incorporated engineers with experience in civil, mechanical and electrical engineering but recognises that this list is not comprehensive.

DEFRA does not record the information on internal drainage board engineers.

Flood Control: Somerset

Miss McIntosh: To ask the Secretary of State for Environment, Food and Rural Affairs how much has been spent by the Environment Agency and its predecessor bodies on flood risk management in the Somerset Levels and Moors flood plain since 1987; and how much of that money was spent on *(a)* dedicated water management for nature conservation and *(b)* protection of special protection areas and sites of scientific interest. [219931]

Mr. Woolas: The overall cost of flood risk management for the Somerset Levels and Moors area from 1987 to the current date is £28.1 million. The costs include elements of schemes and strategies that cover a larger area than the Levels and Moors but could not be separated.

The costs associated with raised water level areas protecting sites of special scientific interest (SSSI) within the Somerset Levels and Moors since 1987 are £1.6 million, which includes construction and maintenance expenditure.

Schemes were also undertaken where the primary driver is the DEFRA Public Service Agreement Target 3, which states that 95 per cent. of all SSSIs must be in favourable or favourable recovering condition by 2010. These SSSIs also form part of the Somerset Levels and Moors Special Protection Area and the Environment Agency's work helps to protect the integrity of the internationally important sites under the Habitats Regulation 1994.

The Greylake Sluice and Oath Tidal Sluice schemes have both been replaced with new structures that allow greater flexibility in the control of water level management at a cost of £6.5 million combined. Similar work has also been carried out on a number of smaller structures at a combined cost of £3.5 million. Additional small schemes are also planned in the future. The costs formulated are only those of the Environment Agency.

Flooding Lessons Learned Review

Mr. Roger Williams: To ask the Secretary of State for Environment, Food and Rural Affairs what progress has been made towards publishing an action plan for the implementation of the recommendations made in the Pitt report. [220464]

Mr. Woolas: I refer the hon. Member to the answer given by my right hon. Friend the Secretary of State for Environment, Food and Rural Affairs (Hilary Benn) on 17 July 2008, *Official Report*, column 393.

Flooding: Gloucestershire

Mr. Laurence Robertson: To ask the Secretary of State for Environment, Food and Rural Affairs pursuant to the Answer of 14 July 2008, *Official Report*, column 29W, on flooding: Gloucestershire, if he will direct the Environment Agency to undertake repair work on the Glynbridge Gardens side of the River Chelt. [220509]

Mr. Woolas *[holding answer 21 July 2008]:* The Environment Agency is repairing the river banks on the

George Reading Wayside of the River Chelt because a flood defence wall is at risk of collapsing. There are no flood defences on the Glynbridge Gardens side of the river and responsibility for maintenance lies with the riparian owner. Therefore, I will not direct the Environment Agency to undertake such work.

However, I will request that the riparian owner undertakes this work.

Game

Angela Browning: To ask the Secretary of State for Environment, Food and Rural Affairs what discussions he has had with the Chief Executive of the Food Standards Agency on registration and compliance with their terms of the registration of establishments processing wild game; and if he will make a statement. [220261]

Jonathan Shaw *[holding answer 21 July 2008]:* There have been no discussions at ministerial level with the Food Standards Agency in respect of establishments handling the processing of wild game.

Geographical Information Systems

Mr. Pickles: To ask the Secretary of State for Environment, Food and Rural Affairs what plans his Department has to establish a geo-portal for spatial data held by public bodies, including cadastral data, to help implement the provisions of the EU INSPIRE Directive. [221250]

Jonathan Shaw: The creation of a national geo-portal is being considered in plans to implement the EU INSPIRE directive. The portal would provide one place where users can access metadata (on data corresponding to the INSPIRE spatial data themes, one of which is cadastral parcels) and be directed to other services, for example, to view and download data.

Heating: Carbon Emissions

Lembit Öpik: To ask the Secretary of State for Environment, Food and Rural Affairs what estimates his Department has made of the potential carbon dioxide savings of replacing D-rated and below energy circulator pumps with A-rated energy circulator pumps in *(a)* domestic and *(b)* non-domestic properties in the UK. [219189]

Joan Ruddock: The Government's Market Transformation Programme estimates, based on sales data from 2006, that the potential carbon savings of replacing D-rated and below energy labelled circulator pumps with A-rated energy labelled circulator pumps would be about 0.1 megatonnes of carbon for domestic properties and about 0.3 megatonnes of carbon for non-domestic properties.

Marine and Fisheries Agency

Mr. Drew: To ask the Secretary of State for Environment, Food and Rural Affairs what assessment he has made of the levels of *(a)* customer and *(b)* stakeholder satisfaction with the Marine and Fisheries Agency; and if he will make a statement. [221547]

Jonathan Shaw: There has been no formal assessment yet of customer or stakeholder satisfaction with the Marine and Fisheries Agency. The Agency is planning to undertake a customer satisfaction survey this year.

Marine Management Organisation

Mr. Drew: To ask the Secretary of State for Environment, Food and Rural Affairs for what reasons trade unions in his Department were not consulted before the status of the proposed Marine Management Organisation was determined in January 2007. [220373]

Jonathan Shaw: There have been two formal consultations on the Marine Bill including proposals for the establishment of a Marine Management Organisation (MMO). These were undertaken in accordance with the Government's consultation criteria. The trade unions therefore had two opportunities to provide comments on part of the process. Officials have also met regularly with the trade unions to discuss the Marine Bill, implementation of the MMO and related issues.

Mr. Drew: To ask the Secretary of State for Environment, Food and Rural Affairs what assessment he has made of the extent to which the Marine and Fisheries Agency meets the objectives he has set for the proposed Marine Management Organisation. [221546]

Jonathan Shaw: The Marine and Fisheries Agency already undertakes many of the functions that will fall to the new Marine Management Organisation (MMO) and there is broad agreement that the MMO should be built on the MFA. Where practicable new functions will be transferred to the MFA in advance of the establishment of the MMO with the aim of ensuring a smooth transition to the new organisation.

Mr. Drew: To ask the Secretary of State for Environment, Food and Rural Affairs what consideration his Department has given to according Crown status to the proposed Marine Management Organisation. [221549]

Jonathan Shaw: The Marine Bill consultation in 2006 set out options for the status of Marine Management Organisation (MMO), including Executive agency. Careful consideration was given to the most appropriate status for the MMO, and responses to that consultation were taken into account.

Non-departmental public body (NDPB) status was considered to be the most appropriate given the functions that the new body is designed to deliver, together with the fact that those services will be delivered by the MMO on behalf of the Government and not just on behalf of DEFRA.

National Union of Mineworkers

Gregory Barker: To ask the Secretary of State for Environment, Food and Rural Affairs what meetings *(a)* he and *(b)* his Ministers have held with representatives of the National Union of Mineworkers in the last six months; what the date was of each such meeting; and if he will make a statement. [219410]

Jonathan Shaw: There have been no meetings between Ministers in DEFRA and the National Union of Mineworkers.

Pesticides

Martin Horwood: To ask the Secretary of State for Environment, Food and Rural Affairs what estimate he has made of the volume and proportion of the annual potato crop which has been treated with anti-blight spray in each of the last three years. [220085]

Mr. Woolas: Anti-blight sprays are applied to main crop potatoes. Data from recent pesticide usage surveys indicate that approximately 97 per cent. of the crop is treated each year. Estimates for the volume of harvested UK production treated for blight are:

2007: 5.3m tonnes;

2006: 5.4m tonnes;

2005: 5.6m tonnes.

Tim Loughton: To ask the Secretary of State for Environment, Food and Rural Affairs what guidance his Department has issued on the use of hormonal weed killers on crops which are likely to enter the food chain. [220744]

Mr. Woolas *[holding answer 21 July 2008]:* Certain hormonal weed killers have the potential to remain in plant material from treated land and pass into the manure of livestock which eat such material. Susceptible crops may be adversely affected by the residues in the plant material. Labels of certain products which contain particular hormonal week killers therefore include warnings not to use manure from livestock which have eaten grass from treated land, or fodder derived from such grass, on susceptible crops or on land intended for growing such crops, until all plant material has fully decomposed. As with all plant protection products, users should always read and follow the label instructions; this is a statutory requirement.

Some cases of damage to susceptible crops which appear to involve the weed killer aminopyralid have arisen recently. In such cases, the label precautions on the use of manure may not have been followed when manure has been supplied to allotment holders and gardeners. The manufacturer has indicated that they are withdrawing products which contain aminopyralid from sale and PSD is formally suspending their authorisations while they investigate the options for preventing a recurrence of this problem. A key issue in their consideration will be whether the conditions of use regarding manure are sufficient, or sufficiently well known.

Tim Loughton: To ask the Secretary of State for Environment, Food and Rural Affairs what representations he has received on the contamination of manure by hormonal weed killers. [220755]

Mr. Woolas *[holding answer 21 July 2008]:* The first inquiry relating to the potential effects of the hormonal herbicide aminopyralid in manure was received by the Pesticides Safety Directorate's helpline on 12 March 2008. Around 90 inquiries had been received up to 16 July 2008, primarily from amateur gardeners and allotment holders. It is not known how many reports of damage to crops are attributable to aminopyralid.

Pesticides: EU Action

Mr. Lancaster: To ask the Secretary of State for Environment, Food and Rural Affairs what assessment he has made of the effect on British farming of the proposed EU prohibition on the use of certain agrochemicals. [219536]

Jonathan Shaw: I refer the hon. Member to the answer given to the hon. Member for Stroud (Mr. Drew) on 25 June 2008, *Official Report* columns 302-03W.

Pollution: Hertfordshire

Mr. Heald: To ask the Secretary of State for Environment, Food and Rural Affairs what assessment he has made of the effect of the Sandridge bromate contamination on *(a)* the Mimram River and *(b)* chalk aquifers in Hertfordshire. [220109]

Mr. Woolas: The River Mimram lies outside the area of contamination. Sampling has shown that groundwater between the plume and the Mimram contains no bromate. Given these data and the generally stable nature of the plume the Environment Agency is confident that the Mimram is not, and will not be, subject to contamination by bromate.

Contamination of the chalk aquifer in Hertfordshire extends 20 km from Sandridge to the Lee Valley between Ware and Turnford, which includes Hoddesdon and Broxbourne. One borehole has been taken out of use for public supply. The contamination has restricted the use that can be made of seven other public supply boreholes and three private boreholes. The three private boreholes are all close to Sandridge. Concentrations of bromate and the size of the plume show no change with time.

Pollution: Incinerators

Steve Webb: To ask the Secretary of State for Environment, Food and Rural Affairs how frequently the Environment Agency tests the levels of lead in incineration bottom ash; and on how many occasions in the last five years it has found levels of lead in such ash which exceeded the levels at which such waste can be sent to non-hazardous landfill. [220895]

Joan Ruddock: The Environment Agency does not test the levels of lead in incinerator bottom ash (IBA). However, through a permit condition, incinerator operators are required to monitor IBA on a quarterly basis for a suite of metals including lead.

Non-hazardous landfill operators have to ensure they comply with the limits specified in their landfill permit and waste acceptance criteria before accepting a waste for disposal. Records of levels of lead in IBA that have exceeded the levels at which they can be sent to non-hazardous landfill are not held centrally and would incur disproportionate cost to collate.

Radioactive Materials: Waste Disposal

Steve Webb: To ask the Secretary of State for Environment, Food and Rural Affairs (1) what his Department's budget for work associated with nuclear waste was in each of the last three years; [220896]

(2) how many of his Department's officials work on nuclear waste issues. [220897]

Mr. Woolas: DEFRA's Radioactive Waste and Preparedness team deals with a range of issues including radioactive waste management, radioactive discharges, related legislation and DEFRA's response to chemical, biological, radiological or nuclear (CBRN) incidents. The team is made up of about 25 staff.

The annual programme budget for the team, for each of the last three years has been in the order of £3.5 to £4.8 million.

Recycling: Halifax

Mrs. Riordan: To ask the Secretary of State for Environment, Food and Rural Affairs what changes there have been in levels of household recycling in Halifax since 1997. [220042]

Joan Ruddock: National data on household recycling rates are only available down to local authority level. Halifax is within Calderdale metropolitan borough council and the household recycling rates for Calderdale are shown in the following table.

	Recycling and composting rate (Percentage)
1997-98	5.7
1998-99	4.3
1999-2000	7.8
2000-01	9.1
2001-02	10.1
2002-03	12.2
2003-04	13.6
2004-05	17.1
2005-06	20.4
2006-07	21.3

These household recycling rates were reported to the Audit Commission by Calderdale under the best value performance regime and measure performance on dry recycling and composting. There have been some changes in the definitions of the waste indicators over time which may affect the comparability of data. Nevertheless, the figures show a clear increase in Calderdale's recycling rate since 1997.

Recycling: Low Income

Mr. Jim Cunningham: To ask the Secretary of State for Environment, Food and Rural Affairs what steps the Government *(a)* have taken and *(b)* plan to take to assist low income families with recycling. [221333]

Joan Ruddock: We do not consider that low income groups are less able to reduce and recycle their waste than those on higher incomes. However we encourage local authorities to consider any groups that may require extra support and how best to provide this.

Rural Areas: Employment

Mr. Drew: To ask the Secretary of State for Environment, Food and Rural Affairs what estimate he has made of the number of new jobs created in rural areas in each region in England in each of the last five years. [217828]

Mr. Watson: I have been asked to reply.

The information requested falls within the responsibility of the UK Statistics Authority. I have asked the authority to reply.

Letter from Karen Dunnell, dated 22 July 2008:

As National Statistician, I have been asked to reply to your Parliamentary Question on what estimate he has made of the number of new jobs created in rural areas in each region in England in each of the last five years. [217828].

While statistics of new jobs created are not available explicitly, statistics from surveys enable comparisons to be made of net changes in employment from year to year.

The Office for National Statistics compiles employment statistics from the Labour Force Survey (LFS) following International Labour Organisation definitions.

The attached table provides estimates of the number of people aged 16 and over, in employment, resident in rural areas by Government Office Region of residence, and the net change year on year.

Figures are for the three months ending June for each year from 2005 to 2007, the latest available. Figures prior to 2005 are not available due to the rural breakdown requested.

As with any survey, results from the LFS are subject to a margin of uncertainty.

Table 1: Number of people aged 16 and over in employment in rural areas[1] and net change by Government office region of residence for April to June quarter in each year

Thousands, not seasonally adjusted

	Levels	*Net change*
North East		
2005	208	—
2006	212	4
2007	246	34
North West		
2005	378	—
2006	401	23
2007	414	13
Yorkshire and The Humber		
2005	509	—
2006	516	7
2007	519	3
East Midlands		
2005	656	—
2006	649	-7
2007	649	0
West Midlands		
2005	440	—
2006	424	-16
2007	417	-7
East		
2005	876	—
2006	845	-31
2007	884	39
London		
2005	10	—

Table 1: Number of people aged 16 and over in employment in rural areas[1] and net change by Government office region of residence for April to June quarter in each year

	Thousands, not seasonally adjusted	
	Levels	*Net change*
2006	10	0
2007	8	-2
South East		
2005	885	—
2006	905	20
2007	905	0
South West		
2005	828	—
2006	840	12
2007	834	-6
England		
2005	4,794	—
2006	4,804	10
2007	4,878	74

[1] Estimates of the rural breakdown are provided using the URIND variable, which was introduced in spring 2005 As with any survey, results from the LFS are subject to a margin of uncertainty.

Labour Force Survey

Rural Areas: Population

Mr. Drew: To ask the Secretary of State for Environment, Food and Rural Affairs if he will assess the effect of the implementation of his Department's definition of sustainability on population growth in rural areas; and if he will make a statement. [219137]

Jonathan Shaw: The goal of sustainable development is to enable all people to enjoy a better quality of life, without compromising the quality of life of future generations.

For the UK Government and the devolved Administrations, that goal will be pursued in an integrated way through a sustainable, innovative and productive economy that delivers high levels of employment; and a just society that promotes social inclusion, sustainable communities and personal wellbeing in all communities, rural and urban. These principles will be carried forward through four priorities for action:

Sustainable consumption and production;

Climate change and energy;

Natural resource protection and environmental enhancement; and

Sustainable communities.

And it is in working on all four of these that we will achieve our sustainable development objectives.

Seas and Oceans: Nature Conservation

Bill Wiggin: To ask the Secretary of State for Environment, Food and Rural Affairs what legal provisions exist for restricting fishing activity in order to protect marine biodiversity in UK *(a)* inshore and *(b)* offshore waters. [221635]

Jonathan Shaw: Within six nautical miles, sea fisheries committees in England and Wales have powers under the Sea Fisheries Regulation Act 1966 to introduce byelaws to restrict fishing activities for fisheries management and marine environmental purposes. In addition, the Secretary of State, the Welsh Ministers and the Scottish Ministers have powers under the Sea Fish (Conservation) Act 1967 to restrict fishing activities for fisheries management and marine environmental purposes.

In the 6-12 nautical mile zone, the Secretary of State, the Welsh Ministers and the Scottish Ministers have powers under the Sea Fish (Conservation) Act 1967 to restrict fishing activities for fisheries management and marine environmental purposes. Where it is intended that such restrictions should apply to the vessels of another member state, they must be approved by a Commission Decision (or a Decision of the Council) following consultation with the Commission, affected member states and the regional advisory council.

Outside of 12 nautical miles, the UK would approach the Commission and other member states to seek adoption of appropriate measures through the common fisheries policy where a need is identified for controls to be placed on fisheries activities in order to protect an area, habitat or species of national importance.

Bill Wiggin: To ask the Secretary of State for Environment, Food and Rural Affairs what fishing activity he intends to permit in UK offshore Special Areas of Conservation sites. [221639]

Jonathan Shaw: The regulation of fishing activity in offshore waters is the responsibility of the EU Fisheries Council and the European Commission. The Joint Nature Conservation Committee has advised that, in respect of the offshore sites which it is so far proposed to designate as Special Areas of Conservation, the use of heavy towed gear should be prohibited in order to protect the features for which designation is proposed. Such controls already apply to the Darwin Mounds site, but it will be for the Commission to propose and ultimately for the Council to decide what measures, if any, should be applied in respect of the other sites proposed for designation.

Bill Wiggin: To ask the Secretary of State for Environment, Food and Rural Affairs for what reasons the Dogger Bank has not been formally approved as a proposed offshore Special Area of Conservation; and when he expects the approval process to be resolved. [221640]

Jonathan Shaw: Survey of the Dogger Bank was not completed in time for this site to be included among those in respect of which the Joint Nature Conservation Committee launched a consultation process at the end of last year. It is hoped that we will be able to include this site in next year's tranche of offshore Special Areas of Conservation, to be notified to the European Commission by the end of August 2009.

Bill Wiggin: To ask the Secretary of State for Environment, Food and Rural Affairs what size of network of marine conservation zones his Department is budgeting for. [221642]

Jonathan Shaw: The coverage of marine conservation zones (MCZs) proposed for designation under the draft Marine Bill will depend on the outcome of stakeholder-based regional projects being established by the statutory conservation agencies. However, for the purposes of assessing costs and benefits in the impact assessment for the draft Bill, it was assumed that there would be 92 MCZs in English territorial waters and UK offshore waters, covering approximately 71,000 square kilometres, or 8.2 per cent. of UK waters to the limits of the continental shelf.

Bill Wiggin: To ask the Secretary of State for Environment, Food and Rural Affairs what proportion of the UK territorial waters will need to be protected as Special Areas of Conservation to meet the UK's obligations under the EU Habitats Directive. [221643]

Jonathan Shaw: Given that the Habitats Directive requires us to protect sites containing particular types of habitat, it is not possible to make an estimate of the sea area likely to be affected by designation in the absence of completed surveys of the sea-bed in UK offshore waters. The survey process is ongoing.

Bill Wiggin: To ask the Secretary of State for Environment, Food and Rural Affairs what proportion of the UK's seas will need to be protected to fulfil the UK's obligations under the Convention for the Protection of the Marine Environment, OSPAR. [221644]

Jonathan Shaw: All of the UK's seas in the North East Atlantic are within the scope of the OSPAR Convention. The convention requires contracting parties to prevent and eliminate pollution and to take the necessary measures to protect the maritime area against the adverse effects of human activities so as to safeguard human health and to conserve marine ecosystems.

Theoretically, all of the UK's seas are covered by the UK's OSPAR obligations, but in practice, OSPAR operates a risk-based approach to protect those areas, species and habitats that are vulnerable and likely to be affected.

Bill Wiggin: To ask the Secretary of State for Environment, Food and Rural Affairs what proportion of the UK's seas must be protected to achieve Good Environmental Status as required under the EU Maritime Strategy Directive. [221645]

Jonathan Shaw: The Marine Strategy Framework Directive, which came into force on 15 July 2008, applies to all marine waters under the UK's jurisdiction.

The directive requires member states to carry out an initial assessment of the state of their seas and to determine in more detail what Good Environmental Status means for their marine waters by July 2012. Until this work has been completed we will not be in a position to assess what the programme of measures will need to comprise in order to achieve Good Environmental Status.

The directive also requires member states to co-operate with other member states in their marine region to ensure the requirements of the directive are co-ordinated at a regional level. The UK will be using its role within the OSPAR Convention to pursue this aspect of the directive.

Bill Wiggin: To ask the Secretary of State for Environment, Food and Rural Affairs for what reason the Government have not introduced acoustic deterrent devices, as required by the EU by-catch regulation (EC) No. 812/2004. [221663]

Jonathan Shaw: I refer the hon. Member to the answer I gave on 12 May 2008, *Official Report*, column 1777W, which sets out the UK Government's position in regard to acoustic deterrent devices, as required by EU Regulation 812/2004.

Sustainable Development

Jo Swinson: To ask the Secretary of State for Environment, Food and Rural Affairs what estimate he has made of the annual cost of measuring life satisfaction as part of the sustainable development indicators. [220697]

Mr. Woolas: The intention is for questions on life satisfaction to be included in various surveys run by Government Departments for other purposes, thereby enabling life satisfaction to be analysed alongside other survey data. The annual cost will be small in comparison with the overall costs of the surveys concerned.

An update for 2008 will come from the Department of Health "Healthy Foundations Life-Stage Segmentation" survey, which is looking at the drivers for behaviour relating to smoking, obesity, alcohol and substance abuse, sexual health and mental health. The Department for Environment, Food and Rural Affairs has contributed £4,400 to ensure the inclusion of the life satisfaction question in this survey.

Future updates will come from other surveys, for example the "Taking Part" survey run by the Department for Culture, Media and Sport.

Television

Mr. Maude: To ask the Secretary of State for Environment, Food and Rural Affairs to what premium Sky, digital terrestrial or cable television channels *(a)* his Department and *(b)* each of its agencies subscribes; and at what yearly cost in the most recent period for which figures are available. [215650]

Jonathan Shaw: My Department uses freeserve across the estate. We pay no subscriptions.

Trees: Diseases

Mr. Roger Williams: To ask the Secretary of State for Environment, Food and Rural Affairs what estimate he has made of the incidence of *(a)* bleeding canker in horse chestnut trees, *(b)* sudden oak death, *(c)* oak processionary moth and *(d)* defoliation of horse chestnuts by the leaf-mining caterpillar cameraria ohridella in the last 12 months. [220461]

Joan Ruddock: Information and survey reports on all of these pests have been published on the Forestry Commission website.

A survey of horse chestnut (*Aesculus hippocastanum*) in Great Britain was undertaken between June and August 2007. This was to provide information, based on visual assessment of symptoms, on the likely incidence and severity of the disease known as Horse Chestnut Bleeding Canker, caused by *Pseudomonas syringae pathovar aesculi*. I will arrange for a copy of the survey report to be placed in the Library of the House.

In 2004, the Forestry Commission carried out a major survey of woodlands in Great Britain to determine whether there was any evidence of the pathogen *Phytophthora ramorum*, referred to in the USA as 'Sudden Oak Death'. Further surveys have been carried out each year and since. I will arrange for a copy of the Report on the Forestry Commission Re-Survey of Woodlands 2007 to Assess the Level of Incidence of *Phytophthora ramorum* and *Phytophthora kernoviae* in woodlands in England and Wales to be placed in the Library of the House.

The Oak Processionary Moth was first found in London in 2006. I will arrange for a copy of the Report on survey for Oak Processionary Moth *Thaumetopoea processionea* (Linnaeus) (Lepidoptera: Thaumetopoeidae) (OPM) in London in 2007 to be placed in the Library of the House. Surveys this year suggest that the outbreak area has not expanded and, in many locations, the numbers of new nests has been significantly reduced.

Cameraria ohridella, the Horse Chestnut Leaf Miner, was first detected in Wimbledon in 2002. Since then, it has continued to spread outwards and is now found as far north as South Yorkshire and in East Anglia and parts of Wales.

Trees: Genetically Modified Organisms

Mrs. Moon: To ask the Secretary of State for Environment, Food and Rural Affairs what discussions he has had with European counterparts on the release of genetically-modified trees. [217672]

Joan Ruddock: I attended the High-Level Segment of the Ninth meeting of the Conference of the Parties to the Convention on Biological Diversity held in Bonn in May this year. Ministers from across the world attending the High-Level Segment discussed the issue of genetically modified trees. Their conclusions are reflected in the decision agreed by the conference and are to:

Reaffirm the need to take a precautionary approach when addressing the issue of genetically modified trees;

Authorize the release of genetically modified trees only after completion of studies in containment, including in greenhouse and confined field trials, in accordance with national legislation where existent, addressing long-term effects as well as thorough, comprehensive, science-based and transparent risk assessments to avoid possible negative environmental impacts on forest biological diversity;

Also consider the potential socio-economic impacts of genetically modified trees as well as their potential impact on the livelihoods of indigenous and local communities;

Acknowledge the entitlement of Parties, in accordance with their domestic legislation, to suspend the release of genetically modified trees, in particular where risk assessment so advises or where adequate capacities to undertake such assessment is not available;

Further engage to develop risk-assessment criteria specifically for genetically modified trees;

Note the results of the Norway – Canada Workshops on Risk Assessment for Emerging Applications for Living Modified Organisms (UNEP/CBD/BS/COP-MOP/4/INF/13);

Welcome the decision of the fourth meeting of the Conference of the Parties serving as the meeting of the Parties to the Cartagena Protocol to establish an Ad Hoc Technical Expert Group on Risk Assessment and Risk Management that is also mandated to address the issue of genetically modified trees;

Collaborate with relevant organizations on guidance for risk assessment of genetically modified trees and guidance addressing potential negative and positive environmental and socio-economic impacts on the conservation and sustainable use of forest biodiversity associated with the use of genetically modified trees;

Provide the available information and the scientific evidence regarding the overall effects of genetically modified trees on the conservation and sustainable use of biological diversity to the Executive Secretary for dissemination through the clearing-house mechanism.

Trees: Urban Areas

Mr. Roger Williams: To ask the Secretary of State for Environment, Food and Rural Affairs what consideration he has given to widening the remit of the Forestry Commission to include *(a)* amenity and *(b)* urban trees in relation to pests and disease. [220458]

Joan Ruddock: The Forestry Commission's statutory remit under the Plant Health Act 1967 charges them with the responsibility for the protection of forest trees and timber against attack by pests. This statutory remit does not specifically extend to monitor amenity and urban trees in relation to pests and disease. In practice the Forestry Commission occasionally does this, either by individually financed surveys aimed at detecting specific pest problems, or by monitoring the issues raised in calls for advice through the Tree Health Diagnostic and Information Service operated by Forest Research. I have asked the Forestry Commission to consider whether there is a need to extend their remit to include a more targeted approach to amenity and urban trees.

Waste Disposal

Mr. Pickles: To ask the Secretary of State for Environment, Food and Rural Affairs what advice *(a)* his Department and *(b)* the Waste Resources Action Programme has given to waste collection authorities on the number of different recycling and rubbish bins that should be given to local authorities. [221251]

Joan Ruddock: The Government believe local authorities are best placed to make decisions on the waste management strategy for their communities. Local authorities are free to chose how they fulfil their waste collection duties including the frequency of the collections, the priority, degree of effort and resources required.

The authority can specify the number, size, construction and maintenance of receptacles, what can be placed in each, where and when they are to be placed for collection and can require the waste to be treated prior to placing it in a receptacle (usually washing or rinsing containers).

All recycling systems require the use of more than one receptacle, so the guidance published by the Waste and Resources Action Programme (WRAP) in July 2007 offers some consideration of specific issues associated

with the containers for recycling and residual waste, in the context of alternating collections of recylates and residual waste.

Mr. Pickles: To ask the Secretary of State for Environment, Food and Rural Affairs what steps *(a)* his Department and *(b)* the Waste and Resources Action Programme is taking to improve advice services provided to local authorities on local waste collections. [221254]

Joan Ruddock: The Government-funded Waste and Resources Action Programme (WRAP)'s recycling and organics technical advisory team (ROTATE) provides advice to local authorities in England and Northern Ireland on reducing residual waste for disposal, increasing recycling and diversion from landfill and waste prevention.

The advisory service is free. So far, over 300 local authorities have benefited from WRAP's local authority advisory service on their collection programmes for kerbside, civic amenity and bring schemes. Areas where advice is provided include collections and recycling, waste prevention and monitoring and evaluation. The service has been improved this year by integrating support for local communications with advice on collection systems so that authorities will receive a more comprehensive service. The service has also been extended to include support for authorities preparing business cases for PFI funding to ensure that they can meet the required level of recycling.

Waste Disposal: Fees and Charges

Mr. Pickles: To ask the Secretary of State for Environment, Food and Rural Affairs whether local authorities will have powers to stop collecting household waste from dwellings which refuse to pay or are late in paying the charges in areas where charges for the collection of household waste are being piloted. [221252]

Joan Ruddock: The Climate Change Bill allows for up to five local authorities to pilot waste incentive schemes. Such schemes do not permit local authorities to stop collecting household waste from dwellings where householders have not paid, or are late in paying.

Waste Management: Private Sector

Mr. Tom Clarke: To ask the Secretary of State for Environment, Food and Rural Affairs (1) what steps his Department takes to advise local authorities in their choice of private sector waste management partners; [221459]

(2) what powers his Department has to instruct and manage the private sector companies that are short-listed for local government waste management contracts; [221460]

(3) for which local authorities his Department has instructed the authority to exclude certain private sector companies from the short list for waste disposal contracts. [221461]

Joan Ruddock: The procurement of local authority contracts is a matter for the authority.

Waste Stakeholder Group

Mr. Pickles: To ask the Secretary of State for Environment, Food and Rural Affairs who the members of the Waste Stakeholder Group are; when it has met; and if he will place in the Library a copy of the minutes of its meetings. [221255]

Joan Ruddock: The meeting dates, board members, and minutes for the Waste Stakeholder Group are all published on the DEFRA website.

Waste Strategy Board

Mr. Pickles: To ask the Secretary of State for Environment, Food and Rural Affairs who the members of the Waste Strategy Board are; when it has met; and if he will place in the Library a copy of the minutes of the meetings. [221253]

Joan Ruddock: The meeting dates, board members and minutes for the Waste Strategy Board are all published on the DEFRA website.

WALES

Departmental Alcoholic Drinks

David Simpson: To ask the Secretary of State for Wales (1) what purchasing process is used by his Department for the purchase of alcohol for hospitality purposes; [219936]

(2) what measures are in place in his Department to monitor expenditure on alcohol for hospitality purposes. [219586]

Mr. Paul Murphy: For the three receptions that I have hosted this year, limited alcoholic refreshments were provided. For the two receptions in London these were sourced on line. The one reception Cardiff was sourced through the National Assembly for Wales. Expenditure on receptions is recorded and monitored in Wales Office accounts.

Departmental Paper

David Simpson: To ask the Secretary of State for Wales what percentage of paper used *(a)* for photocopying and *(b)* in printed publications by his Department was from recycled sources in each of the last two years. [220731]

Mr. Paul Murphy: In each of the last two years the Wales Office has used 100 per cent., recycled paper for photocopying and printing, and the paper used in our publications, in each of the last two years, has been at least 75 per cent., recycled.

Disabled

Mr. Harper: To ask the Secretary of State for Wales how many and what proportion of staff in his Department are disabled; and what the average salary in his Department is of *(a)* full-time disabled staff, *(b)* full-time non-disabled staff, *(c)* part-time disabled staff and *(d)* part-time non-disabled staff. [220178]

Mr. Paul Murphy: The Wales Office has a few staff with disabilities. For reasons of privacy no details are given, in line with Cabinet Office guidance.

NORTHERN IRELAND

Departmental Alcoholic Drinks

David Simpson: To ask the Secretary of State for Northern Ireland what measures are in place in his Department to monitor expenditure on alcohol for hospitality purposes. [219593]

Paul Goggins: The amount spent on alcohol cannot be separated from other hospitality expenditure except at disproportionate cost.

The Department has specific guidance on the provision of hospitality in accordance with the principles of the "Managing Public Money and the Treasury" handbook on regularity and propriety.

David Simpson: To ask the Secretary of State for Northern Ireland what purchasing process is used by his Department for the procurement of alcohol for hospitality purposes. [219942]

Paul Goggins: The Northern Ireland Office purchases alcohol via contracted suppliers in line with Government procurement rules.

Departmental Marketing

Mr. Philip Hammond: To ask the Secretary of State for Northern Ireland how much his Department and its agencies spent on branding and marketing activity in 2007-08. [212050]

Mr. Woodward: The Northern Ireland Office and its agencies spent £262,784.11 on branding and marketing activity in 2007-08.

Departmental Overtime

Mr. Hoban: To ask the Secretary of State for Northern Ireland how many hours of overtime were worked by staff in each pay grade in his Department in each of the last 12 months. [221237]

Paul Goggins: This information could be provided only at disproportionate cost.

Departmental Sick Leave

David Simpson: To ask the Secretary of State for Northern Ireland (1) how many and what percentage of staff in his Department have had more than two periods of sickness absence of less than five days in each of the last three years; [218711]

(2) how many staff in his Department have had five or more periods of sickness absence of less than five days in two or more of the last five years. [218977]

Paul Goggins: The information requested could be compiled only at disproportionate cost.

Offensive Weapons: Crimes of Violence

Mr. Gregory Campbell: To ask the Secretary of State for Northern Ireland how many people were *(a)* charged and *(b)* convicted of knife-related crime in Northern Ireland in the first six months of (i) 2007 and (ii) 2008. [220158]

Paul Goggins: In answer to *(a)*, the data are not available in the format requested. The following table outlines the number of crimes which involved a knife that were cleared by means of a charge or summons. The data do not record whether the knife was used.

	Cleared by means of charge or summons
January to June 2007	140
January to June 2008	206

Source:
Central Statistics Unit, PSNI

On *(b)*, court conviction datasets do not contain background information in relation to offences committed; it is therefore not possible to identify separately the number of convictions for all offences where a knife was involved. For instance, if a knife was used in murder, this information would not be recorded. Prosecution and conviction data are also collated on the principal offence rule; so only the most serious offence with which an offender is charged is included in the data.

I welcome the recent agreement between the PSNI and the Public Prosecution Service that people caught in possession of a knife in a public place with no reasonable excuse can expect to be prosecuted. The re-launch of the PSNI's knife campaign on 21 July will help to reinforce this message and help to raise awareness of the dangers of knives more generally.

I have recently announced a range of tough new sentencing powers to tackle knife crime. The commencement of provisions in the Criminal Justice Order on 16 July means the maximum penalty for carrying a knife in a public place, including school premises, is now a four year custodial sentence.

I intend to consult on a number of other proposals including a retail licensing scheme, a retail code of practice and a test purchase scheme to enforce the age limit on the sale of knives. All these initiatives will be underpinned by new research to obtain up-to-date local information on the attitude of young people in Northern Ireland to knives.

Official Visits

Lady Hermon: To ask the Secretary of State for Northern Ireland pursuant to the answer of 7 July 2008, *Official Report*, column 1200W, on George W Bush: official visits, whether the cost of £306,000 was drawn from the existing policing budget or whether additional funds were provided. [220604]

Paul Goggins: No additional funding has been made available to the Police Service in respect of the visit by George W. Bush, and costs are charged against existing police budgets.

Olympic Games 2012

David Simpson: To ask the Secretary of State for Northern Ireland what discussions he has had with ministerial colleagues in the last 12 months on securing benefits to Northern Ireland from the 2012 Olympic games. [220549]

Paul Goggins: Since the majority of issues associated with the London 2012 Olympic and Paralympic games are devolved matters in Northern Ireland, the Department for Culture, Arts and Leisure takes the lead for the Northern Ireland Executive in ensuring that it maximises the potential benefits for Northern Ireland that will arise from the 2012 games. They work closely with my right hon. Friend the Minister for the Olympics, the Department for Culture, Media and Sport and the London Organising Committee of the Olympic and Paralympic games.

In addition, my right hon. Friend the Secretary of State sits on the Cabinet sub committee that co-ordinates and oversees issues relating to the London 2012 games.

Police: Finance

Lady Hermon: To ask the Secretary of State for Northern Ireland what the cost of policing in Northern Ireland was in the last year for which figures are available; and what estimate he has made of the average daily cost of policing in each of the last five years. [220391]

Paul Goggins: The latest figures available for the total cost of policing are the annual financial statements for the year ended 31 March 2008.

The following table details the cost of policing for the last five years and the average daily cost for each year.

The figures are calculated using information as published in the annual financial statements and exclude pension accounts, operating income, exceptional items and interest paid.

	2003-04	*2004-05*	*2005-06*	*2006-07*	*2007-08*
Expenditure (£000)	742,134	782,025	770,906	822,100	848,293
Days (Number)	366	365	365	365	366
Average (£000)	2,028	2,143	2,112	2,252	2,318

Prisoners Transfers

Lady Hermon: To ask the Secretary of State for Northern Ireland how many prisoners sentenced in Northern Ireland have been transferred to prisons in *(a)* England and Wales and *(b)* Scotland in each of the last 12 months; and if he will make a statement. [220053]

Paul Goggins: There were three prisoners transferred to prisons in England and Wales in the last 12 months, one in January 2008, one in March 2008 and one in July 2008.

Those prisoners transferred in January and March were transferred to England for assessment under the provisions of the Mental Health Act 1983. Hospital Orders were later issued when they were transferred to secure hospitals in England for treatment. As they have been sectioned under the Mental Health Act 1983, they are no longer classed as Northern Ireland sentenced prisoners.

There were no prisoners transferred to Scotland.

Sexual Offences

David Simpson: To ask the Secretary of State for Northern Ireland how many people in Northern Ireland were *(a)* prosecuted and *(b)* convicted on charges relating to having sexual intercourse with an underage person in each of the last two years; what percentage of these cases resulted in a custodial sentence; and what the average length was of the prison term. [220559]

Paul Goggins: The following table outlines the number of prosecutions and convictions, the percentage of those convicted who received a custodial sentence and the average custodial sentence length (in months) for sexual intercourse with an underage person.

The data cover the calendar years 2005 and 2006 (the latest available years) and are collated on the principal offence rule; so only the most serious offence with which an offender is charged is included.

Number of prosecutions and convictions, percentage of those convicted who received a custodial sentence and the average custodial sentence length (in months) for sexual intercourse with an underage person for 2005 and 2006[1,2]

	2005	*2006*
Prosecutions	8	9
Convictions	7	8
Percentage of those convicted who received a custodial sentence	43	75
Average sentence length (in months)	17	23

[1] Northern Ireland court prosecution and conviction datasets do not contain victim information in relation to offences committed, which means that figures for rape are not included within the analyses.

[2] Data include only those offences which, by their definition, identify a child as the victim: 'unlawful carnal knowledge of a girl under 14 years' and 'unlawful carnal knowledge of a girl under 17 years'.

Young Offenders: Reoffenders

Mark Durkan: To ask the Secretary of State for Northern Ireland how many persons detained in young offenders' centres went on to re-offend following release in each of the last three years; and if he will make a statement. [218587]

Paul Goggins: The information requested is currently only available for 2005 and is shown in the following table.

	Number re-offending within one year	*Total in 2005 cohort*
Juvenile Justice Centre	26	38
Young Offenders Centre	14	17

These figures are drawn from the NIO Statistical and Research Bulletin 7/2008 'Northern Ireland re-offending: results from the 2005 cohort', which is the first analysis of re-offending behaviour in Northern Ireland. Previous analyses have been limited to the measure of reconviction and are thus incomparable to re-offending rates.

It is anticipated that an analysis of 2006 youth re-offending rates will be published in early 2009.

CULTURE, MEDIA AND SPORT

Alcoholic Drinks

Helen Southworth: To ask the Secretary of State for Culture, Media and Sport what research he has *(a)* conducted and *(b)* evaluated on the relationship between (i) alcohol prices and (ii) alcohol promotions in licensed premises and the excessive consumption of alcohol; and if he will make a statement. [219652]

Dawn Primarolo: I have been asked to reply.

I refer the hon. Member to the answer I gave to the hon. Member for Hemsworth (Jon Trickett) on 18 June 2008, *Official Report*, column 1019W.

Cultural Heritage

Mr. Pickles: To ask the Secretary of State for Culture, Media and Sport how many and what proportion of the properties on the English Heritage At Risk Register are in public ownership. [221651]

Margaret Hodge: Nationally, 149 (15 per cent.) Grade 1 and Grade 2 Star listed buildings on the English Heritage, Heritage at Risk Register are in public ownership.

In London, where Grade 2 listed buildings at risk are included on the Heritage At Risk Register in addition to Grade 1 and Grade 2 Star buildings, the percentage of publicly owned buildings is 21 per cent.

Cultural Leadership Programme

Mr. Hunt: To ask the Secretary of State for Culture, Media and Sport how much the Cultural Leadership Programme spent on administration in each of the last three years. [221046]

Margaret Hodge: The Cultural Leadership Programme has provided the following figures for the amount spent on administration, defined as research and project management and not including staffing, in each of the last three years:

	£
2005-06	—
2006-07	70,000
2007-08	235,000

Departmental Buildings

Mr. Hoban: To ask the Secretary of State for Culture, Media and Sport which organisations have received *(a)* free and *(b)* discounted room hire from (i) his Department and (ii) its agencies in each of the last five years; and what the commercial value of the discount was in each case. [221586]

Mr. Sutcliffe: The Department does not hold this information; neither does its agency The Royal Parks.

Departmental Conferences

Mr. Hoban: To ask the Secretary of State for Culture, Media and Sport what the *(a)* scheduled date and *(b)* title was of each conference proposed to be hosted by his Department and its agency which was cancelled before taking place in each of the last 10 years; and what costs were incurred in respect of each. [215179]

Margaret Hodge: The Royal Parks Agency has confirmed it has not cancelled any conferences in the last 10 years.

DCMS does not keep a central record of the information requested and this could be provided only at disproportionate cost.

Departmental ICT

Mr. Philip Hammond: To ask the Secretary of State for Culture, Media and Sport what information technology projects initiated by his Department have been cancelled prior to completion in the last five years; and what the cost of each such project was to the public purse. [221714]

Mr. Sutcliffe: My Department has not cancelled any information technology projects prior to completion in the last five years.

Departmental Information Officers

Mr. Hoban: To ask the Secretary of State for Culture, Media and Sport what the average cost to his Department was of employing a press and media officer in 2007-08. [215195]

Mr. Sutcliffe: Press and media officers in the Department for Culture, Media and Sport operate at two salary levels. The average salaries (which include a specialist allowance of £4,000) as at the 31 March 2008 are shown in the table.

	Pay band	£ *Average press/media officer salary*
Grade A	42,770-52,985	49,343
Grade B	27,560-35,335	33,218

In addition to salary there are other employer costs such as employer's pension; employer's national insurance costs, overtime payments and overheads.

Note:

"Press and media officers" have been defined as the frontline staff dealing with the media. Support staff and staff whose main job is more of a management role, such as "Head of News" are excluded.

Departmental Paper

David Simpson: To ask the Secretary of State for Culture, Media and Sport what percentage of paper used *(a)* for photocopying and *(b)* in printed publications by his Department was from recycled sources in each of the last two years. [220729]

Mr. Sutcliffe: In each of the last two years the Department has used 100 per cent. paper from recycled sources for its photocopying. In printed publications the Department uses stock that has a minimum recycled content of 50 per cent. This stock also carries FSC certification, which guarantees that the virgin fibre comes from well managed sustainable sources.

Departmental Press

Mr. Hoban: To ask the Secretary of State for Culture, Media and Sport how much was spent by his Department on subscriptions for magazines, newspapers and other publications in each of the last 24 months. [215213]

Margaret Hodge: The information in the following table represents expenditure incurred by the Department's Library and Information Centre on subscriptions for hard copy and online magazines, newspapers, books and other publications, access to specific research databases, the Stationery Office and other parliamentary information sources as well as legal online and hard copy updating services.

Increases in the monthly expenditure for the end of financial year 2006-07 and the beginning and end of financial year 2007-08 are due to the renewal of a number of annual subscriptions.

	£
June 2006	12,076.12
July 2006	6,914.55
August 2006	13,833.71
September 2006	10,921
October 2006	3,714.15
November 2006	19,359.08
December 2006	12,971.34
January 2007	7,759.70
February 2007	29,825.98
March 2007	39,513.60
April 2007	58,792.60
May 2007	11,338.37
June 2007	7,333.86
July 2007	14,334.99
August 2007	4,604.08
September 2007	16,361.33
October 2007	34,415.62
November 2007	14,563.60
December 2007	12,609.01
January 2008	18,976.62
February 2008	10,373.05
March 2008	36,383.02
April 08	46,785.46
May 2008	3,004.00

Please note the 2008-09 figures have yet to be audited and are therefore subject to change.

Departmental Research

Bob Spink: To ask the Secretary of State for Culture, Media and Sport what proportion of his Department's budget was used for research within its areas of responsibility in each of the last 10 years. [218066]

Mr. Sutcliffe: The proportion of the administration and programme (Request for Resources 1) budget used for research by the Department is set out in the following table.

Financial year	*Percentage of budget used for research*
1998-99	0.048
1999-2000	0.113
2000-01	0.094
2001-02	0.091
2002-03	0.041
2003-04	0.024
2004-05	0.024
2005-06	0.125
2006-07	0.196
2007-08	0.167

Departmental Responsibilities

Mr. Hoban: To ask the Secretary of State for Culture, Media and Sport which projects his Department has commissioned from *(a)* think tanks and *(b)* charities in each of the last two years for which figures are available; what the aim of each project was; which think tank or charity was commissioned; and how much was paid. [221611]

Margaret Hodge: It is not possible to disaggregate the information from the relevant DCMS databases therefore the information requested could be provided only at disproportionate cost.

Departmental Secondment

John McDonnell: To ask the Secretary of State for Culture, Media and Sport how many staff in his Department were *(a)* on loan from other Government Departments, *(b)* on loan from other organisations, *(c)* on secondment from other Government Departments and *(d)* on secondment from other organisations in each of the last five years, broken down by pay band. [221493]

Mr. Sutcliffe: In the Department for Culture, Media and Sport the number of staff by pay band/grade on loan from other Government Departments in each of the last five years *(a)* is shown in Table 1. There were no loans from other organisations *(b)*.

Table 1: Loans from other Government Departments

	31 March each year				
	2004	*2005*	*2006*	*2007*	*2008*
SCS	6	3	4	5	5
A(U) (Gd6)	2	3	4	5	4
A (Gd7)	15	15	17	12	15
HEOD	4	2	3	3	1
B (HEO)	40	32	44	40	34
C(EO)	12	24	28	40	30
D (AO/AA)	15	14	23	16	7
Total	94	93	123	121	96

There were no staff on secondment from other Government Departments *(c)*. The number of staff on secondment from other organisations by pay band/grade during the last five years *(d)* is shown in Table 2.

Table 2: Inward secondments

	1 April each year				
	2004	*2005*	*2006*	*2007*	*2008*
SCS	—	—	2	1	—
A(U) (Gd6)	—	—	—	—	—
A (Gd7)	4	4	—	1	—
HEOD	—	—	—	—	—
B (HEO)	5	6	5	2	2
C(EO)	5	2	2	1	2
D (AO/AA)	—	1	2	2	1
Total	14	13	11	7	5

Departmental Vetting

Jenny Willott: To ask the Secretary of State for Culture, Media and Sport what procedures his Department follows for checking the criminal records of employees; and if he will make a statement. [213125]

Mr. Sutcliffe: The Department for Culture, Media and Sport follows the HMG Baseline Personnel Security Standard which includes a verification of unspent criminal records. The Defence Vetting Agency arranges for a 20 per cent. check of the successful applicants on our behalf. This will increase to 100 per cent. from 1 October 2008.

Digital Broadcasting

Mr. Charles Kennedy: To ask the Secretary of State for Culture, Media and Sport what plans he has to assist households unable to receive satellite and terrestrial television signals after the digital switchover has taken place. [218130]

Andy Burnham: Digital terrestrial television (DTT) coverage is planned to reach 98.5 per cent. of households—the same as pre-switchover analogue terrestrial coverage reception. Digital satellite services are available now to 98 per cent. of UK households.

Ofcom are continuing planning work with a view to minimising the number of viewers predicted to have poor or no coverage after switchover. The switchover in Selkirk that begins in November may help us to assess whether this is a significant issue. For those households unable to receive DTT or satellite services, specific advice is available from Digital UK on alternative platforms available to them.

Lost Working Days

Mr. Hayes: To ask the Secretary of State for Culture, Media and Sport how many working days have been lost due to industrial action by employees for which his Department is responsible in each year since 1997. [218053]

Mr. Sutcliffe: Information is only available for the last five years and is shown in the table.

Calendar year	*Days lost*
2004	120
2005	—
2006	—
2007	176.5

Note:
In March 2008, 52 staff took two hours industrial action and in April 2008, 44 staff took two hours industrial action by walking out.

Olympic Games

Mr. Don Foster: To ask the Secretary of State for Culture, Media and Sport pursuant to the Answer of 2 June 2008, *Official Report*, columns 613-4W, on the Olympic Games, what estimate he has made of the cost of Ministers and officials from his Department attending the Beijing Olympic Games. [219475]

Mr. Sutcliffe: All ministerial travel is undertaken in accordance with the Ministerial Code and Travel by Ministers, and travel by DCMS officials is undertaken in accordance with the requirements of the Civil Service Management Code, copies of which are available in the Library.

DCMS has endeavoured to ensure the best possible price for travel and accommodation to the Olympic Games. Officials attending the Observer Programme and those from the DCMS Press Office have arranged these through LOCOG to achieve this.

Sports: Finance

Hugh Robertson: To ask the Secretary of State for Culture, Media and Sport what consultations the Big Lottery Fund undertakes with Sport England before making grants for sport-related activities; and if he will make a statement. [220510]

Mr. Sutcliffe *[holding answer 21 July 2008]:* The Big Lottery Fund has advised that Big and Sport England liaise frequently on matters of mutual interest, including Big's sport related programmes.

The knowledge and expertise of Sport England, working in partnership with Big on its New Opportunities in PE and Sport programme, has been vital in ensuring the programme is a success. Big (and its predecessor body, the New Opportunities Fund) and Sport England have also worked jointly to fund programmes and projects when it is felt that they can support each other to meet each organisation's objectives, including the Active England and Awards For All programmes and the Active Places database of sports facilities.

Sports: Private Sector

Hugh Robertson: To ask the Secretary of State for Culture, Media and Sport what progress has been made in raising the £100 million for elite sport from the private sector announced in the 2006 Budget; and if he will make a statement. [218345]

Andy Burnham *[holding answer 14 July 2008]:* The Department has made progress in developing a range of proposals to raise private sector sponsorship to support the elite programme. We are in detailed discussions with a number of interested parties about the precise nature and scope of a national sponsorship scheme to help our athletes prepare for London 2012.

This week we have appointed Fast Track Sales as our official fund-raising partner.

I will make a further announcement next month.

UNESCO Convention on Protection of Underwater Cultural Heritage

Mr. Andrew Smith: To ask the Secretary of State for Culture, Media and Sport what consultation he has undertaken on the ratification of the UNESCO Convention on the Protection of the Underwater Cultural Heritage. [220611]

Margaret Hodge *[holding answer 21 July 2008]:* We are in regular discussion with the historic environment community and other Government Departments that have an interest in this and other issues but there has been no formal public consultation on this subject. The position of the Government in respect of ratification is kept under constant review.

LEADER OF THE HOUSE

Departmental Delivery Services

Mr. Hoban: To ask the Leader of the House what steps her office has taken to monitor the cost of its mail services in the last 12 months. [221489]

Ms Harman: Monitoring the cost of mail services for the office of the Leader of the House of Commons is handled by the Cabinet Office. Mail services are provided by the Cabinet Office's facilities management providers who decide the most economical method of sending mail externally, unless instructed by the customer to use a specific service, e.g. recorded or special delivery.

Public Sector: Pay

Mr. Burstow: To ask the Leader of the House what the median relevant increase for the public sector groups which will in future be used in the uprating formula for the salaries of hon. Members was in each of the last 10 years. [217714]

Helen Goodman: The information requested is not easily obtainable within the normal timescales for answering written parliamentary questions. I will write to the hon. Member with the information shortly.

Substantive answer from Helen Goodman to Paul Burstow:

I promised to write in response to your Parliamentary Question of 9 July asking "what the median relevant increase for the public sector groups which will in future be used in the uprating formula for the salaries of hon. Members was in each of the last 10 years."

In order to determine the median relevant increase for the last 10 years data needed to be gathered from a range of Government Departments and this led to the slight delay in responding.

The median increase for the public sector groups which will in future be used in the uprating formula for hon. Member's salaries in each of the last 10 years is as set out below:

	Percentage
2008	2.25
2007	2.5
2006	3.0
2005	2.8
2004	2.9
2003	3.6
2002	3.6
2001	3.275
2000	3.3
1999	3.5

I hope that this is helpful.

I am placing a copy of this letter in the House of Commons Library.

Redundancy Pay

Lynne Jones: To ask the Leader of the House what redundancy package is available for hon. Members' staff; what the reasons are for its provisions; and if she will make a statement. [221265]

Helen Goodman: Members' staff contracts specify that individuals who are made redundant qualify for payment in accordance with the statutory requirement, an amount which is based on age and length of service. Such payments are subject to a minimum of two years continuous employment.

In addition to the basic contractual entitlement, Members have the discretion to make a matching redundancy payment to staff from their Staffing Allowance or from the Winding Up Allowance made available to them on leaving the House.

For Members who leave at a general election, or who stand down at other times, any contractual redundancy payment is charged to central funds and not parliamentary allowances.

Members who choose to restructure their offices during a Parliament, and in the process make staff redundant, must fund redundancy payments from their parliamentary allowances.

These arrangements were approved by the Members Estimate Committee after discussion by the Advisory Panel on Members' Allowances.

TRANSPORT

Aircraft

Norman Baker: To ask the Secretary of State for Transport what aircraft types are used for scheduled domestic passenger flights in the UK; and what the passenger capacity is of each. [219752]

Jim Fitzpatrick *[holding answer 17 July 2008]:* A table showing the aircraft types used for scheduled domestic passenger flights in the UK in 2007 and their passenger capacity (based on average seats per flight) has been placed in the Libraries of the House.

The data have been provided to the Department by the Civil Aviation Authority (CAA); they are not published by the CAA.

Norman Baker: To ask the Secretary of State for Transport what aircraft types are used for scheduled domestic passenger flights in the UK; and what distance was travelled on such flights by each aircraft of each type in each of the last three years. [219962]

Jim Fitzpatrick *[holding answer 21 July 2008]*: Tables showing the aircraft types used for scheduled domestic passenger flights in the UK in 2005, 2006 and 2007 and the distance travelled by each have been placed in the Library of the House.

The data have been provided to the Department by the Civil Aviation Authority (CAA); they are not published by the CAA.

Aviation: Carbon Emissions

Mrs. Villiers: To ask the Secretary of State for Transport what estimate she has made of the likely effect of including aviation in the EU Emissions Trading Scheme on carbon dioxide emissions from UK aviation. [218790]

Jim Fitzpatrick: The European Parliament has just voted in favour of including aviation into the EU Emissions Trading Scheme in January 2012.

This means that CO_2 emissions from EU aviation covering all departing and arriving flights will be capped at 97 per cent. of average 2004-06 emissions in 2012 and tightening to 95 per cent. in 2013, and that any emissions above these levels will have to be matched through abatement by aviation or reductions made elsewhere.

Biofuels

Mr. Drew: To ask the Secretary of State for Transport what discussions she *(a)* has had and *(b)* plans to have with the British biofuels industry on the implications of the Gallagher review. [220060]

Jim Fitzpatrick: A number of stakeholders from the British biofuels industry made detailed submissions to Professor Gallagher's team during the course of the review, and these were taken carefully into account. Industry representatives also participated in the stakeholder workshop at which the initial findings from the background studies were discussed, and at the 9 July seminar at which Professor Gallagher presented his findings.

The Department has had and will continue to have regular discussions with representatives from the British biofuel industry, both at official and ministerial level. The Gallagher review's findings and the Government's response to them will feature prominently in these discussions over the months ahead.

The Government have stated that they intend to consult formally on slowing down the rate of increase in the renewable transport fuel obligation, taking the level to 5 per cent. (by volume) by 2013-14, in line with Professor Gallagher's recommendation. This consultation is likely to commence later in the year, and the responses from the British biofuel industry will be taken carefully into account.

Mr. Tyrie: To ask the Secretary of State for Transport what account the Gallagher Review of biofuels took of *(a)* the sources of biofuels used in the UK and EU, *(b)* the size and status of the biofuels industry in the UK and EU, *(c)* the size and impact of US, UK and EU subsidies for biofuel production in relation to imports of US biofuels to the UK and EU and *(d)* current and projected levels of UK and EU subsidies for biofuel production in the UK and EU. [221441]

Jim Fitzpatrick: The Gallagher review focused on the potential impacts of likely global demand for biofuels in 2020, rather than on the dynamics of specific regional biofuel markets. As part of this, it took account of matters such as the different types of biofuel feedstocks likely by 2020 to be used in different regions (including the EU, USA and China), and the different land requirements and impacts of these feedstocks. Matters such as current and projected levels of subsidies for biofuels and the impact these might have on different markets were outside the scope of the review. The Gallagher review and the studies underpinning it are available via the Renewable Fuels Agency's website at:

http://www.dft.gov.uk/rfa/.

Departmental Alcoholic Drinks

David Simpson: To ask the Secretary of State for Transport what measures are in place in her Department to monitor expenditure on alcohol for hospitality purposes. [219588]

Jim Fitzpatrick: The Department's guidance on hospitality does not encourage expenditure on or consumption of alcohol. Where it is demonstrated that alcohol is to be consumed in context of a particular event and in conjunction with food, express permission from a senior manager is required.

David Simpson: To ask the Secretary of State for Transport what purchasing process is used by her Department for the procurement of alcohol for hospitality purposes. [219938]

Jim Fitzpatrick: The Department does not encourage expenditure on or consumption of alcohol in relation to hospitality. Therefore there are no specific processes for the purchase of alcohol, other than those provided in Managing Public Money and the Treasury handbook on Regularity and Propriety.

Departmental Telephone Services

Matthew Taylor: To ask the Secretary of State for Transport how much revenue her Department received from the 0870 driver inquiry line in the last financial year; and how much it cost her Department to administer the service in that period. [221681]

Jim Fitzpatrick: For the financial year 2007-08 the rebate (revenue) received from the DVLA 0870 driver inquiry line was £687,638.18. The full staff cost (to cover the 177 staff members involved) of administering this particular 0870 service during 2007-08 was £3,389,288.00.

Departmental Written Questions

Stephen Hammond: To ask the Secretary of State for Transport what estimate she has made of the average time her Department has taken to respond to parliamentary questions for written answer in each of the last eight quarters. [219525]

Jim Fitzpatrick: The information requested is contained in the following table:

	Average number of working days to respond
2006	
Quarter 3	
1 July-30 September	4.27
Quarter 4	
1 October-31 December	3.77
2007	
Quarter 1	
1 January-31 March	4.26
Quarter 2	
1 April-30 June	2.99
Quarter 3	
1 July-30 September	2.77
Quarter 4	
1 October-31 December	4.41
2008	
Quarter 1	
1 January-31 March	6.22
Quarter 2	
1 April-30 June	5.19

Driving Under the Influence

Mr. Jim Cunningham: To ask the Secretary of State for Transport what recent steps the Government have taken to reduce levels of drink-driving. [221334]

Jim Fitzpatrick: I refer my hon. Friend to the answer I gave him on 13 June 2008, *Official Report*, column 541W.

Heathrow Airport

Mrs. Villiers: To ask the Secretary of State for Transport what discussions she had with BAA on landing charges at an expanded Heathrow in the six months before the publication of the "Adding Capacity at Heathrow" consultation document. [218795]

Jim Fitzpatrick: The Secretary of State for Transport has held regular meetings with BAA, including during the six months before the publication of the "Adding Capacity at Heathrow Airport" consultation document. These have covered a range of issues pertinent to BAA airports including Heathrow. Landing charges at an expanded Heathrow airport would be a matter for BAA and CAA, and were not discussed at these meetings.

Lorries

Mr. Roger Williams: To ask the Secretary of State for Transport what estimate she has made of the number of lorries regularly travelling on road in England which were registered *(a)* to British companies and *(b)* foreign companies in each of the last three years. [221197]

Jim Fitzpatrick: The Department does not hold statistics on the number of lorries regularly travelling on roads in England.

However, the numbers of vehicles licensed within the heavy goods vehicle tax class and registered to keepers in England in each of the last three years were as follows:

Year end	Number of licensed heavy goods vehicles registered in England (Thousand)
2005	374
2006	382
2007	383

The Department does not hold statistics on the number of foreign registered lorries being used on England's roads but will publish estimates of the proportion of traffic accounted for by foreign registered vehicles on 24 July 2008.

Lorries: Driving Offences

Paul Flynn: To ask the Secretary of State for Transport how many drivers' hours offences were detected in *(a)* 2005, *(b)* 2006 and *(c)* 2007; and what proportion of these were committed by drivers of left-hand drive heavy goods vehicles. [220545]

Jim Fitzpatrick: The Vehicle and Operator Services Agency (VOSA) does not record whether an HGV is left or right-hand drive.

It would seem reasonable that the majority of Foreign Heavy Goods Vehicles (HGVs) are left-hand drive, except for those from the Republic of Ireland.

Financial Year	Prohibited for drivers' hours, tachograph and records	Of which: Eire vehicles
2007-08		
UK	7,339	—
Foreign	7,329	2,310
Total	14,668	—
2006-07		
UK	4,901	—
Foreign	6,376	1,040
Total	11,277	—
2005-06		
UK	6,182	—
Foreign	4,403	1,578
Total	10,585	—

Lorries: Exhaust Emissions

Mr. Roger Williams: To ask the Secretary of State for Transport what assessment she has made of the effects of a *(a)* particulate and *(b)* carbon dioxide emissions limit on the fuel efficiency of lorries. [221196]

Jim Fitzpatrick: Where the particulate emissions limit is sufficiently strict as to oblige manufacturers to use a diesel particulate filter, as the future Euro VI standard proposed by the European Commission may be, the associated fuel consumption penalty would be likely to be between 2 and 3 per cent. if no offsetting improvements to engine or vehicle technology were made.

In principle, because carbon dioxide is a direct consequence of the combustion of hydrocarbon fuels, the imposition of a carbon dioxide emissions limit for lorries would, if it were lower than the current average emissions rate, reduce fuel consumption proportionately. The imposition of a carbon dioxide emission limit for lorries would be technically very difficult and deliver limited environmental benefits.

M3

Mr. Arbuthnot: To ask the Secretary of State for Transport what estimate she has made of the maximum traffic capacity of the M3 motorway between *(a)* junctions 4-4A and *(b)* junctions 4A-5. [221656]

Mr. Tom Harris: As a rural dual three-lane motorway, the estimated maximum sustainable traffic capacity of the M3 motorway between *(a)* junctions 4-4A and *(b)* junctions 4A-5 is 67,000 vehicles per carriageway per day.

The recently published Highways Agency Regional Network Report for the south-east includes observed stress maps which compare traffic capacity with daily traffic flow. A copy of this report will be placed in the House of Commons Library.

For this section of the M3, the observed stress map shows that using 2006 information, the daily stress value is 100 to 110 per cent. A value of over 100 per cent. means that the road is busy during more than just the morning and evening peak hours.

M6: Accidents

Mr. Jim Cunningham: To ask the Secretary of State for Transport (1) what steps the Government have taken to reduce the number of serious car accidents on the M6; [219980]

(2) what steps the Government have taken to improve the safety of junctions on the M6. [219981]

Mr. Tom Harris: The Highways Agency continually monitors and studies safety on the M6 and all other routes for which it is responsible.

Over the last five years, it has completed over 25 improvements to the M6 motorway at various locations along its approximately 230-mile length to enhance safety both on the motorway and at junctions.

These improvements include: junction widening, signalisation of junctions, the use of high-friction surfacing, better road markings and an innovative technique developed to manage traffic on slip-roads, known as Ramp Metering.

Further safety improvements continue to be identified and will be implemented as part of the steps to address the 2010 casualty reduction targets.

Mr. Jim Cunningham: To ask the Secretary of State for Transport what steps the Government plan to take to reduce the number of serious car accidents at the Catthorpe junction on the M6. [219982]

Mr. Tom Harris: The Highways Agency (HA) has already completed a number of interim measures to improve safety at this junction.

In March 2007, the hard shoulder of the M6 to M1 slip-road was converted to a running lane. Additional signs were installed on the M6 to give advance warning to motorists of queuing traffic and yellow box markings and 'merge in turn' signs were installed at the junction itself, to help regulate traffic movements.

Currently the HA is investigating significant further measures for longer term improvement, and a number of options are currently under public consultation. Subject to the necessary statutory processes being completed and the availability of funding, work could start in summer 2011.

Motorways

Bob Spink: To ask the Secretary of State for Transport what the average cost per mile of widening motorway carriageways by one lane was in each of the last 10 years. [220722]

Mr. Tom Harris: The following table lists the average cost per mile at 2008 prices of widening existing motorways by one lane, provided by publicly funded major schemes, for each of the last 10 years.

	Number of projects	*Cost per lane mile in 2008 prices (£ million)*
1998-99	0	0.0
1999-2000	0	0.0
2000-01	0	0.0
2001-02	1	63.5
2002-03	0	0.0
2003-04	1	24.8
2004-05	1	4.0
2005-06	3	12.0
2006-07	3	10.3
2007-08	1	5.5

Railway Network

Mr. Don Foster: To ask the Secretary of State for Transport what the budget of her Department's Rail Group was in each of the last five years. [221230]

Mr. Tom Harris: Government expenditure on rail between 2002-03 and 2007-08 along with spending plans for 2008-09 and 2009-10 is set out the Department for Transport annual report. A copy of the relevant table is reproduced as follows:

	Outturn						*Estimated outturn*	*Plans*	
	2001-02	*2002-03*	*2003-04*	*2004-05*	*2005-06*	*2006-07*	*2007-08*	*2008-09[1]*	*2009-10[1]*
Net Direct Support for Passenger Rail Services	738	930	[2]1,225	878	813	847	684	449	(250)
Grants to PTEs	214	245	294	277	199	313	310	323	329

	Outturn						Estimated outturn	Plans	
	2001-02	2002-03	2003-04	2004-05	2005-06	2006-07	2007-08	2008-09[2]	2009-10[2]
Direct Grants to Network Rail	499	1792	1,448	2,058	1,984	[3]3,103	3,154	3,224	3,066
CTRL Grants	342	1,362	1,295	312	385	102	154	88	90
Freight Grants[4]	57	49	32	26	5	0	0	0	0
Other[5]	273	390	394	296	104	84	72	74	76
Total	2,194	3,768	4,688	3,847	3,490	4,449	4,374	4,158	3,311

[1] Total expenditure and the mix between support for passenger rail services and direct grants to Network Rail may be subject to revision as part of the regulatory review into Network Rail's income which is currently being conducted by the Office of Rail Regulation.
[2] Figure includes £700 million paid directly to train operating companies that was subsequently deemed to be in respect of capital investment undertaken by Network Rail.
[3] Figure includes a grant payment of £300 million to Network Rail to facilitate the purchase of Railtrack.
[4] From 2006-07 onwards responsibility for paying grants to Network Rail for the rail network in Scotland has been transferred to Scottish Ministers. Spending plans in this table from 2006-07 onwards are in respect of the English and Welsh elements of the railway.
[5] Responsibility for the payment of Freight Grants transferred from the SRA to Logistics Division in DfT on 26 June 2005. The figure in this table shows spending by the SRA prior to that transfer.
[6] Figures include payments in respect of rail industry pensions, external costs in connection with specifying and procuring rail franchises and in managing rail projects and payments to the British Transport Police, the Rail Passengers Council, the Rail Heritage Committee and British Rail (Residuary) Ltd.

Note:
Prior to 2004-05 expenditure relates to spending by the Strategic Rail Authority (SRA) and the Department for Transport. During 2005-06 the functions and spending of the Strategic Rail Authority (SRA) were progressively transferred to the Department for Transport in accordance with the Railways Act 2005. This table represents the combined spending of the SRA and its predecessor bodies, the DfT Rail Directorate prior to the relevant parts of the Railways Act being commenced and the new DfT Rail Group. From 2006-07 onwards figures show planned spending by DfT.

Mr. Don Foster: To ask the Secretary of State for Transport what the staffing costs of her Department's Rail Group were in each of the last five years. [221434]

Mr. Tom Harris: Prior to 2004-05 the vast majority of public sector staff costs in connection with the railway were expended by the Strategic Rail Authority (SRA). During 2005-06 the functions of the SRA were progressively transferred to the Department for Transport's Rail Group. The following figures show staff costs of the Rail Group following the transfer of those functions.

	£ million
2007-08	21.4
2006-07	17.2
2005-06	11.7

Railway Network: Manpower

Mr. Don Foster: To ask the Secretary of State for Transport how many full-time equivalent members of staff *(a)* her Department and *(b)* public bodies her Department is responsible for employ on tasks related to the railway; how many of those work on (i) project management, (ii) project oversight and (iii) financial oversight; and what plans she has for future staffing. [221515]

Mr. Tom Harris: The National Networks Group have 336 full-time equivalent members of staff; of this number, 70 are employed in project management and project oversight and 58 are employed on financial oversight. Plans for future staffing will be agreed in next year's round of business planning beginning October 2008.

Road Signs and Markings: Tourism

David Wright: To ask the Secretary of State for Transport (1) what plans she has to review provisions for signage to tourist attractions on major highways; [218196]

(2) if she will consider introducing special highway signage to indicate UK World Heritage sites. [218198]

Ms Rosie Winterton: There are no plans to review national policy for signing to tourist attractions on major highways. The Department is, however, currently considering the scope of its planned general review of traffic signs policy.

There is a range of prescribed signs to tourist destinations including places of architectural or historical interest, and sporting and leisure facilities. It is also open to highway authorities to apply for authorisation to place non-prescribed tourist signs on the public highway. Any such applications are considered strictly on a case-by-case basis; and every effort is made to accommodate the needs of tourist industry stakeholders while ensuring that safety and traffic management needs are not compromised.

Roads: Noise

Mrs. Maria Miller: To ask the Secretary of State for Transport what guidance she gives to local authorities on the use of low-noise road surfaces. [221494]

Ms Rosie Winterton: I refer the hon. Member to the answer given on 2 July 2008, *Official Report*, column 926W.

Roads: Repairs and Maintenance

Mrs. Maria Miller: To ask the Secretary of State for Transport how much the Highways Agency received for the maintenance of trunk roads in the last year for which figures are available. [221498]

Mr. Tom Harris: The Highways Agency received an allocation of £896 million in 2008-09 for maintenance of the Strategic Road Network.

Mrs. Maria Miller: To ask the Secretary of State for Transport how much local authorities received for the maintenance of principal roads in the last year for which figures are available. [221499]

Ms Rosie Winterton: The Department provides capital funding for highways maintenance to English local authorities (outside London) through the Local Transport Plan settlement. For the year 2007-08 £682.983 million was provided. In November 2007, I announced funding

of £703.209 million for 2008-09; £755.617 million for 2009-10; and £808.617 million for 2010-11. Local authorities can also use Revenue Support Grant provided by CLG. Neither funding is ring-fenced, and sums are not separately identified for different classes of road. The management of local roads is a matter for each local highway authority, based upon their local priorities. Funding for highways in London is a matter for the Mayor.

Transport: Costs

Norman Baker: To ask the Secretary of State for Transport what estimate she has made of the percentage change in real terms of the cost of travelling by *(a)* private car, *(b)* bus and *(c)* train since (i) 1979 and (ii) 1997; and what estimate she has made of the proportion of average disposable income represented by such costs in each case in each year. [208983]

Ms Rosie Winterton *[holding answer 10 June 2008]:* The following table shows the percentage change in real terms of the cost of travelling by car, bus and train since 1979 and 1997 compared to 2007 in the UK.

	Percentage	
	(i) 1979 to 2007	*(ii) 1997 to 2007*
(a) Private car	-10	-8
(b) Bus	+49	+13
(c) Train	+44	+5

Source:
Retail Price Index (Annual) – Office for National Statistics

The changes are against a background of an increase in disposable income of 105 per cent. between 1979 and 2007 and 27 per cent. between 1997 and 2007. The decline in the real-term cost of travelling by car reflects the significant impact of the decline in real-terms cost of purchasing a vehicle.

While the cost of motoring has fallen in real terms, the overall UK expenditure on motoring has increased over this period as, the estimated number of cars per household has increased from 0.75 in 1979, to 1.02 in 1997 and 1.15 in 2006.

According to the available data from the Expenditure and Food Survey carried out by the Office for National Statistics, motoring costs were 10 per cent. of household disposable income in 1978, 14 per cent. in 1997-98 and 12 per cent. in 2006.

Fares and other travel costs were 3 per cent. of household disposable income in 1978, 2 per cent. in 1997-98 and 2 per cent. in 2006.

Transport: Fuels

Norman Baker: To ask the Secretary of State for Transport what assumptions her Department has made in respect of the price of carbon for the purposes of the appraisal of *(a)* road and *(b)* rail schemes; what account she takes of the (i) EU trading price of carbon, (ii) value of carbon ascribed by Nicholas Stern and (iii) notional figure required to achieve a 60 per cent. cut in carbon dioxide emissions by 2050 in such appraisals; and if she will make a statement. [218814]

Jim Fitzpatrick *[holding answer 14 July 2008]:* The Department recommends all appraisals use the Department for Environment, Food and Rural Affairs' shadow price of carbon (SPC) when valuing greenhouse gas emissions. These estimates are used across Government appraisals and, in transport, across the different types of intervention.

DEFRA's resent release—"The Social Cost of Carbon and the Shadow Price of Carbon: What they are, and how to use them in Economic Appraisal in the UK"—documents the assumptions underpinning the current estimate and the approach used in its calculation. It is conceptually different to the market price for carbon, so the EU trading price of carbon does not enter into DEFRA's assessment.

Carbon impacts will vary depending on the greenhouse gas concentration trajectory the world is on. If emissions fail to fall at the rates targeted, the higher will be the trajectory for carbon concentrations and the more damage from climate change. The SPC calculation undertaken by DEFRA is based on Nicholas Stern's analysis of this aspect.

Transport: Nuclear Fuels

Norman Baker: To ask the Secretary of State for Transport what discussions she has had with L'Autorité de sûreté nucléaire (ASN) on its refusal to give further authorisations for plutonium shipments from Sellafield to the Areva plant at La Hague following receipt of a consignment of UK plutonium from Sellafield on 21 May; and what steps have been taken in response to the issues highlighted by ASN. [220204]

Jim Fitzpatrick: As a result of discussion between this Department and L'Autorité de sûreté nucléaire (ASN) regarding the shipment of plutonium by Sellafield Ltd in May, and our subsequent investigations, we took regulatory action to prevent further shipments of plutonium from Sellafield in the same manner. ASN has not itself taken any regulatory action.

Sellafield Ltd has appealed the action. Until that appeal process is concluded Sellafield Ltd is prohibited from making any further shipments of this type of plutonium in the same manner.

Transport: Pressure Groups

Norman Baker: To ask the Secretary of State for Transport on how many occasions Ministers and officials from her Department have met representatives of *(a)* Hacan ClearSkies, *(b)* Plane Stupid, *(c)* Greenpeace and *(d)* Friends of the Earth since January 2006. [218815]

Jim Fitzpatrick *[holding answer 14 July 2008]:* I met with a number of representatives from environmental groups, including Greenpeace and Friends of the Earth, on 11 July 2007. My right hon. Friend the Secretary of State met a number of representatives from this list on 10 September 2007, and met with Greenpeace on 21 February 2008 and 10 September 2007. The then Secretary of State (the right hon. Member for Paisley and Renfrewshire, South) met with Greenpeace on 28 June 2006 and his predecessor, the right hon. Member for Edinburgh, South-West, met with environmental groups including Greenpeace and Friends of the Earth on 2 June 2006.

In addition, I met with a range of environmental and special interest groups, including all of those listed above, on 21 November 2007 in connection with the Department's consultation on adding capacity at Heathrow.

Officials meet representatives from environmental groups, including Friends of the Earth and Greenpeace, regularly, for example in meetings of the External Advisory Group on the Air Transport White Paper, or on an ad hoc basis to discuss specific issues. Officials also regularly meet with representatives of Hacan ClearSkies at the bi-monthly Heathrow Airport Consultative Committee meetings of which Hacan is a member.

West Coast Railway Line

Mr. Lancaster: To ask the Secretary of State for Transport if she will make it her policy to ensure that the 25 milestones agreed by the Office of Rail Regulation with Network Rail to monitor the progress towards the December delivery of the West Coast upgrade, will be reported on more than twice before December. [221311]

Mr. Tom Harris: The Office of Rail Regulation is responsible on a quarterly basis for reporting the progress made by Network Rail in their delivery of the West Coast Main Line upgrade.

In its Network Rail Monitor for 2007-08 published 5 June 2008, the ORR noted that two significant milestones were achieved on 5 and 29 May with the successful commissioning of new infrastructure on the Trent Valley four tracking project (Stages 1 and 3) and between Rugby and Nuneaton (Stage G).

DEFENCE

Afghanistan: Peacekeeping Operations

Dr. Fox: To ask the Secretary of State for Defence how many incidents of theft of British military supplies during transit from the port of debarkation in Pakistan to the final destination in Afghanistan have been reported since September 2007. [190452]

Mr. Bob Ainsworth: There have been 23 reports of theft of British military supplies during transit from the port of disembarkation in Pakistan to the final destination in Afghanistan in the period between 1 September 2007 and 17 July 2008 inclusive.

Adam Price: To ask the Secretary of State for Defence how many *(a)* tanks and *(b)* armoured personnel carriers have been lost as a result of enemy action in Afghanistan during the last 12 months. [215431]

Des Browne: I am withholding detailed information regarding the numbers of protected mobility vehicles lost to enemy fire as its release would, or would be likely to, prejudice the capability, operational security or effectiveness of the armed forces.

Mr. Soames: To ask the Secretary of State for Defence what the *(a)* scope and *(b)* length of the NATO contract for civilian aircraft in Afghanistan is; what aircraft types are involved; and how many military flying hours they are planned to free up each year. [218619]

Des Browne *[holding answer 14 July 2008]:* The NATO contract for civilian aircraft in Regional Command (South) is for ten tonnes of lift per week until 31 January 2009. Mi-17 helicopters are being used to fulfil the contract. The contract was not let on the basis of releasing a set number of military flying hours; however, it is estimated that up to 95 military flying hours may be saved.

Adam Price: To ask the Secretary of State for Defence pursuant to the answer of 24 June 2008, *Official Report,* column 175W, on Afghanistan: peacekeeping operations, what the name was of each of the deceased; what the date was of each incident; what the *(a)* location was and *(b)* circumstances were of each incident; what the cause of death was in each case; and what the status is of each investigation. [219609]

Des Browne: The details of the investigations referred to in the previous answer are shown in the following table. I am withholding the names of the deceased for privacy reasons and to protect the security of the families of locally employed personnel.

Date	*Location*	*Circumstances*	*Cause of death*	*Investigation status*
14 November 2005	Kabul	Local national allegedly shot by UK forces carrying out force protection procedures	Gunshot wound	Closed
19 May 2007	Gereshk	Locally employed translator killed by an improvised explosive device	Injuries from explosion	Closed
2 July 2007	Kandahar	Local nationals allegedly shot by UK forces carrying out force protection procedures	Gunshot wound	Open
7 November 2007	Kabul	Local national allegedly shot by UK forces carrying out force protection procedures	Gunshot wound	Closed
30 November 2007	Kajaki	Locally employed translator killed by an improvised explosive device	Injuries from explosion	Closed
24 December 2007	Baghran	Local nationals allegedly killed by UK weapon effects	Gunshot wounds	Open
3 April 2008	Now Zad	Local national allegedly killed by UK weapon effects	Mortar fire	Open

Armed Forces: Deployment

Dr. Fox: To ask the Secretary of State for Defence how many UK personnel are deployed on operations, broken down by location. [214459]

Des Browne: The following table shows the number of UK service personnel deployed on operations by location at 23 June 2008. The number of personnel in theatre will naturally fluctuate on a daily basis for a variety of reasons, including leave (rest and recuperation), temporary absence for training, evacuation for medical reasons, the roulement of forces and other factors.

Number of personnel deployed by location[1]

Location	*Number*
Total	15,970
Of which:	
Afghanistan[2]	8,000
Iraq[2]	4,300
At Sea	1,660
Kosovo	680
Qatar	410
Cyprus	270
Oman	270
Kuwait	170
Bahrain	100
Bosnia	10
Other	30

[1] Countries with 10 or more personnel are shown separately. Other countries with fewer than 10 personnel per country include Georgia, Nepal, Sudan, Sierra Leone, Democratic Republic of Congo and Liberia.

[2] Figures for Iraq and Afghanistan have been rounded to the nearest 100. Other figures have been rounded to the nearest 10. Due to rounding methods used, the total may not equal the sum of the individual locations.

Armed Forces: Gyms

Dr. Fox: To ask the Secretary of State for Defence (1) what his Department's policy is on charging service personnel for use of garrison gyms; [206754]

(2) whether service personnel will be charged for the use of super-garrison gyms. [206755]

Derek Twigg: In Army garrisons, personnel use the gym facilities free of charge. At Aldershot and Tidworth where a public finance initiative contractor and local authority run the local sports and leisure centres, personnel are charged for using these facilities for non-military (i.e. personal) training outside of core hours. In both cases a small administration fee is charged for health and safety induction processes as well as swipe cards.

Although super-garrisons are still at the concept stage, there are currently no plans to charge personnel for the use of gyms.

Armed Forces: Health Services

Dr. Fox: To ask the Secretary of State for Defence what the waiting list targets for *(a)* Ministry of Defence hospital units, *(b)* regional rehabilitation units and *(c)* Departments of Community Mental Health are; and what progress has been made towards these targets in each year since 2003. [216250]

Derek Twigg: Since financial year (FY) 2006-07 targets for Ministry of Defence hospital units (MDHUs) are for a percentage of patients to attend an outpatients appointment within four weeks of referral by their GP and, with a decision to admit, for a percentage of patients to receive treatment within six weeks; this equates to a 10-week care pathway from referral to treatment for those who need it. The average of targets placed on MDHUs and the actual performance against these targets since 2006-07 and 2007-08 are shown in the following table. Targets for 2008-09 are currently being negotiated with individual NHS hospital authorities that host MDHUs.

	Percentage of patients to be seen as an outpatient within four weeks		*Percentage of patients to receive treatment within 6 weeks of decision to admit*	
	Target	*Actual*	*Target*	*Actual*
2006-07	61	59	56	61
2007-08	67	53	59	59

These targets are more stringent than the current NHS target of 18 weeks from GP referral to treatment for 85 per cent. of patients. The contracts MOD holds with MDHU hosting hospitals enables accelerated access for Service patients to rapidly return them to combat effectiveness.

Prior to 2006, targets for outpatients appointments at all MDHUs were for 45 per cent. of patients to be seen within four weeks of GP referral and 90 per cent. within 13 weeks. Following a decision to admit for treatment, the target was for 80 per cent. of patients to be treated within 13 weeks; this equates to a total care pathway of between 17 and 26 weeks from referral to treatment for those who needed it.

	Percentage of patients to be seen as an outpatient within four weeks		*Percentage of patients to be seen as an outpatient within 13 weeks*		*Percentage of patients to receive treatment within 13 weeks of decision to admit*	
	Target	*Actual*	*Target*	*Actual*	*Target*	*Actual*
2003-04	45	46	90	87	80	77
2004-05	45	46	90	93	80	75
2005-06	45	46	90	93	80	74

Regional rehabilitation unit targets since 2006 are that, from point of referral, 100 per cent. of patients should attend an RRU within 10 working days; in the majority of cases this target is being met. Areas exceeding the target time are those experiencing high operational tempo (RRUs situated near to or within garrisons with a large numbers of troops returning from deployment); waiting times in these cases can be up to 15 days. Implementation of the recommendations of the recent Rehabilitation Review, which reported in May 2008, will re-balance resources to address this.

Prior to the creation of the RRUs in 2005 the policy was that following an assessment by a GP or physiotherapist that a patient commenced treatment within seven days.

Departments of Community Mental Health targets (DCMH) since 2004 are for 100 per cent of urgent cases to receive an appointment the next working day and for 100 per cent. of routine cases to be seen within 20 working days; these targets are being met, except in circumstances where the patient does not attend the arranged appointment.

In addition, the target for access to in-patient care is four hours if deemed an emergency by Community Mental Health Units.

I am unable to provide information on performance for RRUs and DCMHs for the years prior to those shown above as records are not readily available and it would incur disproportionate cost to produce data.

Armed Forces: Housing

Dr. Fox: To ask the Secretary of State for Defence how many and what percentage of the *(a)* single living and *(b)* service family accommodation provided by his Department in (i) the UK and (ii) overseas meets the decent home standard. [217006]

Derek Twigg: We have not carried out a specific comparison with the decent homes standard for either service family accommodation (SFA) or single living accommodation (SLA).

The Ministry of Defence (MOD) has its own well defined criteria for assessing the condition of its properties. For the majority of SFA, this consists of a list of over 100 individual attributes that are assessed to arrive at an overall Standard for Condition (SfC) score for the property. SfC scores are banded into categories, S1fC the highest to S4fC the lowest. SfC assessment includes aspects such as the structure of the property, its energy efficiency, health and safety features, security arrangements and sanitary items as well as an assessment of the kitchen and bedrooms. On that basis, the majority of SFA is already at either S1fC or S2fC. This includes over 12,800 properties that have been upgraded to S1fC since 2001. By the end of this financial year, no Service family will have to live in S4fC accommodation.

We are confident that the current SfC system used by the Department fully takes into account the four basic tenets of the decent homes standard. Rather than simply conforming to a minimum acceptable level of accommodation, MOD aspires to provide accommodation to a higher standard; and this is reflected in the criteria that must be met to achieve S1fC. (All eight categories must score at Standard 1 for the overall Standard for Condition to be 1).

Dr. Murrison: To ask the Secretary of State for Defence if he will place in the Library a copy of his Department's contract with Annington Homes. [218006]

Derek Twigg: I will arrange for a copy of the contract with Annington Homes Ltd to be placed in the Library of the House.

Bob Russell: To ask the Secretary of State for Defence when all housing accommodation for families of military personnel will be brought up to the highest ranked standard. [220296]

Derek Twigg: The Department is committed to providing decent accommodation for service personnel and their families.

Addressing accommodation issues globally is one of our top priorities, but this will take time as there is no quick fix to dealing with a legacy of decades of under-funding. In addition to the significant investment in recent years, the Department will spend in excess of £8 billion on accommodation in the next decade, of which of over £3 billion will be on improvements and upgrades.

Since 2001, some 13,000 service family accommodation properties have been upgraded to the top of four standards for condition, with a further 600 of the worse condition properties to be upgraded this financial year and 800 in each year thereafter.

By the end of this financial year, no service families will have to live in the lowest standard of SFA. By 2012 all SFA will be at the top two standards for condition.

Armed Forces: Injuries

Dr. Murrison: To ask the Secretary of State for Defence how much the provision of legal advice and representation in connection with civil actions against his Department relating to illnesses and injuries sustained cost in each year since 1997. [220082]

Derek Twigg *[holding answer 21 July 2008]:* The information requested is not held in the format requested.

Armed Forces: Manpower

Dr. Fox: To ask the Secretary of State for Defence what the trained *(a)* requirement and *(b)* strength of the (i) Territorial Army, (ii) Royal Naval Reserve, (iii) Royal Marine Reserve and (iv) Royal Auxiliary Air Force was in (A) 1997 and (B) the latest date for which figures are available. [216075]

Mr. Bob Ainsworth: Figures for the requirement are not available from 1997. The figures for 1997 and 2008 are therefore not completely comparable.

	1997[1]		*May 2008*	
	Requirement	*Total strength*	*Requirement*	*Trained strength*
Royal Naval Reserve	[3]n/a	[4]3,560	1,784	1,640
Royal Marines Reserve	[3]—	[4]—	582	536
Territorial Army	n/a	[2]51,690	30,274	19,940
Royal Auxiliary Air Force	n/a	1,360	2,000	778

[1] Figures taken from DAS A Publication TSP07 "UK Reserve and Cadets Strength at 1 April 2007". This includes trained and non-trained personnel.
[2] For comparison with other Services, this number does not include non-regular permanent staff.

Armed Forces: Vehicles

Dr. Fox: To ask the Secretary of State for Defence what requirements are placed on vehicles in the British armed forces by EU environmental regulations. [220001]

Mr. Bob Ainsworth: The EU environmental regulation that places specific requirements on the vehicles of the UK armed forces is Regulation (EC) No 715/2007. This regulation establishes common technical requirements for the type approval of motor vehicles and replacement parts with regard to their emissions. In addition, it lays down rules for in-service conformity, durability of pollution control devices, on-board diagnostic (OBD) systems, measurement of fuel consumption and accessibility of

vehicle repair and maintenance information. It applies to vehicles whose mass does not exceed 2,610 kg.

It is our policy to comply with all relevant UK, EU and overseas legislation and, where granted specific exemptions from legislation, standards and arrangements are introduced that are, so far as reasonably practicable, at least as good as those required by legislation.

Armed Forces: Young People

Nick Harvey: To ask the Secretary of State for Defence how many people who joined the armed forces at age 16 and 17 years in each of the last five years sought to leave the armed forces *(a)* while under 18 years old and *(b)* when 18 years old or more; and how many people who joined the armed forces as adults subsequently sought to leave the UK armed forces in each of the last five years. [220313]

Mr. Bob Ainsworth: Information on the number of people who joined the armed forces at age 16 and 17 years or as adults in each of the last five years is not centrally held and could be provided only at disproportionate cost.

Due to ongoing validation of data from the Joint Personnel Administration system, voluntary outflow application data are currently unavailable. Historical information on voluntary outflow applications and exits is published in Tri-Service Publication 5, 'UK Regular Forces outflow from trained strength to civil life' (TSP 5). Copies of the most recent and historical publications can be found at

www.dasa.mod.uk.

Information on the intake and outflow of the UK regular forces by age published in Tri-Service Publication 19, 'UK Regular Forces Intake and Outflow by age' (TSP 19). Copies of the most recent and historical publications can be found at

www.dasa.mod.uk.

Armoured Fighting Vehicles

Dr. Fox: To ask the Secretary of State for Defence at what location training for Mastiff armoured vehicles is conducted. [220002]

Mr. Bob Ainsworth: Training on Mastiff armoured vehicles is conducted in a number of locations depending on the type of training undertaken. Technical and maintenance training is conducted at the School of Electrical and Mechanical Engineering in Bordon, Hampshire. Driver training is conducted at the Defence School of Transport, Leconfield in Yorkshire. Mastiff vehicles are used in Pre-Deployment Training, which can take place on a number of military training areas both in the United Kingdom and Germany. Mastiff vehicles are also used for in-theatre training in Kuwait/Iraq and Afghanistan.

Central Africa: Peacekeeping Operations

Dr. Fox: To ask the Secretary of State for Defence which EU member states are contributing to the EU military mission to Chad and the Central African Republic; and what each is contributing. [220003]

Mr. Bob Ainsworth: 18 EU member states are contributing troops and/or equipment in the area of operations (AOO) of the EU military mission to Chad and the Central African Republic. Current contributions are given as follows:

Country	*Approximate troops*	*Significant equipment*
Austria	170	—
Belgium	95	—
Bulgaria	2	—
Czech Republic	2	—
Finland	60	—
France	1,685	Nine helicopters (Pumas and Gazelles), two Unmanned Air Vehicles (UAVs)
Greece	4	One C-130 aircraft
Ireland	415	Mowag Piranha III light armoured personnel carriers
Italy	100	—
Luxembourg	2	—
Netherlands	70	—
Poland	305	Two Mi-17 helicopters
Portugal	2	One C-130 aircraft
Romania	2	—
Slovenia	15	—
Spain	90	Two CASA C-295 aircraft
Sweden	140	—
United Kingdom	2	—

22 EU member states are represented at the multinational Operation Headquarters established at Mont Valerian, Paris to plan and conduct this operation. Current contributions are given as follows:

Country	*Approximate troops*
Austria	4
Belgium	6
Bulgaria	1
Cyprus	2
Czech Republic	1
Finland	2
France	80
Germany	4
Greece	3
Hungary	3
Ireland	20
Italy	4
Lithuania	2
Netherlands	3
Poland	6
Portugal	6
Romania	4
Slovakia	1
Slovenia	1
Spain	4
Sweden	6
United Kingdom	2

Departmental Alcoholic Drinks

David Simpson: To ask the Secretary of State for Defence what purchasing process is used by his Department for the procurement of alcohol for hospitality purposes. [219951]

Derek Twigg: Expenditure on alcohol at public expense is governed by the general principles of financial propriety set out in Government Accounting and the MOD's own regulations for the provision of official entertainment promulgated in Joint Services Publication 462, a copy of which is available in the Library of the House.

Departmental Compensation

Mr. Hayes: To ask the Secretary of State for Defence what the 10 highest payments made by his Department were under property compensation cases brought against it over the last 12 months for which figures are available; which of the cases were *(a)* contested and *(b)* uncontested by his Department; and what the nature of each incident was. [216705]

Derek Twigg: The 10 highest compensation payments made against property damage claims in the last 12 months are as follows:

	£
Damage to charter aircraft	352,872
Damage to charter aircraft	338,895
Damage to locomotive	145,832
Injury to horses caused by low flying military aircraft	39,987
Injury to livestock plus damage to crops and fencing caused by low lying military aircraft	38,936
Damage to hangar roof caused by low flying military aircraft	20,966
Game birds lost due to low flying military aircraft	19,551
Dairy cows destroyed as a result of low flying military aircraft	17,535
Free range hens killed due to low flying military aircraft	13,095
Injury to horse caused by low flying military aircraft	12,443

All the claims were settled without recourse to litigation.

Departmental Computers

Mr. Peter Ainsworth: To ask the Secretary of State for Defence what estimate he has made of *(a)* the number of computer devices left on overnight in his Department when not in use and *(b)* the cost of leaving computer devices on overnight when not in use in each of the last five years; and if he will make a statement. [217865]

Derek Twigg: Statistics on the numbers of computer devices left on overnight in the Department are not held.

MOD is co-operating with other Government Departments to take forward Government's Green IT Strategy, which includes aims to reduce energy consumption of computer equipment. We encourage the switching off of computer devices when not in use and have issued instructions to that effect.

Departmental Cost Effectiveness

Dr. Fox: To ask the Secretary of State for Defence what efficiency savings for the funding of regional prime contracts were *(a)* targeted and *(b)* achieved in each year since 2005. [219996]

Derek Twigg: No efficiency savings in the funding have been imposed on regional prime contracts since the contracts were awarded and funding allocated.

Part of the strategy in implementing the regional prime contracts was to achieve additional output, through betterment to the estate, at the same level of funding. These value for money efficiencies contribute to the Department's Estate Modernisation Efficiencies and are reported in the annual departmental accounts.

Departmental ICT

Dr. Fox: To ask the Secretary of State for Defence pursuant to the answer of 18 February 2008, *Official Report*, column 95W, on departmental ICT, when he expects to provide a substantive answer. [220124]

Mr. Bob Ainsworth: I refer the hon. Member to my answer of 16 July 2008, *Official Report*, columns 446-48W.

Duchess of Kent's Psychiatric Unit: Operating Costs

Dr. Fox: To ask the Secretary of State for Defence what the maintenance cost of the Duchess of Kent's psychiatric unit was in each of the last five years of its operation. [216249]

Derek Twigg: The Duchess of Kent's psychiatric unit closed in 2003. Maintenance and works costs for the last five years of its operation are shown in the following table:

Financial year	*Maintenance and works costs (£ million)*
1998-99	0.9
1999-2000	0.4
2000-01	0.7
2001-02	0.9
2002-03	0.5

EC Defence Policy

Adam Price: To ask the Secretary of State for Defence whether the Government support the French proposals for a *(a)* European aeronaval group, *(b)* joint fleet of military transporters, *(c)* joint fleet of European helicopters, *(d)* European satellite observation system and *(e)* permanent EU defence military planning headquarters. [220084]

Des Browne: The Government have not seen any specific plans in respect of the initiatives listed. But at the UK/France summit in March this year, the two Governments agreed to co-operate to develop European military capabilities, available to both the EU and NATO, in a number of fields. The UK Government do not support any proposals for a permanent EU defence military planning headquarters.

Government Decontamination Service: Telephone Services

Mr. Prisk: To ask the Secretary of State for Defence what income his Department received from the Government Decontamination Service 0845 number in *(a)* 2007-08, *(b)* 2006-07 and *(c)* 2005-06. [217542]

Derek Twigg: None.

Iraq: Peacekeeping Operations

Dr. Fox: To ask the Secretary of State for Defence (1) what the objective is of the Iraq culture brief in the Civilians Deployed on Operations pre-Deployment Preparation Course Phase 2 at Chetwynd Barracks; [219994]

(2) what process is used to select the instructors for the Iraq culture brief for the Civilians Deployed on Operations pre-Deployment Preparation Course Phase 2 at Chetwynd Barracks; [219993]

(3) if he will place in the Library a copy of the Iraq culture presentation given to the Civilians Deployed on Operations pre-Deployment Preparation Course Phase 2 on 10 July 2008 at Chetwynd Barracks. [219992]

Des Browne: The objectives of the Iraq culture brief given to civilians that are to deploy in support of operations in Iraq, is to provide a basic understanding of the main cultural and social conventions of the country. This enables civilians to interact with the local Iraqi population more confidently and successfully if they are called to do so once deployed in theatre.

The Iraq culture brief is delivered by Iraqi nationals, provided under contractual arrangements. Those giving the cultural brief must hold the appropriate security clearances.

A copy of the presentation given at Chetwynd Barracks on 10 July 2008 is currently being obtained and I will place it in the Library of the House when it becomes available.

Dr. Fox: To ask the Secretary of State for Defence whether departmental civilian staff deployed to Iraq and Afghanistan are issued with *(a)* mosquito nets and *(b)* insect repellent before leaving the UK. [219998]

Derek Twigg: There is a significant risk of malaria in most non-mountainous regions of Afghanistan. Where civilian staff are accommodated in tents, they are provided in theatre with a mosquito net treated with insecticide. Where staff are accommodated in buildings equipped with fly screens on windows and double doors to the exterior, such nets are not required. Insect repellent is also made available in theatre. Where the medical risk assessment deems it necessary, MOD civilian staff are also provided with anti-malarial prophylaxis prior to deployment.

Malaria risks in Iraq are rather lower and seasonal, especially in Basra, where the bulk of the UK military force is based. Notwithstanding, mosquito nets treated with insecticide are again provided for all personnel who are not provided with suitably protected accommodation. Insect repellent is also made available in theatre. Anti-malarial prophylaxis is assessed to be unnecessary for deployments to Iraq.

Nimrod Aircraft

Dr. Fox: To ask the Secretary of State for Defence how many instances of fuel leaks from Nimrod aircraft have been recorded in the last 12 months. [164431]

Mr. Bob Ainsworth: I will write to the hon. Member with the information requested and place a copy of my letter in the Library of the House.

Substantive answer from Bob Ainsworth to Liam Fox, dated 21 May:

I undertook to write to you in answer to your Parliamentary Questions on 21 November 2007, (Official Report, Column 990W) and 20 May 2008 (Official Report, Column 181W) about fuel leaks from Nimrod aircraft.

The Nimrod Integrated Project Team within Defence Equipment and Support (DE&S) is carrying out a detailed manual analysis of fuel leak data in order to answer your questions. Unfortunately, this is proving to be a time consuming process because the work has been disrupted by the corruption of the relevant database at RAF Kinloss. I am sorry that this has led to the delay in answering your questions, but I expect this analysis to be complete within the next four weeks.

In November 2006, after the loss of Nimrod XV230, DE&S introduced new mandatory fuel leak reporting procedures (known as 'Leaflet 70 reports') on all leaks associated with fuel tanks within the fuselage, the fuel system and any residual fuel found in specific areas of the aircraft (such as the bomb bay). So far our analysis indicates that since the introduction of these procedures, 111 fuel leaks (of varying degrees of severity) have been recorded under Leaflet 70. Of course, once the outcome of the ongoing detailed analysis of fuel leak data by DE&S is known, I will write to you again.

I should point out that following a recent request by the Oxfordshire Coroner relating to fuel leaks reported under Leaflet 70 we have provided the same information to him. In light of this, I was keen to ensure that you received this information as quickly as possible.

I am copying this letter to Ian Liddell-Grainger and Sir Nicholas Winterton, who have expressed an interest in this subject.

Substantive answer from Bob Ainsworth to Liam Fox, dated 13 July:

I wrote to you on 21 May 2008 in answer to two Parliamentary Questions that you tabled about fuel leaks from Nimrod aircraft. I explained that the Nimrod Integrated Project Team within Defence Equipment and Support (DE&S) was carrying out a detailed manual analysis of fuel leak data in order to answer your questions.

This work has now been completed and I can now provide you with a full response. In your first question on 21 November 2007, (Official Report, Column 990W) you asked how many instances of fuel leaks from Nimrod aircraft had been recorded in the last 12 months. This was taken to be the period from 1 November 2006 to 31 October 2007. A fuel leak is defined as any leakage of fuel from aircraft couplings, pipes or fuel tanks. In that period, there were a total of 252 fuel leaks reported on the Nimrod MR2 and R1 aircraft. In your second question on 20 May 2008 (Official Report, Column 181W) you asked how many fuel leaks had been reported since January 2007. Between 1 January 2007 and 31 December 2007 there were 277 fuel leaks reported on the Nimrod MR2 and R1 aircraft. Based on current data, between 1 January 2008 and 31 March 2008 (the last full month for which validated data is available), there have been a total of 33 fuel leaks reported on the Nimrod MR2 and R1 aircraft. That figure is however provisional, as some records have yet to be received from aircraft deployed on operations, and it is therefore likely to increase as the records are completed.

The figures quoted above do not include fuel leaks which are caused by our scheduled maintenance activity, as we disturb the fuel system. In these cases the leak is both caused and rectified while on the ground.

Although all aircraft are designed to be leak tolerant, all fuel leaks are thoroughly investigated. Furthermore, the measures implemented following the loss of Nimrod XV230 mean that the chance of any fuel leak Igniting is extremely low. In particular we have, as you know, removed potential sources of ignition by switching off the aircraft's very hot air system while airborne; it is used for short periods on the ground but does not reach temperatures sufficient to ignite fuel. Despite this, no leakage, however small, from pipes, couplings or fuselage tanks is accepted and the aircraft will not fly until such leaks have been rectified. The only occasion on which an aircraft will fly with a fuel leak is with certain categories of leaks from the integral fuel tanks in the wings. In such instances leaking fuel from the wing tanks disperses safely into the aircraft's slipstream, and, as there is no potential source of ignition, there is no hazard to the aircraft.

Of the 310 fuel leaks reported between 1 January 2007 and 31 March 2008 over 50 per cent were leaks from integral fuel tanks in the wings, in which fuel would simply pass into the aircraft's slipstream during flight. In each of these reported incidents, whether from the integral fuel tanks in the wings or elsewhere, the fuel leaks did not compromise the safety of the aircraft and were rectified by normal maintenance procedures.

In my letter of 21 May, I stated that in November 2006, after the loss of Nimrod XV230, DE&S introduced new mandatory fuel leak reporting procedures (known as 'Leaflet 70 reports') on all leaks associated with fuel tanks within the fuselage, the fuel system and on any residual fuel found in specific areas of the aircraft (such as the bomb bay). I also explained that since the introduction of these procedures, 111 fuel leaks (of varying degrees of severity) had been recorded under Leaflet 70. This procedure will continue to bring fuel leaks in the fuselage to the immediate attention of the DE&S Nimrod Integrated Project Team. The current maintenance policy for the Nimrod fuel system remains appropriate.

With respect to the airworthiness of the aircraft today, we have ceased air-to-air refuelling and ceased the use of very hot air systems in flight. These measures, together with the enhanced aircraft maintenance and inspection procedures introduced since the Nimrod XV230 crash ensure the aircraft, as it is today, is safe to fly. Indeed, my Department having carefully considered all the issues has declared that all reasonably practicable measures have been taken to reduce the risk of fire and explosion to As Low as Reasonably Practicable (ALARP). The work to reach this position has been contributed to by key stakeholders represented on the Nimrod Platform Equipment Safety Committee (comprising representatives of the DE&S Nimrod Integrated Project Team, Air Command, the Release to Service Authority, BAE Systems, Rolls Royce and QinetiQ) which supports this declaration.

In addition, to ensure we can continue to operate the aircraft efficiently until its planned retirement from service, we have in place a programme of more permanent measures which includes replacing, where judged necessary, fuel seals and engine bay hot air ducts on the aircraft, this work is being progressed as quickly as practicable.

I am copying this letter to Ian Liddell-Grainger and Sir Nicholas Winterton, who have previously expressed an interest in this subject.

Dr. Fox: To ask the Secretary of State for Defence how many fuel leakages on a Nimrod aircraft have been reported since January 2007. [199452]

Mr. Bob Ainsworth: I will write to the hon. Member.

Substantive answer from Bob Ainsworth to Liam Fox, dated 21 May:

I undertook to write to you in answer to your Parliamentary Questions on 21 November 2007, (Official Report, Column 990W) and 20 May 2008 (Official Report, Column 181W) about fuel leaks from Nimrod aircraft.

The Nimrod Integrated Project Team within Defence Equipment and Support (DE&S) is carrying out a detailed manual analysis of fuel leak data in order to answer your questions. Unfortunately, this is proving to be a time consuming process because the work has been disrupted by the corruption of the relevant database at RAF Kinloss. I am sorry that this has led to the delay in answering your questions, but I expect this analysis to be complete within the next four weeks.

In November 2006, after the loss of Nimrod XV230, DE&S introduced new mandatory fuel leak reporting procedures (known as 'Leaflet 70 reports') on all leaks associated with fuel tanks within the fuselage, the fuel system and any residual fuel found in specific areas of the aircraft (such as the bomb bay). So far our analysis indicates that since the introduction of these procedures, 111 fuel leaks (of varying degrees of severity) have been recorded under Leaflet 70. Of course, once the outcome of the ongoing detailed analysis of fuel leak data by DE&S is known, I will write to you again.

I should point out that following a recent request by the Oxfordshire Coroner relating to fuel leaks reported under Leaflet 70 we have provided the same information to him. In light of this, I was keen to ensure that you received this information as quickly as possible.

I am copying this letter to Ian Liddell-Grainger and Sir Nicholas Winterton, who have expressed an interest in this subject.

Substantive answer from Bob Ainsworth to Liam Fox, dated 13 July:

I wrote to you on 21 May 2008 in answer to two Parliamentary Questions that you tabled about fuel leaks from Nimrod aircraft. I explained that the Nimrod Integrated Project Team within Defence Equipment and Support (DE&S) was carrying out a detailed manual analysis of fuel leak data in order to answer your questions.

This work has now been completed and I can now provide you with a full response. In your first question on 21 November 2007, (Official Report, Column 990W) you asked how many instances of fuel leaks from Nimrod aircraft had been recorded in the last 12 months. This was taken to be the period from 1 November 2006 to 31 October 2007. A fuel leak is defined as any leakage of fuel from aircraft couplings, pipes or fuel tanks. In that period, there were a total of 252 fuel leaks reported on the Nimrod MR2 and R1 aircraft. In your second question on 20 May 2008 (Official Report, Column 181W) you asked how many fuel leaks had been reported since January 2007. Between 1 January 2007 and 31 December 2007 there were 277 fuel leaks reported on the Nimrod MR2 and R1 aircraft. Based on current data, between 1 January 2008 and 31 March 2008 (the last full month for which validated data is available), there have been a total of 33 fuel leaks reported on the Nimrod MR2 and R1 aircraft. That figure is however provisional, as some records have yet to be received from aircraft deployed on operations, and it is therefore likely to increase as the records are completed.

The figures quoted above do not include fuel leaks which are caused by our scheduled maintenance activity, as we disturb the fuel system. In these cases the leak is both caused and rectified while on the ground.

Although all aircraft are designed to be leak tolerant, all fuel leaks are thoroughly investigated. Furthermore, the measures implemented following the loss of Nimrod XV230 mean that the chance of any fuel leak Igniting is extremely low. In particular we have, as you know, removed potential sources of ignition by switching off the aircraft's very hot air system while airborne; it is used for short periods on the ground but does not reach temperatures sufficient to ignite fuel. Despite this, no leakage, however small, from pipes, couplings or fuselage tanks is accepted and the aircraft will not fly until such leaks have been rectified. With respect to the airworthiness of the aircraft today, we have ceased air-to-air refuelling and ceased the use of very hot air systems in flight. These measures, together with the enhanced aircraft maintenance and inspection procedures introduced since the Nimrod XV230 crash ensure the aircraft, as it is today, is safe to fly. Indeed, my Department having carefully considered all the issues has declared that all reasonably practicable measures have been taken to reduce the risk of fire and explosion to As Low as Reasonably Practicable (ALARP). The work to reach this position has been contributed to by key stakeholders represented on the Nimrod Platform Equipment Safety Committee (comprising representatives of the DE&S Nimrod Integrated Project Team, Air Command, the Release to Service Authority, BAE Systems, Rolls Royce and QinetiQ) which supports this declaration.

In addition, to ensure we can continue to operate the aircraft efficiently until its planned retirement from service, we have in place a programme of more permanent measures which includes replacing, where judged necessary, fuel seals and engine bay hot air ducts on the aircraft, this work is being progressed as quickly as practicable.

I am copying this letter to Ian Liddell-Grainger and Sir Nicholas Winterton, who have previously expressed an interest in this subject.

Nuclear Weapons: Safety Measures

Mrs. Cryer: To ask the Secretary of State for Defence what procedures are in place with regard to the *(a)* design and *(b)* handling of nuclear weapons to ensure that there is no popcorning or accidental explosion; what procedures are in place to ensure public safety in the event of popcorning; and if he will make a statement. [218746]

Des Browne: The theoretical phenomenon known as "popcorning" is a process whereby a series of accidental detonations of a number of warheads' conventional explosives could lead to some nuclear yield. This is extremely unlikely and could occur only if the warheads were located in close proximity to each other without mitigation. Warheads are designed such that there cannot be a nuclear detonation without authorisation.

Warhead handling, transit and storage facilities, and processes are designed to reduce the risk of popcorning to 'As Low As Reasonably Practicable' levels by, for example, separating stored warheads and having physical shielding between them. Similarly, moves of warheads are planned and executed to minimise the proximity of warheads to each other.

Safety in the nuclear weapons programme is of paramount importance. There are well-rehearsed generic response plans in place to protect workers and the general public in the unlikely event of an accident; all measures are taken to ensure acceptable levels of safety throughout the life cycle of the Trident warhead.

RAF St. Athan

Mrs. Gillan: To ask the Secretary of State for Defence what assessment he has made of the effect on the proposed Defence Training Academy at St. Athan of the cancellation of major house building projects in the area by Persimmon and other construction and house building companies. [219617]

Mr. Bob Ainsworth: The Defence Training Review Package 1 Project has a requirement for service families accommodation in the St. Athan region from 2013. An Assessment Study has been commissioned by MOD to identify the best value for money options to procure housing for servicemen based at the Defence Technical Academy. This is likely to increase demand for housing in the area in the future. The MOD is therefore working alongside the Vale of Glamorgan, as the planning authority responsible for ensuring demand capacity can be accommodated, to examine how our housing requirements might be met.

Mrs. Gillan: To ask the Secretary of State for Defence if he will make an assessment of the likely effect of the construction of Olympic facilities for 2012 on availability of construction workers to work on the construction of St. Athan Defence Training Academy. [219618]

Mr. Bob Ainsworth: Officials have already assessed the impacts of construction industry demand capacity on the proposed construction of the Defence Technical Academy at St. Athan. Populating an Office of Government Commerce simulation model, the data and advice received have indicated that construction of the Olympic facilities for 2012 is not expected to cause any significant implications for the local construction environment in the Vale of Glamorgan.

Mrs. Gillan: To ask the Secretary of State for Defence what the purpose is of his Department's consultation on the proposed Defence and Training Academy at St. Athan; and how long the consultation will last. [219619]

Mr. Bob Ainsworth: I refer the hon. Member to the answer I gave on 15 July 2008, *Official Report*, column 314W.

The consultation process will end when planning consent is granted for the development. This will complete the planning process, and is expected to be in October 2009.

Harry Cohen: To ask the Secretary of State for Defence which troops will be trained at the Defence Training Academy at St. Athan; and how they will be selected. [219736]

Mr. Bob Ainsworth: The scope of training within package 1 of the Defence Training Review to be delivered at the proposed Defence Technical Academy at St. Athan are specialist phase 2 and phase 3 engineering courses of the Royal Navy, Army and Royal Air Force. They include those courses delivered today within the Defence Colleges of Aeronautical Engineering, Electro-mechanical Engineering and Communications and

Information Systems. Phase 2 training involves initial trade training for the armed forces; phase 3 training involves continuous professional development. In addition, some training of overseas troops in the same disciplines may take place under current Defence relations arrangements.

Reserve Forces: Deployment

Dr. Fox: To ask the Secretary of State for Defence how many reservists are serving on operations overseas, broken down by location. [216176]

Mr. Bob Ainsworth: As at 31 May 2008, reservists are serving on operations overseas as follows:

Location	*Op Name*	*Number of reservists serving*
Iraq Joint Operational Area	TELIC	217
Afghanistan Joint Operational Area	HERRICK	603
Balkans	OCULUS	20
Cyprus	TOSCA	36
Global Counter-Terrorism	—	12

In addition there were a further 572 reservists in full-time service within the UK and in other permanent joint operational bases; this includes those undergoing pre-deployment training, and those on post-deployment leave. There were also on average 50 Sponsored Reserves mobilised at any one time during this month (May 2008), most of whom will have served at one time or another in an operational area. A further 1,844 personnel were serving on Full Time Reserve Service contracts, and some of these will be in an operational area, but further details of their individual locations are not held centrally.

Selly Oak Hospital

Dr. Murrison: To ask the Secretary of State for Defence how many bed-days were accounted for by service in-patients in each ward at Selly Oak Hospital in each month since the opening of the military-managed ward. [206318]

Derek Twigg: We do not collect statistics in the format requested.

USA: Nuclear Weapons

Mrs. Cryer: To ask the Secretary of State for Defence how many US nuclear warheads are based in the United Kingdom; when he last discussed with the US authorities their withdrawal of warheads from the UK; and if he will make a statement. [218747]

Des Browne: I refer my hon. Friend to the answer I gave on 7 July 2008, *Official Report*, column 1154W, to the hon. Member for Portsmouth, South (Mr. Hancock). It is not the practice of the Government to make public details of all discussions with foreign Governments as this would, or would be likely to, prejudice international relations.

Vanguard Class Submarines

Mr. Gerald Howarth: To ask the Secretary of State for Defence what the *(a)* unit cost and *(b)* date of commissioning of each Vanguard class submarine was. [218233]

Mr. Bob Ainsworth: The commissioning dates for the four Vanguard class submarines are listed in the following table.

Submarine	*Date commissioned*
HMS Vanguard	21 August 1993
HMS Victorious	7 January 1995
HMS Vigilant	2 November 1996
HMS Vengeance	27 November 1999

The total procurement cost for the four submarines was £3,587 million, which equates to approximately £897 million per submarine.

Wind Power

Dr. Whitehead: To ask the Secretary of State for Defence what pre-application enquiries to his Department or Defence Estates for onshore wind turbines received an objection from his Department between 1 January and 30 June 2008; and what percentage this represented of the overall number of pre-application enquiries received. [217944]

Derek Twigg: All wind farm applications that we assess are subject to individual consideration. We consider a range of factors such as safety or the impact on Air Defence or Air Traffic radars. Concerns will only be lodged with pre-applications if the operational impact is assessed as being unmanageable. Even where concerns are raised, mitigation options will be suggested to the developer where possible.

Between 1 January and 30 June 2008, the Department expressed concerns about 82 onshore wind turbine pre-planning application enquiries. This represented 14 per cent. of the overall number received in that period.

Dr. Whitehead: To ask the Secretary of State for Defence what planning applications for onshore wind turbines his Department did not initially object to but objected to during a public enquiry in the period 1 January to 30 June 2008. [217945]

Derek Twigg: Between 1 January and 30 June 2008, after initially confirming it had no objections during the pre-planning consultation stage, the Ministry of Defence did not object to any planning applications for onshore wind turbines during a public inquiry.

HEALTH

Drugs: Equality of Access

11. **Kerry McCarthy:** To ask the Secretary of State for Health what plans he has to achieve equality between areas in access to drugs approved by the National Institute for Health and Clinical Excellence; and if he will make a statement. [220343]

Dawn Primarolo: The NHS Constitution gives patients an explicit right to drugs and treatments that have been recommended by the National Institute for Health and Clinical Excellence (NICE) for use in the NHS. This will help to ensure equality of access to NICE recommended treatments throughout the NHS in England.

17. **Ms Dari Taylor:** To ask the Secretary of State for Health what steps he is taking to achieve equality between areas in access to drugs approved by the National Institute for Health and Clinical Excellence; and if he will make a statement. [220350]

Dawn Primarolo: The NHS Constitution gives patients an explicit right to drugs and treatments that have been recommended by the National Institute for Health and Clinical Excellence (NICE) for use in the NHS. This will help to ensure equality of access to NICE recommended treatments throughout the NHS in England.

Primary Care Trust Allocations

13. **Tony Lloyd:** To ask the Secretary of State for Health when he plans to announce the revenue allocations to primary care trusts for 2009-10 and 2010-11. [220345]

Mr. Bradshaw: We will issue PCT allocations for 2009-10 and 2010-11 alongside the NHS operating framework for the NHS in October.

Rural GPs

14. **Miss McIntosh:** To ask the Secretary of State for Health what recent representations he has received on the ability of rural GPs to dispense to patients living a mile or more away from a GP surgery; and if he will make a statement. [220347]

Dawn Primarolo: We have not received any representations concerning the ability of rural GPs to dispense to patients living a mile or more away from a GP surgery.

There are some proposals in the White Paper which suggest ways in which dispensing services may be provided but any final decisions on future criteria will be taken in the light of the responses and feedback received to the consultation.

GPs: Barnsley

15. **Mr. Illsley:** To ask the Secretary of State for Health how many GPs there are in Barnsley; and if he will make a statement. [220348]

Mr. Bradshaw: There are 128 GPs in the Barnsley primary care trust area. I am pleased to report that under the proposals in the NHS next stage review Barnsley PCT will be developing three additional GP surgeries and a GP-led health centre.

NHS Dentistry

16. **Andrew George:** To ask the Secretary of State for Health what recent assessment he has made of levels of access to NHS dentistry. [220349]

Ann Keen: Latest data show that 27.3 million people saw an NHS dentist at least once in the 24 months ending December 2007.

We are committed to increasing access to NHS dentistry, and have made this a requirement for PCTs in the NHS operating framework. We have increased dental funding by 11 per cent. this year to a total of £2.081 billion.

Doctors: Ethics

19. **Dr. Evan Harris:** To ask the Secretary of State for Health what his policy is on whether NHS doctors should be permitted to refrain from providing medical care to patients on the basis of the personal religious or other beliefs of the doctor other than under statute. [220353]

Mr. Bradshaw: National health service doctors are under a professional obligation to provide medical care to their patients.

This says:

"If carrying out a particular procedure or giving advice about it conflicts with your religious or moral beliefs, and this conflict might affect the treatment or advice you provide, you must explain this to the patient and tell them they have the right to see another doctor. You must be satisfied that the patient has sufficient information to enable them to exercise that right. If it is not practical for a patient to arrange to see another doctor, you must ensure that arrangements are made for another suitably qualified colleague to take over your role."

Patient Choice

20. **Nia Griffith:** To ask the Secretary of State for Health what steps he plans to take to extend patients' ability to choose their GP practice. [220354]

Mr. Bradshaw: Most people already have the freedom to choose their own general practitioner (GP) but in too many places there is no real choice. Proposals outlined in our new Primary and Community Care strategy, 'NHS Next Stage Review, Our Vision for Primary and Community Care', earlier this month will ensure people enjoy a real choice of GP, just as they already do of hospital.

Healthy Lifestyles

21. **Mr. Jim Cunningham:** To ask the Secretary of State for Health what recent steps the Government have taken to encourage people to adopt healthy lifestyles. [220355]

Dawn Primarolo: Firstly we are providing comprehensive information to help individuals and families make healthy choices in their lives. Secondly we are increasing support to those who want to make positive changes in their lifestyles—giving greatest support to those who need most help. Finally we are building partnerships with all stakeholders.

Stroke Care Services

22. **Dr. Naysmith:** To ask the Secretary of State for Health how many hospitals in England are able to provide hyper-acute stroke care services, including constant access to effective brain scanning followed by professional interpretation; and if he will take steps to increase this number. [220356]

Ann Keen: The latest audit round to take place, in 2006, showed that 196 hospitals in England have a stroke unit. This is 97 per cent. of all hospitals in England. All these hospitals have a consultant physician responsible for stroke.

In 2006, nearly all hospitals had facilities to scan the brain. Over 90 per cent. of stroke units providing acute care had access to brain imaging within 24 hours of admission.

The National Stroke Strategy and the supporting Imaging Guide outline the characteristics of gold standard stroke services and provide useful information on how to implement the changes needed to achieve them.

Patient Dignity

23. **John Hemming:** To ask the Secretary of State for Health what mechanisms are in place to ensure patient dignity in the NHS. [220357]

Mr. Ivan Lewis: Our Dignity in Care campaign aims to create zero tolerance of abuse and disrespect of older people in all care settings. Over 2,500 people have signed up as dignity champions, committed to improving dignity in their local care services.

In October 2007, we launched the Nutrition Action Plan to address issues that emerged from the campaign about older people's nutrition. A Nutrition Action Plan Delivery Board has been set up to ensure delivery of the Action Plan commitments.

On 30 June, we launched for consultation a groundbreaking constitution for the NHS. The constitution enshrines the principles and values of the NHS for the future. It makes clear that patients have a right to be treated with dignity and respect.

Also on 30 June, we published: "High quality Care for All: NHS Next Stage Review Final Report", which confirms that dignity and respect should be a core value of the NHS.

On 16 July, we launched the End of Life Care Strategy, backed with £286 million, to provide high quality care for all adults approaching the end of their life. It will help more people to die in the setting they choose, mainly at home surrounded by loved ones. A key part of the strategy is encouraging services that respect dignity at the end of life.

We are committed to reducing hospital mixed-sex accommodation to an absolute minimum and to ensuring that where the need to treat a person takes precedence over complete gender separation, everything possible is done to maximise privacy and dignity.

Dispensing Medicine: Market Entry

Mr. Dunne: To ask the Secretary of State for Health what the timetable is for his Department's forthcoming consultation on control of market entry for dispensing medicine. [220344]

Dawn Primarolo: As I announced in my written ministerial statement on 17 July 2008, the consultation on a number of proposals in our pharmacy White Paper will start next month.

NHS Next Stage Review

David Taylor: To ask the Secretary of State for Health which private health companies made submissions to the NHS next stage review. [220352]

Mr. Bradshaw: Among the 200 submissions received nationally as part of the NHS next stage review were submissions from BUPA, Spire Healthcare, The Priory Group, UnitedHealth Europe, Assura Group and Abbott UK.

Abortion

Mr. Amess: To ask the Secretary of State for Health what recent representations he has received from hon. and right hon. Members wishing to liberalise the provisions of the Abortion Act 1967; what response he has given; and if he will make a statement. [219644]

Dawn Primarolo: During 2008, we have received 245 letters from hon. Members on issues relating to abortion and about the Human Fertilisation and Embryology Bill, some of which have mentioned abortion. Records are not kept on how many of these support or oppose liberalising the law on abortion.

Mr. Amess: To ask the Secretary of State for Health what guidance his Department has *(a)* issued and *(b)* plans to issue during the next 12 months on the definition of a serious handicap as grounds for an abortion; and if he will make a statement. [219663]

Dawn Primarolo: The Department has commissioned the Royal College of Obstetricians and Gynaecologists to review its guideline 'Termination of Pregnancy for Fetal Abnormality' (January 1996).

The revised guideline should be completed by autumn 2009.

Mr. Amess: To ask the Secretary of State for Health how many abortions were performed under ground *(a)* A, *(b)* B, *(c)* C, *(d)* D, *(e)* E, *(f)* F and *(g)* G of the Abortion Act 1967 in (i) 2006 and (ii) 2007. [219706]

Dawn Primarolo: The information requested is set out in the following table.

Legal abortions by grounds, residents of England and Wales, 2006 and 2007

Grounds	*2006*	*2007*
A (alone, or with B, C, D) or F or G	149	112
B (alone, or with C or D)	1,059	622
C (alone)	187,740	193,592
D (alone, or with C)	2,753	2,234
E (alone, or with A, B, C or D)	2,036	1,939
Total	193,737	198,499

Abortion: Drugs

Mr. Amess: To ask the Secretary of State for Health (1) what legislation regulates the selling of abortion drugs on the internet; and if he will make a statement; [219661]

(2) if he will bring forward legislation to restrict the selling of abortion drugs on the internet; and if he will make a statement. [219708]

Dawn Primarolo: In the United Kingdom, there are strict legal controls on the retail sale, supply and advertisement of medicinal products which are set out in the Medicines Act 1968. These legal controls apply equally to medicines for human use sold or supplied via internet or e-mail transactions. Prescription-only medicines may only be sold or supplied in accordance with a doctor's prescription at registered pharmacy premises, or by an internet pharmacy which has been approved by the Royal Pharmaceutical Society of Great Britain and bears the relevant logo, or under the supervision of a pharmacist.

Websites supplying medicines that are based overseas, or fulfil orders from overseas, are outside the jurisdiction of the UK medicines regulatory authority.

Generally, medicines that are brought into the UK by an individual for his or her own personal use or that of a member of his/her family are not subject to the controls of medicines legislation.

There are no plans at this time to change medicines legislation.

Abortion: Teenage Pregnancy

Mr. Amess: To ask the Secretary of State for Health how many abortions were performed on people aged *(a)* 10, *(b)* 11, *(c)* 12, *(d)* 13, *(e)* 14, *(f)* 15 and *(g)* 16 years old at (i) less than nine weeks, (ii) nine to 12 weeks, (iii) 13 to 16 weeks, (iv) 17 to 20 weeks, (v) 21 to 24 weeks and (vi) 24 weeks and over gestation on each of the seven grounds in the Abortion Act 1967 in (A) 2006 and (B) 2007. [219707]

Dawn Primarolo: The information requested is set out in the following tables.

Abortions by age under 17, gestation and grounds, residents of England and Wales, 2007

	Gestation weeks					
Age at termination	*under nine*	*Nine to 12*	*13 to 16*	*17 to 20*	*21 and over*	*Total*
Under 14 years						
Ground C and other[1]	68	65	18	[2]—	[2]—	163
14 years						
Ground C and other[1]	474	373	101	[2]—	[2]—	1,008
15 years						
Ground C and other[1]	1,525	1,178	309	129	64	3,205
16 years						
Ground C[1,3]	3,305	2,333	573	215	101	—
Other[1,3]	15	31	[2]—	[2]—	[2]—	—
Total	3,320	2,364	573	215	101	6,573
Total	5,387	3,980	1,001	391	190	10,949

Abortions by age under 17, gestation and grounds, residents of England and Wales, 2006

	Gestation weeks					
Age at termination	*under nine*	*nine to 12*	*13 to 16*	*17 to 20*	*21 and over*	*Total*
Under 14 years						
Ground C and other[1]	50	54	13	[2]—	[2]—	135
14 years						
Ground C and other[1]	358	381	107	[2]—	[2]—	907
15 years						
Ground C and other[1]	1,144	1,347	277	117	63	2,948
16 years						
Ground C[1,3]	2,222	2,667	594	223	87	—
Other[1,3]	36	30	[2]—	[2]—	[2]—	—
Total	2,258	2,697	594	223	87	5,859
Total	3,810	4,479	991	387	182	9,849

[1] where Ground C is grouped with other grounds totals for other grounds are less than 10.
[2] Suppressed value less than 10 (between 0 and nine).
[3] For gestations 13 weeks and over other grounds are included in the Ground C total.
Note:
Totals for individual years under age 14 are suppressed for confidentiality reasons. This suppression is in line with the Office for National Statistics' guidance on the disclosure of abortion statistics (2005).

Mr. Amess: To ask the Secretary of State for Health (1) what his Department's policy is on the availability of abortions to girls under the age of 16 years without parental knowledge or consent; and if he will make a statement; [219712]

(2) how many recent representations he has received *(a)* supporting and *(b)* opposing the introduction of legislation requiring that the parent or guardian of a girl under 16 years of age is informed before an abortion is performed on her; and if he will make a statement. [219713]

Dawn Primarolo: Young people aged under 16 are legally able to consent to medical advice and treatment, including abortion, if a doctor or other health care worker judges them competent to do so. As such, they are entitled to the same duty of care and confidentiality as older patients.

For those young women seeking an abortion, guidance from the Department of Health emphasises that health professionals should discuss the benefits of the young women involving her parents. Where she cannot be persuaded to do so, every effort should be made to find another adult to provide support, for example another family member or specialist youth worker.

The duty of confidentiality is not absolute. There will be instances when information needs to be shared with social services and/or the police without consent—where the young person is engaged in an abusive or coercive relationship, or there is another over-riding public interest to do so such as the prevention or detection of serious crime.

The High Court ruled in 2006 that the guidance is fully in line with the law.

The Department has received around 230 letters on abortion during 2008. We are unable to break this down in the format requested.

David Simpson: To ask the Secretary of State for Health (1) how many abortions were carried out on women aged *(a)* 19, *(b)* 18, *(c)* 17, *(d)* 16, *(e)* 15, *(f)* 14 and *(g)* 13 years in England in each of the last three years (i) in total and (ii) broken down by region; [220140]

(2) how many births there were to mothers aged *(a)* 19, *(b)* 18, *(c)* 17, *(d)* 16, *(e)* 15, *(f)* 14 and *(g)* 13 years had in England in each of the last three years (i) in total and (ii) broken down by region. [220141]

Mr. Watson: I have been asked to reply.

The information requested falls within the responsibility of the UK Statistics Authority. I have asked the Authority to reply.

Letter from Karen Dunnell, dated July 2008:

As National Statistician I have been asked to reply to your recent question asking how many births there were to mothers aged (a) 19, (b) 18, (c) 17, (d) 16, (e) 15, (f) 14 and (g) 13 years in England in each of the last three years (i) in total and (ii) broken down by region and how many abortions were carried out on females aged (a) 19, (b) 18, (c) 17, (d) 16, (e) 15, (f) 14 and (g) 13 years in England in each of the last three years (i) in total and (ii) broken down by region. (220140, 220141)

Available figures are estimates of the number of conceptions resulting in one or more live or stillbirths (a maternity) or an abortion.

To preserve confidentiality of individuals, figures for girls aged 13 and 14 have not been provided separately. Number of conceptions leading to a maternity or an abortion for girls aged under 15, 15, 16, 17, 18 and 19 for England and Government Office Regions for 2004 to 2006 (the most recent year for which figures are available), are shown in the attached table. Figures for 2006 are provisional.

Number of conceptions leading to a maternity or an abortion to women aged under 20 by single years of age, Government office region and England, 2004 to 2006

	Conceptions leading to a maternity						*Conceptions leading to an abortion*					
	Age of mother at conception						*Age of mother at conception*					
Area	*Under 15*	*15*	*16*	*17*	*18*	*19*	*Under 15*	*15*	*16*	*17*	*18*	*19*

[1] Figures for 2006 are provisional.

Alcoholic Drinks: Labelling

Mr. Lansley: To ask the Secretary of State for Health when he plans to issue a consultation on the need for legislation regarding alcohol labelling, as referred to in paragraph 2.36 of his Department's Cancer Reform Strategy. [221151]

Dawn Primarolo: Today, the Department has published a public consultation seeking views on when and if the Government should take action to require health and unit information, including information on alcohol and pregnancy, to be included on all alcohol bottles and cans, should the voluntary agreement with the alcohol industry not be delivered by the end of 2008.

The consultation also asks for views on the need for a new alcohol retailing code and whether such a code should be mandatory. The findings of the KPMG review of the effectiveness of the alcohol industry's existing social responsibility standards are published today.

The consultation paper asks what more can be done by the NHS and others to ensure that help is available for those suffering from ill health due to alcohol misuse. Data on alcohol-related hospital admissions, giving better recognition to the breadth of health harm caused by alcohol misuse and their impact on the NHS, are published alongside the consultation.

A summary of the first phase of the independent review of the effects of alcohol price and promotion is published alongside the consultation, along with a Department's paper updating the estimate of the cost of alcohol misuse to the NHS. The consultation paper and the summary of the first phase of the independent review have been placed in the Library.

Ministers will consider the consultation responses in the autumn and will consider further action in light of the second phase findings of the independent review of the relationship between alcohol price, promotion and harm.

Alcoholic Drinks: Misuse

Mr. Jenkin: To ask the Secretary of State for Health how many alcohol-related hospital admissions were recorded in North East Essex Primary Care Trust in each of the last 10 years. [212336]

Mr. Ivan Lewis: The information requested can be found in the following table.

North East Essex Primary Care Trust (PCT) came into being on 1 October 2006, therefore, figures have also been provided for the predecessor organisations, Tendring PCT and Colchester PCT.

Total admissions to hospital in which the patient had a primary or secondary diagnosis specifically related to alcohol at the start of his or her stay, for North East Essex PCT and its predecessor organisations, Tendring PCT and Colchester PCT in earlier years

		Total
2006-07	North East Essex PCT	796

	Tendring PCT	*Colchester PCT*	*Total*
2005-06	373	411	784
2004-05	273	310	583
2003-04	244	225	469
2002-03	230	171	401
2001-02	203	164	367
2000-01	120	171	291
1999-2000	147	151	298
1998-99	111	137	248
1997-98	160	167	327

Notes:
1. Finished admission episodes (FAE)
A FAE is the first period of in-patient care under one consultant within one healthcare provider. Please note that admissions do not represent the number of in-patients, as a person may have more than one admission within the year.
2. Diagnosis (Primary Diagnosis)
The primary diagnosis is the first of up to 14 (seven prior to 2002-03) diagnosis fields in the Hospital Episode Statistics (HES) data set and provides the main reason why the patient was in hospital.
3. Secondary Diagnoses
As well as the primary diagnosis, there are up to 13 (six prior to 2002-03) secondary diagnosis fields in HES that show other diagnoses relevant to the episode of care:
F10 Mental and behavioural disorders due to use of alcohol
K70 Alcoholic liver disease
T51 Toxic effect of alcohol
4. Data Quality
HES are compiled from data sent by over 300 national health service trusts, and PCTs in England. Data are also received from a number of Independent sector organisations for activity commissioned by the English NHS. The NHS Information Centre for health and social care liaises closely with these organisations to encourage submission of complete and valid data and seeks to minimise inaccuracies and the effect of missing and invalid data via HES processes. While this brings about improvement over time, some shortcomings remain.
5. Assessing growth through time
HES figures are available from 1989-90 onwards. During the years that these records have been collected the NHS there have been ongoing improvements in quality and coverage. These improvements in information submitted by the NHS have been particularly marked in the earlier years and need to be borne in mind when analysing time series.
Some of the increase in figures for later years (particularly 2006-07 onwards) may be due to the improvement in the coverage of independent sector activity.
Changes in NHS practice also need to be borne in mind when analysing time series. For example a number of procedures may now be undertaken in outpatient settings and may no longer be accounted in the HES data. This may account for any reductions in activity over time.
6. Uncrossed Data
Figures have not been adjusted for shortfalls in data (ie the data are ungrossed).
Source:
The Information Centre for health and social care.

Mr. Jim Cunningham: To ask the Secretary of State for Health what steps the Government plan to take to encourage young people to drink less alcohol. [220083]

Kevin Brennan: I have been asked to reply.

The Government published the "Youth Alcohol Action Plan" on 2 June 2008. This document sets out a series of steps to address the problems associated with young people's alcohol consumption. These include:

Working with the police and the courts to reduce unsupervised drinking by young people in public places, including implementing new legislation to make it an offence for under-18s to persistently possess alcohol in public places;

Providing better information for parents on how alcohol consumption can affect young people to help them set boundaries with their children. The chief medical officer will work with experts, parents and young people to develop a set of guidelines on young people and alcohol;

Ensuring that industry plays its part, in marketing and promoting alcohol in a more responsible way to improve the standards that currently govern these issues, making them mandatory if that proves to be necessary; and

Supporting young people to make sensible decisions through a comprehensive communications campaign about the risks of alcohol, aimed particularly at the 11 to 15 year old age group.

We have consulted widely on our proposals with parents, young people and other stakeholders. Later in the year we will hold a public consultation on guidelines for both parents and young people on safe and sensible drinking.

John Battle: To ask the Secretary of State for Health what estimate his Department has made of the number of children living with a parent with diagnosed alcohol problems in Leeds in each year since 1987. [220782]

Dawn Primarolo: The information requested is not collected centrally.

Breast Cancer

Mrs. Riordan: To ask the Secretary of State for Health what plans he has to raise the awareness of young women about breast cancer. [219988]

Ann Keen: The Department encourages all women to be breast aware. Women should know what is normal for them, be aware of any changes which may occur and discuss any changes with their doctor.

We will be taking forward work to improving awareness of the signs and symptoms of all cancers, a key objective of the Cancer Reform Strategy, through the National Awareness and Early Diagnosis Initiative. As part of this work we will be developing and renewing standard key messages for cancers and we will be working to support local interventions to increase cancer symptom awareness and encourage early presentation.

In additional, we are currently working to implement a phased extension to the age range of the NHS Breast Screening Programme to include women aged between 47 and 73 years.

Cancer: Females

Mrs. Riordan: To ask the Secretary of State for Health what provision his Department has to support young women with cancer. [219989]

Ann Keen: Improving support for all cancer patients living with and beyond cancer, irrespective of their age or gender, is a key aim of the Cancer Reform Strategy, published in December 2007.

The strategy sets out a number of initiatives to improve patient support services for those living with and beyond cancer including:

ensuring patients receive high quality personalised information throughout their cancer journey on issues such as cancer treatment, local and national support services, and financial benefits;

working with cancer professionals in the NHS to improve their communication skills when dealing with patients;

the establishment of a new national cancer survivorship initiative; and

monitoring progress on improving patient experience through annual surveys.

Care Homes: Grants

Dr. Ladyman: To ask the Secretary of State for Health (1) pursuant to the answer of 13 March 2008, *Official Report*, column 550W, how many units of accommodation have been provided from the extra care housing grant in *(a)* apartment complexes and *(b)* villages; [215508]

(2) how many units have been provided from the extra care housing grant for *(a)* people over 60 years old, *(b)* people with learning disabilities and *(c)* people with other disabilities. [215509]

Mr. Ivan Lewis: Of the units of accommodation being funded by the Department's extra care housing grant, around 850 units are expected to be located in a village type setting and around 3,350 units are expected to be located in apartment type complexes.

Personal data relating to residents of extra care housing schemes that have received funding through the extra care housing grant are not collected centrally.

Care Homes: Standards

Mr. Burstow: To ask the Secretary of State for Health when he expects to publish the consultation on proposed changes to the standards for care homes for older people. [218681]

Mr. Ivan Lewis: The review of the national minimum standards for care homes has been integrated with the wider reform of health and adult social care regulation.

The Care Quality Commission (CQC) will take over from the Commission for Social Care Inspection, the Healthcare Commission, and the Mental Health Act Commission on 1 April 2009. From April 2010 the CQC will move to a common system of registration for all providers of regulated health and adult social care.

The Department recently consulted on what the essential requirements of safety and quality of care should be that providers have to meet in order to maintain their registration. The responses are currently being analysed and the Government's response will be published in due course.

Children: Diseases

Mr. Stephen O'Brien: To ask the Secretary of State for Health what change there has been in the incidence of *(a)* diphtheria, *(b)* tetanus, *(c)* pertussis, *(d)* haemophilus influenzae type b, *(e)* polio, *(f)* meningitis C, *(g)* measles, *(h)* mumps, *(i)* rubella and *(j)* acellular pertussis amongst children in London in (i) 2007 and (ii) 2008 to date. [221440]

Dawn Primarolo: The information requested is in the following table.

Laboratory confirmed cases in children (<15 years) in London

	2007	*2008*
Diphtheria	No cases	1 fatal case May 2008
Tetanus	No cases	No cases to date
Pertussis	36 cases[1]	26 cases to end June 2008[1]
Haemophilus influenzae	9	1 case to end June 2008
Polio	No cases	No cases to date
Meningitis C	1	No cases to mid May 2008
Measles	357	335 cases up to end June 2008
Mumps	21	11 cases up to end June 2008
Rubella	1	No cases up to end June 2008

[1] Pertussis cases laboratory confirmed by culture, PCR or serology.

Note:
The data in this table for 2007and 2008 are still subject to final confirmation.

Source:
Health Protection Agency.

Children: Vaccination

Mr. Stephen O'Brien: To ask the Secretary of State for Health if he will place in the Library minutes of the most recent meeting of the National Child Health Immunisation Board. [221543]

Dawn Primarolo: The minutes of the National Child Health Immunisation Board of 12 May will be placed in the Library after they have been agreed at the next meeting in September.

Children: Wheelchairs

Mr. Harper: To ask the Secretary of State for Health what steps he intends to take to improve the wheelchair service for children and young people as part of the forthcoming Child Health Strategy; and if he will make a statement. [220222]

Ann Keen: We plan to publish the Child Health Strategy in September, and will set out our further plans then.

Mr. Harper: To ask the Secretary of State for Health what progress has been made in improving the provision of wheelchair services for children and young people since the publication of Aiming High for Disabled Children in May 2007. [220223]

Mr. Ivan Lewis: The Transforming Community Equipment and Wheelchair Services Programme (TCEWS) was set up on 2006 to design a radical new model for delivery of both community equipment and wheelchairs in England. The remit of the programme was to place service users and carers at the heart of any new service model and build on the strengths of the third and private sector. The overall aim was to develop a new high quality system for delivering equipment which would give those supported by the state the sort of choice and control they have not previously enjoyed. Responsibility for assessment if need remains with local health and social care commissioners.

The programme has developed a business case for a new model of delivery of wheelchair services which is currently being considered.

Cholesterol: Screening

Mrs. Riordan: To ask the Secretary of State for Health what steps he has taken to encourage people to have regular cholesterol and blood pressure tests. [220012]

Ann Keen: The Quality and Outcomes Framework of the GP Contract includes quality indicators that provide incentives for practices to measure and control cholesterol in people with vascular disease and diabetes; and to measure and control blood pressure in people with a vascular condition, including hypertension and diabetes. In addition, one quality indicator encourages practices to check routinely the blood pressure of patients aged 45 and over.

Putting Prevention First, published at the beginning of April this year, outlines the Department's plans to introduce vascular checks, which will include blood pressure and cholesterol tests for all adults aged between 40 and 74.

In the Next Stage Review, we outlined our plans for a new 'Reduce Your Risk' campaign intended to raise awareness of vascular checks and help people to stay healthy and to know when they need to get help. It will explain the importance of each of the modifiable risk factors for vascular disease, including blood pressure and diet. It will also explain the need for a risk assessment and how to access it.

Cord Blood

Dr. Vis: To ask the Secretary of State for Health which stakeholders he has consulted in the course of his Department's review of UK practice in the collection and use of umbilical cord blood; and if he will make a statement. [219909]

Dawn Primarolo: Organisations and individuals consulted during the review of cord blood collection and use have included:

transplant clinicians;
maternity unit nurses;
researchers;
private cord blood banks (Virgin, Future Health);
NHS Cord Blood Bank;
Royal College of Obstetricians and Gynaecologists;
Royal College of Midwives;
The Anthony Nolan Trust;
Scottish Government;
Government Departments and agencies;
Research Councils; and
Human Tissue Authority.

Mr. Burrowes: To ask the Secretary of State for Health how many representations he has received on extending the *(a)* collection and *(b)* use of umbilical cord blood in the UK for clinical and research purposes. [221496]

Dawn Primarolo: I have met one organisation to hear a proposal on extending the collection and use of umbilical cord blood in the United Kingdom for clinical and research purposes. The same proposal has generated 13 pieces of correspondence. In total, two parliamentary questions have been laid on extending the current services.

Mr. Burrowes: To ask the Secretary of State for Health how many units of cord blood have been imported for use in the NHS since 2005; what proportion of these units were sourced and identified by the NHS; and if he will make a statement. [221497]

Dawn Primarolo: 26 cord blood units have been imported for use in the national health service since 2005. All were sourced by the NHS.

Deca-BDE: Health Hazards

David Taylor: To ask the Secretary of State for Health what assessment he has made of the effect on human health of the use in industry of the flame retardant deca-BDE; and if he will make a statement. [220677]

Mr. Woolas: I have been asked to reply.

Decabromodiphenyl ether (decaBDE) is a flame retardant used primarily in plastics and textiles applications. Over an extended period it has been subject to risk assessment action under the EU Existing Substances Regulation (EC no. 793/93); the UK (the Environment Agency) was the Rapporteur for the environmental elements of the risk assessment and France was the Rapporteur for the human health aspects.

The conclusion of the risk assessment is that while decaBDE is very persistent in the environment, it is not on present evidence bioaccumulative, and it is not toxic. As a result it does not meet the criteria for formal risk reduction activity under the existing substances regulation.

Dementia

Mr. Andrew Smith: To ask the Secretary of State for Health what his Department's strategy for medical research into dementia is; and if he will make a statement. [221043]

Mr. Ivan Lewis: The Department invests significant sums in dementia research. As implementation of the Government's health research strategy 'Best Research for Best Health' continues that investment is increasingly directed through the National Institute for Health Research (NIHR). The NIHR has established the Dementias and Neurodegenerative Diseases Research Network (the network provides a world-class health service infrastructure to support clinical trials and other well designed studies funded by both commercial and non-commercial organisations); and is supporting translational and applied research in dementia through the work of its biomedical research centres and through awards made under its programme grant scheme.

The Department published a consultation on a national dementia strategy on 19 June. It includes a recommendation and plans for building on the UK research base in dementia.

Dental Services

Mr. Hancock: To ask the Secretary of State for Health how many dentists are working on primary care lists in England; how many people were on waiting lists for NHS dental treatment at the latest date for which figures are available; and if he will make a statement. [219232]

Ann Keen: The number of dentists on open national health service contracts in England as at 30 June 2006, 30 September 2006, 31 December 2006, and 31 March 2007 are available in Table E1 of Annex 3 of the "NHS Dental Statistics for England: 2006-07 report". This information is based on the new contractual arrangements introduced on 1 April 2006. Information is available by strategic health authority and by primary care trust (PCT).

Copies of this publication have already been placed in the Library and are on the Information Centre for health and social care's website at:

www.ic.nhs.uk/pubs/dental0607

The numbers quoted are headcounts and do not differentiate between full-time and part-time dentists,

nor do they account for the fact that some dentists may do more NHS work than others.

Information on the number of people on waiting lists for NHS dental treatment is not collected centrally. It is for PCTs to make local arrangements to support patients in accessing NHS dental services.

Andrew George: To ask the Secretary of State for Health how many treatments in each treatment band were carried out by NHS dentists in *(a)* St. Ives constituency, *(b)* Cornwall and *(c)* England in each year since 2000. [219906]

Ann Keen: Information is not available in the format requested for the period requested. Under the new contractual arrangements, dentists no longer report individual items of service delivered but receive an annual agreed sum, paid in twelve equal instalments in return for delivering an agreed level of dental service. The service delivered is measured in weighted courses of treatment (CoTs) made up of units of dental activity.

Some sample information is available at national level on dental treatments delivered within courses of treatment. On 4 October 2007 the Information Centre for health and social care published a report: "Dental Treatment Band Analysis, England 2007: Preliminary Results" which considered activity within a sample of CoTs from the first four months of 2007-08 and made comparisons with equivalent information for 2003-04. On 21 August 2008, the NHS Information Centre is due to publish a further report covering the whole of 2007-08: "Dental Treatment Band Analysis, England and Wales: 2007-08 report".

Under the old dental contractual arrangements, in place up to and including 31 March 2006, information on the number of claims by treatment type was collected centrally for those dentists working in general dental services. Information for 2005 and 2006 by SHA is available in Annex D of "NHS Dental and Activity and Workforce Report, England: 31 March 2006".

This report has already been placed in the Library and is available at:

www.ic.nhs.uk/pubs/dwfactivity

Information below SHA level or for the years prior to 2005 and 2006 could only be provided at disproportionate cost.

Andrew George: To ask the Secretary of State for Health how many contracts for NHS dentists there were in *(a)* St. Ives constituency, *(b)* Cornwall and *(c)* England in each year since 2000. [219907]

Ann Keen: The information is not available in the form requested for the period requested.

The new system of local contracting has been in place only since April 2006. Under the old dental system, in place up to and including 31 March 2006, dentists worked either in general dental services (GDS) or in personal dental service pilots (PDS). PDS pilots, unlike GDS, operated under a system of local contracts but information on the individual contracts agreed under those arrangements is not held centrally.

The available information for the period since April 2006 is set out in the following tables. This is the latest information available.

Contracts agreed in April 2006[1]

Level	*Number*
England	8,377
South West Peninsula SHA	830
Central Cornwall PCT	49
North and East Cornwall PCT	22
West Cornwall PCT	22

[1] Department of Health.
Note:
Information available only by the then primary care trust and strategic health authority.

Contracts which ran for the whole of 2006-07

Level	*Number*
England	7,990
South West SHA	830

Source:
NHS Business Services Authority Dental Services Division.
Note:
Information available only at England level and by current strategic health authority.

Mr. Hollobone: To ask the Secretary of State for Health what assessment has been made of the effects of the new dentists' contract on numbers of *(a)* patient registrations and *(b)* dentists. [221206]

Ann Keen: The Department assessed the impact of the first eighteen months of the dental reforms in its written evidence to the Health Select Committee. This evidence was submitted in December 2007 and published by the committee on 4 February 2008 at:

www.publications.parliament.uk/pa/cm200708/cmselect/cmhealth/289/289ii.pdf

The written evidence set out how the reforms have helped lay a solid foundation for locally commissioned dental services. It covered among other areas access, quality and workforce and how the Department is working, with the national health service and stakeholders, to improve services further.

In addition, in order to identify and spread good practice, the Department announced in March that there will be an evaluation of how local commissioning is working in terms of the patient experience. This will look at both access and quality of services, and the incentives it offers to increase access and encourage prevention and health promotion, as well as treatment. It will also set out a vision for NHS dentistry in five years time. The evaluation is expected to be completed by the end of the year.

Departmental Public Expenditure

Mike Penning: To ask the Secretary of State for Health what the budget is for each *(a)* non-departmental public body and *(b)* agency for which his Department is responsible for 2008-09. [220100]

Mr. Ivan Lewis: The information requested is shown in the following table.

Arms length body	*Type of arms length body*	*Total (£000)*
Healthcare Commission	Non-Departmental Public Body	59,469
Mental Health Act Commission	Special Health Authority	5,594

Arms length body	Type of arms length body	Total (£000)
NHS Blood and Transplant	Special Health Authority	94,590
Human Fertilisation and Embryology Authority	Non-Departmental Public Body	1,956
Human Tissue Authority	Non-Departmental Public Body	1,116
Council for Healthcare Regulatory Excellence	Non-Departmental Public Body	2,060
General Social Care Council	Non-Departmental Public Body	10,687
Postgraduate Medical Education and Training Board	Non-Departmental Public Body	1,468
Medicines and Healthcare Products Regulatory Agency	Trading Agency	11,057
National Institute for Health and Clinical Excellence	Special Health Authority	32,415
National Patient Safety Agency	Special Health Authority	28,234
Health Protection Agency	Non-Departmental Public Body	168,152
National Institute for Biological Standards and Control	Non-Departmental Public Body	18,600
National Treatment Agency	Special Health Authority	11,457
Commission for Patient and Public Involvement in Health	Non-Departmental Public Body	804
NHS Litigation Authority	Special Health Authority	347,718
NHS Appointments Commission	Non-Departmental Public Body	3,965
Information Centre for health and social care	Special Health Authority	36,595
NHS Business Services Authority	Special Health Authority	128,457
NHS Purchasing and Supplies Authority	Agency	27,395
NHS Institute	Special Health Authority	67,981
Commission for Social Care and Inspection	Non-Departmental Public Body	48,550
NHS Professionals	Special Health Authority	5,136
Total		1,113,456

Diabetes: Health Services

Mr. Sanders: To ask the Secretary of State for Health (1) what arrangements are in place to manage the transition from paediatric to adult services for young people with diabetes; and what guidance his Department has given to primary care trusts to ensure the transition takes place at the appropriate time and is negotiated with and planned around the needs of each individual young person; [219500]

(2) whether his Department is undertaking an assessment of the implementation of "Making Every Young Person with Diabetes Matter". [219538]

Ann Keen: It is for local national health service organisations to make their own arrangements to manage the transition from paediatric to adult services for young people with diabetes. The 2007 report "Making Every Young Person with Diabetes Matter" (copies of which have already been placed in the Library) gives support and guidance on managing the transition period, as well as other aspects of diabetes care for children and young people. Implementation of this guidance will be continually reviewed and will also be assessed through the Child Health and Maternity Services mapping exercise, which aims to create an inventory of all dedicated child health services provided in England.

In the 2007 Child Health Mapping returns, of 242 general paediatric services, 207 (86 per cent.) provided services for children and young people with diabetes, 148 of which had protocols in place for transition to adult diabetes services, and 134 provided a diabetes transition key-worker on all, or most, occasions.

Mr. Sanders: To ask the Secretary of State for Health what the average ratio of children to paediatric diabetes specialist nurses is in England. [219502]

Ann Keen: The information is not collected centrally. It is for local national health service organisations to deploy specialist nurses according to their local needs.

Mr. Sanders: To ask the Secretary of State for Health how many primary care trusts in England have carried out a local needs assessment as part of the development of services for children and young people with diabetes; and if he will make a statement. [219505]

Ann Keen: This information in not collected centrally. Responsibility for developing services for children and young people with diabetes rests with the national health service, and it is for primary care trusts to commission services that meet the needs of their local population.

In April 2007, the Department published "Making Every Young Person with Diabetes Matter", the report of the children and young people with diabetes working group, which looked at ways to improve diabetes services for children and young people. This report includes guidance to commissioners on the planning, design and provision of diabetes services for children and young people, copies of the Report have already been deposited in the Library.

The "Diabetes Commissioning Toolkit", published in November 2006, describes the importance of carrying out a health needs assessment for local diabetes populations.

Mrs. Gillan: To ask the Secretary of State for Health how many primary care trusts have protocols to support the delivery of a consistent level of care for people with diabetes when in hospital. [219610]

Ann Keen: This information is not collected centrally. Responsibility for developing protocols to support the delivery of in-patient care for people with diabetes rests with the national health service, and it is for primary care trusts to commission services that meet the needs of their local population.

We recognise the importance of ensuring that people with diabetes receive good standards of care while in hospital. In March 2008 the National Diabetes Support Team, in partnership with the Department and Diabetes UK, published the report "Improving Emergency and In-patient Care for People with Diabetes". The report is intended to provide quality information and standards for commissioners and providers, and tools for service improvement in in-patient care.

Dietary Supplements

Mrs. Riordan: To ask the Secretary of State for Health if he will make it his policy to ensure that botanical food supplements containing ingredients for which claims are approved under the provisions of the Nutrition and Health Claims Regulation continue to be able to be marketed under food law. [220536]

Dawn Primarolo: Botanical food supplements bearing claims can continue to be marketed providing they comply with the Nutrition and Health Claims Regulation and all other aspects of food law. In particular they must comply with the Food Supplements Directive, and all novel food ingredients must undergo a pre-market safety evaluation.

Disabled: Respite Care

Mr. Harper: To ask the Secretary of State for Health pursuant to paragraph 3.11 in the Carers at the heart of 21st-century families and communities report, how much of the £150 million funding for breaks for carers of disabled children will be provided by his Department over each of the next two years. [220304]

Mr. Ivan Lewis: In response to the high value placed upon breaks by carers, the Department is investing £150 million via primary care trusts over the next two years. Of this, £50 million will be provided in 2009-10 and £100 million will be provided in 2010-11. This money will support all carers and will not be targeted specifically at carers of disabled children.

Between 2008-2011, we will be making a further investment of £720 million to councils to enable them to support carers with breaks and other services. This is in addition to funding of over a billion pounds paid to councils since 1999 through the carers grant.

Doctors: Housing

Stephen Williams: To ask the Secretary of State for Health if he will estimate the number of trainee doctors who will be paying for hospital-provided accommodation in each of the next three years; and if he will make a statement. [220228]

Ann Keen: Whether a junior doctor pays for accommodation depends on the contract of employment of the individual doctor. As with all other national health service staff, terms and conditions provide that there should be no charge for accommodation where junior doctors are contractually required to be resident. This is a matter for local NHS employers in terms of the contract of employment of each individual employee, and the Department does not hold this information centrally.

Emergency Services: Telecommunications

Fiona Mactaggart: To ask the Secretary of State for Health (1) when he expects the bandwidth for emergency service communications to be finalised; and what the reasons are for the time taken in determining, costing and allocating spectrum for emergency and public safety communications; [219732]

(2) when the public safety extension band (PSEB) manager will *(a)* decide on the allocation of, *(b)* submit the full costs schedule for and *(c)* provide the licence for the 2x13Mhz spectrum from the PSEB for the Government's chosen provider of emergency and public safety communications airwave solutions. [219733]

Mr. Bradshaw: This is a new approach to licensing radio spectrum. New processes are being established. This is a complex matter involving this Department, Ofcom and others. An offer has been made in principle. The detailed contract and licensing documentation will be completed as soon as possible.

Exercise

Mr. Lansley: To ask the Secretary of State for Health what evidence his Department has on the *(a)* cost-effectiveness and *(b)* clinical effectiveness of exercise referral services as referred to on page 36 of his Department's document High Quality Care for All, Cm. 7432. [219363]

Dawn Primarolo: In 2006, the National Institution for Health and Clinical Excellence (NICE) examined four commonly used methods to increase physical activity in England, including exercise referral. It considered the reviews of the evidence and an economic appraisal.

NICE determined that, other than as part of research studies where their effectiveness can be evaluated, there was insufficient evidence to recommend the use of exercise referral schemes to promote physical activity. However, the Department encourages the provision of high quality exercise referral schemes where they address management of condition specific or individual health conditions.

Food Standards Agency: Public Appointments

David Lepper: To ask the Secretary of State for Health (1) what account was taken of the undertaking given on 14 January 1998, *Official Report*, columns 357-8, in relation to the proportion of members of the board of the Food Standards Agency with relevant interests in the appointment of the current board members; and if he will make a statement; [220279]

(2) how many and what proportion of the members of the board of the Food Standards Agency have a *(a)* current and *(b)* recent commercial interest in bodies regulated by the agency. [220280]

Dawn Primarolo: The commitment given was that the Food Standards Agency (FSA) would be "tough and independent". This is fulfilled by the Food Standards Act 1999 which set up the FSA and by the code of conduct governing the conduct of its board members. The Act requires, and the capability of the agency's board depends upon, the independence and a wide range of skills and experience of members, who together act in the public interest without regard for their own financial or other interests which could prejudice the exercise of their duties. The balance of skills and experience of the whole board is reviewed at the time of each new appointment to ensure that appropriate independence of the board is maintained.

Details of board members' interests and their broad biographical backgrounds are published by the agency on its website and updated quarterly at

http://www.food.gov.uk/aboutus/ourboard/boardmem/.

However information about previous interests is not recorded when no longer held. The current register of interests of board members is published as a Standing Order paper with the papers for all the agency's open board meetings and these are also published on the website. Where relevant to the topic, those interests are

also declared in advance of discussion at all board meetings. The process of appointment of members also ensures that potential conflicts of interest are thoroughly explored.

Food: Prices

Mrs. Riordan: To ask the Secretary of State for Health what assessment he has made of the effect of rising food prices on levels of general health. [220038]

Dawn Primarolo: We are not aware that rising food prices have had a significant impact on food consumption patterns and hence healthy eating and healthy lifestyles. However, as part of our ongoing work to deliver the objectives of the Government's Healthy Weight Healthy Lives strategy, we will be working with key stakeholders across Government, industry, and the voluntary sector to share information on food purchase patterns.

Genito-urinary Medicine

Anne Main: To ask the Secretary of State for Health what percentage of patients attending genito-urinary medicine clinics in *(a)* St. Albans, *(b)* Hertfordshire and *(c)* England were offered an appointment to be seen within 48 hours in each of the last three months for which figures are available; and if he will make a statement. [221405]

Dawn Primarolo: The percentage of patients contacting genito-urinary clinics who were offered an appointment within 48 hours in St. Albans, Hertfordshire Primary Care Trusts and England between March and May 2008 are shown in the following table.

	March 2008	*April 2008*	*Percentage May 2008*
West Hertfordshire PCT			
The Waverly Wing, St. Albans	91.9	91.3	92.5
Watford Sexual Health Centre, Watford	97.6	96.5	95.5
East and North Hertfordshire PCT			
Woodlands Clinic, Lister Hospital, Stevenage	100.0	99.8	99.3
Hertford County Hospital, Hertford	97.0	100.0	100.0
Hertfordshire	96.7	96.1	95.9
England	98.9	98.5	98.9

Department of Health Form, Gumamm

Health and Social Care Act 2003

Mr. Amess: To ask the Secretary of State for Health if he will make a statement on the operation of the Health and Social Care (Community Health and Standards) Act 2003; what amendments have been made to this Act since receiving Royal Assent; and what amendments are planned during the next 12 months. [214043]

Mr. Ivan Lewis: The key elements of the Health and Social Care (Community Health and Standards) Act 2003 were as follows. The Act made provision for the creation of national health service foundation trusts (FTs), accountable to local communities rather than the Secretary of State; placed a duty on NHS bodies to monitor and improve the quality of healthcare that they provide; gave the Secretary of State power to publish standards in relation to healthcare; created a Commission for Healthcare Audit and Inspection (usually referred to as the Healthcare Commission (HCC)) and a Commission for Social Care Inspection; and made new provisions in relation to primary dental services.

There are now 103 NHS FTs in place. NHS FTs have demonstrated their ability to establish strong finances and deliver high quality services; the Healthcare Commission's Annual Healthcheck for 2006-07 showed that FTs are delivering better care and improved finances compared to non-FTs.

The Commission for Healthcare Audit and Inspection, or HCC, reports directly to Parliament on the state of healthcare in England, and on the quality of NHS and independent healthcare, and its value for money. The assessment of individual providers of NHS healthcare takes into account the standards for healthcare published by the Secretary of State. By bringing together the expertise of previous health inspection bodies, the HCC is helping to reduce the fragmentation of inspection, easing the burdens on front-line staff.

Similarly, the Commission for Social Care Inspection (CSCI) is an independent body, which provides a comprehensive picture of the quality of social care services and the performance of local authorities in meeting social care needs in their areas. It gives a star rating to councils annually and, from 2008, a quality rating to care services. The CSCI regulates, inspects and reviews all adult social care services in the public, private and voluntary sectors in England. It does so on the basis of regulations and standards issued by the Secretary of State. It makes an annual report to Parliament on the state of social care that gives a comprehensive overview of the social care sector in England.

The following amendments were made to this Act following the granting of Royal Assent on 20 November 2003:

Section (s) 7 (prior to its repeal)—s.7(5) amended by Health Act 2006, s.80, Sch.8, para.54;

s.25 (prior to its repeal)—s.25(3A) inserted by Health Act 2006, s.74(6);

s.28 (prior to its repeal)—s.28(3A) inserted by Health Act 2006, s.74(7);

s.33—s.33(2) amended by National Health Service (Consequential Provisions) Act 2006, s.2, Sch.1, para.236;

s.45—s.45(3) amended by National Health Service (Consequential Provisions) Act 2006, s.2, Sch.1, para.241;

s.50—s.50(4) substituted and s.50(4A) inserted by Health Act 2006, s.15(2);

s.51—s.51(4)(a) amended by Health Act 2006, s.15(3);

s.52—s.52(3)(5) substituted and s.52(5A) inserted by Health Act 2006, s.15(4), (5);

s.54—s.54(2) amended by Health Act 2006, s.15(6);

s.60—s.60(5)(1A) inserted by Public Audit (Wales) Act 2004, s.66, Sch.2, para.58;

s.69A—Inserted by Public Audit (Wales) Act 2004, s.66, Sch.2, para.59;

s.76—s.76(2)(d) amended by Education and Inspections Act 2006, s.157, Sch.14, para.83(a) - s.76(2)(f), (g) partially repealed by Education and Inspections Act 2006, s.157, s.184, Sch.14, para.83(b), Sch.18, Part 5;

s.79—s.79(2) substituted by Education and Inspections Act 2006, s.157, Sch.14, para.85(2)—s.79(2) amended and s.79(2)(a)-(b) inserted by Children Act 2004, s.24(1)—s.79(7) repealed by Education and Inspections Act 2006, s.157, s.184, Sch.14, para.85(3), Sch.18, Part 5;

s.81—s.81(2) amended by Education and Inspections Act 2006, s.157, Sch.14, para.87—s.81(2) amended by Children Act 2004, s.24(2);

s.96—Substituted by Education and Inspections Act 2006, s.157, Sch.14, para.88 (for Transitional and Supplementary Provisions See Children Act 2004, s.30(1));

s.113—s.113(1)(c) amended by National Health Service (Consequential Provisions) Act 2006, s.2, Sch.1, para.242—s.113(4)(a) amended and s.113(4)(aa) inserted by Public Services Ombudsman (Wales) Act 2005, s.39(1), Sch.6, para.75;

s.114—s.114(5)(a) amended by Local Government and Public Involvement in Health Act 2007, s.182, Sch.12, para.18—s.114(1)(c) amended by National Health Service (Consequential Provisions) Act 2006, s.2, Sch.1, para.243—s.114(5)(b) substituted by Public Services Ombudsman (Wales) Act 2005, s.39(1), Sch.6, para.76(b) [s.114(5)(a) partially repealed Public Services Ombudsman (Wales) Act 2005, s.39, Sch.6, para.76(a), Sch.7];

s.120—s.120(1A), (3A), (5) inserted, s.120(2), (4) amended and s.120(3) substituted by Education and Inspections Act 2006, s.157, Sch.14, para.91;

s.122—s.122(1) amended by National Health Service (Consequential Provisions) Act 2006, s.2, Sch.1, para.244;

s.124—s.124(6) amended by National Health Service (Consequential Provisions) Act 2006, s.2, Sch.1, para.245;

s.148—s.148 amended by Education and Inspections Act 2006, s.157, Sch.14, para.93—s.148 amended by National Health Service (Consequential Provisions) Act 2006, s.2, Sch.1, para.246 [Partially repealed by Local Government and Public Involvement in Health Act 2007, s.146, s.241, Sch.9, para.1(2)(v), Sch.18, Part 9] [For Transitional and Supplementary Provisions see Local Government and Public Involvement in Health Act 2007, s.146(4)];

s.150—s.150(7)(a) substituted; s.150(7)(c) and (d) amended by National Health Service (Consequential Provisions) Act 2006, s.2, Sch.1, para.247—s.150(7)(d)(ii) substituted by Health Act 2006, s.80, Sch.8, para.55;

s.153—s.153(9) substituted by Health Act 2006, s.73;

s.155—s.155(7) amended by Tribunals, Courts and Enforcement Act 2007, s.62(3), Sch.13, para.152;

s.157—s.157(3)(a) amended by Constitutional Reform Act 2005, s.59(5), Sch.11, para.1(2);

s.160—s.160(4) amended by National Health Service (Consequential Provisions) Act 2006, s.2, Sch.1, para.248;

s.162—s.162(6) amended by National Health Service (Consequential Provisions) Act 2006, s.2, Sch.1, para.249;

s.165—s.165(3)(b)(ii) and (5) amended by National Health Service (Consequential Provisions) Act 2006, s.2, Sch.1, para.250;

s.168—Amended by National Health Service (Consequential Provisions) Act 2006, s.2, Sch.1, para.251;

s.194—Amended by National Health Service (Consequential Provisions) Act 2006, s.2, Sch.1, para.252;

s.195—s.195(2) amended by The National Health Service (Pre-consolidation Amendments) Order 2006 (S.I. 2006/1407, art.2, Sch.1, Part 2, para.14) re: E/W only. s.195(1) repealed by National Health Service (Consequential Provisions) Act 2006, s.6, Sch.4;

Schedule (Sch). 6—paras.3(1)(a)-(c), (11) amended by Health Act 2006, s.80, Sch.8, para.58(2)(a), (b), (4)(a), (b) para.3(2)-(3), (9)-(10), (14)-(15) repealed by Health Act 2006, s.80, Sch.8, para.58(3), Sch.9; and

Sch 7—para.3(1) amended by Health Act 2006, s.80, Sch.8, para.59(2) para.5(2) repealed by Education and Inspections Act 2006, s.157, s.184, Sch.14, para.94, Sch.18, Part 5 para.3(2), (6)-(8) repealed by Health Act 2006, s.80, Sch.8, para.59(3), Sch.9.

The Health and Social Care Bill will, subject to parliamentary consent, merge the Commission for Healthcare Audit and Inspection, the CSCI and the Mental Health Act Commission into the Care Quality Commission. The Bill will also replace the 'duty of quality' by a duty on primary care trusts to seek continuous improvement.

Health Education

Mr. Lansley: To ask the Secretary of State for Health how much funding will be provided to support the Reduce Your Risk campaign in *(a)* 2009-10 and *(b)* 2010-11, as referred to on page 35 of his Department's document High Quality Care for All, Cm. 7432; through what media he plans the Reduce Your Risk campaign to be communicated; and if he will make a statement. [219366]

Ann Keen: We have made provision in the overall Department's financial plans of £150 million in 2009-10 and £400 million in 2010-11 to cover all of the new policy commitments in the NHS Next Stage Review. We are confident all the commitments are affordable within this overall total, though precise funding for individual initiatives is still subject to further detailed planning work on implementation including whether they are taken forward nationally or by the national health service locally. Decisions on the media through which this campaign is to be communicated will depend on research and analysis by marketing experts.

Health Services

Mr. Lansley: To ask the Secretary of State for Health (1) with reference to page 10 of the NHS Next Stage Review Final Report, how much additional funding his Department plans to allocate to support the introduction of integrated fit for work services *(a)* in 2008-09 and *(b)* in 2009-10; and how many additional staff he estimates will be required for these services to be fully implemented; [219377]

(2) what central funding his Department plans to provide in support of Fit for Work services, as referred to on page 38 of High Quality Care for All, Cm 7432, whether he plans to pilot fit for work services; whether fit for work services will be designed on a *(a)* national and *(b)* local basis; and if he will make a statement. [221018]

Mr. Ivan Lewis: A cross-Government group is now looking at different models for piloting a new 'fit for work' service for people in the early stages of sickness absence, to test out whether this can help people back to appropriate work faster.

Detailed economic modelling is being undertaken to determine the optimum number of pilots and models of service delivery for piloting, including the costs, workforce requirements and where services should be delivered. Costs and staff mix of any further implementation will depend on the outcome and evaluation of the pilots, expected to begin next year.

Health Services: Elderly

Mr. Andrew Smith: To ask the Secretary of State for Health what account he takes of *(a)* trends in the age profile of the population and *(b)* the requirements of the ageing population in establishing priorities for medical research (i) in and (ii) funded by his Department; and if he will make a statement. [221038]

Dawn Primarolo: The Government's health research strategy Best Research for Best Health explicitly recognises the impact demographic and other changes have on the need for research that provides new evidence and knowledge.

The Department funds the Personal Social Services Research Unit at the London School of Economics. Work on the heath and social care costs of the changing age profile of the population has for some years been a central part of the Unit's remit.

The Department, with other Government Departments, also funds the English Longitudinal Survey of Ageing (ELSA). ELSA collects comprehensive and detailed data on the changing needs and experiences of the country's ageing population, including assessments of mental and physical functioning. These data can play a key part in helping to identify and prioritise future medical research.

The Department is working actively with other research commissioners in the UK Ageing Research Funders' Forum to map existing research relevant to ageing. By identifying the gaps in current research activity, this process will help to establish priorities for new research in medical and other fields.

Health Services: North Yorkshire

Miss McIntosh: To ask the Secretary of State for Health (1) what the annual management costs of each primary care trust in North Yorkshire were in each of the last three years for which figures are available; [219688]

(2) what the projected management costs of the York and North Yorkshire Primary Care Trust are for *(a)* 2008-09, *(b)* 2009-10 and *(c)* 2010-11. [219690]

Ann Keen: Information on the annual management costs of each primary care trust (PCT) in North Yorkshire for 2004-05, 2005-06 and 2006-07 is shown in the following table.

£000

	Managers costs		
Organisation name	*2004-05*	*2005-06*	*2006-07*
Selby and York PCT	4,725	3,940	—
Hambleton and Richmondshire PCT	2,323	2,300	—
Craven, Harrogate and Rural District PCT	3,249	3,694	—
Scarborough, Whitby and Ryedale PCT	2,285	2,653	—
North Yorkshire and York PCT	—	—	11,709

Notes:
1. 2006-07 is the latest year for which data are held.
2. The North Yorkshire and York PCT was formed in October 2006 following a merger of the Selby and York, Hambleton and Richmondshire, Craven, Harrogate and Rural District, and Scarborough, Whitby and Ryedale PCTs.

Source:
Audited PCT summarisation schedules 2004-05 to 2006-07.

Data on the projected management costs of the North Yorkshire and York PCT are not held centrally.

Health: Children

Mrs. Riordan: To ask the Secretary of State for Health what plans his Department has to increase levels of children's health and well-being. [220031]

Ann Keen: Improving outcomes for children is a priority across the range of responsibilities of the Government. The Children's Plan, "Building Brighter Futures" (2007) (copies of which are available in the Library), reiterated our long-term commitment to improving the physical, mental and emotional health and wellbeing of children and young people from conception to adulthood and set out how the work is focused towards achieving a long-term vision.

With colleagues in the Department for Children, Schools and Families, we have established a dedicated Public Service Agreement to focus improvements and investment in child health and wellbeing, and are working on the development of a child health strategy planned for publication in September.

Mr. Harper: To ask the Secretary of State for Health when he will publish the Child Health Strategy; and if he will make a statement. [220224]

Ann Keen: The strategy will be published in September. This will enable us to take account of the National Health Service Next Stage Review, and to build in further consultation with key stakeholders, young people and parents.

Health: Travelling People

Andrew George: To ask the Secretary of State for Health what steps his Department is taking to improve the health of Gypsy and Traveller communities. [220063]

Mr. Ivan Lewis: In 2004 the university of Sheffield published its research into the health status of Gypsies and Travellers. The research had been commissioned by the Department. In response to the research, the Department—in consultation with Gypsy and Traveller communities and NHS organisations—has embarked on work to improve the health status of community members. As part of the Department's Pacesetters

programme, designed to address health inequalities that arise from discrimination and disadvantage, the 18 participating trusts are trialling ways to improve access to the NHS for Gypsies and Travellers. In addition, DH intends to take forward work to develop a primary care commissioning framework for Gypsies and Travellers as part of wider work for transient populations. Results of both pieces of work will be disseminated widely throughout the NHS over the next 12 to 24 months.

Herbal Medicine

Mrs. Riordan: To ask the Secretary of State for Health (1) what estimate he has made of the costs per product of conducting tests to demonstrate compliance with the key provisions of European Medicines Evaluation Agency guidance in relation to applications for registration under the Traditional Herbal Medicinal Products Directive; [220534]

(2) what estimate he has made of the number of specialist *(a)* retailers, *(b)* manufacturers and *(c)* distributors of herbal remedies who have ceased trading or intend to cease trading as a result of the impact of the Traditional Herbal Medicinal Products Directive. [220535]

Dawn Primarolo: The guidelines on the quality of herbal medicinal products prepared by the European Medicines Agency largely reflect good practice identified by the herbal industry. In its regulatory impact assessment of the traditional herbal registration (THR) scheme the Medicines and Healthcare products Regulatory Agency (MHRA) estimated that typically the costs of registering a product under the scheme could be several tens of thousand pounds but that the figure would vary widely according to specific circumstances, not least depending on whether companies already had systematic quality control systems in place. This assessment has not changed. The MHRA would expect some rationalisation in the manufacturing of herbal medicines reflecting the fact that to carry out this activity to systematic standards within a regulated environment requires specialist expertise. However, there is no basis on which to make specific estimates and feedback to the MHRA from individual companies suggests that many are still developing their plans. So far 14 companies have submitted applications to register one or more product in the United Kingdom under the THR scheme and we therefore anticipate that there will be a competitive market.

Mr. Todd: To ask the Secretary of State for Health (1) what herbal products are available on the market under the provisions of section 12 (2) of the Medicines Act 1968; and for which of those products an application has been received by the Medicines and Healthcare products Regulatory Agency for registration under the provisions of the Traditional Herbal Medicinal Products Directive; [220891]

(2) when *(a)* Ministers from his Department and *(b)* officials from the Medicines and Healthcare products Regulatory Agency last met representatives of the European Commission to discuss the impact of the Traditional Herbal Medicinal Products Directive on specialist manufacturers, retailers and consumers of herbal remedies; and what the outcomes were of those meetings. [220892]

Dawn Primarolo: Companies are not required to notify the Medicines and Healthcare products Regulatory Agency (MHRA) of products marketed under section 12(2) of the Medicines Act 1968. The information requested is not therefore available.

Ministers and officials of the MHRA have not met representatives of the European Commission to hold specific discussions on the impact of the Directive on traditional herbal medicinal products. However, the MHRA has had a number of opportunities, for example through sharing a platform at conferences, to update Commission officials on the agency's early experience of the expending number of companies submitting applications under the traditional herbal registration scheme. The MHRA also submitted evidence in 2007 to the Commission's review of Directive 2004/24/EC.

HIV Infection: Prisons

Mr. Evans: To ask the Secretary of State for Health how many prison inmates were tested for HIV or AIDS in each year since 2003. [221199]

Mr. Ivan Lewis: The information requested is not collected. The last major study of HIV, hepatitis B and hepatitis C prevalence in prisoners in England and Wales found that of 3,942 prisoners surveyed in 1997 and 1998, 0.4 per cent. were infected with HIV, 8 per cent. with hepatitis B and 7 per cent. with hepatitis C.

Source:

Prevalence of HIV, hepatitis B and hepatitis C antibodies in prisoners in England and Wales: a national survey.

Weild A.R., Gill O.N., Bennett D., Livingstone S.J.M., Parry J.V., Curran L. (2000). Communicable Disease and Public Health 2000;3:121-6.

Mr. Evans: To ask the Secretary of State for Health how much it cost to treat prisoners with HIV and AIDS in each year since 2003. [221200]

Mr. Ivan Lewis: The information requested is not available, as the costs of healthcare services in each prison are not disaggregated.

Mr. Evans: To ask the Secretary of State for Health how many prison inmates contracted *(a)* HIV and *(b)* AIDS in each year since 2003. [221201]

Mr. Ivan Lewis: The information requested is not available.

Hospices: Finance

Mr. Jamie Reed: To ask the Secretary of State for Health (1) what funding his Department is providing for hospice care within the NHS in *(a)* 2008-09 and *(b)* 2009-10; [219888]

(2) what funding his Department is providing for hospice care in the voluntary sector in *(a)* 2008-09 and *(b)* 2009-10. [219889]

Mr. Ivan Lewis: Decisions on funding for end of life care services, including the provision of hospice care in the national health service or voluntary sector, are a matter for local primary care trusts who are responsible for commissioning services to meet the needs of their local population.

The End of Life Care Strategy published on 16 July 2008, sets out a clear direction for delivering and ensuring access to high quality, responsive services across all settings for all adult patients at the end of life irrespective of who or where they are. To support the implementation of the strategy we will be investing an additional £286 million in end of life services in the two years up to 2011. This will include a £40 million capital fund for hospices to improve their facilities in 2010-11.

Hyperactivity

Tim Loughton: To ask the Secretary of State for Health how many children were diagnosed with attention deficit hyperactivity disorder in each of the last 10 years, broken down by primary care trust. [217025]

Mr. Ivan Lewis: Information is not collected on the number of people diagnosed with attention deficit hyperactivity disorder (ADHD). In 2006, the National Institute for Health and Clinical Excellence (NICE) published guidance entitled 'Methylphenidate, atomoxetine and dexamfetamine for attention deficit hyperactivity disorder (ADHD) in children and adolescents' on the use of drugs to treat ADHD. NICE has estimated that around 5 per cent. of school-aged children meet the diagnostic criteria for ADHD, equivalent to 366,000 children and adolescents in England and Wales, but not all these children will require medication.

Maternity Services

Sandra Gidley: To ask the Secretary of State for Health how many maternity units there were in the NHS in each of the last five years. [218075]

Ann Keen: We do not routinely collect this information centrally. The Healthcare Commission asked for this information as a one-off exercise and at March 2007, there were 382 maternity units in England.

Medical Equipment

Andrew Rosindell: To ask the Secretary of State for Health what progress has been made on the proposed retail model for transforming community equipment services; and if he will make a statement. [219916]

Mr. Ivan Lewis: The retail model developed for community equipment met with overall approval from the sector. The outline business case was sufficiently robust to support developing the outline model to operational status. This has been undertaken through a shadow running process in the north-west with local authority and health partners in Cheshire, Manchester and Oldham.

Through shadow running, users and their carers have been able to take an equipment prescription for simple aids to daily living to an accredited retailer and receive in exchange the prescribed equipment. The users own the equipment. They were also able to top up this prescription to a product that better suited their lifestyle and pay the difference to the retailer.

The shadow running process demonstrated improvements in the user experience and efficiency of the service. Cheshire and Oldham have decided to implement the model locally. This confirms that, in their areas, the new prescription processes have been demonstrated to be effective and are capable of being scaled up to support full implementation of the retail model.

Members: Correspondence

Ian Stewart: To ask the Secretary of State for Health when a reply will be sent to the hon. Member for Eccles' correspondence of 4 February and 23 April 2008 on the hepatitis B vaccine. [219867]

Dawn Primarolo: A reply was sent to the hon. Member on 21 July 2008.

Mental Health Services

Lynne Jones: To ask the Secretary of State for Health pursuant to the answer of 25 June 2008, *Official Report*, columns 363-4W, on mental health services, what was the *(a)* revenue and *(b)* capital expenditure on Tier 5 services for people with personality disorders in each year since 2005. [215691]

Mr. Ivan Lewis: The information requested is not held centrally.

However, a Personality Disorder Service, based on the Therapeutic Community Model, was nationally commissioned from three residential centres; Henderson Hospital in London, Main House in Birmingham and Webb House in Crewe, for a time limited period, between 1999 and 2006, while an evaluation was carried out. It was then returned to national health service commissioning in April 2006.

The budget for these three units when they were nationally commissioned was £6.2 million in each of the years 2004-05 and 2005-06.

Jo Swinson: To ask the Secretary of State for Health (1) what estimate he has made of the annual cost to the NHS of treating stress-related conditions; [220693]

(2) how many people were diagnosed with stress-related conditions in each of the last 10 years. [220694]

Mr. Ivan Lewis: This information is not collected centrally.

Mental Health Services: Leeds Prison

John Battle: To ask the Secretary of State for Health what arrangements are being made to provide therapeutic services for prisoners with mental health problems in Leeds prison; and if he will make a statement. [220715]

Mr. Ivan Lewis: Psychological therapies are commissioned by primary care trusts (PCTs). When commissioning these services for prisoners, PCTs will assess the needs of their population and as with all other health provision, consideration will be given as to how services will be delivered to address these needs. This will be determined locally as part of a PCT's commissioning responsibility.

Mental Health Services: Young Offenders

Mrs. Moon: To ask the Secretary of State for Health what estimate he has made of the average time between initial assessment by a psychiatrist at *(a)* Ashfield and *(b)* Huntercombe young offender institution and transfer to a medium secure hospital for young people funded by a primary care trust. [219240]

Mr. Ivan Lewis: This information is not held centrally.

The "Procedure for the Transfer of Prisoners to and from Hospital under Sections 47 and 48 of the Mental Health Act 1983" was published in December 2007 with contributions from the Department, HM Prison Service and National Commissioning Group. The National Commissioning Group are responsible for commissioning a range of specialist services including the national in-patient Secure Forensic Mental Health Service for Young People, which oversees in-patient treatment and referrals to seven specialist units for under-18s in England.

The "Procedure for the Transfer of Prisoners to and from Hospital under Sections 47 and 48 of the Mental Health Act 1983" aims to help colleagues to work together more effectively to secure and sustain significant improvements in any unacceptable delays transferring patients from custodial care to hospital care and includes a specific section on young people. The procedure states that a child with an acute need for a mental health secure bed should be moved within seven days.

Mental Health Services: Young People

Mrs. Moon: To ask the Secretary of State for Health (1) how many people were awaiting access to a medium secure hospital bed for young people at the latest date for which figures are available; [219224]

(2) how many medium secure hospital beds are available for young people with learning disabilities. [219225]

Mr. Ivan Lewis: The information requested is not held centrally.

Mentally Ill: Carers

John Battle: To ask the Secretary of State for Health what his latest estimate is of the number of carers caring for family members with mental health needs. [218026]

Mr. Ivan Lewis: No such estimate has been made. However, the 2001 census was the first time information on the numbers of carers was available on the basis of a detailed count. The 2001 census indicates that there are some 6 million people providing unpaid care in the United Kingdom. Some of these cared for people will have mental health issues. However, this figure does not necessarily reflect the number of individuals being cared for, as there is not a one to one ratio of carers to care-recipients.

The contribution carers make is recognised in law and the policies of central and local government.

Methadone

Dr. Kumar: To ask the Secretary of State for Health how many patients have been prescribed methadone to help combat drug addiction in *(a)* England, *(b)* London, *(c)* the north-east, *(d)* the Tees Valley district and *(e)* Middlesbrough South and East Cleveland constituency in each year since 1997. [219857]

Dawn Primarolo: Information on the number of people prescribed a medicine is not collected centrally. However, the number of prescription items prescribed for methadone[1] is shown in the following table. Information is only held for the last 60 months and is based on the national health service organisation that most closely represents the areas requested.

NHS organisation	*2004-05*	*2005-06*	*2006-07*	*2007-08*
England (community)	1,031,215	1,251,786	1,522,924	1,828,577
England (hospitals)	740,741	767,843	727,310	654,089
NHS London[2]	93,834	97,764	108,662	115,326
North-east total	102,154	134,419	160,066	176,869
NHS North East	—	—	122,840	176,869
Northumberland, Tyne and Wear strategic health authority	28,037	38,118	11,984	—
County Durham and Tees Valley strategic health authority	74,117	96,301	25,262	—
Stockton on Tees Teaching primary care trust	16,481	21,484	21,702	21,627
Middlesbrough primary care trust[3]	27,110	31,148	30,080	31,032
Redcar and Cleveland primary care trust[4]	1,610	2,522	4,877	5,439

[1] Methadone is licensed for use in opioid dependence, as an analgesic and as a cough suppressant. The figures provided are for prescriptions written under British National Formulary (BNF) section 4.10 – drugs used in substance dependence.
[2] North West London Strategic Health Authority (SHA), North Central London SHA, North East London SHA, South East London SHA and South West London SHA merged in 2006 to become NHS London.
[3] Part of Middlesbrough Primary Care Trust (PCT) joined with others to form Redcar and Cleveland PCT in 2006. Middlesbrough PCT remained but as a smaller PCT.
[4] Langbaurgh PCT merged with part of Middlesbrough PCT and became Redcar and Cleveland PCT in 2006.
Source:
Prescribing Analysis and Cost Tool (PACT)

Mr. Brady: To ask the Secretary of State for Health if he will take steps to ensure that users of methadone who receive the drug on prescription are made aware of the risks associated with allowing children in their care access to the drug. [220095]

Dawn Primarolo: In September 2007 the Department, in collaboration with the National Treatment Agency for substance misuse (NTA) published guidelines for the clinical management of drug treatment services, "Drug Misuse and Dependence: UK Guidelines on Clinical Management".

The guidelines note that patients prescribed methadone

> "must be made fully aware of the risks of their medication and of the importance of protecting children from accidental ingestion. Prescribing arrangements should also aim to reduce risks to children".

The guideline goes on to note that during assessment clinicians should inform patients of the

> "risks to children of ingesting prescribed medication and the importance of safe storage must be emphasised at the first appointment and repeatedly thereafter. Assessment of compliance with these safety measures should form part of the decision-making concerning dispensing and supervision arrangements"

of methadone prescribing.

In January 2007, the National Institute for Health and Clinical Excellence published the "Technology Appraisal" "Methadone and buprenorphine for managing opioid dependence", which recommended the use of both methadone and buprenorphine for the treatment of opioid dependence.

This Appraisal notes the risks that the use of methadone (or buprenorphine) has for non-drug users, especially children who may be at risk of accidental ingestion, and that

> "the responsible clinician, in consultation with the person, should estimate the risks and benefits of prescribing methadone or buprenorphine, taking account of the person's lifestyle and family situation (for example, whether they are considered chaotic and might put children and other opioid-naive individuals living with them at risk)".

Local clinical governance protocols for drug treatment would normally require recording of any serious incidents concerning the 'misuse' of prescribed methadone so that appropriate action can be taken to ensure that any risk or harm is minimised and is not repeated.

Earlier this year the NTA launched a consultation on clinical governance in drug treatment, with the aim of publishing guidance later this year. This will help commissioners and service providers shape the local implementation of clinical governance systems in this important area.

National Institute for Health and Clinical Excellence

Mr. Lansley: To ask the Secretary of State for Health when he plans to establish a fellowship programme for the National Institute for Health and Clinical Excellence, as referred to on page 49 of High Quality Care for All, Cm 7432. [221029]

Dawn Primarolo: The Department is working with the National Institute for Health and Clinical Excellence and other stakeholders to develop detailed proposals for the establishment of a fellowship programme over the coming months.

NHS: Crimes of Violence

Mr. Jenkins: To ask the Secretary of State for Health what steps his Department is taking to reduce the incidence of violent attacks against NHS staff. [220130]

Ann Keen: The NHS Security Management Service (NHS SMS) was created in April 2003, with policy and operational responsibility for security management within the national health service. A comprehensive strategy has been implemented detailing the preventative proactive and reactive action that is to be taken both nationally and locally to tackle this problem.

A network of local security management specialists (LSMS) supported nationally by the NHS SMS guidance, has been introduced. LSMS are tasked with ensuring that security work within their individual health bodies is effective. In particular they are guided to ensure that every incident of violence against NHS staff is reported, acted upon and evaluated so that measures can be adopted to prevent repeated incidents.

In 2006 the NHS SMS signed agreements with the Association of Chief Police Officers and the Crown Prosecution Service (CPS), outlining how the NHS, CPS and police will work together to drive down assaults and ensure tougher punishment for offenders. It commits the police, CPS and NHS to pursue every reported incident of violence and abuse.

Mandatory conflict resolution training has also been introduced for all frontline NHS staff, with over 450,000 staff trained by March 2008.

A national physical assault reporting system (PARS) has been developed to monitor and respond to incidents of assault against NHS staff. Using a clear definition as to what constitutes a physical assault, figures for the number of reported assaults against NHS staff 2006-07, released on 5 November 2007, indicate there were 4,676 fewer than 2004-05. The number of criminal sanctions against those perpetrating violence against NHS staff, also released in November 2007, rose to 869, a 17-fold increase from 2002-03 when figures were first collected.

New measures to tackle nuisance and disturbance behaviour on NHS premises have also been introduced in the Criminal Justice and Immigration Act 2008. As well as reducing the impact of this behaviour on the delivery of health care, this legislation gives health bodies the power to remove an individual displaying this behaviour before an incident may escalate into violence.

A project to identify the best available alarm device technology to protect vulnerable lone workers is currently under way. The project will centrally fund the allocation of up to 30,000 devices and introduce a purchasing framework whereby health bodies can purchase any further requirements at the best price possible.

Training for all frontline staff in preventative skills remains a commitment as does the development of the network of LSMS in health bodies to ensure that all effective action is taken to prevent and deter violence against all NHS staff.

Mr. Jenkins: To ask the Secretary of State for Health how many nurses in England have reported being the subject of a violent incident perpetrated by *(a)* a patient and *(b)* a family member or friend of a patient in each of the last five years. [220131]

Ann Keen: The information is not available in the format requested and could be obtained only at disproportionate cost.

For information on the numbers of reported physical assaults against national health service staff, I refer my hon. Friend to the answer I gave the hon. Member for East Devon (Mr. Swire) on 4 March 2008, *Official Report*, columns 2390-1W.

NHS: Drugs

Mr. Lansley: To ask the Secretary of State for Health (1) in what ways he plans to monitor progress against the aim to end the postcode lottery in new drugs and treatments, as referred to in paragraph 4.18 of his Department's consultation on the NHS constitution; [220987]

(2) when he plans to issue directions under the National Health Service Act 2006 concerning the process primary care trusts (PCTs) need to adopt in making decisions on the funding of drugs and treatments which have not been recommended by the

National Institute for Health and Clinical Excellence, as referred to on page 16 of his Department's document Handbook to the draft NHS Constitution; and whether he plans to strengthen sanctions for those PCTs which do not adhere to the directions; [221146]

(3) what plans he has to bring forward legislative proposals to give statutory effect to patients' right to drugs and treatments that have been recommended by the National Institute for Health and Clinical Excellence; what plans he has to strengthen the sanctions for primary care trusts which breach this right; and if he will make a statement. [221249]

Dawn Primarolo: The draft NHS Constitution was published on 30 June 2008 and the Government's proposals are open for public consultation until 17 October 2008. The Government will consider implementation, monitoring arrangements and legislation following the consultation.

NHS: Pensions

Mary Creagh: To ask the Secretary of State for Health on what basis social enterprises will be given access to the NHS Pension Scheme. [220006]

Ann Keen: My right hon. Friend The Secretary of State would grant closed directions under section 7(2) of the Superannuation (Miscellaneous Provisions) Act 1967 in respect of staff transferred under the Transfer of Undertakings (Protection of Employment) Regulations (TUPE) to qualifying social enterprises. A qualifying social enterprise is a business with primarily social objectives whose surpluses are principally reinvested for that purpose in the business or in the community. The following legal forms will be acceptable; a registered charity, a community interest company or an industrial and provident society. The terms of the direction would mean that staff would be able to remain members of the NHS Pension scheme. The direction would be specific to the staff named on the direction, the organisation applying for the direction and to them remaining working wholly on the contract in respect of which they were transferred or other national health service contracts. If staff are subsequently transferred to another social enterprise or organisation qualifying for a direction, then a further direction would be granted in respect of those transferring staff. Directions will not cover a member of staff recruited individually in the open market from the NHS or elsewhere.

Obesity: Halifax

Mrs. Riordan: To ask the Secretary of State for Health what estimate he has made of the number of people diagnosed with obesity in Halifax over the last 10 years. [220010]

Dawn Primarolo: This information is not collected centrally.

Obesity: Health Services

Mr. Lansley: To ask the Secretary of State for Health what new resources he will provide to those areas worst affected by *(a)* obesity-related and *(b)* alcohol-related ill health, as referred to on page 37 of his Department's document High Quality Care for All, Cm 7432; whether these resources will be provided on a one-off or recurrent basis; whether the resources will be provided to primary care trusts on a conditional basis; and if he will make a statement. [219361]

Dawn Primarolo: As part of the £372 million allocated to the delivery of Healthy Weight, Healthy Lives: A Cross-Government Strategy for England, £65.9 million has been put into primary care trust (PCT) allocations for 2008-09. PCT allocations for 2009-10 and 2010-11 will be set later this year.

The Health Inequalities: Progress and Next Steps document published in June 2008 recognised the significance of obesity as one of the most important long-term challenges facing the nation's health and that obesity and its risks are not experienced equally across society. Within the document, the Government announced that they would test a "full service" model of local programme and services, to both prevent and tackle child and adult overweight and obesity in areas with the highest rates of child and adult obesity. Levels of investment will depend on the outcome of this piloting as well as subsequent implementation decisions by the NHS within overall PCT allocations.

Lord Darzi's review, High Quality Care For All recognises the role that the "full service" model can play as an exemplar in supporting preventative healthcare.

The Health Inequalities: Progress and Next Steps document also referred to the higher levels of alcohol-related mortality and hospital admissions within disadvantaged communities. The document committed to establishing a new National Support Team for Alcohol, which will provide in-depth analysis and direct support to Primary Care Trusts to "turn around" local performance in the areas with the highest rates of alcohol-related hospital admissions. The first five to 10 areas covered in 2008-2009 will be able to bid for additional funding over each of the next three years to support local improvements. The total investment over the next three years is subject to finalising PCT allocations for 2009-10 and 2010-11, which will be set later this year.

Obesity: Surgery

Mr. Jenkins: To ask the Secretary of State for Health how many patients had gastric bypass surgery in hospitals in each of the last three years for which figures are available, broken down by *(a)* sex and *(b)* age. [215762]

Dawn Primarolo: The information requested is not available in the format requested. Such information as is available has been placed in the Library.

I regret that part of the reply I gave to the hon. Member for North Norfolk (Norman Lamb) on 20 May 2008, *Official Report*, column 203W, providing figures of gastric bypass surgery in each hospital trust was incorrect. The correct information has been placed in the Library.

Gastric bypass surgery may be performed for a number of reasons, such as on patients with gastric malignancies, obesity, trauma to the stomach or benign gastric conditions.

Occupational Health

Mr. Lansley: To ask the Secretary of State for Health in what ways companies will be required to report on their employees' *(a)* health and *(b)* well-being as referred to on page 37 of his Department's document High Quality Care for All, Cm 7432. [219360]

Mr. Ivan Lewis: The cross-Government Health Work and Well-Being Unit is working with Business in the Community (BiTC) in support of their Business Action on Health campaign through the provision of a tool called the 'business healthcheck'. The aim is to secure voluntary commitment from 75 per cent. of FTSE 100 companies, and 20 per cent. of BiTC members, to report on health and well-being as a boardroom issue by 2011. The manner of reporting will vary in different organisations but the key point will be raising the profile of staff health and well-being at boardroom level.

Orthopaedics

Mr. Andrew Smith: To ask the Secretary of State for Health what his Department's strategy for research into orthopaedic needs and treatment is; and if he will make a statement. [221039]

Dawn Primarolo: The Government's health research strategy is set out in the document 'Best Research for Best Health' copies of which has already been placed in the Library. The strategy is being implemented by the National Institute for Health Research (NIHR). NIHR programmes support high quality research of relevance and in all areas of priority to patients and the national health service. Details, including the scope of the programmes, are available on the NIHR website at www.nihr.ac.uk.

Palliative Care

Mr. Stephen O'Brien: To ask the Secretary of State for Health if he will introduce payment by results for *(a)* the NHS and *(b)* the voluntary sector providers of end of life care services. [221429]

Mr. Ivan Lewis: We have no timetable for including end of life care in payment by results (PbR).

Several local health economies are currently investigating PbR-type funding approaches for specialist palliative care and community services, as PbR 'development sites.'

Prescriptions: Fees and Charges

Mr. Laurence Robertson: To ask the Secretary of State for Health what criteria govern the selection of illnesses for which free prescriptions will be provided; and if he will make a statement. [220501]

Dawn Primarolo: The list of medical conditions giving prescription charge exemption was agreed in discussion with the medical profession and introduced in 1968. The Government will be inviting comments on possible options for cost neutral changes to prescription charges and exemptions later this year.

Primary Care Trusts: Equality

Dr. Gibson: To ask the Secretary of State for Health (1) which primary care trusts have completed a local equality impact assessment; and whether such assessments are collated centrally; [220016]

(2) what requirements there are for primary care trusts to conduct local equality impact assessments; and what requirements there are for such assessments to cover cancer. [220017]

Mr. Ivan Lewis: All primary care trusts (PCTs) have a duty to undertake and publish equality impact assessments (EqIAs). These are not centrally collected by the Department. However, the Healthcare Commission has conducted audits of national health service trusts to look at whether trusts have published the required information. Each PCT is required under the equality legislation to equality impact assess their functions, policies, strategies and procedures. The Healthcare Commission when inspecting PCTs will assess the quality of the EqIA which will go towards their annual rating.

The 'Cancer Reform Strategy' was published in December 2007 (copies of which have already been placed in the Library) and has an equality impact assessment which highlights the strategic equality issues regarding cancer which are there to inform PCTs of the issues they should take in due regard when commissioning their own cancer services.

Protection

Sandra Gidley: To ask the Secretary of State for Health how much his Department has spent on adult protection procedures in England in the last five years. [220853]

Mr. Ivan Lewis: The information requested is not available centrally. The Department is responsible for setting policy on adult protection procedures. Implementation of this policy is the responsibility of local councils. Councils are free to determine expenditure on adult protection procedures according to local needs and priorities. They must, of course, discharge their statutory responsibilities.

Sandra Gidley: To ask the Secretary of State for Health (1) whether an equality impact assessment *(a)* has been conducted and *(b)* is planned before the conclusion of the No Secrets review of the adult protection arrangements; [220854]

(2) how service users are being involved in the No Secrets review of care for vulnerable adults; [220855]

(3) what work is being done as part of the No Secrets review of care for vulnerable adults to *(a)* learn lessons from local authority inquiries that have raised issues about adult protection procedures and *(b)* collect examples of good practice in adult protection. [220856]

Mr. Ivan Lewis: The Department is preparing to publish a national consultation on the "No Secrets" guidance. This consultation identifies a large number of issues and questions about how to improve adult protection and the wider safeguarding of people who are at risk of or who have already experienced abuse. We are working to develop a consultation strategy which involves people

who are service users and people who are not—as well as stakeholders who are already active in this field. We are also working with the large advisory board for "No Secrets" and discussing how member organisations can take an active part in contributing the views of people they are working with.

The consultation will invite people to contribute their views, their experiences and their thoughts about how to improve adult protection and safeguarding. We have already met large numbers of adult protection co-ordinators and safeguarding leads and sought their views as part of our early consultation events. We will continue to do this. We are also identifying safeguarding leads in the national health service in order to look at the issue more closely in a health context. In addition, we have commissioned a review of the lessons learned from serious case reviews.

An equality impact assessment is planned before the conclusion of the review.

Sexually Transmitted Diseases: Hertfordshire

Anne Main: To ask the Secretary of State for Health how many sexually transmitted infections were diagnosed at *(a)* Waverley Sexual Health Clinic, St. Albans and *(b)* in all genito-urinary medicine clinics in Hertfordshire in each of the last five years. [221436]

Dawn Primarolo: Information on the number of diagnoses of sexually transmitted infections (STIs) in genito-urinary medicine clinics (GUM) is currently only available at strategic health authority (SHA) level. The East of England SHA includes Hertfordshire.

The total number of new and other STIs diagnosed in the East of England SHA in the last five years is given in the table.

	2003	*2004*	*2005*	*2006*	*2007*
Total new STI diagnoses[1]	28,419	29,878	29,858	30,190	32,758
Total other STL diagnoses[2]	16,492	18,018	19,865	20,966	21,405

[1] New STIs include chlamydial infection (uncomplicated and complicated), gonorrhoea (uncomplicated and complicated), infectious syphilis, genital herpes simplex (first attack), genital warts (first attack), new HIV diagnosis, non-specific genital infection (uncomplicated and complicated), chancroid/lymphogranuloma venerum (LGV)/donovanosis, Molluscum contagiosum, trichomoniasis, scabies and Pediculus pubis.

[2] Other STIs include early latent, congenital and other acquired syphilis, recurrent genital, herpes simplex, recurrent and re-registered genital warts, subsequent HIV presentations (including AIDS), ophthalmia neonatorum (chamydial or gonococcal) and epidemiological treatment of suspected STIs (syphilis, chlamydia, gonorrhoea, non-specific genital infection).

Notes:

1. There are 22 GUM clinics in the East of England SHA.
2. There are two GUM clinics in East and North Hertfordshire PCT and two GUM clinics in West Hertfordshire.
3. The data available from the KC60 statutory returns are for diagnoses made in GUM clinics only. Diagnoses made in other clinical settings, such as General Practice, are not recorded in the KC60 dataset.
4. The data available from the KC60 statutory returns are the number of diagnoses made, not the number of patients diagnosed.
5. The information provided has been adjusted for missing clinic data.

Source:

Health Protection Agency, KC60 returns

Smoking

Mr. Lansley: To ask the Secretary of State for Health how much funding his Department has provided in *(a)* cash and *(b)* real terms in current prices in social marketing initiatives designed to support people to stop smoking in each year since 2005-06; what social marketing initiatives his Department has funded in each of those years; in which ways each has focused on communities with the greatest smoking prevalence, as referred to in paragraph 2.24 of his Department's Cancer Reform Strategy, published on 3rd December 2007; and if he will make a statement. [221148]

Dawn Primarolo: I refer the hon. Member to the written answer given to the hon. Member for Leicester, South (Sir Peter Soulsby) on 15 July 2008, *Official Report*, columns 361-363W.

The Department's marketing communication programmes are designed to target smokers from high smoking prevalence groups.

Matthew Taylor: To ask the Secretary of State for Health how many fines have been issued for smoking in a public place in *(a)* Cornwall, *(b)* each constituency in Cornwall, *(c)* the South West region and *(d)* England. [221682]

Dawn Primarolo: This information is not available in the requested form.

The latest data on compliance with Smokefree legislation are published regularly by the Department at a regional and national level on the Smokefree England website at www.smokefreeengland.co.uk.

Smoking: Mental Health Services

Lynne Jones: To ask the Secretary of State for Health (1) what representations he has received on extending the exemption from the ban on smoking in public places granted to mental health in-patient units; and if he will make a statement; [219772]

(2) what assessment he has made of the variations in policy on the operation of the ban on smoking in public places in mental health in-patient units; [219773]

(3) what assessment he has made of the advice given on giving up smoking to patients with a mental health problem by *(a)* GPs and *(b)* clinicians in secondary care; [219774]

(4) what assessment he has made of whether there are beneficial effects from smoking on coping with symptoms of mental distress. [219775]

Mr. Ivan Lewis: A small number of representations have been made in recent weeks from a small minority of establishments who have had difficulties meeting the deadline; additional help has been available to them over the course of the last year and support and advice is still being provided to make sure that they operate within the requirements of the law; the vast majority of mental health units have not encountered difficulties and indeed are benefiting from an end to the smoking den culture in mental health establishments.

The Government commissioned the Tobacco Control Collaborating Centre (TCCC) to provide support to mental health service providers in the lead-up to the implementation of the smokefree legislation in residential mental health units on 1 July 2008. Over the past year the TCCC wrote to all foundation trusts, national health service trusts and independent providers asking about their smokefree policies and inviting individual trusts to request additional support, such as visits. The TCCC has also worked with regional stop smoking leads to organise local workshops to address implementation issues. This initial contact was followed up by sending mental health providers smokefree resources, accompanied by a further offer of support to trusts on an individual basis. To date 24 mental health service providers have been visited.

Due to the one year gap between wider implementation of smokefree legislation and implementation in mental health units it is too early for comparisons to be made.

Currently, the Department has made no assessment of advice given on giving up smoking to patients with a mental health problem by either general practitioners or clinicians in secondary care and nor has an assessment been made of the beneficial effects of smoking on coping with symptoms of mental distress. However, the Government are committed to review the impact of the smokefree law in its entirety within three years of implementation.

Strokes

Tim Farron: To ask the Secretary of State for Health how many *(a)* heart attacks and *(b)* strokes were recorded in Westmoorland and Lonsdale in each month of (i) 2007 and (ii) 2008. [221516]

Ann Keen: This information is not collected in the format requested. However, information for the University Hospitals of Morecambe Bay National Health Service Trust for 2006-07 is shown in the following table.

Number of admissions for primary diagnoses of heart attacks and strokes for the University Hospitals of Morecambe Bay NHS Trust for 2006-07.

Primary diagnosis	*Number of admissions*
Stroke	609
Heart Attack	714

Notes:
1. Data are only available for the year 2006-07 and cannot be broken down by month.
2. The information can only be collected at trust level. The University of Morecambe Bay NHS Trust is the trust which closely corresponds to the Westmorland and Lonsdale area.
3. Data cannot be provided for the number of heart attacks and strokes recorded but are provided as the number of admissions to hospital with a primary diagnosis of a *(a)* stroke and *(b)* heart attack.
4. Finished admission episodes—A finished admission episode is the first period of in-patient care under one consultant within one healthcare provider. Please note that admissions do not represent the number of in-patients, as a person may have more than one admission within the year.
5. Data Quality—HES are compiled from data sent by over 300 NHS trusts and primary care trusts (PCTs) in England. Data are also received from a number of independent sector organisations for activity commissioned by the English NHS. The NHS Information Centre for health and social care liaises closely with these organisations to encourage submission of complete and valid data and seeks to minimise inaccuracies and the effect of missing and invalid data via HES processes. While this brings about improvement over time, some shortcomings remain.
6. Assessing growth through time—HES figures are available from 1989-90 onwards. During the years that these records have been collected there have been ongoing improvements in quality and coverage. These improvements in information submitted by the NHS have been particularly marked in the earlier years and need to be accounted for when analysing time series. Some of the increase in figures for later years (particularly 2006-07 onwards) may be due to the improvement in the coverage of independent sector activity. Changes in NHS practice also need to be accounted for when analysing time series. For example, a number of procedures may now be undertaken in outpatient settings and may no longer be accounted in the HES data. This may account for any reductions in activity over time.
7. Diagnosis (primary diagnosis)—The primary diagnosis is the first of up to 14 (seven prior to 2002-03) diagnosis fields in the HES data set and provides the main reason why the patient was in hospital.
8. Ungrossed Data—Figures have not been adjusted for shortfalls in data (i.e. the data are ungrossed).

Hospital Episode Statistics (HES), the NHS Information Centre for health and social care.

Sunbeds

Mr. Lansley: To ask the Secretary of State for Health what progress his Department is making towards gathering information about *(a)* the number and distribution of sunbeds and *(b)* the scale of sunbed use by minors, as referred to in paragraph 2.43 of his Department's Cancer Reform Strategy. [220932]

Ann Keen: We have carried out some preliminary scoping work and are examining the findings. We are also considering whether to commission further data collection and will make a decision about this in due course.

Mr. Lansley: To ask the Secretary of State for Health what discussions his Department has had with the Health and Safety Executive since 3 December 2007 on the regulation of the sunbed industry; and if he will make a statement. [220933]

Dawn Primarolo: Officials from the Department of Health and the Health and Safety Executive (HSE) have been in discussion concerning the revised, draft HSE guidance for tanning salon operators "Reducing health risks from the use of ultraviolet (UV) tanning equipment". We have also discussed with the HSE the need for possible further data to inform considerations on options for regulating the sunbed industry.

Transsexuality

Bob Russell: To ask the Secretary of State for Health what estimate he has made of the number of gender reassignment operations which will be carried out by NHS trusts in 2008-09. [214755]

Mr. Ivan Lewis: The Department has made no estimate of the number of gender reassignment procedures which will be carried out in 2008-09. The provision of these procedures is the responsibility of primary care trusts,

who will take into account a patient's individual clinical needs and the resources available to provide healthcare for their wider population.

Bob Russell: To ask the Secretary of State for Health how many gender reassignment operations were carried out by NHS trusts in *(a)* 2006-07 and *(b)* 2007-08. [214756]

Mr. Ivan Lewis: Figures for 2007-08 are not yet available. In 2006-07 there were 155 finished consultant episodes (FCEs) where an operative procedure for sexual transformation was performed by the national health service. A FCE is defined as a period of admitted patient care under one consultant within one healthcare provider. Figures for FCEs do not represent the number of patients, as a person may have more than one episode of care within the year.

Urology

Mr. Evans: To ask the Secretary of State for Health how much was spent on NHS genito-urinary medicine clinics in *(a)* Ribble Valley constituency, *(b)* Lancashire and *(c)* England in each year since 2000. [221203]

Dawn Primarolo: This information is not collected centrally.

The funding to support sexual health services is not allocated separately to primary care trusts (PCTs) but is contained within the mainstream revenue allocations made to PCTs. It is the responsibility of PCTs to commission the health services they need to meet the health requirements of the local populations they serve.

Wheelchairs

Mr. Cameron: To ask the Secretary of State for Health what representations he has received seeking publication of the new model for the delivery of wheelchair services as a matter of urgency; and what steps he has taken in response. [219403]

Mr. Ivan Lewis: The Department has replied to five parliamentary questions concerning the publication of the new model for the delivery of wheelchair services. In addition, the Department has received approximately 100 pieces of correspondence concerning the broader issues relating to the provision of wheelchairs services, these include a number seeking details on the publication of the new model.

Written Answers to Questions

DEFENCE

Departmental ICT

Sarah Teather: To ask the Secretary of State for Defence how many *(a)* mobile telephones, *(b)* personal digital assistants and *(c)* laptop computers issued to departmental staff were reported (i) lost, (ii) missing and (iii) stolen in each year since 2001. [184322]

Mr. Bob Ainsworth: As a result of the recent theft of a laptop, the Ministry of Defence has initiated an investigation into the details of all lost or stolen electronic media since 2003. This investigation involves the collation and examination of reports from across the Department including final disposal action, where available. While every effort is being made to gather the information as quickly and accurately as possible, not all the details are presently available. In addition, it should be noted that details of such incidents were not collated centrally before 2003 and therefore will not be available.

I will write to the hon. Member when the information has been collated and place a copy of my letter in the Library of the House.

Substantive answer from Bob Ainsworth to Sarah Teather:

The Minister of State for the Armed Forces undertook to write to you in answer to your Parliamentary Question on 18 February 2008, (Official Report, column 95W) about lost, missing or stolen mobile telephones, personal digital assistants and laptop computers. I am responding on his behalf.

Currently, all incidents are categorised as either lost or stolen. There was no centralised reporting of lost or stolen personal digital assistants (PDAs) prior to 2003 so it is not possible to provide the information for the earlier years. Prior to 2003 the reporting of lost and stolen laptops was not centrally collated and it has been found that the figures for the period 1995 to 2002 included in the replies to previous questions on 22 June 2005, (Official Report, column 1069W) and 19 January 2007, (Official Report, columns 1363-4W) may be incomplete. As the details of incidents for the 1995/2002 period are no longer available it is not possible to provide updated figures. MOD units are not required to report centrally incidents of loss or theft of mobile phones, but some reports have been provided where the incidents have security significance or have been associated with the theft of other property.

The following figures are derived from the data collated as a result of the investigation into details of computer and other electronic media lost/stolen since 2003 and provided to Sir Edmund Burton as part of his review. These figures continue to be adjusted as a result of additional thefts and losses along with subsequent clarification of historic incidents. The following table shows the number of mobile telephones, PDAs and laptops centrally reported as lost or stolen from the Department since 2003:

	Mobile telephones		*PDAs*		*Laptops*	
	Lost	*Stolen*	*Lost*	*Stolen*	*Lost*	*Stolen*
2003	0	0	0	1	27	136
2004	1	1	1	2	22	272
2005	0	0	1	1	18	130
2006	0	3	1	1	27	155
2007	1	0	1	2	22	101
2008 (up to 25June 2008)	1	1	0	1	30	34

I am placing a copy of my letter in the Library of the House.

Nimrod Aircraft

Dr. Fox: To ask the Secretary of State for Defence how many instances of fuel leaks from Nimrod aircraft have been recorded in the last 12 months. [164431]

Mr. Bob Ainsworth: I will write to the hon. Member with the information requested and place a copy of my letter in the Library of the House.

Substantive answer from Bob Ainsworth to Liam Fox, dated 13 July 2008:

I wrote to you on 21 May 2008 in answer to two Parliamentary Questions that you tabled about fuel leaks from Nimrod aircraft. I explained that the Nimrod Integrated Project Team within Defence Equipment and Support (DE&S) was carrying out a detailed manual analysis of fuel leak data in order to answer your questions.

This work has now been completed and I can now provide you with a full response. In your first question on 21 November 2007, (Official Report, Column 990W) you asked how many instances of fuel leaks from Nimrod aircraft had been recorded in the last 12 months. This was taken to be the period from 1 November 2006 to 31 October 2007. A fuel leak is defined as any leakage of fuel from aircraft couplings, pipes or fuel tanks. In that period, there were a total of 252 fuel leaks reported on the Nimrod MR2 and R1 aircraft. In your second question on 20 May 2008 (Official Report, Column 181W) you asked how many fuel leaks had been reported since January 2007. Between 1 January 2007 and 31 December 2007 there were 277 fuel leaks reported on the Nimrod MR2 and R1 aircraft. Based on current data, between 1 January 2008 and 31 March 2008 (the last full month for which validated data is available), there have been a total of 33 fuel leaks reported on the Nimrod MR2 and R1 aircraft. That figure is however provisional, as some records have yet to be received from aircraft deployed on operations, and it is therefore likely to increase as the records are completed.

The figures quoted above do not include fuel leaks which are caused by our scheduled maintenance activity, as we disturb the fuel system. In these cases the leak is both caused and rectified while on the ground.

Although all aircraft are designed to be leak tolerant, all fuel leaks are thoroughly investigated. Furthermore, the measures implemented following the loss of Nimrod XV230 mean that the chance of any fuel leak igniting is extremely low. In particular we have, as you know, removed potential sources of ignition by switching off the aircraft's very hot air system while airborne; it is used for short periods on the ground but does not reach temperatures sufficient to ignite fuel. Despite this, no leakage, however small, from pipes, couplings or fuselage tanks is accepted and the aircraft will not fly until such leaks have been rectified. The only occasion on which an aircraft will fly with a fuel leak is with certain categories of leaks from the integral fuel tanks in the wings. In such instances leaking fuel from the wing tanks disperses safely into the aircraft's slipstream, and, as there is no potential source of ignition, there is no hazard to the aircraft.

Of the 310 fuel leaks reported between 1 January 2007 and 31 March 2008 over 50 per cent were leaks from integral fuel tanks in the wings, in which fuel would simply pass into the aircraft's slipstream during flight. In each of these reported incidents, whether from the integral fuel tanks in the wings or elsewhere, the fuel leaks did not compromise the safety of the aircraft and were rectified by normal maintenance procedures.

In my letter of 21 May, I stated that in November 2006, after the loss of Nimrod XV230, DE&S introduced new mandatory fuel leak reporting procedures (known as 'Leaflet 70 reports') on all leaks associated with fuel tanks within the fuselage, the fuel system and on any residual fuel found in specific areas of the aircraft (such as the bomb bay). I also explained that since the introduction of these procedures, 111 fuel leaks (of varying degrees of severity) had been recorded under Leaflet 70. This procedure will continue to bring fuel leaks in the fuselage to the immediate attention of the DE&S Nimrod Integrated Project Team. The current maintenance policy for the Nimrod fuel system remains appropriate.

With respect to the airworthiness of the aircraft today, we have ceased air-to-air refuelling and ceased the use of very hot air systems in flight. These measures, together with the enhanced aircraft maintenance and inspection procedures introduced since the Nimrod XV230 crash ensure the aircraft, as it is today, is safe to fly. Indeed, my Department having carefully considered all the issues has declared that all reasonably practicable measures have been taken to reduce the risk of fire and explosion to As Low as Reasonably Practicable (ALARP). The work to reach this position has been contributed to by key stakeholders represented on the Nimrod Platform Equipment Safety Committee (comprising representatives of the DE&S Nimrod Integrated Project Team, Air Command, the Release to Service Authority, BAE Systems, Rolls Royce and QinetiQ) which supports this declaration.

In addition, to ensure we can continue to operate the aircraft efficiently until its planned retirement from service, we have in place a programme of more permanent measures which includes replacing, where judged necessary, fuel seals and engine bay hot air ducts on the aircraft, this work is being progressed as quickly as practicable.

I am copying this letter to Ian Liddell-Grainger and Sir Nicholas Winterton, who have previously expressed an interest in this subject.

Dr. Fox: To ask the Secretary of State for Defence how many fuel leakages on a Nimrod aircraft have been reported since January 2007. [199452]

Mr. Bob Ainsworth: I will write to the hon. Member.

Substantive answer from Bob Ainsworth to Liam Fox, dated 13 July 2008:

I wrote to you on 21 May 2008 in answer to two Parliamentary Questions that you tabled about fuel leaks from Nimrod aircraft. I explained that the Nimrod Integrated Project Team within Defence Equipment and Support (DE&S) was carrying out a detailed manual analysis of fuel leak data in order to answer your questions.

FOREIGN AND COMMONWEALTH OFFICE

1 Carlton Gardens

Robert Neill: To ask the Secretary of State for Foreign and Commonwealth Affairs (1) pursuant to the answer to the hon. Member for Brentwood and Ongar (Mr. Pickles) of 15 May 2008, *Official Report*, column 1774W, on departmental official residences, who owns the freehold to 1 Carlton Gardens; and what the current duration is of the leasehold; [219174]

(2) what the timetable is for the negotiations with the Crown Estate for the future of the lease on 1 Carlton Gardens. [219176]

Meg Munn: The freehold for 1 Carlton Gardens is held by 'The Queen's Most Excellent Majesty in right of Her Crown, care of the Crown Estate Commissioners'. The lease has expired and is the subject of ongoing negotiations.

Afghanistan: Peacekeeping Operations

Bob Spink: To ask the Secretary of State for Foreign and Commonwealth Affairs what additional remuneration is to be paid to British police officers posted to Kabul. [219621]

Dr. Howells: Officers from the Ministry of Defence Police working in the Combined Security Transition Command-Afghanistan, the US command structure responsible for security sector reform in Kabul (CSTC-A) receive a total of £4,750 in taxable allowances in addition to their salary per calendar month. Other British police officers working within the CSTC-A or the EU Police Mission in Afghanistan receive an allowance of €95 per day whilst in mission and €65 per day whilst on decompression break. One retired British police officer is employed through a private contract.

Differences between remuneration packages reflect the different terms and conditions under which officers work.

Arctic

Harry Cohen: To ask the Secretary of State for Foreign and Commonwealth Affairs which countries have made claims to rights over the *(a)* Arctic and *(b)* Antarctic in the last five years; which claims the UK recognises; and what the process is for resolving disputed claims. [220805]

Meg Munn *[holding answer 21 July 2008]:* We are not aware of any new claims having been made in either the Arctic or Antarctic in the last five years.

While not amounting to a new "claim", in November 2006 the Government of Norway submitted to the Commission on the Limits of the Continental Shelf information on the limits of that country's continental shelf beyond 200 nautical miles, in accordance with the UN Convention on the Law of the Sea. Part of the submission relates to areas of the seabed in the Arctic Ocean.

Any recommendations which the Commission may make are without prejudice to the delimitation of the continental shelf between states with opposite or adjacent coasts. Any disputed claims would have to be settled through negotiation or through other international dispute settlement mechanisms.

Existing territorial claims to Antarctica pre-date the entry into force of the Antarctic Treaty in 1961. The Treaty precludes any new claim, or enlargement of an existing claim, to territorial sovereignty in Antarctica. It also provides a mechanism for the effective management of any disputes.

British Nationality: Torture

Sir Malcolm Rifkind: To ask the Secretary of State for Foreign and Commonwealth Affairs what steps he takes towards foreign governments alleged to have severely mistreated British citizens, including through the use of torture. [219328]

Meg Munn: The Government would take all allegations of mistreatment by a foreign government against British citizens extremely seriously. Our response would be determined by the circumstances of the case.

Sir Malcolm Rifkind: To ask the Secretary of State for Foreign and Commonwealth Affairs from which foreign governments the Government has received compensation following allegations of torture of British citizens since 8 December 1988; how much was paid in these cases; and how long the process took in each case. [219329]

Meg Munn: We are not aware of any compensation received by the Government from foreign governments following allegations of torture of British nationals.

The Foreign and Commonwealth Office does not keep records of payments centrally. Providing a more detailed response would incur a disproportionate cost.

Cuba: Political Prisoners

Mark Pritchard: To ask the Secretary of State for Foreign and Commonwealth Affairs if he will discuss *(a)* the detention of journalist Victor Rolando Arroyo and *(b)* the imprisonment of Dr. José García Paneque with the Cuban ambassador to the UK. [217559]

Meg Munn: Foreign and Commonwealth Office Ministers and officials raise the continuing detention of political prisoners in Cuba with representatives of the Cuban government, including the ambassador, on a regular basis. I raised the issue of the continuing detention of all political prisoners in Cuba, including journalist Victor Rolando Arroya and Dr. José García Paneque, with Cuban Vice Foreign Minister Eumelio Caballero on 3 April and with the Cuban ambassador on 11 June.

Departmental ICT

Mr. Hoban: To ask the Secretary of State for Foreign and Commonwealth Affairs what IT contracts his Departments and its agencies have entered into in the last two years. [215159]

Meg Munn: The Foreign and Commonwealth Office (FCO) and its agencies have awarded the following information technology (IT) contracts in the last two years. This list is not exhaustive. Details of IT contracts are not held centrally and a full list could be provided only at disproportionate cost.

FCO

Provision of Managed Website Statistics Service—Nedstad

Future Firecrest (new IT infrastructure) Consultancy—Tribal

Online Missing Persons and Travellers Registration Software—Worldreach

Development of Ministerial Visits Co-ordination Database—Parity

Home Office Biometrics Framework—Stena

FCOWeb FCO external websites platform—Logica

FCONet 3 Intranet Development—Logica

FCONet 3 Intranet Support—Logica

Enterprise Agreement—Microsoft

Premier Support Agreement—Microsoft

FCO Services

Tempest Workstation, Peripheral Equipment and Support—API Europe

Wider Internal Markets Hardware Support for UK/Overseas—Hewlett Packard

Wilton Park

Contact Records Management system development—GN Software

Departmental Planning Permission

Mr. Pickles: To ask the Secretary of State for Foreign and Commonwealth Affairs pursuant to the answer to the right hon. Member for Horsham (Mr. Maude) of 9 July 2008, *Official Report*, column 1657W, on departmental planning permission, if he will outline the nature of the alterations to the third floor of the Old Admiralty Building; and who the current residents of that floor are. [221286]

Meg Munn: Alterations were made to the third floor of the Old Admiralty Building to provide open plan office space for Foreign and Commonwealth Office staff.

Departmental Retirement

Mr. Marsden: To ask the Secretary of State for Foreign and Commonwealth Affairs whether his Department has a standard retirement age; and how many employees have been asked to retire on reaching 65 years of age in each year since 2000. [218218]

Meg Munn: The Foreign and Commonwealth Office (FCO) has no mandatory retirement age for UK civil servants in the grades below senior management.

For staff in the senior civil service (SCS)/senior management structure (SMS), the civil service imposes a default retirement age of 65. No serving members of the SCS/SMS in the FCO have reached 65 since 2006 (when the retirement age for these grades was raised from 60).

Iran: Guided Weapons

Mr. Jamie Reed: To ask the Secretary of State for Foreign and Commonwealth Affairs what discussions he has had with middle eastern governments on the testing of long-range Iranian missiles. [219902]

Dr. Howells: The Government have not held any discussions specifically about the Iranian missile tests with middle eastern governments. However, we have a regular and ongoing dialogue with them at political and official level that includes how to respond to the threat to regional security posed by Iran and that will include developments such as this. We have made clear publicly that the tests only serve to reinforce international concerns about Iranian intentions.

Mr. Jamie Reed: To ask the Secretary of State for Foreign and Commonwealth Affairs what communications he has had with the Iranian government on the testing of its long-range missiles. [219903]

Dr. Howells: We have not discussed the recent missile tests with the Iranian government, although we have made clear publicly that we feel the tests were an unwelcome move which can only serve to reinforce international concerns about Iranian intentions.

Mr. Jamie Reed: To ask the Secretary of State for Foreign and Commonwealth Affairs what discussions he has had with his *(a)* Israeli, *(b)* Russian and *(c)* American counterparts on the testing of long-range Iranian missiles. [219904]

Dr. Howells: The Government have not held any discussions specifically about the Iranian missile tests with Israel, Russia or the US. However, we have a regular and ongoing dialogue with them at political and official level that includes how to respond to the threat to regional security posed by Iran and that will include developments such as this. We have made clear publicly that the tests only serve to reinforce international concerns about Iranian intentions.

Iraq: Asylum

Mr. Moore: To ask the Secretary of State for Foreign and Commonwealth Affairs pursuant to the answer of 10 July 2008, *Official Report*, column 1826W, on Iraq: asylum, how many of the applications received under the Locally Employed Staff Assistance Scheme that were not from former Iraqi staff were from current Iraqi staff. [219741]

Dr. Howells: 220 applications for assistance under the Locally Employed Staff Assistance Scheme have been received from currently employed staff. Of these 183 were from staff of the Ministry of Defence, 24 from staff of the Foreign and Commonwealth Office and 13 from staff of the Department for International Development.

Iraq: Peacekeeping Operations

Andrew Mackinlay: To ask the Secretary of State for Foreign and Commonwealth Affairs how many allegations of misconduct have been made to his Department in respect of *(a)* British nationals and *(b)* nationals of other countries, other than Iraq, who are employees of private military or security companies contracted to work in Iraq by his Department; what the nature of each allegation is; what action his Department has taken in response; and if he will make a statement. [220618]

Dr. Howells *[holding answer 21 July 2008]:* There has been one allegation of misconduct by the Iraqi authorities against a private military and security company contracted by the Government to work in Iraq. A complaint was made in February 2008 that a weapon was discharged from a vehicle owned by a private military and security company contracted by the Government. We carried out an investigation and established that this was a case of mistaken identity, as none of the company's vehicles were in the area at the time.

The only other allegation of misconduct of which we are aware was made in December 2007, by a local employee of a private military and security company which we had contracted to support police training in Basra. This individual returned a quantity of surplus ammunition which he alleged had been sold to him improperly by two expatriate employees, one British and one Australian, of the same private military and security company. By the time the allegation was made the two individuals who were the subject of the allegation were no longer employed on the contract in Basra, which was in the process of being wound up, nor were they in the UK. We and the head office of the company concerned investigated, taking a formal statement from the local employee and also contacting the two employees who were the subject of the allegation. Taking into account the content of the individuals' statements and the absence of any independent evidence, we determined that there were no grounds for taking the matter further.

Iraq: Radioactive Materials

Mr. Dai Davies: To ask the Secretary of State for Foreign and Commonwealth Affairs whether the US administration *(a)* sought permission and *(b)* gave prior notification to the Government in respect of the transport of uranium oxide from Iraq to Canada via Diego Garcia. [220443]

Dr. Howells: I can confirm that the US Administration did seek permission from the Administration of the British Indian Ocean Territory (BIOT) and gave prior notification in respect of the transport of natural uranium ("yellowcake") through Diego Garcia for onward shipment to Canada.

The BIOT Administration agreed to facilitate the shipment in order to assist its removal from Iraq, where its continued presence raised proliferation concerns.

Israel: Overseas Trade

Dr. Starkey: To ask the Secretary of State for Foreign and Commonwealth Affairs whether he has recently had discussions with UK retailers and trade bodies representing companies which source goods from illegal Israeli settlements. [219691]

Dr. Howells: We are concerned that goods from illegal Israeli settlements may be entering the UK under false pretences and without paying the correct customs duties. We take this issue seriously and have alerted HM Revenue and Customs to it so that they can take appropriate action. We have not had direct discussions with retailers or trade bodies.

Mediterranean Region: EU External Relations

Mr. Clappison: To ask the Secretary of State for Foreign and Commonwealth Affairs what representations he made concerning human rights and in particular freedom of religion in the course of discussions on the EU-Mediterranean Union on 13 and 14 July; whether he made representations to the Algerian government on treatment of Christians and the enactment of restrictive laws; and what conclusions the EU-Mediterranean meeting reached in respect of freedom of religion in participating countries. [220617]

Dr. Howells *[holding answer 21 July 2008]:* My right hon. Friend the Foreign Secretary attended the Paris Summit from 12-13 July to launch the Barcelona Process: Union for the Mediterranean. He held a range of bilateral meetings but was unable to find an opportunity to meet with the Algerian representatives.

At this first summit for the Union for the Mediterranean, talks focused on the development of the Union and on priorities for the Union. The summit agreed to take forward projects on tackling climate change, promoting energy security and education. There were no discussions on the issue of freedom of religion at the summit.

We continue to monitor the enforcement of religious laws in Algeria and are in contact with Christian leaders in Algiers. Since the laws came into effect there have been reports of people being arrested and sentenced for conducting 'evangelisation' campaigns. The laws have also led to the closing of some unauthorised places of worship, including those of Christian groups, and the arrest of unauthorised preachers. Our ambassador in Algiers plans to raise this issue with the Algerian Ministry of Foreign Affairs and we will continue to monitor the situation, raising individual cases when it is appropriate.

Middle East: Armed Conflict

Dr. Starkey: To ask the Secretary of State for Foreign and Commonwealth Affairs what assessment he has made of the effect of continuing Israeli settlement expansion on the EU aim of achieving a sovereign, independent, contiguous and viable Palestinian state. [220234]

Dr. Howells: Settlement expansion has a negative impact on the peace process and the EU's aim of achieving a Palestinian State. As my right hon. Friend the Prime Minister said at his press conference in Bethlehem on 20 July,

"we want to see a freeze on settlements. Settlement expansion has made peace harder to achieve. It erodes trust, it heightens Palestinian suffering, it makes the compromises Israel will need to make for peace more difficult. So we are very clear—not just Britain but the whole of the EU- what should be done".

Middle East: Peace Negotiations

Mr. Dai Davies: To ask the Secretary of State for Foreign and Commonwealth Affairs what assistance the Government intends to give to Israel to fulfil its commitment made in supporting the Final Declaration of the Union for the Mediterranean in Paris on 13th July to pursue a mutually and effectively verifiable Middle East zone free of weapons of mass destruction. [220447]

Dr. Howells: We strongly support the declaration of the Union for the Mediterranean calling on all member states to pursue a Middle East zone free from weapons of mass destruction. We are working intensively with Israel and other states in the Middle East for a comprehensive regional peace settlement, and to ensure that Iran complies with its UN Security Council and International Atomic Energy Agency obligations. This would provide the best possible context in which to work towards such a zone. We continue to call on all states in the region to adhere to key non-proliferation agreements.

Middle East: Weapons

Mr. Hancock: To ask the Secretary of State for Foreign and Commonwealth Affairs what *(a)* diplomatic and *(b)* practical steps his Department is taking to support the establishment of a verifiable Middle East zone free of weapons of mass destruction and associated delivery systems; and if he will make a statement. [220104]

Dr. Howells: We strongly support the principle of establishing a Middle East zone free from weapons of mass destruction. We co-sponsored the resolution on the Middle East adopted at the 1995 non-proliferation treaty review conference and have consistently supported similar resolutions at the First Committee of the UN General Assembly. Our first priority is peace and stability in the region, including a resolution to the Middle East Peace Process. We are working intensively for a comprehensive regional peace settlement, and to ensure that Iran complies with its UN Security Council and International Atomic Energy Agency obligations. This would provide the best possible context in which to work towards a weapons of mass destruction free zone in the Middle East.

Nuclear Non-proliferation Treaty

Jim Cousins: To ask the Secretary of State for Foreign and Commonwealth Affairs what plans he has to propose changes to the nuclear non-proliferation treaty; and if he will make a statement. [219758]

Dr. Howells: The nuclear non-proliferation treaty (NPT) has served the international community well. It remains the foundation of international non-proliferation efforts and a key contribution to collective peace and security. The UK does not plan to reopen the NPT for negotiation. But we are committed to a successful NPT review conference in 2010 and will work to promote consensus around key measures to strengthen the treaty's three pillars: zero tolerance of proliferation; a clear forward plan on multilateral nuclear disarmament; and supporting the right to the safe, secure and peaceful use of nuclear energy.

Rwanda: Genocide

Mr. Tom Clarke: To ask the Secretary of State for Foreign and Commonwealth Affairs what reports he has received of the Genocide Ideology Law recently passed in Rwanda; and if he will make a statement. [219647]

Meg Munn: The Rwandan Parliament adopted a new law criminalising genocide ideology in June 2008. The law is currently awaiting presidential signature. We have taken a close interest in the adoption of this legislation, including holding discussions during its development with the Government of Rwanda and interested non-governmental organisations.

Turks and Caicos Islands: Politics and Government

Mr. Austin Mitchell: To ask the Secretary of State for Foreign and Commonwealth Affairs what estimate he has made of the level of contingent liabilities for which the Government will be liable arising from any finding of systemic weakness in administration in the Turks and Caicos Islands. [220833]

Meg Munn: The recently announced commission of inquiry in the Turks and Caicos Islands will report on any systemic weakness in its administration.

Ukraine: Anti-Semitism

Mr. Amess: To ask the Secretary of State for Foreign and Commonwealth Affairs what discussions he *(a)* has had recently and *(b)* plans to have with EU counterparts on anti-Semitism in (i) Ukraine and (ii) Russia; and if he will make a statement. [219555]

Mr. Jim Murphy: The EU has regular political dialogue with Ukraine at which we make clear our concerns about respect for human rights and fundamental freedoms. On 28 November 2007 the EU carried out a demarche at the Ukrainian Foreign Ministry to express concern about racist and anti-Semitic attacks. Under the terms of its relations with the EU, Ukraine is committed to ensure respect for human rights and fundamental freedoms, and the rights of persons belonging to minorities in line with international standards. Together with EU partners we have made it clear that we expect Ukraine to abide by these standards and values if it is to make progress on its aspirations for closer relations with the EU.

We do have concerns regarding human rights and political freedoms in Russia, including the reported rise in violent attacks on ethnic and religious minorities. An outline of our assessment can be found in the 2007 Foreign and Commonwealth Office (FCO) Human Rights Annual Report.

We hold annual, bilateral human rights discussions with Russia. These were last held in January 2007 and they included discussion on the rights of ethnic and religious minorities. The next meeting is planned for later this year. We also raise our concerns through the EU/Russia human rights consultations, which were last held in April 2008. At the consultations the EU raised a number of concerns related to specific human rights and fundamental freedoms in the Russian Federation, including the rights of persons belonging to minorities and combating racism and xenophobia. We welcome President Medvedev's condemnation of "any ethnic or religious enmity" in his speech on 9 May.

The FCO supports projects in Russia which promote human rights, including strengthening state and civil society capacity to combat religious and ethnic discrimination. Last year we spent £15,000 on such projects (out of a total spend of £700,000 to support human rights, good governance and reform in Russia).

The UK is committed to combating anti-Semitism and all forms of racism. At the 2007 Organisation for Security and Co-operation in Europe (OSCE) Human Dimension Implementation Meeting, held in Warsaw from 24 September to 5 October 2007, we were the first country to report in detail on how we have implemented the Berlin Declaration on Combating Anti-Semitism. We urged other participating states of the OSCE to do likewise. We will continue to work with our OSCE partners, including Russia, on intensifying efforts to combat anti-Semitism.

Mr. Amess: To ask the Secretary of State for Foreign and Commonwealth Affairs what recent discussions he has had with the government of Ukraine on *(a)* anti-Semitism and *(b)* anti-Semitic (i) organisations and (ii) publications in Ukraine; what response was received; and if he will make a statement. [219704]

Mr. Jim Murphy: Our embassy in Kiev regularly raises issues relating to anti-Semitism with the Ukrainian authorities, including the specific concerns about the policies and publications of the Interregional Academy of Personnel Management. Our embassy in Kiev is also in close contact with local human rights organisations and representatives of the Jewish community with regard to issues relating to anti-Semitism in Ukraine. The UK has made clear that we expect Ukraine to abide by its commitments to human rights and fundamental freedoms, including the rights of minorities, as a member of the Council of Europe and the Organisation for Security and Co-operation in Europe.

Mr. Amess: To ask the Secretary of State for Foreign and Commonwealth Affairs what assessment he has made of levels of anti-Semitism in Ukraine; and if he will make a statement. [219705]

Mr. Jim Murphy: We are very concerned about the high level of anti-Semitism in Ukraine. A poll conducted in 2006 found that one in three Ukrainians do not want Jews to be citizens, while investigations into suspected anti-Semitic attacks often fail to result in arrests. President Yushchenko has spoken out strongly and frequently against anti-Semitism and stated that he would take a resolute stance on the matter. This has resulted in a number of welcome developments: the security service and Ministry of Interior have set up units to combat racism and religious hatred; and a task force for the development of a national action plan to combat xenophobia and intolerance has been established. In 2008 a number of proposals for legislative reform that could result in tougher action against anti-Semitism were tabled.

Zimbabwe: Elections

Daniel Kawczynski: To ask the Secretary of State for Foreign and Commonwealth Affairs what reports he has received from the British Embassy in *(a)* Windhoek, *(b)* Gabarone, *(c)* Maputo and *(d)* Luanda on the attitude of those countries to the legitimacy of elections in Zimbabwe. [218634]

Meg Munn: Countries in the region have expressed a range of views in response to the sham election which took place in Zimbabwe on 27 June. But there is a common thread, they are all concerned about the deteriorating situation in Zimbabwe and the violence and instability accompanying it. Election observers from the Southern African Development Community, which represents countries in the region, have stated clearly that the election on 27 June did not represent the will of the Zimbabwean people.

The UK continues to engage with Namibia, Botswana, Mozambique, Angola and all of the countries in the region with the aim of supporting the establishment of a transitional Government in Zimbabwe that can start to repair the damage done to democracy, rule of law and economic well-being by the Mugabe regime.

Zimbabwe: Foreign Relations

Mr. Jamie Reed: To ask the Secretary of State for Foreign and Commonwealth Affairs what the objectives of the Government are in its policy towards Zimbabwe. [219905]

Meg Munn: The Government's overall objective is that the democratic right of the people of Zimbabwe to choose who leads their country, and how it is governed, should be respected. The Zimbabwean people clearly indicated on 29 March their wish for a change of government and president. We do not respect the legitimacy of any Government in Zimbabwe that does not reflect that wish. The onus now is on the region—the Southern African Development Community and the African Union—to demonstrate that they are serious about making dialogue work.

We are also deeply concerned at the growing humanitarian crisis and are pressing the Zimbabwean authorities to immediately allow full and non discriminatory access to humanitarian assistance to prevent the suffering of the most vulnerable people in Zimbabwe.

We shall continue our twin track approach of applying pressure on the Mugabe regime's elite via targeted sanctions and keeping the ordinary people of Zimbabwe alive through our contribution as the second largest bilateral donor of aid. We will continue to press others to join us in that approach.

BUSINESS, ENTERPRISE AND REGULATORY REFORM

Biofuels

Gregory Barker: To ask the Secretary of State for Business, Enterprise and Regulatory Reform what recent discussions his Department has had on the EU's proposed biofuels sustainability criteria; and whether he plans to review the Government's own criteria in relation to biofuels. [219399]

Malcolm Wicks: The UK Government have been, and will continue to be, actively involved in discussions on sustainability criteria for biofuels at all levels in Brussels. These talks include Coreper, the ad hoc sustainability working group and in bilateral and other meetings with representatives from the European Commission and other member states.

Ministers and officials in the relevant Government Departments work together closely on these issues. We have been pressing for the sustainability criteria for biofuels to be as robust and comprehensive as possible, and in the light of the findings of the Gallagher review, we will also now press for them to take proper account of the indirect impacts of biofuels.

Once the renewable energy directive is adopted, the UK will need to amend its own sustainability requirements for biofuels accordingly. The detail of the renewable transport fuel obligation's reporting requirements is a matter for the Renewable Fuels Agency.

Business: Females

Margaret Moran: To ask the Secretary of State for Business, Enterprise and Regulatory Reform what assessment he has made of the effectiveness of each regional development agency's funding of women's enterprise. [203668]

Mr. McFadden: The Department and the regional development agencies are currently carrying out a major project which will evaluate all the agencies' programmes. Where agencies have discrete programmes for women's enterprise those will be evaluated separately. The result of the project will be published in the autumn.

The RDAs are our key partners in promoting enterprise and we are working collaboratively with them in the roll out of the strong package of measures on women's enterprise announced recently as part of the Government's Enterprise Strategy. Those measures include provision for: £12.5 million of Government capital through a women's investment fund; women's business centre pilots; enhanced mentoring support; a new national enterprise centre of expertise; a media campaign; and activity aimed at opening up procurement opportunities to women-owned businesses. More information on the strategy is available at:

www.berr.gov.uk/enterprisestrategy

Canatxx

Mr. Wallace: To ask the Secretary of State for Business, Enterprise and Regulatory Reform whether he has met representatives of Canatxx to discuss gas storage in the last 12 months. [220652]

Malcolm Wicks: Yes. Representatives of Canatxx gave me an oral presentation on their Preesall gas storage project (as well as their Amlwch LNG import project) on 5 December 2007.

Coal: Imports

Mrs. Riordan: To ask the Secretary of State for Business, Enterprise and Regulatory Reform how many tonnes of coal were imported into Britain in 2007. [220146]

Malcolm Wicks: Provisional figures show 43.3 million tonnes of coal were imported into the United Kingdom during 2007.

Coal: Mining

Mrs. Riordan: To ask the Secretary of State for Business, Enterprise and Regulatory Reform how many tonnes of coal were mined from Britain's deep coal mines in 2007. [220145]

Malcolm Wicks: Provisional figures show 7.7 million tonnes of coal were mined from deep mines in the United Kingdom during 2007.

Companies House: Telephone Services

Mr. Prisk: To ask the Secretary of State for Business, Enterprise and Regulatory Reform what income his Department received from the Companies House 0870 number in *(a)* 2007-08, *(b)* 2006-07 and *(c)* 2005-06. [217539]

Mr. Thomas: The current income received by Companies House for the use of the 0870 number is as follows:

	Current income received (£)
2007-08	8,500
2006-07	28,700
2005-06	44,500

There is however an ongoing dispute over a rebate for 2006-07 and 2007-08. The expected income should be on similar lines as 2005-06.

Conditions of Employment: Parents

Mr. Heald: To ask the Secretary of State for Business, Enterprise and Regulatory Reform which business leaders he and his predecessor have met in the last 12 months to discuss family-friendly working practices. [215782]

Mr. Thomas: My right hon. Friend the Secretary of State has regular meetings with the Confederation of British Industry, the Engineering Employers' Federation, the Institute of Directors and the British Chambers of Commerce. Family-friendly working practices are discussed.

Departmental Correspondence

Mr. Winnick: To ask the Secretary of State for Business, Enterprise and Regulatory Reform what the reasons were for the time taken to transfer the letter of 18 June from the hon. Member for Walsall, North to the Department of Work and Pensions, ref: 74157; and if he will take steps to speed up the transfer of correspondence by his Department. [220007]

Mr. Thomas *[holding answer 21 July 2008]:* A delay was occasioned because policy officials were in discussion about which Department should lead on the issues raised not only by my hon. Friend but by many other hon. Members.

It was agreed that it was for the Department of Work and Pensions to respond and all letters received were transferred from the Department for Business, Enterprise and Regulatory Reform on 30 June. Due to the volume of letters transferred, there was a delay in sending out letters to the Members concerned to inform them of the transfer for which I apologise.

This Department has reviewed its procedures to ensure that, in future, adequate resources are in place to cope with the transfer of such volumes of correspondence.

Departmental Early Retirement

Mr. Redwood: To ask the Secretary of State for Business, Enterprise and Regulatory Reform how many staff in *(a)* his Department and *(b)* his Department's agencies have taken early retirement in the last two years. [217386]

Mr. Thomas: The Civil Service Compensation scheme (CSCS) provides compensation for civil servants who depart early under the following categories:

compulsory early retirement or severance;

flexible early retirement or severance;

approved early retirement

Those over 50 receive early retirement; those under 50 generally qualify for lump sum severance payments.

The number of employees who have taken early retirement in BERR in the last two years (1 April to 31 March) are as follows:

	Number
2006-07	31
2007-08	83

I have approached the chief executives of the Insolvency Service and Companies House and they will respond to you directly.

Letter from Gareth Jones, dated 21 July 2008:

I am responding on behalf of Companies House to your recently tabled Parliamentary Question to the Secretary of State for Business Enterprise and Regulatory Reform.

In the last two financial years twenty-two employees left Companies House due to early retirement.

Letter from Stephen Speed, dated 21 July 2008:

The Secretary of State for Business, Enterprise and Regulatory Reform has asked me to reply to you directly in respect of your question (2007/3388) asking how many staff have taken early retirement from the Insolvency Service within the last two years.

Seven staff have taken early retirement in the last two years.

Departmental ICT

Pete Wishart: To ask the Secretary of State for Business, Enterprise and Regulatory Reform what the value of his Department's computer systems *(a)* was at the time of purchase and *(b)* is now. [214698]

Mr. Thomas: The core Department outsourced its IT services to Fujitsu Services Ltd. via a private finance initiative (PFI) agreement awarded in 1998. The value of the agreement can be found in the Department's accounts. The agreement commenced in April 1999 and runs for 15 years. As the Department leases its computer equipment through this agreement, any financial depreciation is the responsibility of the supplier as they are responsible for the refresh of the equipment under the terms of the agreement.

Information on any other systems outside of the core Department's PFI agreement could be obtained only with disproportionate cost.

Departmental Manpower

Mr. Maude: To ask the Secretary of State for Business, Enterprise and Regulatory Reform how many permanent staff within *(a)* his Department and *(b)* its agencies are classed as (i) staff without posts and (ii) part of a people action team. [210861]

Mr. Thomas: The Department currently has four people actively seeking posts within the Department or elsewhere in Whitehall.

The Department's agencies have delegated responsibility for their human resource functions and the information requested is not held centrally. I have therefore approached the chief executives of the Insolvency Service and Companies House and they will respond to you directly.

Letter from Gareth Jones, dated 21 July 2008:

I am responding on behalf of Companies House to your recently tabled Parliamentary Question to the Secretary of State for Business Enterprise and Regulatory Reform.

Companies House has no staff without posts or as part of a people action team.

Letter from Stephen Speed, dated 21 July 2008:

The Secretary of State for Business, Enterprise and Regulatory Reform has asked me to reply to you directly on behalf of the Insolvency Service in respect of your question (2007/2951) asking how many permanent staff within (a) his Department and (b) its agencies are classed as (i) staff without posts and (ii) part of a people action team.

The Insolvency Service does not have any permanent staff that are classed as staff without posts and part of a people action team. Therefore is a nil return.

Mr. Redwood: To ask the Secretary of State for Business, Enterprise and Regulatory Reform what the change in the number of employees in his Department and its agencies has been since the Department was established. [217062]

Mr. Thomas: When the Department for Business, Enterprise and Regulatory Reform was established on 30 June 2007, the number of staff employed by its predecessor, the Department of Trade and Industry, was 2,813. The current number of core BERR staff is 2,607 (excluding UKTI).

I have approached the chief executives of the Insolvency Service and Companies House and they will respond to you directly.

Letter from Gareth Jones, dated 22 July 2008:

I am responding on behalf of Companies House to your recently tabled Parliamentary Question to the Secretary of State for Business Enterprise and Regulatory Reform.

When the Department of Business, Enterprise and Regulatory Reform was established in June 2007 Companies House had 1,153 employees (1,045 full time equivalent), and at the end of June 2008 there was 1,196 employees (1,092 full time equivalent).

Letter from Stephen Speed, dated 22 July 2008:

The Secretary of State for Business, Enterprise and Regulatory Reform has asked me to reply to you directly in respect of your question (2007/3374) asking what the change has been in the number of employees in his Department and its agencies since the Department was established.

Since our parent Department BERR was established in 2007, The Insolvency Service has increased its number of employees by 217.

Departmental Pay

Mr. Redwood: To ask the Secretary of State for Business, Enterprise and Regulatory Reform what proportion of staff of his Department and its agencies did not receive the maximum bonus possible under a bonus scheme applying to them since his Department was established. [217372]

Mr. Thomas: The Department for Business Enterprise and Regulatory Reform awards non-consolidated special bonuses throughout the year to staff to recognise performance in particularly demanding tasks or situations. There is no maximum limit to the size of bonus that can be awarded but bonus costs are constrained to an overall cost limit, so it is not possible to say what proportion of staff did not receive the maximum bonus possible.

The agencies of BERR are Companies House and the Insolvency Service. Information on their bonus schemes are an operational matter for the chief executives of BERR's agencies and I have asked them to reply to the right. hon. Member direct. A copy of their replies will be placed in the Libraries of the House.

Letter from Gareth Jones, dated 22 July 2008:

I am responding on behalf of Companies House to your recently tabled Parliamentary Question to the Secretary of State for Business Enterprise and Regulatory Reform.

Companies House awards special non-consolidated bonuses to staff throughout the year for exceptional performance. It also has a corporate bonus scheme linked to performance against a range of targets. There is no limit to the special bonuses except the budget for the scheme so no member of staff received the maximum bonus possible. On the corporate scheme, again, no member of staff received 100% of the maximum bonus possible.

Letter from Stephen Speed, dated 22 July 2008:

The Secretary of State for Business, Enterprise and Regulatory Reform has asked me to reply to you directly in respect of your question (2007/3387) asking how many of The Insolvency Service's staff did not receive the maximum bonus possible under a bonus scheme applying to them since his Department was established.

The Insolvency Service special bonus scheme does not have a maximum value for any one particular bonus payment. The scheme as a whole is subject to an annual cost of no more than 0.4% of its annual pay bill.

Departmental Regulation

David Taylor: To ask the Secretary of State for Business, Enterprise and Regulatory Reform what the projected budget for each regulator for which his Department is responsible is for each financial year to 2011-12. [219918]

Mr. Thomas: The projected total net budget for each Statutory Regulator for which the Department for Business, Enterprise and Regulatory Reform has responsibility is shown in the following table. Budgets within central government are set for periods of 3 years and the budgets are therefore shown for each financial year from 2008-09 to 2010-11.

£000

	2008-09		2009-10		2010-11	
Regulator	Resource	Capital	Resource	Capital	Resource	Capital
The Coal Authority	27,349	8,710	28,496	4,849	30,200	4,222
Competition Commission	21,550	—	20,943	—	20,426	—
Financial Reporting Council	3,467	—	3,467	—	3,467	—

Departmental Research

Bob Spink: To ask the Secretary of State for Business, Enterprise and Regulatory Reform what proportion of his Department's budget and that of its predecessor was used for research within its areas of responsibility in each of the last 10 years. [218059]

Mr. Thomas: Historic data on key science, engineering and technology research are collated by the Office for National Statistics in their Science, Engineering and Technology statistics. These can be found at:

http://www.berr.gov.uk/dius/science/science-funding/set-stats/index.html

This includes outturn data for the Department of Business, Enterprise and Regulatory Reform's (BERR) predecessor, the Department for Trade and Industry (DTI) going back 10 years.

The Department's Annual Resource Accounts also include information on amounts spent on Research and Development alongside other programme expenditure. The information may be found at notes 10 and 11 of the 2006-07 DTI Resource Accounts. BERR's 2007-08 Resource Accounts will be published shortly.

Departmental Retirement

Lynne Featherstone: To ask the Secretary of State for Business, Enterprise and Regulatory Reform what the standard retirement age in his Department is; and how many people in his Department and its predecessor worked beyond the standard retirement age in each of the last five years. [214132]

Mr. Thomas: The retirement age in the Civil Service for staff below the SCS is delegated to individual departments and agencies under the Civil Service

(Management Functions) Act 1992 as set out in Chapter 11 of the Civil Service Management Code. The retirement age for the SCS is not delegated to departments and is 65. Members of the Senior Civil Service (SCS) have the right to request to continue to work beyond age 65 in the same way as those below the SCS.

The standard retirement age in the Department for Business, Enterprise and Regulatory Reform (BERR) is 65. When an employee reaches age 64 and four months they are sent a letter providing details of their retirement date and how to request to continue to work beyond age 65 if they wish to do so.

The numbers of employees who worked beyond their 65th birthday in each of the last five years in BERR (and the former Department of Trade and Industry) are as follows:

	Number
2008	[1]17
2007	9
2006	9
2005	11
2004	12

[1] Of which five have since retired

Mr. Marsden: To ask the Secretary of State for Business, Enterprise and Regulatory Reform how many employees in his Department have been asked to retire on reaching 65 in each year since 2000. [218308]

Mr. Thomas: The retirement age in the civil service for staff below the senior civil service (SCS) is delegated to individual departments and agencies under the Civil Service (Management Functions) Act 1992 as set out in Chapter 11 of the Civil Service Management Code.

The Employment Equality (Age) Regulations which came into force on 1 October 2006, made it illegal to discriminate on grounds of age unless it can be objectively justified (in very narrow circumstances). A 'right to consider' procedure was included in the regulations, which allows employees to request to work beyond the retirement age of their organisation but employers do not have to agree to the request nor give a reason for their decision.

The standard retirement age in the Department for Business, Enterprise and Regulatory Reform (BERR) is 65. Employees are not asked to retire at age 65. When an employee reaches 64 and four months they are provided with details of their retirement and informed of their right to request to continue to work beyond age 65 if they wish to do so.

The retirement age for the SCS is not delegated to Departments and is 65. Members of the SCS have the right to request to continue to work beyond age 65 in the same way as those below the SCS.

Electricity: Meters

Mark Lazarowicz: To ask the Secretary of State for Business, Enterprise and Regulatory Reform how many electricity consumers with dynamically teleswitched meters there were in Scotland *(a)* in 2005 and *(b)* on the most recent date for which figures are available; and how many consumers who now have such meters are no longer supplied by their previous electricity supplier. [216827]

Malcolm Wicks: The Office of Gas and Electricity Markets (Ofgem) has some data about dynamically teleswitched meter customers in Scotland. In September 2003, there were 228,000 dynamically teleswitched meter customers. Ofgem does not have data for 2005, but that number had fallen to 176,000 by July 2008. Data on how many dynamically teleswitched meter customers have switched to another supplier are not available.

Environment

Gregory Barker: To ask the Secretary of State for Business, Enterprise and Regulatory Reform what the evidential basis is for the Government's estimate of the value of the environmental industries by 2010, including renewables and nuclear energy, waste management and pollution control. [219392]

Malcolm Wicks: Figures for the UK's environmental industries, includes the renewables, waste management and pollution control sub-sectors, come from the report 'Emerging Markets in the Environmental Industries Sector', written by the UK Centre for Economic and Environmental Development (UKCEED) for the DTI and published in November 2006.

My right hon. Friend the Secretary of State's statement that a significant expansion of nuclear in the UK in the coming decades (going beyond 2010) could potentially create up to 100,000 jobs was based on a 20-reactor (10 station) fleet and the experience of jobs created from past nuclear construction in the UK and in other countries.

This includes jobs in the nuclear power stations, off site jobs for corporate, business, maintenance and fuel cycle functions, construction jobs, and jobs in the engineering and construction supply chains. This could represent around £20 billion worth of business for UK companies.

Fraud

Jenny Willott: To ask the Secretary of State for Business, Enterprise and Regulatory Reform on how many occasions staff employed by his Department have defrauded his Department in the last 10 years; and if he will make a statement. [214629]

Mr. Thomas: 11 members of staff have defrauded the Department and its predecessor, the DTI, in the last 10 years.

All cases have resulted in disciplinary action being taken.

Jenny Willott: To ask the Secretary of State for Business, Enterprise and Regulatory Reform what estimate he has made of the losses to his Department from fraud committed by staff of his Department in each year since 2003; and if he will make a statement. [214636]

Mr. Thomas: We do not make estimates of losses. The Department conducts an annual exercise to collate details of discovered cases and passes the result to HM Treasury for inclusion in their Annual Report of Fraud against Government Departments.

The Annual Fraud Report analyses data submitted by central Government Departments and their agencies

about fraud and theft perpetrated by staff. Reports for 2006-07 and the previous two years can be found on Treasury's public website at:

http://www.hm-treasury.gov.uk/documents/public_spending_reporting/governance_risk/psr_managing_risk_of_fraud.cfm

Jenny Willott: To ask the Secretary of State for Business, Enterprise and Regulatory Reform how many staff were prosecuted for *(a)* attempting to defraud and *(b)* defrauding his Department in each year since 2003; and if he will make a statement. [214639]

Mr. Thomas: There has been one prosecution since 2003 for attempting to defraud, and defrauding the Department and its predecessor, the DTI, since 2003.

Jenny Willott: To ask the Secretary of State for Business, Enterprise and Regulatory Reform how many staff of his Department were responsible for each instance of fraud or attempted fraud in each year since 2003; and if he will make a statement. [214643]

Mr. Thomas: One member of staff was responsible for each instance of fraud or attempted fraud in each year since 2003 in this Department and its predecessor.

Fuel Poverty: Greater London

Sarah Teather: To ask the Secretary of State for Business, Enterprise and Regulatory Reform what estimate he has made of the number of households in fuel poverty in each London borough in each of the last five years. [219278]

Malcolm Wicks: London borough level estimates of fuel poverty are available only for 2003. The following table shows fuel poverty levels taken from the Fuel Poverty Indicator dataset, available online at:

http://www.fuelpovertyindicator.org.uk/

for all the London boroughs.

London borough	*Estimate of number of fuel poor households*
Barking and Dagenham	3,900
Barnet	6,700
Bexley	5,000
Brent	5,300
Bromley	6,700
Camden	4,800
City of London	200
Croydon	7,700
Ealing	6,100
Enfield	6,000
Greenwich	5,300
Hackney	4,600
Hammersmith and Fulham	3,800
Haringey	5,200
Harrow	4,000
Havering	5,000
Hillingdon	4,800
Hounslow	4,300
Islington	4,200
Kensington and Chelsea	4,100
Kingston upon Thames	3,200
Lambeth	6,100
Lewisham	5,900
Merton	4,200
Newham	5,800
Redbridge	5,200
Richmond upon Thames	4,100
Southwark	5,400
Sutton	3,900
Tower Hamlets	3,800
Waltham Forest	5,300
Wandsworth	5,900
Westminster	5,600
Total	162,200

Fuels: Prices

David Simpson: To ask the Secretary of State for Business, Enterprise and Regulatory Reform what the estimated average *(a)* monthly and *(b)* annual fuel bills were for families in England and Wales in each of the last three years (i) in total and (ii) broken down by region. [220594]

Malcolm Wicks: Fuel bills are only available on an annual basis and only for electricity and gas. Total and regionally split bills for domestic electricity and gas are published quarterly in tables 2.2.3 and 2.3.3 respectively of quarterly energy prices, available online at:

http://www.berr.gov.uk/energy/statistics/publications/prices/idex.html

A copy of this is also available from the House of Commons Library.

Group of Eight: Oil

Mr. Dai Davies: To ask the Secretary of State for Business, Enterprise and Regulatory Reform what contribution the Government plans to make to the World Energy Forum announced at the G8 summit on 8 July. [218871]

Malcolm Wicks: In the communiqué of 8 July following the G8 summit in Hokkaido, G8 leaders proposed the holding of an energy forum to focus on energy efficiency and new technologies, which could also contribute to dialogue between energy producers and consumers. Japan has offered to host the Forum (which is anticipated to take place this autumn).

The United Kingdom will participate actively in the forum which will feed into the follow-up to the Jeddah energy consumers-producers' meeting in June that we will convene in London before the end of the year.

Industrial Disputes

John Battle: To ask the Secretary of State for Business, Enterprise and Regulatory Reform how many working days were lost to industrial action in *(a)* Leeds Metropolitan District and *(b)* Yorkshire and Humberside in each year since 1997. [220767]

Mr. McFadden: Data on days lost to industrial action are collected by the Office for National Statistics only at Government Office Region level. Therefore information on days lost relating to the Leeds Metropolitan District is outside of the scope of data collected. The available data for days lost to industrial action in the Government Office region of Yorkshire and Humberside are shown in the following table.

	Working days lost
1997	13,768
1998	2,154
1999	21,753
2000	8,008
2001	49,425
2002	91,175
2003	16,921
2004	80,081
2005	8,944
2006	51,877
2007	76,189

Insolvency

Mr. Hoban: To ask the Secretary of State for Business, Enterprise and Regulatory Reform how many *(a)* public limited companies, *(b)* other incorporated companies and *(c)* unincorporated associations became insolvent in the most recent year for which figures are available. [215151]

Mr. McFadden: The information requested is available only for numbers of insolvency procedures, and does not, therefore, provide a count of actual companies becoming insolvent—the same company may enter, successively, into more than one insolvency procedure.

Corporate insolvency procedures include: compulsory liquidations, creditors' voluntary liquidations, administrations, receiverships and company voluntary arrangements.

Table 1 breaks each of these procedures down further, by type: into public limited companies (PLCs), private limited companies (Private Ltd.) and other (Other), for new cases in 2007. All the information recorded under Table 1 has been provided by Companies House from their company database, as at July 2008.

Table 1

Insolvency procedure	*Company type*	*Insolvencies in 2007*
Compulsory Liquidation	PLC	38
	Private Ltd.	5,070
	Other	17
Creditors Voluntary Liquidation	PLC	32
	Private Ltd.	7,430
	Other	19
Creditors Voluntary Liquidation (following Administration)	PLC	22
	Private Ltd.	1,071
	Other	2
CVA	PLC	7
	Private Ltd.	413
	Other	1
Receiver Appointments	PLC	2
	Private Ltd.	329
	Other	3
In Administration	PLC	52
	Private Ltd.	2,456
	Other	11
Total procedures, by Company type	PLC	153
	Private Ltd.	16,769
	Other	53

Marine Renewables Deployment Fund

Gregory Barker: To ask the Secretary of State for Business, Enterprise and Regulatory Reform what representations his Department has received on conditions for qualification for the Marine Renewables Deployment Fund; and if he will make a statement. [219391]

Malcolm Wicks: BERR officials are in regular contact with industry representative bodies and individual companies on various issues of importance to them, one of which is the Marine Renewables Deployment Fund (MRDF).

The MRDF is a demonstration scheme and was designed to show that a device had finished its research and development stage and was ready for roll-out as a commercial product. The recent report on marine renewable energy issued by the Renewables Advisory Board (RAB) endorsed the design of the scheme and noted that it acts as an encouragement to developers to progress beyond the research phase to demonstration and deployment. Of course, we will be looking at the RAB report's detailed recommendations concerning the MRDF in light of responses to the renewable energy strategy consultation and will consider any necessary adjustments to the scheme in due course.

Minimum Wage: Service Industries

Mr. Byers: To ask the Secretary of State for Business, Enterprise and Regulatory Reform if he will bring forward legislative proposals to ensure that all waiting staff are guaranteed the national minimum wage, excluding gratuities, and that any gratuities given by customers are received in full by waiting staff with no deductions by employers; and if he will make a statement. [220156]

Mr. McFadden *[holding answer 21 July 2008]:* The use of tips as part of the national minimum wage is a complex issue. It is important to remember that under the current law workers are always entitled to receive the minimum wage.

Tips may count toward the minimum wage only where they have been paid through the employer's payroll.

We are already looking at this issue very carefully and believe tipping should be fairer and more transparent. Practice on tipping varies widely. In considering any change in this area, the Government would obviously consult fully and look at a range of options in line with better regulation.

Nuclear Power

Steve Webb: To ask the Secretary of State for Business, Enterprise and Regulatory Reform how many meetings he and his officials have had with representatives of *(a)* the nuclear energy industry and *(b)* the combined heat and power industry since January 2007; who attended each meeting; when each was held; and what matters were discussed. [220582]

Malcolm Wicks *[holding answer 21 July 2008]:* Ministers and officials have held meetings with representatives of both industries. A full list could be produced only at disproportionate cost.

Steve Webb: To ask the Secretary of State for Business, Enterprise and Regulatory Reform what his Department's budget is in 2008-09 for work associated with *(a)* nuclear energy and *(b)* combined heat and power. [220586]

Malcolm Wicks *[holding answer 21 July 2008]:* The department spends approximately £56 million per annum on international commitments associated with nuclear energy, including monies for the Global Partnership Fund for the former Soviet Union.

In addition the department spends £12.6 million on activities related to both legacy and new build nuclear policy.

Apart from a small sum paid for the collection of statistics, the department does not have a budget for work associated with combined heat and power. Policy lead on CHP rests with the Department for the Environment, Food and Rural Affairs and the administrative costs of this work in BERR are not separately identified.

Offshore Drilling: Oil

Andrew George: To ask the Secretary of State for Business, Enterprise and Regulatory Reform pursuant to the answer of 23 June 2008, *Official Report,* columns 142-44W, on offshore drilling: oil, what sources of oil and gas have been identified by the exploratory drilling recorded by his Department off the coast of *(a)* the Isles of Scilly, *(b)* Cornwall and *(c)* South West England; and what assessment has been made of whether such sources can be exploited. [221721]

Malcolm Wicks: From the list provided in my answer of 23 June, one exploration well only, number 103/1-1, discovered any appreciable hydrocarbons, which were probably sourced from shales of Jurassic age. This is situated due west of St. David's Head. There are currently no plans with the Department for development.

The nearby areas offered in the recent 25th Licensing Round have not attracted interest from oil companies.

Olympic Games

Mr. Don Foster: To ask the Secretary of State for Business, Enterprise and Regulatory Reform pursuant to the answer of 2 July 2008, *Official Report,* columns 949-50W, on the Olympic games, what estimate he has made of the cost of his Department's Ministers' and officials' attendance at the Beijing Olympics. [219473]

Mr. McFadden: My noble Friend the Minister for Trade and Investment will be in Beijing from Thursday 21 August to Tuesday 26 August and will attend the closing ceremony only of the Olympic games.

The purpose of his visit is to promote British business capability, FDI and partnership opportunities in general as well as business opportunities arising from the London 2012 games. During his visit, my noble Friend will support several key business events and initiatives.

He will be accompanied by his private secretary and three BERR officials who will support him during the business side of his visit. The estimated cost of the trip for the party is £28,200.

Photovoltaics

Mr. Heald: To ask the Secretary of State for Business, Enterprise and Regulatory Reform what discussions he has had with his German counterpart on mechanisms to encourage installation of photovoltaic panels. [219700]

Malcolm Wicks: In December 2007 my right hon. Friend the Secretary of State met with Matthias Machnig, State Secretary of the German Ministry for the Environment, where they discussed a number of energy related issues, including renewables. In November 2007 I also met with Mr. Machnig to discuss climate change and energy policy. This is in addition to other discussions both my right hon. Friend and I have had with German Ministers during and in the margins of European and international meetings.

Post Offices: Newcastle University

Alan Duncan: To ask the Secretary of State for Business, Enterprise and Regulatory Reform (1) what estimate Post Office Ltd has made of the net annual saving which will arise from the closure of the Newcastle University Union Society post office; and if he will make a statement; [220840]

(2) what assessment Post Office Ltd has made of the effect of closure of the Newcastle University Union Society post office on students in Newcastle upon Tyne. [220841]

Mr. McFadden *[holding answer 21 July 2008]:* This is an operational matter for Post Office Ltd (POL). I have therefore asked Alan Cook, Managing Director of POL, to reply direct to the hon. Member.

Copies of the letter will be placed in the Libraries of the House.

Regional Development Agencies: Fraud

Jenny Willott: To ask the Secretary of State for Communities and Local Government what estimate she has made of the losses to each regional development agency from fraud committed by staff of her Department in each year since the agencies were established; and if she will make a statement. [214634]

Mr. McFadden: BERR does not make estimates of losses but performs an annual exercise to record actual instances of discovered fraud, details of which are supplied to HM Treasury for inclusion in their Annual Fraud Report. Discovered levels of fraud in BERR and, previously in DTI, are extremely low.

Moreover I am not aware of any instance where fraudulent action by a BERR or DTI member of staff has resulted in a loss to a Regional Development Agency.

Regional Development Agencies: Rural Areas

Mr. Drew: To ask the Secretary of State for Business, Enterprise and Regulatory Reform what steps he has taken to ensure that regional development agencies have a clear strategy for development in rural areas, with particular reference to remote locations. [217665]

Mr. McFadden: The Regional Development Agencies Act 1998 states explicitly that a regional development agency's purposes apply as much in relation to the rural parts of its area as in relation to the non-rural parts of its area. The Act requires a Regional Development Agency (RDA) to formulate and keep under review a strategy in relation to its purposes and to have regard to the strategy in exercising its functions. This strategy should reflect the distinctiveness of the different parts of the region, including rural areas, identifying challenges and opportunities for these geographic areas.

The Department for Business, Enterprise and Regulatory Reform has also issued guidance obliging the Regional Development Agencies to ensure that their new corporate plans for 2008-11 tackle rural needs as a cross-cutting requirement. They have to demonstrate that they are ensuring that all sub-regions and localities within each region, including both rural and urban areas, can achieve their potential, consistent with the Government's objectives on creating economic opportunities for all and tackling spatial concentrations of deprivation.

Regulation: Standards

Alan Duncan: To ask the Secretary of State for Business, Enterprise and Regulatory Reform which *(a)* statutory regulators and *(b)* inspectorates are covered by the Regulators' Compliance Code. [220540]

Mr. McFadden: The functions to which the Regulators' Compliance Code applies are set out in the Legislative and Regulatory Reform (Regulatory Functions) Order 2007 (SI 2007 No. 3544), which is available on the OPSI web-link at:

http://www.opsi.gov.uk/si/si2007/pdf/uksi_20073544 en.pdf.

Broadly the statutory regulators to which the Compliance Code applies are set out in Part 1 of the Schedule to that Order, and there are 30 of them. Part 2 covers the regulatory functions exercisable by a Minister of the Crown and Part 3 covers the regulatory functions exercisable by local authorities.

Renewable Energy

Mr. Dai Davies: To ask the Secretary of State for Business, Enterprise and Regulatory Reform with reference to his Department's June 2008 consultation paper on renewable energy strategy, what proportion of the UK's renewable energy target of 15 per cent. by 2020 he expects to be met from *(a)* Northern Ireland, *(b)* Scotland and *(c)* Wales. [219006]

Malcolm Wicks: The European Commission's proposed target of 15 per cent. renewable energy in the UK by 2020 does not specify where in the UK renewables should be located. We are working with all the Devolved Administrations in developing our Renewable Energy Strategy, but we have not yet reached a view on the proportion of the 2020 target that will be met from Northern Ireland, Scotland and Wales.

Gregory Barker: To ask the Secretary of State for Business, Enterprise and Regulatory Reform what steps his Department is taking to take account of affordability in developing its renewable energy strategy which do not make costs for domestic or business users unaffordable. [219397]

Malcolm Wicks: We are consulting this summer on how to meet the UK's share of the 2020 renewable energy target in the most cost-effective way.

Royal Mail: Pensions

Charles Hendry: To ask the Secretary of State for Business, Enterprise and Regulatory Reform pursuant to the answer of 20 May 2008, *Official Report*, column 257W, on Royal Mail: pensions, what the value of the investment fund established to support the Royal Mail pension plan was on *(a)* 31 March 2008 and *(b)* 30 June 2008. [219779]

Mr. McFadden *[holding answer 17 July 2008]:* The value of the escrow account put in place to support the Royal Mail pension fund was £1,071 million on 31 March 2008 and £1,089 million on 30 June 2008.

Seals: Animal Products

Lorely Burt: To ask the Secretary of State for Business, Enterprise and Regulatory Reform what the *(a)* amount and *(b)* value of each category of seal product (i) imports and (ii) exports was in each of the last five years. [217676]

Mr. Thomas: The following table sets out information on trade in seal fur and products:

	Total UK imports		*Total UK exports*	
	£	*kg*	£	*kg*
2003	95,455	2,450	29,717	421
2004	296,117	3,624	197,796	4,888
2005	238,194	4,129	243,024	3,638
2006	204,465	2,931	239,625	8,565
2007	173,407	957	1,879	33

A detailed breakdown of these figures from 2003-07 are as follows:

Imports

	£ sterling					kg

Sellafield: Insurance

Paul Flynn: To ask the Secretary of State for Business, Enterprise and Regulatory Reform pursuant to the answer of 14 July 2008, *Official Report*, column 76W, on Sellafield, what the financial value is of the insurance indemnity against claims deemed to be uninsurable to be granted to the successful bidder to manage Sellafield; and how this figure was calculated. [220167]

Malcolm Wicks *[holding answer 21 July 2008]:* While the impact of any call on the proposed nuclear indemnity could be very high, there is an extremely small possibility

only of the indemnity ever being used, and it is therefore not possible to put a meaningful financial value on the indemnity. The impossibility of quantifying the monetary value of the indemnity is the main reason that there is no commercially available insurance, and the reason an indemnity is needed.

Severn Barrage: Railways

Adam Price: To ask the Secretary of State for Business, Enterprise and Regulatory Reform what consideration the Government has given to the feasibility of including a new railway line in the Severn barrage project. [219005]

Malcolm Wicks: We published the terms of reference for the Severn Tidal Power Feasibility Study in January. The terms of reference for the study reflect the Government view that there is not currently a strategic case to justify new transport links between Wales and south-west of England. The evidence is based primarily on the Eddington Review which is being responded to through the Government's "Towards a Sustainable Transport System"—both of these documents are available on the Department for Transport's website at

www.dft.gov.uk.

We expect to be consulting on the scope of the strategic environmental assessment (SEA) for a tidal power project in the Severn estuary later in the year and do not at this stage envisage including new transport links within the scope. That is not to say a new transport link could not be considered at a later stage—but such a development may require further assessments of its environmental impacts at that time.

The Department for Transport have commissioned further work from the Highways Agency and Network Rail on engineering issues and longer term transport requirements across the Severn estuary. The results of these high-level assessments will be available in the autumn.

Silverstone

Mr. Lancaster: To ask the Secretary of State for Business, Enterprise and Regulatory Reform what assessment he has made of the local economic effects on Milton Keynes of Silverstone losing the right to hold the Formula 1 Grand Prix from 2010. [221198]

Mr. McFadden: No economic assessment has been made specifically for Milton Keynes. An Economic Impact Assessment was completed in 2003 on the Fosters British Grand Prix 2002 at Silverstone but it did not narrow it down to specific areas. A new Economic Assessment is being commissioned by Northampton Enterprise on the effect of the move from Silverstone.

Small Businesses: Ethnic Groups

Sarah Teather: To ask the Secretary of State for Business, Enterprise and Regulatory Reform what estimate he has made of the number of new businesses started by *(a)* women and *(b)* black and ethnic minority people in each of the last five years. [219046]

Mr. McFadden: The Department does not produce estimates of the number of business start-ups by women and ethnic minority people.

However estimates are available of the number of newly self-employed people by gender and ethnicity from analysis of the Office for National Statistics Labour Force Survey.

BERR analysis of ONS Labour Force Survey on newly self-employed women and ethnic minority people is shown in the following table for the years 2003 to 2007.

Newly self-employed[1], UK

	2003	*2004*	*2005*	*2006*	*2007*
Female	134,900	128,600	133,700	132,100	136,000
Ethnic Minority[2]	29,800	30,900	30,500	30,500	41,200
Total	412,000	412,500	394,600	361,500	407,200

[1] Those who in each quarter say they have been self-employed for less than three months.
[2] All non-white ethnic minority groups.
Source: BERR analysis of ONS Labour Force.

Supermarkets

Mr. Drew: To ask the Secretary of State for Business, Enterprise and Regulatory Reform when he expects to respond to the Competition Commission's report on supermarkets. [220374]

Mr. Thomas: I expect to issue the Government's response to the Competition Commission's report during July and within the 90 days set out in guidance.

Supermarkets: Ombudsman

Mr. Drew: To ask the Secretary of State for Business, Enterprise and Regulatory Reform if he will adopt the Competition Commission's proposal of an ombudsman for supermarkets; and if he will make it his policy that the ombudsman should represent the local interest in supply chain operations. [221575]

Mr. Thomas: The CC is seeking, under Section 159 of the Enterprise Act 2002, undertakings from the grocery retailers covered by the new groceries supply code of practice (GSCOP) to establish an ombudsman to monitor and enforce compliance with the GSCOP. If the CC is unsuccessful in establishing the Ombudsman within a reasonable period of time, the CC will formally ask BERR to take the necessary steps to set up an ombudsman. BERR would then carry out a full consultation before taking a decision on the way forward.

Trade Competitiveness: Medical Equipment

Stephen Williams: To ask the Secretary of State for Business, Enterprise and Regulatory Reform what assessment his Department has made of the likely levels of future competitiveness in the market for *(a)* urology-related products, *(b)* stoma-related products and *(c)* single-line items. [220199]

Dawn Primarolo: I have been asked to reply.

The Department works closely with other Government Departments, including the Department for Innovation, Universities and Skills and the Department for Business, Enterprise and Regulatory Reform, to improve patients'

access to beneficial new treatments and medical technologies. The contribution that innovative medical technologies can make to the delivery of modern health and social care services was recognised as part of Lord Darzi's report on the NHS Next Stage Review "High Quality Care For All" published on 30 June 2008. As a result, the Department is working across Government and with the medical technology industry to develop a strategy which promotes uptake of clinically and cost effective innovative products throughout the care pathway. A copy if the Next Stage Review has already been placed in the Library.

Regarding stoma and urology items that are dispensed in Primary Care, mechanisms are in place to assess innovation when a supplier seeks to have an item listed in the Drug Tariff. Similar mechanisms would apply to single-line items.

The Department is seeking best value for money from the expenditure it makes in all areas of healthcare.

In Secondary Care, buyers procure goods and services via a tendering process. Consequently, market forces will drive a level of competition among suppliers who wish to secure NHS contracts.

Regarding the provision of stoma and urology items in primary care, the Department recently published an impact assessment (IA) alongside the consultation entitled "Proposed new arrangements under Part IX of the Drug Tariff for the provision of stoma and urology appliances—and related services—in Primary Care. June 2008". The IA considers the impact of the proposals set out in the consultation and includes a robust competition impact. A copy if the IA has already been placed in the Library.

Trade Unions

Mr. Tyrie: To ask the Secretary of State for Business, Enterprise and Regulatory Reform what recent representations he has received from trades unions on *(a)* alternative means of conducting union ballots and *(b)* secondary industrial action with the same company as the primary action; and if he will make a statement. [221420]

Mr. McFadden: The TUC's General Secretary regularly meets my right hon. Friend the Secretary of State for Business, Enterprise and Regulatory Reform, to discuss a range of issues which have included TUC proposals for reform to industrial action law. They last met on the 26 June.

UBS

Mr. Baron: To ask the Secretary of State for Business, Enterprise and Regulatory Reform what contracts have been awarded to UBS and its sister companies by his Department since June 2007. [220071]

Mr. Thomas *[holding answer 21 July 2008]:* Central records indicate that no contracts have been awarded by the Department to UBS since June 2007.

Further information could only be provided at disproportionate cost.

Wind Power

Gregory Barker: To ask the Secretary of State for Business, Enterprise and Regulatory Reform what recent assessment he has made of the *(a)* progress towards and *(b)* the merits of the target for offshore wind energy production; and what steps he plans to take to meet that target. [219389]

Malcolm Wicks: The Government do not have a target for 33 GW of electricity from offshore wind by 2020.

On 10 December 2007, the Secretary of State for Business, Enterprise and Regulatory Reform commissioned a strategic environmental assessment (SEA) on a draft plan for up to an additional 25 GW (installed capacity) of new offshore wind farms by 2020, in addition to the 8 GW already planned.

The assessment will consider the potential impacts and implications of future development before any decision is made as to what is an acceptable level of development. The SEA is due to be completed in spring 2009.

Andrew Stunell: To ask the Secretary of State for Business, Enterprise and Regulatory Reform how many wind turbines generating *(a)* under 100kW, *(b)* between 100kW and 1MW and *(c)* over 1MW there are in England and Wales. [219664]

Malcolm Wicks: In terms of wind turbines under 100kW ('microgeneration'), we assessed in our Element Energy research that there were 1,100 micro-wind turbines installed in the UK at the end of 2007. These were mostly in the range 1.5 to 4kW. However, we do not have these data broken down by nation. The research document can be downloaded at:

http://www.berr.gov.uk/energy/sources/sustainable/microgeneration/research/page38208.html

The following table shows the number of wind turbines generating in England and Wales at May 2008:

	Onshore		*Offshore*	
Country	*100kW to 1MW*	*Over 1MW*	*100kW to 1MW*	*Over 1MW*
England	310	107	0	122
Wales	395	68	0	30
Total	705	175	0	152

Source: AEA Technology.

Working Hours

Jo Swinson: To ask the Secretary of State for Business, Enterprise and Regulatory Reform how much his Department's Work-Life Balance Study cost. [220753]

Mr. McFadden *[holding answer 21 July 2008]:* The latest work-life balance study comprised the 3rd Work-Life Balance Employee Survey in 2006 and the 3rd Work-Life Balance Employer Survey in 2007. The total cost was £316,245 (excluding VAT). The employee survey was £144,820 (excluding VAT) and the cost of the employer survey was £171,425 (excluding VAT).

COMMUNITIES AND LOCAL GOVERNMENT

Audit Commission Act 1998

Mr. Pickles: To ask the Secretary of State for Communities and Local Government what guidance *(a)* the Audit Commission and *(b)* her Department has produced on steps local authorities should take to publicise the rights of members of the public to financial information under the Audit Commission Act 1998 and the Accounts and Audit Regulations 2003. [221219]

Mr. Dhanda: Neither Communities and Local Government nor the Audit Commission advise local authorities on how to meet their statutory obligations under the Audit Commission Act 1998 and the Accounts and Audit Regulations 2003.

The Audit Commission publishes a leaflet "Councils' Accounts Your Rights: England" on its website. This leaflet is aimed at members of the public and summarises their rights to inspect, question and challenge councils' accounts.

Additionally, individuals have access to information about public authorities through powers under the Freedom of Information Act 2000.

Mr. Pickles: To ask the Secretary of State for Communities and Local Government what guidance *(a)* her Department and *(b)* the Audit Commission has provided on whether members of the public have rights to access the records of safety camera partnerships under the terms of the Audit Commission Act 1998 and the Accounts and Audit Regulations 2003. [221220]

Mr. Dhanda: Neither Communities and Local Government nor the Audit Commission provide guidance specifically on this issue.

The public's right of inspection under section 15 of the Audit Commission Act 1998 relates to the accounts to be audited and all books, deeds, contracts, vouchers and receipts relating to them, which are placed on deposit during the annual four week inspection period. Where the partnership is accounted for through the authority it is therefore covered on the same basis as any other activity of the authority.

Business: Community Relations

Mr. Jim Cunningham: To ask the Secretary of State for Communities and Local Government if she will take steps to encourage businesses to share their facilities with local communities. [219551]

Mr. Dhanda *[holding answer 21 July 2008]:* Government encourage businesses to build corporate responsibility into their operations and to take account of their economic, social and environmental impacts, including on local communities. Government also encourages businesses to be engaged in local strategic partnerships and priority setting through local area agreements, recognising that business involvement will often play a critical part in delivering better services and outcomes for local communities.

Within this context, it is for individual businesses to consider whether it would be appropriate to share their facilities with local communities.

Carbon Emissions

Mr. Pickles: To ask the Secretary of State for Communities and Local Government pursuant to the Answer to the hon. Member for Welwyn Hatfield (Grant Shapps) of 7 July 2008, *Official Report*, column 1347W, on carbon emissions, what the differences are between HM Treasury's definition of zero carbon for stamp duty relief and that in the Level 6 Code for Sustainable Homes. [221156]

Mr. Iain Wright: There are no differences between the definition of zero carbon used by HM Treasury for the purposes of stamp duty relief and that used for the Code for Sustainable Homes. The Government have committed to keeping the definition under review and this will be the subject of a forthcoming consultation exercise.

Carers: Stroud

Mr. Drew: To ask the Secretary of State for Communities and Local Government how many people resident in Stroud constituency are proscribed from working in the care and children's sector under *(a)* the Protection of Vulnerable Adults list and *(b)* the Protection of Children Act 1999 lists. [220282]

Kevin Brennan: I have been asked to reply

The identification of the number of individuals registered on the Protection of Vulnerable Adults (PoVA) and the Protection of Children Act (PoCA) lists who have home addresses in Stroud would require each of the case records to be checked. This could be undertaken only at disproportionate cost and would only provide historical information correct at the time at which the individuals concerned were registered.

Once an individual is on either list, a standard or enhanced Criminal Records Bureau (CRB) disclosure will reveal the barred status of that individual to a relevant employer together with details of any criminal convictions. Information on an individual's address at the time of listing is not necessary in order to check whether that person is barred.

The part of this question which relates to the PoVA list is answered on behalf of the Department of Health who have responsibility for PoVA.

Communities in Control White Paper

Mr. Pickles: To ask the Secretary of State for Communities and Local Government with reference to the Communities in Control White Paper—Impact Assessments, what *(a)* methodology was used and *(b)* assumptions were made in calculating the estimated cost of voting incentives. [221533]

Mr. Dhanda: The Impact Assessments for the White Paper "Communities in control: real people, real power", which was published on 9 July 2008, were prepared according to guidance issued by the Better Regulation Executive. An estimate of the costs of voting incentives was calculated on the assumption that £1,000 would be

spent per authority, per election, with the incentive taking the form of a small reward, such as the opportunity to take part in a prize draw. The Ministry of Justice lead on voting incentives and are currently considering these proposals.

Construction: Materials

Andrew Stunell: To ask the Secretary of State for Communities and Local Government what estimate she has made of the percentage of the construction products market represented by *(a)* recycled and *(b)* re-used materials, expressed in (i) cash terms and (ii) mass, in each year since 2004. [219666]

Mr. Iain Wright: The Department's Report "Monitoring the Sustainability of Buildings", published in 2007 contained data about the value and mass of recycled and reusable materials used as of November 2004 only.

This can be viewed on the Department's website via the link:

http://www.communities.gov.uk/documents/planningandbuilding/pdf/381414.pdf

Figures for later years are not currently available, but further data are currently being compiled for the next report on this subject which will be published in 2009.

Departmental Responsibilities

Mr. Hoban: To ask the Secretary of State for Communities and Local Government which projects her Department has commissioned from *(a)* think tanks and *(b)* charities in each of the last two years for which figures are available; what the aim of each project was; which think tank or charity was commissioned; and how much was paid. [221603]

Mr. Dhanda: Communities and Local Government commissions work from a range of organisations to support the development of evidenced based policy. We do not currently hold centrally a list of contractors for all projects commissioned in the Department and to compile one could only be done at disproportionate cost.

Departmental Alcoholic Drinks

David Simpson: To ask the Secretary of State for Communities and Local Government what purchasing process is used by her Department for the procurement of alcohol for hospitality purposes. [219949]

Mr. Dhanda: As with the majority of commodities procured by the Department, the purchasing process encompasses the generating of a purchase order on the departmental finance system and the subsequent paying against an associated and agreed invoice.

For more lower value commodities, the Department promotes the use of the Government Procurement Card (GPC) as an efficient and cost effective purchasing device.

Within the Department, the staff handbook gives guidance to staff on when it might be appropriate to offer hospitality and the financial limits that apply. The purchase of alcohol for hospitality reasons is expected to be rare and limited to small amounts.

Departmental Buildings

Mr. Hoban: To ask the Secretary of State for Communities and Local Government which organisations have received *(a)* free and *(b)* discounted room hire from (i) her Department and (ii) its agencies in each of the last five years; and what the commercial value of the discount was in each case. [221578]

Mr. Dhanda: Communities and Local Government does not hire out its conference facilities, and only allows use of them by its own staff, or the departments/non departmental public bodies with whom it shares its buildings. It does not charge for the use of rooms, but does charge for refreshments.

For the Queen Elizabeth II Conference Centre and the Fire Service College this information is not available. As a trading funds who hire conference space to all sectors, any such arrangements would be commercially confidential.

Departmental Internet

Mr. Davey: To ask the Secretary of State for Communities and Local Government what budget her Department has allocated to the Read My Day/ BloginaBox platform for each of the next three financial years; and if she will make a statement. [220194]

Mr. Dhanda: The Department has agreed to provide funding of £10,590 to provide the required resources for the ReadmyDay/BloginaBox platform to operate until October 2011.

The Department will be communicating with all users on the platform to inform them of the decision and to encourage the establishment of a user group to seek how the platform can be made sustainable beyond this date. It is hoped that this seed funding will provide the opportunity for users to take control of this important asset and secure its future for them and other civic leaders.

Mr. Davey: To ask the Secretary of State for Communities and Local Government how many visits have been made to the International Centre of Excellence for Local e-Democracy website since its launch; and if she will make a statement. [220195]

Mr. Dhanda: Since the launch of the ICELE website in October 2006 there have been over 750,000 visits. In the last six full months to 30 June 2008, approximately 300,000 visits have been recorded.

Mr. Davey: To ask the Secretary of State for Communities and Local Government what plans her Department has to maintain and promote the resources and toolkits developed by the International Centre for Excellence for Local e-Democracy; and if she will make a statement. [220196]

Mr. Dhanda: A review is currently being conducted by the Department and the International Centre of Excellence for Local eDemocracy to establish the current content and web traffic to the site. We are keen to retain

the resources and toolkits developed by the International Centre of Excellence for Local eDemocracy and the previous Local e-Democracy National Project incorporated into it.

The Department is exploring the options currently available including the use existing web resources to promote the empowerment agenda.

Mr. Davey: To ask the Secretary of State for Communities and Local Government how many community groups have created websites using the Voice platform sponsored by her Department since the platform was launched; and if she will make a statement. [220286]

Mr. Dhanda: There are currently 3,362 community groups who have created websites and are registered on the VOICE site or using its open source derivatives.

Mr. Davey: To ask the Secretary of State for Communities and Local Government how much funding her Department has given to the International Centre for Excellence for Local e-Democracy to support the Voice platform; and if she will make a statement. [220287]

Mr. Dhanda: The Voice platform has been constructed from an amalgam of different national projects and partnerships within the Local e-Government Programme which ran from 2002 to 2006.

Funding directly attributable to the product was for £3,500,000 for the Environment and Community Online Residents e-Services (ENCORE) National Project, £350,000 for the Local Directgov Neighbourhoods and Parish Councils Project and £234,000 allocated to International Centre of Excellence for Local eDemocracy for further development and coding issues.

Mr. Davey: To ask the Secretary of State for Communities and Local Government what budget allocation her Department has made for the maintenance of the Voice platform for each of the next two financial years. [220288]

Mr. Dhanda: The Voice platform is fully funded up to April 2009 using existing resources allocated to the International centre of Excellence for Local eDemocracy (ICELE) and thus fulfilling current subscriptions to the service.

The Voice platform is almost self-sufficient via local authority and voluntary organisation subscriptions. Negotiations are being undertaken as part of a review with existing local authority users to determine whether it is viable to transfer the responsibility for maintaining hosting and license fees to a current user as a new host authority to enable taking this product forward. A small additional amount of seed funding will be offered to enable e-voice as a service to be transferred to the new host body and the services to continue.

Mr. Davey: To ask the Secretary of State for Communities and Local Government how many blogs by councillors and local government officers are registered on the ReadMyDay/Blog-in-a-Box platform sponsored by her Department; and if she will make a statement. [220289]

Mr. Dhanda: There are currently 166 councillors and 50 local government officers registered on the ReadmyDay/ BloginaBox platform from a total of 93 local authorities.

Departmental Overtime

Mr. Hoban: To ask the Secretary of State for Communities and Local Government how many hours of overtime were worked by staff in each pay grade in her Department in each of the last 12 months. [221242]

Mr. Dhanda: The following table shows how many hours overtime was claimed by staff in each pay grade in the Communities and Local Government Headquarters in each of the last 12 months. Data from our Agencies and NDPBs are not held centrally.

Hours

	2007						2008					
Grade	*July*	*August*	*September*	*October*	*November*	*December*	*January*	*February*	*March*	*April*	*May*	*June*
PBEM2	—	—	—	—	—	—	—	—	3	—	—	—
1	8	—	—	—	—	—	—	—	—	—	—	—
2	374	295	112	155	387	360	235	134	347	497	224	356
3	909	632	349	399	686	875	661	643	649	749	545	448
4	1,274	1,763	589	823	1,623	861	1,375	630	978	1,332	736	1,213
5	440	455	372	349	415	267	345	419	466	596	443	486
6	433	314	222	179	550	291	350	279	551	352	222	550
7	121	97	—	—	14	91	—	8	28	26	4	44
Total	3,559	3,554	1,644	1,905	3,675	2,747	2,967	2,112	3,021	3,551	2,174	3,097

Please note that the amount of overtime hours claimed and paid in each of the 12 months may not necessarily reflect the work actually carried out in the specified month. This is because employees often submit claims for overtime payment in either the month following the work or later.

Mr. Hoban: To ask the Secretary of State for Communities and Local Government what the cost of overtime payments paid to staff in her Department was in each of the last 12 months, broken down by pay grade. [221300]

Mr. Dhanda: The following table shows the cost of overtime payments paid to staff in each pay grade in the Communities and Local Government Headquarters in each of the last 12 months. Data for our Agencies and NDPBs are not held centrally.

£

	2007						2008					
	July	*August*	*September*	*October*	*November*	*December*	*January*	*February*	*March*	*April*	*May*	*June*

Please note that the amount of overtime paid in each of the 12 months may not necessarily reflect the work actually carried out in the specified month. This is because employees often submit claims for overtime payments either the month following the work or later.

Departmental Paper

David Simpson: To ask the Secretary of State for Communities and Local Government what percentage of paper used *(a)* for photocopying and *(b)* in printed publications by her Department and is predecessors was from recycled sources in each of the last two years. [220743]

Mr. Dhanda: For the Department's policy on the use of recycled paper, I refer the hon. Member to the answer given to the hon. Member for Birmingham, Selly Oak (Lynne Jones) on 16 April 2007, *Official Report*, column 263W.

Departmental Public Participation

Mr. Hoban: To ask the Secretary of State for Communities and Local Government what *(a)* listening exercises and *(b)* public forums her Department has held in each of the last two years; what the (i) purpose and (ii) cost was in each case and who the private contractor was and how much it was paid in each case. [221345]

Mr. Dhanda: There is no centrally held record held by this Department for either listening exercises or public forums, and it is therefore not possible to provide an authoritative list without incurring disproportionate cost.

Mr. Hoban: To ask the Secretary of State for Communities and Local Government what *(a)* reviews and *(b)* public consultations have been initiated by her Department since 27 June 2007. [221374]

Mr. Dhanda: Since 27 July 2007 my Department has reviewed 20 specific pieces of regulations, covering Building Regulations, fire, housing, local government and planning and initiated 62 consultations.

Departmental Recruitment

Dan Rogerson: To ask the Secretary of State for Communities and Local Government what job titles are used in her Department for full-time posts. [220507]

Mr. Dhanda: Information on job titles is not held centrally and could be collected only at disproportionate cost.

Disabled

Mr. Harper: To ask the Secretary of State for Communities and Local Government how many and what proportion of staff in *(a)* her Department and *(b)* the executive agencies for which she is responsible are disabled; and what the average salary in her (i) Department and (ii) executive agencies is of (A) full-time disabled staff, (B) full-time non-disabled staff, (C) part-time disabled staff and (D) part-time non-disabled staff. [220191]

Mr. Dhanda: The average salaries of disabled staff, non-disabled staff and staff for which their disability status is unknown, is given in the following table.

	Average salaries (full-time equivalent) (£)	*Staff numbers (headcount)*
Disabled—full-time	35,306	88
Disabled—part-time	38,994	11
Non disabled—full-time	38,448	1,289
Non disabled—part-time	38,666	140
Unknown/do not want to disclose—full-time	35,429	411
Unknown/do not want to disclose—part-time	37,791	44

Details of the average salaries of disabled and non-disabled staff in the Department's agencies are not held centrally.

Double Glazing

Andrew Stunell: To ask the Secretary of State for Communities and Local Government how many and what percentage of households installed double glazing in each year since 2004; and what proportion of these were initial installations. [219682]

Mr. Woolas: I have been asked to reply.

The information requested by the hon. Member is not available in the form requested but DEFRA has data on houses with existing double glazing for England in 2004 and 2005 from BRE's "Energy Use in Homes" reports. The figures are as follows:

				Percentage
	2004	*2005*	*2006*	*2007*
House fully double glazed	57	58	n/a	n/a
Houses with at least one double glazed window	85	87	n/a	n/a
Houses with less than half of windows double glazed	24	23	n/a	n/a

n/a = Data not yet available

Eco-Towns

Mr. Pickles: To ask the Secretary of State for Communities and Local Government (1) if she will place in the Library a copy of the letter to her Department from *(a)* the Curborough Consortium and *(b)* Gallagher Estates outlining their respective reasons for withdrawing from the eco-towns bidding process; [221523]

(2) which *(a)* developers, *(b)* bidders and *(c)* local authorities have withdrawn from the eco-town process subsequent to their bids being short-listed by her Department; and for what reasons in each case. [221628]

Caroline Flint: Three promoters have withdrawn their proposals for an eco-town since being shortlisted for further appraisal and consultation by Government:

Manby (East Lindsey district council)

Curborough (The Curborough Consortium)

NewMarston (Gallagher Estates).

Reasons given for withdrawal by each promoter are given in brief as follows. Copies of press releases (Manby and Curborough) and a letter (New Marston) providing more information on the reasons for withdrawal will be forwarded to the hon. Gentleman.

Manby

ELDC has decided instead to develop its work in alternative ways with local partners to address the key issues of affordable housing, skills, investment and coastal flood defences.

Curborough

The Curborough Consortium has decided to focus its attention on their existing planning application for a new settlement, taking account of the feedback of the eco-town challenge panel.

New Marston

Gallagher Estates have decided to focus on the delivery of already planned developments in the area.

Eco-towns: Curborough

Michael Fabricant: To ask the Secretary of State for Communities and Local Government what representations she has received regarding her Department's advertisement regarding the proposed eco-town at Curborough, near Lichfield; what response she has made to such representations; and if she will place in the Library a copy of each representation received and response made. [216422]

Caroline Flint: We used advertorials to encourage people to respond and take part in the consultation process for eco-towns, and they provided details of where to obtain more information. The first stage of the eco-towns consultation closed on 30 June and in due course we will provide a statement on the responses received, including those for Curborough.

Eco-towns: Religion

Mr. Streeter: To ask the Secretary of State for Communities and Local Government what consideration was given to the inclusion of references to faith centres during the drafting process for the recent consultation paper on eco-towns. [216614]

Caroline Flint *[holding answer 7 July 2008]:* As we set out in the consultation document each eco-town location will need its own approach and the consultation document only provides an indication of some of the benefits that eco-towns will provide. Also, as referred to in the consultation document, the Town and Country Planning Association have produced a best practice worksheet on community development, which is available to all those taking eco-towns forward, and provides advice about working with communities, including faith communities. We will be encouraging schemes to put this guidance into practice as individual projects are taken forward, including for example the funding and endowment of community assets which may be available to faith groups, as part of the development gain.

As part of the second stage of consultation we will be consulting on community issues among other criteria in the draft planning policy statement on eco-towns, and we will also be engaging more closely with faith communities to ensure that their views are taken into account in how the programmes goes forward.

In planning for eco-towns local authorities will also need to take account of 'PPS1: Delivering Sustainable Development' which requires that they take into account the needs of all the community, including particular requirements relating to age, sex, ethnic background, religion, disability or income.

Empty Property

Mr. Pickles: To ask the Secretary of State for Communities and Local Government what plans she has to increase the use of empty dwelling management orders. [221217]

Mr. Iain Wright: The Housing Act 2004 introduced voluntary powers for councils to apply to make an Empty Dwelling Management Order (EDMO). The decision to pursue an Empty Dwelling Management

Order (EDMO) is therefore at the discretion of the individual council where the property is based and we have no plans to amend this aspect of the legislation.

We are confident that the legislation giving local authorities the power to pursue an EDMO is beginning to work well. We always intended that it should be used only as a last resort where other measures have proved unsuccessful. Our policy is to encourage voluntary re-occupation of empty homes but this can only work well where there is realistic compulsion to back them up. EDMOs provide this compulsion and should therefore be a key component of a council's comprehensive empty property strategy.

Since the legislation was introduced, the number of properties empty for longer than six months has fallen by 4 per cent. from 282,461 to 271,252.

Fire Services: Emergency Calls

Mr. Harper: To ask the Secretary of State for Communities and Local Government what her most recent estimate is of the *(a)* number of calls to primary fires, *(b)* response times to primary fires, *(c)* number of calls to road traffic accidents, *(d)* response times to road traffic accidents and *(e)* percentage of targets met with respect to primary fires and road traffic accidents for each fire service in England in the latest period for which figures are available. [220305]

Mr. Dhanda: The most recent estimates for number of calls to primary fires, response times to primary fires, number of calls to road traffic collisions are as follows:

Primary fires and road traffic collisions attended by fire and rescue services

	Primary fires, 2007 Q2		
	Number of fires	*Average response time (minutes)*	*Number of road traffic collisions, 2006-07*

Source:
returns to Communities and Local Government

Response times to reach road traffic collisions are not held centrally.

Targets with respect to primary fires and road traffic collisions are a matter for each Fire and Rescue Authority and are not held centrally.

Government Departments: Public Participation

Margaret Moran: To ask the Secretary of State for Communities and Local Government what progress has been made on the cross-government access plan on public engagement; and if she will make a statement. [218748]

Mr. Dhanda: The proposal to develop a cross-government approach to community empowerment became the White Paper 'Communities in control: real people, real power;', which was published on 9 July 2008.

Home Information Packs

Mr. Pickles: To ask the Secretary of State for Communities and Local Government what estimate has been made of the level of mis-selling of no sale, no fee deferred-payment home information packs. [221218]

Caroline Flint: No such estimate has been made. The terms on which Home Information Packs (HIPs) are provided to consumers are a matter for the market and the Government have no role in this. HIP providers who

subscribe to the HIP Code undertake to ensure that all literature, terms, conditions and advertisements are clear, fair, reasonable and accurate and are not misleading.

Homelessness: Castle Point

Bob Spink: To ask the Secretary of State for Communities and Local Government how many people were *(a)* registered as homeless and *(b)* on Castle Point Borough Council's housing list in Castle Point in each of the last 10 years. [212599]

Mr. Iain Wright: I refer the hon. Member to the answer I gave to my hon. Friend the Member for Jarrow (Mr. Hepburn) on 20 June 2008, *Official Report*, columns 1238-40W.

I refer the hon. Member to the answer I gave to my hon. Friend the Member for Chorley (Mr. Hoyle) on 21 July 2008, *Official Report*, column 782W.

Homes and Communities Agency

Mr. Betts: To ask the Secretary of State for Communities and Local Government what role the Homes and Communities Agency will have in *(a)* promoting the lifetime homes standard and *(b)* delivering accessible housing standards. [219798]

Caroline Flint: As stated in the National Strategy for Housing in an Ageing Society, Lifetime Homes Standards will be a mandatory element in the code for Sustainable Homes at level 6 from 2008, at level 4 from 2010 and level 3 from 2013. This will have the effect of ensuring that all public sector funded housing is built to Lifetime Homes Standards from 2011.

We have recently amended the Housing and Regeneration Bill, to make it explicit that the object of the Homes and Communities Agency related to contributing to the achievement of good design specifically includes reference to design which has due regard to the needs of both elderly and disabled persons.

We will expect the HCA to promote well designed quality homes and places by using industry benchmarks in conjunction with recognised public sector standards. The standards adopted will include social, economic, environmental and physical measures of design and performance, building on the work of English Partnerships and the Housing Corporation. They will apply equally to the private and public sector activity in which the HCA engages, covering regeneration and housing, existing places and new places. We will also expect the HCA to consult widely about their proposed approach to quality before adopting specific measures.

Housing: Dorset

Mr. Ellwood: To ask the Secretary of State for Communities and Local Government how many homes are planned to be built in *(a)* Bournemouth and *(b)* Dorset; and if she will make a statement. [220398]

Mr. Iain Wright: The Panel Report into the Draft Regional Spatial Strategy for the South West recommended an overall net increase in dwellings for Bournemouth of 16,100 for the period 2006-26 and 48,100 for Dorset. This was the recommendation of the panel based on evidence submitted to and discussed at the Examination in Public held between 17 April and 6 July 2007. The Secretary of State, in her proposed changes to the RSS published today, agreed with these figures. The proposed changes are now subject to a 12-week consultation period.

Housing: Key Workers

Mr. Pickles: To ask the Secretary of State for Communities and Local Government what proportion of key worker homes built under the Key Worker Living programme are *(a)* empty and *(b)* have not yet been sold or let, broken down by Government office region. [221332]

Mr. Iain Wright: Since 2001 we have helped over 28,000 key workers purchase their own home.

From the 2006-08 National Affordable Housing programme, 470 properties are being exclusively marketed to key workers, of which 461 have been on the market for less than six months and nine have been marketed exclusively to key workers for more than six months. These properties are only located in three regions:

London: 427 of which 0 have been marketed for more than six months

South East: 42 of which eight have been marketed for more than six months

East: one which has been marketed for more than six months

Since November 2005, we have put in place a 'cascade' system. The cascade system allows any new build property that has been marketed exclusively to key workers for a significant period of time (usually more than six months) to be offered to other eligible first time buyers.

We no longer fund homes built to be exclusively marketed for key workers.

Housing: Low Incomes

Mr. Pickles: To ask the Secretary of State for Communities and Local Government how many completed Social Homebuy sales there have been to date. [221629]

Caroline Flint: Social homebuy is a voluntary demand-led scheme, launched in April 2006. The scheme enables tenants of participating local authorities and housing associations to buy a minimum 25 per cent. share in their rented home at discount. There were 235 sales from April 2006 to end June 2008.

Jon Trickett: To ask the Secretary of State for Communities and Local Government what research she has *(a)* commissioned and *(b)* evaluated on the relationship between residence in social housing and worklessness in the last three years; and if she will make a statement. [221701]

Caroline Flint: In February, I called for a wide ranging debate about how best to tackle the challenge of worklessness in social housing, examining the full range of options.

This debate is now under way and is being informed by the range of available evidence, which includes: the Hills Review of social housing; Housing Corporation research on "Housing associations tackling worklessness"; longitudinal analysis on the relationship between housing

and life chances, by Leon Feinstein, Ruth Lupton and colleagues from the Institute of Education, for the Smith Institute and Housing Corporation; Department for Work and Pensions Research Report "Social housing and worklessness: Key policy messages"; CORE data on new social lettings; Labour Force Survey data; Family Resources Survey data; and Survey of English Housing data.

Housing: Parking

Anne Main: To ask the Secretary of State for Communities and Local Government what guidance her Department issues on the provision of parking spaces as part of the new-build developments; and if she will make a statement. [221397]

Mr. Iain Wright: The Government's overall planning policy on parking is set out in Planning Policy Guidance note 13: "Transport" (PPG 13).

National planning policy for housing in Planning Policy Statement 3: "Housing" (PPS3) gives local planning authorities the ability to set their own residential parking policies, taking account of expected levels of car ownership, the importance of promoting good design and the need to use land efficiently.

Planning Policy Statement 6: "Planning for Town Centres" (PPS6) sets out policies on town centre development. It advises that new development should be located preferably in town centres or other locations offering good access by transport other than the private car and developers are expected to demonstrate flexibility in parking provision. Supporting "Guidance on Design and Implementation Tools" sets out the design considerations.

Draft Planning Policy Statement 4: "Planning for Sustainable Economic Development" (PPS4) proposes the setting of maximum parking standards for non-residential development by local planning authorities to take account of local circumstances, particularly the needs of hospitals.

"Manual for Streets", which complements PPS3, provides guidance on the design and provision of parking for residential streets. Further guidance is set out in "By Design: Better Places to Live, Safer Places: The Planning System and Crime Prevention" and "By Design". Good practice guidance on parking for the elderly and disabled, including blue badge schemes, is given in "Planning and Access for Disabled People".

"Guidance on Transport Assessments", published jointly with the Department for Transport, is also relevant. This provides advice to applicants on mitigating the transport impacts of developments and on the role of parking provision in such considerations.

Land Use: Databases

Mr. Pickles: To ask the Secretary of State for Communities and Local Government what requirements local authorities will have to provide information to her Department for inclusion on the new green space database. [221221]

Mr. Iain Wright: There is no requirement for local authorities to provide information for inclusion on the green space database. This is in line with the commitment the Government made in the 2006 Local Government White Paper, "Strong and Prosperous Communities", and the Local Government and Public Involvement in Health Act 2007, to reduce the number of performance indicators against which local authorities must report to central Government under 200.

The green space database will make widely available information held by the Department on green space. We hope that stakeholders with an interest in green space, including but not limited to local authorities, will benefit from this and be encouraged to share information voluntarily.

Local Authorities: Housing

Lembit Öpik: To ask the Secretary of State for Communities and Local Government how many *(a)* registered homeless people and *(b)* people in receipt of housing benefit have been housed in the private rented sector in each of the last five years. [219519]

Mr. Iain Wright: Information about English local authorities' actions under the homelessness legislation is collected quarterly at local authority level.

Information collected includes the number of households accepted by local housing authorities as eligible for assistance, unintentionally homeless and in priority need, and therefore owed a main homelessness duty (to secure that suitable accommodation is available). If a settled home is not immediately available, the authority must secure temporary accommodation until a settled home becomes available.

The first table shows the total number of households housed in temporary accommodation under homelessness provisions, in the private sector, as at the end of the last five years. This includes those households accepted as owed a main homelessness duty, plus those for whom a decision, appeal or possible referral is pending, and those found to be intentionally homeless but who are being housed for a reasonable period by the authority.

Number of households in temporary accommodation in the private sector, at the end of each of year, 2003-04 to 2007-08

	2003-04	2004-05	2005-06	2006-07	2007-08
England	51,930	57,390	59,870	57,140	52,480

Source:
CLG PIE Homelessness returns (quarterly)

The second table shows the number of households who had been owed a main homelessness duty, but for whom the homelessness duty was ended during the year by accepting a qualifying offer of an assured shorthold tenancy in the private sector. It comprises both those households who went immediately into settled private sector accommodation following acceptance of being owed a main homelessness duty, and those who had spent a period of time in temporary circumstances first.

Number of households for whom the main homelessness duty was ended during the year following acceptance of a qualifying offer of an assured shorthold tenancy, 2003-04 to 2007-08

	2003-04	2004-05	2005-06	2006-07	2007-08
England	4,550	3,000	2,950	3,160	3,050

Source:
CLG PIE Homelessness returns (quarterly)

The third table shows the total number of recipients of housing benefit in the private rented sector in England (including, but not limited to those households owed a main homelessness duty), in each of the last five years for which data are available.

Number of housing benefit recipients living in the private rented sector in last five years for which data are available, 2002-03 to 2006-07

	2002-03	2003-04	2004-05	2005-06	2006-07
England	619,000	630,000	681,000	718,000	769,000

Notes:
1. The data refer to benefit units, which may be a single person, couple or family.
2. The figures have been rounded to the nearest thousand.
3. Figures for any non-responding authorities have been estimated.
4. Annual caseloads are the average of four quarterly figures.

DWP Quarterly National Statistics

Local Government

Mr. Pickles: To ask the Secretary of State for Communities and Local Government which provisions in the 2007 Local Government White Paper Implementation Plan have not been implemented or commenced to the timetable outlined in the plan. [221525]

Mr. Dhanda: "Strong and Prosperous Communities—The Local Government White Paper" was published in October 2006. The White Paper set out the Government's commitment to reform of local public services and builds on earlier progress in improving the quality of local services to turn reform into lasting transformation.

The White Paper includes a large number of commitments. The vast majority of actions are proceeding to plan. These include the successful negotiations of all 150 Local Area Agreements (LAAs) which were signed-off on 30 June 2008, the agreement on 14 July 2008 of the first seven Multi-Area Agreements (MAAs), and the implementation of nine new unitary councils, which Parliament has approved, which is on track for 1 April 2009.

There are three areas which have taken longer to implement than the estimated timetable set out in the November 2007 Implementation Plan. These are:

the Councillor Call for Action and new overview and scrutiny powers. We are working with key stakeholders to implement in a coherent fashion changes to overview and scrutiny arrangements flowing both from the Local Government and Public Involvement in Health Act 2007 and the Police and Justice Act 2006—including the Councillor Call for Action, for which we are currently analysing the response to a consultation exercise which closed in March. We will work with the Local Government Association to issue guidance on this later this year. We will consult shortly on implementation of the overview and scrutiny powers.

extending the power to promote well-being to eligible parish councils. We are consulting stakeholders on secondary legislation and related guidance, with commencement scheduled before the end of this year.

we will also give local authorities the power to deal with local problems both by making certain byelaws without confirmation from the Secretary of State and by enforcing them with fixed penalty notices. A consultation exercise will be launched shortly and the intention is for these provisions to be in place by the end of 2008.

A further version of the White Paper Implementation Plan will be published shortly.

Local Government: Marketing

Mr. Pickles: To ask the Secretary of State for Communities and Local Government what the timetable is for reviewing the guidance to local authorities on publicity. [221631]

Mr. Dhanda: As stated in the Department's White Paper, "Communities in control: real people, real power", we will consult on potential changes to the Publicity Code and associated guidance in the autumn.

Local Government: Public Participation

Mr. Pickles: To ask the Secretary of State for Communities and Local Government what the timetable is for the introduction of the duty on best value authorities to involve local people. [221534]

Mr. Dhanda: The timetable is unaltered. The duty on best value authorities to involve local people comes into effect on 1 April 2009.

Rosie Cooper: To ask the Secretary of State for Communities and Local Government what steps her Department is taking to encourage local authorities to exercise powers providing for public participation in council meetings; and what recent discussions she has had with *(a)* local authorities and *(b)* others on the issue. [221742]

Mr. Dhanda: The recently issued White Paper "Communities in Control: Real people, real power" announced our intention to establish a new duty to promote democracy which will require local authorities to inform and encourage local people to participate in democratic activities.

This duty was proposed by the Councillors Commission which engaged widely with local government and other stakeholders in developing the report it published in December 2007, and the White Paper took into account responses to the Commission's report.

Natural Gas: Pipelines

Bob Spink: To ask the Secretary of State for Communities and Local Government what discussions *(a)* her Department and *(b)* the Thames Gateway Development Corporation have had with Calor Gas on pipe line developments in Essex in the last 12 months; and if she will make a statement. [220913]

Caroline Flint: The Department has had no conversations with Calor Gas Ltd on pipe line developments in Essex in the last 12 months.

The Thurrock Thames Gateway Development Corporation in its capacity as planning authority for Thurrock determined in May 2007 a planning application made by Calor Gas Ltd to construct an underground pipe line between Canvey Island and Stanford-le-Hope and for an above ground installation at the Stanford-le-Hope terminal. The decision by the TTGDC planning committee only covers the section of the pipe line in Thurrock. The planning permission was subject to a s.106 agreement, which has now been signed enabling the decision notice to be issued in June 2008.

Places of Change Programme

Lembit Öpik: To ask the Secretary of State for Communities and Local Government whether any schemes subject to awards under the Places of Change programme have been taken to judicial review by local opponents. [220370]

Mr. Iain Wright: We are aware that a judicial review claim is being brought against Northampton borough council in respect of the proposal to redevelop the Robinson House hostel into accommodation for rough sleepers.

Northampton borough council have been allocated £1.42 million from the Places of Change Programme towards the reprovision of its services for rough sleepers in Robinson House. They are currently conducting an options appraisal of sites in Northampton, including Robinson House, in order to take this project forward.

Schemes are taken forward by local authorities and are subject to the planning process. We are not aware of any other judicial review claim being made in relation to the Places of Change Programme since it commenced in April 2008.

Planning Permission

Mr. Pickles: To ask the Secretary of State for Communities and Local Government what changes the proposed new Planning Policy Statement 6 makes to whether local planning authorities can take into account the identity of an occupier as a material consideration when assessing a planning application for a new retail development or change of use. [221630]

Mr. Iain Wright: The proposed changes to Planning Policy Statement 6 (PPS6) introduce no changes to the extent to which local planning authorities can take into account the identity of an occupier when assessing a planning application for retail development or a change of use.

Regional Planning and Development: Eco-towns

Mr. Pickles: To ask the Secretary of State for Communities and Local Government pursuant to the answer of 19 May 2008, *Official Report*, column 47W, on regional planning and development: eco-towns, whether the partial reviews will consider the merits of Green Belt reviews to meet the revised building targets. [217957]

Caroline Flint: The RSS should provide a broad development strategy for the region for a 15 to 20 year period. In considering whether reviews of the RSS are needed, regional planning bodies should, alongside other matters, keep the need to consider a review of the extent of Green Belt in their regions under consideration.

Mr. Pickles: To ask the Secretary of State for Communities and Local Government pursuant to the answer of 19 May 2008, *Official Report*, column 47W, on regional planning and development: eco-towns, whether the partial reviews will be conducted by the regional development agencies. [217961]

Caroline Flint: All reviews of regional spatial strategies, where they are carried out, will be undertaken by the regional planning body (RPB). Regional development agencies are not the RPB under the terms of existing legislation.

Rents: Rotherham

Mr. MacShane: To ask the Secretary of State for Communities and Local Government how much rent has been paid by local authority tenants in Rotherham in each year since 1997. [217549]

Mr. Iain Wright: CLG does not have information on the amount of rent actually paid by tenants in local authorities. It compiles information on the rental income received by an authority towards its housing revenue account which includes rent rebates for housing benefit. On average 60 per cent. of local authority tenants are on housing benefit.

Rent income to the housing revenue account – Rotherham

	£
1997-98	40,148,086
1998-99	40,590,024
1999-2000	40,824,583
2001-02	44,566,301
2002-03	49,821,490
2003-04	47,656,886
2004-05	49,794,741
2005-06	51,379,118
2006-07	50,656,093

These figures are based on unaudited information provided by Rotherham council.

Social Rented Housing: Waiting Lists

John Battle: To ask the Secretary of State for Communities and Local Government how many people were on social housing waiting lists in *(a)* Leeds West constituency and *(b)* Leeds Metropolitan District in each of the last five years. [213358]

Mr. Iain Wright: I refer my hon. Friend to the answer I gave to my hon. Friend the Member for Chorley (Mr. Hoyle) on 21 July, *Official Report*, column 782W.

Information on local authority waiting lists is collected in respect of households rather than individuals. Where local authorities and registered social landlords operate a common register, households registered with the registered social landlord will be included in the data. However, registered social landlords are independent bodies and can keep their own waiting lists.

Thames Gateway Bridge

Mr. Evennett: To ask the Secretary of State for Communities and Local Government what plans she has for re-opening the public inquiry on the Thames Gateway Bridge; and if she will make a statement. [219877]

Mr. Dhanda: The Planning Inspectorate will be making arrangements to re-open the inquiry and it is currently envisaged that this will be in late spring 2009. The Inspectorate is waiting for the applicant, Transport for

London, to advise formally when the evidence required by the Secretary of State will be ready to transmit to parties to the inquiry.

Thames Gateway: Annual Reports

Andrew Mackinlay: To ask the Secretary of State for Communities and Local Government if she will publish the annual report on the Thames Gateway before the House rises for the summer adjournment; and if she will make a statement. [220844]

Caroline Flint *[holding answer 21 July 2008]:* The Thames Gateway Annual Report 2007-08 was published on 15 July 2008. An electronic version of the report can be accessed at:

http://www.communities.gov.uk/publications/thamesgateway/annualreport

Mr. Pickles: To ask the Secretary of State for Communities and Local Government what the reason was for the time taken in publishing the Thames Gateway annual report in 2008. [221228]

Caroline Flint: The Thames Gateway Annual Report 2007-08 was published on 15 July 2008 to coincide with the bimonthly meeting of the Thames Gateway Strategic Partnership.

Thermal Insulation

Andrew Stunell: To ask the Secretary of State for Communities and Local Government how many and what percentage of households with cavity walls acquired cavity insulation in each year since 2004. [219680]

Mr. Woolas: I have been asked to reply.

Data shown in the following table for the percentage of homes with cavity wall insulation are taken from the GB-wide "Domestic Energy Factfile" for 2004 and the English House Condition Survey from 2005.

DEFRA estimates that there are around 7.3 million households with fillable but unfilled cavities in 2008, plus around 800,000 households with cavities that are difficult or impossible to fill. This implies that around 54 per cent. of cavity homes in GB had cavity insulation at March 2008. It is anticipated that around 2.9 million additional cavities will be filled during the Carbon Emissions Reduction Target programme, which runs from 2008-11.

	Estimated number of cavity insulations per year (GB)	*Percentage of cavity homes with filled cavities*
2003-04	264,000	—
2004-05	264,000	[1]37
2005-06	445,000	[2]40
2006-07	445,000	—
2007-08	n/k	—
2008-09	n/k	[3]54

n/k = Not known
[1] GB. Source—Domestic Energy factfile
[2] England only, BRE Thermal insulation update
[3] GB. Estimate around this figure

Andrew Stunell: To ask the Secretary of State for Communities and Local Government how many and what percentage of households with hot water tanks installed tank insulation in each year since 2004; and what proportion of these were first-time installations. [219681]

Mr. Woolas: I have been asked to reply.

Tank insulation is one of the approved measures in the Energy Efficiency Commitment. The independent review commissioned by DEFRA on EEC1 (2002-05) estimated that around 195,000 tanks were insulated by this programme, which is an average of 65,000 per year.

Ofgem is due to report on the second phase of the Energy Efficiency Commitment (2005-08) on 1 August 2008. The headline report will probably not contain information on tank insulation, as this is not a major measure, however, DEFRA is commissioning a detailed study of EEC2 measures, to be completed by the end of the year.

The Thermal Insulation Updates for 2004 and 2005 (which apply to England only) states that around 2 per cent. of tanks were uninsulated in 2003 and around 1.5 per cent. were uninsulated in 2005.

Note also that the increasing market for combination boilers means that there are fewer hot water tanks to insulate.

Travelling People

Mr. Wallace: To ask the Secretary of State for Communities and Local Government what funding her Department has given to the Gypsy Reform Council in the last year. [221658]

Mr. Iain Wright: The Department for Communities and Local Government has given no funding to an organisation called the Gypsy Reform Council in this financial year (2008-09) or in financial year 2007-08.

Utilities: Voluntary Organisations

Sarah Teather: To ask the Secretary of State for Communities and Local Government what discussions she has had with the Secretary of State for Business, Enterprise and Regulatory Reform on the effects of rising water and fuel bills on charitable organisations, with particular reference to places of worship. [220802]

Mr. Dhanda: My right hon. Friend has had no such discussions.

WORK AND PENSIONS

Access to Work Programme

John Barrett: To ask the Secretary of State for Work and Pensions what percentage of the Access to Work budget was spent on the provision of support workers in each of the last 10 years. [220555]

Mr. Timms *[holding answer 21 July 2008]:* The information is not available prior to 2007. In 2007 48 per cent. of Access to Work expenditure was on the provision of support workers.

John Barrett: To ask the Secretary of State for Work and Pensions how many people with a learning disability were supported in work through Access to Work funding in each of the last 10 years. [220556]

Mr. Timms *[holding answer 21 July 2008]:* The available information is in the following table.

Number of people estimated as having a learning disability who have received Access to Work help

	Number
2003-04	1,800
2004-05	2,100
2005-06	2,100
2006-07	1,900
2007-08 (provisional)	1,700

Notes:
1. Figures are rounded to the nearest hundred.
2. A new, more relevant definition of participation has been established for reporting from 2007-08 onwards. Data are not yet available to give a final figure for the year 2007-08. This figure is not directly comparable with figures for previous years.
3. These figures are based on the condition recorded on the Access to Work computer system. Only the primary condition of a participant is recorded, and as such these figures are likely to under-estimate the numbers of those with a learning disability. A high proportion of participants (20-30 per cent.) have their condition recorded as 'Other'.

Source:
The Access to Work Evaluation Database.

Benefits

Jenny Willott: To ask the Secretary of State for Work and Pensions (1) how many and what proportion of housing benefit recipients received backdated payments *(a)* in total and *(b)* for a period covering (i) up to three months, (ii) between three and six months and (iii) between six and 12 months in the most recent period for which figures are available; and if he will make a statement; [219195]

(2) how many and what proportion of working age council tax benefit recipients received backdated payments *(a)* in total and *(b)* for a period covering (i) up to three months, (ii) between three and six months and (iii) between six and 12 months in the most recent period for which figures are available; and if he will make a statement. [219199]

(3) how many and what proportion of pensioner council tax benefit recipients received backdated payments *(a)* in total and *(b)* for a period covering (i) up to three months, (ii) between three and six months and (iii) between six and 12 months in the most recent period for which figures are available; and if he will make a statement. [219200]

Mr. Plaskitt: The information is not available.

Our ability to provide this breakdown is restricted by the breadth and reliability of the data available to us.

As part of the Equality Impact Assessment, we have provided an estimate of the proportion of housing benefit and council tax benefit case loads affected by the proposals to reduce the backdating facilities to three months. There are, however, important caveats to these estimates which must be noted.

A copy of the Equality Impact Assessment has been placed in the Library. It is also available on the Department for Work and Pensions website at:

http://www.dwp.gov.uk/resourcecentre/PC-HB-CTB-EIA-Apr08.pdf

Figures on the number of successful backdating claims are derived from the Single Housing Benefit Extract (HBSD-IAD scan). The backdating variable in the Single Housing Benefit Extract was introduced relatively recently in April 2007 and accordingly we have no means of corroborating the data's robustness against historical data. Furthermore, given that the data only go back six months, we currently have an insufficient pool of evidence to derive reliable figures from the data. These concerns should be allayed with time as the scan data improve.

Based on the first six months of data available, it is estimated that approximately 0.2 per cent. of new housing benefit and council tax benefit claims would be affected by a reduction in the backdating period to three months. These figures may be subject to revision as more data become available.

Jenny Willott: To ask the Secretary of State for Work and Pensions (1) what the average sum received for backdated housing benefit was *(a)* in total and *(b)* per month for housing benefit recipients who received backdated payments for a period covering (i) up to three months, (ii) between three and six months and (iii) between six and 12 months in the most recent period for which figures are available; and if he will make a statement; [219196]

(2) what was the average sum received in backdated council tax benefits was *(a)* in total and *(b)* per month by pensioner council tax benefit recipients who received backdated payments for a period covering (i) up to three months, (ii) between three and six months and (iii) between six and 12 months in the most recent period for which figures are available; and if he will make a statement. [219202]

Mr. Plaskitt: The information is not available.

Our ability to provide this breakdown is restricted by the breadth and reliability of the data available to us. We will review the situation regularly as more data become available.

Jenny Willott: To ask the Secretary of State for Work and Pensions (1) how much his Department spent on backdated payments of housing benefit in each of the last five years *(a)* in total and *(b)* broken down by the smallest geographical area for which figures are available; and if he will make a statement; [219198]

(2) how much was spent by his Department on backdated payments of council tax benefit in each of the last five years *(a)* in total and *(b)* broken down by the smallest geographical area for which figures are available; and if he will make a statement. [219204]

Mr. Plaskitt: I refer the hon. Member to the written answer I gave the hon. Member for Inverness, Nairn, Badenoch and Strathspey (Danny Alexander) on 16 June 2008, *Official Report*, column 734W.

Child Support Agency: Managers

Mr. Donohoe: To ask the Secretary of State for Work and Pensions (1) what categories of managers are working at the Child Support Agency; [216600]

(2) how many managers are employed at the Child Support Agency. [216601]

Mr. Plaskitt *[holding answer 8 July 2008]:* The administration of the Child Support Agency is the matter for the Chief Executive. He will write to the hon. Member with the information requested.

Letter from Stephen Geraghty, dated 22 July 2008:

In reply to your recent Parliamentary Question about the Child Support Agency, the Secretary of State promised a substantive reply from the Chief Executive.

You asked the Secretary of State for Work and Pensions, what categories of managers there are working at the Child Support Agency. [216600] and

How many managers are employed at the Child Support Agency. [216601]

The Child Support Agency, in line with other government departments and agencies, uses the standard Civil Service grade structure. The Agency's managers are distributed across the six traditional Civil Service management grades: Executive Officer, Higher and Senior Executive Officer, Unified Grades 7 and 6 and the Senior Civil Service.

These grades include both management and a variety of non-managerial, specialist roles. An analysis of the information that the Agency holds on the number of people within these grades with job titles suggesting managerial responsibility reveals that there are presently around 800 people employed either as 'managers', 'directors' or 'area heads', and a further 700 people employed as 'team leaders'. These figures do also include a number of specialist and professional roles which may not include people management.

I hope you find this answer helpful.

Child Support Agency: Telephone Services

Mr. Prisk: To ask the Secretary of State for Work and Pensions what income his Department received from the Child Support Agency's 0845 number in *(a)* 2007-08, *(b)* 2006-07 and *(c)* 2005-06. [217547]

Mr. Plaskitt: Figures concerning income from the use of 0845 numbers are only available for the Department for Work and Pensions as a whole and cannot be allocated to individual agencies. The Department stopped receiving a rebate from its 0845 numbers on 14 December 2007. This did not affect the charge customers pay for contacting the Department.

The Department received a rebate of £1,490,640.47 for the period covering 1 October 2005 to 14 December 2007 and this was used to pay for other telecommunication services. No information is available for any earlier period and no breakdown of this figure is available. The Department ceased this arrangement on 14 December 2007 and no longer receives any rebate. This change in arrangement does not affect the charge a customer pays for contacting the Department.

Children: Poverty

Jenny Willott: To ask the Secretary of State for Work and Pensions (1) what estimate his Department has made of the effect on child poverty if fraud and error were eradicated from *(a)* council tax benefit, *(b)* the savings element of pension credits, *(c)* housing benefit/local housing allowance and *(d)* all benefit payments; and if he will make a statement; [218670]

(2) what estimate his Department has made of the effect on levels of child poverty of the eradication of fraud and error from *(a)* income support and *(b)* jobseekers allowance systems; and if he will make a statement. [219148]

Mr. Timms: The information requested is not available.

Benefits, including income-related benefits, play a key role in making work pay, supporting those who cannot work, reducing poverty, and have helped to lift 600,000 children out of relative poverty since 1998-99.

The estimates of fraud and error across all benefits has reduced by a third since 2000-01 and for fraud are down by two thirds during the same period. We are keen to ensure that support goes to the right customers at the right time and are committed to reducing error and fraud across all benefits.

Jenny Willott: To ask the Secretary of State for Work and Pensions (1) what estimate his Department has made of the effect on child poverty if caseload take-up rates amongst working age families for income support were increased to *(a)* 100 per cent. and *(b)* 90 per cent.; and if he will make a statement; [218673]

(2) what estimate his Department has made of the effect on child poverty if the caseload take-up rates amongst working age families for all benefit entitlements were increased to *(a)* 100 per cent. and *(b)* 90 per cent.; and if he will make a statement; [218679]

(3) what estimate his Department has made of the effect on child poverty if the caseload take-up rates amongst working age families for council tax benefit were increased to *(a)* 100 per cent., *(b)* 90 per cent. and *(c)* 80 per cent.; and if he will make a statement; [218680]

(4) what estimate his Department has made of the effect on child poverty if expenditure take-up rates amongst working age families for jobseekers allowance were increased to *(a)* 100 per cent., *(b)* 90 per cent., *(c)* 80 per cent. and *(d)* 70 per cent.; and if he will make a statement; [218685]

(5) what estimate his Department has made of the effects on levels of child poverty if expenditure take-up rates amongst working age families for income support were increased to 100 per cent.; and if he will make a statement; [219518]

(6) what estimate his Department has made of the effect on levels of child poverty of an increase in expenditure take-up rates for all benefits amongst working age families to *(a)* 100 per cent. and *(b)* 90 per cent.; and if he will make a statement; [219558]

(7) what estimate his Department has made of the effect on levels of child poverty of an increase in expenditure take-up rates for council tax benefit amongst working age families to *(a)* 100 per cent., *(b)* 90 per cent. and *(c)* 80 per cent.; and if he will make a statement; [219559]

(8) what estimate his Department has made of the effect on levels of child poverty of an increase in caseload take-up rates for jobseekers allowance for working age families to *(a)* 100 per cent., *(b)* 90 per cent., *(c)* 80 per cent. and *(d)* 70 per cent.; and if he will make a statement; [219560]

(9) what estimate his Department has made of the effects on levels of child poverty if *(a)* caseload and *(b)* expenditure take-up rates for housing benefit and local housing allowance amongst working age families were increased to (a) 100 per cent. and (b) 90 per cent.; and if he will make a statement. [219561]

Mr. Timms: Poverty is a complex and multidimensional issue and, as such there are many possible measures of poverty. Nevertheless, it is generally accepted that low income is central to any poverty measurement. Definitions of low income households are set out in the annual National Statistics publication 'Households Below Average Income'. This reports numbers of individuals in households below or persistently below 50 per cent., 60 per cent. and 70 per cent. of median household income before and after deducting housing costs.

If there were 100 per cent take-up of the main income-related benefits by everyone in the population entitled to claim them, it is estimated that the number of children below 60 per cent. of contemporary median income would fall by around 200,000 before housing costs are taken into account and 100,000 on an after housing costs basis, based on 2008-09 benefit rates. Corresponding estimates are not available for 90 per cent. take-up, nor for 100 per cent. take-up of individual benefits.

We have made good progress on tackling child poverty. We continue to develop strategies to support parents into work and progress in work, because we know that work is the best route out of poverty—providing increased incomes and better opportunities for people and their families. Our specialised schemes will ensure the long-term unemployed get the individualised support they need.

Council Tax Benefit

Jenny Willott: To ask the Secretary of State for Work and Pensions what the average sum received in backdated council tax benefits was *(a)* in total and *(b)* per month by working age council tax benefit recipients who received backdated payments for a period covering (i) up to three months, (ii) between three and six months and (iii) between six and 12 months in the most recent period for which figures are available; and if he will make a statement. [219201]

Mr. Plaskitt: The information is not available.

Our ability to provide this breakdown is restricted by the breadth and reliability of the data available to us.

Council Tax: Tax Collection

Jenny Willott: To ask the Secretary of State for Work and Pensions (1) how many times deductions have been made from benefits for failure to pay council tax in each local authority area in each of the last five years; and if he will make a statement; [214915]

(2) how many claimants have had deductions made from their *(a)* pension credit, *(b)* jobseeker's allowance and *(c)* income support for failing to pay their council tax in each local authority area in each of the last 10 years; and if he will make a statement; [214928]

(3) how many claimants have had deductions made to benefits for failure to pay their council tax bill *(a)* once, *(b)* twice, *(c)* three times, *(d)* four times and *(e)* five times or more in each local authority area in each of the last five years; and if he will make a statement. [214929]

Mr. Plaskitt: The available information on the number of claimants who have had deductions made from income support, jobseeker's allowance and pension credit in each local authority area in each of the last 10 years has been placed in the Library.

Information is not available on how many claimants have had deductions made from their benefits for council tax broken down by the number of occasions.

Departmental Pay

Mr. Redwood: To ask the Secretary of State for Work and Pensions what proportion of staff in his Department and its agencies did not receive the maximum bonus possible under a bonus scheme applying to them in the last two years. [217057]

Mrs. McGuire: The information is in the following tables.

1. Below SCS

The Department for Work and Pensions currently operates two separate bonus schemes, which may be paid on top of regular salary. These are the individual performance bonus scheme and the special bonus scheme.

Individual performance bonus—all staff have the potential to earn an individual performance bonus, based on the performance level they receive through the performance management system. Individual performance is relatively assessed at the end of the performance year against the objectives set and competencies required. There are four performance levels. In 2006 and 2007 people who achieved one of the top three levels received a bonus, determined by their grade and performance level.

Percentage of employees who received a performance bonus

Performance year	*Percentage receiving maximum bonus*	*Percentage not receiving maximum bonus*
2005-06	19.8	80.2
2006-07	18.2	81.8

Special bonus—the special bonus scheme enables line managers to award a one-off bonus to recognise and reward exceptional personal or team achievement. Detailed criteria are determined by local managers. Awards may be cash or vouchers but the amounts that can be awarded are modest because the total expenditure over the year is limited to 0.25 per cent. of the manager's staffing budget. As there is no maximum amount set, these have not been included in the aforementioned table.

2. SCS

Performance year	*Percentage receiving maximum bonus*	*Percentage not receiving maximum bonus*
2005-06	8.45	91.55
2006-07	1.78	98.22

All bonuses are non-consolidated and so they are not added into salary and are not-pensionable.

Departmental Pilot Schemes

Hywel Williams: To ask the Secretary of State for Work and Pensions (1) what criteria are used to decide which region is selected for a pilot scheme by his Department; [216918]

(2) what his Department's total budget was for running pilot schemes in each of the last five years; and how much was spent *(a)* in Wales and *(b)* on testing service provision through the medium of Welsh; [216919]

(3) how many pilot schemes were run by his Department in each of the last five years, broken down by region. [216920]

Mr. Timms *[holding answer 7 July 2008]:* The Department runs pilots to test the effectiveness of different approaches to service provision in achieving results and in improving the customer experience. The decision on where these pilots are operated is based on a number of different criteria. These can include the type and location of the service being tested, the customer group involved, and the location of other pilots already under way. The decision on the location of a pilot also takes account of the need to ensure the customer base is sufficiently large to make the results of the pilot meaningful. Any pilot testing a service in Wales includes testing service provision in the Welsh language. Pilots that have been run in Wales include Pathways to Work in Bridgend, Rhondda, Cynon and Taff; Swansea Bay, West Wales; and Eastern Valleys; and new deal plus for lone parents in Cardiff.

Data over the last five years on the number of pilot schemes, the regions involved, and costs could be obtained only at disproportionate cost.

Disabled: Respite Care

Mr. Harper: To ask the Secretary of State for Work and Pensions how the funding for the provision of short break services announced in the Aiming High for Disabled Children document, will be spent in each year over the Comprehensive Spending Review period. [220210]

Kevin Brennan: I have been asked to reply.

In line with the commitments in Aiming High for Disabled Children, the Government intend to issue local authorities with revenue funding of £15.6 million in 2008-09, £75.8 million in 2009-10, and £177.6 million in 2010-11 for the transformation of short break provision. £11 million will be spent over the CSR period on programme support and evaluation.

In addition to this funding, the Government will also provide local authorities with short break capital funding of £4.5 million in 2008-09, £33 million in 2009-10 and £52.5 million in 2010-11. This additional £90 million was announced in the Children's Plan in December 2007.

Funding allocations to local authorities can be viewed at:

www.everychildmatters.gov.uk/ahdc

Employment

Mr. Clappison: To ask the Secretary of State for Work and Pensions how many *(a)* UK nationals, *(b)* non-UK EU nationals and *(c)* non-EU nationals were in (i) full-time employment and (ii) part-time employment in the UK in each year since 1995; and what the percentage rate of change was for UK nationals in each type of employment as a proportion of the UK working age population in each of those years. [169293]

Mr. Timms: I apologise for the delay in replying to the hon. Member which was as a result of an administrative error in relation to the transfer of his question to another Department. The information requested falls within the responsibility of the UK Statistics Authority. The National Statistician will write to the hon. Member and a copy of the response will be placed in the Library of the House.

Mr. Clappison: To ask the Secretary of State for Work and Pensions pursuant to the answer of 12 May 2008, *Official Report*, columns 1299-1301W, on employment, if he will break down the figures in Table D, foreign nationals, into *(a)* EU and *(b)* non EU citizens. [206255]

Mr. Timms: The information requested is given in the following tables.

The figures for foreign nationals provided in the answer given to the hon. Member on 12 May 2008, *Official Report*, columns 1299-1301W, were, as stated in the response, based on 2003 population estimates which were the latest estimates available at the time. On 14 May, ONS released re-weighted data based on 2007 population estimates. The foreign nationals table provided has therefore been revised to reflect the latest population estimates available and to include data on additional quarters now available, namely Q2 1998, Q2 2000 and Q1 2008. The tables for EU and non-EU nationals also use the 2007 population estimates.

Table (D) foreign nationals

	(i) Employment rate (percentage)	*(ii) WA employment*	*(iii) 16+ employment*
Q2 1997	60.3	940,000	970,000
Q2 1998	60.3	1,040,000	1,060,000
Q2 1999	60.0	990,000	1,020,000
Q2 2000	60.4	1,110,000	1,140,000
Q2 2001	61.6	1,180,000	1,210,000
Q2 2002	62.2	1,260,000	1,300,000
Q2 2003	62.7	1,360,000	1,390,000
Q2 2004	64.8	1,470,000	1,500,000
Q2 2005	63.9	1,570,000	1,600,000

Q2 1998	55.3	590,000	300,000
Q2 1999	54.6	560,000	570,000
Q2 2000	55.9	670,000	580,000
Q2 2001	56.0	710,000	^30,000
Q2 2002	57.5	800,000	520,000
Q2 2003	58.2	860,000	370,000
Q2 2004	61.1	910,000	J20.000
Q2 2005	59.0	950,000	J60.000
Q1 2006	62.3	1,040,000	060,000
Q2 2006	63.8	1,120,000	140,000
Q3 2006	64.8	1,160,000	180,000
Q4 2006	63.6	1,130,000	150,000
Q1 2007	60.1	1,080,000	100,000
Q2 2007	61.7	1,130,000	150,000
Q3 2007	62.1	1,140,000	160,000
Q4 2007	61.1	1,160,000	180,000
Q1 2008	62.3	1,190,000	200,000

Notes:
1. Figures are rounded to the nearest 10,000.
2. The figures provided in the tables are not seasonally adjusted. This means direct comparisons between different quarters are not possible.
3. In order to provide the more detailed breakdown that is required to answer the question, a country is defined as being in the EU only from the date at which it became a member state. This means that workers from some countries (e.g. Estonia) will be counted as non-EU nationals for some years (in the case of Estonia prior to 2004) and EU nationals for other years.
4. The totals for foreign nationals in Table (D) may not be equal to the sum of the corresponding numbers shown for EU and non-EU nationals—Tables (D) (a) and (D) (b) respectively—due to rounding.
5. As these figures are based on a sample survey they are also subject to sampling variability.
6. It should be noted that the nationality question in the LFS is an undercount because:
it excludes those who have not been resident in the UK for six months;
it excludes students in halls who do not have a UK resident parent;
it excludes people in most other types of communal establishments (e.g. hotels, boarding houses, hostels, mobile home sites, etc);
it is grossed to population estimates that only include migrants staying for 12 months or more.

Labour Force Survey (LFS)

Employment Services: Hearing Impaired

Jeremy Corbyn: To ask the Secretary of State for Work and Pensions what facilities jobcentres offer to deaf people who arrive to make enquiries *(a)* with and *(b)* without an appointment; and how many front-line jobcentre staff have qualifications in British Sign Language. [214617]

Mr. Timms: The administration of Jobcentre Plus is a matter for the Chief Executive of Jobcentre Plus, Lesley Strathie. I have asked her to provide my hon. Friend with the information requested.

Letter from Lesley Strathie, dated 22 July 2008:

The Secretary of State has asked Lesley Strathie to reply to your question asking what facilities Jobcentres offer to deaf people who arrive to make enquiries (a) with and (b) without an appointment; and how many front line jobcentre staff have qualifications in British Sign Language. I am replying on behalf of Lesley Strathie as acting Chief Executive of Jobcentre Plus.

Within Jobcentre Plus we recognise the diverse range of customers we serve and we are fully committed to providing equally accessible and available services to all customers.

Customers who are hearing impaired can obtain support from Jobcentre Plus in the following ways:

if a customer is able to use a hearing loop, we provide integrated and portable hearing loop facilities in each Jobcentre;

where customers prefer to have a qualified British Sign Language (BSL) interpreter present, the Jobcentre will arrange for an external interpreter to be present at the interview. We currently have four contracted providers that provide BSL interpreters nationally, or staff can use local qualified interpreters, lip speakers, or deaf blind interpreters; or

alternatively, customers can choose to bring friends, relatives or intermediaries to act as interpreting agents for them. If a customer provides their own professional qualified interpreter they can be reimbursed with reasonable costs.

We do not hold a central national database of staff who are qualified in BSL and this information could only be obtained at disproportionate cost.

Jobcentre Plus is committed to providing a first-class service and ensuring we fully support all our customers.

Housing Benefit

Jenny Willott: To ask the Secretary of State for Work and Pensions how many and what proportion of recipients of backdated housing benefit had incomes below 60 per cent. of median income before housing costs *(a)* before and *(b)* after receiving backdated housing benefit in the most recent period for which figures are available; and if he will make a statement. [219197]

Mr. Plaskitt: The information is not available.

Mr. Love: To ask the Secretary of State for Work and Pensions how much was spent on housing and related benefits in each of the last 20 years; and if he will make a statement. [221261]

Mr. Plaskitt: The available information is in the following table.

Housing benefit expenditure in Great Britain

	Outturn (£ million)	
	Nominal terms	*Real terms 2008-09 prices*
1987-88	3,536	7,236
1988-89	3,757	7,187
1989-90	4,258	7,600
1990-91	5,106	8,450
1991-92	6,363	9,925
1992-93	7,814	11,807
1993-94	9,218	13,575
1994-95	10,104	14,657
1995-96	10,876	15,313
1996-97	11,380	15,499
1997-98	11,177	14,790
1998-99	11,065	14,281
1999-2000	11,064	13,997
2000-01	11,162	13,923
2001-02	11,589	14,117
2002-03	12,637	14,926
2003-04	12,342	14,167
2004-05	13,158	14,698
2005-06	13,928	15,237
2006-07	14,840	15,782

Notes:
1. Information sourced from local authority claims for housing revenue account subsidy and housing benefit subsidy.
2. Figures to 2005-06 are taken from the final audited subsidy claims submitted to the Department by each local authority.
3. Figures for 2006-07 are not yet audited, and represent provisional outturn for the year.
4. Figures exclude asylum seekers from April 1999, since when the National Asylum Support Service has reimbursed DWP for benefits paid to asylum seekers.

Source:
DWP expenditure tables.
Benefit expenditure information is available online at www.dwp.gov.uk-asd-asd4-medium_term.asp
Local authority expenditure information is available online at www.dwp.gov.uk-asd-asd4-HBandCTB_expenditure.asp

Income Support

Jenny Willott: To ask the Secretary of State for Work and Pensions (1) what effects on his Department's costs are expected to arise from the changes to the eligibility criteria for income support taking effect in *(a)* October 2008 and *(b)* October 2009; and if he will make a statement; [215750]

(2) what effects on his Department's costs are expected to arise from the changes to the eligibility criteria for income support taking effect in October 2010; and if he will make a statement. [215836]

Mr. Plaskitt: The estimated costs for implementing these changes are £9.2 million in 2008-09, £26.1 million in 2009-10 and £38.9 million in 2010-11, and will be met from the Department's spending settlement.

The impact on recurrent departmental costs of the changes to the eligibility criteria for income support are currently expected to be £2.8 million in 2008-09, £20.6 million in 2009-10 and £36.5 million in 2010-11. These costs are the current estimates and will be continually reviewed during implementation.

Job Centres: Closures

Dan Rogerson: To ask the Secretary of State for Work and Pensions how many job centres have closed in each region in each of the last four years. [218086]

Mr. Timms: The administration of Jobcentre Plus is a matter for the chief executive of Jobcentre Plus, Lesley Strathie. I have asked her to provide the hon. Member with the information requested.

Letter from Mel Groves, dated 22 July 2008:

The Secretary of State has asked Lesley Strathie to reply to your question seeking details of how many Jobcentres have closed, in each region, in each of the last four years. I am replying on behalf of Lesley Strathie as acting Chief Executive of Jobcentre Plus.

Jobcentre Plus was created in April 2002 by the merger of the former Employment Service and Benefits Agency and has continued to refocus and transform the way it delivers its services. It now provides access to a wide range of services by telephone through Benefit Delivery and Contact Centres and provides face to face access for customers through a network of modernised Jobcentres.

The following table provides details of the customer facing Jobcentre Plus offices which were closed between 2004 and 2007.

Customer facing Jobcentres closed since January 2004

Region	*2004*	*2005*	*2006*	*2007*
East Midlands	4	2	13	2
East of England	1	12	5	1
London	11	7	24	10
North East	4	7	4	2
North West	14	10	17	8
Scotland	11	14	22	3
South East	14	10	15	5
South West	12	11	8	4
Wales	13	8	23	1
West Midlands	3	7	19	12
Yorkshire and Humber	8	11	7	1

Members: Correspondence

Mr. Clappison: To ask the Secretary of State for Work and Pensions when he plans to answer question 169293, on employment rates, tabled by the hon. Member for Hertsmere on 26 November 2007. [207299]

Mr. Timms: I replied to the hon. Member's question 169293 on employment rates today.

National Insurance: Foreign Workers

Mr. Bone: To ask the Secretary of State for Work and Pensions what estimate he has made of the number of national insurance numbers issued to migrant workers in the last 12 months; and if he will make a statement. [216899]

Mr. Timms: The most recent data available on national insurance numbers registered to adult foreign nationals are for the financial year 2006-07. Information on these registrations can be found in the report "National Insurance Number Allocations to Overseas Nationals Entering the UK 2006-07" which has been placed in the Library and is available online at:

www.dwp.gov.uk/asd/asd1/niall/niall_report.pdf

New Deal 50 Plus

Mr. Frank Field: To ask the Secretary of State for Work and Pensions with reference to the answer of 15 May 2007, *Official Report*, columns 643-44W, on the New Deal 50 plus, how many participants there were on the New Deal 50 Plus in each month since September 2006; how many participants there have been on each other New Deal programme since the inception of each; and how many of these were completing each course for the *(a)* first, *(b)* second, *(c)* third and *(d)* fourth or more time. [213847]

Mr. Timms *[holding answer 25 June 2008]:* Information on the number of current participants on New Deal 50 plus is not available. These statistics have been suspended while a review of the method for compiling New Deal 50 plus current participant figures is carried out.

Participants on the voluntary New Deals can leave the programme at any point.

Participants on New Deal for Young People and New Deal 25 plus who are claiming jobseeker's allowance are expected to follow a structured route through these mandatory New Deal programmes in order to continue receiving benefit. However, there is no strict definition of 'completing' New Deal programmes as people can leave benefits and thus leave New Deal at any point.

The available information on the number of times an individual participates in the New Deal is in the following table.

Benefit recipients participating in New Deal more than once are more likely to enter employment from their second spell on the programme than their first, and from their third spell than their second. Each period on New Deal moves participants closer to the labour market.

New Deal—Number of individuals starting

		Number of times individual participates			
	Number of individuals starting	*First time*	*Second time*	*Third time*	*Fourth time or more*
New Deal For Young people	1,282,820	912,830	256,910	84,030	29,040
New Deal 25 plus	757,510	532,900	145,320	53,120	26,170
New Deal For Lone Parents[1]	760,520	524,340	162,230	51,070	22,880
New Deal For Disabled People	293,770	259,990	28,110	4,520	1,160
New Deal 50 Plus	95,410	92,550	2,750	110	10
New Deal For Partners	9,200	9,030	160	10	[2]

[1] Information on starters and current participants for New Deal for Lone Parents are currently available to March 2007 only. Statistics after this period have temporarily been withdrawn pending a review of data that feeds into the statistics.
[2] Indicates nil or negligible.
Notes:
1. Information on number of times people participate on New Deal 50 Plus is only available from January 2004.
2. Latest data are to February 2008, except for Lone Parents (March 2007—see [1])
3. Figures are rounded to the nearest 10.
Source:
Information Directorate, Department for Work and Pensions

Older Workers: Further Education

David Simpson: To ask the Secretary of State for Work and Pensions what assistance his Department provides for people over 55 years of age who have been made redundant *(a)* in the previous 12 months and *(b)* more than one year ago to take up (i) further education and (ii) life-long learning opportunities. [218798]

Mr. Timms: Every participant in the New Deals, whatever their age, can call on the services of a personal adviser, who can help the claimant to look for a job or overcome their own personal barriers to finding work. The New Deals allow those out of work to take a new look at their own personal situation and to take the skills and experience that they may have already and build on them to create better opportunities for work.

Jobcentre Plus signposts its customers to relevant non-Department for Work and Pensions contracted provision, i.e.; University for Industry (Ufl) learndirect, apprenticeship opportunities, Career Development Loans, Adult Learning Grant, Nextstep and IAG (Information, Advice and Guidance) provision in Scotland and Wales.

The development and delivery of programmes to help unemployed people in Northern Ireland into work is the responsibility of the Northern Ireland Office.

Pension Credit

Jenny Willott: To ask the Secretary of State for Work and Pensions (1) how many and what proportion of recipients of backdated pension credit benefit had incomes below 60 per cent. of median income before housing costs *(a)* before and *(b)* after receiving backdated pension credit in the most recent period for which figures are available; and if he will make a statement; [219207]

(2) what assessment the Department has made of the likely effect on pensioner poverty of the Department's proposals to reduce the backdating period for pension credit; and if he will make a statement. [219208]

Mr. Mike O'Brien: The specific information requested is not available.

Since the introduction of pension credit the number of pensioners with incomes below 60 per cent. of median income after deducting housing costs, have fallen by 500,000. The proposal to change the length of time allowed for customers to claim pension credit (known as backdating) from 12 to three months is part of a further package of pensions measures that will make claiming benefit entitlements simpler and less intrusive and deliver extra support to low-income pensioners. This package includes the introduction of a more automatic claims process for housing benefit and council tax benefit claims made over the phone with pension credit claims, which will benefit around 50,000 pensioners over the comprehensive spending review period.

Tackling pensioner poverty is a priority. We will continue to strive to ensure that older people are aware of, and take up their entitlements through initiatives such as: sophisticated data matching to identify eligible non-recipients, home visits for vulnerable customers, local and national advertising and media campaigns, a simple and straight-forward claim process and ever closer working with partner organisations.

Pension Service: Telephone Services

Mr. Prisk: To ask the Secretary of State for Work and Pensions what income his Department received from the Pension Service's 0845 number in *(a)* 2007-08, *(b)* 2006-07 and *(c)* 2005-06. [217546]

Mr. Mike O'Brien: I am told that the information is not available in the form requested.

Although the DWP, which includes the Pension Service, received a £1.5 million rebate on its telephone charges from British Telecom, in relation to its 0845 services for the period from 1 October 2005 to the 30 November 2007, this rebate was offset against DWP telephony costs. After this date, the rebate arrangements ceased. This change in arrangement does not affect the charge a customer pays for contacting the Department. The charge a customer pays depends on their personal contract.

No information is available for any earlier period, nor on the amount relating specifically to calls to the Pension Service.

Pensioners: Poverty

Jenny Willott: To ask the Secretary of State for Work and Pensions (1) what estimate his Department has made of the effect on pensioner poverty if the caseload take-up rate for housing benefit/local housing allowance among pensioners increased to *(a)* 100 per cent. and *(b)* 90 per cent.; and if he will make a statement; [218678]

(2) what estimate his Department has made of the effect on pensioner poverty if the expenditure take-up rate for the guarantee element of pension credit increased to *(a)* 100 per cent. and *(b)* 90 per cent.; and if he will make a statement; [218682]

(3) what estimate his Department has made of the effect on pensioner poverty if the expenditure take-up rates for the guarantee and savings element of pension credit increased to *(a)* 100 per cent. (b) 90 per cent. and *(c)* 80 per cent.; and if he will make a statement; [218683]

(4) what estimate his Department has made of the effect on pensioner poverty if the caseload take-up rate for the savings element of pension credit increased to *(a)* 100 per cent. *(b)* 90 per cent. and *(c)* 80 per cent.; and if he will make a statement; [218684]

(5) what estimate his Department has made of the likely effect on levels of pensioner poverty if the caseload take-up rate for housing benefits or local housing allowance among pensioners were increased to 100 per cent.; and if he will make a statement; [219718]

(6) what estimate his Department has made of the likely effect on levels of pensioner poverty if the expenditure take-up rate for council tax benefits amongst pensioners were increased to *(a)* 100 per cent., *(b)* 90 per cent. *(c)* 80 per cent. and *(d)* 70 per cent.; and if he will make a statement [219719]

(7) what estimate his Department has made of the likely effect on levels of pensioner poverty if the caseload take-up rate for council tax benefits among pensioners were increased to *(a)* 100 per cent. *(b)* 90 per cent. *(c)* 80 per cent. and *(d)* 70 per cent.; and if he will make a statement; [219720]

(8) what estimate his Department has made of the likely effect on levels of pensioner poverty if the caseload take-up rate for the guarantee and savings element of pension credits were *(a)* 100 per cent. *(b)* 90 per cent. and *(c)* 80 per cent.; and if he will make a statement; [219721]

(9) what estimate his Department has made of the likely effect on levels of pensioner poverty if the expenditure take-up rate for the savings element of pension credits were increased to *(a)* 100 per cent., and *(b)* 90 per cent.; and if he will make a statement; [219722]

(10) what estimate his Department has made of the likely effect on levels of pensioner poverty if the caseload take-up rate for the guarantee element of pension credit were increased to *(a)* 100 per cent. and *(b)* 90 per cent; and if he will make a statement. [219723]

Mr. Mike O'Brien: Poverty is a complex and multidimensional issue and, as such, there are many possible measures of poverty.

It is generally accepted that low income is central to any poverty measurement. Definitions of low income households are set out in the annual national statistics publication households below average income. This reports numbers of individuals in households below or persistently below 50 per cent., 60 per cent. and 70 per cent. of median household income before and after deducting housing costs.

The information is not available in the format requested. It is not possible to model the impact of less than full take up of individual benefits on the number of individuals in households below thresholds of median household income in a robust way.

Estimates will depend on which eligible non-recipients take up which benefit and where they are within the income distribution.

It is estimated that if there were 100 per cent. take up off all income-related benefits by everyone in the population entitled to claim them the number of pensioners below 60 per cent. of contemporary median income would fall by around 700,000, after housing costs have been taken into account, based on 2008-09 benefit rates.

Tackling pensioner poverty remains a priority. We will continue to strive to ensure that older people are aware of, and take up their entitlements through initiatives such as; using sophisticated data matching to identify eligible non-recipients, home visits for vulnerable customers, local and national advertising and media campaigns, a simple and straight-forward claim process and ever closer working with partner organisations. In addition to pension credit we have increased winter fuel payments to £200 for households with someone aged 60-79, and £300 for those with someone aged 80 or over. And we will be making an additional payment for winter 2008-09 of £50 for households with someone aged 60-79 and £100 for those with someone aged 80 or over. Since 1997, we have also introduced free eye-tests, free bus passes for pensioners and free television licences for over 75s.

Jenny Willott: To ask the Secretary of State for Work and Pensions (1) what estimate his Department has made of the effect on levels of pensioner poverty of the

eradication of fraud and error from *(a)* the savings element of pension credits, *(b)* housing benefit and local housing allowance, *(c)* disability living allowance and *(d)* all benefits systems; and if he will make a statement; [219149]

(2) what estimate his Department has made of the effect on levels of pensioner poverty of the eradication of fraud and error from payments of the guarantee element of pension credits; and if he will make a statement; [219724]

(3) what estimate his Department has made of the likely effect on levels of pensioner poverty of the eradication of fraud and error from payments of the guarantee and savings element of pension credits; and if he will make a statement; [219725]

(4) what estimate his Department has made of the likely effect on levels of pensioner poverty of the eradication of fraud and error from council tax benefit payments; and if he will make a statement. [219726]

Mr. Mike O'Brien: The Government are committed to tackling pensioner poverty. The strategy since 1997 has been to target help on the poorest pensioners, those who need it most, while providing a solid foundation of support for all.

We have made significant progress. The number of pensioners in relative poverty has fallen by 900,000 since 1998-99 and by around 500,000 since the introduction of pension credit in 2003 (after housing costs).

We are keen to ensure that support goes to the right customers at the right time and are committed to reducing fraud and error across the benefit system. The estimate of fraud and error across all benefits has reduced by a third since 2000-01 and for fraud is down by two-thirds during the same period.

Information on the impact of the eradication of fraud and error on levels of pensioner poverty is not available.

Mr. MacNeil: To ask the Secretary of State for Work and Pensions how many and what proportion of pensioners lived below the Government's designated poverty level, broken down by *(a)* sex and *(b)* age in each year since 1997. [212897]

Mr. Mike O'Brien: Poverty is a complex and multidimensional issue and, as such, there are many possible measures.

It is generally accepted that low income is central to any poverty measurement. As no single measure captures all aspects of poverty, the public service agreement "Tackle poverty and promote greater independence and wellbeing in later life" includes a range of indicators related to low income for pensioners. These are the percentage of pensioners in relative low income (below 50 and 60 per cent. contemporary median household income), and absolute low income (below 60 per cent. of 1998-99 median income uprated in line with prices), measured after housing costs.

Figures for the number and percentage of pensioners below the 60 per cent. contemporary median household income after housing costs threshold by gender and age are shown in the following tables. Further information is set out in the annual national statistics publication "Households Below Average Income" which is available in the Library.

Number of pensioners living in households with less than 60 per cent. of contemporary median household income after housing costs, by gender and age—Figures are United Kingdom from 2002-03 onwards. Earlier years are great Britain only

Notes

1. Data for Northern Ireland have only been collected since 2002-03, so the information shown is for the United Kingdom from 2002-03 to 2006-07, and for Great Britain for 1996-97 to 2001-02.
2. A pensioner is defined as anyone over state pension age.
3. The income measures used to derive the estimates shown employ the same methodology as the Department for Work and Pensions publication "Households Below Average Income" (HBAI) series, which uses disposable household income, adjusted (or "equivalised") for household size and composition, as an income measure as a proxy for standard of living.
4. The figures are based on OECD equalisation factors.
5. Numbers of pensioners have been rounded to the nearest 100,000, while proportions of pensioners have been rounded to the nearest percentage point.
6. Small year-on-year movements should be treated with caution as these will be affected by sampling error and variability in non-response.

Pensioners: Social Security Benefits

Mr. Evennett: To ask the Secretary of State for Work and Pensions how many applications for council tax benefit there were in each London borough in each year since 1997. [220776]

Mr. Plaskitt: The information is not available prior to 2001-02. The available information is in the following table.

New council tax benefit claims received each year by London local authorities

Pensions: Financial Assistance Scheme

Jenny Willott: To ask the Secretary of State for Work and Pensions what the administrative costs of the Financial Assistance Scheme were in each month since April 2007; and if he will make a statement. [216984]

Mr. Mike O'Brien: The information is in the following table.

Month	*Expenditure (£)*
April 2007	126,436
May 2007	124,408
June 2007	137,749
July 2007[1]	544,794
August 2007	153,413
September 2007[2]	279,951
October 2007	163,836
November 2007[3]	261,777
December 2007	134,704
January 2008	109,974
February 2008	159,726
March 2008	167,255
April 2008	128,454
May 2008	145,650

[1] July costs include an element for IT (maintenance) annual costs circa £451,434
[2] September costs include an element for IT (licence and change requests) annual costs circa £159,000.
[3] November costs include circa £50,000 salary costs in respect of backdated pay award and circa £76,000 IT costs.

Personal Accounts

Harry Cohen: To ask the Secretary of State for Work and Pensions (1) what estimate he has made of the percentage of final salary which would be provided for a personal account saver for *(a)* men, *(b)* women and *(c)* all people on average earnings throughout their working lives; [216839]

(2) what estimate he has made of the percentage of final salary from average earnings at which the income from personal account saving would provide an income above the level of the basic state pension. [215367]

Mr. Mike O'Brien: Personal accounts and other private pensions are not intended to give an income instead of the basic state pension. Any income from private pension saving—in an occupational defined benefit or defined contribution scheme—will be in addition to state pension entitlements.

A male median earner, who, from age 22 in 2012 to state pension age, works and saves in an occupational defined contribution pension at the minimum level set out under reform—4 per cent. from the individual, 1 per cent tax relief and 3 per cent. from the employer on banded earnings between around £5,000 and £33,000—can expect to receive a gross weekly private pension of around £80 in today's earnings terms (roughly equivalent to the level of the basic state pension), and a total net weekly income of £224. His replacement rate from saving would be 50 per cent., an improvement of around 15 percentage points from saving.

A female median earner, with the same work and savings history, can expect to receive around £55 gross weekly private pension, and a total net weekly income of £202. Her replacement rate from saving would be 57 per cent., an improvement of around 12 percentage points from saving. Her replacement rate from the state pension system is higher than that of the previous example reflecting the fact that her state pension entitlement will be the same as that for the male median example, but the earnings with which they are compared will be lower.

A male average earner, again with the same work and savings history, can expect to receive around £72 gross weekly private pension, and a total net weekly income of £216. The replacement rate from saving would be 53 per cent., an improvement of around 14 percentage points from saving.

Note:
These examples assume male median earnings of £24,440, female median earnings of £19,240 and average earnings of £22,360. For all examples, an annual management charge of 0.5 per cent, and phasing over a three year period are assumed. The whole of the pension pot is annuitised using gender-specific RPI-linked annuities for the male and female earners and a male RPI-linked annuity for the average earner. All figures are in 2007-08 earnings terms. The replacement rates shown are higher than the 45 per cent targeted by the Pensions Commission for lifetime median earners as they refer to saving from age 22 rather than from around age 30 as used by the Pensions Commission.

Personal Accounts: Females

Harry Cohen: To ask the Secretary of State for Work and Pensions based on average earnings during a working life and a final salary level of average earnings for women who take *(a)* three years, *(b)* four years, *(c)* five years and *(d)* six years out of their working life for child rearing, what percentage of final salary would be provided for a personal account saver; and if he will provide the percentage assuming (i) return to full-time working and (ii) two years on top of the time out at half-pay for part-time working. [218701]

Mr. Mike O'Brien: A female median earner, who, from age 22 in 2012 to state pension age, works and saves in an occupational defined contribution pension at the minimum level set out under reform—4 per cent. from the individual, 1 per cent. tax relief and 3 per cent. from the employer on banded earnings between around £5,000 and £33,000—can expect to receive around £55 gross weekly private pension, and a total net weekly income of £202. Her overall replacement rate would be 57 per cent.

The following table shows the expected gross weekly private pension, total net weekly income and replacement rate for a female median earner, with the same work and savings history apart from taking three, four, five or six years out of their working life to raise children and then:

(i) returns immediately to full-time work;

(ii) works part-time for two years before returning to full-time work.

Retirement incomes for a women taking time out of the labour market to care for her children

	Years out of labour market				
	None	*3 years*	*4 years*	*5 years*	*6 years*
(i) Returns immediately to full-time work					
Gross private pension income (£)	55	50	49	47	46
Net total income (£)	202	199	198	197	196
Overall replacement rate (percentage)	57	56	55	55	55
(ii) Works part-time for two years before returning to full-time work					
Gross private pension income (£)	55	48	47	45	44
Net total income (£)	202	197	196	195	194
Overall replacement rate (percentage)	57	55	55	54	54

Notes:
1. Net total income is total retirement income after tax from private pension income, basic state pension, second state pension and income related benefits. Replacement rate is total retirement income as a percentage of final salary
2. These examples assume full-time female median earnings of £19,240, part-time median earnings of £9,620, an annual management charge of 0.5 per cent., and that contributions are phased in over a three-year period. The break from labour market activity is assumed to occur at age 30. The whole of the pension pot is annuitised using gender-specific RPI-linked annuities. Replacement rates are rounded to the nearest 1 per cent. and income figures are rounded to the nearest £1. Figures are based on standard assumptions about factors such as investment growth and a lifestyled fund.

Post Office Card Account

Jim Cousins: To ask the Secretary of State for Work and Pensions how much and what proportion of each type of state benefit payable to residents in the City of Newcastle upon Tyne was paid into Post Office card accounts in each of the last five years. [219093]

Mr. Plaskitt: The answer is not available in the precise format requested. The following table shows the number and percentage of state benefit payments paid into Post Office card accounts in the City of Newcastle upon Tyne in each of the last five years.

	December 2003		*December 2004*		*December 2005*		*December 2006*		*December 2007*

Poverty

Mr. Clappison: To ask the Secretary of State for Work and Pensions how many and what proportion of *(a)* 55 to 59 year olds, *(b)* 60 to 64 year olds and *(c)* 65 to 69 year olds lived in households with below 60 per cent. of median income (i) before and (ii) after deducting household costs in each year since 1997. [207147]

Mr. Mike O'Brien: This information is given in the following tables.

Table 1: Number and proportion of 55 to 59-year-olds in households below 60 per cent. of median income

			Before housing costs		After housing costs	
Coverage	Year	Total number of 55 to 59 year olds (million)	Number below 60% of median income (million)	Percentage below 60% of median income	Number below 60% of median income (million)	Percentage below 60% of median income

	2006-07	2.6	0.5	18	0.4	16

Notes:
1. These statistics are based on Households Below Average Income data.
2. Data for Northern Ireland have only been collected since 2002-03, so the information shown is for the United Kingdom from 2002-03 to 2006-07, and for Great Britain for 1997-98 to 2001-02.
3. Small changes should be treated with caution as these will be affected by sampling error and variability in non-response.
4. The reference period for Household Below Average Income figures is single financial years.
5. The income measures used to derive the estimates shown empioy the same methodology as the Department for Work and Pensions publication 'Households Below Average Income' (HBAI) series, which uses disposable household income, adjusted (or "equivalised") for household size and composition, as an income measure as a proxy for standard of living.
6. The figures are based on OECD equivalisation factors.
7. Figures have been presented on both a Before Housing Cost and After Housing Cost basis. For Before Housing Cost, housing costs (such as rent, water rates, mortgage interest payments, structural insurance payments and ground rent and service charges) are not deducted from income, while for After Housing Cost they are.
8. The Government's preferred measures of low income for pensioners are based on incomes measured after housing costs. Measuring income on an after housing costs basis is appropriate, as two thirds of pensioners own their property outright and so face lower housing costs to meet from their current income while still deriving value from their home. This is different to the current working age population and to the situation for pensioners in the past. Considering pensioners' incomes compared to others after deducting housing costs allows for more meaningful comparisons of income between working age people and pensioners, and between pensioners over time
9. As part of PSA Delivery Agreement 17 three indicators of low income poverty will be monitored: the percentage of pensioners below 60 per cent. contemporary median income, 50 per cent median income and 60 per cent. of 1998-99 median income uprated in line with prices.
10. Numbers of individuals in each age range have been rounded to the nearest 100,000 individuals, while proportions of individuals in each age range have been rounded to the nearest percentage point.

Source:
Households Below Average Income, DWP

Ms Buck: To ask the Secretary of State for Work and Pensions how many and what proportion of children were living in working households earning less than 60 per cent. of median income *(a)* before and *(b)* after housing costs in each English region in each year since 1990. [217099]

Mr. Timms: Specific information regarding low income for the UK is available in "Households Below Average Income 1994/95 to 2006/07". This annual report, which is a National Statistics publication, includes the numbers and proportions of individuals, children, working age adults and pensioners with incomes below 50 per cent., 60 per cent. and 70 per cent. of median income, and the proportions in persistent poverty.

Available information has been placed in the Library.

Poverty: Children

Sarah Teather: To ask the Secretary of State for Work and Pensions how many children in each London borough were living in poverty in each of the last 10 years, broken down by ethnicity. [219275]

Mr. Timms: The information is not available.

Our child poverty statistics, published in the "Households Below Average Income" series, allow a breakdown of child poverty by Government office region. The "Households Below Average Income Series" cannot provide information below the level of Government office region.

Work is currently under way to develop an indicator of child poverty at the local level that will measure the proportion of children in families living in poverty in both out of work and in work families. It is intended that this indicator will be used as the local area agreement child poverty indicator from April 2009 onwards.

Chris Grayling: To ask the Secretary of State for Work and Pensions what estimate he has made of the number of children who would be lifted out of poverty if there was 100 per cent. take-up of entitlement to *(a)* council tax benefit, *(b)* income support, *(c)* housing benefit and *(d)* jobseeker's allowance. [221689]

Mr. Timms: There are many possible measures of poverty. Nevertheless, it is generally accepted that low income is central to any poverty measurement. Definitions of low income households are set out in the annual National Statistics publication Households Below Average Income This reports numbers of individuals in households below or persistently below 50 per cent., 60 per cent. and 70 per cent. of median household income before and after deducting housing costs.

If there were 100 per cent. take up of the main income-related benefits by everyone in the population entitled to claim them, it is estimated that the number of children below 60 per cent. of contemporary median

income would fall by around 200,000 before housing costs are taken into account and 100,000 on an after housing costs basis, based on 2008-09 benefit rates.

Poverty: Elderly

Mr. Clappison: To ask the Secretary of State for Work and Pensions how many and what proportion of 60 to 64 year olds lived in households below 40 per cent. of median income *(a)* before and *(b)* after deducting household costs in each year since 1997. [207145]

Mr. Mike O'Brien: Specific information regarding low income for the UK is available in "Households Below Average Income 1994-95 to 2006-07". This annual report, which is a National Statistics publication, includes the numbers and proportions of pensioners with incomes below 50 per cent., 60 per cent. and 70 per cent. of median income, and the proportions in persistent poverty.

Information covering 40 per cent. of median income is not presented in the Households Below Average Income series as it is an unreliable measure of poverty. This is because households stating the lowest incomes to the Family Resources Survey may not actually have the lowest living standards. Many people who report very low incomes appear to have high spending. Hence any statistics on numbers in this group may be misleading.

It is also the case that the Institute for Fiscal Studies in their 'Poverty and Inequality in the UK: 2008' report (June 2008) have said

"Levels of material deprivation generally fall as incomes rise, but children in households with less than 40 per cent. of median income—so-called 'severe' poverty—are, on average, less deprived than those in households with between 40 per cent. and 60 per cent. of median income. This reinforces existing concerns that households with the lowest recorded incomes in HBAI are not those with the lowest living standards."

Some types of minimal income households include:

Under-recording of very fragmented incomes. If a household draws on a high number of different income sources, some may be omitted from their survey responses.

Some households will have transitional periods of low income, being between (possibly well paid) jobs at the precise time of survey interview or being self-employed where incomes can vary greatly from year to year. Older households could be waiting to receive a private or company pension, awaiting the outcome of a benefits claim or be in probate after a partner has died.

There will also be some households who are drawing on savings to cope with perhaps a longer period of minimal incomes.

Finally, there will be some households who are genuinely having to cope on very low incomes, and perhaps be getting into debt to maintain levels of expenditure.

Only the final two categories are genuinely low-income, and evidence is that statistics covering below 40 per cent. of median income include a mix of all four categories.

The information given in the following table should therefore be treated with caution.

Table 1: Number and proportion of 60 to 64-year-olds in households below 40 per cent. of median income

		Before housing costs			*After housing costs*	
Coverage	*Year*	*Total number of 60 to 64-year-olds (million)*	*Number below 40 per cent. of median income (million)*	*Percentage below 40 per cent. of median income*	*Number below 40 per cent. of median income (million)*	*Percentage below 40 per cent. of median income*

	2004-05	3.0	0.2	6	0.2	7
	2005-06	3.1	0.2	6	0.2	7
	2006-07	3.2	0.2	6	0.2	7

Notes:

1. These statistics are based on Households Below Average Income data.
2. Data for Northern Ireland have only been collected since 2002-03, so the information shown is for the United Kingdom from 2002-03 to 2006-07, and for Great Britain for 1997-98 to 2001-02.
3. Small changes should be treated with caution as these will be affected by sampling error and variability in non-response.
4. The reference period for Household Below Average Income figures is single financial years.
5. This response includes a lower income threshold of 40 per cent. of the contemporary median income. The data for households with an income lower than 50 per cent. of median are not considered to be accurate as an indicator of living standards. Many of these households while having very low incomes would not be considered poor, but who do genuinely have few sources of income in the short-run. These figures are not National Statistics and caution must be applied because those people stating the lowest incomes in the FRS may not actually have the lowest living standards.
6. The income measures used to derive the estimates shown employ the same methodology as the Department for Work and Pensions publication 'Households Below Average Income' (HBAI) series, which uses disposable household income, adjusted (or "equivalised") for household size and composition, as an income measure as a proxy for standard of living.
7. The figures are based on OECD equivalisation factors.
8. Figures have been presented on both a before housing cost and after housing cost basis. For before housing cost, housing costs (such as rent, water rates, mortgage interest payments, structural insurance payments and ground rent and service charges) are not deducted from income, while for after housing cost they are.

9. The Government's preferred measures of low income for pensioners are based on incomes measured after housing costs. Measuring income on an after housing costs basis is appropriate, as two thirds of pensioners own their property outright and so face lower housing costs to meet from their current income while still deriving value from their home. This is different to the current working age population and to the situation for pensioners in the past. Considering pensioners' incomes compared to others after deducting housing costs allows for more meaningful comparisons of income between working age people and pensioners, and between pensioners over time.
10. As part of PSA Delivery Agreement 17 three indicators of low income poverty will be monitored: the percentage of pensioners below 60 per cent. contemporary median income, 50 per cent. median income and 60 per cent. of 1998-99 median income uprated in line with prices.

Numbers of 60 to 64-year-olds have been rounded to the nearest 100,000 individuals, while proportions of 60 to 64-year-olds have been rounded to the nearest percentage point.

Retirement

Mr. Marsden: To ask the Secretary of State for Work and Pensions what estimate he has made of the number of employees asked to retire on reaching 65 years of age in each year since 2000. [218394]

Mrs. McGuire: The Department for Work and Pensions was formed in June 2001 and no data are available prior to that date. At that time the compulsory retirement age for the Department was 65 for those below the senior civil service grades. For the years ending September 2001, 2002 and 2003 the numbers of employees who were asked to retire at age 65 were 123, 125 and 131 respectively.

From October 2003 the Department introduced arrangements that allowed its employees below the senior civil service grades to remain in employment beyond the age of 65. This was formalised in October 2006 when the Department removed its retirement age altogether for employees below the senior civil service grades. Employees can retire if they wish, when they reach civil service minimum pension age. For most employees that is age 60, but they are not obliged to retire on reaching that age.

Until October 2006 the mandatory retirement age for senior civil servants was 60. After this date it was raised to 65, where it currently remains. No employees at senior civil service grades in the Department have been asked to retire on reaching age 65.

School Leaving: Further Education

David Simpson: To ask the Secretary of State for Work and Pensions what assistance his Department provides to school leavers who have been unemployed for *(a)* more than six months and *(b)* more than one year to help them take up (i) further education and (ii) life-long learning opportunities. [218811]

Mr. Timms: Young people are supported by Connexions, where the focus is upon keeping young people in education and learning rather than solely upon moving them into employment. The service is managed locally by Connexions Partnerships that bring together all the key youth support services and young people are actively involved in its design and delivery.

Jobcentre Plus provides a valuable service for 16 and 17 year-olds in financial hardship, such as those who have been in care or who are estranged from parents and are now living independently. Without jobseeker's allowance they would have no income if they were unemployed.

Changes were made to new deal from April this year to allow 18-year olds who had spent at least six months not in education, employment or training, by agreement with their personal adviser, to be fast tracked to the gateway of the new deal for young people on a voluntary basis. Following the introduction of the flexible new deal next year, this group of young job seekers will be fast tracked on a mandatory basis to the supported job search stage of the new programme.

Every participant in the new deals, regardless of their age, can call on the services of a personal adviser, who can help the claimant to look for a job or overcome their own personal barriers to finding work. The new deals allow those out of work to take a new look at their own personal situation and to take the skills and experience that they may have already and build on them to create better opportunities for work.

Jobcentre Plus signposts its customers to relevant non-Department for Work and Pensions contracted provision, ie; University for Industry (Ufl) learndirect, apprenticeship opportunities, career development loans, adult learning grant, Nextstep and IAG (Information, Advice and Guidance) provision in Scotland and Wales.

The development and delivery of programmes to help unemployed people in Northern Ireland into work is the responsibility of the Northern Ireland Office.

Social Fund

Jenny Willott: To ask the Secretary of State for Work and Pensions how many applications for *(a)* crisis loans, *(b)* budgeting loans and *(c)* community care grants were received in (i) each Jobcentre Plus district and (ii) each region of the UK in each month since October 2003; and if he will make a statement. [219194]

Mr. Plaskitt: The available information has been placed in the Library.

Social Fund: Personation

Fiona Mactaggart: To ask the Secretary of State for Work and Pensions how many social fund loans were found to have been issued to people who had fraudulently used someone else's identity to apply for the loan in the most recent period for which figures are available. [219469]

Mr. Plaskitt: There are no recorded outcomes for the current reporting year where social fund loans have been paid to individuals who have fraudulently used someone else's identity to apply for the loan.

Social Security

Jenny Willott: To ask the Secretary of State for Work and Pensions (1) how much of the money allocated to each local authority to make *(a)* exceptional hardship

payments and *(b)* exceptional circumstances payments was unspent in each year between 1991 and 2001; and if he will make a statement; [220086]

(2) whether the calculation of the amount allocated to local authorities for the payment of *(a)* exceptional hardship payments and *(b)* exceptional circumstances payments takes account of average rental prices (i) nationally and (ii) in the relevant local authority; and if he will make a statement. [220087]

Mr. Plaskitt: There was no requirement for local authorities to return any unspent exceptional hardship payments. Therefore, the information requested is not available. Department for Work and Pensions allocated payments of exceptional hardship payments according to the local authority's case load and the number of cases restricted by the rent restriction rules.

Funding for exceptional circumstances payments was met from the local authority's own budget and not the Department for Work and Pensions.

Speech-Writing Services

Mr. Maude: To ask the Secretary of State for Work and Pensions for what reasons Mr. Phil Collins left his post as his speechwriter. [217403]

James Purnell: Mr. Collins holds and has held no such post. My Department has a contract in place with Mr. Collins under which he can be paid for providing speech-writing services to the Department. The contract ends in March 2009.

WOMEN AND EQUALITY

Departmental Sick Leave

David Simpson: To ask the Minister for Women and Equality how many staff in her Department have had five or more periods of sickness absence of less than five days in two or more of the last five years. [218971]

Barbara Follett: The Government Equalities Office was established on 12 October 2007. Since that date no staff have had five or more periods of sickness absence of less than five days.

Equality Bill

Philip Davies: To ask the Minister for Women and Equality what estimate she has made of the cost of implementing the provisions of the draft Equality Bill; and if she will make a statement. [217538]

Barbara Follett: An initial regulatory impact assessment was published with the consultation on the proposals for the Bill last year. This is now in the process of being revised. A further impact assessment will be published before the Bill is introduced.

Refuges: Halifax

Mrs. Riordan: To ask the Minister for Women and Equality what services are available in Halifax constituency for women seeking refuge from domestic violence who have no access to public funds to assist them. [217218]

Barbara Follett: The services available to women seeking refuge from domestic violence who have no access to public funds in the constituency of Halifax differ, at present, depending on whether or not the woman concerned has children.

If she has, the services available to her and her children are coordinated under a protocol set up by the Calderdale Domestic Violence Forum in partnership with Calderdale council; Calderdale Women's Refuge and Calderdale Asian Women's Refuge—both of which are owned by Stonham Housing; Calderdale Women's Centre; Nashayman Housing Association and West Yorkshire police.

Under this protocol women and children with no safe alternative accommodation are referred to either the Calderdale Women's Refuge or Calderdale Asian Women's Refuge. Funding is supplied by Calderdale council and their Supporting People Team. Every effort is made to keep children in education and to rebuild the family's life outside the refuge. Legal advice is also given on the completion of applications of leave to remain in the UK.

Calderdale Domestic Violence Forum are now working to develop this protocol further so that support is in place for women without children, including pregnant women, who have no recourse to public funds. The Forum aim to have the full protocol in place by December 2008, with funding identified to assist single women as well as those with children.

JUSTICE

Approved Premises: Planning Permission

Mr. Pickles: To ask the Secretary of State for Justice pursuant to the answer to the hon. Member for Welwyn, Hatfield (Grant Shapps) of 9 July 2008, *Official Report*, columns 1626-27W, on approved premises: planning applications, how many planning applications his Department and its agencies have submitted in the last 24 months in relation to converting residential premises into use as bail hostels; and in what local authority areas. [221285]

Mr. Hanson: None.

Bail

Nick Herbert: To ask the Secretary of State for Justice what the average fine for failure to surrender to bail was in the last 12 months. [220267]

Mr. Straw: The following shows the average fine amount for those convicted of failing to surrender for bail in 2006.

2006

Number of persons—12,909

Average fine amount—£61.07

The proportion of those given various disposals for "failing to surrender to bail" at all courts are as follows, as well as guidance regarding the factors to be taken into account when sentencing for this offence:

Result	Percentage	Result	Percentage
Absolute discharge	2.3	Suspended sentence	1.3
Conditional discharge	6.3	Immediate custody	11.3
Fine	47.6	Otherwise dealt with	18.2
Community sentence	13.1	Total	100.0

Based on a first offence of deliberately failing to surrender to custody, giving no thought to the consequences

Principal features	Starting point	Aggravating factors	Mitigating factors
Substantial harm	Custodial sentence commensurate with degree of harm	length of time absconded	caring responsibilities
trial adjourned		previous relevant* convictions	genuine mistake
delay likely to impact on quality of evidence presented		deliberate attempt to seriously undermine the course of justice	early voluntary surrender
likely distress to victims and witnesses			
confidence in administration of justice undermined			
Significant harm	Custody threshold passed	length of time absconded	caring responsibilities
significant delay to administration of justice, including sentence		previous relevant* convictions	genuine mistake
delay to other cases		deliberate attempt to seriously undermine the course of justice	early voluntary surrender
repeated breach of court orders			
Negligible harm	Community order e.g. curfew, disqualification from driving	previous relevant* convictions	caring responsibilities
short delay		deliberate attempt to seriously undermine the course of justice	genuine mistake
wasted resources e.g. court time, prosecution time and public funds			early voluntary surrender

From the Sentencing Guidelines Council consultation on bail offences 2004.

Bail Accommodation and Support Scheme

Nick Herbert: To ask the Secretary of State for Justice how many *(a)* defendants and *(b)* offenders have been placed in ClearSprings accommodation since the start of the Bail Accommodation and Support Scheme. [220273]

Mr. Straw: Up to 16 July, 827 defendants on bail and 639 prisoners released from prison on Home Detention Curfew had been placed in the Bail Accommodation and Support Service. Of these 776 defendants and 621 offenders were provided with housing.

Compensation: Vioxx

Mr. Cox: To ask the Secretary of State for Justice (1) if he will ask the Legal Services Commission to re-examine the case for granting legal aid for actions involving damages to health caused by taking the drug Vioxx; [219715]

(2) what steps he is taking to help those whose health has been damaged by the drug Vioxx to bring pressure on Merck and Co to settle appropriate compensation claims. [220368]

Maria Eagle: Decisions about legal funding in civil cases are entirely a matter for the Legal Services Commission (LSC), which is independent of the Government. It would be inappropriate for any Minister to intervene in, or comment on, decisions made about the grant of funding in an individual case. It is important that these decision are free from political and Government influence.

The LSC refused an application to pursue a multi-party action (MPA) against the manufacturers of Vioxx in 2005, and a subsequent appeal was dismissed. At that appeal the applicants' solicitors were invited to submit further information to have their appeal reconsidered, but they chose not to do this. No further application for an MPA associated with Vioxx has since been received. However, if new evidence has come to light, the individuals concerned are welcome to submit a new application for funding to the LSC via their solicitors.

Criminal Records

Chris Huhne: To ask the Secretary of State for Justice what proportion of *(a)* black, *(b)* white and *(c)* Asian men have a criminal record, broken down by age. [221504]

Mr. Straw: The information requested is not available.

Figures on the proportions of the population with a criminal history in England and Wales can be found in 'Criminal careers of those born between 1953 and 1978' at:

www.homeoffice.gov.uk/rds/pdfs/hosb401.pdf

However, this publication does not provide figures for different ethnic groups as the court data from which these figures are derived do not include complete information on the ethnicity of offenders.

Custody: Social Workers

Harry Cohen: To ask the Secretary of State for Justice what the ratio of children's social workers practising in the penal establishment to children held in such custody was *(a)* overall and *(b)* in every establishment where children are kept. [220906]

Mr. Hanson: Information supplied by the Youth Justice Board indicates that the overall ratio of social workers to places in young offender institutions for under 18-year-olds is 1:164. The following table, also based on Youth Justice Board data, shows the ratio of social worker posts to places in each young offender institution in the secure estate for children and young people. To a large extent, the varying ratios reflect the differing sizes of establishments. Steps are being taken to fill five posts that are currently vacant.

YOI	*Ratio of social workers to trainees*
Ashfield	1:200
Brinsford	1:112
Castington	1:168
Cookham Wood	1:157
Downview	0:16
Eastwood Park	0:16
Feltham	1:120
Foston Hall	0:16
Hindley	1:96
Huntercombe	1:180
Lancaster Farms	1:120
New Hall	1:26
Pare	1:64
Stoke Heath	1:202
Warren Hill	1:222
Werrington	1:160
Wetherby	1:204
Overall ratio	1:164

Departmental Alcoholic Drinks

David Simpson: To ask the Secretary of State for Justice what measures are in place in his Department to monitor expenditure on alcohol for hospitality purposes. [219595]

Maria Eagle: The Department records in its accounting system the total of spending on hospitality.

There is no departmental requirement to separately monitor expenditure on alcohol for hospitality purposes and therefore no mechanism for this information to be recorded.

All expenditure, including that on hospitality, is incurred in accordance with the principles of Managing Public Money and the Treasury handbook on Regularity and Propriety.

This is supplemented by an internal hospitality policy that applies to all staff which confirms that no alcohol is to be provided as part of in-house hospitality (e.g. conferences and away days).

David Simpson: To ask the Secretary of State for Justice what purchasing process is used by his Department for the procurement of alcohol for hospitality purposes. [219945]

Maria Eagle: Where alcohol is provided for external hospitality purposes this would be met through either contracted catering providers or local purchasing arrangements.

My Department has an internal hospitality policy that applies to all staff which confirms that no alcohol is to be provided as part of in-house hospitality (e.g. conferences and away days).

Departmental Data Protection

Mrs. Laing: To ask the Secretary of State for Justice (1) what steps he is taking to prevent future losses of sensitive data by his Department; [220408]

(2) what steps his Department is taking to implement the new set of mandatory standards for Government Departments as outlined by the Cabinet Office's Data handling procedures in government review; [220409]

(3) how much has been allocated within his Department to ensure compliance with the new set of minimum mandatory standards, set out in the Cabinet Office's Data handling in government review; [221235]

(4) how many individuals his Department holds sensitive data on. [221393]

Mr. Wills: The Ministry of Justice is determined to ensure that all personal information is managed in accordance with the Cabinet Office's Final Report on Data Handling Procedures in Government. The Ministry has set up a dedicated Information Assurance Programme to oversee implementation of the new set of minimum mandatory standards contained in the report. The Ministry expects to spend in the region of £630,000 to cover the costs of managing the programme. Any new development costs will be met from within existing Business Group budgets through re-prioritisation of expenditure.

The Ministry does not hold a central register of the total number of records it holds containing sensitive data. Such information may be obtained only at disproportionate cost. Each Business Group within the Ministry is required to manage its information in accordance with the Data Protection Act 1998 and the Government's Manual of Protective Security.

Departmental Freedom of Information

Mrs. Laing: To ask the Secretary of State for Justice (1) how many freedom of information requests his Department resolved within *(a)* 20 days, *(b)* 40 and *(c)* 60 working days in the last 12 months; [220466]

(2) how many freedom of information requests answered by his Department in the last 12 months cited an exemption in the Freedom of Information Act 2000 as a reason not to provide all the requested information. [220472]

Mr. Wills: In the 12 months from April 2007 to March 2008 a total of 1,803 non-routine requests were received by the Ministry of Justice. Of these, 67 per cent. were answered within 20 days, in a further 17 per cent. of cases the 20 day time limit was extended for consideration of the public interest in releasing the information requested. Statistics on the number of requests not resolved within the 20 day time limit are not collected in the form requested.

The number of requests received by the Ministry of Justice during this period where the requested information was withheld, either in full or in part, under the Freedom of Information or Environmental Information Regulations was 182.

Mrs. Laing: To ask the Secretary of State for Justice how many unanswered freedom of information requests there have been by his Department in the last 12 months. [1] [220474]

Mr. Wills: Statistics published by the Ministry of Justice in the annual report on freedom of information in central Government for 2007 show that of a total of 1,427 non-routine requests received by the Department. 88 (6 per cent.) had not received a substantive response within the 20 day time limit. The annual report can be found on the Ministry of Justice website at

http://www.justice.gov.uk/publications/freedomofinformationquarterly.htm.

Mrs. Laing: To ask the Secretary of State for Justice what the cost has been of dealing with freedom of information requests to his Department in the last 12 months. [220477]

Mr. Wills: The Ministry of Justice does not calculate the cost of dealing with each freedom of information request and so the total cost is not available.

Departmental Marketing

Pete Wishart: To ask the Secretary of State for Justice what the cost was of *(a)* internet and website design and hosting, *(b)* print media design and *(c)* broadcast media of each of his Department's public information campaigns since 1997. [214719]

Mr. Wills: Since my Department was created in May 2007, the Ministry of Justice has spent the following on public information campaigns.

Ministry of Justice

£

		(a) internet and website design and hosting	*(b) print media design*	*(c) Broadcast media*
Her Majesty's Courts Service				
2005-06	Operation Payback—to persuade fine defaulters to pay up	Nil	Nil	[1]94,000
National Offender Management Service				
2007-08	Community Sentencing campaign—to increase confidence in the effectiveness of criminal justice	Nil	3,500	Nil
Office for Criminal Justice Reform				
2004-08	Inside Justice Week campaign—to make CJS more accessible through a themed week of public and media events	[2]48,000	20,600	Nil

[1] Radio
[2] 2006

Since the Department for Constitutional Affairs (DCA) was created in April 2003, the Department spent the following on public information campaigns.

£

		(a) internet and website design and hosting	*(b) print media design*	*(c) Broadcast media*
DCA HQ				
2006-07	Domestic Violence campaign—to publicise remedies available to victims of domestic violence	Nil	485	Nil
2005-06	Voter Registration campaign (18-24)—to encourage young people to register to vote	3,000	12,000	[1]62,000
	Magistrates Awareness campaign—to publicise the role of magistrates within the criminal and civil justice system	[2]—	19,080	[1]107,000

1. *[Official Report, 10 September 2008, Vol. 479, c. 12MC.]*

£

		(a) internet and website design and hosting	(b) print media design	(c) Broadcast media
2002-05	Freedom of Information—to raise awareness of the Freedom of Information Act.	[3]—	[3]—	[3]—
The Court Service				
2004-05	Operation Payback	Nil	Nil	[1]95,000
2003-04	Operation Payback	Nil	Nil	[1]79,000
Office of the Public Guardian				
2004-05	Powers of attorney campaign—to raise awareness of powers of attorney	Nil	2,512	Nil

[1] Radio
[2] Costs for hosting and design cannot be separated out
[3] A total of £387,000 was spent during the three years but available records do not show how this was broken down into broadcast media, print media design or website design and hosting

DCA's predecessor, Lord Chancellor's Department (LCD) launched the Community Legal Service in 2000 to inform people where to go for civil legal advice, help and representation. A total of £1,347,000 was spent on advertising but a separate figure for broadcast media cannot be identified. Further details regarding spend on this campaign are not available.

Departmental Public Participation

Mrs. Laing: To ask the Secretary of State for Justice (1) what citizens' juries are planned in the next six months; [220413]

(2) on what policy areas citizens' juries are being held in the next six months. [220489]

Mr. Wills: The Ministry of Justice has recently published a framework for greater citizen engagement which includes proposals to make greater use of citizens' juries and on which we are currently seeking views. However, the Ministry of Justice has no citizens' juries currently scheduled to take place over the next six months.

Mrs. Laing: To ask the Secretary of State for Justice what the cost of citizens' juries held by his Department in the last 12 months was. [220483]

Mr. Wills: My Department has not held any citizens' juries over the last 12 months and has therefore incurred no costs.

Mrs. Laing: To ask the Secretary of State for Justice how many people have attended a *(a)* citizens' jury and *(b)* citizens' summit sponsored by his Department in the last 12 months. [220486]

Mr. Wills: The Ministry of Justice has not sponsored any citizens' juries or citizens' summits over the last 12 months. We have begun to engage the public in other ways, including through The 'Governance of Britain' website and regional events. We have also produced a discussion document, 'A national Framework for Greater Citizen Engagement', which sets out the circumstances in which citizens' juries and summits should be held and invites views on these proposals.

Mrs. Laing: To ask the Secretary of State for Justice what the development and running costs of his Department's digital dialogue programme are on promoting interaction between Government and the wider populace via ICT. [220487]

Mr. Wills: Since December 2005, the Digital Dialogues programme has encouraged Government Departments to explore the use of online technologies to engage the public in the development of policy. The programme cost £80,435 in 2006-07 and £54,000 in 2007-08. Digital Dialogues was designed to run in three phases. At the end of each phase, a report is produced analysing case studies and providing up-to-date good practice guidance. We expect the report from the third stage to be published by the end of summer 2008. More information is available at:

http://www.digitaldialogues.org.uk

I am currently considering whether to commission a new phase of Digital Dialogues.

Mrs. Laing: To ask the Secretary of State for Justice how much funding he has allocated to citizens' juries planned to be held in the next six months. [220491]

Mr. Wills: The Ministry of Justice is not scheduled to hold any citizens' juries in the next six months. We are currently considering the budgeting and procurement of the citizens' summit to consider issues around election day and for the development of a statement of values.

Domestic Violence

Mrs. May: To ask the Secretary of State for Justice (1) how many programmes which work with the perpetrators of domestic violence are in operation in the criminal justice system; how many men have taken part in such programmes in each of the last 10 years; how many men are on waiting lists for such programmes; and what work has been done to develop national standards for perpetrator programmes outside the criminal justice system; [220399]

(2) how many prisoners have completed the Healthy Relationships programme; how many prisons operate the programme; and what assessment he has made of the effectiveness of the programme. [220401]

Mr. Straw: There are three programmes which have been accredited by the Correctional Services Accreditation Panel specifically for use with perpetrators of domestic violence. The Community Domestic Violence Programme (CDVP) and the Integrated Domestic Abuse Programme (IDAP) are used in the community, and the Healthy Relationships Programme (HRP) in prison. Other programmes have also been accredited by the panel that may be appropriate depending on particular risks and needs.

The following table sets out the number of new community orders or licences with a requirement to attend an accredited domestic violence programme, the number of offenders who have commenced a programme in the community or completed one in prison since the programmes were introduced.

	New orders or licences with a requirement to attend a domestic violence programme[1]	*CDVP/IDAP commencements*[1]	*HRP completions by prisoners*
2003-04	—	—	28
2004-05	—	—	30
2005-06	3,425	2,084	57
2006-07	6,200	3,635	60
2007-08	6,479	4,313	82
Total	16,104	10,032	257

[1] The data are based on information provided from probation areas and includes those who specifically receive a domestic violence programme, but not those who were convicted of a domestic violence offence who were sentenced to undertake another intervention.

The numbers awaiting to start a programme on a given day during the year will vary depending on the sentences received, the resources available in the area concerned, matching demand, the individual's circumstances e.g. further court appearance, their motivation, other domestic factors, and possibly an assessment as to whether the programme will meet their risks and needs. There can also be a lead in time while offenders prepare for the courses.

Offenders waiting for a place on a Domestic Violence programme are under the supervision of their offender manager from the day of sentence. The offender manager will monitor the risk posed by the offender and actively manage it.

The Home Office has funded a project to ensure perpetrator programmes delivered outside the criminal justice system will also be subject to agreed national standards.

The Healthy Relationships Programme is now delivered in six establishments. Garth prison has just started delivering the programme. There is an ongoing assessment of prisoners' participation in the programme. As the numbers completing the programme increase further, analysis will be undertaken.

A process study has been commissioned to look at the delivery of the Healthy Relationships Programme and the Community Domestic Violence and Integrated Domestic Abuse Programmes which will include an examination of the data collected and interviews with staff and programme participants.

Drugs: Misuse

Mr. Harper: To ask the Secretary of State for Justice how many convictions for ketamine *(a)* use and *(b)* dealing there have been (i) in Forest of Dean constituency, (ii) in Gloucestershire and (iii) nationally in the last three years. [220307]

Maria Eagle: The number of defendants found guilty at all courts for offences relating to supply of or possession with intent to supply ketamine in Gloucestershire police force area and England and Wales for the years 2004 to 2006 can be viewed in the following table.

There is no offence under the Misuse of Drugs Act 1971 for the use of ketamine. It is not possible to identify defendants in the Forest of Dean, convicted for dealing in ketamine as location of offence information is not collected centrally as part of court data.

These data are on the principal offence basis. The figures given in the table on court proceedings relate to persons for whom these offences were the principal offence for which they were dealt with. When a defendant has been found guilty of two or more offences, the offence selected is the one for which the heaviest penalty is imposed. Where the same disposal is imposed for two or more offences, the offence selected is the offence for which the statutory maximum penalty is the most severe.

Court proceedings data for 2007 will be available in the autumn of 2008.

Number of defendants found guilty at magistrates' courts for offences relating to supply of or possession with intent to supply ketamine in Gloucestershire police force area and England and Wales for the years 2004 to 2006[1, 2, 3]

	Gloucestershire police force area	*England and Wales*
2004	—	—
2005	—	—
2006	—	4

1 These data are on the principal offence basis.
2 Includes the following statutes and corresponding offence description:
Misuse of Drugs Act 1971 S.4(2)(a), 4(2)(b), 4(3)(c)
Supply Ketamine—class C controlled drug
Offer to supply Ketamine—class C controlled drug
Being concerned in the supply of Ketamine—class C controlled drug
Misuse of Drugs Act 1971 S.5(3)
Possess Ketamine with intent to supply - class C controlled drug
3 Every effort is made to ensure that the figures presented are accurate and complete. However, it is important to note that these data have been extracted from large administrative data systems generated by the courts, and police forces. As a consequence, care should be taken to ensure data collection processes and their inevitable limitations are taken into account when those data are used.

CJEAU—Office for Criminal Justice Reform—Ministry of Justice.

Electoral Commission: Public Appointments

Mrs. Laing: To ask the Secretary of State for Justice whether he plans to carry out a consultation on the proposal to appoint electoral commissioners who have recent party political experience. [220475]

Bridget Prentice: The Government White Paper, "Party finance and expenditure in the United Kingdom" (CM7329), committed the Government to implement the Committee on Standards in Public Life's recommendation to allow the appointment of a minority of Commissioners with recent experience of political

life. The Committee's report took into account research and evidence from interested parties, including the Electoral Commission themselves.

Sir Hayden Phillips' "Review of the Funding of Political Parties" and the Constitutional Affairs Select Committee also endorsed this recommendation, which the Government intend to implement through the Political Parties and Elections Bill which was introduced to Parliament on 17 July. The passage of the Bill through Parliament will present a further opportunity for Members to consider this proposal.

Mrs. Laing: To ask the Secretary of State for Justice what plans he has to appoint electoral commissioners with recent party political experience. [220478]

Bridget Prentice: The White Paper "Party finance and expenditure in the United Kingdom" (CM7329) committed to legislating to implement the Committee on Standards in Public Life's recommendation to allow the appointment of a minority of Commissioners with recent experience of political life. The Political Parties and Elections Bill, introduced on 17 July, includes a measure to give effect to this commitment.

Fines: Surcharges

Mr. Burrowes: To ask the Secretary of State for Justice to how many *(a)* community and *(b)* custodial sentences a victim's surcharge was applied in 2006-07. [221686]

Maria Eagle: None. Powers to levy a surcharge on all criminal sentences and on certain fixed penalty notices were provided in the Domestic Violence, Crime and Victims Act 2004, the money to be ring-fenced to fund non-financial support services for victims and witnesses. As of 1 April 2007, the victims surcharge has been levied on sentences which include a fine, at a fixed rate of £15. We intend to extend its application to other disposals when that becomes feasible.

Fish Supplies

Mr. Peter Ainsworth: To ask the Secretary of State for Justice how much fish was procured by his Department and at what cost in each of the last five years, broken down by species; and what amount and value of such fish met the Marine Stewardship Council standard in each such year, broken down by species. [217900]

Maria Eagle: As the only procurer of food within the Ministry of Justice estate, the only data available are from Her Majesty's Prison Service/National Offender Management Service (NOMS). This is shown in the following tables.

Price and spend data are commercially in confidence and so will not be released.

Fish is procured by NOMS supply chain from a variety of sources and figures relating to Marine Stewardship Council Standard are based on available data and cannot be guaranteed.

Catering services to meet other parts of the Ministry of Justice requirements are contracted out and provided by commercial suppliers. Such data are not available centrally and could be obtained only at disproportionate cost.

HMPS/NOMS procurement of fish by volume and varieties

	Volume bought (kg)				
Fish species	*2007*	*2006*	*2005*	*2004*	*2003*
Cod	5,630	12,797	8,543	12,542	14,072

[1] Estimate

Gambling: Young People

Mr. Don Foster: To ask the Secretary of State for Justice how many people were *(a)* prosecuted, *(b)* fined and *(c)* cautioned for offences related to underage gambling in each of the last 10 years. [219684]

Maria Eagle: Information held by the Ministry of Justice on prosecutions, convictions, defendants sentenced to a fine and offenders cautioned by the police for offences related to under-age gambling between the years of 1997 and 2006 (latest available) are provided in the following table.

The figures provided relate to persons for whom the offence was the principal offence for which they were dealt with. When a defendant has been found guilty of two or more offences, the offence selected is the one for which the heaviest penalty is imposed. Where the same disposal is imposed for two or more offences, the offence selected is the offence for which the statutory maximum penalty is the most severe.

Every effort is made to ensure that the figures presented are accurate and complete. However, it is important to note that these data have been extracted from large administrative data systems generated by the courts. As a consequence, care should be taken to ensure data collection processes and their inevitable limitations are taken into account when those data are used.

Information for 2007 will be available in the autumn of 2008.

Number of defendants proceeded against at magistrates courts, found guilty and sentenced to a fine at all courts and offenders cautioned by the police for offences related to under-age gambling[1], England and Wales, 1997 to 2006[2, 3]

	Proceeded against	*Found guilty*	*Fined*	*Cautioned*
1997	—	—	—	—
1998	—	—	—	2
1999	—	—	—	1
2000	1	—	—	3
2001	1	1	1	—
2002	—	—	—	—
2003	—	—	—	—
2004	—	—	—	—
2005	—	—	—	—
2006	—	—	—	—

[1] Includes offences of under-age gambling, allowing under-age gambling and illegal participation in lotteries by persons aged under 18 under the Gaming Act 1968, the Betting, Gaming and Lotteries Act 1963 and the Gambling Act 2005.

[2] These data are on the principal offence basis.

[3] Every effort is made to ensure that the figures presented are accurate and complete. However, it is important to note that these data have been extracted from large administrative data systems generated by the courts and police forces. As a consequence, care should be taken to ensure data collection processes and their inevitable limitations are taken into account when those data are used.

Google: Data Protection

Bob Russell: To ask the Secretary of State for Justice if he will assess the likely implications for individuals' right to privacy of the proposal by Google to publish photographs of UK addresses on its Streetview website. [220297]

Mr. Wills: The ICO have been in discussions with Google over Street view and recognises that privacy safeguards have been put in place. The ICO will continue to monitor developments and work with Google as necessary.

The Information Commissioner's Office (ICO) is an independent body created by statute. Its responsibilities include compliance with the Data Protection Act 1998 and the Privacy and Electronic Communications Regulations 2003.

Human Rights

Mr. Dismore: To ask the Secretary of State for Justice what training has been provided to civil servants on *(a)* human rights and *(b)* the Convention on the Rights of the Child in each of the last five years. [220216]

Mr. Wills: Responsibility for training of civil servants lies with individual Departments. Since 2000, the Ministry of Justice, and before it the Department of Constitutional Affairs and the Lord Chancellor's Department, have provided guidance on human rights and the Human Rights Act to other Departments to inform the training they give to their officials. "Raising Awareness of Human Rights", an electronic training package for public officials is also available to all civil servants via the website of the National School for Government. There is no specific programme of training for civil servants on the Convention on the Rights of the Child.

Information Commissioner: Secondment

Mr. Dai Davies: To ask the Secretary of State for Justice pursuant to the answer of 14 July 2008, *Official Report*, columns 64-65W, on the Information Commissioner, what safeguards apply to secondees from Government departments to the Information Commissioner's Office to ensure they may not handle appeals relating to their departments. [220533]

Mr. Wills: The Information Commissioner's Office (ICO) is an independent body created by statute. Its responsibilities include handling complaints made under the Data Protection Act 1998, Freedom of Information Act 2000, Privacy and Electronic Communications Regulations 2003 and Environmental Information Regulations 2004.

There is a clear process in place at the ICO for ensuring that individuals seconded to the ICO will not handle complaints from their own Department. A line manager who works for the ICO will allocate freedom of information complaints to the secondees from Government Departments who will be working at the ICO. The line manager will ensure that the secondees do not handle complaints involving their home Department. A permanent member of the ICO's staff will oversee the work of secondees and in conjunction with the ICO policy team will ensure consistency. Secondees will not be authorised to sign decision notices. Only senior established ICO employees can sign notices.

International Law

Mr. Dismore: To ask the Secretary of State for Justice which Ministers have represented the UK in state party examinations by UN treaty monitoring bodies in each of the last five years. [220102]

Mr. Wills: The only occasion in the last five years on which a Minister has represented the United Kingdom at an examination by a UN treaty monitoring body was on 10 July 2008, when my hon. Friend the Parliamentary Under-Secretary for Women and Equality (Barbara Follett) led the UK delegation for the examination by the Committee for the Elimination of all Forms of Discrimination Against Women. On all other occasions the United Kingdom has been represented by a senior official.

Juries: Wales

Hywel Williams: To ask the Secretary of State for Justice when he plans to publish his response to the consultation on bilingual juries in Wales. [211285]

Mr. Straw: The Ministry of Justice will make a statement on bilingual juries shortly.

Magistrates: Ethnic Groups

Keith Vaz: To ask the Secretary of State for Justice how many and what proportion of magistrates in England and Wales were from an ethnic minority background in *(a)* 2007 and *(b)* 1997. [220875]

Mr. Straw: In *(a)* 2007, 2,065 magistrates (6.9 per cent.) out of a total of 29,816 magistrates were from an ethnic minority background at the financial year ending 31 March 2007.

Figures for 1997 are not available.

Magistrates: Females

Keith Vaz: To ask the Secretary of State for Justice how many and what proportion of magistrates in England and Wales were women in *(a)* 2007 and *(b)* 1997. [220876]

Mr. Straw: The information is as follows:

In *(a)* 2007, 14,809 magistrates (49.7 per cent.) out of a total of 29,816 were women at the financial year ending 31 March 2007.

In *(b)* 1997, 14,516 magistrates (47.8 per cent.) out of a total of 30,374 were women at the calendar year ending 31 December 1997.

Mentally Disturbed Offenders

Helen Jones: To ask the Secretary of State for Justice what steps he is taking to ensure that a person subjected to a hospital order is not moved to a hospital near to his or her victims without there being *(a)* consultation with and *(b)* notification to those victims or their families. [220579]

Maria Eagle: We have enhanced the rights of victims to information, where the offender is sentenced by way of a restricted hospital order, in the Domestic Violence, Crime and Victims Act 2004. Those rights will be extended to cases where the offender receives an unrestricted hospital order by amendments in the Mental Health Act 2007, due to be implemented in November.

The statutory rights do not extend explicitly to transfers of offenders between hospitals. However, where the offender is restricted, officials in the National Offender Management Service will usually exercise the Secretary of State's delegated powers to give victims basic information, to reassure them of steps being taken for their protection, and will seek to avoid transfers to hospitals where victims may be adversely affected.

Helen Jones: To ask the Secretary of State for Justice if he will review the rights of victims and their families to be consulted prior to a person who has been convicted of an offence and made subject to a hospital order being moved to another institution. [220581]

Maria Eagle: We have enhanced the rights of victims to information, where the offender is sentenced by way of a restricted hospital order, in the Domestic Violence, Crime and Victims Act 2004. Those rights will be extended to cases where the offender receives an unrestricted hospital order by amendments in the Mental Health Act 2007, due to be implemented in November.

There is no explicit right for victims to be consulted before a detained patient is moved between hospitals. But victim liaison officers will work with victims who wish to be kept informed, and will ensure that they are given information necessary to reassure them about measures taken for their protection.

National Identity

Mrs. Laing: To ask the Secretary of State for Justice (1) what the planned timetable for the development of a British statement of values is; [220411]

(2) what progress has been made in the development of a framework for a public engagement process to develop a British statement of values. [220412]

Mr. Wills: We are currently finalising a process of engagement to inform the debate on the statement of values. This will involve a series of events around the country, a programme of online engagement and a range of discussion pieces. The process will culminate in a citizens' summit—a broadly representative sample of the British people who will be asked to develop the framework for the statement of values and make recommendations on its uses. We expect to make an announcement in the autumn.

Mrs. Laing: To ask the Secretary of State for Justice how much has been spent on consultative exercises and initiatives in relation to the development of a British statement of values, broken down by event. [220488]

Mr. Wills: A series of events to support The Governance of Britain programme, including discussion on national identity and the statement of values, is currently under way. Final costs will be available once the events are complete. We have also undertaken some work with consultants to support development of the engagement process on the statement of values. This has been provided at a cost of £5,000.

Offenders

Lady Hermon: To ask the Secretary of State for Justice in respect of how many defendants remanded in custody on indictable-only matters had proceedings been terminated prior to arraignment or no evidence offered in each of the last five years; and how long on average each such defendant was detained in custody. [220055]

Maria Eagle: In order to answer this question, it will be necessary to undertake a detailed analysis of historic Crown court case data. It will not be possible to complete this work before the start of the summer recess. However, I will write to the hon. Lady with the relevant information as soon as it is available.

Offensive Weapons: Sentencing

Chris Huhne: To ask the Secretary of State for Justice how many people aged *(a)* under 16, *(b)* between 16 and 18 and *(c)* over 18 years were convicted of possession of a knife in each of the last 10 years; what percentage received custodial sentences; and what the average length of a custodial sentence was in each year. [220830]

Mr. Straw: The requested information is contained in the following tables.

Court proceedings data for 2007 will be available in the autumn of 2008.

Number of persons sentenced[1], given immediate custody and average custodial sentence length[2] for possession of a knife or an offensive weapon[3], all courts, England and Wales, 1997 to 2006

OMS Analytical Services

Chris Huhne: To ask the Secretary of State for Justice how many and what percentage of people aged *(a)* under 16, *(b)* between 16 and 18 and *(c)* over 18 years who were convicted of possession of a knife in each of the last 10 years received a fine; and what the (i) average, (ii) smallest and (iii) largest fine in each year was. [220831]

Mr. Straw: The requested information is contained in the following table.

Court proceedings data for 2007 will be available in the autumn of 2008. In 2006, around 11 per cent. received a fine, 47 per cent. community order and 17 per cent. custody.

				Under 16			*Aged 16 to 18*			*Aged 18 and over*		
	Number sentenced	*Number fined*	*Proportion fined (%)*	*Average (£)*	*Smallest (£)*	*Largest (£)*	*Average (£)*	*Smallest (£)*	*Largest (£)*	*Average (£)*	*Smallest (£)*	*Largest (£)*
1997	3,360	1,181	35	45	10	100	85	10	500	109	10	1,000
1998	3,804	1,187	31	38	10	75	97	10	500	110	10	1,500
1999	3,564	1,032	29	28	10	50	83	5	700	114	10	1,000
2000	3,562	996	28	50	10	100	83	10	500	112	10	600
2001	4,364	1,164	27	47	10	200	84	10	600	116	10	3,100
2002	5,326	1,356	25	48	10	150	85	1	500	114	10	1,000
2003	5,399	1,289	24	55	10	150	90	20	250	128	10	2,500
2004	5,908	1,148	19	40	10	100	92	20	300	138	1	1,250
2005	6,002	953	16	37	20	50	93	20	350	138	10	1,500
2006	6,334	691	11	57	5	100	123	10	750	153	20	3,500

The independent Sentencing Guidelines Council's Magistrates Court Sentencing Guidelines for possession of a bladed article (to be implemented on 4 August 2008) states that if the bladed weapon is not used to threaten or cause fear the recommended starting point is a high level community order. If there are mitigating or aggravating circumstances, the guideline suggests a range of a Band C fine (125 to 175 per cent. of weekly income) to 12 weeks custody. Where the weapon was not used to threaten or cause fear but the offence was committed in dangerous circumstances, the suggested starting point is six weeks custody, with a range of a high level community order to referral to the Crown Court. Where the weapon was used to threaten or cause fear and the offence was committed in dangerous circumstances the guideline states that the case should be allocated to the Crown Court.

Offensive Weapons: Yorkshire and the Humber

Miss McIntosh: To ask the Secretary of State for Justice what average sentence was imposed for knife crimes in North Yorkshire in each of the last five years. [219506]

Mr. Straw: Information on the numbers given an immediate custodial sentence and the average custodial sentence length in North Yorkshire for possession of a knife or possession of an offensive weapon (which may include knives) is shown in the following table.

Average length of immediate custodial sentence[1] for possession of a knife or offensive weapon, all courts, North Yorkshire, 2002-06

Number of persons and average length of sentence (months)[2]

Offence description	*Year*	*Immediate custody*	*Average custodial sentence length*
Possession of offensive weapons without lawful authority or reasonable excuse	2002	6	4.1
Having an article with a blade or point in a public place		4	4.0

Average length of immediate custodial sentence[1] for possession of a knife or offensive weapon, all courts, North Yorkshire, 2002-06

Number of persons and average length of sentence (months)[2]

Offence description	Year	Immediate custody	Average custodial sentence length
Possession of offensive weapons without lawful authority or reasonable excuse	2003	9	4.5
Having an article with a blade or point in a public place		3	2.0
Possession of offensive weapons without lawful authority or reasonable excuse	2004	4	4.8
Having an article with a blade or point in a public place		6	3.5
Possession of offensive weapons without lawful authority or reasonable excuse	2005	3	7.5
Having an article with a blade or point in a public place		8	4.8
Possession of offensive weapons without lawful authority or reasonable excuse	2006	4	16.0
Having an article with a blade or point in a public place		9	6.3

[1] Excludes life and indeterminate sentences.
[2] These average values are based on a very small number of cases.
Note:
These figures have been drawn from administrative data systems. Although care is taken when processing and analysing the returns, the detail collected is subject to the inaccuracies inherent in any large scale recording system.
Source:
OMS Analytical Services

The Courts Proceedings Database from which this information is drawn does not identify separately the circumstances of an offence in which a knife was used. These offences are included in other offences of violence against the person (e.g. grievous bodily harm).

Miss McIntosh: To ask the Secretary of State for Justice how many convictions there were for knife crimes in North Yorkshire in each of the last five years. [219507]

Mr. Straw: Information on convictions for knife possession offences covering the years 2002 to 2006 (latest available) is provided in the following table.

There will have been other offences such as grievous or actual bodily harm or violent disorder where knives were used. However, the information held by the Ministry of Justice on court proceedings does not contain information about the circumstances behind each case, beyond the description provided in the statute under which prosecutions are brought.

The figures given in the table on court proceedings relate to persons for whom these offences were the principal offence for which they were dealt with. When a defendant has been found guilty of two or more offences, the offence selected is the one for which the heaviest penalty is imposed. Where the same disposal is imposed for two or more offences, the offence selected is the offence for which the statutory maximum penalty is the most severe.

Number of defendants found guilty at all courts for 'knife possession offences'[1] in North Yorkshire police force area, 2002-06[2,3]

	Found guilty
2002	52
2003	50
2004	69
2005	66
2006	57

[1] Includes the offences of—Possession of a knife or bladed article in a public place and Possession of a knife or bladed article on school premises.
[2] These data are on the principal offence basis.
[3] Every effort is made to ensure that the figures presented are accurate and complete. However, it is important to note that these data have been extracted from large administrative data systems generated by the courts and police forces. As a consequence, care should be taken to ensure data collection processes and their inevitable limitations are taken into account when those data are used.
Source:
Court proceedings database—Criminal Justice Evidence and Analysis Office for Criminal Justice Reform

Official Secrets: Photography

Mr. Grieve: To ask the Secretary of State for Justice how many *(a)* prosecutions and *(b)* convictions there were for the offence of photography contrary to section 1 of the Official Secrets Act 1911 in the latest period for which figures are available. [219424]

Maria Eagle: Information on court proceedings held by the Ministry of Justice for the period 2002 to 2006 (latest available) shows that there was one prosecution and one conviction under section 1 of the Official Secrets Act 1911 in 2002. The information reported to the Ministry of Justice does not include the individual circumstances of offences, therefore it is not possible to identify whether the photography was involved in the offences committed.

The figures relate to persons for whom the offence was the principal offence for which each person was dealt with. When a defendant has been proceeded against for two or more offences, the offence selected is the one for which the heaviest penalty is imposed. Where the same disposal is imposed for two or more offences, the offence selected is the offence for which the statutory maximum penalty is the most severe.

Every effort is made to ensure that the figures presented are accurate and complete. However, it is important to note that these data have been extracted from large administrative data systems generated by the courts. As a consequence, care should be taken to ensure data collection processes and their inevitable limitations are taken into account when those data are used.

Parole Board

Mr. Bellingham: To ask the Secretary of State for Justice what estimate he has made of the number of cases the Parole Board will deal with in each of the next 10 years. [220764]

Mr. Hanson: The Parole Board's caseload projections for the period 2008-09 to 2009-10 are listed in the following table. Longer term projections are the subject of review following the implementation of the Criminal Justice and Immigration Act 2008 which will impact on the number of cases referred to the Parole Board.

Type of case	2008-09	2009-10
Determinate sentence prisoners	4,700	3,350
Indeterminate sentence prisoners	4,050	5,500
Determinate recalls (paper)	13,400	13,300
Determinate recalls (oral)	1,200	[1]1,000
Total	27,400	23,150

[1] Estimated until impact of Criminal Justice and Immigration Act 2008 is known.

Parole Board: Leeds

John Battle: To ask the Secretary of State for Justice how many caseworkers were employed by the Parole Board in *(a)* Leeds West constituency and *(b)* Leeds Metropolitan District to deal with (i) oral and (ii) written hearings in each year since 1997. [220770]

Maria Eagle: I am advised by the Parole Board that they do not employ any caseworkers in Leeds. All caseworkers are based at the board's London office apart from one who is based in Nottingham. Information on the number of caseworkers employed to deal with oral and paper hearings is contained in the following tables.

(i) Number of caseworkers on oral hearings

	Permanent	Temp/Agency
2004-05	23	2
2005-06	27	4
2006-07	29	1
2007-08	29	5
2008-09	24	7

(ii) Number of caseworkers on paper hearings

	Permanent	Temp/Agency
2004-05	16	1
2005-06	13	5
2006-07	11	8
2007-08	15	6
2008-09	13	4

Police Custody

Mr. Ruffley: To ask the Secretary of State for Justice how many prisoners are being held in police cells; at what cost; and how many have been so held in *(a)* England and Wales and *(b)* each police force area in each of the last five years. [219155]

Mr. Straw: Prison population figures are published every Friday. The total prison population for England and Wales on Friday 18 July was 83,610 which included 47 prisoners held in police accommodation under Operation Safeguard. The estimated average cost of a place in a police cell under Operation Safeguard is about £385 per night.

The average number of prisoners held each night under Operation Safeguard in 2006, 2007 and 2008 (January to June) based on end month figures was 23,181 and 93 respectively.

Operation Safeguard was activated between 12 October and 22 December 2006 and again from 16 January 2007 to date. The following table covers these periods up to the night of Thursday/Friday 10-11 July and gives the aggregate total of the number of prisoner nights in which a police cell was used during each year shown. It is not possible to ascertain how many individual prisoners these totals cover.

Aggregate number of prisoner nights in police cells

Police force	2006	2007	2008[1]
Avon and Somerset	0	132	35
Bedfordshire	0	414	82
Cambridgeshire	212	1,262	330
Cheshire	103	4,437	1,153
Cleveland	0	4	0

Thames Valley	433	2,727	594
Warwickshire	93	1,191	535
West Mercia	0	63	0
West Midlands	570	6,959	671
West Yorkshire	45	3,672	740
Wiltshire	0	91	6
Total	4,614	66,711	13,729

[1] To 10-11 July.

Prison Sentences

Mr. Garnier: To ask the Secretary of State for Justice how many prisoners are serving indeterminate sentences for public protection. [220912]

Mr. Hanson: At the end of May 2008 there were 4,350 prisoners in all prison establishments in England and Wales serving indeterminate sentences for public protection.

This figure has been drawn from administrative IT systems, which, as with any large scale recording system, are subject to possible errors with data entry and processing, and so the number has been rounded.

Prisoners Release

Mr. Garnier: To ask the Secretary of State for Justice how many offenders serving indeterminate sentences for public protection are being held beyond the expiry of their tariff. [220800]

Mr. Straw: The database created to support the management of offenders serving indeterminate sentences of imprisonment for public protection indicated on 15 July 2008 that, for those where there is a confirmed recorded tariff date, 794 had tariffs which have expired.

The database is necessarily a large administrative system tracking a changing and moving population and therefore may not be 100 per cent. accurate. It is updated at intervals rather than being a real time record.

Mr. Garnier: To ask the Secretary of State for Justice how many prisoners were released on temporary licence in each of the last 10 years. [220910]

Mr. Hanson: Records are not held of the number of prisoners granted temporary release. The number of temporary release licences issued in each year since 1997 from all prison establishments in England and Wales can be found in the following table:

	Number of temporary release licences issued
1997	227,078
1998	255,886
1999	256,179
2000	256,838
2001	270,122
2002	287,732
2003	328,777
2004	389,548
2005	405,259
2006	400,238

These figures are taken from table 10.6 of Offender Management Caseload Statistics 2006 copies of which can be found in the House of Commons Library. The data above are the total of all individual licences issued. Some prisoners will be granted temporary release on a number of occasions and so will be issued with multiple licences over the course of a year.

Release on temporary licence is the mechanism that enables prisoners to participate in necessary activities, outside of the prison establishment, that directly contribute to their resettlement into the community and their development of a purposeful law abiding life. Prisoners are not granted temporary release unless they meet the eligibility criteria and pass a stringent risk assessment.

These figures have been drawn from administrative IT systems, which, as with any large scale recording system, are subject to possible errors with data entry and processing.

Prisoners Release: Employment

John Battle: To ask the Secretary of State for Justice what schemes are in place in Leeds to assist prisoners in getting employment upon release; and if he will make a statement. [220711]

Maria Eagle: The National Offender Management Service is committed to increasing job opportunities and employment for prisoners on release. There are a currently a number of such schemes in Leeds including services provided by the West Yorkshire Probation Area and Department for Work and Pensions. At HMP Leeds itself a range of schemes are available to help prisoners into work including Jobcentre plus, a job club, a job link—to help retain employment for offenders with short sentences; annual job fairs and a range of vocational qualifications and preparation for work training programmes.

Prisoners: Childbirth

Chris Huhne: To ask the Secretary of State for Justice how many women gave birth to children while serving a custodial sentence in each of the last 10 years, broken down by *(a)* age of the mother and *(b)* prison establishment. [221507]

Maria Eagle: The National Offender Management Service has only routinely kept information centrally on births in custody since April 2005. Figures prior to this date are not available.

The number of women that have given birth to children while serving a custodial sentence since April 2005 are as follows:

April 2005 to March 2006[1]

[1] Total of 49 women gave birth.

Prisoners: HIV Infection

David Howarth: To ask the Secretary of State for Justice what the cost was of conducting the most recent Public Health Laboratory Service survey into HIV and hepatitis rates in prisons. [220457]

Maria Eagle: The last Public Health Laboratory Service study of HIV, hepatitis B and hepatitis C prevalence in prisoners in England and Wales was conducted in 1997 and 1998. The cost to the Home Office at that time is not available.

Prisoners: Restraint Techniques

Chris Huhne: To ask the Secretary of State for Justice (1) how many *(a)* injuries requiring hospital treatment and *(b)* other injuries have been sustained as a result of the use of control and restraint techniques in each of the last five years, broken down by prison establishment; [221505]

(2) how many times control and restraint techniques have been used on adult prisoners in each of the last five years, broken down by prison establishment. [221506]

Mr. Hanson: The information requested could be obtained only at disproportionate cost and is not available centrally.

Prisons: Capacity

Mrs. Riordan: To ask the Secretary of State for Justice what spare capacity was in prisons at the most recently available date; and if he will make a statement. [220014]

Mr. Straw: I have responsibility for prisons in England and Wales. Prisons in Scotland and Northern Ireland are the responsibility of the Scottish Executive and the Secretary of State for Northern Ireland respectively.

Prison population figures are published every Friday. The total prison population for England and Wales on Friday 18 July was 83,610. This included 47 prisoners held in police accommodation under Operation Safeguard. The total useable operational capacity for England and Wales on 18 July was 83,870 including 400 places through Operation Safeguard. Useable operational capacity is the total number of prisoners that the estate can readily be expected to hold. It assumes an operating margin of 2,000 places to ensure prisoners can be managed by sex, risk category, conviction status, individual needs assessments and geographical distribution.

Prison capacity continues to expand as new places are brought into use.

Prisons: Mental Health Services

John Battle: To ask the Secretary of State for Justice which prisons have a specialist mental health facility; and if he will make a statement. [220712]

Maria Eagle: 102 prisons have in-reach teams that provide a range of services to meet the assessed needs of prisoners. PCTs are responsible for commissioning these services. Information about the facilities in which these services are provided is not held centrally. Prisoners who are severely mentally ill are transferred to appropriate hospital accommodation under the Mental Health Act. Treatment under the Mental Health Act cannot take place in prisons.

There is provision for the treatment of Dangerous and Severe Personality Disorder (DSPD) in DSPD high secure units at HMP Frankland, HMP Whitemoor, and HMP Low Newton; and particular emotional or psychological needs in Therapeutic Communities at HMP Blundeston, HMP Dovegate, HMP Gartree, HMP Grendon and HMP Send.

Prisons: Offensive Weapons

Mr. Garnier: To ask the Secretary of State for Justice if he will introduce proposals to amend the target regime affecting the Prison Service to incentivise *(a)* the prevention of knives and offensive weapons entering prison premises and *(b)* the identification and confiscation of any knives and offensive weapons found on prison premises during searches. [219441]

Mr. Straw: Establishments deploy a comprehensive range of robust searching techniques and security measures to detect both weapons being smuggled into prisons and those that may already be concealed in the establishment. Such measures include the rub down and full searching of prisoners, staff and visitors, as appropriate; the use of technical devices, such as metal detectors and x-ray machines; CCTV surveillance and, more recently, use of the bodily orifice security scanner. Routine and intelligence-led searching of living accommodation and communal areas is also widely deployed.

Weapons found within prisons will be seized. A prisoner found in possession of a weapon will be subject to internal disciplinary proceedings and possible prosecution. The conveying of an offensive weapon into or out of a prison, or the passing of a weapon to a prisoner, is a criminal offence which can attract a sentence of up to 10 years and/or an unlimited fine.

Prisons: Overcrowding

Mr. Garnier: To ask the Secretary of State for Justice how many prisoners are in cells intended for *(a)* one and *(b)* two fewer people than are in the cell. [220911]

Mr. Straw: During 2007-08, 19,321 prisoners were doubled in cells certified to hold one person and 1,161 prisoners were held three to a cell certified for two people.

Prisons: Telephone Services

Mrs. Riordan: To ask the Secretary of State for Justice whether he plans to conduct a review of the cost of telephone calls from prisons. [220097]

Mr. Hanson: There are currently no plans to conduct a review of the cost of telephones calls made from prisons. The National Offender Management Service continues to discuss the cost of calls with the providers but they are not contractually obliged to reduce the cost. To do this without their agreement would require a large subsidy from the taxpayer. The current contract is in place until 2011 and the re-tendering project will commence this year. Reasonable call prices for prisoners will form part of the requirements of the new contract. However, we are implementing reductions for some international calls as part of an extension to a contract with a third party supplier.

Prisons: Waste Management

Dr. Kumar: To ask the Secretary of State for Justice what guidance he provides to prisons on reducing waste from the meals they provide. [219845]

Maria Eagle: It is the policy of the National Offender Management Service not to waste food.

Prison Service Order 5000 (Prison Catering Services) provides staff with guidance on food waste including a number of practical measures and management actions necessary to keep waste to a minimum. These include the use of pre-select menus and portion control.

Rape: Leeds

John Battle: To ask the Secretary of State for Justice what proportion of reported rape cases in Leeds resulted in convictions in each of the last 10 years. [220779]

Maria Eagle: The Home Office collects crime statistics on the number of rape offences recorded by the police in the Leeds crime and disorder reduction partnership (CDRP) area. Rape data at CDRP level are only available from 2001-02 and are shown in table 1.

Police recorded crime (notifiable) data and court proceedings data are not directly comparable. Recorded crime data, published on a financial year basis, concentrates on the number of offences and detections, whereas

court proceedings data are published on a calendar year basis and concentrates on defendants.

The number of defendants found guilty at all courts for rape offences in West Yorkshire police force area for the years 1997 to 2006 can be viewed in table 2.

From the court proceedings database held by the Ministry of Justice, it is not possible to identify the location of offences, as the data are not collected at this level of detail. Thus West Yorkshire police force area data have been provided in lieu.

These data are on the principal offence basis. The figures given in the table on court proceedings relate to persons for whom these offences were the principal offence for which they were dealt with. When a defendant has been found guilty of two or more offences, the offence selected is the one for which the heaviest penalty is imposed. Where the same disposal is imposed for two or more offences, the offence selected is the offence for which the statutory maximum penalty is the most severe.

Court proceedings data for 2007 will be available in the autumn of 2008.

Recorded rapes in the Leeds crime and disorder reduction partnership area

Financial year	*Number of offences*
2001-02	178
2002-03	177
2003-04	227
2004-05	181

Recorded Crime Section, Home Office.

Number of defendants found guilty at all courts for rape offences in West Yorkshire police force area, 1997 to 2006[1, 2, 3]

	Found guilty
1997	23
1998	43
1999	41
2000	38
2001	21
2002	15
2003	30
2004	48
2005	48
2006	37

[1] These data are on the principal offence basis.
[2] Includes the following statutes and corresponding offence description:
Sexual Offences Act 1956 S.1
Rape
Sexual Offences Act 2003 S.1
Rape of a female aged under 16.
Sexual Offences Act 2003 S.1
Rape of a female aged 16 or over.
Sexual Offences Act 2003 S.1
Rape of a male aged under 16.
Sexual Offences Act 2003 S.1
Rape of a male aged 16 or over
Sexual Offences Act 2003 S.5
Rape of a female child under 13 by a male
Sexual Offences Act 2003 S.5
Rape of a male child under 13 by a male

[3] Every effort is made to ensure that the figures presented are accurate and complete. However, it is important to note that these data have been extracted from large administrative data systems generated by the courts, and police forces. As a consequence, care should be taken to ensure data collection processes and their inevitable limitations are taken into account when those data are used.

CJEAU—Office for Criminal Justice Reform—Ministry of Justice.

Reoffenders

Lady Hermon: To ask the Secretary of State for Justice how many and what proportion of defendants released early under the end of custody licence scheme have re-offended during their additional early release period. [220051]

Mr. Straw: All defendants released under the end of custody scheme are sentenced offenders.

The available information on numbers of offenders released on ECL and those recalled because of alleged re-offending is published monthly, in the statistical bulletin End of Custody Licence releases and recalls, available from the Library of the House and the Ministry of Justice website at the following address:

www.justice.gov.uk/publications/endofcustodylicence.htm

(The same publication includes details of the eligibility criteria for offenders released under the scheme).

There were 402 individuals alleged to have committed offences during their period of ECL, notified to NOMS Public Protection Unit, for the period 29 June 2007 to 31 May 2008. This represents 1 per cent. of the total number of offenders released under the scheme for the same period, 28,879.

These figures have been drawn from administrative IT systems, which, as with any large-scale recording system, are subject to possible errors with data entry and processing.

Road Traffic Offences

Mr. Amess: To ask the Secretary of State for Justice (1) how many *(a)* males and *(b)* females were convicted of offences in England and Wales under sections (i) 14(3), (ii) 15(2) and (iii) 15(4) of the Road Traffic Act 1998 in (A) 2005 and (B) 2006; [219569]

(2) how many *(a)* males and *(b)* females aged (i) 17 to 24, (ii) 25 to 30, (iii) 31 to 35, (iv) 36 to 40 and (v) over 40 years were (A) prosecuted and (B) convicted of (1) failing to comply with a road sign, (2) offences under sections (x) 14(3), (y) 15(2) and (z) 15(4) of the Road Traffic Act 1998, (3) failing to provide a breath specimen for analysis, (4) failing to stop for a police constable and (5) disobeying a police constable stopping traffic in (aa) Essex Police area and (bb) Southend Police area in (AA) 2005 and (BB) 2006. [219570]

Maria Eagle: Available data for Essex police force area and England and Wales for the offences requested, for 2005 and 2006 are contained in tables which have been placed in the Library. It is not possible to identify convictions in Southend Police area as the data are not collected at this level of detail by the Ministry of Justice.

The figures given in the table on court proceedings relate to persons for whom these offences were the

principal offence for which they were dealt with. When a defendant has been found guilty of two or more offences, the offence selected is the one for which the heaviest penalty is imposed. Where the same disposal is imposed for two or more offences, the offence selected is the offence for which the statutory maximum penalty is the most severe.

Information for 2007 will be available in the autumn of 2008.

Secure Training Centres: Restraint Techniques

Mr. Cox: To ask the Secretary of State for Justice if he will publish the review of restraint in juvenile secure settings. [219702]

Mr. Hanson: I refer the hon. Member to my previous answer to my hon. Friend the Member for Northampton, North (Ms Keeble) on 15 July 2008, *Official Report*, column 367W.

The Government are giving careful consideration to the recommendations of the chairs of the independent review of restraint in juvenile secure settings, Andrew Williamson and Peter Smallridge. We intend to publish the chairs' full report alongside our response to its recommendations by the end of October.

Supreme Court

Hywel Williams: To ask the Secretary of State for Justice what the *(a)* original and *(b)* current expected opening date of the new Supreme Court building is. [220610]

Mr. Straw: The initial planned opening date for the Supreme Court was October 2008. This was reviewed once detailed survey work and planning conditions were finalised. The amount of work required and the quality of refurbishment necessary would not have been possible in that time-frame. It was announced in March 2006 that the Supreme Court would therefore open in October 2009 to ensure there would be no encroachment into judicial hearing time.

The revised schedule of works allows sufficient time to complete a high-quality refurbishment of a historic listed building and deliver a world-class organisation that properly meets the expectations of the public, the Law Lords, the legal profession and court users. The programme is on target to deliver this in October 2009.

Supreme Court: Costs

Mr. Bellingham: To ask the Secretary of State for Justice what his most recent estimate is of the *(a)* capital and *(b)* annual running costs of the Supreme Court. [220768]

Mr. Straw: Following my announcement of 3 July on unforeseen building repair costs, the estimated cost of delivering a Supreme Court for the United Kingdom will be approximately £60 million. The programme is running on time to open the court in October 2009. The establishment of the Supreme Court will see the highest Court of Appeal for the United Kingdom being visibly independent from Parliament. It will be the final court of appeal for all nations of the United Kingdom. We estimate that annual running costs for the Supreme Court will be £12.3 million, based on 2010-11 expected prices.

Written Questions: Government Responses

Mr. Amess: To ask the Secretary of State for Justice, when he plans to answer Question 172523, on the Operation of the Prevention of Corruption Act 1906, tabled on 4th December 2007 by the hon. Member for Southend West; what the reason for the delay in replying is; what steps he has (a) taken and (b) plans to take to answer written Parliamentary Questions within a working week of them being tabled; and if he will make a statement. [222358]

Maria Eagle: The question was transferred to the Solicitor General on 6 December 2007. The Ministry of Justice's Parliamentary Branch wrote to the Honourable Member on that day informing him of the transfer.

Young Offenders

Mr. Burrowes: To ask the Secretary of State for Justice how many offenders there are in *(a)* young offender institutions, *(b)* secure training centres and *(c)* secure children's homes, broken down by age. [221500]

Mr. Hanson: The following table, which contains information provided by the Youth Justice Board, shows the number of sentenced or remanded children and young people held in young offender institutions, secure training centres and secure children's homes, broken down by age, as at 30 June 2008.

	Age					
Establishment type	*12*	*13*	*14*	*15*	*16*	*17*
YOI	0	0	0	295	772	1,543
STC	0	2	68	82	77	30
SCH	4	30	81	58	34	6
Total	4	32	149	435	883	1,579

Young Offenders: Custodial Treatment

Mr. Kidney: To ask the Secretary of State for Justice what proportion of young offenders who breached the terms of a community order received a custodial sentence as a result in the last three years. [219440]

Mr. Hanson: This question cannot be answered at this time due to issues of data quality regarding the breach data on the court proceedings database. Data quality checks have shown large variations in the provisions of breach data from the police forces and the courts, rendering the data unsuitable for publication, as such, it was withdrawn from publication in 2004. The sentencing statistics team will not publish statistics on breaches until significant improvements have been made to the submission of data to the Ministry of Justice. At present data quality work is underway to look at improving the data to a standard fit for publication.

Mrs. Moon: To ask the Secretary of State for Justice what estimate has been made of the average length of time taken to transfer money between young offender institutions when young people are transferred; and if he will make a statement. [220587]

Mr. Hanson: While no specific assessment has been made of the length of time taken to transfer money between young offender institutions, the timings are dependant on where the offender is transferring to and from. For example, if the money being transferred is between public prisons, then it is processed as an electronic transfer and will be actioned overnight. When a transfer takes place to other types of establishments such as contracted-out prisons or immigration detention centres (for those over 18), the money would be transferred by cheque which would be subject to the normal cheque clearing process operated by the banking system.

Young Offenders: Housing

Harry Cohen: To ask the Secretary of State for Justice if he will make it his policy that every child leaving custody receives effective support, including the provision of appropriate housing. [220905]

Mr. Hanson: We are clear that all young people leaving custody should receive the support they need to stop them from re-offending. The Youth Crime Action Plan, which we published on 15 July, sets out proposals to develop a comprehensive package of support for children leaving custody which we will develop through consultation. This includes ensuring that young people have access to appropriate education, health and housing.

We will also finance an expansion of the Youth Justice Board's resettlement and aftercare provision which has already been rolled out in 59 Youth Offending Teams. This programme provides intensive support for over 2,000 young people in the youth justice system. This includes access to substance misuse and mental health treatment programmes and planned activities to address offending behaviour. It also provides practical support including assistance to access accommodation.

Young Offenders: Legal Aid

Harry Cohen: To ask the Secretary of State for Justice if he will make it his policy for all children in contact with the criminal justice system to be entitled to free legal advice and representation in relation to such contact. [220904]

Maria Eagle: Legal aid is widely available to children and young people when they come into contact with the criminal justice system. All those interviewed by police must be informed of their right to non-means-tested legal advice. A young person under 17 must also have an 'appropriate adult' with them when interviewed by the police; this could be a parent, guardian, social or health care professional.

If a youth appears before court, legal representation is provided free of charge subject to the youth passing the 'Interests of Justice' test. If a youth does not have their own solicitor, the court duty solicitor can provide free advice and, if appropriate, representation.

While in the vast majority of cases, youths are properly represented at court, the Government are currently exploring how youth defendants can be made better aware of their rights to advice and representation. It is also carrying out additional research to assess whether there are any vulnerable youths going without representation, and if so, to identify appropriate remedies.

Young Offenders: Local Authorities

Mr. Kidney: To ask the Secretary of State for Justice if he will discuss with local government representatives proposals to transfer child detention budgets to local authorities. [219438]

Beverley Hughes: I have been asked to reply.

There are no current proposals to transfer child detention budgets to local authorities. The youth crime action plan sets out proposals to make local authorities responsible for the full cost of court-ordered secure remand. They are already responsible for the placement and for one third of the costs where the secure estate is used and the full cost where alternative provision is used. We are consulting on this proposal and will have further discussions with local government representatives as part of that process and prior to any final decisions.

Young Offenders: Rehabilitation

Mr. Kidney: To ask the Secretary of State for Justice what steps his Department is taking to involve the families of young offenders in their rehabilitation following a period of detention. [219439]

Beverley Hughes: I have been asked to reply.

The youth crime action plan sets out the Government's intention to develop a comprehensive package of support for children leaving custody. This would include conducting on ongoing assessments of a young person's risk of re-offending and their underlying needs—including family factors—to shape the provision they receive.

Through the family pathfinders work we will also explore if a family needs assessment framework can be developed to include regular reviews with the family (including young people where appropriate) and other agencies.

We also signalled our intention to ensure that all assessments of children in custody consider the family need and the support required to enable the child to return to their family on release.

Youth Citizenship Commission: Operating Costs

Mrs. Laing: To ask the Secretary of State for Justice what the annual running costs were of the Youth Citizenship Commission in the latest period for which figures are available. [220480]

Bridget Prentice: The Youth Citizenship Commission is scheduled to report in spring 2009. The staff costs, and travel and subsistence costs for staff and commissioners, are expected to total up to £135,500 for the life of the Commission.

In addition, the commission will incur the costs of funding research; engagement events around the UK; and a website; and will have publishing costs. We have not yet finalised the contracts relating to these elements, so I cannot provide precise figures at this stage. I will however write to you with more information in the autumn once contracts are in place.

DUCHY OF LANCASTER

10 Downing Street: Manpower

Mr. Maude: To ask the Chancellor of the Duchy of Lancaster pursuant to the answer of 19 June 2008, *Official Report*, column 1184W, on 10 Downing street: manpower, what the job titles and specifications are of each of the 10 staff in the house management team. [217335]

Mr. Watson: Information about the contractual terms of individual members of staff is personal information between the employer and employee and therefore not disclosed. The cost and number of No. 10 staff are published annually.

Admiralty House

Robert Neill: To ask the Chancellor of the Duchy of Lancaster pursuant to the Answer of 17 December 2007, *Official Report*, column 1079W, on Admiralty House, whether the Deputy Prime Minister's Office provided *(a)* linen and laundry services, *(b)* porters, *(c)* internal plants, *(d)* catering services, *(e)* telephones, *(f)* cable or satellite television and *(g)* internet access, to the right hon. Member for Kingston-upon-Hull (i) at public expense and (ii) billed to the resident in each case. [211865]

Phil Hope: No internal plants or linen and laundry service were provided to the flat. The charge paid by occupying Departments to the Cabinet Office includes the provision of in-hours portering services. Catering services can be provided by the Cabinet Office's facilities management provider on a re-charge basis. The Deputy Prime Minister's Office provided telephone lines, internet access and cable television.

Cancer and Cardiovascular Disease

Mr. Donohoe: To ask the Chancellor of the Duchy of Lancaster (1) how many deaths from cancer in England there were in *(a)* 2005 and *(b)* 2007; [220572]

(2) how many deaths from cardiovascular disease in England there were in *(a)* 2005 and *(b)* 2007. [220573]

Mr. Watson: The information requested falls within the responsibility of the UK Statistics Authority. I have asked the Authority to reply.

Letter from Karen Dunnell, dated 22 July 2008:

As National Statistician, I have been asked to reply to your recent questions asking (1) how many deaths from cancer in England there were in (a) 2005 and (b) 2007; and (2) how many deaths from cardiovascular disease in England there were in (a) 2005 and (b) 2007. (220572, 220573)

The table attached provides the numbers of deaths in England where (1) cancer and (2) cardiovascular disease was the underlying cause of death, in (a) 2005 and (b) 2007.

Table 1: Number of deaths with an underlying cause of (1) cancer and (2) cardiovascular disease[1], England, 2005 and 2007[2]

		Deaths (persons)
Cause of death	*2005*	*2007*
Cancer	126,274	127,759
Cardiovascular disease	171,040	158,604

[1] Cause of death was defined using the International Classification of Diseases, Tenth Revision (ICD-10) codes C00-C97 for cancer, and 100-199 for cardiovascular disease.
[2] Figures are for deaths registered in each calendar year.

Civil Servants: Holiday Leave

Mr. Maude: To ask the Chancellor of the Duchy of Lancaster whether privilege day holidays for civil servants are the same for all Government Departments. [217367]

Mr. Watson: The civil service management Code grants Departments authority to determine their own arrangements for privilege holidays provided the day for the Queen's official birthday is on either the Friday preceding or the Tuesday after the spring bank holiday.

The civil service management code can be found at http://www.civilservice.gov.uk/iam/codes/csmc/index.asp

Civil Servants: Pensions

Harry Cohen: To ask the Chancellor of the Duchy of Lancaster whether the Principal Civil Service Pension Scheme has made investments in the last two years in financial vehicles that bundle debt together. [216275]

Mr. Watson: The Principal Civil Service Pension Scheme makes no investments of any description since it is an unfunded pension scheme.

Death: Darlington

Mr. Milburn: To ask the Chancellor of the Duchy of Lancaster what estimate he has made of *(a)* the overall mortality rate and *(b)* the cigarette smoking-related mortality rate in Darlington constituency in each of the last five years. [219625]

Mr. Watson: The information requested falls within the responsibility of the UK Statistics Authority. I have asked the authority to reply.

Letter from Karen Dunnell, dated 22 July 2008:

As National Statistician, I have been asked to reply to your recent question asking what estimate has been made of (a) the overall mortality rate and (b) the cigarette smoking-related mortality rate in Darlington constituency in each of the last five years. (219625)

The table attached provides the age-standardised mortality rate for Darlington parliamentary constituency, for 2001 to 2005 (the latest year available).

Deaths related to cigarette smoking cannot be directly estimated, as smoking status is not included on the death certificate. However, research published by the then Health Development Agency in 2004 suggested that, in the period 1998-2002, some 17 per cent. of all deaths in England were attributable to smoking.[1]

[1] Twigg L, Moon G, Walker S (2004) 'The smoking epidemic in England'. London; Health Development Agency

Table 1. Age-standardised mortality rate per 100,000 population[1] all-cause mortality, Darlington parliamentary constituency, 2001-05[2,3]

	Rate per 100,000
2001	773
2002	749
2003	734
2004	786
2005	683

[1] Age-standardised mortality rates per 100,000 population, standardised to the European Standard Population. Age-standardised rates are used to allow comparison between populations which may contain different proportions of people of different ages.
[2] Based on boundaries as of 2008.
[3] Figures are for deaths registered in each calendar year.

Departmental Consultants

Mr. Maude: To ask the Chancellor of the Duchy of Lancaster what the average cost per hour to his Department was of a management consultant working in the Cabinet Office in the last 12 months. [217352]

Mr. Watson: The information is not held in the format requested and cannot be obtained without incurring disproportionate costs.

Departmental ICT

Mr. Hoban: To ask the Chancellor of the Duchy of Lancaster what IT contracts his Departments and its agency have entered into in the last two years. [215165]

Mr. Watson: The information is not available centrally in the format requested and could be obtained only at disproportionate costs.

Major IT contracts awarded by the Cabinet Office and Central Office of Information in 2006-07 and 2007-08 include:

Nature of supply	*Supplier*
Cabinet Office	
Secure office system	LogicaCMG UK Limited
IT and telecommunications equipment software, services, application development and training	Fujitsu Services Limited
Management of secure web-based system for public access to Government on-line services	Atos Origin
Secure information system	IBM United Kingdom Limited
Central Office of Information

Departmental Official Hospitality

Mrs. May: To ask the Chancellor of the Duchy of Lancaster (1) how many receptions he has hosted and funded in his capacity as Minister for the Cabinet Office in the last 12 months; which individuals and organisations *(a)* were invited to and *(b)* attended each reception; and what the cost was of each reception; [203839]

(2) pursuant to the answer of 15 May 2008, *Official Report*, column 1682W, on departmental official hospitality, when annual lists providing information relating to official receptions will be published by the Cabinet Office; and whether this information will include the names of the individuals and organisations who *(a)* were invited to and *(b)* attended each reception hosted by the Office of the Leader of the House. [207326]

Edward Miliband: I refer the right hon. Member to my statement of 17 July 2008, *Official Report*, column 52WS.

My right hon. and learned Friend the Leader of the House hosted the traditional annual Leader's Christmas reception in December 2007 to thank Members of Parliament, House of Commons officials and colleagues across Government for their contribution to the work of the Office of the Leader of the House of Commons. The total cost for the reception was £4,287.63.

Departmental Paper

David Simpson: To ask the Chancellor of the Duchy of Lancaster what percentage of paper used *(a)* for photocopying and *(b)* in printed publications by (i) the Cabinet Office and (ii) the Prime Minister's Office was from recycled sources in each of the last two years. [220738]

Phil Hope: The Prime Minister's Office forms an integral part of the Cabinet Office. All paper used for photocopying is 100 per cent. recycled with a post-consumer waste content of 100 per cent. The vast majority of paper supplied for printed publications is 100 per cent. recycled with a post-consumer waste content of 75 per cent.

Departmental Procurement

David Simpson: To ask the Chancellor of the Duchy of Lancaster what his Department's policy is on requesting discounts from its suppliers in return for swift payment of invoices. [220441]

Phil Hope: The Department does not request discounts from suppliers in return for swift payment of invoices.

Departmental Property

Robert Neill: To ask the Chancellor of the Duchy of Lancaster if he will place in the Library a list of the residential properties owned by the Duchy of Lancaster. [211643]

Edward Miliband: Due to the commercially sensitive nature of the information, I am unable to place a list of the properties held by the Duchy of Lancaster in the Library of the House.

The Duchy does not own any assets within the Bromley and Chislehurst constituency.

Departmental Sick Leave

Mr. Hayes: To ask the Chancellor of the Duchy of Lancaster how many days of sick leave were taken by employees of the Prime Minister's Office in each year since 1997. [216701]

Mr. Watson: The Prime Minister's Office is part of the Cabinet Office.

Details of the absence rates for the Cabinet Office for the period 1997 to March 2008 are published on the Cabinet Office Website at:

http://www.cabinetoffice.gov.uk/reports/absence.aspx

The absence statistics for the Cabinet Office are also published as part of the annual civil service absence statistics online for the period 2004 to 31 March 2007 at:

http://www.civilservice.gov.uk/about/statistics/sickness.asp

Copies have been placed in the Libraries of the House.

Departmental Training

Mr. Heald: To ask the Chancellor of the Duchy of Lancaster pursuant to the Answer of 3 July 2008, *Official Report*, column 1093W, how many away days were located outside his Department's premises in each of the last five years. [219489]

Phil Hope: The information requested is not held centrally and therefore can be obtained only at disproportionate cost.

All Cabinet Office expenditure on away days is made in accordance with published departmental guidance on financial procedures and propriety, based on principles set out in "Government Accounting" and other HM Treasury guidance.

Disadvantaged: Leeds

John Battle: To ask the Chancellor of the Duchy of Lancaster what his latest estimate is of the percentage of the population in *(a)* Leeds West constituency and *(b)* Leeds Metropolitan District which is economically inactive. [220781]

Mr. Watson: The information requested falls within the responsibility of the UK Statistics Authority. I have asked the authority to reply.

Letter from Karen Dunnell, dated 22 July 2008:

As National Statistician, I have been asked to reply to your Parliamentary Question asking what the latest estimate is of the percentage of the population in (a) Leeds West constituency and (b) Leeds Metropolitan District which is economically inactive. [220781]

The Office for National Statistics compiles estimates of inactivity for local areas from the Annual Population Survey (APS) following International Labour Organisation definitions.

Table 1 contains estimates of the percentage of persons aged 16 or more who were resident in the Leeds West constituency and the Leeds Metropolitan District and economically inactive for the 12 month period ending December 2007 from the APS. These differ from the published estimates which are for persons of working age (Males age 16-64, females age 16-59), which have also been included in the table.

As this estimate is for a subset of the population in a small geographical area, it is based on a very small sample size, and is therefore subject to a large margin of uncertainty.

Table 1: Percentage of persons economically inactive resident in Leeds West Parliamentary Constituency and Leeds Metropolitan District

Percentage

Year ending December 2007	*Age 16+*	*Working Age[1]*
Leeds West	34	24
Leeds Metropolitan District	35	22

[1] Males age 16-64, Females age 16-59

Mrs. Moon: To ask the Chancellor of the Duchy of Lancaster what the *(a)* highest, *(b)* average and *(c)* lowest percentage of voter registration in local authority areas in England was in the most recent period for which figures are available. [218826]

Mr. Watson: The information requested falls within the responsibility of the UK Statistics Authority. I have asked the authority to reply.

Letter from Karen Dunnell, dated July 2008:

As National Statistician I have been asked to reply to your question asking what the *(a)* highest, *(b)* average and *(c)* lowest percentage of voter registration in local authority areas in England is for the most recent period for which figures are available. (218826)

The closest available approximation to the percentage of voter registration is the number of people who are registered to vote in the local/European elections as a percent of the estimated usually resident population age 18 and over.

The proxy percentages should not be interpreted as the percentage of the eligible population who are registered to vote. They may be an under estimates in some areas because not everyone who is usually resident is entitled to vote, for example foreign citizens from outside of the EU and Commonwealth are not eligible.

Conversely, for other areas rates exceed one hundred per cent as figures for the registered electorate may be inflated. People who have more than one address may register in more than one place (e.g. students may register at parental and term-time addresses) and electoral registration officers vary in how quickly they remove people from the registers after they have moved away from an area or died.

Bearing these caveats in mind the highest, average and lowest percentage of voter registration in local authority areas in England, for 2006, are 101.9%, 96.5% and 68.6% respectively. 2006 is the most recent year that estimates of the usually resident population are available.

Employment: North East

Mr. Milburn: To ask the Chancellor of the Duchy of Lancaster how many *(a)* part-time and *(b)* full-time jobs there were in (i) Darlington constituency, (ii) County Durham and (iii) the north east in each year since 1997. [219626]

Mr. Watson: The information requested falls within the responsibility of the UK Statistics Authority. I have asked the Authority to reply.

Letter from Karen Dunnell, dated 22 July 2008:

As National Statistician I have been asked to reply to your Parliamentary Question on how many (a) part-time and (b) full-time jobs there were in (i) Darlington constituency, (ii) County Durham and (iii) the North East in each year since 1997. (219626).

The Office for National Statistics compiles employment statistics for local areas from the Annual Population Survey (APS) and its predecessor the annual Labour Force Survey (LFS). This is the preferred source for estimates at the detailed level requested although the estimates refer to the number of people in employment rather than the number of jobs.

The attached table provides estimates of the number of people aged 16 and over, in full and part-time employment, resident in Darlington, County Durham and the North East.

As some of these estimates are for a subset of the population in small geographical areas, they are based on small sample sizes, and are therefore subject to large margins of uncertainty.

Food: Prices

David Simpson: To ask the Chancellor of the Duchy of Lancaster what the estimated average *(a)* monthly and *(b)* annual food bills for families in (i) England and Wales and (ii) in each region were in each of the last three years. [220593]

Mr. Watson: The information requested falls within the responsibility of the UK Statistics Authority. I have asked the authority to reply.

Letter from Karen Dunnell, dated 22 July 2008:

As National Statistician, I have been asked to reply to your recent question asking what the estimated average *(a)* monthly and *(b)* annual food bills for families in England and Wales were in each of the last three years (i) in total and (ii) broken down by region (220593).

Estimates of household expenditure appear in the annual ONS publication Family Spending. The following table shows the estimates of household spending on food and non-alcoholic drink for England, English regions and for Wales, as they have appeared in the last three editions of Family Spending. These estimates exclude spending on food and drink in cafes, restaurants, and pubs, as well as take away food and snack food which are all classified as catering services.

The estimates published in Family Spending are based on data collected through the Expenditure and Food Survey (EFS), which is a sample survey, covering approximately 6,000 households in the United Kingdom. Estimates for regions are normally based on data collected over three years, and estimates based on data for the periods 2002-03 to 2004-05, and 2003-04 to 2005-06 have been provided in the following table. Starting with the most recent edition of Family Spending, Family Spending 2007, which published data for 2006, estimates are now published for calendar years, and rather than calculate an average of data from financial and calendar years, regional estimates in Family Spending 2007 were based solely on data collected in 2006.

Household expenditure on food and non-alcoholic drink by region: England and Wales, 2002-03 to 2006[1]

£

	2002-03 to 2004-05	*2003-04 to 2005-06*	*2006*
Expenditure per month[2]			
England	190	190	200

Family spending, ONS

Government Departments: Heating

Dr. Whitehead: To ask the Chancellor of the Duchy of Lancaster what plans he has to adopt a target for the sourcing of heat and cooling supply on the Government estate from combined heat and power generation. [220788]

Mr. Woolas: I have been asked to reply.

The targets for sustainable operations on the Government estate include one on combined heat and power. The target which runs until 2010 is that Departments seek to source at least 15 per cent. of electricity from combined heat and power.

Hospitals: Infectious Diseases

Mrs. Gillan: To ask the Chancellor of the Duchy of Lancaster how many deaths from hospital-acquired infections there were in Wales in each year since 1997, broken down by *(a)* hospital and *(b)* local health board area. [219709]

Mr. Watson: The information requested falls within the responsibility of the UK Statistics Authority. I have asked the authority to reply.

Letter from Karen Dunnell, dated 22 July 2008:

As National Statistician I have been asked to reply to your recent question asking how many deaths from hospital-acquired infections there were in Wales in each year since 1997, broken down by (a) hospital and (b) local health board area. (219709)

Death certificates record the place where a person dies, but not where any infections may have been acquired. It is not possible from the information on a death certificate to know whether an infection was acquired in the hospital or other place where a patient died. Patients are often transferred between hospitals, nursing homes and other establishments and may have acquired infections in a different place from where they died.

The Office for National Statistics (ONS) does not receive information on 'hospital-acquired infections' but special analyses of deaths involving two infections that are often associated with healthcare, MRSA and Clostridium difficile, are undertaken annually by ONS for England and Wales. The most recent figures were published in reports in Health Statistics Quarterly 37 in February of this year. This publication is available in the House of Commons library.

Additionally, a report on deaths involving MRSA and Clostridium difficile by individual communal establishment (including hospitals) where the person died was published for the first time in Health Statistics Quarterly 38 in May this year. Tables that supplement this release can be found on the National Statistics Website.[1,2]

[1] http://www.statistics.gov.uk/downloads/theme_health/C_Diff_establishments_2001_06.xls

[2] http://www.statistics.gov.uk/downloads/theme_health/MRSA_establishments_2001_06.xls

Immigration

Mr. Clappison: To ask the Chancellor of the Duchy of Lancaster how many and what proportion of people migrating to the UK were from *(a)* EU member states and *(b)* other countries since 2004. [221205]

Mr. Watson: The information requested falls within the responsibility of the UK Statistics Authority. I have asked the Authority to reply.

Letter from Karen Dunnell, dated 22 July 2008:

As National Statistician, I have been asked to reply to your question of how many and what proportion of people migrating to the UK were from *(a)* EU member states and *(b)* other countries since 2004. (221205)

Total international migration to the UK between 2004 and 2006 by country of last residence is shown in the following table:

Total international immigration to the UK by country of last residence, 2004 to 2006

	Number (thousand)			Percentage	
	All countries	European Union 25	Other countries	European Union 25	Other countries
2004	586	150	436	26	74
2005	563	182	381	32	68
2006	591	205	386	35	65

Mr. Clappison: To ask the Chancellor of the Duchy of Lancaster for which non-EEA countries there was *(a)* an excess of emigration from the UK over immigration to the UK and *(b)* an excess of immigration to the UK over emigration (i) in 1987 to 1997 and (ii) since 1997; and what the size of the excess was in each case. [221210]

Mr. Watson: The information requested falls within the responsibility of the UK Statistics Authority. I have asked the authority to reply.

Letter from Karen Dunnell, dated 22 July 2008:

As National Statistician, I have been asked to reply to your question for which non-EEA countries there was (a) an excess of emigration from the UK over immigration to the UK and (b) an excess of immigration to the UK over emigration (i) in 1987 to 1997 and (ii) since 1997; and what the size of the excess was in each case. (221210)

Table 1, attached, provides the top three non-EEA countries with net immigration and with net emigration figures for 1987 to 2006. Only the top three are provided to ensure that the estimates are reliable. Data are grouped by year because they are readily available in this format. The figures are based on the International Passenger Survey and care should be taken when interpreting net migration estimates since a small net migration figure may mask large immigration and emigration flows.

Table 1: Migration estimates by non-EEA country of last or next residence, 1987 to 2006—top three countries

United Kingdom (thousand)

	Immigration	Emigration	Net migration
1987-1991

International Passenger Survey

Infant Mortality

Mr. Amess: To ask the Chancellor of the Duchy of Lancaster how many babies *(a)* were stillborn and *(b)* died within one year of birth in each year since 1979. [219714]

Mr. Watson: The information requested falls within the responsibility of the UK Statistics Authority. I have asked the Authority to reply.

Letter from Karen Dunnell, dated 22 July 2008:

As National Statistician, I have been asked to reply to your question asking how many babies (a) were stillborn and (b) died within one year of birth in each year since 1979. (219714)

The number of stillbirths and infant deaths in England and Wales for 1979 to 2006 (the most recent year for which figures are available) can be found in the attached table.

Stillbirths[1] and infant deaths[2], England and Wales, 1979-2006

	Number of stillbirths	*Number of infant deaths*
1979	5,125	8,178
1980	4,773	7,899
1981	4,207	7,021
1982	3,939	6,775
1983	3,631	6,381
1984	3,643	6,037
1985	3,645	6,141
1986	3,549	6,313
1987	3,423	6,272
1988	3,382	6,270
1989	3,236	5,808
1990	3,256	5,564
1991	3,254	5,158
1992	2,944	4,539
1993	3,855	4,242
1994	3,813	4,120
1995	3,600	3,982
1996	3,539	3,959
1997	3,439	3,799
1998	3,417	3,625
1999	3,305	3,621
2000	3,203	3,377
2001	3,159	3,240
2002	3,372	3,127
2003	3,612	3,306
2004	3,686	3,218
2005	3,483	3,259
2006[3]	3,602	3,368

[1] From 1979 to 30 September 1992 stillbirths relate to foetal deaths at or over 28 weeks gestation, and from 1 October 1992 at or over 24 weeks gestation.
[2] Deaths under age one, number of deaths are based on annual occurrences for years 1993-2005 and annual registrations for all other years.
[3] Figures for 2006 are provisional.

Pay

Mr. Jenkins: To ask the Chancellor of the Duchy of Lancaster what the *(a)* mean and *(b)* median wage for (i) men and (ii) women has been in each year since 2003. [220126]

Mr. Watson: The information requested falls within the responsibility of the UK Statistics Authority. I have asked the authority to reply.

Letter from Karen Dunnell, dated 22 July 2008:

As National Statistician, I have been asked to reply to your recent Parliamentary Question asking what the (a) mean and (b) median wage for (i) men and (ii)) women has been in each year since 2003. (220126)

Levels of earnings, including mean and medians, are estimated from the Annual Survey of Hours and Earnings (ASHE), and are provided for employees on adult rates of pay, whose pay for the survey period was not affected by absence. The ASHE, carried out in April each year, is the most comprehensive source of earnings information in the United Kingdom.

ASHE results for each year since 2003 can be obtained on the National Statistics website at:

http://www.statistics.gov.uk/ashe

Smoking: Bexley

Mr. Evennett: To ask the Chancellor of the Duchy of Lancaster what estimate he has made of *(a)* the overall mortality rate and *(b)* the rate of mortality related to cigarette smoking in the London borough of Bexley in each of the last five years. [220394]

Mr. Watson: The information requested falls within the responsibility of the UK Statistics Authority. I have asked the Authority to reply.

Letter from Karen Dunnell, dated 22 July 2008:

As National Statistician, I have been asked to reply to your recent question asking what estimate has been made of (a) the overall mortality rate and (b) the rate of mortality related to cigarette smoking in the London Borough of Bexley in each of the last five years. (220394)

The table attached provides the age-standardised mortality rate for the London borough of Bexley, for 2002 to 2006 (the latest year available).

Deaths related to cigarette smoking cannot be directly estimated, as smoking status is not included on the death certificate. However, research published by the then Health Development Agency in 2004 suggested that, in the period 1998-2002, some 17 per cent of all deaths in England were attributable to smoking[1].

[1] Twigg L, Moon G, Walker S (2004) The smoking epidemic in England. London; Health Development Agency

Table 1. Age-standardised mortality rate per 100,000 population[1] all-cause mortality, London borough of Bexley, 2002-06[2, 3]

	Rate per 100,000
2002	630
2003	628
2004	572
2005	549
2006	553

[1] Age-standardised mortality rates per 100,000 population, standardised to the European Standard Population. Age-standardised rates are used to allow comparison between populations which may contain different proportions of people of different ages.
[2] Based on boundaries as of 2008.
[3] Figures are for deaths registered in each calendar year.

Taxation

David Simpson: To ask the Chancellor of the Duchy of Lancaster (1) what the estimated average cost to families in England and Wales was of *(a)* direct taxation and *(b)* indirect taxation in each of the last three years (i) in total and (ii) broken down by region; [220590]

(2) what the estimated average cost to families in England and Wales was of VAT charges in each of the last three years *(a)* in total and *(b)* broken down by region. [220592]

Mr. Watson: The information requested falls within the responsibility of the UK Statistics Authority. I have asked the Authority to reply.

Letter from Karen Dunnell, dated 22 July 2008:

As National Statistician, I have been asked to reply to your recent questions asking what the estimated average cost to families in England and Wales was of (a) direct taxation and (b) indirect taxation in each of the last three years (i) in total and (ii) broken down by region (220590); and secondly what the estimated average cost to families in England and Wales was of VAT charges in each of the last three years (a) in total and (b) broken down by region (220592).

Estimates of the payment of both direct and indirect taxes by UK households appear in the ONS analysis 'The effects of taxes and benefits on household income'. The latest analysis for 2006-07 was published on the National Statistics website on 25th June 2008 at:

http://www.statistics.gov.uk/taxesbenefits

The analysis is based on data from the Expenditure and Food Survey, which is a sample survey covering approximately 6,000 households in the UK.

The two tables below, which are based on the same data, show the average annual payments of these taxes for households in England, Wales and each region of England. These estimates are based on a household survey, and so some of the year to year variation in estimates is due to sampling error.

Table 1: Average direct and indirect taxes for households in England and Wales[1, 2, 3] 2004-05 to 2006-07

	2004-05	2005-06	£ per year 2006-07
England			
VAT	2,030	2,060	2,100
Indirect taxes (including vat)	4,810	4,760	4,950
Direct taxes	6,800	6,960	7,480
Total taxes	11,600	11,720	12,420
Wales			
VAT	1,730	1,840	1,980
Indirect taxes (including vat)	4,300	4,560	4,820
Direct taxes	4,570	4,700	6,020
Total taxes	8,870	9,270	10,840

[1] Indirect taxes include VAT, duty on tobacco, alcohol, hydrocarbon oils, televisions licences, air passenger duty, Stamp duty, as well as other taxes on final goods and services and intermediate taxes.
[2] Direct taxes consist of income tax (after deducting tax credits and tax relief at source on life assurance premiums), national insurance contributions, and council tax but after deducting discounts and council tax benefits.
[3] Figures rounded to the nearest £10.

Office for National Statistics

Unemployment: Hyndburn

Mr. Pope: To ask the Chancellor of the Duchy of Lancaster what percentage of the working-age population in Hyndburn constituency is economically inactive. [218288]

Mr. Watson: The information requested falls within the responsibility of the UK Statistics Authority. I have asked the authority to reply.

Letter from Karen Dunnell, dated 22 July 2008:

As National Statistician, I have been asked to reply to your Parliamentary Question asking what percentage of the working-age population in Hyndburn constituency are economically inactive. (218288)

The Office for National Statistics compiles estimates of inactivity for local areas from the Annual Population Survey (APS) following International Labour Organisation definitions.

The estimate of 28% for people of working age (Males aged 16-64, Females aged 16-59) for Hyndburn Constituency was obtained from the APS for the 12 months ending in December 2007, which is the latest period for which estimates are available.

As this estimate is for a subset of the population in a small geographical area, it is based on a very small sample size, and is therefore subject to a large margin of uncertainty.

Young People: Unemployment

Mr. Jenkins: To ask the Chancellor of the Duchy of Lancaster what youth unemployment was in *(a)* Tamworth constituency, *(b)* Staffordshire, *(c)* the west midlands and *(d)* the UK in each year since 2005. [220128]

Mr. Watson: The information requested falls within the responsibility of the UK Statistics Authority. I have asked the authority to reply.

Letter from Karen Dunnell, dated 22 July 2008:

As National Statistician, I have been asked to reply to your Parliamentary Question asking what the level of youth unemployment has been in (a) Tamworth constituency, (b) Staffordshire, (c) the West Midlands and (d) the UK in each year since 2005. (220128)

The Office for National Statistics compiles unemployment statistics for local areas from the Annual Population Survey (APS) following International Labour Organisation (ILO) definitions.

The Annual Population Survey classifies as unemployed people who are without a job who were available to start work in the two weeks following their APS interview and who had either looked for work in the four weeks prior to interview or are waiting to start a job already obtained.

Table 1, attached, shows the level of youth unemployment defined as persons age 16-24 resident in (a) Tamworth constituency, (b) Staffordshire, (c) the West Midlands and (d) the UK for the 12 month periods ending December, for 2005-2007, from the APS, which is the most recent period for which estimates are available.

As these estimates are for a subset of the population in small geographical areas, they are based on small sample sizes, and are therefore subject to large margins of uncertainty.

The data are also published on the Office for National Statistics's Nomis® website:

www.nomisweb.co.uk.

Table 1: Number of unemployed persons aged 16 to 24, resident in (a) Tamworth constituency, (b) Staffordshire, (c) the West Midlands and (d) the UK in each year since 2005

Thousand

12 months ending	*December 2005*	*December 2006*	*December 2007*
Tamworth constituency	1	[1]—	1
Staffordshire	6	4	7
West Midlands	58	61	64
United Kingdom	610	662	660

[1] Disclosive or data is unavailable.
Note:
The estimates for local areas are based on very small sample sizes and are subject to a very high degree of sampling variability. Changes from year to year, especially, should be treated with caution.
Source:
ONS Annual Population Survey

Mrs. Riordan: To ask the Chancellor of the Duchy of Lancaster how many people aged between 18 and 25 years were unemployed *(a)* in 1997 and *(b)* at the most recent date for which figures are available. [220147]

Mr. Watson: The information requested falls within the responsibility of the UK Statistics Authority. I have asked the authority to reply.

Letter from Karen Dunnell, dated 22 July 2008:

As National Statistician, I have been asked to reply to your Parliamentary Question about the number of people aged between 18 and 25 years who were unemployed (a) in 1997 and (b) at the most recent date for which figures are available. [220147]

In the UK, for the three month period ending March 1997, there were an estimated 552 thousand people aged 18 to 25 inclusive who were unemployed. The corresponding estimate for the three months ending March 2008 was 533 thousand.

The estimates of unemployment use the definition agreed by the International Labour Organisation (ILO), i.e. people are unemployed if they are without a job, want a job, have actively sought work in the last four weeks and are available to start work in the next two weeks, or if they are out of work, have found a job and are going to start it in the next two weeks.

Each month the Office for National Statistics (ONS) publishes Labour Force Survey (LFS) unemployment estimates by age in the Labour Market Statistics First Release. Historical information can be found via the following link:

http://www.statistics.gov.uk/OnlineProducts/LMS_FR_HS.asp

As with any sample survey, estimates from the LFS are subject to a margin of uncertainty.

CHILDREN, SCHOOLS AND FAMILIES

Children Act 2004

Tim Loughton: To ask the Secretary of State for Children, Schools and Families what consideration he has given to extending the provisions of section 11 of the Children Act 2004 to the armed forces. [220691]

Kevin Brennan: We currently have no plans to extend the provisions of section 11 of the Children Act 2004 to the armed forces. Working Together to Safeguard Children (HM Government 2006) provides statutory guidance on how to help safeguard and promote the welfare of children, including young people under the age of 16 who are in the armed forces as recruits or trainees, or who may be dependents of a service family, whether based in the UK or overseas. The armed forces are fully committed to co-operating with statutory and other agencies in supporting families and have procedures to help safeguard and promote the welfare of children. In addition, the Department for Children, Schools and Families continues to work closely with the Ministry of Defence and offers advice on safeguarding children and young people attached to garrisons abroad.

Children in Care: Truancy

Tim Loughton: To ask the Secretary of State for Children, Schools and Families how many children in care were absent from school without authorisation in each of the last 10 years. [219483]

Jim Knight: Information is not collected in the format requested. However, figures on the number of looked after children who missed at least 25 days of school are shown in the table.

Number and percentage of looked after children who had been looked after continuously for at least 12 months and who missed at least 25 days of school[1] – 12 months ending 30 September 2000-07, England

	Looked after children	
	Number[2]	Percentage
2000	4,000	12.0
2001	4,100	12.2
2002	4,100	12.0
2003	4,400	12.4
2004	4,300	12.3
2005	4,400	12.6
2006	4,600	13.4
2007	4,400	13.0

[1] Includes authorised and unauthorised absence.
[2] Figures have been rounded to the nearest 100.

Children: Day Care

Mr. Jenkins: To ask the Secretary of State for Children, Schools and Families how many holiday club places were provided by his Department for school-age children in each of the last five years; what proportion provided services for *(a)* six hours or less, *(b)* between six and eight hours, *(c)* between eight and 10 hours and *(d)* more than 10 hours each day; and what information he holds on the average cost to parents of taking up such places. [220029]

Beverley Hughes: The Childcare and Early Years Providers Survey collects information about holiday clubs that were registered with Ofsted, these are facilities that provide day care for children under eight They may also provide care for children up to 14 years old, and up to 16 years old for children with special needs.

Table 1 shows the total number of Ofsted registered places for children under eight in holiday clubs for each year available.

Table 1

	Total number of places
2003	121,700
2006	263,900

Table 2 shows the proportion of holiday clubs by the number of hours they were open each day during the school holidays in 2006. Figures are not available for previous years.

Table 2

	Percentage of providers
1-2 hours	1
3-4 hours	8
5-6 hours	14
7-8 hours	14
9-10 hours	53
11 hours or more	10
Mean number of hours open	8.3

In 2006 the average hourly fee charged by holiday clubs was £1.70[1]. Figures are not available for previous years.

[1] Caution should be taken with the data on fees; this figure has been derived from a number of variables and is prone to distortion.

Children: Disadvantaged

Anne Main: To ask the Secretary of State for Children, Schools and Families how many children in the St Albans constituency were eligible for free school meals in each year since 1997. [221412]

Kevin Brennan: The requested information is given in the table.

Nursery, primary and secondary schools[1]: number and percentage of pupils known to be eligible for free school meals: Position in January each year 1997 to 2008, St. Albans parliamentary constituency

	Maintained Nursery and Primary Schools			Maintained Secondary Schools		
	Number on roll	Number of pupils known to be eligible for free school meals	Percentage known to be eligible for free school meals	Number on roll	Number of pupils known to be eligible for free school meals	Percentage known to be eligible for free school meals
1997[2]	8,064	1,500	18.6	7,670	642	8.4
1998[2]	8,138	732	9.0	7,951	635	8.0
1999[2]	8,221	738	9.0	8,119	625	7.7
2000[2]	8,213	722	8.8	8,397	624	7.4
2001[2]	8,372	684	8.2	8,588	629	7.3
2002[2]	8,439	663	7.9	8,871	574	6.5
2003[3]	8,498	597	7.0	9,083	624	6.9
2004[3]	8,455	667	7.9	9,141	602	6.6
2005[3]	8,389	629	7.5	9,141	604	6.6

Nursery, primary and secondary schools[1]: number and percentage of pupils known to be eligible for free school meals: Position in January each year 1997 to 2008, St. Albans parliamentary constituency

	Maintained Nursery and Primary Schools			*Maintained Secondary Schools*		
	Number on roll	*Number of pupils known to be eligible for free school meals*	*Percentage known to be eligible for free school meals*	*Number on roll*	*Number of pupils known to be eligible for free school meals*	*Percentage known to be eligible for free school meals*
2006[3]	8,314	542	6.6	9,194	601	6.5
2007[3]	8,454	516	6.2	9,114	595	6.5
2008[3]	8,662	527	6.2	9,023	505	5.6

[1] Includes middle schools as deemed. Also includes CTCs and academies (although none of these school types in St Albans).
[2] Includes dually registered pupils, excludes boarding pupils.
[3] Includes dually registered pupils and boarding pupils.
Source:
School Census.

Children: Employment

Annette Brooke: To ask the Secretary of State for Children, Schools and Families what progress he has made in updating regulations and guidance on child employment; and if he will make a statement. [219965]

Kevin Brennan *[holding answer 21 July 2008]:* We do not have plans to amend regulations relating to the employment of children, but we are considering whether amendments need to be made to those relating to children's participation in entertainment. We recognise that there is a need for guidance on both child employment and performance and we are planning to produce this in the near future.

Children: Protection

Mr. Drew: To ask the Secretary of State for Children, Schools and Families how many people resident in Stroud constituency are on List 99. [220281]

Kevin Brennan: The identification of the number of individuals registered on List 99 who have home addresses in Stroud would require each of the case records to be checked. This could be undertaken only at disproportionate cost and would only provide historical information correct at the time at which the individuals concerned were registered.

Once an individual is on List 99, a standard or enhanced Criminal Records Bureau disclosure will reveal the barred status of that individual to an employer together with details of any criminal convictions. Information on an individual's address at the time of listing is not necessary in order to check whether that person is barred.

Children: Restraint Techniques

Chris Huhne: To ask the Secretary of State for Children, Schools and Families how many times oxygen has been administered to a child following restraint in *(a)* young offender institutions, *(b)* secure training centres, *(c)* local authority secure children's homes, *(d)* immigration removal centres, *(e)* maintained residential special schools, *(f)* NHS psychiatric hospitals and *(g)* local authority children's homes in each of the last five years. [220171]

Beverley Hughes *[holding answer 21 July 2008]:* The data is not collected centrally. Enquiries would need to be made to each of the establishments involved and they, in turn, would need to review their records. As in some cases this would involve a manual search, it is not possible to provide the information without incurring disproportionate costs.

Children: Wheelchairs

Mr. Harper: To ask the Secretary of State for Children, Schools and Families what progress has been made in improving the provision of wheelchair services for children and young people since the publication of the Aiming High for Disabled Children document in May 2007. [220201]

Mr. Ivan Lewis: I have been asked to reply.

The Transforming Community Equipment and Wheelchair Services Programme was set up on 2006 to design a radical new model for delivery of both community equipment and wheelchairs in England. The remit of the programme was to place service users and carers at the heart of any new service model and build on the strengths of the third and private sector. The overall aim was to develop a new high quality system for delivering equipment which would give those supported by the state the sort of choice and control they have not previously enjoyed. Responsibility for assessment if need remains with local health and social care commissioners.

The programme has developed a business case for a new model of delivery of wheelchair services which is currently being considered.

Departmental Buildings

Stewart Hosie: To ask the Secretary of State for Children, Schools and Families how much his Department spent on *(a)* new capital investment and *(b)* refurbishment of property in each of the last 10 years, broken down by project. [212873]

Kevin Brennan: The Department for Children, Schools and Families was created on 28 June 2007 and has not incurred any new capital investment since that time. The expenditure on refurbishment projects for the financial year 2007-08 was £12,028,357.

Departmental Catering

Mr. Moore: To ask the Secretary of State for Children, Schools and Families pursuant to the answer of 26 February 2008, *Official Report*, column 1539W, on the Fairtrade initiative, how much his Department spent on refreshments for official departmental

meetings and engagements in each of the last three financial years; and what percentage of this total was spent on Fairtrade products. [208707]

Kevin Brennan: The Department for Children, Schools and Families financial systems does not hold information on the amount of spend incurred purely for refreshments. The information held identifies hospitality spend which includes buffets as well as refreshments. Therefore the information could be provided only at disproportionate costs. All refreshments provided by our catering provider, Aramark, for internal meetings and functions is Fairtrade.

The Department was created on 28 June 2007 and the hospitality spend for the financial year 2007-08 was £354,769.

Departmental Manpower

Mr. Redwood: To ask the Secretary of State for Children, Schools and Families what the change in the number of employees of his Department has been since it was established. [217076]

Kevin Brennan: The Department was established as part of the machinery of Government changes of 28 June 2007 with the vast majority of staff coming from the former Department for Education and Skills. At the point of establishment there were 2,774.6 full-time equivalent (FTE) employees in my Department. At 30 June 2008 there were 2,586.6 FTE employees, so there has been a net reduction of 188 FTE employees.

Departmental Paper

David Simpson: To ask the Secretary of State for Children, Schools and Families what percentage of paper used *(a)* for photocopying and *(b)* in printed publications by his Department and its predecessor was from recycled sources in each of the last two years. [220686]

Kevin Brennan: The percentage of paper from recycled sources used in the last two financial years for

Sheffield and London Reprographics: 97 per cent;

National floor copiers (all four sites): 100 per cent;

Printed publications: 100 per cent.

Departmental Research

Bob Spink: To ask the Secretary of State for Children, Schools and Families what proportion of his Department's budget and that of its predecessor was used for research within its areas of responsibility in each of the last 10 years. [218062]

Ed Balls: The proportion of my Department's budget and that of its predecessors that was spent on research in each of the past 10 years is shown in the following table.

	Total departmental spending (DEL and AME) by DCSF or its predecessor[1] (£ billion)	*Social research expenditure as a proportion of total departmental expenditure (DEL and AME) by DCSF and its predecessors[2] (Percentage)*
1998-99	17.863	0.03
1999-2000	18.970	0.03
2000-01	20.885	0.05
2001-02	23.482	0.03
2002-03	20.263	0.05
2003-04	21.789	0.05
2004-05	22.734	0.06
2005-06	26.497	0.08
2006-07	54.568	0.05
2007-08	60.887	0.04

[1] Source: 1998-99 to 2001-02 figures are from the Department for Education and Skills departmental report 2003, Annex. 2002-03 figures onwards are from DCSF departmental report 2008, Annex A.

[2] Details of the expenditure on research funded from the central research budget is available for the full period requested. However, expenditure on research funded by individual policy budgets has only been recorded centrally since 2005-06.

Education: Assessments

Michael Gove: To ask the Secretary of State for Children, Schools and Families if he will place in the Library a copy of the contract agreed and signed between the Qualifications and Curriculum Authority and ETS in 2007. [220150]

Jim Knight *[holding answer 21 July 2008]:* The administration and marking of national curriculum tests is a function of the Qualifications and Curriculum Authority that is delivered independently of Government. The National Assessment Agency (NAA) oversees the marking process which is delivered by ETS Europe, the new test delivery contractor, on the QCA's behalf. I have therefore asked David Gee, Managing Director of the NAA, to write to the hon. Member. A copy of his letter has been placed in the Library.

Letter from David Gee, dated 21 July 2008:

The Secretary of State for Children, Schools and Families, right hon. Ed Balls, has asked me to write to you to answer parliamentary question 220150.

The information you have requested is subject to an obligation of confidentiality and is commercially sensitive and cannot be provided.

Mr. Gibb: To ask the Secretary of State for Children, Schools and Families if he will arrange for the key stage 2 and key stage 3 standard assessment tests taken in 2008 to be re-marked. [221209]

Jim Knight: The National Assessment Agency, which administers the key stage 2 and key stage 3 national curriculum tests, has arrangements in place for schools to seek a review of the marking of test if they find evidence that the mark scheme has not been properly applied.

Extended Schools

Ms Buck: To ask the Secretary of State for Children, Schools and Families what percentage of *(a)* secondary school children, *(b)* primary school children and *(c)* all children have access to the full extended school core offer in each local education authority. [220508]

Beverley Hughes: The following table shows the percentages of secondary school children, primary school children and all children who have access to the full extended school core offer in each local authority. The core offer comprises a varied menu of activities in primary and secondary schools; high quality childcare 8 am to 6 pm 48 weeks a year in primary schools; parenting support; swift and easy access to a wide range of specialist support services such as health and social care; and wider community access to ICT, sports and arts facilities, including adult learning.

The pupil figures provided are based on information taken from DCSF's Edubase system and the percentages are in relation to the total school population in that local authority. The percentages have been rounded up to two decimal places.

There are many other schools which are already providing individual parts of the core offer that are not yet included in these figures. Monthly variations can occur, resulting in figures going down as well, for example as a result of local school reorganisations. By 2010 we expect all schools to be offering access to extended services.

Percentage of children that have access to the full extended school core offer

LA	Phase	Percentage
Barking and Dagenham	Primary	26.39
	Secondary	80.94
Total		48.82
Barnet	Primary	66.27
	Secondary	53.62
Total		60.91
Barnsley	Primary	79.45

Family Law

Mr. Bellingham: To ask the Secretary of State for Children, Schools and Families what proportion of family court cases involved a Children and Family Court Advisory and Support Service representative in the last period for which figures are available. [220761]

Kevin Brennan: The information requested is not available. Separate statistics are collected by the Ministry of Justice and CAFCASS; proportions cannot be calculated from the statistics because they are collected for different business purposes.

Food

Mr. Paice: To ask the Secretary of State for Children, Schools and Families how much his Department spent on *(a)* food and *(b)* food of British origin in each of the last five years. [214887]

Kevin Brennan: The Department for Children, Schools and Families was created on 28 June 2007. It spent £495,176 on food in 2007-08.

Information on the amount of spend broken down into food of British origin could be provided only at disproportionate costs. A report was produced by DEFRA and issued to Parliament on the proportion of domestically produced food used in Government departments during the period 1 July 2006 to 30 June 2007. DEFRA proposes to publish data on the value of contracts let for food and catering contracts (including the value of food provided under the catering contracts) by the end of 2008 which will allow calculations to be made.

Literacy: Hearing Impaired

Michael Gove: To ask the Secretary of State for Children, Schools and Families (1) what arrangements are in place to ensure that the teaching of literacy is accessible to deaf children, with particular regard to the use of phonics; [220143]

(2) what arrangements are in place to ensure deaf children who fail to attain level 3 at key stage 2 English are receiving catch-up support tailored to their needs; [220144]

Simon Hughes: To ask the Secretary of State for Children, Schools and Families (1) what steps he is planning to implement to reduce the gap in attainment between deaf children and their hearing peers; and if he will make a statement. [220683]

Kevin Brennan: Our key priority is to personalise learning by focusing on each pupil's progression so that every child achieves their potential. Our renewed literacy strategy builds on Sir Jim Rose's independent review of the teaching of early reading by putting phonics at the heart of 'teaching reading in order to help to raise attainment levels amongst all pupils.

The review found that there was a wide range of expert support and guidance available to help schools match provision to need regarding the teaching of literacy.

Through the national strategies we will continue to encourage teachers to apply inclusive principles to address issues of accessibility, including the needs of children with severe sensory impairment such as deafness.

The primary national strategy and other partners provide a range of intervention programmes to help those children who struggle most in reading and writing. These include the Every Child a Reader and Every Child a Writer programmes. The former provides intensive one to one support in reading for five and six year olds, the latter is a new pilot currently under development but will include one-to-one intervention in years three and four in the areas of writing that children find hardest to master.

Extra help is available for those children who need it to prevent them from falling behind: we provide early literacy support (ELS—year 1), Y3 literacy support (Y3LS) and further literacy support (FLS—year 5). These three packages are designed to help those children who, without additional help would not reach level 4 at the end of year 6.

Overseas Students

Hugh Robertson: To ask the Secretary of State for Children, Schools and Families what assessment he has made of the contribution made by overseas gap year students to the education sector in the United Kingdom. [216759]

Bill Rammell *[holding answer 7 July 2008]:* I have been asked to reply.

The Department does not have any information on the numbers of people from overseas undertaking gap years in the United Kingdom, nor can we make any assessment of the contribution that they make to the education sector here.

Pre-school Education

David Davis: To ask the Secretary of State for Children, Schools and Families how many free early education places have been available in *(a)* Kingston-Upon-Hull, *(b)* East Riding of Yorkshire, *(c)* north Lincolnshire and *(d)* north east Lincolnshire in each year since 1997. [220899]

Beverley Hughes: The available information on the number of part-time funded places filled by three and four-year-olds in Kingston-upon-Hull, East Riding of Yorkshire, North Lincolnshire and north-east Lincolnshire local authority areas is shown in the tables.

All three and four-year-olds are entitled to a free part-time early education place for 12.5 hours per week for 38 weeks of the year. From 2010, this offer will be extended from 12.5 to 15 hours per week for 38 weeks of the year.

Part-time equivalent number of free early education places[1] [2] filled by three and four-year-olds. Local authority: Kingston upon Hull, City of

[10] Part-time equivalent number of children aged four at 31 December in the previous calendar year from the Early Years Census and the School Census.

The latest figures on early education places for three and four-year-olds in England were published in statistical first release 12/2008 "Provision for children under five years of age in England—January 2008" in May, which is available on my Department's website

www.dfes.gov.uk/rsgateway/.

Pupils: Intimidation

Jo Swinson: To ask the Secretary of State for Children, Schools and Families what research his Department has conducted into the effect of stress caused by bullying in schools. [220751]

Kevin Brennan *[holding answer 21 July 2008]:* We are not aware of any specific research into the effect of stress caused by bullying in schools. However, we are aware that many external studies link being bullied to outcomes such as anxiety, depression, lowered self-esteem and, in extreme cases, suicide. The Anti-Bullying Alliance has carried out a number of research projects on behalf of my Department around various aspects of bullying, and the findings have informed our wider work to prevent and tackle this happening in schools. My Department has also recently tendered for research into the effectiveness of our anti-bullying strategies.

School Meals

Mr. Laws: To ask the Secretary of State for Children, Schools and Families which local authorities had data included in the School Food Trust survey of school meal up-take 2007-08 for *(a)* primary and *(b)* secondary schools; and if he will make a statement. [219865]

Kevin Brennan: I refer the hon. Member to the statement provided to the House on 10 July 2008, *Official Report*, columns 80-82WS, entitled "The take up of school meals 2007-08 and future support for Improving take up".

All 150 local authorities (LAs) in England were asked to provide information about both primary and secondary school take up for 2007-08 as well as more general information on factors influencing changes in take up in the previous year. Responses have been received from 109.

The data were collected 'in confidence', with the promise that findings would be reported at no lower than regional level. LAs were asked, however, if they would be willing for data collected to be used to identify their individual LA. Of the 109 LAs that responded, the following said that they would:

Barking and Dagenham
Bath and North East Somerset
Bexley
Birmingham
Blackpool
Bolton
Bracknell Forest
Bradford
Brighton and Hove
Bristol, City of
Bury
Calderdale
Cheshire
Coventry
Cumbria

School Meals: Waste

Dr. Kumar: To ask the Secretary of State for Children, Schools and Families what guidance he provides to schools on reducing waste from the meals they provide. [219847]

Kevin Brennan: In April 2008 the School Food Trust published comprehensive guidance for schools and local authorities that provide school meals entitled "A fresh look at procurement—efficiency and sustainability". The guide includes a section on waste management with three recommendations:

To review the school meals service to identify opportunities to reduce food waste;

To review the school meals service to identify opportunities to minimise packaging waste; and

To explore opportunities for diverting waste products for re-use, recycling or resource reclamation.

Case studies are supplied for each recommendation and links are provided to sources of further information.

Schools are advised that reducing food waste may be one of the most productive ways to improve the overall sustainability of the school food system. The guide can be viewed on the School Food Trust's website at:

http://www.schoolfoodtrust.org.uk/doc_item.asp?DocId=79&DocCatId=9

Schools: Attendance

Mr. Milburn: To ask the Secretary of State for Children, Schools and Families what the average attendance rate at *(a)* primary and *(b)* secondary schools in each local education authority area has been in each of the last five years. [220656]

Kevin Brennan: The latest available information on attendance rates for primary and secondary schools covers the school year 2006/07, this table together with information for the school years 2002/03 to 2005/06 has been placed in the Library.

Schools: Crimes of Violence

Mr. Jenkins: To ask the Secretary of State for Children, Schools and Families what steps he is taking to reduce the incidence of violence against teachers in schools. [220134]

Kevin Brennan: Violence to school staff is rare but any incident is one too many. We have therefore made it clear that head teachers may permanently exclude pupils for violence, even for a first offence. We are also helping to reduce the risk of violence through a national programme to strengthen schools' capacity to manage pupils' behaviour. This includes giving schools access to specialist training and advice, strengthening their legal powers to discipline pupils, reaffirming their legal power to use reasonable force to restrain pupils, giving them legal power to search pupils for weapons and encouraging them to form safer school partnerships that base police officers in schools. Sir Alan Steer is advising on how the programme could be further strengthened.

Schools: Disabled

Mr. Laws: To ask the Secretary of State for Children, Schools and Families (1) how many *(a)* secondary and *(b)* primary schools have produced a disability equality scheme; and if he will make a statement; [219895]

(2) what steps he is taking to ensure that all schools produce a disability equality scheme; and if he will make a statement. [219896]

Kevin Brennan: I refer the hon. Member to the reply given to the hon. Member for East Worthing and Shoreham (Tim Loughton) on 16 July 2008, *Official Report*, column 499W.

Schools: Greater Manchester

Ann Coffey: To ask the Secretary of State for Children, Schools and Families what the revenue balance was for schools in each local authority area in Greater Manchester at the end of each of the last three financial years. [218774]

Jim Knight: The available information on school revenue balances for the 10 local authorities in Greater Manchester for 2004-05 to 2006-07 is contained in the following tables. These figures are in cash terms.

Data for 2007-08 is currently being collected by the Department, and should be available in October 2008.

2004-05

Local authority name	*Total number of schools*	*Total revenue balance (£)*	*Of which: Committed revenue balance*	*Of which: Uncommitted revenue balance*
England	22,836	1,532,855,786	923,320,611	609,535,175
North West and Merseyside	3,405	218,059,504	119,269,811	98,789,693

Trafford	97	7,367,534	5,758,711	1,454,750	154,072
Wigan	145	10,251,028	8,275,972	1,697,954	277,102

Secondary Education: Disabled

John Battle: To ask the Secretary of State for Children, Schools and Families how many secondary schools in Leeds put a disability equality scheme in place in each of the last five years. [220780]

Kevin Brennan: We expect all schools and local authorities to have in place a disability equality scheme. However, data on those schools that have implemented them is not collected Centrally.

Secondary Education: Disadvantaged

Mr. Milburn: To ask the Secretary of State for Children, Schools and Families what proportion of pupils receive free school meals in the *(a)* top 100, *(b)* top 500, *(c)* bottom 500 and *(d)* bottom 100 performing secondary schools; and what the national average number of pupils in secondary schools receiving free meals is. [220657]

Kevin Brennan: Information on the number of pupils who are known to be eligible and are claiming their free school meal entitlement by school performance has been placed in the Library.

UN Convention on the Rights of the Child

Mr. Dismore: To ask the Secretary of State for Children, Schools and Families how the Government plans to engage with *(a)* the Northern Ireland Human Rights Commission, *(b)* the Equality and Human Rights Commission and *(c)* the Scottish Human Rights Commission in formulating a response to the UN Committee on the Rights of the Child's concluding observations. [220101]

Beverley Hughes: The UK Government and devolved Administrations will seek dialogues with a range of organisations, including the respective Human Rights Commissions, when considering the UN Committee on the Rights of the Child's concluding observations.

INNOVATION, UNIVERSITIES AND SKILLS

Adult Education: North Yorkshire

Miss McIntosh: To ask the Secretary of State for Innovation, Universities and Skills what assessment he has made of the adequacy of provision for adult education in north Yorkshire. [215730]

Bill Rammell: The Learning and Skills Council has responsibility for ensuring that there is sufficient, good quality provision for post-16 learners in further education delivered by FE colleges and providers in England. Quality in north Yorkshire is assured through the same assessment processes as all other areas of England in that all further education colleges and providers are subject to inspection by Ofsted.

In line with the LSC's national approach to commissioning, regional LSCs will discuss with each FE college and provider their contribution to the delivery of skills for employability and further progression in learning in line with Government priorities. The performance of FE colleges and providers in delivering LSC-funded FE provision is also considered against the published national minimum levels of performance.

These discussions will inform decisions on whether the range of provision available in an area is sufficient and of good quality, and whether there is a need to tender for new provision, expand existing provision and/or replace poor quality provision. The offer to all local citizens, particularly those in disadvantaged neighbourhoods is central to these decisions.

Apprentices

Stephen Williams: To ask the Secretary of State for Innovation, Universities and Skills pursuant to the answer of 5 June 2008, *Official Report*, column 1131W, on apprentices, what the reasons are for the planning assumption that the number of adult apprenticeship starts will reduce between 2009-10 and 2010-11; and if he will make a statement. [216964]

Mr. Lammy: The adult apprenticeship start figures are converted from the planned figures used for the 2008-09 Learning and Skills Council grant letter and LSC statement of priorities. These figures were produced before the apprenticeships review and were on a different basis from the starts measure that is now the agreed measure following that review. For the 2009-10 LSC grant letter and LSC statement of priorities, due to be published later this year, we will be revisiting the planned figures for apprenticeships on the agreed basis of starts and ensuring that our apprenticeship trajectory matches the ambition that we set out in world-class apprenticeships. We will continue to provide funding to expand the apprenticeship programme to meet the needs of both young people and adults.

Apprentices: Construction

Jon Trickett: To ask the Secretary of State for Innovation, Universities and Skills what steps he plans to take to ensure that more apprenticeship placements are made available for young people wishing to acquire skills in the construction industry. [218894]

Mr. Lammy: "World-class Apprenticeships" (WCA) announced a package of measures designed to boost capacity and make it easier for employers to take on apprentices A construction taskforce is working directly with the Learning and Skills Council to increase the numbers of apprenticeships in the sector. Last year saw the highest number of starts, 21,000, in construction for four years.

Funding for apprenticeships will increase by almost a quarter between 2007/08 and 2010/11 to over £1 billion.

We are also working to ensure major developments such as the Olympic and Paralympic games include opportunities for apprenticeships. Already the Olympic Development Authority has committed to get at least 2,000 people in apprenticeships and work placements (up to 2012) at the Olympic park and other venues that the ODA is working on or building.

A national apprenticeship service, announced in the WCA, will have a particular focus of giving young people the opportunities to explore 'non-traditional' areas, for instance, potential female apprentices will be encouraged to look at trades concerned with construction and the built environment.

Computers: Graduates

Mr. Evans: To ask the Secretary of State for Innovation, Universities and Skills what recent assessment he has made of the effect on the economy of trends in numbers of computer science graduates in England. [218338]

Bill Rammell *[holding answer 21 July 2008]:* There have been on average some 18,500 computer science first degree qualifiers over the five years to 2006-07. While levels in 2006-07 are lower than in the past five years it is too early to draw conclusions about trends. The labour force survey shows that adults with a degree in computing have the 4th highest employment rates.

I am encouraged by the range of contact currently taking place between the Sector Skills Council (e-skills UK), the Higher Education Funding Council for England and the higher education sector to ensure their IT and computing courses continue to meet the needs of industry. The ITMB degree framework helps prepare undergraduates for the changing role of the IT professional by providing them with the technology and business skills employers need. E-skills are also supporting activity in schools

such as the 14-19 diploma in information technology and computer clubs for girls which improve the information available to pupils and can help drive demand for computer science courses.

Mr. Evans: To ask the Secretary of State for Innovation, Universities and Skills how many students at UK universities graduated with degrees in *(a)* computer science, *(b)* mathematics and *(c)* physics in each of the last five years. [218731]

Bill Rammell *[holding answer 14 July 2008]:* The latest available information is given in the table. Comparable figures for the 2007-08 academic year will be available in January 2009.

Number of First Degree Qualifiers[1] in Computer Science, Mathematical Sciences and Physics: UK higher education institutions[2]

Subject of study	2002-03	2003-04	2004-05	2005-06	2006-07
Computer Science[3]	18,240	20,010	19,775	18,495	16,255
Mathematical Sciences[4]	5,100	5,150	4,990	5,260	5,385
Physics	2,205	2,180	2,225	2,345	2,255

[1] Figures cover qualifiers of all domiciles and all modes of study.
[2] Figures exclude those qualifying from the Open University due to inconsistencies in their method of recording subject of study over the time period.
[3] Computer Science as a subject area includes the following principal subjects: Computer Science, Information Systems, Software Engineering, Artificial Intelligence, Others in Computing Science.
[4] Mathematical Sciences as a subject area includes the following principal subjects: Mathematics, Operational Research, Statistics, Others in Mathematical and Computing Sciences, Others " Mathematical Sciences, Balanced Combination of Maths Sciences and informatics.
Note:
Figures have been rounded to the nearest five.
Source:
Higher Education Statistics Agency (HESA) Student Record.

The STEM programme aims to increase the number of young people taking up post-16 qualifications in the area of STEM, which includes ICT. By ensuring that more young people are going into mathematics and the sciences at post-16 we are enabling more people to take up degrees and other HE qualifications in ICT and computing fields.

Sixty four per cent. of computing graduates work in STEM jobs. This is slightly higher than all STEM graduates (48 per cent.), which suggests that either there is slightly higher demand for computing graduates so that computing graduates are more likely to have the right skills that employers are looking for than other STEM graduates. Five per cent. of e-skills employers have skills-shortage vacancies, the same as the UK average. There are still some 36 per cent. of computing graduates or 73,000 individuals not working in a STEM job, who could be used to overcome any excess demand.

I am encouraged by the range of contact currently taking place between the Sector Skills Council (e-skills UK), the Higher Education Funding Council for England and the higher education sector to ensure their IT and computing courses continue to meet the needs of industry. The ITMB degree framework helps prepare undergraduates for the changing rote of the IT professional by providing them with the technology and business skills employers need. E-skills are also supporting activity in schools such as the 14-19 diploma in information technology and computer clubs for girls which improve the information available to pupils and can help drive demand for computer science courses.

Departmental Marketing

Pete Wishart: To ask the Secretary of State for Innovation, Universities and Skills what the cost was of *(a)* internet and website design and hosting, *(b)* print media design and *(c)* broadcast media of each of his Department's public information campaigns since 1997. [214683]

Mr. Lammy: The Department for innovation, Universities and Skills was created as a result of machinery of Government changes in June 2007.

(a) The costs for website setup, design and ongoing maintenance and content updates in the financial year 2007/08 was £89,532.16. The cost of web hosting is unknown as it is wrapped up in a larger contract, but would very roughly estimate this to be no more than £25,000 pa.

(b) We are unable to provide costs for print media design as there is no central record of leaflets, reports or printed material for a public audience. Print media design is commissioned by many teams within the Department and it would be disproportionate in cost to gather this information in detail.

(c) The costs for broadcast media for the public information campaigns since the Departments inception are £1,520,004.80.

Departmental Written Questions

David Simpson: To ask the Secretary of State for Innovation, Universities and Skills how long on average his Department took to answer *(a)* ordinary written and *(b)* named-day questions in each of the last three years. [215464]

Mr. Lammy: Information on the average number of days taken to answer parliamentary questions is not readily available in the format requested and could be provided only at disproportionate cost.

Dudley College

Mr. Ian Austin: To ask the Secretary of State for Innovation, Universities and Skills what assessment he has made of the findings of the recent Ofsted report on Dudley college. [220490]

Bill Rammell: I am delighted to say that Dudley college of technology was graded good for overall effectiveness in its recent inspection by Ofsted. I commend the college on the significant improvements they have made since their previous Ofsted inspection in February 2007.

These results show that with strong leadership and management, and good quality teaching, colleges can greatly improve their performance to meet the needs of learners and employers and play a key role in the local community they serve. I would like to congratulate the staff and students at Dudley College of Technology on this transformation.

The improvements made by Dudley college of technology demonstrate that the measures we introduced in the FE reform White Paper to tackle and eliminate under performance, are clearly working.

Education: Employment

John Battle: To ask the Secretary of State for Innovation, Universities and Skills what his latest estimate is of the number of adults who after taking part in publicly-financed education courses found work with salaries between *(a)* £10,000 to £15,000, *(b)* £15,000 to £20,000, *(c)* £20,000 to £25,000 and *(d)* above £25,000. [220705]

Bill Rammell: The information requested is not available. However, DIUS does publish information on labour force survey estimates of hourly earnings according to highest qualification held in the "Statistical First Release, Highest Qualification Held by Adults: England 2007" available at:

http://www.dcsf.gov.uk/rsgatewav/DB/SFR/s000798/index.shtml.

Information on the salaries of newly qualified first degree graduates (based on their employment situation six months after graduation) is collected and published by the Higher Education Statistics Agency, but the information is only available for around 50 per cent. of graduates who enter employment. The latest such information is available at

http://www.hesa.ac.uk/index.php/content/view/1237/161/.

Education: Prisons

Simon Hughes: To ask the Secretary of State for Innovation, Universities and Skills what procedures are in place to ensure inmates are able to continue and complete study courses following *(a)* (i) managed and (ii) involuntary moves by HM prison service to other detention facilities, *(b)* the granting of early release and *(c)* the completion of custodial sentences. [220745]

Mr. Lammy *[holding answer 21 July 2008]:* The Learning and Skills Council contracts with providers to deliver learning and skills to prisoners. Transferring prisoners are able to continue learning with the provider at the receiving establishment, and it is a contractual requirement on the provider to try to ensure that learning can be continued on release.

Simon Hughes: To ask the Secretary of State for Innovation, Universities and Skills what steps he has taken to improve completion rates for inmates undertaking study courses. [220746]

Mr. Lammy *[holding answer 21 July 2008]:* The Learning and Skills Council took responsibility for learning and skills in prisons, and let new contracts through a refreshed set of providers in summer 2006. The specification for those contracts put in place a detailed requirement for the delivery of learning that has led to 55 per cent. of learners in the 2006/07 academic year completing their learning aims, which represents a significant achievement at a time when the prison service is facing real challenges in terms of overcrowding and the consequent need to move prisoners around the estate. The Learning and Skills Council is developing arrangements, including a new specification, for the successor contracts it will let for August 2009 that will incorporate payment arrangements to reward learner outcomes.

Simon Hughes: To ask the Secretary of State for Innovation, Universities and Skills what steps he has taken to improve levels of educational attainment among the prison population in England and Wales. [220747]

Mr. Lammy *[holding answer 21 July 2008]:* The Government have put in place a significant programme of action to improve levels of educational attainment among the prison population in England and Wales. Funding for offender learning has more than trebled since the predecessors of the Department for Innovation, Universities and Skills and the Department for Children, Schools and Families took responsibility for offender learning in 2001 and is expected to exceed £170 million in 2008-09. We have introduced heads of learning and skills in prisons to take day to day responsibility for managing the learning and skills. Prisons are now subject to the same inspection arrangements as the rest of the further education sector, delivered by Ofsted and Estyn. Inspection outcomes are improving and the proportion of failed inspections are falling to similar levels as those in community adult learning settings. In England we have given responsibility for planning and funding offender learning to the Learning and Skills Council, operating collaboratively with the National Offender Management Service in commissioning the service to be delivered. Since the Learning and Skills Council took responsibility for the service, participation rates have risen from an estimated 36 per cent. in the 2006-07 academic year to 39 per cent. in the August 2007 to May 2008. Similar arrangements apply in Wales, with the director of offender management Wales playing a significant role in planning the service.

We are continuing to drive forward the agenda of attainment and employment through the programme of activity set out in 'Reducing Re-offending Through Skills and Employment: Next Steps' (December 2006) with two test bed regions (the west midlands and the east of England) trialling the plans set out in the document, ready for implementation from summer 2009.

Educational Psychology: Training

Stephen Williams: To ask the Secretary of State for Innovation, Universities and Skills whether trainee educational psychologists are expected to pay for their transport costs when visiting pupils during their placements; and if he will make a statement. [220226]

Kevin Brennan: I have been asked to reply.

Detailed arrangements for the support offered to individual trainee educational psychologists (EPs) are matters for local determination between the host local authority, the trainee and training provider.

Under the current postgraduate grant scheme for educational psychology training places, administered by the Children's Workforce Development Council, trainees receive a bursary of £14,500 (£14,900 with London weighting) in their the first year. Arrangements vary for years two and three depending on what has been agreed regionally.

Where trainees are employed as trainee EPs, they are entitled to the same services and allowances as any other employees of the local authority, including being able to claim back expenses. Where trainees are on

bursaries, local authorities are not necessarily bound by the same obligations. Some training providers are making provision to cover trainees' expenses, up to a fixed amount, where they receive a bursary.

The CWDC will keep the current arrangements under review in the light of operational experience.

Fish

Mr. Peter Ainsworth: To ask the Secretary of State for Innovation, Universities and Skills how much fish was procured by his Department since establishment, broken down by species; and what amount and value of such fish met the Marine Stewardship Council standard in each such year, broken down by species. [217885]

Mr. Lammy: We do not have data on how much fish this Department has procured.

Further Education

Mr. Marsden: To ask the Secretary of State for Innovation, Universities and Skills what the 10 most popular courses delivered in further education colleges at Level 4 and above were in 2005-06; and how many students enrolled on each. [219526]

Mr. Lammy: Table 1 shows the 10 most popular specific qualification aims at Level 4 and above in 2005/06.

Table 1: Level 4 and above learning aims in 2005/06 by qualification/course 10 most popular qualifications in further education colleges

Qualification/course title	*Number of learning aims*
AAT Level 4 NVQ in Accounting	8,990
City and Guilds Level 4 Certificate in FE Teaching Stage 1	8,890
City and Guilds Level 4 Certificate in FE Teaching Stage 2	5,850
Unitisation (approved external qualification) Higher Level, Business, Administration and Law	4,680
City and Guilds Level 4 NVQ in Registered Managers (Adults)	3,100
PGCE (Post Graduate Certificate in Education)	1,970
Graduateship	1,920
City and Guilds Level 4 NVQ in Health and Social Care	1,820
City and Guilds Level 4 Award in Conducing Internal Quality Assurance of the Assessment Process	1,810
EDEXCEL Level 4 NVQ in Registered Managers (Adults)	1,730
Other qualifications/courses	116,300
Total	157,070

Notes: 1. A learner may be enrolled on more than one learning aim. 2. These figures include both funded and non-funded learning aims. *Source:* FE Individualised Learner Record.

Table 2 shows the 10 most popular Sector Subject Areas for learning aims at Level 4 and above in 2005/06, and the total number of learning aims at this level in further education colleges.

Table 2: Level 4 and above learning aims in 2005/06 by Sector Subject Area (SSA)—10 most popular SSAs in further education colleges

Sector Subject Area (tier 2)	*Number of learning aims*
Teaching and Lecturing	34,590
Business Management	21,870
Health and Social Care	18,090
Accounting and Finance	11,310
Crafts, Creative Arts and Design	8,270
Business, Administration and Law	6,660
Engineering	6,510
Building and Construction	5,740
ICT Practitioners	5,540
Performing Arts	3,150
Other Sector Subject Areas	35,330
Total	157,070

Notes: 1. A learner may be enrolled on more than one learning aim. 2. These figures include both funded and non-funded learning aims. *Source:* FE Individualised Learner Record.

Further Education: Halifax

Mrs. Riordan: To ask the Secretary of State for Innovation, Universities and Skills what assessment he has made of the performance of further education colleges in Halifax in the last 12 months. [219987]

Bill Rammell: Ofsted is the body responsible for assessing the quality of provision in further education colleges. Ofsted inspected Calderdale college in November 2007 and published its judgment that the provision is satisfactory in January 2008. In addition, the Learning and Skills Council as part of its commissioning process discusses and reviews performance with all providers. As a matter of course, west Yorkshire LSC will be conducting this activity with Calderdale college on an annual basis.

Further Education: Student Wastage

David Simpson: To ask the Secretary of State for Innovation, Universities and Skills what research he has *(a)* commissioned and *(b)* evaluated on the reasons why students in further education who failed to complete their courses did so in the last three years. [220138]

Bill Rammell: Our research shows that reasons for leaving from FE courses are quite disparate (reflecting the wide range of learners, courses, and learning modes). The most common main reason for leaving FE was that the course was not what the learner wanted to do after all.

We will be establishing a universal adult advancement and careers service through the merger of nextstep and learndirect-advice to be fully operational from autumn 2010 which will help individuals make the choices on learning that are right for them.

We want to make sure that we are meeting the needs of learners. It is encouraging that success rates have increased in FE—rising year-on-year since 2000/01 to 78 per cent. in 2006/07, and that over 90 per cent. of learners are satisfied with their overall learning experience.

Full details of the research can be found in the regular national learner satisfaction survey undertaken by the Learning and Skills Council

http://research.lsc.gov.uk/LSC+Research/published/learner-satisfaction/

and the survey of early leavers from further education and wok-based teaming courses

http://www.dfes.gov.uk/research/data/uploadfiles/RR849.pdf

The Learning and Skills Council have commissioned a further two projects;

(1) Learner journeys on several different Learner Support programmes.

(2) Understanding the needs of disadvantaged learners and non learners.

Higher Education

Mr. Hayes: To ask the Secretary of State for Innovation, Universities and Skills what progress has been made on including UK material in the best practice compendium on the modernisation of universities, as referred to in section 2.3 of EU document 2008/C 86/01. [217994]

Bill Rammell: The UK has been actively engaged in developing the compendium and has contributed several examples of best practice to it. The compendium will be a web-based tool and it will allow access for policy makers, practitioners and the wider public to search and download information. It is currently being tested and is expected to go live by the end of this month.

Higher Education: Admissions

Ian Lucas: To ask the Secretary of State for Innovation, Universities and Skills (1) how many students began undergraduate courses in universities in England in each of the last five years; [218779]

(2) how many students domiciled in England began undergraduate courses in universities in Wales in each of the last five years; [218780]

(3) how many students domiciled in Wales began undergraduate courses in universities in England in each of the last five years. [218781]

Bill Rammell: The latest available information is given in the tables. Table 1 covers entrants to full-time undergraduate courses, and table 2 covers entrants to part-time courses.

Comparable figures for the 2007/08 academic year will be available in January 2009.

Table 1: Entrants to full-time undergraduate courses by domicile and location of institution English and Welsh higher education institutions—Academic years 2002/03 to 2006/07

Academic year	Location of institution	All domiciles	Of which: England	Of which: Wales
2002/03	England	344,235	287,485	6,400
	Wales	24,355	9,080	12,705
2003/04	England	350,410	289,885	6,410
	Wales	25,200	9,095	12,965
2004/05	England	354,605	293,700	6,190
	Wales	24,365	9,105	12,180
2005/06	England	372,710	312,110	6,365
	Wales	24,780	9,510	12,160
2006/07	England	359,355	296,725	5,460
	Wales	25,565	8,735	13,515

Note:
Figures are based on a HESA standard registration population and have been rounded to the nearest 5.
Source:
Higher Education Statistics Agency (HESA).

Table 2: Entrants to part-time undergraduate courses by domicile and location of institution English and Welsh higher education institutions—Academic years 2002/03 to 2006/07

Academic year	Location of institution	All domiciles	Of which: England	Of which: Wales
2002/03	England	261,070	236,405	3,385
	Wales	21,100	2,400	17,450
2003/04	England	272,185	243,970	3,820
	Wales	20,180	2,475	17,485
2004/05[1]	England	266,770	237,295	3,495
	Wales	22,575	2,600	18,325
2005/06	England	284,965	249,660	4,280
	Wales	22,800	2,935	17,610
2006/07	England	287,215	249,125	4,990
	Wales	22,890	2,605	17,560

[1] The increase in entrants between 2004/05 and 2005/06 may be greater than in reality as a consequence of a problem identified with data submitted by the Open University (OU) in the 2004/05 academic year.
Note:
Figures are based on a HESA standard registration population and have been rounded to the nearest 5.
Source:
Higher Education Statistics Agency (HESA).

Higher education is one of the most important investments a young person can make as graduates earn, on average, far more than people with A-levels or similar who do not go in to higher education. Over the working life, the average graduate will earn comfortably over £100,000 more, after tax and in today's valuation, than a similar individual who completed their education with two or more A-levels.

In recent years we have reformed student finance, offering improvements to both full-time and part-time students. For new entrants to full-time higher education in 2008/09 we have increased the means-testing threshold below which students are entitled to a full maintenance grant up from £17,910 for entrants in 2007/08 to £25,000. The threshold for a partial grant will increase from £38,330 for entrants in 2007/08 to £60,005. These thresholds relate to household income. This will mean that one third of all eligible students in England entering higher education in the academic year 2008/09 are expected to be entitled to a full non-repayable grant worth £2,835 and another one third are expected to be entitled to a partial grant of between £50 and £2,835. Due to these reforms, by 2011 the number of students receiving some level of grant will increase by around 100,000. As part of this change, an extra 50,000 students will receive a full grant.

In 2006 grants towards part time students' fees were increased by 27 per cent. with an additional £40 million of institutional funding to higher education institutions to encourage participation from the most under-represented groups.

Latest figures from UCAS, covering applicants to full-time undergraduate courses only, show that, after the small downturn in 2006, applicants who were accepted for entry in 2007 increased. For accepted applicants from the UK, figures show a rise of 5.5 per cent. to 364,500, with those from England showing a 6.1 per cent. rise to 307,000, the highest ever, and those from Wales up 1.3 per cent.

Latest figures for students applying for entry in 2008, show as at the end of June, applicants to full-time undergraduate courses show a year-on-year rise of 6.5 per cent. with those from England up by 7.3 per cent. and those from Wales up by 4.9 per cent.

Mr. Willetts: To ask the Secretary of State for Innovation, Universities and Skills how many and what proportion of 18-year-olds who had been previously identified as gifted and talented went on to higher education in each of the last three years. [219346]

Bill Rammell: The gifted and talented flag was not introduced into the national pupil database until 2006 and we do not yet have data on HE destinations that can be linked to this flag.

The National Academy for Gifted and Talented Youth (NAGTY) catered for the national top 5 per cent. of 11 to 19-year-olds from 2002 to 2007. It has now been replaced by the Young Gifted and Talented (YG and T) Learner Academy.

NAGTY's 2006 student exit survey questionnaire showed that, of those completing the questionnaire:

87 per cent. said they went straight on to continue their education at university;

8 per cent. were taking a gap year before going into higher education.

The Government remain committed to widening participation in higher education and to securing fair access for gifted and talented students. It is an economic as well as a social imperative that everyone who can benefit from higher education has the opportunity to do so. Widening participation is about spotting and nurturing talent, with schools, colleges and universities working together to ensure that all those with the potential and merit to benefit from higher education are able to do so.

Innovation: Medical Equipment

Stephen Williams: To ask the Secretary of State for Innovation, Universities and Skills what assessment his Department has made of the potential for future innovation in the market for *(a)* urology-related products, *(b)* stoma-related products and *(c)* single-line items. [220198]

Dawn Primarolo: I have been asked to reply.

The Department works closely with other Government Departments, including the Department for Innovation, Universities and Skills and the Department for Business, Enterprise and Regulatory Reform, to improve patients' access to beneficial new treatments and medical technologies. The contribution that innovative medical technologies can make to the delivery of modern health and social care services was recognised as part of Lord Darzi's report on the NHS Next Stage Review "High Quality Care For All" published on 30 June 2008. As a result, the Department is working across Government and with the medical technology industry to develop a strategy which promotes uptake of clinically and cost effective innovative products throughout the care pathway. A copy of the Next Stage Review has already been placed in the Library.

Regarding stoma and urology items that are dispensed in primary care, mechanisms are in place to assess innovation when a supplier seeks to have an item listed in the Drug Tariff. Similar mechanisms would apply to single-line items.

The Department is seeking best value for money from the expenditure it makes in all areas of healthcare. In Secondary Care, buyers procure goods and services via a tendering process. Consequently, market forces will drive a level of competition amongst suppliers who wish to secure NHS contracts.

Regarding the provision of stoma and urology items in primary care, the Department recently published an impact assessment (IA) alongside the consultation entitled "Proposed new arrangements under Part IX of the Drug Tariff for the provision of stoma and urology appliances—and related services—in Primary Care" June 2008. The IA considers the impact of the proposals set out in the consultation and includes a robust competition impact. A copy of the IA has already been placed in the Library.

Medicine: Education

Stephen Williams: To ask the Secretary of State for Innovation, Universities and Skills what assessment he has made of the merits of giving separate consideration for funding of medical students in the 2009 review of the funding arrangements for all students in England. [216925]

Bill Rammell: We have no current or future plans to fund medical students separately. Our policy has always been that there should be an independent review to examine the evidence from the first three years of the new fees and student support regime which will report directly to Parliament. Draft terms of reference for the review were published in January 2004. Ahead of that there are a number of pressing questions about what Government and universities should do over the next 10 to 15 years to ensure we have a world class system of higher education, it is on these questions that Government, universities and others should now focus.

Qualifications: Young People

Stephen Williams: To ask the Secretary of State for Innovation, Universities and Skills what proportion of 16-year-olds without a level 2 qualification are in full-time education; and what proportion *(a)* achieved a level 2 and remained in full-time education and *(b)* achieved a level 2 and left full-time education in the latest period for which figures are available. [220197]

Mr. Lammy: Estimates of the proportions of 16-year-olds attaining different levels of qualifications who continued in full-time education were published on 26 June 2008 in a Statistical Bulletin, Youth Cohort Study and Longitudinal Study of Young People in England: The Activities and Experiences of 16-Year-Olds: England 2007. The bulletin relates to young people who completed their compulsory education in 2006 and reached 16 during the 2005/06 academic year.

Fifty one per cent. of those without a level 2 qualification remained in full-time education; 88 per cent. of those who achieved a level 2 remained in full-time education and 12 per cent. of those who achieved a level 2 left full-time education.

Science: Postgraduate Education

Mr. Willetts: To ask the Secretary of State for Innovation, Universities and Skills how many and what proportion of current postgraduate students studying

science, technology, engineering and mathematics subjects took their first degree in the UK, broken down by *(a)* type of postgraduate course and *(b)* subject. [219347]

Bill Rammell: The latest available information is shown in the tables. Comparable figures for the 2007/08 academic year will be available in January 2009.

Table 1: Number and proportion of postgraduate enrolments[1] to science, technology, engineering and mathematics (STEM)[2] courses by level of study UK higher education institutions. Academic year 2006/07

		Of which; those with a first degree from the UK[3]	
Level of Study	*Enrolments*	*Number*	*Proportion (percentage)*
Doctorate	60,305	23,470	38.9
Masters	113,815	47,870	42.1
Other PG	34,445	13,815	40.1
Total STEM PG	208,565	85,160	40.8

Table 2: Number and proportion of postgraduate enrolments[1] to science, technology, engineering and mathematics (STEM)[2] courses by subject: UK higher education institutions. Academic year 2006/07

		Of which; those with a first degree from the UK[3]	
Subject of Study	*Enrolments*	*Number*	*Proportion*
Medicine and Dentistry	20,020	8,490	42.4
Subjects allied to Medicine	47,150	19,710	41.8
Biological Sciences	30,990	14,650	47.3
Veterinary Science	990	460	46.5
Agriculture and Related Subjects	2,840	1,065	37.4
Physical Sciences	21,060	9,940	47.2
Mathematical Sciences	6,175	2,490	40.4
Computer Science	23,080	7,440	32.2
Engineering and Technology	40,760	13,810	33.9
Architecture, Building and Planning	15,500	7,105	45.8
Total STEM PG	208,565	85,160	40.8

[1] Figures cover enrolments from all domiciles to both full-time and part-time courses.
[2] The department considers the following subject groups as STEM subjects: medicine and dentistry, subjects allied to medicine, biological sciences, veterinary science, agriculture and related subjects, physical sciences, mathematical sciences, computer science, engineering and technology, and architecture, building and planning.
[3] This population has been derived by selecting those enrolments whose highest qualification on entry was a first degree from a UK institution or an undergraduate qualification with qualified teacher status (QTS). This will exclude those who already have a postgraduate qualification and those with other qualifications on entry to their postgraduate course.
Note:
Figures are based on a HESA standard registration population and have been rounded to the nearest 5 so columns may not sum to totals. Proportions have been calculated using unrounded figures.
Source:
Higher Education Statistics Agency (HESA).

Sixth Form Colleges: Governing Bodies

Daniel Kawczynski: To ask the Secretary of State for Innovation, Universities and Skills whether his Department has issued guidance on whether governors of sixth form colleges may refuse requests from *(a)* members of the public, *(b)* parents of students and *(c)* members of teaching staff at the college to make their home addresses and email addresses available. [210358]

Bill Rammell: The Department has not issued any guidance to colleges (including sixth form colleges) asking governors to make available their home and private e-mail addresses. As independent institutions, it is for individual governing bodies to determine their own arrangements for communications with governors.

Student Unions: Equality

John Mann: To ask the Secretary of State for Innovation, Universities and Skills what provisions of legislation on race relations govern the activities of student unions; and if he will make a statement. [218165]

Bill Rammell: The Race Relations Act 1976 imposes obligations on student unions in relation to their roles as employers, providers of goods, facilities and services and in relation to the disposal and management of their premises. It also places them under obligations as regards their decisions in relation to applications for membership and their treatment of their members, if they have a membership of 25 or more people.

Student unions are also subject to supervision by higher education institutions, under section 22 of the Education Act 1994, who have a duty to:

"take such steps as are reasonably practicable to secure that any students' union for students at the establishment operates in a fair and democratic manner and is accountable for its finances".

Student Wastage

Mr. Willetts: To ask the Secretary of State for Innovation, Universities and Skills how many students dropped out of each UK university in each of the last 10 years, broken down by subject studied. [214023]

Bill Rammell: Non-completion rates are not broken down by degree subject However a sector-wide non-continuation rate is provided for each year, which is broken down by subject of study. The non-continuation rate is the proportion of entrants to full-time first degree courses who are no longer in higher education after one year of study. The rates for young entrants are shown in table 1. Information on the actual numbers not continuing in HE has not been published.

Table 1: Percentage of young entrants to full-time first degree courses who are no longer in HE in after one year of study UK higher education institutions academic years 1999/2000 to 2005/06

							Percentage
Degree subject	*1999/2000*	*2000/01*	*2001/02*	*2002/03*	*2003/04*	*2004/05*	*2005/06*
Medicine, dentistry and veterinary science	2.0	2.0	2.4	1.8	2.0	1.9	1.6
Subjects allied to medicine	6.3	6.0	5.9	6.4	7.7	6.8	6.5
Biological sciences[1]	[1]—	[1]—	[1]—	[1]—	7.3	6.8	6.7
Physical sciences[1]	6.9	6.0	6.1	7.1	6.1	6.0	7.8
Agriculture and related subjects	6.8	7.0	11.4	7.5	8.3	8.0	5.7
Mathematical sciences[2]	[2]—	[2]—	[2]—	[2]—	5.5	5.3	4.8

Table 1: Percentage of young entrants to full-time first degree courses who are no longer in HE in after one year of study—UK higher education institutions academic years 1999/2000 to 2005/06

Notes:
1. Figures for 2000/01 are only available to the nearest integer.
2. There is a break in the time series between academic years 2001/02 and 2002/03 because the subjects' JACS coding was changed in 2002/03.
Source:
Performance Indicators in Higher Education, published by the Higher Education Statistics Agency (HESA)

Table 2, which has been placed in the Library of the House, shows the proportion of full-time first degree entrants who were projected to neither gain an award nor transfer for each UK HEI. Information on the actual numbers projected to neither obtain an award nor transfer has not been published.

Student retention rates in this country compare very well internationally. The UK ranks fifth in the OECD for first degree completion rates, out of 23 countries who report data in this area. A university education is now open to more students than ever before and the Government are totally committed to providing opportunities for all people to achieve their potential and to maximise their talent.

Students: Finance

Sarah Teather: To ask the Secretary of State for Innovation, Universities and Skills what the maximum amount of *(a)* grant and *(b)* loan available to students completing (i) clinical and (ii) research positions during a mandatory sandwich year forming part of an undergraduate degree course is. [219209]

Bill Rammell: Entitlement to maintenance loan and grant support for students on a sandwich course placement year depends upon the periods of full-time study during the academic year in question.

Generally, students are not entitled to grants for living costs in respect of an academic year of a sandwich course in which periods of full-time study aggregate to less than 10 weeks, unless the periods of work experience constitute unpaid service. They are, however, eligible for a non means-tested loan for living costs—in 2008-09 the maximum amount available to most students will be £2,265.

However, students on certain specified unpaid placements in the public or voluntary sectors (including unpaid clinical and research positions in public health and local authorities) are potentially entitled to grants for living costs of up to £2,835 (up to £1,000 if they entered higher education in 2004/05 or 2005/06), subject to means testing; and for other grants for dependants and for travel. Students on such unpaid placements will be eligible for the full amount of loans for living costs, also subject to means testing and place of residence; in 2008/09 the maximum loan available to most students will be £4,625 (£6,475 for students living away from home and studying in London).

Students who entered HE in or after 2006 and who are subject to the variable fee regime can take out a non means tested fee loan of up to £3,145 in 2008/09 if any periods of full-time study in the academic year in question aggregate to more than 10 weeks, or £1,570 If any such periods aggregate to less than 10 weeks.

Students who entered HE before 1 September 2006 and who consequently are not subject to the variable fee regime will be liable for a tuition fee contribution of £1,255 if any periods of full-time study aggregate to more than 10 weeks, or a contribution of up to £610 if any such periods aggregate to less than 10 weeks. Such students can apply for a means-tested fee grant to cover their contribution, and can take out a non means-tested fee contribution loan to cover any shortfall in their fee grant.

Students: Government Assistance

Mr. Jim Cunningham: To ask the Secretary of State for Innovation, Universities and Skills what steps the Government *(a)* has taken and *(b)* plans to take to provide assistance to students who have been estranged from their families. [216537]

Bill Rammell *[holding answer 9 July 2008]:* The Education (Student Support) Regulations provide for students who are proven to be estranged from their parents to be treated as independent students for the purposes of assessing their entitlement to higher education student support. We have no plans to change the way in which the assessment of such students is carried out.

Students who claim to be estranged from their parents are required to provide sufficient evidence for their local authority (LA) to determine that the estrangement does exist and is permanent. For each subsequent year for which such a student applies for support; the LA has to satisfy itself that the estrangement still persists.

The financial assessment for single independent students (i.e. they do not have a husband, wife, civil partner or cohabiting partner of either sex) is based on the student's own income only. The core student support package for such a student with an income of up to £18,360 (or up to £25,000 for new students starting their studies from 2008/09) studying outside London comprises: a non means-tested tuition fee loan of up to £3,145; a means-tested maintenance grant of £2,835; and a loan for maintenance of up to £4,625. Students who are in receipt of the full maintenance grant and who are being charged the maximum £3,145 tuition fee are also eligible for an institutional bursary of at least £310.

Extra support is available for disadvantaged students trough non means-tested disabled students allowances and means-tested childcare grant, adult dependant grant and parents learning allowance, in addition, students may also be able to apply to their university or college for support from its access to learning fund for students experiencing particular financial hardship.

Students: Loans

Dr. Cable: To ask the Secretary of State for Innovation, Universities and Skills when the new interest rates payable on student loans to be repaid over the year from 1 September 2007 to 31 August 2008 were set by the Student Loans Company; and *(a)* when and *(b)* in what form those rates were communicated to those graduates and current students who had taken out loans through the SLC. [217132]

Bill Rammell *[holding answer 9 July 2008]:* The student loan interest rate for the year from 1 September 2007 to 31 August 2008 was confirmed by officials during August 2007 as the rate to apply for the forthcoming academic year for both types of student loan.

In accordance with the requirements of the Consumer Credit Act 1974, the SLC publishes details of the forthcoming change in the interest rate payable for pre-1998 mortgage style (MS) Student Loans before the new rate takes effect on 1 September each year. There is no similar requirement for advance notification for the current income contingent repayment (ICR) student loans which have a low interest rate exemption from arrangements governing consumer credit agreements. ICR statements are issued in September each year for those borrowers whose loans are not yet in repayment. For ICR borrowers who are in repayment, statements are issued after receipt of a file from HMRC. Thus, there is no specific timescale for the issue of these statements but, for the majority, these are issued between September and December.

However, the SLC publishes notices of the change of interest rates affecting all student loan borrowers in national newspapers before 1 September each year. The change is also published on the SLC's and Government websites.

Borrowers with MS loans are individually informed of the change by the SLC and private sector debt owners before 1 September. This is important as a change in interest rate for these borrowers changes the payments they are required to make. Borrowers with ICR loans receive notification of the change with their annual statements. While any change in the interest rate applied affects the overall balance of the outstanding loan, it does not alter the income-related repayments of these borrowers.

Students: Work Experience

Stephen Williams: To ask the Secretary of State for Innovation, Universities and Skills what estimate he has made of the additional costs incurred by students during non-paid work placements; and if he will make a statement. [220227]

Bill Rammell: The range of unpaid placements varies greatly between different courses and different institutions. Information is not available on the costs incurred by students while undertaking a non-paid work placement.

Generally, students are not entitled to grants for living costs in respect of an academic year of a sandwich course in which periods of full-time study aggregate to less than 10 weeks. They are, however, eligible for a non means-tested loan for living costs. In 2008/09, the maximum amount available to most students will be £2,265.

However, students on specified unpaid placements in the public or voluntary sectors are potentially entitled to grants for living costs of up to £2,835 (up to £1,000 if they entered higher education in 2004/05 or 2005/06), subject to means-testing; and for other grants for dependants and for travel. Students on these specified unpaid placements will be eligible in 2008/09 for a student loan of up to £4,625 in most cases (up to £6,475 for students living away from home and studying in London), subject to means testing and place of residence.

Train to Gain Programme

Mr. Willetts: To ask the Secretary of State for Innovation, Universities and Skills what proportion of the Train to Gain budget was spent on employers that had been recruited by skills brokers in the most recent year for which figures are available. [219484]

Mr. Lammy *[holding answer 21 July 2008]:* Since it was rolled out nationally from April 2006 the Train to Gain service has engaged almost 93,000 employers and led to over 488,000 employees starting learning funded by LSC. The brokerage service has played an important part in the development of Train to Gain. It has helped engage a high proportion of hard to reach employers, many of which are small businesses. Satisfaction with brokerage is high, at 80 per cent., and recent evaluations show that employers particularly value the local knowledge and impartiality of the brokerage service in helping them source high-quality training.

In the financial year 2006/07 34,000 employers engaged with Train to Gain, of which around half were engaged by skills brokers. The vast majority of employers engaged by brokers will have gone on to receive Train to Gain funding to help them invest in the skills of their employees. Detailed figures are not readily available on the proportion of employees who began learning programmes in Train to Gain who worked for employers engaged by skills brokers.

Mr. Willetts: To ask the Secretary of State for Innovation, Universities and Skills which 50 companies have the largest contracts for delivering the Train to Gain programme; and how much these contracts are worth in total. [219465]

Mr. Lammy: Since it was rolled out nationally from April 2006, Train to Gain has grown quickly. It has now engaged 92,210 employers, supported 454,920 employees to begin learning programmes, and delivered 186,720 full level 2 and over 23,000 Skills for Life achievements. Recent evaluations of the service show that both employer and employee satisfaction with their experience of Train to Gain is high.

The following table lists the 50 providers, as at the end of May 2008, with the largest contracts for delivering Train to Gain in 2007/08. Taken together, these providers have contracts worth approximately £160 million—over 40 per cent. of projected spend for the year.

HOME DEPARTMENT

Abandoned Vehicles

Robert Neill: To ask the Secretary of State for the Home Department what figures police forces collect on numbers of abandoned cars. [219066]

Mr. McNulty: The police do not collect this information.

Animal Experiments

Mr. Hancock: To ask the Secretary of State for the Home Department how many animals were used for the purposes of marine biotoxins testing in 2006 for (i) PSP toxins and (ii) DSP toxins; what plans she has to replace the use of animals for these purposes; and what plans she has to revoke all existing licences for animal tests for these purposes. [218603]

Meg Hillier: We do not hold separate figures for testing for paralytic shellfish poison (PSP) and diarrheic shellfish poison (DSP). However, Table 9 of the Statistics of Scientific Procedures on Living Animals: Great Britain for 2006 records the use of 7,346 mice for the safety evaluation of other foodstuffs. All of these animals were used for marine biotoxin testing.

Section 5.4 of the Animals (Scientific Procedures) Act 1986 requires the Secretary of State to weigh the likely adverse effects on the animals concerned against the benefits likely to accrue as a result of the programme to be specified in the licence. In the case of testing for the presence of marine biotoxins, the benefits of such testing are the protection of public health by ensuring that consumers are not exposed to biotoxins present in molluscan shellfish. In view of this, we have no plan to revoke or amend any project licences that have been granted authorising marine biotoxins testing. However, the Home Office is committed to the replacement of both the PSP and DSP bioassays. To this end, Home Office officials are working closely with the Food Standards Agency, as competent authority for food safety, and those contracted by them to perform routine monitoring for shellfish toxins, to progress replacements.

Antisocial Behaviour Act 2003

Mr. Ruffley: To ask the Secretary of State for the Home Department how many prosecutions under the Anti-social Behaviour Act 2003 there have been for *(a)* noise, *(b)* graffiti and fly posting and *(c)* waste and litter in (i) each local authority and (ii) each police authority, broken down by basic command unit, in each region of England and Wales since January 2008. [219164]

Maria Eagle: I have been asked to respond.

The information requested covering the number of defendants proceeded against at magistrates courts for noise, waste offences and littering in England and Wales for 2006 by police force area and region, are shown in the following tables. Offences of graffiti and fly posting are not separately identifiable from other criminal damage offences (for example vandalism and damaging property) from the information reported to the Ministry of Justice.

It is not possible to separately identify prosecutions taking place in (i) local authority area and (ii) basic command units within police force areas in England and Wales from the information reported to the Ministry of Justice.

These data are on the principal offence basis. The figures given in the table on court proceedings relate to persons for whom these offences were the principal offence for which they were dealt with. When a defendant has been found guilty of two or more offences, the offence selected is the one for which the heaviest penalty is imposed. Where the same disposal is imposed for two or more offences, the offence selected is the offence for which the statutory maximum penalty is the most severe.

Court proceedings data for 2007 will be available in the winter of 2008.

Court proceedings data for 2008 will be available in the winter of 2009.

Number of defendants proceeded against at magistrates courts for waste disposal offences, littering and noise offences, by region, and police force area in England and Wales for 2006[1,2]

[1] These data are on the principal offence basis.

[2] Every effort is made to ensure that the figures presented are accurate and complete. However, it is important to note that these data have been extracted from large administrative data systems generated by the courts, and police forces. As a consequence, care should be taken to ensure data collection processes and their inevitable limitations are taken into account when those data are used.

Asylum

Tony Lloyd: To ask the Secretary of State for the Home Department what recent representations she has received on *(a)* the most recent operation of the asylum system and *(b)* the most recent report of the Independent Asylum Commission; and if she will make a statement. [220075]

Mr. Byrne *[holding answer 21 July 2008]:* The UK Border Agency receives correspondence from a variety of sources about the operation of the asylum system some of which makes reference to the reports of the Independent Asylum Commission. The UK Border Agency operates a fair and humane asylum system fully meeting the United Kingdom's international protection obligations.

Paul Holmes: To ask the Secretary of State for the Home Department how many Somalian people have been refused asylum in the UK in each of the last *(a)* 12 months and *(b)* five years; and how many are awaiting a decision on an asylum application. [220634]

Mr. Byrne *[holding answer 21 July 2008]:* The following two tables give the most recently published figures available and show the total number of refusals for Somali people, following initial decisions, between April 2007 and March 2008 and for each of the last five years.

The published figure for asylum applications for Somali people awaiting an initial decision is not available as the figures are based on an overall manual count which is not divided into separate categories.

Information on asylum is published annually and quarterly. Annual statistics for 2007 and for Q2 2008 will be available on 21 August 2008 from the Library of the House and from the Home Office research, development and statistics directorate web site at:

http://www.homeoffice.gov.uk/rds/immigration-asylum-stats.html

[2] Provisional figures

James Duddridge: To ask the Secretary of State for the Home Department how many incidents of political violence involving Zimbabweans have been recorded in *(a)* Southend and *(b)* the UK in the last 24 months. [217658]

Mr. McNulty *[holding answer 10 July 2008]:* The information requested is not collected centrally. From the recorded crime statistics collected by the Home Office, it is not possible to identify whether *(a)* a crime was politically motivated or *(b)* the nationality of either the victim or the alleged offender.

James Duddridge: To ask the Secretary of State for the Home Department how many outstanding applications for asylum there were from Zimbabwean nationals in *(a)* Southend and *(b)* England and Wales at the end of (i) 2004, (ii) 2005, (iii) 2006 and (iv) 2007. [220121]

Mr. Byrne: The requested information is unavailable as it is not collated centrally and could be obtained only at disproportionate cost by examination of individual case records.

Further information on asylum is published annually and quarterly and is available from the Library of the House and from the Home Office research, development and statistics directorate website at:

http://www.homeoffice.gov.uk/rds/immigration-asylum-stats.html

Paul Holmes: To ask the Secretary of State for the Home Department how many Zimbabwean people have been refused asylum in the UK in each of the last *(a)* 12 months and *(b)* five years; and how many are awaiting a decision on an asylum application. [220635]

Mr. Byrne *[holding answer 21 July 2008]:* The following two tables give the most recently published figures available and show the total number of refusals for Zimbabwean people, following initial decisions, between April 2007 and March 2008 and for each of the last five years.

The published figure for asylum applications for Zimbabwean people awaiting an initial decision is not available as the figures are based on an overall manual count which is not divided into separate categories.

Information on asylum is published annually and quarterly. Annual statistics for 2007 and for Q2 2008 will be available on 21 August 2008 from the Library of the House and from the Home Office research, development and statistics directorate web site at:

http://www.homeoffice.gov.uk/rds/immigration-asylum-stats.html

Asylum refusals[1] on initial decisions in the United Kingdom, excluding dependants 2003-07, nationals of Zimbabwe

	Total refusals
2003	3,285
2004	2,310
2005	945
2006[2]	1,510
2007[2]	1,155

[1] Figures rounded to nearest five.
[2] Provisional figures.

Asylum refusals on initial decisions[1,2] in the United Kingdom, excluding dependants April 2007 to March 2008 by month, nationals of Zimbabwe

	Total refusals
2007	
April	95
May	140
June	115
July	135
August	85
September	70
October	80
November	105
December	70
2008	
January	80
February	100
March	90

[1] Figures rounded to nearest five.
[2] Provisional figures.

Border and Immigration Agency: Correspondence

Clare Short: To ask the Secretary of State for the Home Department when a reply will be sent to the right hon. Member for Birmingham, Ladywood's letter to the Border and Immigration Agency of 8 April 2008 on behalf of Mamta Devi, Home Office reference number D1104208 and her further letter of 23 May 2008, correspondence reference B18481/8. [219873]

Mr. Byrne: The UK Border Agency replied to the right hon. Member's first letter in a letter received by her on 14 May 2008 and her letter of 23 May was replied to on 17 July 2008.

Borders: Personal Records

Mr. Brazier: To ask the Secretary of State for the Home Department how many of the companies within the consortium selected to deliver the e-Borders programme have had experience of delivering this type of system; and for which governments or companies each has delivered similar programmes. [220274]

Mr. Byrne: Within the Trusted Borders consortium, Raytheon Systems Ltd., Serco, Accenture, Detica, QinetiQ, Steria and Cap Gemini all have experience in delivering programmes with similar capabilities to e-Borders. These include:

US Visit, for the US Government;

Schengen Information System for the European Union; and

miSense for the Home Office.

Cannabis: Young People

Tim Loughton: To ask the Secretary of State for the Home Department what estimate she has made of the proportion of children *(a)* under 14, *(b)* 14 to 16 and *(c)* between 17 and 18 years old who (i) have tried skunk cannabis and (ii) smoke skunk cannabis at least once a week in each of the last 10 years. [216999]

Mr. Coaker: There are two primary sources of statistics on the use of illicit drugs by young people: the British crime survey (which covers England and Wales) and the smoking drinking and drug use survey among young people in England. However, both surveys ask questions about the use of cannabis in general and it is not possible to report separately on the use of skunk.

Crime

Alun Michael: To ask the Secretary of State for the Home Department what standards she has set for *(a)* police services, *(b)* local authorities and *(c)* local crime and disorder reduction partnerships in respect of the methodology for local crime and disorder audits; and what examples of best practice she has identified. [218535]

Mr. McNulty: Under the Crime and Disorder Act 1998, the police service and local authorities are two of the five responsible authorities which comprise crime and disorder reduction partnerships or community safety partnerships (CSPs) in Wales.

Following a review of the partnerships provisions of the 1998 Act, the duties to produce three yearly audits and to report annually to the Secretary of State on a partnership's work and progress were repealed in 2007. They were replaced by new statutory requirements in 2007 to introduce minimum standards for partnership working based on six hallmarks of effective partnerships, providing clear statements of the core functions of CDRPs and CSPs. These include producing a strategic assessment identifying local community safety priorities and a partnership plan which sets out the approach for addressing these priorities.

'Delivering Safer Communities: A Guide to Effective Partnership Working' was issued in September 2007 to support the implementation of the statutory requirements and of the hallmarks of effective partnership. The guidance also contains a number of suggested practice case studies which represent practical solutions to support partnerships meet the statutory requirements.

Crime Prevention: Young People

Mr. Harper: To ask the Secretary of State for the Home Department what guidance she has issued to police forces on involving young people in local crime reduction strategies. [219325]

Mr. Coaker: Engaging and involving young people in local crime reduction strategies is important, as they are often the group most concerned about crime and are disproportionately victims of crime.

The Government make it clear in the policing Green Paper that neighbourhood policing teams should always include young people in their consultations about policing priorities and also make every effort to engage hard to reach groups.

We encourage all aspects of youth engagement and encourage all police forces authorities and forces to make every effort to consult with and work in partnership with young people, both through adapting existing examples of good practice and developing new ones. We recognise that approaches will differ according to local circumstances and support partnerships between the police and other agencies where there is a coordinated approach to engaging and involving young people.

Police forces are already engaging positively with young people, for example by way of safer schools partnerships. SSPs are a successful mechanism for ensuring joint working between schools and police, with a dedicated police officer attached to a school, and liaising closely with the pupils. There are now about 500 SSPs of one form or another. Evaluations have shown that they are proving effective in improving behaviour and attendance, developing strong and positive relationships between the police and young people, and to help young people develop a sense of being part of the local community.

The youth crime action plan, published on 15 July, includes a number of additional ways in which the police will be working proactively with and for with young people includes:

Expansion of safer schools partnerships (see above).

Increase after school patrols in the locality of the school and transport hubs. This is not only intended to reduce criminal and antisocial behaviour in these areas, but also to help young people feel safer, and able to interact positively with the police.

Using existing child protection legislation to ensure young people on the street at night are taken to a safe place (Operation Stay Safe).

Establishing youth forums to address the carrying of knives by young people, including young people who have been directly involved or affected by knife crime.

The YCAP also includes way of how we need to be responsive and accountable to young people to ensure they are involved in tackling youth crime and decisions that affect them and to improve the relationship between young people and the police. We will also listen to the views of young people themselves, ensuring that they can contribute to developing solutions not just feeling that they are seen as the problem.

We welcome and encourage youth engagement and will continue to explore ways to achieve this. For example young people are regularly represented on the steering group of the YCAP, as their views are very important.

Crime: Internet

Margaret Moran: To ask the Secretary of State for the Home Department what percentage of digital forensic time within the police force is spent on investigating *(a)* online child abuse incidents, *(b)* e-crime and *(c)* terrorism. [218822]

Mr. McNulty: This information is not held centrally.

The Government recognises that all forensic work carried by or on behalf of law enforcement can be an essential part of evidence gathering; however each police force and law enforcement agency is given its own annual budget to be distributed where necessary to provide adequate resources.

Margaret Moran: To ask the Secretary of State for the Home Department what assessment she has made of the *(a)* demand by police forces and *(b)* adequacy of resources for digital forensic services in England and Wales. [218823]

Mr. McNulty: The Home Office allocates core grants to police forces on an annual basis without stipulating where the grant should be spent. The ultimate decision on where this money should be spent lies with the relevant chief officers.

Criminal Records Bureau

Mr. Ruffley: To ask the Secretary of State for the Home Department what estimate she has made of the number and proportion of records held by the Criminal Records Bureau which contain incorrect information, broken down by police force are. [221650]

Meg Hillier: I refer the hon. Member to the reply given to the hon. Member for Eastleigh (Chris Huhne) on 5 June 2008, *Official Report*, column 1123W.

Criminal Records Bureau: Discrimination

Mr. Ruffley: To ask the Secretary of State for the Home Department how many claims for discrimination, based on *(a)* sex, *(b)* race and *(c)* sexual orientation, were brought by staff of the Criminal Records Bureau in each of the last five years; and how many in each case were settled (i) in and (ii) out of court. [219038]

Meg Hillier: The Criminal Records Bureau has had no claims for discrimination on grounds of *(a)* sex, *(b)* race or *(c)* sexual orientation in the last five years.

Criminal Records Bureau: Standards

Mr. Ruffley: To ask the Secretary of State for the Home Department (1) in how many cases the Criminal Records Bureau is known to have wrongly reported that a person has a criminal record in each year since

its inception; on how many occasions in each year such cases related to offences involving children, broken down by offence; and if she will make a statement; [219049]

(2) what estimate she has made of the number of Criminal Records Bureau checks which failed to reveal criminal offences that were subsequently found in each year since 2001; [219173]

(3) how many Criminal Records Bureau checks were found to be incorrect in *(a)* 2005, *(b)* 2006 and *(c)* 2007; and what estimate she has made of the (i) number and (ii) percentage of Criminal Records Bureau records which are incorrect; [219177]

(4) what measures there are to ensure that *(a)* information kept by the Criminal Records Bureau is accurate and up-to-date and *(b)* the documentary evidence to support such information is appropriately recorded. [219180]

Meg Hillier: All the quality control procedures at the Criminal Records Bureau are geared to achieving the highest levels of accuracy. In addition, the CRB carries out a post-disclosure accuracy check that analyses all aspects of the disclosure application and its issue. This check was introduced in 2007 and is based on a statistical sample of disclosure applications and from that sample it can be ascertained that the accuracy rate for 2006-07 is 99.94 per cent. and for 2007-08 is 99.98 per cent. No comparative data are available before these dates.

The CRB does not collate information about cases related to offences involving children.

The CRB operates a central database in order to record transactions that occur during the disclosure process, where applicants' personal data provided on an application form are compared against information held by the police, the Department of Health and the Department for Children, Schools and Families. Although the CRB has access to conviction and other information through this process, the police and the other data sources are the data owners of material held on their respective databases and as such are responsible for the accuracy of information held thereon.

Criminal Records: Offences Against Children

Mr. Ruffley: To ask the Secretary of State for the Home Department what procedure the Criminal Records Bureau follows in recording allegations of child abuse which have not been proven; how many such allegations are on CRB records; what the procedure for the removal of an unfounded allegation is; and if she will make a statement. [219213]

Meg Hillier: The Criminal Records Bureau compares applicant details against information held by the police, the Department of Health and the Department for Children, Schools and Families. Although the CRB has access to conviction and other information through this process, the police and the other data sources above are the data owners of material held on their respective databases and as such are responsible for the accuracy of information held thereon. Therefore, the CRB would not record the number of allegations of child abuse which have not been proven. However, the CRB operate a dispute procedure to enable recipients of Disclosure information to dispute the accuracy and relevancy of any information revealed in a Disclosure.

Criminal Records: Wales

Mrs. Gillan: To ask the Secretary of State for the Home Department how many people in Wales were incorrectly identified as having criminal records by the Criminal Records Bureau in each year since 2002. [218778]

Meg Hillier: The Criminal Records Bureau would need to perform a manual trawl, at disproportionate cost, of each application to ascertain whether the postcode falls within Wales, in order to identify how many applicants in Wales have been incorrectly identified in each year since 2002.

Furthermore, this may not provide a conclusive figure as applicants may live on the borders of England and Wales.

Departmental Information Officers

Mr. Jeremy Browne: To ask the Secretary of State for the Home Department how much her Department paid in bonuses to press and communication officers in each of the last 10 years; and what the *(a)* highest and *(b)* lowest such bonus was in each of those years. [182720]

Mr. Byrne: Press and communications officers in the Home Office are employed at the Information and senior information officer grades. Total bonus payments are recorded by financial year and the following tables give details of payments made to staff within the communication directorate in the past six financial years. There are two types of bonus:

1. Performance Review

Staff performance reviews are completed annually with a bonus awarded to all staff with a performance assessment of 'exceptionally effective'. Table 1 details the amounts that would have been paid to individual members of staff with an 'exceptionally effective' rating.

This does not represent the total amount paid in bonuses to all staff in the relevant grades. This information and the data for the rest of the Department is not held centrally and could be collected only at disproportionate cost.

2. Reward and Recognition Scheme

All bonus payments are awarded with reference to the guidance contained in the Home Office 'Reward and Recognition' scheme. Use of a special bonus allows management to respond quickly to effort or excellence. Table 2 shows the highest and lowest bonuses paid.

Table 1

Financial year	*Percentage*	*IO (£)*	*SIO (£)*
2002-03	1	303	322
2003-04	2	623	763
2004-05	2	629	771
2005-06	2	649	795
2006-07[1]	2	666	815
2007-08[1]	2	672	824

[1] The anticipated amount that will be paid for 'exceptionally effective' performance between April 2007 and March 2008.

Note:
Calculations are based on 2 per cent. (1 per cent . 2002-03) of the 'Target rate' of the appropriate pay scale.

Table 2

£

Financial year	*Total bonus payments*	*Highest bonus paid*	*Lowest bonus paid*
2002-03	5,900	700	400
2003-04	8,550	500	450
2004-05	8,200	1,000	300
2005-06	6,550	800	250
2006-07	6,400	500	250
2007-08[1]	8,120	650	150

[1] All awards have been made for 07/08; therefore this is the final total for the current financial year.

Departmental Official Cars

Stephen Hammond: To ask the Secretary of State for the Home Department which make and model of car she has chosen as her ministerial car to be provided by the Government car and despatch agency. [217760]

Mr. Byrne: I refer the hon. Member to the answer given by my hon. Friend, the Parliamentary Under-Secretary of State for Transport, (Jim Fitzpatrick) on 16 July 2008, *Official Report*, column 414W.

Departmental Pay

Chris Huhne: To ask the Secretary of State for the Home Department how much her Department paid to staff in annual appraisal-related end-year bonuses in 2007-08. [217322]

Jacqui Smith: For staff in Home Office headquarters, UK Border Agency, and the senior civil service end-of-year bonuses are linked to annual appraisals.

For 2007-08 these bonuses will be paid in July salaries along with the annual pay award and therefore this information will not be available until September.

Identity and Passport Service does not operate an end of year annual appraisal related bonus scheme for all its staff. Where bonuses are applicable, these are expected to be paid in July salaries and this information will not be available until September.

Staff in the Criminal Records Bureau do not receive end of year appraisal bonuses.

Departmental Publicity

Mr. Philip Hammond: To ask the Secretary of State for the Home Department how much her Department and its agencies spent on staff working on *(a)* marketing and *(b)* branding in the last 12 month period for which figures are available. [167304]

Mr. Byrne: The total cost of staff responsible for marketing and branding for the 12 month period ending 31 December 2007 is detailed in the following table.

The marketing staff delivered campaigns including alcohol, harm reduction, drugs prevention, police recruitment, immigration control, advice to employers and changes to passport applications

The total cost of staff responsible for marketing and branding for the 12-month period ending 31 December 2007 is detailed in the following table:

January 2007 to December 2007

£

	Staff costs for marketing	*Staff costs for branding*
Home Office	990,630	3,124
Borders and Immigration Agency	238,345	124,710
Identity and Passport Service	774,436	104,453
Total	2,003,411	232,287

Departmental Responsibilities

Mr. Maude: To ask the Secretary of State for the Home Department how many reviews of regulation her Department and its agencies have conducted or commenced since July 2007; and in which areas. [210840]

Mr. Byrne: The Government's approach to post-legislative scrutiny was set out by the Leader of the House of Commons in "Post-legislative Scrutiny - The Government's Approach" (Cm 7320) published in March 2008. The Home Office is following this new systematic process to post-legislative scrutiny. Reviews that are undertaken under the new process will, where necessary, be submitted to the Home Affairs Select Committee and copies made available on the Home Office website. In addition, the revised impact assessment (IA) process has increased the focus on post implementation reviews, with each individual IA setting out when the policy would be reviewed.

Departmental Sick Leave

Mr. Hoban: To ask the Secretary of State for the Home Department how many working days were lost by her Department due to stress-related illness in each of the last 24 months. [198947]

Mr. Byrne: 31,194 days were lost during 2006-07, and 36,877 days lost from 2007-08.

In 2006-07, the Home Office HQ included the following departments: Communities Group, that National Offender Management Services and the Office for Criminal Justice Reform which have now all transferred out. It is important to note NOMS and OCJR left in May 2007 to join Ministry of Justice, and therefore have been included for the month of April 2007. Communities Group transferred to DCLG in May 2006.

The information has been drawn from the Home Office personnel system (Adelphi). Calculations are based on a 12-month rolling period as monthly calculations are not an accurate representation of working days lost.

Departmental Surveys

Mr. Ruffley: To ask the Secretary of State for the Home Department how many staff surveys her Department has undertaken in the last 12 months; and at what cost. [219153]

Mr. Byrne: The Home Office headquarters and the United Kingdom Border Agency conducted a joint staff survey in February 2008. This is the only full staff

survey they have conducted since 2005. The 2008 survey cost a total of £66,338.64 which includes reprographics.

The Criminal Records Bureau conducted a staff satisfaction survey in September 2007 and it cost £25,180.

The Identity and Passport Service have not conducted a survey in the last 12 months.

Departmental Telephone Services

Julia Goldsworthy: To ask the Secretary of State for the Home Department what information her Department collects and monitors in relation to the telephone contact centres for which her Department is responsible. [166551]

Mr. Byrne: The information is as follows:

Contact centre	*Purpose*	*Information collected and monitored*
Ashby-de-la-Zouch (Leicestershire)	IPS—Call arrangements are for customer inquiries and appointment bookings—also e-mail inquiries such as progress chasers, customer complaints and requests for passport application packs	Information is collected and monitored relating to performance against contractual targets. Information is also collected on the types of general queries being asked by the public
Bangor (Northern Ireland)	IPS—Call arrangements are for customer inquiries and appointment bookings—also e-mail inquiries such as progress chasers, customer complaints and requests for passport application packs	Information is collected and monitored relating to performance against contractual targets. Information is also collected on the types of general queries being asked by the public
Bristol	IPS—Call arrangements are for customer inquiries and appointment bookings—also e-mail inquiries such as progress chasers, customer complaints and requests for passport application packs	Information is collected and monitored relating to performance against contractual targets. Information is also collected on the types of general queries being asked by the public
Home Office public Switchboard	Deals with non-specific callers (those who do not have a name/ extension number)	The Home Office public switchboard collects information on the subject of the call, the number of calls and the number of calls responded to within published targets
Immigration Enquiry Bureau (IEB)	BIA—Deals with inquiries from the public relating to general immigration issues, requests for progress on individual cases and requests for immigration application forms	Number of call attempts, number of calls answered, number of calls abandoned, calls abandoned while waiting to be answered, number of calls abandoned following information messages. The average time to answer a call and the average length of a call
Sheffield CC	BIA—inquiries on all work permit schemes and programmes and provides advice to employers on recruiting non-UK nationals	1 per cent. of all calls are monitored for quality purposes
Liverpool CC	BIA—Deals with general inquiries about citizenship and right of abode, requests for progress on individual cases and requests for application forms	Call centres are measured on the number of calls answered against demand on a daily, weekly, monthly basis and on the quality of service provided. 1 per cent. of all calls are monitored for quality purposes
Evidence and Inquiry	BIA—Deals with a range of inquiries from other Crown Agencies	Facilities in place to record calls—also reports weekly and monthly on a number of quality fronts including one to one sessions with staff and dealing with complaints when received
MP's Hotline	BIA—Deals with MP's House of Lords, European Parliament and members of the Scottish Parliament and devolved Assemblies	Performance measured on calls answered against demand on a daily basis and reports management information weekly to managers
CRB Contact Centre	Deals with the receipt of telephone calls from applicants, organisations, registered bodies (through whom applicants submit their applications) and other third parties.	Time taken to answer calls, percentage of calls answered within 20 seconds, average time to answer calls in seconds, abandoned calls, percentage of calls terminated by the caller, phone contact availability for all lines, percentage of time (during the opening hours of the centre) with all lines unavailable, phone contact availability for a specific phone. Percentage of time during the opening hours of the contact centre
Adelphi Service Centre	Deals with invoice payments, expense payments, Adelphi password resets and general assistance	The business is based on transactional processing for invoices and expense claims. Support is also offered around the Adelphi System dealing with general inquiries and password resets. This is monitored through contractual service levels and KPI's

Julia Goldsworthy: To ask the Secretary of State for the Home Department how much each telephone contact centre for which her Department is responsible has *(a)* cost and *(b)* generated in income in each financial year since their establishment. [166552]

Mr. Byrne: The information is in the following table.

Contact centre	*Purpose*	*Cost*	*Generated income*
Ashby-de-la-Zouch (Leicestershire)	IPS—Call arrangements are for customer inquiries and appointment bookings—also e-mail inquiries such as progress chasers, customer complaints and requests for passport application packs.	From 2001 to 2006 an average of £7.5 million per annum for call handling and fulfilment services (includes all IPS contact centres).	Average generated income from 2001 to 2006 is approximately £308,000 from 0870 numbers.

Contact centre	Purpose	Cost	Generated income
Bangor (Northern Ireland)	IPS-As above	As above	The above figure applies to all IPS contact centres
Bristol	IPS-As above	As above	As above
Home Office public switchboard	Deals with non-specific callers (those who do not have a name/ extension number).	The switchboard is run internally at an annual staff cost of £90,000.	No income
Immigration Enquiry Bureau (IEB)	BIA—Deals with inquiries from the public relating to general immigration issues, requests for progress on individual cases and requests for immigration application forms.	Bespoke financial info is not available for previous years on the call centres, since their annual cost was previously amalgamated with other non-call centre activities.	April 2002 to March 2003—£88,333.00 April 2003 to March 2004—£97,212.00 April 2004 to March 2005—£108,151.00 (This applies to all BIA contact centres)
Sheffield CC	BIA—Deals with inquiries on all work permit schemes and programmes and provides advice to employers on recruiting non UK nationals.	The expected running cost for the financial year for 2007-08 is £1.34 million	As above
Liverpool CC	BIA—Deals with general inquiries about citizenship and right of abode, requests for progress on individual cases and requests for application forms.	The expected running cost for the financial year for 2007-08 is £1.44 million	As above
Evidence and Enquiry	BIA—Deals with a range of inquiries from other Crown Agencies.	The expected running cost for the financial year for 2007-08 is £1.59 million	As above
MP's Hotline	BIA—Deals with MP's House of Lords, European Parliament and Members of the Scottish Parliament and devolved assemblies. Deals with a range of inquiries.	The expected running cost for the financial year 2007-08 is £530,000.	As above
CRB Contact Centre	Deals with the receipt of telephone calls from applicants, organisations, registered bodies (through whom applicants submit their applications) and other third parties.	There is no separate charge for the call centre—it is wrapped up in the-overall service.	No income
Adelphi Service Centre	Deals with invoice payments, expense payments, Adelphi password resets and general assistance.	Cost for 2006-07 financial year is £349,789.00.	No income

Departmental Written Questions

David Simpson: To ask the Secretary of State for the Home Department how long on average her Department took to answer *(a)* ordinary written and *(b)* named-day questions in each of the last three years. [215465]

Mr. McNulty: The information for each member could be obtained only at disproportionate cost.

However, a manual check of the parliamentary questions database showed that it took on average, 11 days to answer written questions tabled by the hon. Member for Upper Bann from the start of the 2007-08 session to the 3 July 2008.

Deportation

Pete Wishart: To ask the Secretary of State for the Home Department what the cost to her Department and its agencies was of employing private security firms to enforce deportation orders in each of the last five years. [220208]

Mr. Byrne: The UK Border Agency has approved four contractors to carry out enforcement of deportation. One of these companies operates the main contract and three are appointed from an approved list on a case by case basis in the event that the main contractor staff are fully deployed and additional capacity is required. The reason UK Border Agency outsources these services is because it does not have the expertise and staffing resources in-house.

The costs of employing private security firms to enforce deportation orders in each of the last five years are:

	£ million
2007-08	10.43
2006-07	9.15
2005-06	7.13
2004-05	4.92
2003-04	3.97

Pete Wishart: To ask the Secretary of State for the Home Department how many *(a)* complaints and *(b)* claims have been made against her Department and its agencies and contractors, as a result of alleged injuries and assaults sustained during the enforcement of deportation orders in each of the last five years, broken down by (i) sex, (ii) age, (iii) nationality and (iv) location of alleged incident. [220209]

Mr. Byrne: We do not differentiate between the enforcement of deportation orders and other removals under immigration powers. The information requested is not collated in this format, and could be obtained only at disproportionate cost.

Pete Wishart: To ask the Secretary of State for the Home Department which private security firms her Department has approved to carry out enforcement of deportation orders; which have been contracted to perform such duties; and what the financial value of each such contract will be in each of the next five years. [220268]

Mr. Byrne *[holding answer 21 July 2008]:* The UK Border Agency has a current contract with G4S to carry out enforcement of deportation. Additional firms are approved and used as required on case by case basis to provide capacity over and above the contract. Owing to the commercial nature of these contracts, if we were to release the information requested on the financial value of each such contract, in each of the next five years this would be likely to prejudice the commercial interests of both the UK Border Agency and those companies with whom the UK Border Agency enters into contracts. In view of the fact that the current contract with G4S is in the process of being re-tendered to release this information may prejudice the procurement process.

Deportation: Iran

David Heyes: To ask the Secretary of State for the Home Department if she will suspend the return to Iran of Iranian nationals who are converts to christianity and who have been denied asylum in the UK in light of the consideration by the Iranian Government of a mandatory death sentence for apostasy from Islam. [220170]

Mr. Byrne *[holding answer 21 July 2008]:* We only enforce the return of individuals, including christian converts from Iran, whom we, and the independent immigration judges, are satisfied are not in need of protection.

Each case is carefully considered on its individual merits against the background of the 1951 UN refugee convention and the latest available country information. We do not accept that each and every asylum seeker who presents themselves as being from a particular country or religion, regardless of their individual circumstances, should automatically be afforded protection in the UK.

Detention Centres

Tom Brake: To ask the Secretary of State for the Home Department how many *(a)* families and *(b)* people in such families have been detained in immigration removal centres in (i) each year from 1997 to 2007 and (ii) each month in 2008 for which data is available. [219417]

Mr. Byrne: The historical information requested could be obtained only by the detailed examination of individual case records at disproportionate cost.

We can provide local management information on the number of family units taken into detention from 31 March 2006 to date:

Period	*Number of family units entering detention*
31 March 2006 to 29 March 2007	894
30 March 2007 to 3 April 2008	825
4 April 2008 to 1 May 2008	50
2 May 2008 to 29 May 2008	60
30 May 2008 to 26 June 2008	64
27 June 2008 to 10 July 2008	28

The figures may include families detained on more than one occasion, do not constitute part of the national statistics and are based solely on locally researched management information. This information has not been quality assured under national statistics protocols and should be treated as provisional.

We do not hold local management information on the number of family members entering detention.

Quarterly data are published in the asylum statistics United Kingdom quarterly publications, showing the number of people detained solely under Immigration, Asylum and Nationality Act 2006 powers on the last Saturday of each quarter. Statistics on the total number of persons recorded as being removed from the UK upon leaving detention each quarter are also published.

Copies of the aforementioned publications are available from the Library of the House and the Home Office research, development and statistics directorate website at:

http://www.homeoffice.gov.uk/rds/immigration-asylum-stats.html.

Domestic Violence

Margaret Moran: To ask the Secretary of State for the Home Department if she will publish the minutes of the ministerial action group on domestic violence on a regular basis. [218911]

Mr. Coaker: We do not publish the minutes of the inter-ministerial group on domestic violence (set up in 2003). This is because the minutes often record the considerations made when formulating and developing Government policy. Any premature disclosure may result in closing off alternative decisions or courses of action.

A report on the progress made against the national domestic violence delivery plan, which the IMG oversees, is published annually. The annual reports for 2005-06 and 2006-07 are on the website and the report for 2007-08 will be published shortly.

Driving Offences: Fines

Mr. Ruffley: To ask the Secretary of State for the Home Department how many drivers were fined for speeding in England and Wales in each year since 1997, broken down by police force area; and how much was received in fines in each area in each year. [219057]

Mr. Coaker: Information on the total revenue from speed limit convictions is not collected centrally.

Available information relates to the number of fixed penalties issued and the number of fines imposed by the courts. This information is given in the following tables. The fixed penalty level is £60, the maximum fine is Level three (£1000)

Not all fines and fixed penalties will have been paid.

2007 data will be available later this year.

Table A: Number of fines[1] [2] imposed at magistrates courts for speed limit[3] offences by police force area, England and Wales, 1997-2006

Police force area	*1997*	*1998*	*1999*	*2000*	*2007*

[1] May include cases where a fixed penalty notice was issued and not paid and referred to court.
[2] Magistrates courts data only. Fines given at the Crown court total nationally (England and Wales) less than 20 each year.
[3] Offences under the Road Traffic Regulation Act 1964 and the Motor Vehicles (Speed Limits on Motorways) Regulations 1973.

Notes:
1. It is known that for some police force areas, the reporting of court proceedings in particular those relating to summary motoring offences are less than complete.
2. Every effort is made to ensure that the figures presented are accurate and complete. However it is important to note that these data have been extracted from large administrative systems generated by the courts and police force. As a consequence, care should be taken to ensure data collection processes and their limitations are taken into account when those data are used.

[1] Only covers notices paid where there be no further action.
[2] Offences under the Road Traffic Regulation Act 1964 and the Motor Vehicles (Speed Limits on Motorways) Regulations 1073.
[3] Revised since original publication following amendments received from forces.
Note:
Every effort is made to ensure that the figures presented are accurate and complete, however it is important to note that these data have been extracted from large administrative systems generated by police forces. As a consequence, care should be taken to ensure data collection processes and their limitations are taken into account when those data are used.

Entry Clearances: Foreign Workers

Damian Green: To ask the Secretary of State for the Home Department how many staff her Department employs processing applications for licences to sponsor migrants; and what she expects the average processing time to be for an application made in *(a)* May, *(b)* June, *(c)* July, *(d)* August, *(e)* September, *(f)* October, *(g)* November and *(h)* December 2008. [208990]

Mr. Byrne: In total 50 staff will consider applications for sponsor licensing.

No service level agreements for processing applications have been agreed. We will however shortly publish "Service Level Agreements", which will provide key stakeholders with the assurance that their applications will be dealt with in a timely manner.

Entry Clearances: Iran

Mr. Lancaster: To ask the Secretary of State for the Home Department how many applications for visas from Iranian citizens have been made in each of the last 36 months; and what percentage of applications in each month was successful. [219629]

Mr. Byrne *[holding answer 17 July 2008]:* The information requested is given in the following table.

	Applications received from Iranian citizens	*Percentage issued*
July 2005	4,788	76.7
August 2005	4,360	80.0
September 2005	2,750	84.4
October 2005	2,729	85.5
November 2005	2,869	88.0
December 2005	2,659	88.2
January 2006	2,464	91.2
February 2006	3,409	83.9
March 2006	3,712	91.1
April 2006	3,107	93.1
May 2006	5,148	84.8
June 2006	4,960	89.8
July 2006	6,145	91.9
August 2006	5,783	86.0
September 2006	3,335	84.9
October 2006	3,004	84.3
November 2006	3,174	88.6
December 2006	3,015	80.3
January 2007	2,599	83.7
February 2007	3,687	81.6
March 2007	3,729	79.9
April 2007	2,738	86.7
May 2007	4,330	79.1
June 2007	4,939	83.6
July 2007	5,557	76.0
August 2007	5,550	74.0
September 2007	3,376	91.9
October 2007	2,995	75.6
November 2007	3,075	78.0
December 2007	3,014	75.6
January 2008	2,235	77.6
February 2008	3,207	74.2
March 2008	3,172	74.7
April 2008	3,441	70.2
May 2008	2,858	67.6
June 2008	5,122	67.2

Central Reference System

Entry Clearances: Overseas Students

Hugh Robertson: To ask the Secretary of State for the Home Department pursuant to the Answer of 8 July 2008, *Official Report*, column 1443W, on entry clearances: overseas students, whether her figures take account of gap year students entering the UK on *(a)* EU passports and *(b)* ancestor visas. [220804]

Mr. Byrne *[holding answer 21 July 2008]:* The numbers provided in my answer of 8 July 2008, *Official Report*, column 1443W, related only to visas issued in the entry category "Gap Year Entrant for Work in Schools". UK ancestry is a separate entry category for persons aged 17 or over who intend to take or seek employment in the UK. Persons admitted in this category are allowed to stay for an initial period of five years, after which they may apply for indefinite leave to remain. Unlike the gap year entry category, the UK ancestry route is therefore not restricted to young persons who only wish to spend a limited period of time working in the UK.

I also confirm that the numbers given do not include EU nationals who have the right of free movement and residence in all member states.

Hugh Robertson: To ask the Secretary of State for the Home Department pursuant to the answer of 8 July 2008, *Official Report*, columns 1443-4W, on entry clearances: overseas students, what allowance has been made for gap year students wishing to take a second working holiday after university. [220861]

Mr. Byrne *[holding answer 21 July 2008]:* Participants will be allowed one period of stay of up to two years under the terms of the new youth mobility scheme. Young people who have previously spent time in the UK on one of our existing youth mobility-type arrangements, except for the working holidaymaker scheme but including the gap year entrants concession, will be eligible to apply to enter under the new youth mobility scheme where they can demonstrate they meet its requirements.

Hugh Robertson: To ask the Secretary of State for the Home Department pursuant to the answer of 8 July 2008, *Official Report*, columns 1443-4W, on entry clearances: overseas students, what arrangements have been made for gap year students who are 17 years of age on entry to the UK but have their 18th birthday during their stay. [220862]

Mr. Byrne *[holding answer 21 July 2008]:* The concession for gap year entrants allows applicants to be aged 17, 18 or 19 when they apply under the concession. A participant in the scheme can enter and remain in the UK for up to 12 months on a gap year entry clearance, and this is not affected by any birthday he may have while in the UK. These conditions will continue to apply to any participants in possession of valid gap year entrant entry clearances when the scheme is abolished later this year prior to the launch of the new youth mobility scheme under the points-based system.

Entry Clearances: Pakistan

Mike Wood: To ask the Secretary of State for the Home Department how many instances of overstay were recorded against recipients of temporary visas issued in Pakistan between April 2006 and March 2007. [198342]

Mr. Byrne: No Government have ever been able to produce an accurate figure for the number of people who are in the country illegally and this includes overstayers

who have received temporary visas issued in Pakistan. By its very nature it is impossible to quantify accurately and that remains the case.

Exit controls were phased out from 1994. As part of the Government's 10-point plan for delivery, by Christmas 2008 the majority of foreign nationals will be counted in and out of the country. This will build on the successes of our early testing of the e-Borders programme (Project Semaphore) which already covers over 30 million passenger movements and has led to 18,000 alerts and more than 1,500 arrests.

This is part of a sweeping programme of reform to border protection which also includes the global roll-out of fingerprint visas, compulsory watch-list checks for all travellers from high-risk countries before they land in Britain and ID cards for foreign nationals.

Essex Police Authority

Mr. Amess: To ask the Secretary of State for the Home Department what *(a)* discussions she has had with and *(b)* representations she has received from the Essex police authority since January 2008 on the report on sustainable policing produced by the Association of Chief Police Officers and the Association of Police Authorities; and if she will make a statement. [217738]

Mr. McNulty: None. The case made in Sustainable Policing was taken into account in developing the final police grant settlement tabled by my right hon. Friend the Home Secretary on 4 February.

Essex Police Authority: Finance

Mr. Amess: To ask the Secretary of State for the Home Department how much was spent on *(a)* involuntary and *(b)* voluntary exit schemes at Essex police authority for staff at each grade in each year since 1997-98; how much is planned to be spent in 2008-09; and if she will make a statement. [217733]

Mr. McNulty: The Home Office does not hold information relating to how much was spent on exit schemes at the Essex police authority since 1997-98.

Mr. Amess: To ask the Secretary of State for the Home Department what *(a)* discussions she has had with and *(b)* representations she has received from the Essex police authority on (i) overspend and (ii) underspend by the authority since January 2008; what reply was given to such representations; and if she will make a statement. [217739]

Mr. McNulty: We have not received any representations nor held any discussions with Essex police authority on overspends or underspends.

Decisions on the distribution of resources are matters for the chief officer and the police authority. It is a legal requirement for the police authority to set balanced budgets taking into account any use of reserves.

Essex Police Authority: Job Satisfaction

Mr. Amess: To ask the Secretary of State for the Home Department what assessment she has made of levels of job satisfaction of Essex police authority's staff in each year since 1997; what assessment she has made of trends in such levels; if she will place in the Library copies of such assessments; and if she will make a statement. [217736]

Mr. McNulty: The Home Office does not hold information relating to the levels of job satisfaction of Essex police authority's staff.

Essex Police Authority: Manpower

Mr. Amess: To ask the Secretary of State for the Home Department how many *(a)* police officers and *(b)* civilian staff were employed by Essex police authority and its predecessor bodies in (i) 1979, (ii) 1989, (iii) 1999 and (iv) each year since 2001, broken down by (A) age and (B) sex. [217741]

Mr. McNulty: The available information about the number of personnel in the Essex police is set out in the following tables. Historical data on police staff at force level are not available before 1986 and were not collected by gender until 1995. Data on age are only available from March 2003 and in the format set out at the table.

Table 1: Essex police—officers and staff by gender[1]

	Police officers		Police staff	
As at 31 March	*Male*	*Female*	*Male*	*Female*
1979	2,259	202	Not available	
1989	2,496	250	[2]950.5	
1999	2,413	477	419.5	857.5
2001	2,419	468	492.5	933.0
2002	2,433	512	553.5	996.5
2003	2,413	576	602.5	1,050.0
2004	2,443	655	691.0	1,153.0
2005	2,489	701	715.0	1,218.0
2006	2,520	759	724.5	1,208.0
2007	2,468	829	729.0	1,145.5

[1] All figures are full-time equivalent.
[2] Data were not collected by gender for police staff until 1995.

Table 2: Officers and staff by age[1,2]

	2002-03	*2003-04*	*2004-05*	*2005-06*	*2006-07*
Police officers					
25 and under	353	406	460	483	517
26 to 40	1,630	1,696	1,719	1,766	1,592
41 to 55	1,046	1,048	1,080	1,105	1,267
Over 55	11	15	19	20	21
Police staff					
25 and under	203	250	235	277	235
26 to 40	614	674	678	674	606
41 to 55	722	742	768	757	785
Over 55	307	398	485	462	509

[1] As these data are not usually published they has not been subjected to the normal verification by the Home Office.
[2] Age data are by headcount and will not equate to the full-time equivalent number of officers and staff.

Essex Police Authority: Per Capita Costs

Mr. Amess: To ask the Secretary of State for the Home Department (1) how much funding was allocated per head of population to Essex police authority in 2007-08; how much is planned for 2008-09; and if she will make a statement; [217742]

(2) what the police grant funding for Essex police authority was in 2007-08; how much is proposed for 2008-09; and if she will make a statement. [217743]

Mr. McNulty: The information requested is set out in the following table.

The Government do not distribute grant to police authorities purely on the basis of population. The police funding formula uses a range of data relating to demographic and social characteristics to reflect the relative needs of each authority. Grant allocations also take into account the relative tax base of each authority. Grant allocations are stabilised by damping to limit year-on-year variations.

Essex police authority Government revenue grant allocations 2007-08 and 2008-09

	Government grant[1] (£ million)	*Resident population (Million)*
2007-08	187.91	1.66
2008-09	196.32	1.69

[1] Revenue funding includes all grants inside aggregate external finance (AEF) (i.e. revenue grants paid for councils' core services), and includes formula grant and all specific grants.

Sources:

Population: Office of National Statistics, mid year population estimates and projections.

Grants: DCLG

Essex Police Authority: Redundancy

Mr. Amess: To ask the Secretary of State for the Home Department how many staff employed by Essex police authority will be made *(a)* voluntarily and *(b)* compulsorily redundant in 2008-09; and what cost; and if she will make a statement. [217735]

Mr. McNulty: The Home Office does not hold information relating to how many staff employed by the Essex police authority will be made redundant (either compulsorily or voluntariiy) in 2008-09.

Essex Police Authority: Regulation

Mr. Amess: To ask the Secretary of State for the Home Department what legislation regulates Essex police authority; what amendments have been made to, and what recent representations she has received about the operation of this legislation; what *(a)* statutory instruments, *(b)* departmental circulars and *(c)* other documents she (i) has issued and (ii) plans to issue in the next 12 months consequential to the provisions of this legislation; and if she will make a statement. [217731]

Mr. McNulty: Essex police authority, like all police authorities, is regulated by the Police and Justice Act 1996, as amended, and regulations issued under the provisions of that Act. A full list of the amending Acts will be placed in the Library of the House.

I have recently issued three sets of regulations regarding police authorities, numbered 82, 312, 630 and 631 of 2008. I have also recently issued Home Office circular 004/2008 which concerns policing plans. I plan to issue two further sets of regulations in the next 12 months regarding community engagement of police authorities, and the reporting requirements for police authorities.

Documents to be placed in the Library of the House:

Acts of Parliament which have Amended the Police Act 1996

The Justices of the Peace Act 1997 inserted references to that Act in relation to Justices of the Peace

The Greater London Authority Act 1999 made amendments to establish the Metropolitan Police Authority

The Local Authorities (Functions and Responsibilities) (England) Regulations 2000 amended the way councillors are appointed to police authorities

The Insolvency Act 2000 amended the insolvency disqualification for police authority members

The Criminal Justice and Police Act 2001 amended the 1996 Act to allow for Vice-Chairmen of police authorities, to require political balance on police authorities, to dispose of the maximum age requirement for membership of police authorities and to make changes to the allowances for members of police authorities

The Police Reform Act 2002 removed the need for the Government to approve members' allowances

The Police and Justice Act 2006 amended the rules on committees of police authorities, removed the best value legislation requirements on police authorities, and enabled the Secretary of State to produce regulations regarding the functions, membership and planning process of police authorities.

Essex Police Authority: Resignations

Mr. Amess: To ask the Secretary of State for the Home Department how many officials of each grade have voluntarily ceased employment, other than through redundancy, in Essex police authority since June 2007. [217734]

Mr. McNulty: This information is not collected centrally.

Foreign Workers: Domestic Service

Mr. Steen: To ask the Secretary of State for the Home Department how many migrant domestic worker visas were issued at British embassies in each of the last three years. [197986]

Mr. Byrne *[holding answer 2 April 2008]:* The total number of domestic worker visas issued at British missions overseas in each of the last three years is as follows:

	Number
2005	17,185
2006	18,259
2007	16,906

Hezbollah

Mr. Scott: To ask the Secretary of State for the Home Department what steps she plans to take to ensure that money raised in the UK for political, social or humanitarian activities by Hezbollah is not used to fund terrorist action. [217115]

Mr. McNulty: On 2 July 2008, my right hon. Friend the Home Secretary laid a draft order that will, if approved by Parliament, proscribe Hezballah's military wing in substitution for the existing entry on the proscribed list, the 'Hezballah external security organisation'. Where allegations are made of links between a charity and terrorist activity, the Charity Commission for England and Wales will deal with them as an immediate priority. It is an operational matter for the police to investigate

any allegations that money is being raised or used for terrorist purposes, and the Charity Commission will co-operate fully with the police and other agencies in such cases.

Hunting

Mr. Ruffley: To ask the Secretary of State for the Home Department how many *(a)* charges, *(b)* prosecutions, *(c)* fines and *(d)* cautions there have been for breaches of the Hunting Act 2004 in each police force area since 2006. [219143]

Mr. Coaker: In 2006, there were 11 defendants proceeded against at magistrates courts, five defendants found guilty at all courts and five sentenced to a fine for offences under the Hunting Act 2004. There were no offenders cautioned under the Act during the period. Information for 2007 will be available in the autumn of 2008.

Identity Cards: Fess and Charges

Lynne Jones: To ask the Secretary of State for the Home Department what estimate she has made of the likely cost to the individual of *(a)* having a suitable photograph taken for and *(b)* enrolling their biometrics in the identity card scheme. [219755]

Meg Hillier: The 2008 delivery plan sets out that the Identity and Passport Service are currently looking at new ways of recording fingerprints and photographs to make it easy and convenient for individuals to be enrolled onto the national identity register. For example, we are looking to a future where the market would provide biometric enrolment services, giving citizens a choice of competing services which should maximise convenience and drive down price.

We are currently considering how best this can be provided to the highest possible security standards, through a market with competing third parties. Until this work is completed, we are unable to speculate on the final costs to individual citizens.

Illegal Immigrants

Mr. Hayes: To ask the Secretary of State for the Home Department how many people were detected trying to enter the UK illegally in each year since 1997; how many of those people subsequently claimed asylum; and how many were removed from the UK after their asylum claim was rejected. [167717]

Mr. Byrne: The information about the number of people who were detected trying to enter the UK illegally prior to 2002 is not available due to a change in our data collection systems in 2003. Official figures for 2007 are not yet available.

Locally collated management information for the period 2003 to 2006 is provided in the following tables. The figures include all those illegal entrants detected at ports of entry.

Between 2003 and 2006, 5,917 people were detected trying to enter the UK illegally, or seeking to enter illegally, while during the same period nearly 48,000 were detected in France and Belgium seeking to enter the UK illegally. A further 74,000 illegal entrants were prevented from flying to the UK through the combined efforts of the airline liaison officer network and respective carriers.

The additional information requested in relation to how many of these people subsequently claimed asylum and how many of those were then removed from the United Kingdom could be obtained only by the detailed examination of individual case records at disproportionate cost.

Number of people detected trying to enter the UK illegally from 2003 until 2006, broken down by port

	Total each year				
Initiating port/local enforcement office	*2003*	*2004*	*2005*	*2006*	*2003-06*
Aberdeen	0	0	0	2	2
Dorset Ports Office	0	0	18	123	141
Dover	1,690	871	661	611	3,833
Dartford	31	38	8	32	109
Harwich	31	32	32	27	122
Hull	304	186	81	45	616
Newhaven	17	71	36	26	150
Plymouth	0	0	0	2	2
Portsmouth Ports Office	0	187	108	74	369
Purfleet	14	52	1	0	67
Ramsgate	122	48	48	110	328
Sheerness	2	0	0	0	2
Tees Ports Office	53	14	6	21	94
Tilbury Ports Office	15	15	1	19	50
Tyne Commission Quay	5	15	11	1	32
Total	2,284	1,529	1,011	1,093	5,917

Notes:
1. Figures for 2003 for Portsmouth, Plymouth and Dorset were not available.
2. These data have been compiled from locally held Management Information and as such do not represent National Statistics. They may therefore be subject to change.

The number of individual attempts by people crossing the Channel illegally at the juxtaposed controls

	Total each year				
UK juxtaposed controls[1]	*2003*	*2004*	*2005*	*2006*	*2003-06*
Calais	3,236	6,189	9,746	12,508	31,679
Coquelles	3,396	2,969	2,427	2,160	10,952
Dunkerque	0	1,296	1,691	2,230	5,217
Total	6,632	10,454	13,864	16,898	47,848

[1] The UK Juxtaposed Controls figures incorporate all detections made by all agencies including Calais Chamber of Commerce (CCCI), Eamus Cork Solutions (ECS), UK Border Agency.

Number of inadequately documented passengers denied boarding from flights to UK, by carriers after reference to ALO and by carriers without reference to ALO, from 2003 until 2006

	Number
2003	16,508
2004	16,767
2005	15,255
2006	26,307
Total	74,747

There is a big increase in the figures from 2005-06. Prior to 2006 we only kept detailed denied boarding figures on ALO home locations and not the region for which they were responsible.

Mr. Jim Cunningham: To ask the Secretary of State for the Home Department what steps the Government has taken to reduce illegal immigration since 1997. [190537]

Mr. Byrne *[holding answer 29 February 2008]:* Over the last 12 months we have drawn up plans for the biggest ever shake-up of Britain's border security. This year we will make the change.

We have put in place fingerprint checks before we issue a visa anywhere in the world. We have already delivered 1.4 million sets of finger scans, generating over 14,000 hits and bringing to notice 1,255 cases of identity swaps.

In February, we introduced large on the spot fines for employers who don't make the right checks. In financial year 2006-07, there were 15 successful prosecutions including cautions under section 8, and 21 so far this financial year.

Last month we introduced the first stage of the points based system as part of a phased approach to manage the flow of migrants coming to the UK. Applicants under the points based system will earn points for their skills and the potential they show for economic success, competence in the English language and ability to support themselves and their dependents. It is a simple, transparent and objective process that enables us to ensure that only those migrants who benefit the UK can come here to work or study. So far over 1,800 applications have been received under tier 1, highly skilled migrant workers. Future tiers will include students, skilled workers, youth mobility and temporary workers.

On 1 April we launched the UK Border Agency, an organisation of 25,000 staff, with a presence in 135 countries world-wide. The new agency will protect our border with single immigration and customs checks, tackle smuggling, immigration crime and border tax fraud, and implement fast and fair decisions.

We have already had successes thanks to exporting the border. Airline liaison officers have assisted in preventing nearly 180,000 people boarding planes over the last five years. That's equivalent to about two jumbo jets a week. In 2007 our strengthening of cross channel border controls stopped 17,658 individual attempts to cross the channel illegally. Additionally at juxtaposed controls in France and Belgium we have refused over 6,000 people entry to the UK. This means the number of illegal immigrants arriving in Kent from juxtaposed locations has reduced by 86 per cent. since 2002.

Illegal Immigrants: Deportation

Mr. Garnier: To ask the Secretary of State for the Home Department by what means her Department ensures that deported convicted foreign nationals cannot return to the United Kingdom at a later date. [163352]

Mr. Byrne: The UK Border Agency maintains a database which contains information on all foreign nationals who are deported from the United Kingdom. All passengers arriving in the UK and all visa applicants are checked against this database. On the basis of that, immigration officers and entry clearance officers will make a decision (under paragraph 320(2) of the immigration rules) on entry to the UK.

Immigration

Damian Green: To ask the Secretary of State for the Home Department whether her Department plans to collect additional data from migrants via landing cards. [206844]

Mr. Byrne: A new style landing card is being phased in to reflect the changes to the UK Border Agency. This includes an extra question as to the passenger's proposed length of stay in the UK.

In addition, as the e-Borders programme rolls out, we will be collecting additional passenger information. Full details of the information to be collected by e-Borders has been outlined in schedule 1 to The Immigration and Police (Passenger, Crew and Service Information) Order 2008, which formed part of the legislative package underpinning the e-Borders programme. The order came into force on 1 March 2008, after clearing parliamentary scrutiny.

The longer term future of the landing card is under review.

Damian Green: To ask the Secretary of State for the Home Department how many legacy immigration cases were being handled by her Department on 31 March 2008. [206854]

Mr. Byrne: We have previously estimated that there are around 400,000 to 450,000 electronic and paper records, although this is difficult to assess accurately as many case records are dependants, duplicates or errors. This figure does not therefore equate to numbers of asylum applicants. Lin Homer is due to update the Home Affairs Select Committee shortly on the latest position in regard to progress.

Immigration: Children

Mr. Andrew Smith: To ask the Secretary of State for the Home Department what procedures are in place to ascertain and record the citizenship of children who *(a)* accompany foreign national parents (i) into immigration detention and (ii) upon removal from the UK and *(b)* are included in family removal directions made under section 10A of the Immigration Act 1971. [220272]

Mr. Byrne: Information relating to families and dependant children including welfare issues, preparatory and detention visits, actual detention, mitigating circumstances, absent family members, removal and citizenship is ascertained during contact management events and recorded on the recently introduced family welfare form. This information is also recorded electronically and on the family's paper file.

The general processes followed in relation to family cases are all contained within chapter 45 of the enforcement instructions and guidance. Processes concerning the setting of removal directions and actual removal under Para 9 and 10 of Schedule 2 of the Immigration Act 1971 are in chapter 47.

The enforcement instructions and guidance is available to view on the UK Border Agency external website at:

http://www.ukba.homeoffice.gov.uk/policyandlaw/guidance/enforcement/

Immigration: Police Custody

Mr. Ruffley: To ask the Secretary of State for the Home Department (1) on how many occasions the immigration service has used police cells to hold immigrants in each police force area in each year since 1997; and what the average cost of such accommodation was in each year in each police force area; [219159]

(2) what the nightly rate paid by the immigration Service for the use of police cells was to each police force in each year since 1997. [219160]

Mr. Byrne: The information requested could be obtained only by the detailed examination of individual records at disproportionate cost.

Lost Working Days

Mr. Hayes: To ask the Secretary of State for the Home Department how many working days have been lost due to industrial action by employees for which her Department is responsible in each year since 1997. [218049]

Mr. Byrne: Table 1 shows the total number of days lost due to industrial action in Home Office headquarters, UK Border Agency, Identity and Passport Service and Criminal Records Bureau in 2007 and 2008.

The Department does not hold historical information on levels of industrial action. The payroll system holds details of absence due to industrial action but it is not possible to produce accurate information prior to 2007 due to the level of payroll changes over time.

Table 1: Number of days lost due to industrial action

Period	*Number*
1 January 2007 to 31 December 2007	10,954
1 January 2008 to 30 June 2008	2,586

Members: Correspondence

Sir Gerald Kaufman: To ask the Secretary of State for the Home Department when she plans to answer the letter to her dated 29 May from the right hon. Member for Manchester, Gorton with regard to Ms Nafeesha Babri. [218872]

Jacqui Smith: I wrote to my right hon. Friend on 21 July 2008.

Migrant Workers

Damian Green: To ask the Secretary of State for the Home Department what steps she plans to take in response to the judicial review judgement CO/924/2007 on the highly skilled migrants programme; and if she will make a statement. [218910]

Mr. Byrne: We published our response to this judgment on the UK Border Agency website on 10 July:

http://www.ukba.homeoffice.gov.uk/sitecontent/newsarticles/hsmpforumjudicialreview

A copy will be placed in the House Library.

Offensive Weapons: Detection Rates

David Simpson: To ask the Secretary of State for the Home Department (1) what the percentage clear-up rate for knife crime in each region was in the last 12 months; [219860]

(2) how many people in each region of England and Wales were charged with offences relating to knife crime in each of the last three years; [219861]

(3) how many offences were committed in each region of England and Wales in which a knife was employed by the perpetrator in each of the last three years. [219864]

Mr. Coaker: It is not possible to identify those offences that are knife-related from the data centrally collected on overall recorded crime. However, since April 2007, police forces have been providing the Home Office with aggregate data on serious violence (attempted murder, grevious bodily harm and robbery) involving knives and sharp instruments. Data relating to such offences recorded during 2007-08 were published in table 3.09 of the recent "Crime in England and Wales 2007/08" statistical bulletin. A breakdown by region is shown in table A. Information about the number of persons charged and number of offences detected, or 'cleared-up', by police cannot be provided as they are not collected on the new statistical return.

Available data from the homicide index relates to offences currently recorded as homicide where the apparent method of killing was 'sharp instrument', as at 12 November 2007. Table B shows the number of such offences recorded within each region in England and Wales in the years 2004-05, 2005-06 and 2006-07, the number of these homicides with a current suspect and the number that have resulted in a homicide conviction. Figures for 2007-08 are scheduled to be published in January 2009.

Table A: Knife and sharp instrument offences[1] recorded by the police for selected offences[2], by region: England and Wales 2007-08

Region	*Number of offences*
North East	613
North West	3,709
Yorkshire and the Humber	1,629
East Midlands	1,316
West Midlands	2,826
East of England	1,112
London	7,428
South East	1,432
South West	920
Wale	897
British Transport Police	269
England and Wales	22,151

[1] Refers to the use of a knife or sharp instrument.
[2] Total of selected serious offences only: attempted murder; wounding with intent to do GBH; wounding or inflicting GBH (i.e. without intent), which includes racially or religiously aggravated wounding or inflicting GBH; robbery of business property; robbery of personal property. Other offences involving the use of a knife or sharp instrument may exist, but are not shown in this table.

Table B: Currently recorded homicides[1] where apparent method of killing is sharp instrument[2], by region: England and Wales, 2004-05 to 2006-07[3,4]

Number

	2004-05			*2005-06*			*2006-07*

[1] As at 12 November 2007; figures are revised as cases are dealt with by the police and by the courts, or as further information becomes available.
[2] Includes knives as well as other sharp instruments.
[3] Offences are shown according to the year in which the police initially recorded the offence as homicide. This is not necessarily the year in which the incident took place or the year in which any court decision was made.
[4] Data for 2007-08 are scheduled to be published in January 2009.

Olympic Games 2012: Security

Chris Huhne: To ask the Secretary of State for the Home Department (1) when the costed security plan being prepared by the Olympic security directorate will be finalised; [217319]

(2) what estimate she has made of the *(a)* total costs and *(b)* costs additional to existing budgets of providing security for the Olympic games in each year until 2012. [217320]

Jacqui Smith: A costed security plan for the London 2012 Olympic and Paralympic games will be agreed by the end of 2008. £600 million has been allocated for policing and wider security, in addition to the provision by the Olympic Delivery Authority and by the London organising committee for the Olympic games.

Overseas Students: Languages

Mr. Ellwood: To ask the Secretary of State for the Home Department what steps the Government is taking to prevent unaccredited language schools being used as avenues for illegal entry into the UK. [220547]

Mr. Byrne *[holding answer 21 July 2008]:* We have been working closely with the Joint Education Taskforce and Ofsted and from early 2009 accreditation by an independent accreditation body approved by the UK Border Agency will be required by all private education providers that recruit international students.

This means that any private college delivering English language courses to international students coming to the UK under our new Australian-style points system or in the student visitor category will need to hold independent accreditation.

The intention of demanding independent accreditation will be to assure the UK Border Agency that an institution is genuinely providing good quality education rather than offering low quality courses for the purposes of facilitating applications by bogus students.

In the interim the UK Border Agency will continue to act upon allegations and intelligence relating to English language schools that are suspected of being bogus.

Passports: Interviews

Damian Green: To ask the Secretary of State for the Home Department (1) what the cost of each of the passport interview centres was in June 2008; [218884]

(2) how many people had been interviewed at each of the passport interview centres by 30 June 2008; and what the cost per interview was for each office. [218885]

Meg Hillier: The total operating costs for the interview office network of 68 offices during June 2008 was £2.4 million, which excludes the cost of depreciation of relevant set-up capital expenditure. There are a number of central costs within the £2.4 million such as call centre appointments and IT maintenance that make it impossible to give meaningful comprehensive monthly costs for each individual office. A total of 32,792 interviews were carried out in the network during June resulting in an average cost per interview of £73.19, just below the planned figure.

Passports: Lost Property

Mr. David Hamilton: To ask the Secretary of State for the Home Department how many passports were reported lost or stolen by people aged *(a)* under 18, *(b)* between 19 and 25, *(c)* between 25 and 35, *(d)* between 35 and 45, *(e)* between 45 and 55, *(f)* between 55 and 65 and *(g)* over 65 years old in the last year for which figures are available. [217420]

Meg Hillier: Procedures and supporting systems for reporting lost, stolen and recovered British passports were introduced in December 2003. Since then the Identity and Passport Service has provided a range of management information on the number of passports that have been processed under these arrangements. In 2007 there were 251,751 reports of lost passports and 41,393 reports of stolen passports. In addition, 10,428 passports were reported under the "other" category, which includes those damaged or destroyed. The systems, however, do not capture specifically the age of the holder whose passport is reported lost or stolen.

Police Custody: ICT

Mr. Ruffley: To ask the Secretary of State for the Home Department what progress has been made on the development and provision of electronic custody systems for the police; when such systems will be available; what the expected cost of such systems is; what the cost of their development has been to date; and what the planned date was for such systems to be available. [219111]

Mr. McNulty: All forces now have an electronic custody system in use at all custody sites. 24 police forces are equipped with the national strategy for police information systems custody system. The other 19 forces have implemented alternative custody systems that conform to the same data standards.

The cost of these systems varies from force to force, depending upon the size of the force and the particular system chosen. Furthermore, some systems were deployed as part of an integrated suite of applications and so the actual cost of the custody element cannot be identified separately.

The target date for the implementation of these systems was 31 March 2008.

Police Stations: Closures

Mr. Dunne: To ask the Secretary of State for the Home Department how many police stations were closed in each police force area in each year since 1997-98. [213625]

Mr. McNulty: The management of the police estate and allocation of resources are matters for each police authority and the chief officer, who are responsible for assessing local needs.

Police: Bureaucracy

Mr. Ruffley: To ask the Secretary of State for the Home Department what percentage of time police officers spent on frontline policing duties in each police force in each year since 2001. [219117]

Mr. McNulty: The information is set out in the following table has only been collected since 2003-04. The frontline policing measure does not cover a range of essential, but not frontline activities, including time spent at court, crime prevention activities, custody duties, operational planning, call handling duties or time spent on non-incident related paperwork.

Time spent on front-line policing 2003-04 to 2006-07

Front line policing	*Baseline year 2003-04*	*2004-05*	*2005-06*	*2006-07*
Avon and Somerset	57.7	59.0	63.4	58.0

Police: Complaints

Mr. Baron: To ask the Secretary of State for the Home Department how many complaints have been made to the Independent Police Complaints Commission in each year since its establishment. [220068]

Mr. McNulty *[holding answer 21 July 2008]:* Responsibility for the collation and publication of data with regard to complaints against the police rests with the Independent Police Complaints Commission.

Police: Firearms

Mr. Ruffley: To ask the Secretary of State for the Home Department (1) on how many operations firearms were issued to police officers in England and Wales in each year since 1997; in how many of these operations weapons were discharged by police officers; and how many police officers were qualified to carry firearms in each of the last nine years; [219102]

(2) how many police officers were armed while on duty in each of the last 10 years in *(a)* England and Wales and *(b)* each police force area. [219104]

Mr. McNulty: The number of police operations in which firearms were authorised to be used in each force area since 1997, and the number of authorised firearms officers in those forces, are shown in the following tables. The number of incidents where a conventional firearm was used is also shown.

Statistics on the police use of firearms are published annually by way of a written ministerial statement. Statistics for the last five years were published in my written ministerial statement of 31 January 2008.

Number of operations in which firearms were authorised

Police: Fuels

Anne Main: To ask the Secretary of State for the Home Department (1) what assessment she has made of the effect of increases in the cost of fuel on police services in *(a)* Hertfordshire and *(b)* England and Wales; and if she will make a statement; [217236]

(2) what recent representations she has received on the effect of increases in the cost of fuel on the police service; and if she will make a statement. [217237]

Mr. McNulty: We have received no such representations.

This is an operational matter for each police authority and chief constable.

Police: Internet

Mr. Ruffley: To ask the Secretary of State for the Home Department how much was spent on the website www.police.uk in each month since its inception; what the budget for the website is for 2008-09; how many staff are employed to maintain the website; and how many unique visitors there were to the website in each month since its inception. [200378]

Mr. McNulty: The website www.police.uk/ (also known as the 'Police Portal') provided a national communications channel for the police service. The total annual cost of running this service was just under £2 million per annum. Most of the costs associated with running the portal were charged on an annual basis and there was little variation from month to month.

There is no budget for the website in 2008-09 and no staff are currently employed to maintain this website. This is because the Police Portal service ceased on 31 March 2007 when the contract with the service provider then providing the operational service came to an end.

The numbers of unique visitors per month can only be estimated. However, on the basis of the IP addresses used it is estimated that in the period from 1 January 2006 until the portal's cessation on 31 March 2007 the numbers of unique visitors were as follows:

	Number
January 2006	52,516
February 2006	46,338
March 2006	50,084
April 2006	47,775
May 2006	49,935
June 2006	47,051
July 2006	45,063
August 2006	76,386
September 2006	68,880
October 2006	57,802
November 2006	57,259
December 2006	75,101
January 2007	92,424
February 2007	84,294
March 2007	84,851

Police: North Yorkshire

Miss McIntosh: To ask the Secretary of State for the Home Department what assessment she has made of the level of provision of policing in the sparsely populated countryside of north Yorkshire; and if she will make a statement. [220018]

Mr. McNulty: The provision of policing across the force area is a matter for the chief officer and the police authority.

Police: Pay

Mr. Ruffley: To ask the Secretary of State for the Home Department what *(a)* the total and *(b)* the average overtime payments for police officers were in each police force in England and Wales for each year since 1997. [219106]

Mr. McNulty: Data on police overtime is produced by the Chartered Institute of Public Finance and Accountancy. Police officer overtime for 1997-98 to 2006-07, broken down by police force areas, is shown in table A as follows. The average overtime payment can be calculated by dividing the overtime payment by the official number of police officers for that year (using Home Office figures) and is shown in table B as follows.

Table A: Total Police Officer overtime expenditure by force, 1997-98 to 2006-07

Source:
CIPFA Police Statistics: Actuals 1997/98-2006/07, Home Office Police Officer Numbers

Police: Public Participation

Mr. Jim Cunningham: To ask the Secretary of State for the Home Department what steps the Government have taken to include the views of the public when deciding national policing priorities. [217644]

Mr. McNulty *[holding answer 10 July 2008]:* Since April there has been a neighbourhood policing team in every area—meeting the Government's commitment. Neighbourhood policing gives local communities a role in deciding policing priorities by working with them to identify and tackle local problems together, as well as providing a highly visible presence.

Both Sir Ronnie Flanagan's review of policing and the Casey review 'Engaging Communities in Fighting Crime' contain recommendations about how best to embed neighbourhood policing and ensure communities have a say in how they are policed. In the forthcoming policing Green Paper the new police pledge will take forward many of the recommendations and will set out new national standards for the police service to ensure the public receive visible, accountable and responsive policing.

Police: Road Traffic Control

Mr. Ruffley: To ask the Secretary of State for the Home Department what percentage of police resources is allocated to traffic policing in England and Wales, broken down by police force area; how many dedicated traffic police officers there were in each year since 1997, broken down by police force area; what recent discussions she has had with the Association of Chief Police Officers on the number of dedicated traffic police officers; and if she will make a statement. [219059]

Mr. McNulty: The Home Office police funding formula is designed to assess the relative need for resources between police authorities in England and Wales. The formula does not assign specific funding for any particular aspect of policing. Allocation of resources to specific areas of work within a force is a matter for the police authority and chief officer.

Available information on the number of police whose main function is traffic is in the following tables.

The Government have set implementation of the national roads policing strategy as a key action for the police in the national community safety plan. How they set about implementing the strategy is an operational matter for the police.

The Government believe, however, that it is not helpful to focus solely on numbers of dedicated traffic police: it is the most effective and efficient use of all resources that is most significant.

Police Officers (FTE)[1] whose primary function is Traffic[2] from 2002-03 to 2006-07

[1] This and other tables contain full-time equivalent figures that have been rounded to the nearest whole number. Because of rounding, there may be an apparent discrepancy between totals and the sums of the constituent items.
[2] Staff with multiple responsibilities(or designations) are recorded under their 'primary' role or function. The traffic function includes staff who are predominantly employed on motorcycles or in patrol vehicles for the policing of traffic and motorway related duties. The does not include officers employed in accident investigation, vehicle examination and radar duties.

Police: Sign Language

Mrs. Gillan: To ask the Secretary of State for the Home Department which police forces have procedures in place to provide British sign language interpreters and lipspeakers on a 24-hour basis for deaf people requiring assistance at police stations; and what steps her Department has taken to facilitate police force compliance with the requirements of the national agreement on arrangements for the use of interpreters, translators and language service professionals in investigations and proceedings within the criminal justice system, as revised in 2007. [218643]

Mr. McNulty: This information is not currently held centrally.

All chief officers of police have been issued with guidance on the use of the national agreement.

ACPO is aiming shortly to write further reminding forces of interpreting requirements for those requiring lip speakers and British Sign Language services. This is being done in partnership with the Office of Criminal Justice Reform, who are preparing an additional leaflet of guidance in respect of deaf people in the criminal justice system.

Police: Standards

Mr. Ruffley: To ask the Secretary of State for the Home Department what the salary and wage costs were of *(a)* Her Majesty's inspectorate of constabulary, *(b)* the National Police Improvement Agency, *(c)* the Police Standards Unit and *(d)* the Independent Police Complaints Commission in each year since their inception; and how many staff worked in each organisation in each year. [219113]

Mr. McNulty: The information is as follows:

Her Majesty's Inspectorate of Constabulary (HMIC)

	Total staff	Total pay costs (£ million)
2007-08	145	8.8
2006-07	137	8.9
2005-06	129	7.1
2004-05	128	7.0
2003-04	128	6.1
2002-03	—	5.8
2001-02	—	5.6
2000-01	—	4.5
1999-2000	—	3.7
1998-99	—	3.7
1997-98	—	3.9

Notes:
1. The first HMIs appointed under the provisions of the County and Borough Police Act 1856, however, numbers prior to 1997-98 are not readily available.
2. HMIC have been unable to provide complete staff numbers within the timeframe as a change in IT systems has meant data are not readily available prior to 2003-04.
3. Total staff numbers include HO and seconded staff.
4. Pay costs rose significantly with effect from 2006-07 as a result of changes to the funding of police officer pensions.

National Policing Improvement Agency (NPIA)

	Total staff	Total pay costs (£ million)
2007-08	1,898	84

Notes:
1. The NPIA was established by the Police and Justice Act 2006 and began its work in April 2007.
2. Staffing numbers include permanent NPIA staff, police, civilian and other secondees, along with contractors, agency and consultants.

Police Standards Unit (PSU)

	Total staff	Total pay costs (£ million)
2007-08	[illegible]	[illegible]

Police Standards Unit (PSU)

	Total staff	Total pay costs (£ million)
2006-07	22	2.5
2005-06	58	3.1
2004-05	59	3.6
2003-04	66	2.8
2002-03	[2]	[2]
2001-02	29	0.645

[1] In July 2007 the Police Standards Unit merged with the Partnership Performance Support Unit to form the Police and Partnership Standards Unit (PPSU). The rationale for the merger is explained in the PCSD Director's Report 2006-07. The complement for the PPSU in 2007-08 was 33 and the total pay costs were approximately £2.3 million.
[2] Unavailable.
Note:
The budget and staffing data for PSU is managed at directorate level along with a number of other Home Office units. The figure for 2006-07 only is disaggregated, all the rest include the other units.

2001-02

In response to a Parliamentary question on 17 June 2002 we stated that the costs from 1 July 2001 to 17 June 2002 were £709,000. So an estimate for the financial year 2001-02 would be £645,000.

2002-03

We have been unable to locate data for 2002-03 within the timeframe available as data are stored on an old financial system.

2003-04 to 2005-06

These figures include the police performance and framework team including iQuanta, and the policy team, which from 2006-07 were counted as separate units.

Independent Police Complaints Commission (IPCC)

	Total staff	Total pay costs (£ million)
2007-08	398	19.1
2006-07	415	20
2005-06	352	16.1
2004-05	208	12.5

Notes:
1. The IPCC became operational on 1 April 2004.
2. The figures in the table are taken from the 2007-08 annual accounts to be laid before Parliament.
3. The figures for pay cost include pension and social security costs.
4. Staff costs and figures include agency staff, seconded staff and commissioners; staff numbers are average.

Police: Stun Guns

Mr. Ruffley: To ask the Secretary of State for the Home Department what plans she has to extend the use of tasers nationwide. [219101]

Mr. McNulty: Following a trial in five forces in 2003, chief officers of all forces in England and Wales have been able to make the tasers have available to authorised firearms officers (AFO) as a less lethal alternative for use in situations where a firearms authority has been granted in accordance with criteria laid down in the ACPO manual of guidance on police use of firearms.

Following a request by the Association of Chief Police Officers (ACPO), tasers have been deployed since July 2007 by AFO's beyond situations in which a firearms authority has been granted. In these cases, officers would be facing violence or threats of violence of such severity that they would need to use force to protect the public, themselves and/or the subject(s).

My right hon. Friend the Home Secretary also agreed to a 12-month trial, from 1 September 2007, in 10 selected forces of use of tasers in similar circumstances by specially trained units who are not authorised firearms officers. The Home Office and ACPO will be conducting thorough assessments of the trial and seeking independent medical advice before any further decision on the extension of Taser is taken.

Schengen Agreement

Mr. Hayes: To ask the Secretary of State for the Home Department what UK participation there will be in the Schengen information system II programme. [214157]

Meg Hillier: The Government are fully committed to the UK's participation in the second generation Schengen Information System (SIS II). In order to preserve our border controls, the UK does not participate in Schengen visa and immigration measures. This means that the UK will not have access to information on SIS II relating to third country nationals refused entry to the Schengen area. However, the UK will participate in all other SIS II measures. The information available via SIS II will allow UK law enforcement officers to locate missing persons, criminals and stolen property from across the EU, increasing our opportunities to deal with cross-border crime.

Surveillance: Local Authorities

Mr. Pickles: To ask the Secretary of State for the Home Department pursuant to the answer of 22 May 2008, *Official Report*, columns 477-78W, on surveillance: local authorities, how many cases the Investigatory Powers Tribunal has investigated *(a)* in total and *(b)* in relation to complaints against the use of surveillance by local authorities since its establishment. [217936]

Mr. McNulty *[holding answer 10 July 2008]:* The Investigatory Powers Tribunal has issued determinations in respect of 554 complaints from 2 October 2000 to 31 December 2006, the most recent period for which published reports are available. Figures for 2007 are due to be published shortly. It is not the tribunal's practice to publish more detailed breakdowns by type or body of complaint, in order to preserve the confidence of people using it that their complaint will be handled confidentially. The Investigatory Powers Tribunal is independent of Government and subject to statutory rules which prevent it from disclosing information to an extent, or in a manner, that is contrary to the public interest.

Telecommunications: Data Protection

Robert Neill: To ask the Secretary of State for the Home Department what conditions govern the access by local authorities to telecommunications data stored under the provisions of the Data Retention (EC Directive) Regulations 2007. [219214]

Mr. McNulty: The EU Data Retention (EC Directive) Regulations 2007 place an obligation on communications service providers to retain data which they acquire for lawful business purposes.

Local authorities can have access to communications data (service use and subscriber data) for the purpose of

preventing or detecting crime or preventing disorder through the provision in the Regulation of Investigatory Powers Act 2000 (RIPA) and the related statutory instruments and code of practice.

Terrorism

Mr. Paul Goodman: To ask the Secretary of State for the Home Department (1) what discussions she has had with police forces on the setting up of the Channel Project to combat violent extremism; [198654]

(2) which *(a)* organisations and *(b)* individuals she consulted on the setting up of the Channel Project to combat violent extremism. [198759]

Mr. McNulty: A range of stakeholders were involved in establishing the Channel Project. At national level these included the Association of Chief Police Officers and the Department for Communities and Local Government. At local level the police, local authorities, other service providers and community organisations were consulted.

Mr. Paul Goodman: To ask the Secretary of State for the Home Department what role her Department's Research, Information and Communication Unit has played in the development of the Channel Project for combating violent extremism. [198655]

Mr. McNulty: The Research, Information and Communications Unit has not played a role in the development of the Channel Project

Mr. Paul Goodman: To ask the Secretary of State for the Home Department what criteria she will use to determine the effectiveness of the Channel Project to combat violent extremism; and if she will make a statement. [198751]

Mr. McNulty: The Channel project will be evaluated to assess the lessons learned in setting up a partnership and the effectiveness of the referral process and interventions deployed.

Mr. Paul Goodman: To ask the Secretary of State for the Home Department how much the Channel Project to combat violent extremism has spent on community groups; and how much it plans to spend in *(a)* 2008-09, *(b)* 2009-10 and *(c)* 2010-11. [198753]

Mr. McNulty: There has been no money allocated to the Channel Project to spend on community groups.

Mr. Paul Goodman: To ask the Secretary of State for the Home Department which local community groups the Channel Project to combat violent extremism *(a)* funded in 2007-08 and *(b)* plans to fund in 2008-09; and how those groups were selected for funding. [198754]

Mr. McNulty: There has been no money allocated to the Channel Project to spend on community groups.

Mr. Paul Goodman: To ask the Secretary of State for the Home Department what the cost of the Channel Project to combat violent extremism was in 2007-08; what the cost is expected to be in *(a)* 2008-09, *(b)* 2009-10 and *(c)* 2010-11; and how those funds will be spent in each of those years. [198755]

Mr. McNulty: The cost of the Channel Project in 2007-08 was approximately £600,000. The Home Office has allocated £1 million for the project in 2008-09.

Funding for the pilot areas covers the cost of a full time co-ordinator for the project in each of the sites. Funding for future years will depend upon the scale of implementation.

Mr. Paul Goodman: To ask the Secretary of State for the Home Department how many members of *(a)* the police, *(b)* her Department's staff and *(c)* the public are employed by the Channel Project to combat violent extremism in each of the areas in which it operates; and how many people in each category will be employed by the project in (i) 2008-09, (ii) 2009-10 and (iii) 2010-11. [198756]

Mr. McNulty: In each area in which the Channel Project operates one person is employed by the police force to co-ordinate activity. In 2008-09 there are 10 areas operating the Channel Project which will extend to 20 areas by 2009. Precise roll out plans for 2009-10 and 2010-11 are under development.

Mr. Paul Goodman: To ask the Secretary of State for the Home Department which statutory agencies are taking part in the Channel Project to combat violent extremism; and if she will make a statement. [198757]

Mr. McNulty: As with other crime prevention programmes the police work with the full range of statutory partners at local level.

Mr. Paul Goodman: To ask the Secretary of State for the Home Department in which areas of the country the Channel Project to combat violent extremism *(a)* operates and *(b)* is planned to operate; and how those areas were decided upon. [198758]

Mr. McNulty: In addition to two pilot areas, in London and Lancashire, that have been operating Channel since 2007, a further eight sites, in west Yorkshire, the midlands, London and Bedfordshire, will be operational in 2008. These sites have been identified through an assessment of local factors, such as strength of partnership working, and the presence of other funding like the Preventing Violent Extremism funding distributed by the Department of Communities and Local Government.

Terrorism: Departmental Coordination

Mr. Paul Goodman: To ask the Secretary of State for the Home Department what recent discussions she has had with the Secretary of State for Communities and Local Government on the development of the Channel Project to combat violent extremism. [198752]

Mr. McNulty: My right. hon. Friends the Home Secretary and the Secretary of State for Communities and Local Government meet frequently to discuss progress

on Preventing Violent Extremism. Officials in both departments regularly discuss and review progress on the Channel Project.

UK Border Agency: Property

Damian Green: To ask the Secretary of State for the Home Department what property was *(a)* lost at and *(b)* stolen from the UK Border Agency and its predecessors in each year since 1997; and what the cost of replacement was. [212356]

Mr. Byrne: Property lost or stolen from the UKBA and its predecessors for the period 2007-08 to 2003-04 is set out in the following table.

Information prior to 2003-04 could be provided only at disproportionate cost.

The agency has guidelines which should be followed in the event of a theft or loss. All reported thefts or losses are investigated and appropriate action is taken in the light of these investigations.

Known values of property lost or stolen

Financial year	*Lost items*	*Stolen items*
2007-08	3,842	3,126
2006-07	4,996	2,830
2005-06	3,281	3,265
2004-05	3,226	n/k
2003-04	4,950	n/k

Vetting

Mr. Ruffley: To ask the Secretary of State for the Home Department how many and what proportion of record checks processed by the Criminal Records Bureau in each year since 2002 had comments from chief police officers on otherwise clean reports, broken down by police force area. [220915]

Meg Hillier: I refer the hon. Member to the reply given to the hon. Member for Eastleigh (Chris Huhne) on 2 June 2008, *Official Report*, column 748W.

Vetting: Young People

Mr. Ruffley: To ask the Secretary of State for the Home Department how many persons under the age of 18 years have been the subject of Criminal Records Bureau checks in the latest period for which figures are available. [219175]

Meg Hillier: During the financial year 2007-08 the Criminal Records Bureau has issued 92,717 disclosures to applicants under the age of 18 years.

Work Permits: Wales

Mrs. Gillan: To ask the Secretary of State for the Home Department how many workers, issued with clearance by the Security Industry Authority, but without the right to work in the UK have been found to be working in Wales. [218776]

Mr. Byrne: Fewer than three workers issued with clearance by the Security Industry Authority but without the right to work in the United Kingdom have been found working in Wales. The data provided is management information. It may be subject to change and does not represent published national statistics.

Our plans for enforcing the immigration laws in the United Kingdom's communities were published on 19 June 2008 in our enforcement business plan. This outlines our programme for delivery and reform in our enforcement business over the next year—removing those who have no right to be here or pose a threat to the UK, targeting the most harmful.

Yarl's Wood Detention Centre: Pregnant Women

Harry Cohen: To ask the Secretary of State for the Home Department what reports or complaints her Department has been informed of regarding pregnant women at Yarl's Wood immigration removal centre receiving inadequate treatment for their condition. [220903]

Mr. Byrne: Statistics indicate that only one official complaint regarding a pregnant woman at Yarl's Wood has been received in 2008 and this related to the food provided at the centre. Data is not collected in respect of unofficial reports.

Young Offenders: Re-offenders

Mr. Ruffley: To ask the Secretary of State for the Home Department (1) what the average number of days from arrest to sentence in cases involving persistent young offenders was in each police force area in the most recent period for which figures are available; [219050]

(2) how many persistent young offenders were registered in each police force area in each year since 1997; how many offences were recorded in each area where the offender was a persistent young offender in each of those years; and what percentage of total offences this represented in each year, broken down by police force area. [219055]

Mr. Hanson: I have been asked to reply.

A persistent young offender (PYO) is a young person aged 10-17 who has been sentenced guilty by any criminal court in the UK on three or more separate occasions for one or more recordable offence, and within three years of the last sentencing occasion is subsequently arrested or has an information laid against them for a further recordable offence.

This definition was designed to monitor the pledge to halve the average time from arrest to sentence for dealing with PYOs in England and Wales from 142 days in 1996 to 71 days. This pledge was first met over a full calendar year in 2002 and has been met in all but one calendar year since then. It is important to note that the definition was not designed to monitor overall levels of youth crime.

Table 1 shows the number of PYOs, and the number of offences committed by them, for each police force area from 1997 to 2007.

Young offenders are now being dealt with twice as quickly as they were prior to 1997, which means that there are much shorter intervals between sentencing occasions for those youths who repeatedly offend. Youth

sentencing is therefore more timely, and for repeat offenders more frequent, than it used to be prior to 1997.

Table 2 shows the total number of notifiable offences brought to justice, and the proportion of them that are attributable to PYOs, for each police force from 2000 to 2006 (the only years for which this data is available).

The Ministry of Justice publishes monthly National Statistics on the average number of days from arrest to sentence for PYOs at the following web address:

www.justice.gov.uk/publications/averagetimearresttosentencepyo.htm

Table 1: Number of Persistent Young Offenders (PYOs) and number of offences committed by PYOs, by police force area, 1997 to 2007

TREASURY

Assets

Mr. Hoban: To ask the Chancellor of the Exchequer what were *(a)* the number of disposals, *(b)* the disposal values, *(c)* the chargeable gains net of in-year losses before the deduction of taper relief and *(d)* the chargeable gains net of both in-year losses and the deduction of taper relief were for assets held up to (i) six months, (ii) one year, (iii) two years, (iv) three years, (v) four years, (vi) five years, (vii) 10 years and (viii) over 10 years for (A) business assets and (B) non-business assets in each year since 1997. [162981]

Jane Kennedy: The following table provides a breakdown of disposals and chargeable gains. This does not include information for assets that changed type or where disposals resulted in a capital loss. Figures for earlier years are available only at disproportionate cost.

Numbers (thousand), amounts (£ million)

Range of holding period	*Business assets*				*Non business assets*

Bank of Credit and Commerce International

Mr. Austin Mitchell: To ask the Chancellor of the Exchequer which parts of the Sandstorm report have been released by his Department to the US authorities. [192011]

Angela Eagle: The information requested could be provided only at disproportionate cost.

Capital Gains Tax

Mr. Hoban: To ask the Chancellor of the Exchequer what *(a)* the number of gains, *(b)* the amount of gains and *(c)* the amount of tax paid were on capital gains between (i) £1 and £9,999, (ii) £10,000 and £24,999, (iii) £25,000 and £99,999, (iv) £100,000 and £249,999, (v) £250,000 and £499,999, (vi) £500,000 and £999,999 and (vii) £1,000,000 and above for (A) business assets and (B) non-business assets in each year since 1997. [162982]

Jane Kennedy: The following table provides a breakdown of disposals and chargeable gains. It is not possible to attribute amounts of tax to separate disposals. Figures for earlier years are available only at disproportionate cost.

Numbers (thousand) amounts (£ million)

Child Tax Credit

Mrs. Riordan: To ask the Chancellor of the Exchequer what recent assessment he has made of the effect of child tax credit on the economy. [219984]

Jane Kennedy: Tax credits provide support to 20 million people including six million families and 10 million children. They have helped increase the number of people in work by almost three million since spring 1997, and since 1997 unemployment has reduced by 400,000. They have also helped lift 600,000 children out of relative poverty since 1996-97.

Civil Service: Pay

Chris McCafferty: To ask the Chancellor of the Exchequer whether he plans to undertake a comprehensive review of civil service pay arrangements. [221510]

Yvette Cooper: The Government's policy on civil service pay is reviewed annually, and is set out in the civil service pay guidance.

Common Agricultural Policy

Mr. Hoyle: To ask the Chancellor of the Exchequer if he will hold discussions with the National Farmers' Union on his policy for the EU to remove import tariffs on food and abolish the Common Agricultural Policy. [210294]

Angela Eagle *[holding answer 11 June 2008]:* As the Chancellor of the Exchequer set out in his letter to the EU Commission,

"It is unacceptable, that at a time of significant food price inflation, the EU continues to apply very high import tariffs to many agricultural commodities. The Commission should give urgent consideration to extending the suspension of import tariffs that apply to other agricultural commodities"

Treasury Ministers and officials have discussions with a wide variety of organisations in the public and private sectors as part of the process of policy development and delivery. As was the case with previous Administrations, it is not the Government's practice to provide details of all such discussions.

Council Tax

Mr. Pickles: To ask the Chancellor of the Exchequer pursuant to the answer of 20 May 2008, *Official Report*, column 206W, on council tax, how many notification changes have been made to the council tax list with a code of CL26 in *(a)* each year from 2003 to 2005 and *(b)* 2006-07. [218261]

Jane Kennedy: The number of properties, in England, reviewed and cleared with notification change code CL26 is shown as follows.

	Number
2003-04	36,652
2004-05	29,928
2005-06	31,147
2006-07	39,017

Mr. Pickles: To ask the Chancellor of the Exchequer pursuant to the answer of 20 May 2008, *Official Report*, column 206W, on council tax, what proportion of the changes were made following *(a)* discovery of an error by the agency and *(b)* representations from householders. [218277]

Jane Kennedy: Approximately 57 per cent. of the alterations were made following banding alterations to nearby dwellings and approximately 43 per cent. were made following representations being made by householders.

Council Tax: Valuation

Mr. Pickles: To ask the Chancellor of the Exchequer pursuant to the answer of 14 May 2008, *Official Report*, column 1622W, on council tax: valuation, if he will place in the Library a copy of the business case prepared for the council tax banding support tool. [218315]

Jane Kennedy: A copy of the business case cannot be placed in the Library as it contains commercially confidential information in connection with third party contractors and is subject to the development of ongoing operational policy.

Mr. Pickles: To ask the Chancellor of the Exchequer pursuant to the answer of 7 July 2008, *Official Report*, column 1349W, on Council Tax: Valuation, whether the automated valuation model is used by the Valuation Office Agency in England to value properties, in addition to the council tax banding support tool. [221282]

Jane Kennedy: In addition to the use of the banding support tool to support current council tax list maintenance, the Valuation Office Agency is using automated valuation technology to provide value estimates to assist with other valuation activities.

Departmental Accountancy

Mr. Letwin: To ask the Chancellor of the Exchequer if he will place in the Library a copy of his Department's Combined Online Information System standard chart of accounts. [210999]

Yvette Cooper: A copy of the Combined Online Information System (COINS) Standard Chart of Account, showing each current code and associated description, has been placed in the Library.

Mr. Letwin: To ask the Chancellor of the Exchequer if he will place in the Library a copy of his Department's Combined Online Information System programme objectives and descriptions. [211000]

Yvette Cooper: A copy of the Department's Combined Online Information System (COINS) programme objects, including descriptions, has been placed in the Library.

Departmental Appeals

Andrew Mackinlay: To ask the Chancellor of the Exchequer on how many occasions his Department has instructed the Treasury Solicitor to seek leave to appeal to the House of Lords from *(a)* the Court of Appeal and *(b)* the House of Lords itself in each of the last 10 years; and on how many occasions the application was rejected. [220827]

Angela Eagle: This information is not held centrally and could be obtained only at disproportionate cost. However, the Commissioners of Her Majesty's Treasury have not been listed as the appellant in any House of Lords case over the last 10 years.

Departmental Buildings

Mr. Hoban: To ask the Chancellor of the Exchequer which organisations have received *(a)* free and *(b)* discounted room hire from (i) his Department and (ii) its agencies in each of the last five years; and what the commercial value of the discount was in each case. [221580]

Angela Eagle: It is not the Department's policy to provide free or discounted room hire for events held in its buildings that are not related to its business.

Departmental Conferences

Mr. Hoban: To ask the Chancellor of the Exchequer what the *(a)* scheduled date and *(b)* title was of each conference proposed to be hosted by his Department and its agencies that was cancelled before taking place in each of the last 10 years; and what costs were incurred in respect of each. [215172]

Angela Eagle: The information requested could be provided only at disproportionate cost.

Departmental Information Officers

Mr. Hoban: To ask the Chancellor of the Exchequer what the average cost to his Department was of employing a press and media officer in 2007-08. [215200]

Angela Eagle: The information requested could be provided only at disproportionate cost.

Departmental Marketing

Mr. Philip Hammond: To ask the Chancellor of the Exchequer how much his Department and its agencies spent on branding and marketing activity in 2007-08. [212047]

Angela Eagle: The information requested is not readily available and could be supplied only at disproportionate cost.

Departmental Postal Services

Mr. Hoban: To ask the Chancellor of the Exchequer what steps his Department has taken to monitor the cost of its mail services in the last 12 months. [221490]

Angela Eagle: The cost of mail services is monitored on a regular basis in the same way as other departmental expenditure.

Departmental Public Participation

Mr. Hoban: To ask the Chancellor of the Exchequer what *(a)* listening exercises and *(b)* public forums his Department has held in each of the last two years; what the (i) purpose and (ii) cost was in each case; and who the private contractor was and how much it was paid in each case. [221356]

Angela Eagle: Information on the independent reviews commissioned by the Treasury is published on the Treasury's website at

http://www.hm-treasury.gov.uk/Independent_Reviews/independent_reviews_index.cfm

Mr. Hoban: To ask the Chancellor of the Exchequer what *(a)* reviews and *(b)* public consultations have been initiated by his Department since 27 June 2007. [221360]

Angela Eagle: I refer the hon. Member to the following HM Treasury website address, which directs the user to a list of all reviews and publications. This site further provides links to other consultations:

http://www.hm-treasury.gov.uk/about/information/recent_pubs.cfm

Food

Mr. Paice: To ask the Chancellor of the Exchequer (1) how much was spent by his Department on *(a)* food and *(b)* food of British origin in each of the last five years; [214897]

(2) from which five countries of origin the greatest amount of food was procured by his Department in the last year for which figures are available; and what the *(a)* cost and *(b)* quantity procured was in each case. [214898]

Angela Eagle: Catering facilities in 1 Horse Guards road are contracted out to a caterer who is not prepared to release detailed spending information as it is considered commercially sensitive. Information on the origin of food procured for use in the Department could not be provided within the disproportionate costs threshold. However, data on the proportion of domestically produced food for the period 1 July 2006 to 30 June 2007 were provided to Parliament and are available from

htip://www.defra.gov.uk/farm/policy/sustain/procurement/pdf/govt-food-usage.pdf.

Housing: Valuation

Mr. Pickles: To ask the Chancellor of the Exchequer whether the automated valuation model is used for inheritance tax valuations of domestic dwellings by the Valuation Office Agency. [221248]

Jane Kennedy: Automated valuation models are not being used by the Valuation Office Agency in connection with inheritance tax valuations.

Mr. Pickles: To ask the Chancellor of the Exchequer pursuant to the answer of 7 July 2008, *Official Report*, column 1258W, on housing: valuation, if he will place in the Library a copy of the mapping information used by the Valuation Office Agency to distinguish the boundaries of each live locality within each billing authority area. [221276]

Jane Kennedy: The Valuation Office Agency does not use mapping information to distinguish the boundaries of each live locality within each billing authority area. It uses the expertise of its chartered surveyors and other local staff.

Mr. Pickles: To ask the Chancellor of the Exchequer pursuant to the answer of 7 July 2008, *Official Report*, column 1258W, on housing: valuation, if he will place in the Library a copy of the data export of the most recent numerical co-efficient value assigned to each of the live localities to reflect their value significance in the automated valuation model. [221277]

Jane Kennedy: The information concerned is commercially confidential.

Mr. Pickles: To ask the Chancellor of the Exchequer with reference to page 18 and page 35 of the Valuation Office Agency annual report and accounts 2007-08, HC 583, how many domestic dwellings received a visit from a Valuation Office Agency representative to check information in 2007-08. [221280]

Jane Kennedy: In 2007-08 approximately 135,000 domestic dwellings (out of 23 million) were visited to check information. The majority of these visits will have been undertaken without the need to go inside a person's home.

Import Duties: Occupied Territories

Tom Levitt: To ask the Chancellor of the Exchequer how much in duties has been collected from companies importing produce into the UK from Israeli settlements in the occupied Palestinian territory in the latest period for which figures are available. [220839]

Jane Kennedy: Between 1 February 2005 and 31 January 2008, HM Revenue and Customs have issued demands for approximately £338,000 customs duty on products imported into the UK from Israeli settlements in the occupied Palestinian territory under the provisions of the EC-Israel Association agreement.

Inflation

Mr. Jim Cunningham: To ask the Chancellor of the Exchequer what plans the Government have to reduce the effects of rising inflation on low income families. [221329]

Jane Kennedy: I refer the hon. Member to the answer given to his question on 14 July 2008 by the Exchequer Secretary, *Official Report*, column 140W, and to the answer my right hon. Friend the Chancellor of the Exchequer gave to the hon. Member for Middlesbrough, South and East Cleveland (Dr. Kumar) on 17 July 2008, *Official Report*, column 631W.

Minimum Wage

Jenny Willott: To ask the Chancellor of the Exchequer how many employers have been found to have accrued minimum wage arrears on *(a)* one, *(b)* two, *(c)* three, *(d)* four and *(e)* five or more separate occasions; and if he will make a statement. [221213]

Jane Kennedy: The information is not available.

Minimum Wage: Prosecutions

Jenny Willott: To ask the Chancellor of the Exchequer pursuant to the Answer of 28 April 2008, *Official Report*, columns 143-44W, on minimum wage: prosecutions, how many employers have appealed against a minimum wage arrears enforcement notice in each year since the minimum wage was introduced; and if he will make a statement. [221211]

Jane Kennedy: I refer the hon. Lady to the answer I gave the hon. Member for Inverness, Nairn, Badenoch and Strathspey (Danny Alexander) on 8 May 2008, *Official Report*, column 1126W.

Jenny Willott: To ask the Chancellor of the Exchequer pursuant to the Answer of 28 April 2008, *Official Report*, columns 143-44W, on minimum wage: prosecutions, how many employers accrued minimum wage arrears of *(a)* under £5,000, *(b)* £5,000 to £25,000, *(c)* £25,000 to £50,000, *(d)* £50,000 to £75,000, *(e)* £75,000 to £100,000 and *(f)* over £100,000 in each year since the minimum wage was introduced; and if he will make a statement. [221212]

Jane Kennedy: I refer the hon. Lady to the answer I gave on 9 May 2008, *Official Report*, column 1279W, to the hon. Member for Inverness, Nairn, Badenoch and Strathspey (Danny Alexander).

Office of National Statistics: Telephone Services

Mr. Prisk: To ask the Chancellor of the Exchequer what income his Department received from the Office for National Statistics 0845 number in *(a)* 2007-08, *(b)* 2006-07 and *(c)* 2005-06. [217545]

Angela Eagle: The Treasury Department has not received any income from the ONS between 1 April 2005 and 31 March 2008 in respect of 0845 numbers.

Oil: Prices

Mrs. Riordan: To ask the Chancellor of the Exchequer what recent discussions he has had with his international counterparts on global oil prices. [219983]

Angela Eagle: The Chancellor of the Exchequer has had various discussions with international counterparts in recent months regarding the economic effects of oil prices, including at G8 Finance Ministers Meeting in June 2008 and the July 2008 meeting of the European Economic and Financial Affairs Council.

Public Sector: Construction

Harry Cohen: To ask the Chancellor of the Exchequer what assessment he has made of the effects of the performance of the economy in the last six months on public sector construction projects, with particular reference to the Building Schools for the Future programme. [220880]

Yvette Cooper: The Building Schools for the Future Programme (BSF) has a strong pipeline, with local authority plans showing that 35 more new or refurbished schools will open during 2008-09, 115 more in 2009-10 and 165 more in 2010-11. BSF projects are continuing and there continues to be a strong interest in bidding for BSF work within the construction industry.

Revenue and Customs: Closures

Miss McIntosh: To ask the Chancellor of the Exchequer if he will make a statement on the closure of the HM Revenue and Customs office in York. [220882]

Jane Kennedy: HM Revenue and Customs (HMRC) published proposals on 11 June 2008 for the cluster of offices which includes Hilary house and Swinson house in York. These proposals envisage withdrawing from Swinson house and retaining Hilary house but no decisions have been taken. As with all HMRC's proposals, these will be subject to consultation with internal and external stakeholders, including MPs with a constituency interest, and detailed feasibility work will also be undertaken before final decisions are made. It is hoped to announce decisions on the future of all HMRC's offices by the end of the year.

Annie Main: To ask the Chancellor of the Exchequer whether a full equality impact assessment was carried out on the effects on *(a)* staff and *(b)* service users of the proposal to close the HM Revenue and Customs Office in St. Albans. [221407]

Jane Kennedy: HM Revenue and Customs (HMRC) is restructuring its business and estate across the whole of the UK in order to achieve business efficiencies and customer service improvements, and release surplus accommodation. On 11 June 2008, proposals were published which envisage withdrawal from the HMRC office at Beauver House, St. Albans. These proposals are under consultation and no final decision has been made. An overview impact assessment for the cluster of offices which includes St. Albans was published on the same day. Feasibility work undertaken by HMRC before recommendations are made include assessment of the impact of closure on staff, customers and the wider community. This includes any equality impacts.

If the final decision is to withdraw from St. Albans, an impact assessment will be published at that point, with an equality impact assessment as an appendix to that document.

The impact of closure on HMRC's customers will be minimal as enquiry centre services will remain in the current location or nearby.

Revenue and Customs: Manpower

James Duddridge: To ask the Chancellor of the Exchequer what the headcount of HM Revenue and Customs is; and what projections for the headcount have been made for the period till 2010. [220120]

Jane Kennedy: The headcount of HM Revenue and Customs at April 2008 was 90,296.

Forecasted headcount for HMRC is shown in the following table:

	Headcount
Required for April 2009	86,161
Required for April 2010	82,778

Note:
Figures given are to the nearest person.

Revenue and Customs: Pay

Mr. Philip Hammond: To ask the Chancellor of the Exchequer how much was paid in bonuses to staff working on tax credits at HM Revenue and Customs in 2007-08, broken down by tax credit office. [221655]

Jane Kennedy: The information is not available for all staff working on tax credits. Staff in various parts of HM Revenue and Customs, not only the tax credit Office, may be deployed to tax credits work or deal with tax credits in addition to other work. It is not possible to isolate those in receipt of bonus payments.

Revenue and Customs: Recruitment

Mr. Philip Hammond: To ask the Chancellor of the Exchequer what the cost was of placing recruitment advertisements for HM Revenue and Customs staff in each month of the last two year period for which figures are available. [221165]

Jane Kennedy: The costs of placing recruitment advertisements for HM Revenue and Customs for staff in each month of the last two year period for which figures are available are as follows:

Month and year	*Expenditure (£)— Administrative assistant to grade 6*	*Expenditure (£)— Senior civil service*
July 2006	42,566.71	—
August 2006	22,635.72	—
September 2006	30,115.23	—
October 2007	19,978.34	—
November 2006	70,591.36	—
December 2006	20,145.00	—
January 2007	24,466.54	—
February 2007	13,172.18	—
March 2007	11,230.65	—
April 2007	87,825.58	19,700.00
May 2007	36,681.20	91,478.95
June 2007	62,716.69	Nil
July 2007	90,347.71	Nil
August 2007	20,140.22	Nil
September 2007	65,993.24	6,574.76
October 2007	57,531.04	Nil
November 2007	66,432.72	5,440.72
December 2007	32,645.12	Nil
January 2008	108,609.66	4,995.00

Month and year	Expenditure (£)—Administrative assistant to grade 6	Expenditure (£)—Senior civil service
February 2008	36,859.09	5,043.86
March 2008	28,378.83	Nil
April 2008	104,146.29	Nil
May 2008	160,975.65	7,265.68
June 2008	123,158.87	13,238.28

Notes:
1. The costs shown are based on the figures which are available and are divided between external recruitment at civil service grades administrative assistant (AA) to grade 6 and senior civil servant (SCS). HMRC advertises in the press, radio and on the internet, using external agencies.
2. For SCS in HMRC the costs of placing recruitment advertisements are only available from April 2007.
3. Costs have also been allocated to the month in which the invoice was passed for payment, which does not necessarily relate to either to the date of the advertisement or the date of the invoice.

Revenue and Customs: Standards

Mr. Carmichael: To ask the Chancellor of the Exchequer what target HM Revenue and Customs has set for the time taken to respond to public enquiries; and what its success rate in reaching the target was in the last period for which figures are available. [216713]

Mrs. Gillan: To ask the Chancellor of the Exchequer how many phone calls to HM Revenue and Customs call centres went unanswered in each of the last six months for which figures are available. [219612]

Jane Kennedy: HMRC's main channels for responding to public enquiries are through their telephone helplines and their network of enquiry centres.

In 2007-08, 94.5 per cent. of telephone callers were answered on the day they rang against a target of 95 per cent. In enquiry centres, 97 per cent. of customers were given an appointment within three days, against a target of 95 per cent. HMRC also receives enquiries via post, but it is not possible to distinguish these cases from other forms of customer correspondence, such as forms.

The following table provides the number of unanswered telephone calls for each of the last six months, including calls that received a busy message, the engaged tone or which were abandoned. The number of unanswered calls fluctuates according to the peaks in HMRC's business. The peak in demand in January reflects the self assessment filing date and demand has been high throughout the last three months as HMRC has approached the tax credits renewal deadline date.

Customers who do not get through on their first attempt often use the rapid redial facility on their telephone to make numerous successive calls, which increases the number of unanswered calls disproportionately. However, as the statistics below show, the vast majority of callers did get through on the same day they called.

Month	Call attempts	Calls offered	Busy	Engaged	Abandoned
January 2008	8,848,585	6,836,338	1746,712	107,149	919,133
February 2008	6,075,932	5,141,541	865,168	37,323	447,479
March 2008	6,675,938	4,984,449	1,605,989	69,972	618,777
April 2008	9,630,957	6,390,894	2,755,023	359,540	979,871
May 2008	11,564,829	6,211,032	5,024,026	162,421	1,139,916
June 2008	10,430,878	6,272,554	3,892,517	55,927	1,037,559
Total	53,227,119	35,836,808	15,889,435	792,332	5,142,735

Notes:
1. Call attempts—the number of calls made to the service.
2. Calls offered—the number of calls that are received by the telephone system and put into the queue to speak to an adviser.
3. Busy—where no adviser is available to handle the call, an appropriate advisory message is played.
4. Engaged—call attempts where the caller was played an engaged tone.
5. Abandoned—where the caller selected an option from the call steering menu and was put in a queue to speak to an adviser but the call was terminated before the caller spoke to an adviser.

Revenue and Customs: Visits Abroad

Mr. Philip Hammond: To ask the Chancellor of the Exchequer pursuant to his answer of 7 July 2008, *Official Report*, column 1263W, on HM Revenue and Customs: visits abroad, if he will break down the amount spent on overseas travel in 2007-08 by each HM Revenue and Customs office. [221189]

Jane Kennedy: The information is not available and could be provided only at disproportionate cost.

Smuggling: Fuels

David Simpson: To ask the Chancellor of the Exchequer (1) what percentage of the *(a)* time and *(b)* resources of HM Revenue and Customs in England and Wales was allocated to tackling fuel smuggling in each of the last three years; [214996]

(2) how many and what percentage of HM Revenue and Customs staff in England and Wales work on oil-related anti-smuggling matters, broken down by region. [214997]

Angela Eagle: HMRC do not centrally record time and resources allocated to tackling illegal fuels smuggling in England and Wales.

On 1 April 2008, 99 full time equivalents were allocated to tackle oils misuse in Great Britain.

HMRC do not release the numbers of front line detection staff that they deploy at a local level as this would provide information of value to those seeking to circumvent HM Revenue and Customs' controls, thereby prejudicing the prevention and detection of crime.

Tax Credits

Jenny Willott: To ask the Chancellor of the Exchequer (1) what estimate his Department has made of the effect on levels of child poverty of an increase in expenditure take-up rates for working tax credits to *(a)* 100 per cent. and *(b)* 90 per cent.; and if he will make a statement; [218851]

(2) what estimate his Department has made of the effect on levels of child poverty of an increase in expenditure take-up rates for child tax credits to 100 per cent.; and if he will make a statement; [218852]

(3) what estimate his Department has made of the effect on levels of child poverty of an increase in the caseload take-up rates for working tax credits to *(a)* 100 per cent., *(b)* 90 per cent., *(c)* 80 per cent. and *(d)* 70 per cent.; and if he will make a statement; [219150]

(4) what estimate his Department has made of the effect on levels of child poverty of an increase in the caseload take-up rates for child tax credit to *(a)* 100 per cent. and *(b)* 90 per cent.; and if he will make a statement. [219151]

Jane Kennedy: For families with children, take-up of tax credits was 82 per cent. by caseload and 91 per cent. by expenditure in 2005-06, rising to 96 and 97 per cent. respectively for families on the lowest incomes, significantly higher than for previous comparable systems of support.

It is estimated that complete tax credit take-up might reduce the child poverty rate by over one percentage point compared with 2005-06 take-up rates. Such estimates are subject to a number of uncertainties and simplifying assumptions, and should be taken as a broad guide only.

Estimates have been provided for complete take-up of tax credits overall as working and child tax credits are paid together where families are eligible for both.

Taxation

Dr. Kumar: To ask the Chancellor of the Exchequer (1) what average percentage of the income of the lowest earning 10 per cent. of people is taxed; [219842]

(2) what average percentage of the income of the highest earning 10 per cent. of people in the UK is taxed. [219855]

Jane Kennedy: Information on the distribution of income of taxpayers and the income tax they pay is published on the HM Revenue and Customs website at:

http://www.hmrc.gov.uk/stats/income tax/menu.htm

The share of total income before tax and income tax paid by the top and bottom deciles of taxpayers ranged on total income can be found in table 2.4 "Shares of total income (before and after tax) and income tax for percentile groups".

The proportion of earnings paid in income tax by individuals at the top and bottom deciles of the distribution of earnings can be found in table 2.7 "Percentage of earnings paid in income tax".

Taxation: Domicil

Dr. Kumar: To ask the Chancellor of the Exchequer (1) what estimate he has made of the effect on UK gross domestic product if non-domiciles working in the UK were to be included in the UK income tax system; [219853]

(2) what estimate he has made of the amount of revenue which would be raised by including non-domiciles in the UK income tax system. [219854]

Jane Kennedy: Non-domiciles working in the UK are included in the UK income tax system. Any income or gains earned in the UK by non-domiciles is taxed via the UK self-assessment or PAYE systems.

Valuation Office Agency: Expenditure

Mr. Pickles: To ask the Chancellor of the Exchequer (1) with reference to page 56 of the Valuation Office Agency annual report and accounts 2007-2008, HC 583, what the total value of payments made to Rightmove.co.uk plc was in 2007-08; [221247]

(2) with reference to page 56 of the Valuation Office Agency annual report and accounts 2007-08, HC 583, if he will provide a breakdown by *(a)* supplier and *(b)* value the goods and services provided under the heading of Data capture. [221278]

Jane Kennedy: I refer the hon. Member to the Valuation Office Agency annual report and accounts 2007-08, HC 583.

A copy of the contract, detailing the services provided, was placed in the Library on 26 July 2007.

Valuation Office Agency: Standards

John Battle: To ask the Chancellor of the Exchequer what projects in *(a)* Leeds metropolitan district and *(b)* Leeds West constituency sponsored by the Valuation Office Agency were subject to gateway services in each of the last five years. [220762]

Jane Kennedy: None.

Valuation Office: Cole Layer Trumble

Mr. Pickles: To ask the Chancellor of the Exchequer if he will place in the Library a copy of the agreement between Cole Layer Trumble/Tyler Technologies and representatives of the Valuation Office Agencys' redacting commercially confidential information. [218297]

Jane Kennedy: No such agreement exists between the Valuation Office Agency and Cole Layer Trumble/Tyler Technologies which are third party providers of automated valuation modelling software and support.

Valuation Office: ICT

Mr. Pickles: To ask the Chancellor of the Exchequer pursuant to the Answer of 14 May 2008, *Official Report*, column 1629W, on Valuation Office: ICT, whether each locality is given a *(a)* name and *(b)* unique reference number. [218269]

Jane Kennedy: The capability exists to give each locality or name but its use is optional. Each locality is given a unique reference number.

Valuation Office: Photography

Mr. Pickles: To ask the Chancellor of the Exchequer pursuant to the answer of 18 October 2008, *Official Report*, column 1279W, on Valuation Office: manuals, if he will place in the Library a copy of *(a)* the best practice guide for taking and adding photographs and *(b)* the digital photography IT user manual referred to on page 28 of the council tax referencing manual. [218263]

Jane Kennedy: I refer the hon. Member to the answers given on 23 January 2008, *Official Report*, column 2099W and 3 May 2006, *Official Report*, column 1725.

Valuation Office: Video Recordings

Mr. Pickles: To ask the Chancellor of the Exchequer pursuant to the answer of 14 May 2008, *Official Report*, column 1630W, on Valuation Office: video recordings, if he will place in the Library a copy of the start of year message video. [218271]

Jane Kennedy: A copy of the video has been placed in the Library.

Welfare Tax Credits: Overpayments

Mr. Hoban: To ask the Chancellor of the Exchequer pursuant to the answer of 14 July 2008, *Official Report*, columns 151-2W, on welfare tax credits: overpayments, how many of the notices were for amounts *(a)* below £250, *(b)* between £250 and £500, *(c)* between £500 and £750, *(d)* between £750 and £1,000, *(e)* between £1,000 and £1,500, *(f)* between £1,500 and £2,000, *(g)* between £2,000 and £2,500, *(h)* between £2,500 and £3,000 and *(i)* above £3,000 in each month. [221271]

Jane Kennedy: The information requested is available only at a disproportionate cost.

Written Answers to Questions

The following answers were received between Wednesday 23 July and Friday 29 August 2008

TRANSPORT

Airports: Security

Mrs. Villiers: To ask the Secretary of State for Transport what the average time taken to pass through security checks at each London airport was in the latest period for which figures are available. [218658]

Jim Fitzpatrick: The Department for Transport's report on improving the Air Passenger Experience (November 2007) provided some indications of security waiting times at Heathrow and Gatwick based on BAA data. Average daily queues were less than 10 minutes for 95 per cent. or more of the time at Heathrow in August 2007.

No Government published data are currently available on average time taken to pass through security checks. The Department has also commissioned the Civil Aviation Authority to collect data on the average time taken through security checks at four selected UK airports.

Aviation: Carbon Emissions

Mrs. Villiers: To ask the Secretary of State for Transport how she plans to measure the emissions from UK aviation when the sector is included in the EU Emissions Trading Scheme. [218791]

Jim Fitzpatrick: The UK reports annually to the United Nations Framework Convention on Climate Change (UNFGCC) estimates of emissions from UK sales of aviation fuels—known as "bunker fuels"—for domestic and international aviation. In doing so, the UK follows guidelines published by the Intergovernmental Panel on Climate Change. Estimates of emissions from fuel used for international aviation do not form part of the UK's national emissions inventory, as there has been no international agreement on how to allocate them to individual countries.

The Government will continue to press internationally for an approach that would allocate responsibility for international aviation emissions, and therefore require action to be taken globally to address them. Such allocation may be, for example, to countries or to the international aviation sector as a whole.

The inclusion of aviation in the EU Emissions Trading Scheme (EU ETS) will not change directly international reporting arrangements. The Government do not believe that inclusion of aviation in the EU ETS will provide a suitable emissions allocation methodology. Responsibility for meeting the cap will be placed directly on airlines; responsibility for regulating airlines will be placed on member states, in a process designed to achieve administrative simplicity. As a result, the UK regulator will be responsible for administering airlines from the UK and other countries, some of whose flights will not pass through UK airspace or land at a UK airport.

The EU ETS will cap emissions from flights arriving in, or departing from, the EU. Any growth in emissions above that cap will require airlines to pay for equivalent emissions reductions from elsewhere within the scheme, thereby maintaining total emissions below the cap. The UK's reports to the UNFCCC on emissions from bunker fuels would not reflect achievement of the EU ETS cap. The differences between the UNFCCC and EU regimes reflect the different purposes for which they were established.

Aviation: Standards

Norman Baker: To ask the Secretary of State for Transport what assessment she has made of the financial *(a)* incentives and *(b)* disincentives to (i) airport operators and (ii) airlines to provide good passenger service. [216323]

Ms Rosie Winterton: Currently, airlines compete for customers on a number of factors including price, route and passenger service. They must also comply with the EU regulation on denied boarding, cancellation or long delay of flights (Reg (EC) 261/2004) by providing passengers with the requisite refreshments, accommodation, re-routing or compensation.

The Secretary of State for Transport announced a review of the economic regulation of airports on 22 April 2008, *Official Report*, columns 149-50WS. Among other aims this work will look at how best to provide incentives to improve passenger experience.

In addition, in November 2007 the Secretary of State for Transport wrote to the Civil Aviation Authority (CAA), in its capacity as the Government's expert aviation adviser and in accordance with section 16(1) of the Civil Aviation Act 1982, requesting advice on passengers' experience in two areas where responsibility for delivering a good passenger service lies with a combination of bodies. These areas were passage through airports, with particular reference to Terminal 5 at Heathrow, and the resilience of airports to recover from problems such as extreme weather conditions. Work by the CAA is under way.

Departmental Appeals

Andrew Mackinlay: To ask the Secretary of State for Transport on how many occasions her Department and its predecessor instructed the Treasury Solicitor to seek leave to appeal to the House of Lords from *(a)* the Court of Appeal and *(b)* the House of Lords itself in each of the last 10 years; and on how many occasions the application was rejected. [220814]

Jim Fitzpatrick: This information is not held in the form requested and can be obtained only at disproportionate cost.

Departmental Buildings

Mr. Betts: To ask the Secretary of State for Transport what her Department's policy is on improving the energy efficiency of the buildings which it *(a)* rents and *(b)* owns; what changes there have been in the energy efficiency of such buildings in the

last (i) five and (ii) 10 years; and whether her Department has adopted targets on energy efficiency improvements in the buildings it occupies over the next (A) five and (B) 10 years. [221091]

Jim Fitzpatrick: The Department for Transport is committed to achieving the published Sustainable Operations on the Government Estate (SOGE) targets, which include improving the energy efficiency of its estate by 15 per cent. by 2010 and by 30 per cent. by 2020. The target does not differentiate between rented and owned buildings.

The Department for Transport can confirm that by 2006-07 its energy efficiency performance had not improved in comparison to our baseline year of 2002-03. However, we fully expect the 2007-08 figures to show an improvement of at least 10 per cent. against the baseline, in the next Sustainable Development Commission annual report. The Department for Transport was formed in its current format under Machinery of Government changes in 2002. We therefore do not have figures prior to financial year 2002-03.

An initial step towards achieving the SOGE targets was the commissioning of a Carbon Management Energy Efficiency report by the Carbon Trust. This report centred on the five major areas of the Department which will give the highest reduction in Carbon emissions and subsequent improvement in energy efficiency. The Department is currently developing detailed implementation plans from the recommendations of this report.

Some of the specific steps being taken include:

The introduction of Smart metering at a number of the departmental sites;

The aim of achieving Building Research Establishment Environmental Assessment Method (BREEAM) "Excellent" rating on all new builds and "Excellent" or "Very Good" ratings for all major refurbishments;

The adoption of Office of Government Commerce (OGC) "Quick Win" standards as a minimum requirement as part of our sustainable procurement action plan;

Extending Environmental Management Systems;

Improving Building Management System controls; and

Exploring the opportunities for self generated energy.

In addition the Department for Transport is actively participating in the Display Energy Certificate initiative being implemented by the Department for Communities and Local Government.

Mr. Betts: To ask the Secretary of State for Transport what account her Department takes of the level of energy efficiency of buildings before entering into agreements to *(a)* rent and *(b)* purchase those buildings. [221107]

Jim Fitzpatrick: The Department is committed to purchasing new freehold offices with an Energy Performance Certificate rating of A or B and aims to do the same for leased offices wherever practicable.

Mr. Hoban: To ask the Secretary of State for Transport which organisations have received *(a)* free and *(b)* discounted room hire from (i) her Department and (ii) its agencies in each of the last five years; and what the commercial value of the discount was in each case. [221589]

Jim Fitzpatrick: The information is not held in the format requested and could be provided only at disproportionate cost. However, during the last five years the following organisations have received free accommodation at Department for Transport buildings:

Benenden Healthcare
Charities Trust
Civil Service Benevolent Fund
Civil Service Healthcare
Civil Service Motoring Association
Institute of Civil Engineers
Medifit Healthcare
National Blood Service
PCS Trade Union
Prospect Trade Union.

The Driving Standards Agency provided the Friends of Cardington free use of the cinema at the Cardington training facility (Bedford) on 4 July 2008. The commercial value of hiring the cinema for an evening would be £275.

The Driver and Vehicle Licensing Agency's Richard Ley Development Centre (Swansea) offers a Government/public sector 25 per cent. discount rate for use of its facilities. During the last five years the discounted rate has been offered to the following external organisations:

Arts Council of Wales
Environment Agency Wales
Mid and West Wales Fire Service
National Assembly
South Wales Police Authority
Swansea City Council
Swansea Council for Voluntary Services
Swansea Local Health Board
Swansea Local Education Authority.

Departmental Communications

Mr. Hoban: To ask the Secretary of State for Transport how many staff in *(a)* her Department and *(b)* its agencies (i) are classified as Government communicators and (ii) have access to the Government Communication Network. [215110]

Jim Fitzpatrick: The information is as follows:

(i) Government Communicators

The Department does not have a 'communicator' grade. Figures shown are for communications specialists engaged in a range of communications activities including news media, marketing, publicity, strategic communications, internal communications, e-communications and speechwriting. The full-time equivalent (FTE) number employed is estimated as follows using information readily available and dated February 2008.

	Estimated communicators February 2008
DFT Central	57.9
DSA	15
DVLA	34.3
GCDA	1
HA	24.8
MCA	5.5

	Estimated communicators February 2008
VCA	2.5
VOSA	9
DFT agencies	92.1

The DFT(C) figure is only for relevant staff working in the Department's Communication Directorate. DFT(C) also employs other staff who may perform communication roles but numbers are not held centrally and can be provided only at disproportionate cost.

(ii) Government Communication Network

All civil servants in the Department may register to access services of the Government Communication Network and those in a communication role may become a member and access additional network resources.

Departmental Overtime

Mr. Hoban: To ask the Secretary of State for Transport what the cost of overtime payments paid to staff in her Department was in each of the last 12 months, broken down by pay grade. [221289]

Jim Fitzpatrick: The information requested can be provided only at disproportionate cost.

Departmental Paper

David Simpson: To ask the Secretary of State for Transport what percentage of paper used *(a)* for photocopying and *(b)* in printed publications by her Department was from recycled sources in each of the last two years. [220733]

Jim Fitzpatrick: I refer the hon. Member to the answer given on 2 May 2007, *Official Report*, columns 1672-73W, for percentage figures relating to 2004-05, 2005-06 and 2006-07.

The following tables show the percentage of paper containing recycled content used in 2007-08:

Percentage of photocopier paper with recycled content

	2007-08
DFT(C)	99.94
DVLA	100
DSA	99
GCDA	100
HA	100
MCA	100
VCA	100
VOSA	99

Percentage of paper with recycled content used in printed publications

	2007-08
DFT(C)	[1]100
DVLA	91
DSA	100
GCDA	95
HA	100
MCA	100
VCA	100
VOSA	75

[1] Figure refers to publication work carried out by central Communications Directorate only.

Departmental Pay

Mr. Philip Hammond: To ask the Secretary of State for Transport how much was claimed in reimbursable expenses by press officers in her Department in each of the last three financial years. [221166]

Ms Rosie Winterton: The Department reimburses staff only for expenses necessarily incurred in the course of official business. Expenses reimbursed to press officers in the last three financial years are set out as follows where readily available.

	2005-06	*2006-07*	£ *2007-08*
DFT Central	1,776	1,528	4,247
DSA	1,925	1,883	1,620
HA	12,387	13,978	14,568
VOSA	696	859	711

The Highways Agency has seven regional press officers to support its new traffic officer service and seven regional control centres. These press officers are employed to raise awareness of the traffic officers and the agency's role as network operator for England's motorways and major A roads. These press officers have to travel between the regional control centres, outstations and Highways Agency offices, as well as travelling to media opportunities and to accompany journalists during visits to the HA network and premises.

Press officer activities in most Executive agencies are not carried out by staff or units solely dedicated to this purpose. GCDA and VCA have no press officers, and DVLA and MCA are unable to identify press officer reimbursements without disproportionate cost.

Departmental Planning Applications

Mr. Pickles: To ask the Secretary of State for Transport pursuant to the Answer to the hon. Member for Horsham of 7 July 2008, *Official Report*, columns 1184-86W, on departmental planning applications, what licensing hours the Driver and Vehicle Licensing Agency *(a)* applied for and *(b)* was granted. [221273]

Jim Fitzpatrick: The times the licence authorises the carrying out of licensable activities is:

Supply of Alcohol

Monday to Saturday—10.00 hours to 23.00 hours

Sunday—12.00 hours to 22.30 hours

As far as we are aware this is what the DVLA applied for and was granted.

Departmental Postal Services

Mr. Hoban: To ask the Secretary of State for Transport what steps her Department has taken to monitor the cost of its mail services in the last 12 months. [221485]

Jim Fitzpatrick: The Department for Transport actively monitors the cost of its mail services on a regular basis, using the most economical delivery service wherever

possible, with the default for outgoing mail being second class post. Listed as follows are some examples of actions undertaken:

The Highways Agency monitors on a monthly basis locational spend against forecasted expenditure and has also reviewed the internal mail delivery service in order to ensure best value.

The Driver and Vehicle Licensing Agency (DVLA) has already implemented a combination of software and mechanical sorting equipment to increase the volume of outbound mail discounts. Over the last 12 months DVLA has ensured that mail services contracts have been; managed robustly, and worked closely with Royal Mail and DX Group to ensure effective products have been utilised, and that both volume and price discounts have been maximised.

The Vehicle and Operator Services Agency (VOSA) has undertaken a review of processes and highlighted potential for savings via improved supplier processes and shared best practice. VOSA's business design authority, will, in possession of these data, develop an improvement project which will deliver:

a single contract supplier of postal services

a single contract supplier of parcel services

centralised invoicing for parcels and franking machines

a best practice guide for all areas

reduced process costs

an opportunity to reduce spend by about £100,000.

Departmental Procurement

David Simpson: To ask the Secretary of State for Transport what her Department's policy is on requesting discounts from its suppliers in return for swift payment of invoices. [220423]

Jim Fitzpatrick: The Department for Transport will consider on a case by case basis whether requesting a discount for accelerated payment terms is appropriate. However, the department is committed to prompt payment and states that it will pay valid invoices within 30 days of receipt so tenderers base their pricing in the knowledge of swift payment.

Departmental Public Participation

Mr. Hoban: To ask the Secretary of State for Transport what *(a)* listening exercises and *(b)* public forums her Department has held in each of the last two years; and what the (i) purpose, (ii) cost, (iii) private contractor and (iv) amount paid to the private contractor was in each case. [221340]

Jim Fitzpatrick: The Department engages with the public and its stakeholders on a wide range of subjects in a variety of ways. The Department is committed to further improve its engagement with its stakeholders and with transport users. In this engagement activity, sometimes private sector contractors are used and sometimes not.

Because of the wide range of engagement carried out by the Department and its agencies, this information is not held centrally.

Mr. Hoban: To ask the Secretary of State for Transport if she will list *(a)* the reviews and *(b)* public consultations initiated by her Department since 27 June 2007. [221366]

Jim Fitzpatrick: Details of the consultations and reviews initiated by the Department for Transport since 27 June 2007 have been placed in the Libraries of the House.

Departmental Responsibilities

Mr. Hoban: To ask the Secretary of State for Transport which projects her Department has commissioned from *(a)* think tanks and *(b)* charities in each of the last two years for which figures are available; what the aim of each project was; which think tank or charity was commissioned; and how much was paid. [221617]

Jim Fitzpatrick: The information requested is not held centrally and the collation of the information could be done only at disproportionate cost.

Departmental Sick Leave

Jenny Willott: To ask the Secretary of State for Transport how many sick days were taken by employees in *(a)* her Department, *(b)* its agencies and *(c)* the non-departmental bodies for which it has responsibility due to (i) stress and (ii) mental health and behavioural disorders in each of the last 10 years; what proportion of sick days taken this represented in each case; and if she will make a statement. [216169]

Ms Rosie Winterton: The Department for Transport, established in 2002, recorded the following annual returns in respect of sickness absence due to (i) stress and (ii) mental health and behavioural disorders:

	Total days	*Stress*	*Mental health and behavioural*	*Stress (Percentage)*	*Mental health and behavioural (Percentage)*
2003	164,127.00	13,977.50	23,385.50	8.52	14.25
2004	176,444.00	19,721.00	24,305.00	11.18	13.77
2005	185,137.00	21,916.00	26,679.70	11.84	14.41
2006	190,574.00	19,944.70	28,941.70	10.47	15.19
2007	203,360.00	21,760.30	29,194.80	10.70	14.36

The Government Car and Despatch Agency and The Vehicle Certification Agency could provide the information only at disproportionate cost.

The information requested from the Department for Transport's non-governmental bodies can be provided only at disproportionate cost also.

Jenny Willott: To ask the Secretary of State for Transport how many staff in *(a)* her Department, *(b)* its agencies and *(c)* the non-departmental bodies for which it has responsibility have taken sick days due to (i) stress and (ii) mental health and behavioural disorders in each of the last 10 years; what proportion of staff of each body this represented in each year; and if she will make a statement. [216170]

Ms Rosie Winterton: The Department for Transport, established in 2002, recorded the following annual returns in respect of sickness absence due to (i) stress and (ii) mental health and behavioural disorders:

	Number of staff absence for stress	Number of staff absence for mental health/ behavioural	Total employees	Stress (Percentage)	Mental health/ behavioural- (Percentage)
2003	408	511	17,513	2.33	2.92
2004	514	577	19,791	2.60	2.92
2005	637	600	19,418	3.28	3.09
2006	636	715	19,824	3.21	3.61
2007	688	730	20,046	3.43	3.64

The Government Car and Despatch Agency and The Vehicle Certification Agency could provide the information only at disproportionate cost.

The information requested from the Department for Transport's non-governmental bodies can be provided only at disproportionate cost also.

Jenny Willott: To ask the Secretary of State for Transport what the average duration of single periods of sick leave taken by staff in *(a)* her Department, *(b)* its agencies and *(c)* the non-departmental bodies for which it has responsibility who gave (i) stress and (ii) mental health and behavioural disorders as the reason for their absence was in each of the last 10 years; and if she will make a statement. [216171]

Ms Rosie Winterton: The Department for Transport, established in 2002, recorded the following average periods of sickness for stress and mental health and behavioural disorders related absence.

Stress

	Average duration (days)					
	DfTc	DSA	DVLA	HA	MCA	VOSA
2003	27.3	19.0	24.8	81.0	18.8	33.3
2004	38.8	27.0	27.8	88.9	27.8	26.9
2005	16.3	28.2	27.4	49.2	52.6	30.9
2006	20.1	24.2	22.7	55.2	44.2	34.0
2007	34.3	19.6	21.1	43.6	25.6	38.8

Mental health and behavioural disorders

	Average duration (days)					
	DfTc	DSA	DVLA	HA	MCA	VOSA
2003	38.9	18.0	44.2	58.1	14.4	29.2
2004	48.9	22.6	31.7	80.0	16.5	24.8
2005	56.5	20.5	35.2	44.7	30.5	33.4
2006	27.0	27.6	33.5	40.5	47.6	35.8
2007	22.1	32.1	25.5	38.3	25.9	35.1

The Government Car and Despatch Agency and The Vehicle Certification Agency could provide the information only at disproportionate cost.

The information requested from the Department for Transport's non-governmental bodies can be provided only at disproportionate cost also.

Jenny Willott: To ask the Secretary of State for Transport what the average duration of single periods of sick leave taken by staff in *(a)* her Department, *(b)* its agencies and *(c)* the non-departmental bodies for which it has responsibility was in each of the last five years; and if she will make a statement. [216172]

Ms Rosie Winterton: The central Department and its agencies recorded the following average durations of single periods of sick leave taken by staff in each of the last five years:

	Average duration (days)					
	DfTc	DSA	DVLA	HA	MCA	VOSA
2003	n/a	5.1	6.8	6.0	4.2	5.9
2004	8.5	6.2	7.0	7.0	4.7	5.7
2005	5.4	6.3	7.2	6.0	5.1	6.5
2006	4.6	7.3	7.5	7.0	6.1	7.6
2007	3.8	7.7	7.5	6.0	6.0	8.0

The Government Car and Despatch Agency and The Vehicle Certification Agency could provide the information only at disproportionate cost.

The information requested from the Department for Transport's non-governmental bodies can be provided only at disproportionate cost also.

David Simpson: To ask the Secretary of State for Transport how many and what percentage of staff in her Department have had more than two periods of sickness absence of less than five days in each of the last three years. [218694]

Ms Rosie Winterton: The Central Department and its agencies recorded the following employees who have had more than two periods of sickness of less than five days in each of the last three years:

	Number of staff with two or more periods of sickness of less than five days	Number of staff	Percentage of staff
2005	3,431	19,618	17.49
2006	3,206	20,080	15.97
2007	3,309	20,293	16.31

These figures exclude those of the Government Car and Despatch Agency who could provide this information only at disproportionate cost.

David Simpson: To ask the Secretary of State for Transport how many staff in her Department have had five or more periods of sickness absence of less than five days in two or more of the last five years. [218974]

Ms Rosie Winterton: The Central Department and its agencies recorded 682 employees who have had five or more periods of sickness absence of less than five days in two or more of the last five years.

This figure excludes the Government Car and Despatch Agency who could provide the information only at disproportionate cost.

Departmental Sick Pay

Jenny Willott: To ask the Secretary of State for Transport how many staff in *(a)* her Department, *(b)* its agencies and *(c)* the non-departmental bodies for which it has responsibility have received sick pay for sick leave due to (i) stress and (ii) mental health and behavioural disorders in each of the last 10 years; what the average length of time was for which sick pay was paid in these cases; and if she will make a statement. [216173]

Jim Fitzpatrick: The information requested can be provided only at disproportionate cost.

Jenny Willott: To ask the Secretary of State for Transport how much was paid in sick pay to staff in *(a)* her Department, *(b)* its agencies and *(c)* the non-departmental bodies for which it has responsibility in each of the last five years; what proportion of the staffing expenditure of each body this represented in each year; and if she will make a statement. [216174]

Jim Fitzpatrick: The information requested can be provided only at disproportionate.

Departmental Travel

Norman Baker: To ask the Secretary of State for Transport how many miles *(a)* Ministers and *(b)* officials in her Department travelled (i) by car, (ii) by rail and (iii) by air on Government business in each year since her Department's formation. [220513]

Jim Fitzpatrick *[holding answer 21 July 2008]:* The information is not available in the form requested.

Driving Tests: Vetting

Willie Rennie: To ask the Secretary of State for Transport how many people were removed from the approved driving instructors register following a criminal conviction for a sexual offence in each of the last two years. [219454]

Jim Fitzpatrick *[holding answer 17 July 2008]:* In February 2007, the Home Office added the profession of 'driving instructor' to its Notifiable Occupation Scheme. This means that the Registrar of Approved Driving Instructors should be notified by the police when an Approved Driving Instructor (ADI) is convicted of an offence and therefore has an early opportunity to take appropriate action.

Since March 2007, Potential Driving Instructors (PDIs) have been required to undergo criminal records checks when applying to start the qualifying process. At the same time, the Driving Standards Agency began checking criminal records of existing ADIs.

From October 2007 ADIs applying to re-register or renew their registration have had to undergo criminal records checks. (This system was in full operation by April 2008).

Eight ADIs have been removed from the register since March 2007 as a result of a criminal records check revealing a conviction for a sexual offence.

Information on ADIs removed from the register as a result of a conviction for a sexual offence where identification of the offence was not the result of a criminal records check could be provided only at disproportionate cost.

Driving Under The Influence

Mr. Dai Davies: To ask the Secretary of State for Transport what assessment she has made of the proposals by the Government's Chief Medical Officer that a zero alcoholic drink driving limit should be set for drivers under the age of 20 years. [220445]

Jim Fitzpatrick: We have made no specific evaluation of this proposal, but the Government do not consider it feasible to introduce a zero alcohol limit for drivers of any age because it is possible for some alcohol to be present in the body from sources other than alcoholic drinks.

We are currently considering a range of options to make further progress in tackling drink driving and intend to publish a consultation document in the next few months.

East Coast Railway Line

Mr. Sheerman: To ask the Secretary of State for Transport what assessment she has made of the performance of rail services on the East Coast Main Line; and if she will review the National Express franchise against that assessment. [217280]

Ms Rosie Winterton: The Franchise Agreement specifies performance benchmarks which are continuously monitored by the Department for Transport. National Express East Coast is currently meeting its contracted commitments.

High Speed Trains

Stephen Hammond: To ask the Secretary of State for Transport what assessment she has made of the environmental effects of modal shift arising from the creation of a new high-speed rail line to run alongside the current route of the *(a)* West and *(b)* East Coast Main Line. [219416]

Mr. Tom Harris: In developing the July 2007 rail White Paper Delivering a Sustainable Railway, the Department for Transport commissioned work on various inter-urban capacity options. One element of this work sought to establish how much shift from air to rail would be needed to make up for the emissions generated by a high speed line. It concluded that the scale of the transfer required depended on the route of a new line.

The recently announced Network Rail New Lines Programme, in examining options for increasing rail capacity, will assess the likely transfer of passengers to any new line. It will also consider whether if there is a need for new lines in the future and whether it would make sense to design these for conventional or high speed use.

Lost Working Days

Mr. Hayes: To ask the Secretary of State for Transport how many working days have been lost due to industrial action by employees for which her Department is responsible in each year since 1997. [218040]

Jim Fitzpatrick: The information requested can be provided only at disproportionate cost.

Mayor of London

Stephen Hammond: To ask the Secretary of State for Transport how many meetings she had with the Mayor of London in the last 12 months. [217775]

Ms Rosie Winterton: The Secretary of State has had three meetings in total with the Mayor of London in the last 12 months. For clarity, two of these were with the former Mayor and the other was with the present Mayor.

Motor Vehicles: Registration

Stephen Hammond: To ask the Secretary of State for Transport pursuant to the Answer of 13 June 2008, *Official Report*, column 538W to the hon. Member for Romsey, on cars: Hampshire, what the information is on car registrations in each local authority in the United Kingdom. [217523]

Mr. Tom Harris: A table showing the numbers of licensed cars at the end of 2007 registered in each local authority in Great Britain with carbon dioxide emissions equivalent to the present Band F (186 to 225 g/km) and Band G (over 225 g/km) has been placed in the House Libraries.

Figures are not held centrally for Northern Ireland.

Motor Vehicles: Rural Areas

Mr. Drew: To ask the Secretary of State for Transport if she will develop policies to assist rural motorists who have no alternative to car transport in areas where petrol prices are particularly high. [219134]

Ms Rosie Winterton: I refer my hon. Friend to the answer given by the Exchequer Secretary to the Treasury in response to the same question on 22 July 2008 (UIN 219135).

Motorway Service Areas: Public Lavatories

Mark Hunter: To ask the Secretary of State for Transport what guidance her Department provides on the *(a)* provision and *(b)* cleanliness of public toilets at motorway service areas. [214209]

Ms Rosie Winterton: Department for Transport Circular 01/2008 requires motorway service area operators to provide toilets and hand washing facilities for all road users, free of charge, every day of the year. The number of toilets operators are required to provide is linked to the traffic flow on the motorway which the facility serves.

Circular 01/2008 encourages motorway service area operators to comply with the Charter of the British Toilet Association.

Parking: Fines

Tom Levitt: To ask the Secretary of State for Transport if she will establish a mechanism whereby members of the public can request independent investigation of car park operating companies in respect of *(a)* alleged breaches of the relevant code of practice and *(b)* appeals against the issuing of parking fines. [218336]

Ms Rosie Winterton: The Secretary of State has no power to establish such a mechanism relating to the use of private land for parking.

The independent British Parking Association publishes the voluntary code of practice for car park operating companies. Details are on the Association's website at:

www.britishparking.co.uk

I am aware that the Home Office and the Security Industry Authority are currently considering the regulation of companies involved in vehicle immobilisation on private land.

Railways: Chorley

Mr. Hoyle: To ask the Secretary of State for Transport if she will take steps to ensure an increase in the *(a)* number of trains stopping per day and *(b)* number of carriages per train stopping at (i) Chorley and (ii) Adlington. [214099]

Ms Rosie Winterton: There are currently no plans to increase the level of services calling at Adlington. However, from December, First TransPennine Express will provide one additional service to Manchester calling at Chorley, together with additional capacity on two evening services.

Tamworth to Birmingham Railway Line

Mr. Jenkins: To ask the Secretary of State for Transport if she will take steps to facilitate an increase in the number of trains travelling between Tamworth and Birmingham. [215773]

Ms Rosie Winterton: The service planned by Arriva Trains Cross Country (ATCC) to operate from 14 December 2008 complies with the Department for Transport's specification for services on this route.

From this date, ATCC will provide a half-hourly service between Birmingham and Tamworth as part of the half-hourly Birmingham—Nottingham service, supplemented by one call every two hours in the Plymouth—Edinburgh service.

COMMUNITIES AND LOCAL GOVERNMENT

Allotments: Gloucestershire

Mr. Drew: To ask the Secretary of State for Communities and Local Government how many allotments there are in each local authority area in Gloucestershire. [218170]

Mr. Iain Wright: We do not require local authorities to provide figures for the number of allotments in their area, so it is not possible to easily provide the answer. Allotments can be in the control of many different parties: borough, district, parish, town councils, church bodies and private societies.

However, we have been able to obtain some information, which is summarised in the following table.

Authority	*Findings*
Gloucester City Council	11 sites found on web, unable to find information on number of plots.
Tewkesbury BC	No information available.

Authority	Findings
Cheltenham BC	18 sites: Two church owned, one with unknown number of plots and one with ten. One private site with 80 plots. Remaining 15 sites contain 810 plots.
Cotswold DC	Allotments are managed by town and parish councils, no central data available.
Gloucestershire County Council	No reply within available time.
Forest of Dean DC	Allotments are managed by town and parish councils, no central data available.
Stroud DC	Allotments are managed by town and parish councils, no central data available.

Arm's Length Management Organisations

Mr. Betts: To ask the Secretary of State for Communities and Local Government what consultation a local authority is required to undertake before any significant change is made to management arrangements with an arm's length management organisation; what consultation is required before an arm's length management organisation is established; and if she will make a statement. [219788]

Mr. Iain Wright: Under s105 of the Housing Act 1985 local authorities are required to consult with their tenants on any significant change in housing management arrangements. We would expect any such consultation to be as comprehensive as that undertaken to set up the ALMO. Tenants will have been fully involved in the decision to set up an ALMO, both as part of the options appraisal process and the consultation on the ALMO option itself.

We debated during passage of the Housing and Regeneration Bill whether a statutory ballot of tenants should be part of this consultation process. I did pledge during the passage of the Bill, that, although I disagreed with the amendments relating to this topic, when we look at the renewal of guidance, we might need to look at this issue again.

Mr. Betts: To ask the Secretary of State for Communities and Local Government what guidance she issues to local authorities on the resolution of failings in an arm's length management organisation through discussions between the organisation and the Audit Commission. [219789]

Mr. Iain Wright: Departmental ALMO guidance, updated in June 2006, and the "Review of Arms Length Management Organisations", also published in June 2006 together with two other relevant documents, the "ALMO re-inspection framework", and the "ALMO support framework" set out the Department's expectations around failing services in ALMOs.

The Audit Commission is one of a range of stakeholders who may be able to offer help should performance be an issue of concern to either the parent local authority or the ALMO itself. Local authorities can request this assistance on behalf of their ALMOs. The Commission has experience of offering such services to a wide range of local housing authorities that are looking at ways to improve their performance.

The Housing and Regeneration Act 2008 establishes the Tenant Services Authority (TSA). Initially, the TSA will only regulate housing associations but the Bill includes an enabling power to allow it to regulate across the social housing domain via secondary legislation. In the longer term ALMOs will, via their parent local authority, be subject to the same regulatory regime as all social housing providers.

Carers

Mr. Harper: To ask the Secretary of State for Communities and Local Government pursuant to paragraph 3.11 in the Carers at the heart of 21st-century families and communities report, how much of the £150 million funding for breaks for carers of disabled children will be provided by her Department over each of the next two years. [220302]

John Healey: Resources for breaks for carers will be made available by the Department of Health.

Community Relations: Extremism

Mr. Pickles: To ask the Secretary of State for Communities and Local Government what forums on extremism have been established by her Department in the last five years. [221535]

John Healey: Forums on extremism established since the commitment made in the 2006 Local Government White Paper, were listed in an answer given to the hon. Member for Wycombe (Mr. Goodman) on 30 June 2008, *Official Report*, columns 619-20W. However, we recognise that local partners need arrangements suited to the needs and circumstances of their areas and that there are many approaches that can be adopted to engage effectively with communities. Many areas are taking forward alternative arrangements that involve forums which tackle broader issues linked to preventing extremism, some of which were listed in the answer of 30 June.

Council Housing: Offenders

Mr. Pickles: To ask the Secretary of State for Communities and Local Government pursuant to the answer to the hon. Member for Welwyn Hatfield, of 9 July 2008, *Official Report*, column 1629W, on council housing: offenders, what advice has been given on housing such individuals near residential areas with family dwellings. [221307]

Mr. Iain Wright: Relevant advice was included in guidance issued to local housing authorities in November 1999 about their role in the management of risks presented by sex offenders. This was placed in the Library of the House in November 2000.

Mr. Pickles: To ask the Secretary of State for Communities and Local Government pursuant to the answer to the hon. Member for Welwyn Hatfield, of 9 July 2008, *Official Report*, column 1629W, on council housing: offenders, if she will place in the Library a copy of the letter to the housing authorities. [221308]

Mr. Iain Wright: A copy has been placed in the Library of the House.

Council Tax

Mr. Pickles: To ask the Secretary of State for Communities and Local Government (1) what guidance has been provided to local authorities on the application of the Limitation Act 1980 to repayments by local billing authorities for council tax bills in cases where there has been an error in the banding of a domestic dwelling; [221223]

(2) what her Department's policy is on the limiting of backdated claims for over-paid council tax in cases where the domestic property was incorrectly banded by the Valuation Office Agency. [221229]

John Healey: Communities and Local Government has issued no guidance to local authorities on this matter. Decisions about the payment of backdated claims for over-paid council tax are a matter for individual billing authorities.

Departmental Buildings

Mr. Betts: To ask the Secretary of State for Communities and Local Government what her Department's policy is on improving the energy efficiency of the buildings which it *(a)* rents and *(b)* owns; what changes there have been in the energy efficiency of such buildings in the last (i) five and (ii) 10 years; and whether her Department has adopted targets on energy efficiency improvements in the buildings it occupies over the next (A) five and (B) 10 years. [220469]

Caroline Flint: The Department's policy on improving energy efficiency of the buildings it rents and owns is included in its Sustainable Operations Policy, a copy of which can be found in the Library of the House.

Numerous changes have been made to improve the energy efficiency of the buildings occupied over the last five to 10 years. Our records do not identify the years during this period in which specific measures were taken.

In 2006-07, the Department reported an energy efficiency improvement of 4 per cent. and 18 per cent. in the buildings occupied by its London HQ and its Executive agencies respectively, compared to 2002-03 levels.

The Department has mandatory energy efficiency targets which apply to all central Government Departments and their Executive agencies. These targets for Sustainable Operations on the Government Estate require the Department to:

increase energy efficiency per m^2 by 15 per cent. by 2010 and by 30 per cent. by 2020, relative to 1999-2000 levels; and

reduce carbon emissions by 12.5 per cent. by 2010-11, and by 30 per cent. by 2020 relative to 1999-2000 levels.

The Department also intends to act upon those opportunities identified in the Advisory Reports for its Energy Performance Certificates and Display Energy Certificates as a further means to improve the energy efficiency of the buildings it rents and owns.

Departmental ICT

Mr. Philip Hammond: To ask the Secretary of State for Communities and Local Government what information technology projects initiated by her Department and its predecessors have been cancelled prior to completion in the last five years; and what the cost of each such project was to the public purse. [221715]

Caroline Flint: I refer the hon. Member to the answer given to the hon. Member for Twickenham (Dr. Cable), of 18 December 2006, *Official Report*, column 1644W. The Department has nothing further to report by way of cancelled information technology projects since.

Departmental Pay

Mr. Philip Hammond: To ask the Secretary of State for Communities and Local Government how much was claimed in reimbursable expenses by press officers in her Department and its agencies in each of the last three financial years. [221183]

Caroline Flint: The amount claimed in travel and subsistence by press officers in the Department and its predecessor Department, Office of the Deputy Prime Minister, for each of the financial years has been:

Financial year	£
2005-06	[1]3,951
2006-07	3,022
2007-08	2,676

[1] ODPM

Departmental Procurement

David Simpson: To ask the Secretary of State for Communities and Local Government what her Department's policy is on requesting discounts from its suppliers in return for swift payment of invoices. [220439]

Mr. Iain Wright: The primary Departmental Procurement Policy is to achieve value for money.

Procurement therefore considers a range of measures to achieve value for money, including the attainment of discounts in return for prompter payment of invoices.

Departmental Public Participation

Mr. Pickles: To ask the Secretary of State for Communities and Local Government pursuant to the answer to the right hon. Member for Maidenhead, of 8 July 2008, *Official Report*, columns 1499-1500W, on departmental publication participation, if she will place in the Library a copy of the research and reports produced in relation to *(a)* the code for sustainable homes, *(b)* home information packs, *(c)* accountability of local services and *(d)* employee engagement workshop. [221306]

Caroline Flint: The following have been placed in the Library:

Code for Sustainable Homes, trade interviews

Home Information Packs, attitudes among buyers, sellers and estate agents

Accountability of Local Government Services omnibus poll, tables of the responses

Employee Engagement workshop: The workshop was part of a wider employment engagement survey with the Cabinet Office. The workshop outcomes were debriefed verbally to the Cabinet Office as an aid to the design of the questionnaire for the survey.

Eco-towns: Nature Conservation

Lembit Öpik: To ask the Secretary of State for Communities and Local Government (1) by what means the Eco Towns Challenge Panels plans to take account of expertise in biodiversity and wildlife management and protection in the course of its work; [219527]

(2) what steps she is taking to ensure that the establishment and development of eco-towns does not undermine the preservation and protection of biodiversity. [219528]

Caroline Flint: The preservation of important wildlife and landscape assets is one of the key criteria for new eco-towns. The Eco-town Challenge Panel is an independent group of people with expertise in various aspects of urban and sustainable development. The Panel exists to encourage bidders by challenging them to improve and develop their proposals to the point where they can be regarded as truly exemplary projects, which fit well within their surroundings, demonstrate innovative approaches to sustainable development and represent a 'step change' beyond what would currently be regarded as best practice. Of the members of the Challenge Panel, three are experts in environmental issues.

Natural England, Government's agency working to conserve, enhance and manage the natural environment, was fully involved in the initial assessment and shortlisting of the eco-town proposals. Furthermore, there will shortly be a second Government consultation on a sustainability appraisal, which provides a more detailed assessment of locations, and a draft Planning Policy Statement, before we identify a final list. These locations will then need to go through the planning process and be subject to full public scrutiny, where impacts on biodiversity and natural assets will be key considerations at all stages.

The sustainability appraisal will consider the environmental, economic and social impacts of eco-towns policy both nationally and in the proposed locations. This will take account of work that local authorities may have already undertaken to test development options in their area and as part of the testing process we will also consider the habitats directive.

Empty Property

Mr. Pickles: To ask the Secretary of State for Communities and Local Government (1) what reports her Department has received of cases of intentional property demolition to avoid empty property business rates in the latest period for which figures are available; [221222]

(2) pursuant to the answer to the hon. Member for Welwyn Hatfield, of 9 July 2008, *Official Report*, column 1637W, on non-domestic rates: empty property, if she will list each of the possible incidences reported to her Department, including the location and the nature of the alleged deliberate dilapidation. [221309]

John Healey: As I indicated in my answer to the hon. Member for Welwyn Hatfield (Grant Shapps) on 9 July 2008, *Official Report*, column 1637W, the Government have asked local authorities to provide information about how reforms to the empty property rate are working. The information provided will be based on the informed judgment of individual local authority officers and is being gathered as a broad indicator of the scale of possible avoidance activity and not a detailed survey. We will set out in an appropriate form our general findings in due course.

Housing

Mr. Bone: To ask the Secretary of State for Communities and Local Government how many new homes are planned to be built in *(a)* North Northamptonshire and *(b)* England in the next five years. [206832]

Caroline Flint: Over 2008-12, the adopted East Midlands Regional Spatial Strategy sets out plans for 13,405 net additional dwellings in North Northamptonshire. Regional Spatial Strategies are currently under review to ensure delivery against the national target of 240,000 additional homes a year by 2016, as set out in last year's housing Green Paper.

Housing: Bournemouth

Mr. Ellwood: To ask the Secretary of State for Communities and Local Government what the housing density is of Bournemouth. [220397]

Mr. Iain Wright: Information on housing density is not compiled centrally.

We do however have the density of new build dwellings averaged over a four-year period. These are provided at local authority level on the CLG website in Live table P232. The web address for Live table P232 is:

http://www.communities.gov.uk/documents/planningandbuilding/xls/822906.xls

The average density of new build dwellings for the period 2003 to 2006 for the unitary authority of Bournemouth was 70 dwellings per hectare.

Housing: Construction

Mr. Lilley: To ask the Secretary of State for Communities and Local Government whether local planning authorities can meet their house building targets by proposing development of land in other counties; and what powers they have of compulsory purchase in such circumstances. [221508]

Mr. Iain Wright *[holding answer 22 July 2008]:* The regional strategy preparation process, which involves input from local authorities, sets housing numbers for districts. These take into account the need and demand for housing within housing market areas and the strategic availability of land within individual districts. Therefore these numbers should be planned for by individual districts but we encourage joint working between districts in doing this.

The Local Government Act 1972 gives local authorities a qualified right to purchase land compulsorily outside their areas. Whether this is possible in any given case will depend on the specific enabling power to be used.

Housing: Immigrants

Lembit Öpik: To ask the Secretary of State for Communities and Local Government what proportion of economic migrants entering the UK in each of the last five years have been housed in the *(a)* owner-occupied, *(b)* social rented and *(c)* private rented sector. [219524]

Mr. Iain Wright: Information on the current housing tenure of economic migrants who entered the UK during the past five years is not available.

However, the Department has information from the Survey of English Housing for 2005-06 and 2006-07 on the total number of recent migrant householders by housing tenure. It is estimated that of all migrant householders who arrived in the UK during the past two years and are currently living in England: 3 per cent. are in owner occupation; 7 per cent. are in the social rented sector; and 90 per cent. are in the private rented sector.

Housing: Lancashire

Rosie Cooper: To ask the Secretary of State for Communities and Local Government what steps her Department has taken to assist first-time buyers with property purchase; and which of these are available to those seeking to buy property in West Lancashire constituency. [221743]

Mr. Iain Wright: The Government's Low Cost Home Ownership programme helps to make home ownership more affordable to first time buyers, and enables purchasers get a foot on the property ladder through its HomeBuy products: New Build HomeBuy, Open Market HomeBuy and Social HomeBuy.

New Build HomeBuy enables people to buy a minimum 25 per cent. share of a newly built property, paying a rent on the remainder. This includes the First Time Buyers Initiative.

Open Market HomeBuy enables people to buy a property on the open market with the help of an equity loan of up to 50 per cent.

Social HomeBuy enables tenants of participating local authorities and housing associations to buy a minimum 25 per cent. in their current home at a discount and pay rent on the remainder.

We have helped over 65,000 people into home ownership over the last three years, and as set out in the Housing Green Paper, we aim to help 75,000 more householders on to the property ladder over the next three years. The Government have recently announced a package of new initiatives to help more first time buyers, nationally, into affordable home ownership.

From 1 April two new equity loan products have been available through the Government's Open Market HomeBuy scheme. The loans provide first time buyers with more flexibility in the percentage of the value of their home that can be borrowed—to a maximum of 50 per cent., and more choice in the mortgage they can take out.

A new cash grant of £1,500 is available to the first 2000 purchasers who take-up the new equity loans to help with the costs of purchasing their first home. From 14 May we:

expanded the Open Market HomeBuy scheme to help 2,500 first time buyers to purchase a new build home in 2008-09;

introduced flexibility for purchasing unsold stock from housebuilders for social rent or low cost home ownership;

expanded the flexibility criteria so that all first time buyers with a household income under £60,000 will be eligible for our HomeBuy scheme.

Finally, last week we announced a new 'Rent to HomeBuy' scheme to support first time buyers into affordable home ownership by renting first and buying later.

Our Low Cost Home Ownership products, including the recent package of new initiatives, are available to first time buyers in West Lancashire.

Housing: Leeds

John Battle: To ask the Secretary of State for Communities and Local Government how many new homes were built in *(a)* Leeds West constituency and *(b)* Leeds Metropolitan District which were heated by (i) gas and (ii) electricity in the latest period for which figures are available; and if she will make a statement. [220769]

Mr. Iain Wright: Data are not available for Leeds, West constituency but the Department publishes new build completions by district on its website. The number of new build completions as reported for the Leeds local authority area in 2007-08 is 3,052. The Department's statistics for new home completions do not include details of the form of heating used.

Housing: Low Incomes

Sarah Teather: To ask the Secretary of State for Communities and Local Government what proportion of social housing in each London borough is not of Decent Homes standard. [219277]

Mr. Iain Wright: The Department collects information on non-decent social sector homes from local authorities through the Business Plan Statistical Appendix (BPSA) annual return. Figures are provided in Table 1.

Table 1: Non-decent homes owned by local authorities[1] at 1 April 2007, by London borough

	Non-decent homes	*Percentage of total local authority stock non-decent*

[1] Retention authorities and Arm's Length Management Organisations only.
[2] LSVT—Large Scale Voluntary Transfer. One of the three options set out by Government for those authorities that need extra funding to meet the required Decent Homes standard. LSVT aims to deliver improved performance and services ensuring the extra money is spent cost-effectively. The council is free to focus on more strategic housing functions.

Housing Corporation's Regulatory Statistical Return (RSR) Part O.

Housing: Standards

Mr. Betts: To ask the Secretary of State for Communities and Local Government if she will incorporate accessible housing standards into her definition of sustainable communities. [219797]

Caroline Flint: Accessible housing is already reflected in our current definition of a sustainable community which includes a place that is inclusive to all and meets the diverse needs of all residents. Our commitment to this is reflected in our national planning policy in Planning Policy Statement 3 (Housing) which is clear about creating places, streets and spaces which are inclusive and respect the diverse needs of communities and the special needs of particular sectors of the community.

In February 2008, we published, "Lifetime Homes. Lifetime Neighbourhoods: A National Strategy for Housing in an Ageing Society", which sets out a clear strategy for encouraging the development of 'Lifetime Homes Standards'(LHS). LHS aim to make housing accessible for all by making it more functional for everyone including families, disabled and older people and adaptable to peoples changing circumstances throughout the whole lifetime of the home. Our aspiration is to see all homes built to Lifetime Homes Standards by 2013 and we will ensure that all publicly funded housing is built to Lifetime Homes Standards by 2011. It is currently a mandatory element of the Code for Sustainable Homes at code level 6 and will become mandatory at code levels 4 and 5 from 2010 and code level 3 from 2013. We will continue to work with stakeholders to encourage take up of the standards across all sectors and progress will be reviewed in 2010.

Local Government: Administration

Mr. Pickles: To ask the Secretary of State for Communities and Local Government what the timetable is for the introduction of new leadership models in local government by *(a)* tier and *(b)* type of council. [221524]

John Healey: The timetable, specified by the Local Government and Public Involvement in Health Act 2007, for the introduction of new leadership models in local government, provides that in any council with the old style leader and cabinet model, the new model must be implemented three days after the ordinary election day in the year shown in the following table.

Type of local authority	*Year for introduction of new model*
County council	2009
Metropolitan district council	2010
London borough council	2010
Non-metropolitan district council	2011

The Act also provides that a council operating the mayor and council manager model must implement a new leadership model in 2009, and that councils operating alternative arrangements may choose to adopt a new leadership model and introduce it in 2011.

In addition, where a council is introducing a new leadership model following a referendum, the model is implemented three days after the first ordinary election of councillors to the authority held after the council resolves to adopt the model, which must be within 28 days of the referendum being held.

Local Government: Contracts

Mr. Sharma: To ask the Secretary of State for Communities and Local Government what steps her Department is taking to ensure that the Office of Government Commerce monitors local authorities' compliance with its relevant codes of practice during the tendering process for local government contracts. [221687]

John Healey: Subject to their legal duties local authorities are responsible for taking their own procurement decisions. In doing so, they must work within the legal framework governing public procurement. They also have regard to policy and guidance on public procurement set out by the Office of Government Commerce (OGC), as appropriate. The OGC does not directly monitor local authorities' compliance with the legal framework or with its policy and guidance.

Non-Domestic Rates: Valuation

Mr. Pickles: To ask the Secretary of State for Communities and Local Government pursuant to the Answer to the hon. Member for Welwyn Hatfield of 7 July 2008, *Official Report*, column 1361W, on non-domestic rates: valuation, how sub-location is quantified; and what geo-spatial datasets and neighbourhood modelling is used for *(a)* business rate valuations and revaluations and *(b)* the new Automated Valuation Model for business rates. [221157]

John Healey: A sub-location for a class of property for non-domestic rating is an area within which values are related and a valuation scheme can be applied. They vary in size depending on class of property and locality. The geo-spatial datasets used for non-domestic rating and revaluations are (i) Property Address and Postcode and (ii) Sublocation.

I refer the hon. Member to the answer I gave him on 18 December 2007, *Official Report*, column 1301W. A new automated valuation (AVM) model is not being used by the VOA for business rate valuations or revaluations.

Planning Permission: Appeals

Mr. Wallace: To ask the Secretary of State for Communities and Local Government what financial assistance from the public purse is available to individuals who wish to challenge planning decisions. [221657]

Mr. Iain Wright: There is no financial assistance from the public purse available to individuals wishing to appeal against planning decisions to the Secretary of State or third parties wishing to put forward representations in relation to these appeals. In these cases, parties are expected to meet their own costs.

Although it does not provide financial assistance, Planning Aid offers free, independent planning advice to individuals and community groups (including small charities, voluntary groups and tenants' organisations).

Individuals who wish to challenge planning decisions in the courts may be able to receive financial assistance from Legal Aid, if they are eligible to do so.

Regional Planning and Development: Finance

Mr. Pickles: To ask the Secretary of State for Communities and Local Government what the expenditure of *(a)* regional assemblies and *(b)* the English regions network was in 2007-08. [221216]

John Healey: Central Government grant to regional assemblies in 2007-08 was £21,192,290. Grant to the English Regions Network was £244,000. Most regional assemblies receive additional funding through local authority member subscriptions. Total expenditure will be reflected in their published accounts.

Regulation of Investigatory Powers Act 2000

Mr. Pickles: To ask the Secretary of State for Communities and Local Government what guidance her Department and its agencies have given to local authorities on the use of powers under the Regulation of Investigatory Powers Act 2000 for planning enforcement purposes. [221227]

Mr. Iain Wright: None. Local authorities' access to communications data and use of directed surveillance and covert human intelligence sources is governed by secondary legislation made under the 2000 Act. This restricts local council access and use of these techniques to the purpose of preventing or detecting crime or disorder in the carrying out of their functions. RIPA requires that their use is necessary and proportionate with regard to human rights and that the information they are designed to obtain cannot be obtained by less intrusive means.

Valuation Office

Mr. Pickles: To ask the Secretary of State for Communities and Local Government with reference to the minutes of the Valuation Office Agency local

authority liaison group meeting of 17 May 2007, if she will place in the Library copies of each edition of the BA Newsletter from the last 36 months. [221224]

John Healey: These IT Newsletters to Billing Authorities are available on the Valuation Office Agency website www.voa.gov.uk.

Mr. Pickles: To ask the Secretary of State for Communities and Local Government if she will place in the Library a copy of the Valuation Office Agency's E-Bars Project Post Implementation Review report as sent to members of the local authority liaison group. [221225]

John Healey: A copy of the Electronic BA Reports (E-BARS) Post Implementation Review Report has been placed in the Library.

Mr. Pickles: To ask the Secretary of State for Communities and Local Government if she will place in the Library a copy of the minutes of the Valuation Office Agency local authority liaison group meeting of 23 July 2008 when they are available. [221226]

John Healey: Minutes of the Local Authority Liaison Group meetings are already available on the VOA website at

http://www.voa.gov.uk/publications/index.htm.

Valuation Office: Council Tax

Mr. Pickles: To ask the Secretary of State for Communities and Local Government with reference to page 54 of the Valuation Office Agency Annual Report and Accounts 2007-08, HC 583, to which organisations council tax information is sold; and what categories of property data is sold. [221532]

John Healey: All of the income from Sale of Rating/ Council Tax information reported on Page 54 of the Valuation Office Agency (VOA) Annual Report and Accounts 2007-08 is derived from the sale of compilations of the published non domestic rating list and summary valuation data.

Valuation Office: Databases

Mr. Pickles: To ask the Secretary of State for Communities and Local Government pursuant to the Answer to the hon. Member for Welwyn Hatfield of 7 July 2008, *Official Report*, column 1365W, on Valuation Office: databases, whether the property information being scanned in includes *(a)* the plot size of a property, *(b)* dimensions of gardens and *(c)* internal layouts of domestic dwellings. [221152]

John Healey: Such information is included in the scanning only to the extent that it appears on the hard-copy record being scanned. This may include details about the internal layout of dwellings but it is rare for information about plot size and/or the dimensions of gardens to feature in individual records.

DUCHY OF LANCASTER

Business: Expenditure

Mrs. May: To ask the Chancellor of the Duchy of Lancaster how much the Office of National Statistics' survey into business spending cost; what the cost per question was; how many responses have been received; and what action is being *(a)* taken and *(b)* planned as a result of the survey. [218590]

Mr. Watson: The information requested falls within the responsibility of the UK Statistics Authority. I have asked the Authority to reply.

Letter from Karen Dunnell, dated 1 September 2008:

As national statistician, I have been asked to reply to your recent parliamentary question concerning how much the ONS Business Spending on Capital Items Survey (BSCIS) cost; what the cost per question was; how many responses have been received; and what action is being *(a)* taken and *(b)* planned as a result of the survey.

(218590)

The BSCIS is one of the measures introduced by ONS to improve the quality of official statistics as part of the departmental spending review (DSR) package of surveys agreed in 1998-99. The survey was set up to monitor spending on capital expenditure in more detail. It is a small annual survey consisting of a sample of 2,500 businesses covering most sectors of the economy. Questionnaires are not sent to businesses with fewer than 100 employees.

Table of survey information:

	Number
Questionnaires sent per year	2,500
Questionnaires received per year (Approx 80 per cent. response)	2,000
Questions per questionnaire	101

Table of survey costs

	Total	*To business*	*To ONS*
Cost per survey[1] (£'000)	270	140	130
Cost per questionnaire (£)	105	55	50
Cost per question (£)	1.0	0.5	0.5

[1] Business cost as published for 2006-07

The information collected from the BSCIS is used to improve the estimate of gross domestic product (GDP). The information is used to break down capital expenditure estimates to a product level to allow more accurate deflation, seasonal adjustment and supply-use balancing of the national accounts. There is no alternative data source that can be used to produce the consistent and coherent detail required.

The results from the survey are published in January of each year on the ONS website at:

http://www.statistics.gov.uk/StatBase/Product.asp?vlnk=8167&Pos=1&ColRank=1&Rank=272

Cancer: Buckinghamshire

Mr. Lancaster: To ask the Chancellor of the Duchy of Lancaster how many people were diagnosed with cancer in *(a)* Milton Keynes and *(b)* Buckinghamshire in each of the last five years. [214948]

Mr. Watson: The information requested falls within the responsibility of the UK Statistics Authority. I have asked the Authority to reply.

Letter from Karen Dunnell, dated June 2008:

As National Statistician I have been asked to reply to your recent Parliamentary Question asking how many people were diagnosed with cancer in (a) Milton Keynes and (b) Buckinghamshire in each of the last five years. [214948]

The latest available figures for newly diagnosed cases (incidence) of cancer are for the year 2005. Figures requested are given in the table below.

Numbers of newly diagnosed cases of cancer[1] registered in Milton Keynes unitary authority and Buckinghamshire county, 2001 to 2005

Persons

	Milton Keynes	*Buckinghamshire*
2001	837	2,149
2002	793	2,170
2003	779	2,171
2004	915	2,340
2005	820	2,236

[1] All cancers, excluding non-melanoma skin cancer, are classified according to the International Classification of Diseases, Tenth Revision (ICD-10): C00-C97 excluding C44

Source:
Office for National Statistics

Civil Service: Pensions

Mr. Philip Hammond: To ask the Chancellor of the Duchy of Lancaster when he will publish the 2007-08 resource accounts for the Principal Civil Service Pension Scheme. [221172]

Mr. Watson: The 2007-08 Resource Accounts for the Principal Civil Service Pension Scheme will be laid after the House returns in the autumn.

Cost of Living

Sarah Teather: To ask the Chancellor of the Duchy of Lancaster what estimate he has made of the average increase in *(a)* fuel prices, *(b)* food prices, *(c)* house prices and *(d)* salary in each English region in each of the last five years. [219579]

Mr. Watson: The information requested falls within the responsibility of the UK Statistics Authority. I have asked the Authority to reply.

Letter from Karen Dunnell, dated July 2008:

As National Statistician, I have been asked to reply to your recent Parliamentary Question asking what estimate has been made of the average increase in (a) fuel prices, (b) food prices, (c) house prices and (d) salary in each English region in each of the last five years. (219579)

Fuel and food prices for items included in the Consumer Prices Index (CPI) are collected each month by the Office for National Statistics (ONS). Estimates are not produced at a regional level. Average increases at a national level for the last five years can be found at the following link:

http://www.statistics.gov.uk/statbase/tsdtables1.asp?vlnk=mm23

Average increases in house prices are recorded and published by the Department for Communities and Local Government (DCLG). This information can be found via Live Table 593 at the following link:

http://www.communities.gov.uk/housing/housingresearch/housingstatistics/housingstatisticsby/housingmarket/livetables/

Average levels of earnings are estimated from the Annual Survey of Hours and Earnings (ASHE), and are provided for all employees on adult rates of pay whose pay for the survey period was not affected by absence. The ASHE, carried out in April each year, is the most comprehensive source of earnings information in the United Kingdom. It is a sample of all employees who are members of pay-as-you-earn (PAYE) schemes.

A table showing the percentage increase in median gross weekly earnings for full-time employees in each English region for the years 2003-2007 is attached. A table giving mixed-adjusted house price inflation is available from the House of Commons Library.

Percentage increase in median gross weekly earnings for full-time employees in each English region for the years 2003-07

	North East	*North West*	*Yorkshire and The Humber*	*East Midlands*	*West Midlands*	*East*	*London*	*South East*	*South West*
2003	1	3	4	5	3	4	4	4	5
2004	7	5	5	3	5	4	5	4	3
2005	4	3	2	6	3	2	3	1	2
2006	4	4	3	4	3	4	3	4	4
2007	2	4	3	0	4	2	2	3	3

Source:
Annual Survey of Hours and Earnings, Office for National Statistics

Council Tax

Mr. Pickles: To ask the Chancellor of the Duchy of Lancaster pursuant to the answer to the hon. Member for Blaby of 8 July 2008, *Official Report*, column 1569-70W, on cost of living, what assessment the UK Statistics Authority has made of the effect of higher council tax on the cost of living since 1997. [221284]

Mr. Watson: The information requested falls within the responsibility of the UK Statistics Authority. I have asked the Authority to reply.

Letter from Karen Dunnell, dated 1 September 2008:

As National Statistician I have been asked to reply to your recent parliamentary question asking what assessment has been made of the effects of council tax on the cost of living since 1997. (221284)

Retail Prices Index (RPI) and the Consumer Prices Index (CPI), both measure the change in the prices of goods and services bought for the purpose of consumption by the vast majority of households in the UK. Of these the RPI is the only measure which includes council tax and rates.

For the period between June 1997 and June 2008 the council tax and rates increased by 95.9 per cent. Over the same period the RPI increased by 37.7 per cent.

Departmental Alcoholic Drinks

David Simpson: To ask the Chancellor of the Duchy of Lancaster (1) what measures are in place in the Cabinet Office to monitor expenditure on alcohol for hospitality purposes; [219606]

(2) what purchasing process is used by his Department for the procurement of alcohol for hospitality purposes. [219947]

Phil Hope: All proposals to purchase alcohol for hospitality purposes need the prior approval pf the Cabinet Office Finance Director. The purchase of alcohol, which may be via the Government Procurement Card, by invoice or by a staff claim is monitored by the Cabinet Office Financial Management Team.

Departmental Energy Efficiency

Mr. Betts: To ask the Chancellor of the Duchy of Lancaster what his Department's policy is on improving the energy efficiency of the buildings which it *(a)* rents and *(b)* owns; what changes there have been in the energy efficiency of such buildings in the last (i) five and (ii) 10 years; and whether his Department has adopted targets on energy efficiency improvements in the buildings it occupies over the next (A) five and (B) 10 years. [221081]

Mr. Watson: The Department's energy policy is to meet the sustainable operations in government SOGE targets and ensure value for money.

The Cabinet Office has participated in the Carbon Trust Carbon Management programme for all buildings that it has influence or control over. It has developed an ongoing action plan which includes projects such as installing lighting controls and improving insulation.

Any major refurbishment or new build the Cabinet Office undertakes will endeavour to meet BREEAM excellent standard wherever this is possible in the context of the historic listed nature of much of the Department's estate.

It currently purchases either green or CHP energy for all its buildings.

Mr. Betts: To ask the Chancellor of the Duchy of Lancaster what account his Department takes of the level of energy efficiency of buildings before entering into agreements to *(a)* rent and *(b)* purchase those buildings. [221097]

Mr. Watson: The Cabinet Office has no plans to acquire any new freehold or leased property. In the event that this was to be considered energy efficiency would be an important factor in the decision-making process.

Departmental ICT

Mr. Philip Hammond: To ask the Chancellor of the Duchy of Lancaster what information technology projects initiated by his Department have been cancelled prior to completion in the last five years; and what the cost of each such project was to the public purse. [221718]

Mr. Watson: The Cabinet Office initiated one major IT project that was cancelled prior to completion in the last five years. For information regarding this project I refer the hon. Member to the answer given to the hon. Member for Bridgwater (Mr. Liddell-Grainger) on 14 December 2005, *Official Report*, columns 2057-58W, by the then Parliamentary Secretary for the Cabinet Office (Mr. Murphy).

In respect of the SCOPE Programme I refer the hon. Member to the answer given to the hon. Member for Lewes (Norman Baker) on 6 November 2006, *Official Report*, column 862W by the then Chancellor of the Duchy of Lancaster (Hilary Armstrong). However, we have recently informed the Phase 2 contractor of SCOPE that a different approach to the delivery of those capabilities is needed.

Departmental Marketing

Pete Wishart: To ask the Chancellor of the Duchy of Lancaster what the cost was of *(a)* internet and website design and hosting, *(b)* print media design and *(c)* broadcast media of each of his Department's public information campaigns since 1997. [214679]

Mr. Watson: The Cabinet Office's records do not distinguish the cost of internet web design and hosting; and print media design from our overall budget. This information can be provided only at disproportionate cost.

Significant advertising campaigns in support of specific policies are managed centrally through Cabinet Office Communications and placed through the Central Office of Information (COI).

Details of campaigns involved broadcast media are shown in the following table:

	£
Preparing for Emergencies 2004-05	
Gross television airtime budget	2,009,550
Gross radio airtime budget	532,606
Direct Gov—Consumer Campaign	
Gross television airtime budget 2005-06	343,869

Departmental Overtime

Mr. Hoban: To ask the Chancellor of the Duchy of Lancaster what the cost of overtime payments paid to staff in his Department was in each of the last 12 months, broken down by pay grade. [221299]

Mr. Watson: The cost of overtime payments paid to Cabinet Office staff in each of the last 12 months broken down by grade is detailed in the following table:

£

	2007						2008					
	Jul	Aug	Sep	Oct	Nov	Dec	Jan	Feb	Mar	Apr	May	Jun
A	14,541	16,392	4,368	8,917	15,585	14,293	10,833	9,823	10,704	12,981	9,882	10,200
B2	12,237	10,859	10,501	11,361	21,696	14,163	20,254	13,585	17,423	17,364	14,543	17,136
B-Fst	1,973	1,709	2,604	1,261	2,338	3,154	2,611	3,334	3,897	1,998	1,915	2,749
B1	27,547	27,480	20,791	20,669	41,266	29,857	30,011	28,669	33,449	31,015	33,220	34,265
C	21,778	22,508	23,044	19,635	24,575	21,218	26,278	19,269	22,186	21,560	24,043	29,453
TIS	13,425	14,264	16,010	12,381	13,234	12,223	14,635	12,053	11,496	14,335	9,647	13,173

Mr. Hoban: To ask the Chancellor of the Duchy of Lancaster how many hours of overtime were worked by staff in each pay grade in the Prime Minister's Office in each of the last 12 months. [221236]

Mr. Watson: The Prime Minister's Office forms part of the Cabinet Office. The number of hours overtime worked by the Cabinet Office staff in each month from April 2007 to March 2008 broken down by grade is detailed in the following table:

Number

	2007									2008		
	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec	Jan	Feb	Mar
A	954	781	733	1,457	1,025	781	585	1,217	662	937	1,144	1,239
B2	1,481	1,212	1,387	1,842	1,858	1,283	1,345	1,918	1,387	883	1,948	1,538

TIS	855	724	710	877	880	505	697	889	538	428	675	785

Government Communications

Mr. Hoban: To ask the Chancellor of the Duchy of Lancaster what externally accredited qualifications are included in the development programme available to Government Communication Network members. [215154]

Mr. Watson: There are no externally accredited qualifications included in the development programme.

National School of Government

Mr. Baron: To ask the Chancellor of the Duchy of Lancaster how much remuneration *(a)* Cabinet Ministers, *(b)* Ministers of State, *(c)* Parliamentary Under-Secretaries and *(d)* Parliamentary Private Secretaries received in respect of lectures given to the National School of Government and its predecessors in each of the last 10 years, broken down by department. [220070]

Mr. Watson *[holding answer 21 July 2008]:* The information requested falls within the responsibility of the National School of Government. I have asked the National School's Chief Executive and Principal to reply.

Letter from Robin Ryde, dated 28 July 2008:

In the Written Ministerial Statement to the House on 9 January 2007 (Official Report Col 5WS), the then Parliamentary Secretary for the Cabinet Office (Pat McFadden MP) announced that the National School of Government was now a Non Ministerial Department. Consequently, the Chancellor of the Duchy of Lancaster has asked me to reply to your Parliamentary Question about the National School of Government.

No serving Ministers (Secretaries of State, Ministers of State or Parliamentary Secretaries) have been paid to contribute to events run by the National School since its establishment in 2005. This is also true for predecessor organisations for the period 1998-2005.

No Parliamentary Private Secretaries have been paid to contribute to events run by the National School since its establishment in 2005. The then Civil Service College paid £120 to one Parliamentary Private Secretary to contribute to a course in 1999. This is the only instance of which we are aware in 1998-2005.

Voluntary Organisations: Learning Disability

Rosie Cooper: To ask the Chancellor of the Duchy of Lancaster what assessment he has made of the potential contribution that third sector organisations can make to the delivery of public services for those with learning difficulties. [221676]

Mr. Ivan Lewis: I have been asked to reply.

The extensive consultation we carried out for Valuing People Now included members of the public and third sector organisations. We are planning to publish the final "Valuing People Now" in the autumn after everybody's responses have been fully considered. This policy is in line with the Department's work to promote a greater plurality of provision (including service providers from the third sector) to increase capacity, encourage innovation, improve user responsiveness and ultimately improve health and wellbeing.

A great deal of work has been undertaken by the Department to remove barriers to third sector organisations

entering the market and ensuring that there is a fairer playing field through the work of the Third Sector Commissioning Taskforce.

The National Director for Learning Disabilities chairs the learning disability task force, which includes representatives of the nation forum for people with learning disabilities and key third sector groups, including MENCAP.

BUSINESS, ENTERPRISE AND REGULATORY REFORM

Foreign Companies

Mr. MacShane: To ask the Secretary of State for Business, Enterprise and Regulatory Reform whether he has made an estimate of the number of foreign-owned businesses in the UK; and if he will make a statement. [217550]

Mr. Watson: I have been asked to reply.

The information requested falls within the responsibility of the UK Statistics Authority. I have asked the Authority to reply.

Letter from Karen Dunnell, dated July 2008:

As National Statistician, I have been asked to reply to your question concerning the number of foreign-owned businesses in the United Kingdom. (217550)

At March 2007 there were approximately 25,400 enterprises live in the UK owned by a foreign company. This estimate is taken from the UK response to the 2007 Eurostat Registers Questionnaire, submitted to the European Commission. Analysis is based on the national identity of the ultimate owner of an enterprise group.

DEFENCE

Afghanistan: Drugs

Anne Main: To ask the Secretary of State for Defence what the value is of illegal drugs seized by British troops in Afghanistan in the last 12 months; and if he will make a statement. [221396]

Des Browne: The Afghan authorities have the lead for counter-narcotic activity, but under the terms of the current NATO Operational Plan (OPLAN), ISAF forces may support them, including through support to interdiction operations. ISAF forces hand over any drugs, associated equipment, and traffickers to the Afghan authorities at the earliest possible opportunity.

In the absence of any ISAF requirement to record details of narcotic seizures, UK forces have to date not retained a central record of drug seizures, and any attempt to provide one would come at disproportionate cost.

Afghanistan: Peacekeeping Operations

Dr. Fox: To ask the Secretary of State for Defence pursuant to the answer of 9 June 2008, *Official Report*, column 62W on Afghanistan: peacekeeping operations, what types of projects were covered by the term 'other' in the table; and whether each project is completed, ongoing or planned. [210912]

Mr. Bob Ainsworth: The projects listed as 'other' in my previous answer referred to projects involving bridge construction, bazaar regeneration, water towers, repair or construction of Government buildings, repair or provision of essential services, and projects aimed at supporting social and economic development. Of these projects, 61 per cent. are completed, 10 per cent. are on-going and 29 per cent. are planned.

In researching this answer it was identified that the table in my previous answer to the hon. Member for Bournemouth, East (Mr. Ellwood) was incorrect. The correct number of projects is shown in the following table:

		Location			
Type of Project	*Status*	*Lashkar Gar*	*Gereshk*	*Sangin*	*Musa Qal'eh*
Education	Completed	6	4	1	0
	Ongoing	2	1	1	1
	Planned	0	4	0	1
Security and Rule of Law	Completed	20	4	1	0
	Ongoing	8	6	4	2
	Planned	5	3	1	1
Health	Completed	8	3	0	1
	Ongoing	1	1	0	1
	Planned	2	2	1	0
Roads	Completed	0	1 (25km)	0	1 (6.4km)
	Ongoing	2 (4km)	1 (5km)	1 (0.3km)	1 (0.6km)
	Planned	0	2 (2km)	1 (2.2km)	0
Mosques/ religious centres	Completed	1	1	0	5
	Ongoing	1	1	1	1
	Planned	0	4	0	0
Other	Completed	27	13	7	2
	Ongoing	1	1	1	5
	Planned	0	14	8	1
Total	Completed	62	26	9	9
	Ongoing	15	11	8	11
	Planned	7	29	11	3
Grand total		84	66	28	23

Mr. Hollobone: To ask the Secretary of State for Defence what recent discussions he has had with his NATO counterparts on an increased deployment of their armed forces in Afghanistan. [220073]

Des Browne *[holding answer 21 July 2008]:* I discuss regularly with my NATO counterparts force levels in Afghanistan, including at a meeting of NATO Defence Ministers on 12-13 June.

Mr. Hancock: To ask the Secretary of State for Defence on how many occasions live munitions have been launched from MQ-9 Reaper unmanned aerial vehicles controlled by the RAF over Afghanistan; and how many *(a)* combatants have been killed and *(b)* non-combatants have been killed and injured as a result of such launches. [220468]

Des Browne: UK Reaper unmanned aerial vehicles operating over Afghanistan have been used successfully to launch munitions on seven occasions. I am withholding details of these engagements as disclosure would, or would be likely to prejudice the capability, effectiveness or security of the armed forces.

Mr. Hancock: To ask the Secretary of State for Defence how many flying hours have been recorded by unmanned aerial vehicles in *(a)* Iraq, *(b)* Afghanistan and *(c)* elsewhere in each of the last four quarters, broken down by vehicle type. [220476]

Des Browne: The flying hours recorded for unmanned aerial vehicles in Iraq and Afghanistan are shown as follows.

	Hermes 450	*Reaper*
Iraq		
Q3 2007	1,143	—
Q4 2007	1,270	—
Q1 2008	1,113	—
Q2 2008	1,127	—
Afghanistan		
Q3 2007	270	500
Q4 2007	1,351	500
Q1 2008	1,412	500
Q2 2008	1,582	500

The figures shown for Reaper are average figures.

The Army also operates Desert Hawk III unmanned aerial vehicles, but flight times are only recorded as a total figure and not in the format requested. The total hours flown in each theatre for the same period are 1,871 in Iraq, and 1,217 in Afghanistan.

Anne Main: To ask the Secretary of State for Defence what recent reports he has received on the impact of attacks on convoys to Musa Qala, Helmand Province, Afghanistan, on water supplies for British troops serving in that Province. [221395]

Des Browne: I have received no reports suggesting that attacks on convoys to Musa Qala, Helmand Province, have had an impact on drinking water for British troops serving in that Province.

Afghanistan: Reconstruction

Nick Harvey: To ask the Secretary of State for Defence what quick impact projects have been undertaken by the Royal Engineers and the Army in Afghanistan since 2001. [218450]

Des Browne: The Royal Engineers, through their construction supervision cell, have managed 201 Quick Impact Projects since 2001, including building schools, medical clinics, roads, irrigation channels and electrical networks.

Armed Forces Parliamentary Scheme

Mr. Bellingham: To ask the Secretary of State for Defence what companies contribute to the running costs of the Armed Forces Parliamentary Scheme; and how much each contributed in the last period for which figures are available. [220704]

Derek Twigg: We are grateful to the sponsors of the Armed Forces Parliamentary Scheme (BAE Systems, Rolls Royce, Augusta Westland and their predecessors) who have contributed £45,000 each for this year, and to Sir Neil Thorne for the very considerable moral and financial support he has lent the scheme since inception in 1989.

Mr. Bellingham: To ask the Secretary of State for Defence how much the Armed Forces Parliamentary Scheme cost to run in the last financial year; and how much external sources of funding contributed towards this cost. [220756]

Derek Twigg: The MOD receives no outside funding assistance for its activity in support of the Armed Forces Parliamentary Scheme. The costs to the Department of running the scheme are not recorded separately.

Armed Forces: Contracts

Mr. Wallace: To ask the Secretary of State for Defence if he will reconsider his Department's decision to award the contracts for *(a)* the Future Rapid Effects System and *(b)* the Defence Training Rationalisation to US firms in the light of the US Administration's decision to reopen the US Air Force air tanker contract. [220852]

Mr. Bob Ainsworth *[holding answer 21 July 2008]:* The US decision is a matter for the US Government. Contract awards for FRES and the DTR were based on the best value for money for the UK taxpayer.

Armed Forces: Fire Services

Mr. Pickles: To ask the Secretary of State for Defence what contingency plans there are to use armed forces personnel in the event of a *(a)* fire service strike, *(b)* terrorist incident and *(c)* influenza pandemic; and what changes have been made to those plans since the coming into force of the Civil Contingencies Act 2004. [221392]

Mr. Bob Ainsworth: The armed forces provide assistance to the civil authorities at their request and primarily when the civil authorities lack the necessary capabilities. The Civil Contingencies Act 2004 has mandated that civil authorities should have contingency plans in place to deal with a range of civil crises. As a result civil authorities have developed their capabilities to deal with a wide range of challenges.

In relation to strikes in the fire and rescue service, responsibility for contingency planning rests with the fire and rescue authority, and not the Secretary of State for Defence. Fire and rescue authorities are required to have in place a contingency plan which does not rely upon support from the armed forces. Accordingly the armed forces do not have any contingency plans in place, but Defence Ministers would consider any requests from the Department for Communities and Local Government, the lead Government Department responsible for the Fire and Rescue Service on a case by case basis.

The Home Secretary is primarily responsible for the safety and security of the UK population including protecting the public against terrorism. The police and other first responders have a wide range of capabilities to deal with terrorist incidents. The armed forces do provide some niche capabilities, for example Explosive Ordnance Disposal teams, and have contingency plans in place to make specialist capabilities available should they be required by the police or other civil authorities.

Planning for the effects of an outbreak of pandemic influenza is ongoing and cross government plans are being developed. The magnitude of Defence assistance that could be provided during any outbreak would of course be dependent on how badly the armed forces have been affected by the outbreak.

Armed Forces: Food

Dr. Murrison: To ask the Secretary of State for Defence (1) what assessment has been made of the effects of the Pay As You Dine scheme on nutrition of young soldiers; and what steps he is taking to ensure that young soldiers reliant on the Pay As You Dine scheme consume an adequate diet; [207569]

(2) what assessment has been made of whether the Pay As You Dine scheme has promoted healthy eating; [207570]

(3) what customer satisfaction surveys of the Pay As You Dine scheme have been undertaken and if he will publish the results of the surveys. [207571]

Derek Twigg: I will write to the hon. Member.

Substantive answer from Bob Ainsworth to Andrew Murrison:

My colleague, the Under Secretary of State for Defence, undertook to write to you in answer to your Parliamentary Questions on 2 June 2008, (Official Report, column 669-670W) about Pay As You Dine (PAYD) for Service personnel. I am responding as the Duty Minister.

Prior to the introduction of PAYD, all Service personnel living in Single Living Accommodation paid a fixed food charge to cover three meals per day, irrespective of the number of meals that they actually ate. Inspection showed that on average 50 percent of meals or less were being taken. The Armed Forces Pay Review Body during their annual round of discussions with Service personnel identified strong support, particularly from amongst the junior ranks, for a replacement system which would enable personnel to pay only for food that they ate. In 2005, the MOD gave approval for each of the Services to implement PAYD and this they are now doing in a manner appropriate to meet their individual Service needs. PAYD is part of a concept of integrated catering, retail and leisure services that aims to improve the quality of life for Service personnel. It gives our Service personnel greater freedom by giving them the choice over when, where and how they eat and promotes fairness by ensuring that Service personnel pay only for the meals that they consume.

The PAYD scheme incorporates a core menu which conforms to the Tri Service Menu Policy. Indeed, the three core meals under PAYD are designed to be broadly to the same standard (ie to provide the required calories and nutritional balance if all three meals are taken) as those specified under the old regime with the cost of the core menu being exactly the same as the current Daily Food Charge. The MOD undertakes to provide a variety of healthy palatable food and beverages to all military personnel to enable them to adopt healthy eating habits, a balanced diet and to ensure optimal fitness and performance. Contract Caterers who deliver PAYD are required to provide food at the point of service that meets these requirements. In addition we continue to encourage all personnel to eat in a healthy and balanced manner. However, whether Service personnel are at a PAYD site or not, the ability to ensure that young serving personnel eat a healthy and balanced diet is somewhat limited. The menus at each meal offer healthy options but we do not have the ability to force people to choose that option. With the introduction of PAYD and choice there comes with it a certain degree of personal responsibility in terms of what they eat. There is also a mechanism in place to ensure that nobody is denied a meal if they run out of funds and special dietary and religious eating needs continue to be accommodated.

Your first question referred to the impact on young soldiers. Due to the special circumstances of the nutritional needs of young trainees (of all the Services), Phase one trainees and some Phase two trainees do not participate in PAYD, but continue to pay the Daily Food Charge and are entitled to the core menu to ensure they receive a balanced and nutritional diet which includes appropriate supplements to cater for high activity levels (although it is still the individual's choice as to what they put on their plate at meal times). Trainees receive specifically targeted booklets, lifestyle lectures and guidance during training to ensure that they appreciate the importance of adequate and appropriate eating habits in relation to their professional and personal activities. In addition new recruits are also taught how to budget for PAYD.

In terms of assessing whether or not the PAYD scheme has promoted healthy eating—all contract Caterers are required to provide healthy options at each core meal. Contracts provide for cereals, yoghurt and fruit as part of the breakfast menu and for lunch and dinner salads and fresh vegetables are available. Where concerns are raised, these are addressed directly with the Contractor and alternative healthier options to various meals are introduced. PAYD was introduced to give people choice; it does this by offering a wide variety of meals at varying prices. Healthy options (as part of the core meal) are available if chosen by the individual.

In addition, Defence Food Services has issued all Commanding Officers with a pan-Service booklet "A Guide to Healthy Eating" to complement and reinforce the policy. The Expert Panel of Armed Forces Feeding (EPAFF), in consultation with QinetiQ, has also produced and issued a Recruits Guide to Nutrition, a Servicewoman's Guide to Health and Performance, and an Armed Forces Personal Guide to Nutrition. All of these publications recognise the potential change to individual food choice as a result of the introduction of PAYD and are designed to provide individuals with the necessary guidance and advice to enable them to choose the right foods so that they can more easily cope with the physical demands of military training, operations and competitive sports. The single Services continue to reinforce the healthy eating message through various single Service publications.

The single Services monitor the PAYD scheme through a regular programme of meetings between the Services and Contractor both locally and at HQ level. For the Royal Navy, the contracts require that the contractors undertake regular Customer Surveys and provide returns for assessment by the Royal Navy commercial branch and the Catering Services subject matter experts. The Army has a survey under way which began in late April 2008, the responses to which are still being received. Over 4,000 questionnaires were distributed with the results becoming available over the next few months. The RAF which has only three PAYD sites has monitored feedback on its trial sites via customer feedback forms. However since the start of 2008, focus groups have been held and are currently being completed to indicate consumer views. In addition, a sample of RAF personnel has been completing food diaries over a period of a month to gauge eating patterns. A formal independent assessment by a Market Research company is

currently being carried out at comparable PAYD and non PAYD units. Centrally, feedback is received via the various Continuous Attitude Surveys undertaken by the Single Services. The first UK Tri-Service Armed Forces Continuous Attitude Survey 2007 was published on 9 July 2008 and is available at:

http://www.mod.uk/NR/donlyres/E4D829FFFD4D46F8B9B403837353F6B1/0/afcasresults_2007.pdf.

A copy is also available in the Library of the House.

Armed Forces: Fuel

Anne Main: To ask the Secretary of State for Defence what assessment he has made of the effect of increases in the cost of fuel on the armed forces; and if he will make a statement. [217238]

Mr. Bob Ainsworth: I refer the hon. Member to my letter of 23 July to the hon. Member for Woodspring (Dr. Fox).

Letter from Bob Ainsworth to Liam Fox:

I undertook to write to you in answer to your Parliamentary Question on 19 June 2008, (Official Report, column 1095W) about fuels. I apologise for the delay in replying, but the way we purchase and account for fuel is complex, and it has taken some time to assemble the information you requested.

In my reply on 7 February 2008, (Official Report, column 1492W) I stated that fuel price changes (predominantly affecting maritime and aviation fuel) were estimated to have added outturn costs of around £80 million over the period 2005-06 to 2007-08 to the Department's fuel bill. This figure was based on a costing model. More up-to-date information now available indicates, through this cost model, that the additional cost incurred by the Department over the period 2005-06 to 2007-08 through fuel price rises was some £120-130M.

The table below provides the amount the MOD spent on fuel in each year from 2005-06 to 2007-08, broken down by type of fuel. The information is derived from Top Level Budget Holders' submissions to the overall Departmental Resource Accounts.

			£ million
	2005-06	*2006-07*	*2007-08*
Aviation fuel[1]	255	265	270
Fuels (non-utility)[2]	200	255	305
Totals	455	520	575

[1]For 2005-06 and 2006-07, some aviation fuel expenditure was accounted for in the Stock Consumption line of the published Departmental Resource Accounts for those years. [2] Defined as petroleum-based liquid fuels meeting internationally recognised specifications that are used to power ships and vehicles.

I would stress that these figures cannot be comprehensive, as local purchase arrangements are not always visible at higher levels of accounting: for example, while systems are in place to ensure propriety by recording local purchase of fuel for military vehicles at commercial petrol stations, these do not feed into higher financial management systems. Additionally, the figures do not include utilities (for example, natural gas and heating oil used to heat buildings), which are accounted for separately. There may also be other, smaller elements of fuel expenditure which Departmental financial management systems do not enable us to identify.

Assuming that volumes consumed in core Defence activity such as non-operational exercising have remained broadly constant or increased only marginally over the period, a large proportion—possibly around two-thirds—of the estimated outturn cost increase of £120-130M is likely to be attributable to Request for Resources 2 (RfR2—the Department's claim against the Reserve for operations). I would stress that this is an estimate, not an absolute measure of the impact of fuel price increases on either Defence or the Exchequer.

Where fuel prices increase, there will naturally be an impact on the cost of operations, depending on the volume of consumption at the time and the extent to which any local purchasing arrangements reflect global $ price increases: a broad estimate suggests that this effect could be around £1-2M for every US $1 increase in the price of crude oil.

I am placing a copy of this letter in the Library of the House.

Mr. Hancock: To ask the Secretary of State for Defence (1) what expenditure incurred on fuels for the Armed Forces and Defence Fuel Groups was in *(a)* 2006-07 and *(b)* 2007-08; [219234]

(2) what estimate he has made of the financial effects on the defence budget of a rise in crude oil price of $1 per barrel. [219235]

Mr. Bob Ainsworth: I refer the hon. Member to my letter of 23 July to the hon. Member for Woodspring (Dr. Fox).

Letter from Bob Ainsworth to Liam Fox:

I undertook to write to you in answer to your Parliamentary Question on 19 June 2008, (Official Report, column 1095W) about fuels. I apologise for the delay in replying, but the way we purchase and account for fuel is complex, and it has taken some time to assemble the information you requested.

I am placing a copy of this letter in the Library of the House.

Armed Forces: Holiday Leave

Mr. Jenkins: To ask the Secretary of State for Defence what percentage of annual leave was not taken by service personnel in each year since 2001. [215837]

Mr. Bob Ainsworth: I refer the hon. Member to the answer I gave on 20 May 2008, *Official Report*, column 175W, to the hon. Member for Woodspring (Dr. Fox).

Armed Forces: Housing

Dr. Murrison: To ask the Secretary of State for Defence whether his Department may lease properties where the freehold is owned by Annington Homes to civilians; whether the terms of his Department's contract with Annington Homes prevent long-term leases; and what other restrictions there are on the terms upon which his Department may lease such properties to tenants. [218007]

Derek Twigg: Service Family Accommodation (SFA) in the UK is primarily provided to house entitled Service personnel and their families. Ministry of Defence (MOD) civilian key staff and some members of the MOD Police also have an entitlement to occupy SFA.

The MOD supports the leasing of temporarily surplus SFA to eligible civilians in accordance with wider Government policies on empty homes, however this can only be done where it does not prejudice the need to provide homes for entitled personnel. The rules on eligibility can be found in the Tri-Service Accommodation Regulations, available online at:

www.defence-estates.mod.uk/publications/jsp

In addition to this, the MOD is currently exploring options regarding the leasing of temporary surplus accommodation.

Where there is no long term requirement for SFA, the properties would be returned to AHL and are normally sold on the open market. The onward sale or disposal of these properties is a matter for the company.

Armed Forces: Manpower

Dr. Fox: To ask the Secretary of State for Defence what the *(a)* requirement and *(b)* actual number of (i) unit welfare officers and (ii) padres in each service is. [219997]

Mr. Bob Ainsworth: I refer the hon. Member to the answer my hon. Friend the Under-Secretary of State gave on 21 April 2008 to the hon. Member for North Devon (Nick Harvey).

The Royal Navy has a requirement for 70 chaplains and by the end of the financial year will have 65 in post.

The Army has a requirement for 159 chaplains and have 146 in post.

The RAF has a requirement for 76 chaplains and currently have 64 in post.

Armed Forces: Olympic Games

Bob Russell: To ask the Secretary of State for Defence how many members of the armed forces competed in each Olympic Games for which records are available. [220298]

Derek Twigg: The following tables show the number of personnel from each service who competed in the summer and winter Olympic games for which records are available:

Summer

	Royal Navy	Army	Royal Air Force
1948	[1]—	19	8
1952	1	12	2
1956	0	8	11
1960	0	6	3
1964	0	5	0
1968	2	7	1
1972	2	3	2
1976	2	3	0
1980	1	1	1
1984	2	3	3
1988	1	7	2
1992	0	2	0
1996	0	3	0
2000	1	1	1
2004	0	2	0

Winter

	Royal Navy	Army	Royal Air Force
1964	[1]—	7	1
1968	[1]—	7	3
1972	[1]—	8	2
1976	[1]—	6	0
1980	[1]—	15	0
1984	1	15	2
1988	0	12	3
1992	1	11	0
1994	0	9	0
1998	1	4	1
2002	1	7	3
2006	3	3	2

[1] No record.

Armed Forces: Young People

Nick Harvey: To ask the Secretary of State for Defence how many people under 18 years old serving in the armed forces have been court-martialled in each of the last five years; and what charges were brought at each court-martial where proceedings have been completed. [220314]

Mr. Bob Ainsworth: The following table shows the number of people under 18 serving in the armed forces who have been court-martialled in each of the last five years; and what charges were brought at each court-martial where proceedings have been completed.

	Number of under-18s who have been court-martialled	Charges
Royal Navy		
2003	0	—
2004	0	—
2005	0	—
2006	1	2 x assault by beating
		1 x attempting to unlawfully and maliciously wound
2007	0	—
Army		
2003	1	2 x absence without leave
	1	1 x aggravated vehicle taking
	1	1 x assault occasioning actual bodily harm
	1	1 x handling stolen goods
	1	1 x indecent assault on male person
Total	5	
2004	1	1 x assault occasioning actual bodily harm
	1	1 x unlawfully inflicting grievous bodily harm
Total	2	
2005	1	3 x conduct to the prejudice of good order and military discipline
	2	Each charged: 1 x assault occasioning actual bodily harm
	1	1 x assault occasioning actual bodily harm and 1 x common assault
	1	1 x battery
	1	1 x unlawful wounding and 1 x assault occasioning actual bodily harm
Total	6	
2006	1	1 x absence without leave
	1	1 x affray and doing an act tending and intended to pervert the course of public justice
	1	1 x assault occasioning actual bodily harm
Total	3	
2007	1	2 x absence without leave
	1	2 x fighting
	2	Each charged: 3 x battery
	1	3 x sexual assault
	3	Each charged: 1 x assault occasioning actual bodily harm
	1	1 x battery
	1	1 x harassment
	1	1 x inflicting grievous bodily harm
Total	11	

As the table shows, some individuals had more than one charge brought against them.

The number of people under 18-years-old serving in the Royal Air Force who have been court-martialled in the last five years is not held centrally and could be provided only at disproportionate cost.

Armoured Fighting Vehicles

Ann Winterton: To ask the Secretary of State for Defence what the *(a)* unladen weight, *(b)* carrying capacity by weight, *(c)* external measurements, *(d)* internal measurements of working space and *(e)* cubic capacity of working space is of the (i) Snatch Land Rover and (ii) Force Protection Cheetah. [220773]

Mr. Bob Ainsworth: The Snatch 2 Land Rover has an overall length of 4,800 mm including the spare wheel, an overall height of 2,370 mm and an overall width of 2,000 mm with mirrors folded. I am withholding the information relating to the weight, internal measurements of working space, cubic capacity of working space and vehicle carrying capacity as its disclosure would, or would be likely to prejudice the capability, effectiveness or security of the armed forces.

The Cheetah series of vehicles is produced by the US company Force Protection Inc. The Department does not have any of these vehicles in service and therefore cannot issue what constitutes proprietary information on this vehicle. The hon. Member may, though, be interested in looking at a brochure on the Force Protection Industries website which contains information on the Cheetah's specifications. The address is:

www.forceprotection.net/models/cheetah/specs/cheetah_brochure.pdf

Army Criminal Legal Aid Authority

Harry Cohen: To ask the Secretary of State for Defence if he will bring forward proposals to change the way the Army Criminal Legal Aid Authority

operates following the proceedings on the death of Mr. Baha Musa in Iraq in British custody and the legal aid provided to the defendants. [220888]

Des Browne: No specific issues arose out of the proceedings on the death of Mr. Baha Mousa in Iraq in British custody that indicated the need to change the way in which the Army Criminal Legal Aid Authority (now the Armed Forces Criminal Legal Aid Authority) operates.

Separately, a number of changes have been made to the administration of armed forces legal aid to reflect the interim changes to the civilian criminal legal aid scheme resulting from the Lord Carter's Review of Legal Aid Procurement. Further changes emerging from the review will be considered for adoption in due course. This will allow the Armed Forces Criminal Legal Aid system to continue to reflect the legal aid system operated by the Legal Services Commission.

Defence Estates

Nick Harvey: To ask the Secretary of State for Defence what recent estimate he has made of the value of his Department's disposable land as identified in the defence estates development plan. [220494]

Derek Twigg: Market value estimates are only made once sites are released for disposal.

I am withholding the estimated value of released sites within our disposal plans as their release would prejudice commercial interests.

Departmental Appeals

Andrew Mackinlay: To ask the Secretary of State for Defence on how many occasions his Department has instructed the Treasury Solicitor to seek leave to appeal to the House of Lords from *(a)* the Court of Appeal and *(b)* the House of Lords itself in each of the last 10 years; and on how many occasions the application was rejected. [220820]

Derek Twigg: The information requested is not held centrally and could be provided only at disproportionate cost.

Departmental Buildings

Mr. Henderson: To ask the Secretary of State for Defence how many houses on the Ministry of Defence estate will be refurbished in each of the next five years. [217308]

Derek Twigg: Refurbishment of property is not readily distinguishable from other maintenance or upgrade expenditure when compiling costings and planning for service families accommodation (SFA).

We intend to spend in excess of £8 billion on accommodation over the next decade, of which over £3 billion will be on improvements and upgrades.

Based on current funding levels, the MOD plans to upgrade at least 600 of the worst condition SFA properties in the United Kingdom to the highest Standard for Condition in 2008-09 and at least 800 properties each year until Financial Year 2012. The upgrade programme prioritises those properties identified as being in the greatest need.

In addition, we will carry out routine works, on SFA, including maintenance and replacement of bathrooms, kitchens and boilers, which while not sufficient to upgrade a property to the next level or higher, will significantly improve the quality of life for the occupants.

Mr. Betts: To ask the Secretary of State for Defence (1) what his Department's policy is on improving the energy efficiency of the buildings which it *(a)* rents and *(b)* owns; what changes there have been in the energy efficiency of such buildings in the last (i) five and (ii) 10 years; and whether his Department has adopted targets on energy efficiency improvements in the buildings it occupies over the next (A) five and (B) 10 years; [221095]

(2) what account his Department takes of the level of energy efficiency of buildings before entering into agreements to *(a)* rent and *(b)* purchase those buildings. [221111]

Derek Twigg: The Ministry of Defence (MOD) is committed to meeting the Sustainable Operations on the Government Estate (SOGE) targets for improving energy efficiency, reducing carbon dioxide emissions from buildings relative to 1999-2000 levels and achieving carbon neutrality on its office estate by 2012.

In 2006-07, the last period for which published figures are available, we achieved an improvement in energy efficiency per metre squared of 29 per cent., and reduced carbon dioxide emissions from buildings by some eight per cent., against the relevant SOGE reduction targets of 30 per cent., by 2020 and 12.5 per cent., by 2010-11, respectively.

In addition, the MOD has gone further than the 12.5 per cent., reduction in carbon dioxide emissions required by 2010-11 and has put in place a 15 per cent., reduction target relative to 2004-05 levels, which is to be achieved through increased energy efficiency and greater use of renewable and low carbon technologies.

Where existing buildings are being considered for acquisition or rental, the energy efficiency information provided by the Energy Performance Certificate will be taken into account.

Where new build is concerned, the MOD integrates carbon reduction and sustainable development considerations into its building design and construction projects.

Departmental Disciplinary Proceedings

Mr. Redwood: To ask the Secretary of State for Defence how many staff in his Department and its agencies have been *(a)* dismissed and *(b)* disciplined for their conduct in the last two years. [217414]

Derek Twigg: The following table shows the number of Ministry of Defence civilian employees who have been *(a)* dismissed in the last two financial years.

Financial year	Headcount Number of MOD civilian employees dismissed[1]
2006-07	120
2007-08	100

[1] Includes all non-industrial, industrial and trading fund MOD civilian personnel but excludes Royal Fleet Auxiliary and locally engaged civilian staff for whom no information on exit dismissals is available.

Note:
Numbers have been rounded to the nearest 10.

The following table shows the number of Ministry of Defence civilian employees who have been *(b)* disciplined for their conduct in the last two years. It includes all discipline and restoring efficiency cases; this can vary from poor attendance to excessive sick absence.

	Financial year	
Level 1	2006-07[1]	2007-08
Open cases	—	[2]1,030
New cases	—	[2]200
Closed cases	—	[2]140

[1] Data for financial year 2006-07 are not available.
[2] Numbers are provisional.

Note:
Data provided by PPPA.

Departmental Official Cars

Stephen Hammond: To ask the Secretary of State for Defence which make and model of car he has chosen as his Ministerial car to be provided by the Government Car and Despatch Agency. [217759]

Derek Twigg: I refer the hon. Member to the answer given on 16 July 2008, *Official Report*, column 414W, by the Parliamentary Under-Secretary of State for Transport.

Departmental Official Hospitality

Mr. Philip Hammond: To ask the Secretary of State for Defence how much his Department and its agencies spent on entertainment in each of the last five years. [219254]

Derek Twigg: We report expenditure on hospitality and entertainment in our annual report and accounts.

Copies of our annual report and accounts are available in the Library of the House and online at:

http://www.mod.uk/DefenceInternet/AboutDefence/CorporatePublications/AnnualReports/

Departmental Pay

Dr. Cable: To ask the Secretary of State for Defence how many and what proportion of staff in his Department received bonus payments in 2007-08; what the total amount of bonuses paid was; what the largest single payment was; and if he will make a statement. [213304]

Derek Twigg: The number and value of annual appraisal-related bonuses paid to members of the senior civil service (SCS), to fixed term appointees and to civil servants below the level of the SCS covered by the MOD main pay deal (excluding trading funds and agencies), in 2007-08, are listed in tables 1 to 3 as follows. The Ministry of Defence also awards special bonuses to individuals and teams for exceptional performance in a specific task or for the achievement of professional qualifications which benefit MOD and the individual; these are shown in table 4. The final table (5) shows the total value of all bonuses paid in cash terms; it is not possible at this time to give the percentage of the work force to which this refers and this will be advised at the end of July.

Table 1: Bonuses paid to senior civil servants

	2007-08
Number of bonuses paid	186
Value of bonuses paid (£)	1,325,700
Highest bonus payment (£)	17,600

Table 2: Bonuses paid to fixed term appointees

	2007-08
Number of bonuses paid	[1]16
Value of bonuses paid (£)	333,915
Highest bonus payment (£)	50,000

[1] There is one outstanding bonus payment still to be agreed.

Table 3: End of year bonuses paid to staff below the level of the SCS (excluding MOD trading fund agencies

	2007-08
Number of bonuses paid	52,193
Value of bonuses paid (£)	39,695,110
Highest bonus payment (£)	4,695

Table 4: Special bonuses (excluding MOD trading fund agencies)

	2007-08
Number of staff who received bonus(es)	8,428
Value of bonuses paid (£)	3,455,124
Highest bonus payment (£)	2,000

Table 5: Summary of bonuses paid

Total	2007-08
Value of all bonuses paid (£)	44,589,288
Percentage of total civilian work force	[1]—

[1] Staff numbers taken from departmental end year accounts not yet available.

Substantive answer from Derek Twigg to Vincent Cable:

I undertook to write to you in answer to your Parliamentary Question of 21 July 2008, (Official Report, column 842-843W) about bonus payments.

I am now able to provide the percentage of the workforce who received a bonus payment in 2007-08. An updated Table 5 is shown below:

Table 5: Summary of bonuses paid

Total	2007-08
Value of all bonuses paid	£44,589,288
Percentage of total civilian workforce	72.5

The figures in the table represent bonuses paid to members of the Senior Civil Service (SCS), fixed term appointees, and to civil servants, covered by the MOD main pay deal, below the level of the SCS.

For the SCS, under the current arrangements delegated to departments from the Cabinet Office, bonuses are used to reward excellent performance during the year, and are based on a judgement of how well an individual has performed relative to their peers. The intention is that the best performers receive the biggest bonuses.

For the grades below the SCS, bonus awards are made on the judgement of local managers of an individual's contribution to the year's business objectives, relative to those of colleagues in the same pay band or skill zone. Individual recommendations for or against awards are made by line managers in accordance with corporate criteria and are subsequently reviewed and validated by senior officers.

Mr. Hoban: To ask the Secretary of State for Defence how much was claimed in reimbursable expenses by special advisers in his Department in each of the last 10 years. [215231]

Derek Twigg: Procedures for reimbursing staff expenses are set out in the MOD policy manual and are in line with the provisions set out in the Civil Service Management Code. The code can be viewed at:

www.civilservice.gov.uk/iam/codes/csmc/index.asp.

As temporary civil servants special advisers are subject to the same rules.

The following table contains the total amount of reimbursable expenses claimed by MOD special advisers over the last 10 years.

Financial year	*Total expenses (£)*
1997-98	321.54
1998-99	444.33
1999-2000	1,685.83
2000-01	50.00
2001-02	182.42
2002-03	3,699.02
2003-04	3,040.12
2004-05	3,465.12
2005-06	1,104.57
2006-07	0
2007-08	44.00

These reimbursable expenses cover costs associated with travel, parking, accommodation, subsistence and the incidental expenses allowance claimed while on duty in UK and abroad.

Mr. Philip Hammond: To ask the Secretary of State for Defence how much was claimed in reimbursable expenses by press officers in his Department and its agencies in each of the last three financial years. [221181]

Derek Twigg: This information is not held centrally and could be provided only at disproportionate cost.

Where authorised, reimbursable expenses are provided in line with MOD Guidance and wider Government regulations.

Departmental Postal Services

Mr. Hoban: To ask the Secretary of State for Defence what steps his Department has taken to monitor the cost of its mail services in the last 12 months. [221479]
